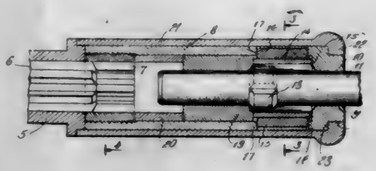
In an equalizing device of the class described, the combination with a motor vehicle having an axle and a transverse spring, of a rigid shackle support extending upwardly from said axle, levers fulcrumed on said shackle support, said levers having substantially horizontal shorter arms that extend inwardly and are connected with the ends of said vehicle springs and having longer arms that extend outwardly and upwardly, and helical tension springs secured to said axle and connected with said longer lever arms and coacting with said vehicle springs to afford a resilient support and permit equalizing movement of the ends of said vehicle springs toward and away from said axle.

1,566,630. ROCK DRILL. THOMAS E. STURTEVANT, Dover, N. J., assignor to McKiernan-Terry Drill Company, Dover, N. J., a Corporation of New Jersey. Filed May 1, 1920. Serial No. 378,090. 4 Claims. (Cl. 121—32.)



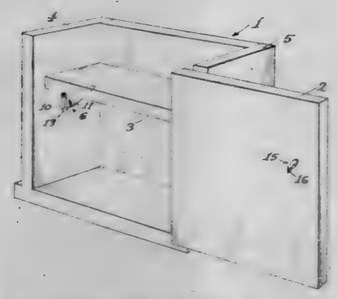
1. In a drill of the character described, the combination with a cylinder and a reciprocable piston therein, of a carrier sleeve having a reduced end provided with a guide bore for the shank of a drill bit, a lock bushing confined within said sleeve and keyed thereto, a casing rotatably receiving the carrier sleeve and secured to the cylinder, said casing having an integral annular flange engaging the reduced end of the carrier sleeve and rotatably confining the carrier sleeve therein, a nut in the end of the carrier sleeve opposite its reduced end, and means in the carrier sleeve between the nut and lock bushing arranged to cooperate with the nut to hold the lock bushing in position and to slidably but non-rotatively connect the carrier sleeve with the piston.

1,566,631. PILE DRIVING AND PULLING MECHANISM. THOMAS E. STURTEVANT, Dover, N. J., assignor to McKiernan-Terry Drill Company, Dover, N. J., a Corporation of New Jersey. Filed Mar. 27, 1922. Serial No. 547,168. 8 Claims. (Cl. 61—76.)

1. In a device for driving and pulling piles, a reciprocatory pile hammer, a pair of anvil blocks disposed at the opposite ends of the hammer and means for relatively slidably adjusting the blocks and hammer to bring either block into the range of the hammer.

---

1,566,632. DOOR CATCH. HENRY A. SWENSON, Tustin, Calif. Filed Mar. 18, 1925. Serial No. 16,362. 2 Claims. (Cl. 292—17.)

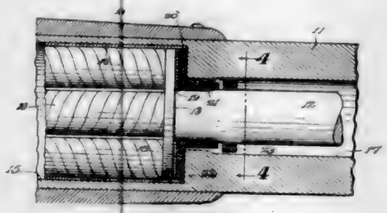


1. A door catch having a female latch member formed of sheet metal bent to form an elongated flat seat with spaced side walls extending directly from the base at right angles thereto, the side walls forming a mouth at right angles to the base, the side walls being curved inwardly to form a yielding restriction adjacent the mouth, and a male latch member comprising a diamond-shaped stud with a head portion and a narrow restriction between the head and the base of the stud.

---

1,566,633. DEVICE FOR PREVENTING GREASE LEAKAGE IN AXLE BEARINGS. JAMES E. TAYLOR, Dallas, Tex. Filed July 27, 1923. Serial No. 654,187. 1 Claim. (Cl. 286—7.)

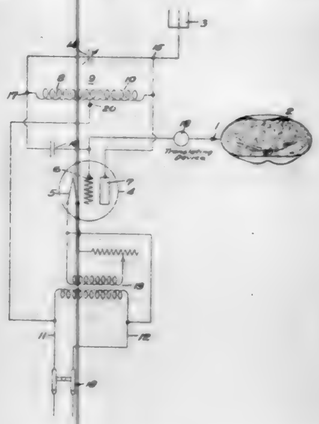
A structure of the character described comprising a shaft housing formed with a bore having one end portion enlarged to form a bearing chamber having a shoulder at its inner end, a shaft extending axially through the bore of said housing in spaced relation to the walls thereof and through said bearing chamber, anti-friction means in said bearing chamber about said shaft and including an inner disk spaced from said shoulder, a packing disk of compressible material disposed about said shaft and fitted tightly in said chamber between said shoulder and the inner disk of said anti-friction means,



an annular axially extending bead about the outer peripheral edge of the inner face of said packing disk and compressed against said shoulder, and a sleeve extending from the inner peripheral edge portion of the inner face of said packing disk and integral therewith and fitted snugly about said shaft but free from frictional binding engagement therewith.

---

1,566,634. APPARATUS FOR TREATING DISEASE. HERBERT P. TRAMBLEY, San Francisco, Calif. Filed June 18, 1923. Serial No. 645,997. 2 Claims. (Cl. 250—36.)

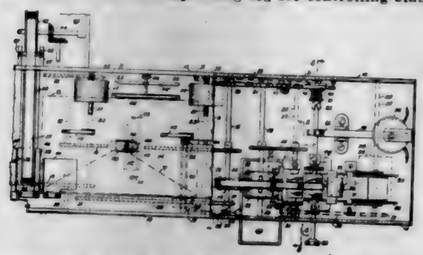


1. In a system for producing electric oscillations, a thermionic tube having an input and an output circuit, said input circuit including a filament and a control electrode, and said output circuit including the filament and an anode, an inductor connected between the control electrode and the anode for coupling these circuits together, a condenser inserted between the control electrode and the inductor, and a load circuit connected directly across the control electrode and the anode.

---

1,566,635. AUTOMATIC STAMPING AND SEALING MACHINE. MAXWELL VIDAVER, New York, N. Y., assignor, by mesne assignments, to Vidaver Mailing Machine Co., Inc., New York, N. Y., a Corporation of New York. Filed Mar. 27, 1925. Serial No. 18,686. 64 Claims. (Cl. 216—3.)

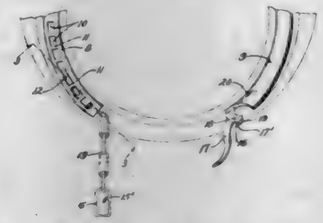
1. In a machine of the character described, in combination, means for feeding an envelope, means for applying a stamp to said envelope, and means responsive to the weight of the envelope being fed for controlling stamp



application by said applying means and being operative to vary control of said applying means while said feeding means continues feeding of the envelope.

---

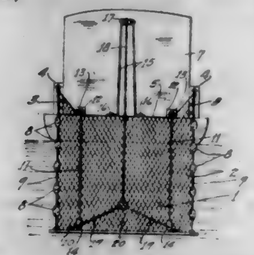
1,566,636. HAME. JAMES M. WALSH, Milwaukee, Wis. Filed Jan. 7, 1924. Serial No. 684,893. 6 Claims. (Cl. 54—27.)



4. The combination with a pair of hame members having lower channeled portions and one of said portions being in the form of a hook, a lever hook fulcrumed to said hook portion and having a handle portion which swings into the adjacent channeled portion to register its hook portion with the hame hook portion, the other hame member being formed with spaced transverse bars and with an opening at its lower end, and a chain extending through said end opening and having a hook at its inner end which is engageable with any one of the bars for adjusting the length of the chain portion extending out of the hame member, the opposite end of the chain having a link through which the lever handle may be extended for removably connecting said link to the hame hook portion, said chain hook and link being of greater size than the end opening to prevent separation of the chain from the hame member.

---

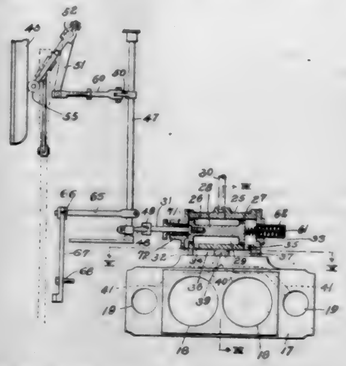
1,566,637. FISH NET. JAMES J. WARD, St. Louis, Mo. Filed Sept. 28, 1925. Serial No. 59,093. 3 Claims. (Cl. 43—8.)



1. A fish net of the character described, comprising a substantially rectangular body portion the upper end of which is adapted to be affixed to the deck of a boat, the lower end of said body portion being attached to a metal bar disposed transversely to said body portion and having sufficient weight to cause the said body portion to be drawn taut when depending into the water, triangular winged portions attached to the upper corners of said body portion so that the base of the triangle will coincide with the minor axis of the body portion and the perpendicular side of the triangular portion of said wings will be disposed parallel to the major axis of the main body of the net.

---

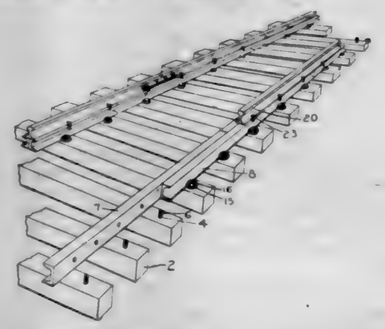
1,566,638. TILE PRESS. MILTON V. WASH, Beaver Falls, Pa., assignor to Beaver Falls Art Tile Company, Beaver Falls, Pa., a Corporation of Pennsylvania. Filed Apr. 4, 1925. Serial No. 20,701. 7 Claims. (Cl. 25—42.)



1. In a tile press, the combination of a reciprocable plunger provided with an upper die, a base block provided with two pressure cylinders, an anvil mounted for vertical movement in said block and provided with a lower die, raising and lowering pistons attached to said anvil and arranged in said pressure cylinders, a valve comprising a casing communicating with said cylinders and an element movable to alternate positions for alternately controlling flow of pressure fluid to an exhaust from said cylinders, and means coordinated with the reciprocation of said plunger for moving said valve element.

---

1,566,639. RAIL SUPPORT. LOUIS M. ADAMS, Los Angeles, Calif. Filed Mar. 10, 1925. Serial No. 14,453. 2 Claims. (Cl. 238—26.)

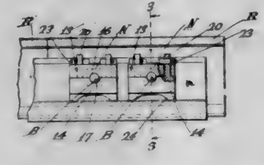


1. A railway track comprising in combination ties, channels having vertical webs and horizontal flat flanges, means to clamp the webs back to back and in contact, said channels extending over a plurality of ties, means to clamp the lower flanges of the channels to the ties,

road carrying rails having flat lower flanges of less width than the width of the upper flanges of the channels and means to clamp said rail flanges to the upper flanges of the channels.

---

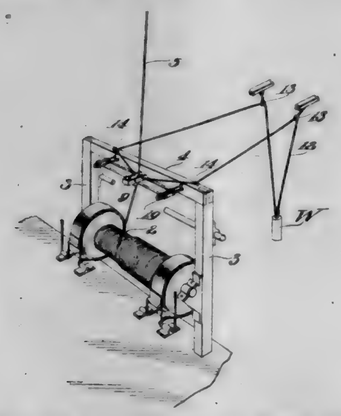
1,566,640. RAIL-JOINT NUT LOCK. JOHN B. BEAUDRY, Los Angeles, Calif. Filed Oct. 27, 1925. Serial No. 65,105. 5 Claims. (Cl. 151—62.)



1. In a rail joint wherein there are fish plates arranged along the sides of adjacent rail ends, bolts extending through the fish plates and rail ends, and nuts threaded onto the bolts, a lock for each nut comprising two parts adapted to be secured together about the end of each bolt, said parts having threaded recesses formed thereon adapted to cooperate to form an aperture which is threaded complementarily to the threads on the bolt, one of said parts being so constructed as to be engageable upon the base of the fish plate to prevent its rotation relatively to the bolt, and means associated with said parts engageable upon the nut on the bolt for preventing relative rotation between the nut and said parts.

---

1,566,641. LINE SPOOL FOR ROTARY DRILLS AND THE LIKE. JAMES L. BELL, Montebello, Calif. Filed Dec. 13, 1923. Serial No. 680,442. 1 Claim. (Cl. 242—157.)

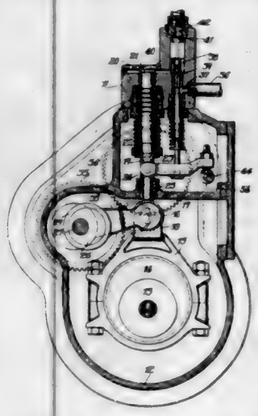


A line spool for rotary drills and the like comprising slotted brackets, a frame mounted in the brackets for lateral movement, a slide shiftable along with the said frame and provided with a guide pulley engageable by a cable running to a drum, whereby to prevent the piling up of the cable on a drum by a whipping action of the cable.

---

1,566,642. INTERNAL-COMBUSTION ENGINE. CARL A. BJORNSSON, Wellsville, N. Y., assignor to McEwen Bros., Wellsville, N. Y., a Corporation of New York. Filed July 18, 1924. Serial No. 726,663. 9 Claims. (Cl. 123—140.)

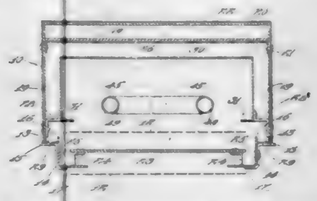
1. An internal combustion engine which comprises, a crank shaft and a cylinder, a pump for forcing fuel from a supply source to said cylinder, said pump having means for transmitting a thrust from said crank shaft direct to



fuel to be forced to said cylinder, and means causing said pump to supply fuel to said cylinder only on alternate revolutions of said crank shaft.

---

1,566,643. RAISED-PRINTING APPARATUS. JAMES A. BLAKE, Cambridge, Mass., assignor to Raised Process Machine Company, Boston, Mass., a Corporation of Massachusetts. Filed July 22, 1924. Serial No. 727,578. 9 Claims. (Cl. 34—12.)



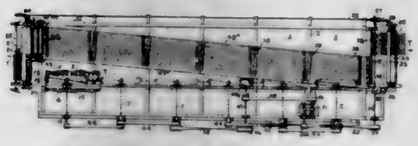
1. In an apparatus for producing raised printing, two hollow casings, one surrounding the other, each having a top and sides and an open bottom, said casings being spaced to form an air space between their walls at the top and sides, a heating medium in the inner casing, the top wall of the inner casing being provided with air ports to permit the heated air to pass from the interior of the inner casing into the space between the top walls of the two casings, and thence down between the adjacent side walls of the two casings to the outside air, and a conveyor for the printed articles which travels through the lower part of the outer casing.

---

1,566,644. METHOD AND MEANS FOR DRYING TEXTILE MATERIAL. WILLIAM G. R. BRAEMER, Haddonfield, N. J., and JOSEPH ROBERTS, Providence, R. I., assignors to General Fire Extinguisher Company, a Corporation of New York. Filed Dec. 10, 1924. Serial No. 754,889. 12 Claims. (Cl. 34—12.)

1. In a drying apparatus, the combination of a casing having a drying chamber provided with inlets at one end and outlets at the other end for yarn or other material being dried and a heating chamber parallel to the drying chamber and in communication with the bottom portion thereof, heating coils arranged in the heating chamber for heating the circulating air, a plurality of circulating fans arranged at intervals along the length of the chambers to provide a plurality of transversely

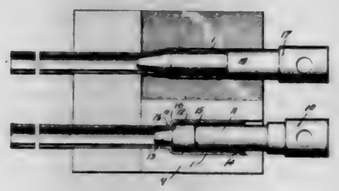
circulating means for causing the currents of air to circulate successively through the drying chamber and heating chamber, means for conveying the yarn or other material to be dried lengthwise through the drying chamber, two sets of means for feeding the yarn or other material into the intake end of the drying chamber at different places transversely situated, and two separate means for delivering the treated yarn or other material from the outlet end of the drying chamber



and at different places transversely situated, whereby the yarn or other material being dried is passed through the apparatus in two stages and thereby receives two consecutive drying treatments, the means for delivering the yarn or other material after it leaves the drying chamber in the first stage or passage therethrough of the drying operation being constructed for feeding the yarn or other material to the intake end of the drying chamber preliminary to the second stage of the drying treatment thereof.

---

1,566,645. TUBE EXPANDING AND COMPRESSING TOOL. ALFRED B. BREEZE, Cincinnati, Ohio, assignor to The Cincinnati Ball Crank Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Dec. 26, 1922. Serial No. 608,827. 1 Claim. (Cl. 78—63.)

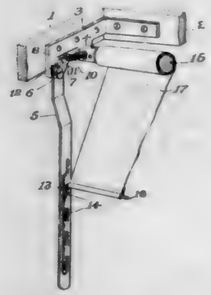


In a device of the character described, comprising a separable die, and a forming tool adapted to be thrust into the end of a tube disposed within the die, said tool having a cylindrical shank portion, and a cylindrical head portion of greater diameter than the shank portion for expanding and forming the tube, and a tapering tip extending from the forward end of the head portion, the head portion at the end toward the tip portion, providing a shoulder overhanging a shoulder of the die, for compressing the metal of the tube against the die shoulder.

---

1,566,646. SHADE FOR AUTOMOBILE WINDSHIELDS. WILLIAM BREWSTER, New York, and SEYMOUR J. BAUM, Flushing, N. Y. Filed July 14, 1925. Serial No. 43,440. 3 Claims. (Cl. 296—97.)

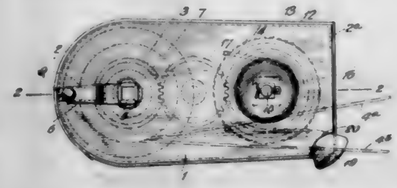
1. An inside shade for an automobile windshield, comprising brackets secured to the front roof portions of the automobile body at opposite sides thereof and carrying shade fixtures, a spring shade roller secured within said fixtures, a shade carried by said roller and having at its lower end a rod which extends beyond the shade at each side, elongated notched levers pivoted near their outer ends to said brackets and having ears adjacent



said pivotal points, and spring elements intermediate said fixtures and ears whereby said levers are retained at the limits of their upward and downward swings.

---

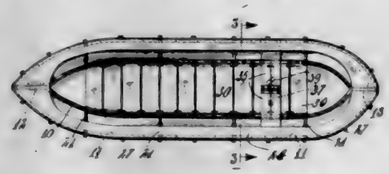
1,566,647. CHALK-LINE DEVICE. OSCAR M. BRYAN, Peru, Ind. Filed May 23, 1922. Serial No. 562,951. 4 Claims. (Cl. 33—87.)



1. A chalk line device comprising a casing, a line reel and a chalking element rotatively mounted on two parallel transverse bearings in the casing, and the chalking element being slidable on its bearings, the casing having in the end adjacent the chalking element an upright slot adjacent one side providing a passage for the chalk line, a drive connection between the reel and chalking element, and a spring bearing between the other side of the casing and the chalking element and operative to press the chalking element yieldingly against the first mentioned side of the casing.

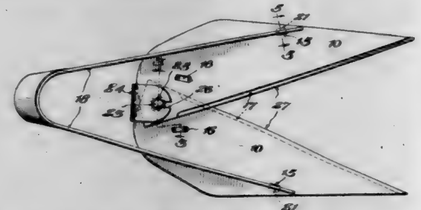
---

1,566,648. COLLAPSIBLE BOAT. JOSÉ MARIA CALDERON, Jr., Rio Grande, P. R. Filed Mar. 20, 1925. Serial No. 16,907. 5 Claims. (Cl. 9—2.)



1. A collapsible boat comprising a frame made up of top and bottom side members each consisting of a number of sections detachably secured to one another, ribs extending between the upper and lower side members and detachably secured to the same, and a flexible sheathing element detachably secured on said frame, and a flexible decking element separate from said sheathing element secured upon said frame.

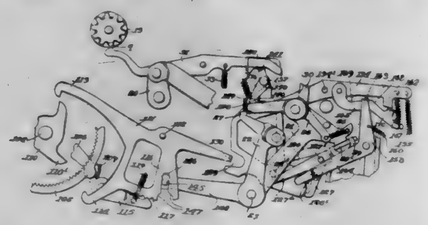
1,566,649. SHEARS. GUSTAVE O. CARLSON, Wethersfield, Conn., assignor of one-third to Henry Hanson, Middletown, Conn., and one-third to Carl O. Hedstrom, Portland, Conn. Filed June 13, 1924. Serial No. 719,909. 14 Claims. (Cl. 30—13.)



1. Shears having blades; a ball by which the blades are pivotally connected; and means outside of the blades having connection with the ball for maintaining the same in operative relation with the blades.

---

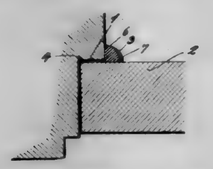
1,566,650. OPERATING MEANS FOR CALCULATORS. GEORGE C. CHASE, South Orange, N. J., assignor to Monroe Calculating Machine Company, New York, N. Y., a Corporation of New York. Filed Nov. 21, 1922. Serial No. 602,366. 175 Claims. (C. 235—73.)



164. In a calculating machine, numeral wheels, reversible actuating means therefor, driving means including a motor, means for effecting transmission of movement forwardly or reversely from the driving means to the actuating means, including a manually operable device movable selectively in either of two directions from neutral position, and an independently movable operating member normally coupled thereto, means controlled by the numeral wheels for stopping the actuating means, means for automatically uncoupling the operating device from the operating members during the functioning of said stopping means, and means for restoring the operating device and the operating member independently to normal re-coupling position.

---

1,566,651. WEATHER STRIP. HANS CHRISTENSEN, Denver, Colo., assignor to The Banner Rubber Company, Denver, Colo., a Corporation of Colorado. Filed Oct. 26, 1925. Serial No. 64,810. 2 Claims. (Cl. 20—69.)



1. A weather strip adapted to be attached to a piece having a rectangular corner, consisting of a piece of rubber composition having a cross section comprising a body portion of sector shape and of an angular extent greater than 90°, said body portion having one side extending across the center point in the same plane whereby the angle between the other side and said flange will be less than 90°.

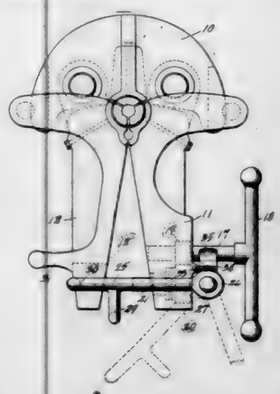
---

1,566,652. OPTICAL DIAGNOSTIC INSTRUMENT. HANS CLEMENT, New York, N. Y., assignor to General Optical Company, Inc., a Corporation of New York. Filed July 10, 1924. Serial No. 725,266. 8 Claims. (Cl. 88—20.)

1. An optical diagnostic instrument comprising a tube and a condensing lens mounted therein, a lamp in the tube, and a ray filter holder rotatively mounted in the tube between the lamp and condensing lens and adjustable between two positions in one of which a ray filter is interposed in the path of the light.

---

1,566,653. GATE AND CLAMPING DEVICE FOR WIRE LINE CLAMPS. FRANK E. CROTTO, Tulsa, Okla., assignor to Western Supply Company, Tulsa, Okla. Filed Oct. 28, 1924. Serial No. 746,259. 7 Claims. (Cl. 24—135.)

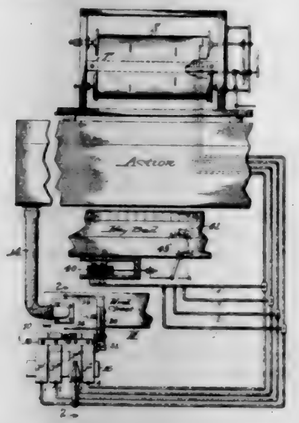


1. In a clamp of the character described, the combination with a pair of clamping arms, of a gate adapted to engage with one of the arms, means carried by the

other arm supporting the gate and for displacing it to bring the arms together, and a reduction gearing for operating said means including an actuating member for the said gearing.

---

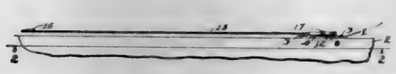
1,566,654. EXPRESSION-CONTROLLING MECHANISM FOR MUSICAL INSTRUMENTS. THOMAS DANQUARD, New York, N. Y., assignor to Auto Pneumatic Action Company, a Corporation of New York. Filed Feb. 24, 1922. Serial No. 538,939. 8 Claims. (Cl. 84—42.)



1. In expression controlling mechanism for musical instruments comprising a regulator valve and spring, a series of united regulator pneumatics connected to said valve, a series of valves controlling the regulator pneumatics, and air passages arranged so that when one valve of the series is operated the valve or valves at one side thereof also will be operated.

---

1,566,655. SADIRON-CORD HOLDER. ROY L. DAVID, San Jose, Calif. Filed Oct. 20, 1924. Serial No. 744,821. 1 Claim. (Cl. 248—30.5.)

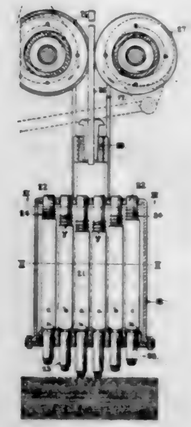


A sad-iron cord support comprising a supporting element mountable upon an ironing board, a flanged cap member revolubly mounted on said element and having an opening therein, a cord supporting arm having a portion thereof coiled within said member to form a spring and extending through said opening and bearing against an edge thereof, means for securing the inner end of said coiled portion of the arm to said revoluble member, and releasable means for locking said member against rotation relative to said supporting element.

---

1,566,656. TREATING SHEETS. SAMUEL E. DIESCHER, Wilkinsburg, Pa., assignor to S. Diescher and Sons, a Copartnership consisting of Samuel E. Diescher and August P. Diescher, Pittsburgh, Pa. Original application filed July 2, 1923. Serial No. 649,168. Divided and this application filed December 24, 1924. Serial No. 757,953. 2 Claims. (Cl. 29—19.)

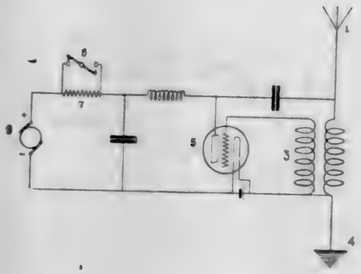
2. The method herein described of treating a pack or pile of adherent sheets which consists in causing a flow of metal within a given area of plurality of adherent sheets, thereby causing a buckling of the sheets around such area, maintaining pressure on the area acted on, and subjecting the sheets outside of such area to



percussion, thereby causing a flow of metal, and a consequent buckling in directions towards the edges of the sheets.

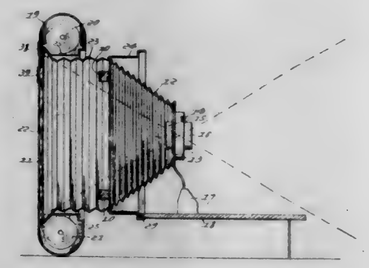
---

1,566,657. WIRELESS TRANSMITTER. WILLIAM THEODORE DITCHAM, Lebanon Park, England, assignor to Radio Corporation of America, a Corporation of Delaware. Original application filed Dec. 18, 1920, Serial No. 431,582. Patent No. 1,454,598, dated May 8, 1923. Divided and this application filed Feb. 8, 1923. Serial No. 617,894. 3 Claims. (Cl. 250—19.)



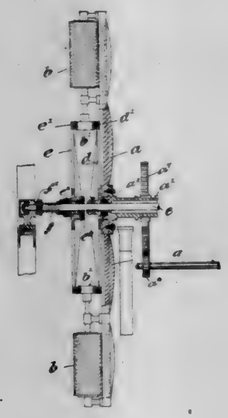
1. In a wireless transmitter the combination of an oscillating valve, a circuit containing a source of direct current supply for said valve, and signaling means for variating the amplitude of the oscillations of said valve while maintaining a frequency constant, said signalling means comprising a resistance interposed between said source of supply and said valve and an interrupter for short circuiting said resistance.

1,566,658. CAMERA. HARRY R. DURYEA, Pittsford, N. Y., assignor of one-half to Allyn T. Gilbert, Newark, N. J. Filed Aug. 28, 1922. Serial No. 584,825. 22 Claims. (Cl. 95—82.)



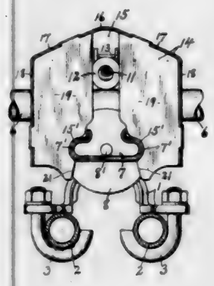
1. A photographic camera having inner and outer exposure defining frames, one of which is movable in a path perpendicular to the plane of the other, and an extensible and collapsible guard, between the frames and a single holder for the sensitized material supported in fixed relation to the outer exposure defining frame and adapted to support the material in proper optical relation to the lens of the camera for any relative adjustment between the two exposure defining frames.

1,566,659. BALANCED FRICTION DRIVING MECHANISM FOR ACTUATING ROTARY BRUSHES, ROLLERS, AND SUCH LIKE. JOSEPH DUTTON, Manchester, England. Filed Sept. 16, 1924. Serial No. 737,981. 3 Claims. (Cl. 15—40.)



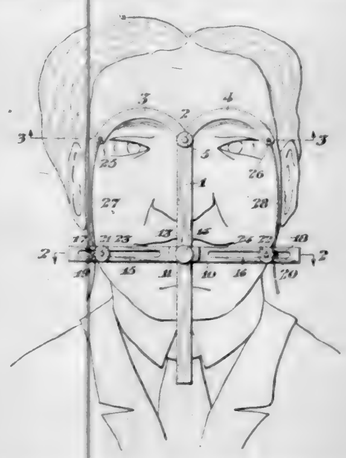
1. A device of the character described, comprising, in combination, a driving shaft, a disk mounted on said shaft for rotation relatively thereto, a plurality of rotatable brushes radially disposed on said disk and adapted to be moved bodily around the axis of the disk, a friction disk secured to said shaft for rotation therewith, means in engagement with said friction disk for rotating said brushes on their own axes, and gearing between said shaft and first disk for rotating the latter.

1,566,660. PIPE CARRIER FOR RAILWAY SIGNAL SYSTEMS. JOHN C. EDWARDS and WILLIAM F. BOSSERT, Utica, N. Y., assignors to Signal Accessories Corporation, Utica, N. Y., a Corporation of New York. Filed Apr. 10, 1925. Serial No. 22,034. 6 Claims. (Cl. 308—7.)



1. A hood for pipe carriers having top, side and end walls, two of the opposite walls being divided vertically from bottom to top, the top wall extending across the division.

1,566,661. DENTAL DELINEATOR. NORMAN S. ESSIG, Philadelphia, Pa., assignor to The S. S. White Dental Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 15, 1920. Serial No. 366,073. 5 Claims. (Cl. 33—174.)

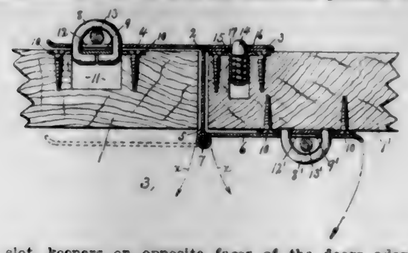


1. A device of the class described, comprising a standard having laterally extended arms, a cross-bar adjustable longitudinally on said standard and extending laterally upon opposite sides thereof, and a pliant connection between the respective arms and said cross-bar, conformable to the contour lines of the human face.

1,566,662. TWO-WAY LOCK. CHARLES A. FAIRAND, Watertown, N. Y. Filed Feb. 25, 1925. Serial No. 11,491. 1 Claim. (Cl. 292—281.)

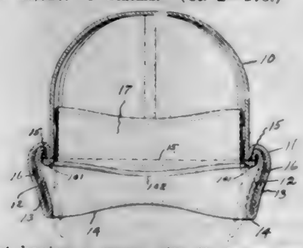
A double door lock of the character described, comprising a T-shaped plate having its stem adapted to pass between the meeting edges of the doors and its branches adapted to overlap upon the adjacent sides of the doors, one of said branches being provided with a slot, a hasp

hinged to the stem to swing to and from a position across the opposite face of one of the doors and provided with



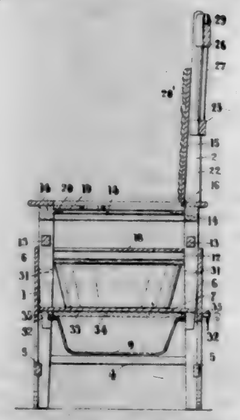
a slot, keepers on opposite faces of the doors adapted to enter the adjacent slots and locking members engaging said keepers.

1,566,663. HAT. ROBERT FINKELSTEIN, Brooklyn, N. Y., assignor to Herschberg & Company, New York, N. Y., a Corporation of New York. Filed Apr. 2, 1925. Serial No. 20,027. 5 Claims. (Cl. 2—175.)



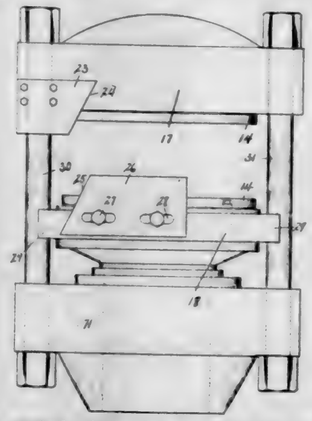
1. A hat having a crown with its lower portion substantially vertical and its lower edge generally horizontal with a cut-out at each side of the crown above the position of the wearer's ears, and a brim connected to the lower edge of the crown and extending outwardly and downwardly below the lower edge of the crown.

1,566,664. COMBINED OR CONVERTIBLE FURNITURE. CHARLES FREAKES, London, England. Filed Mar. 9, 1925. Serial No. 14,321. 6 Claims. (Cl. 155—88.)



1. An article of furniture including a lower section having parallel legs and sides rigidly connected to each other and having a compartment at the top thereof, an upper section in the form of a chair having a bottom and parallel legs, said legs being slidably received in the lower section, the bottom of said chair forming a cover for the top of said compartment in the lower section when the upper section is in its lowermost position, and means for releasably holding the chair section elevated above its lowermost position in the lower section.

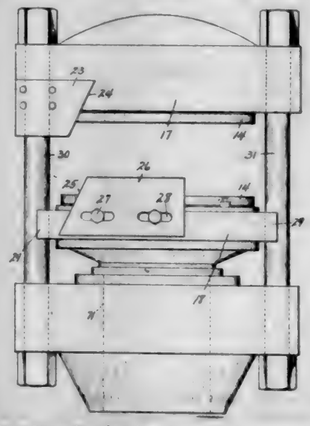
1,566,665. METHOD OF PRODUCING RUBBER ARTICLES. ALLEN H. FROST and CHARLES FRED FENLASON, Jr., Malone, N. Y. Filed Nov. 13, 1922, Serial No. 600,642. Renewed Nov. 7, 1925. 15 Claims. (Cl. 18—56.)



1. The method of forming annular tubes of rubber comprising uniting the edges of two annular strips of plastic rubber stock by the application of pressure to form an endless tube, then subjecting the tube to the application of external heat, introducing air under pressure into the interior of the tube during such heating, permitting the discharge of such air from the tube, and thereafter alternately admitting steam under pressure to the interior of the tube, and permitting the discharge of steam from the interior of the tube.

2. The method of forming annular tube of rubber, comprising homogeneously uniting the edges of two annular strips of plastic rubber stock by the application of high pressure and simultaneous relative rotary movement to thereby form an endless tube, then placing the tube in a curing mold, and thereafter curing the tube.

1,566,666. APPARATUS FOR PRODUCING RUBBER ARTICLES. ALLEN H. FROST and CHARLES FRED FENLASON, Jr., Malone, N. Y. Filed Nov. 13, 1922. Serial No. 600,643. 7 Claims. (Cl. 18—19.)

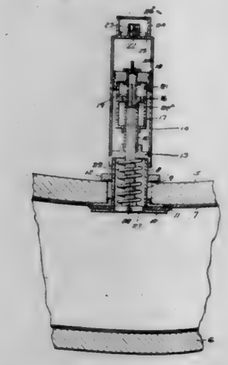


1. In an apparatus for forming endless tubes of rubber, two cooperating annular mold sections, means for bring-

ing said mold sections into pressing co-action, and means for causing a rotary movement of one of said sections while in pressing co-action with the other section.

---

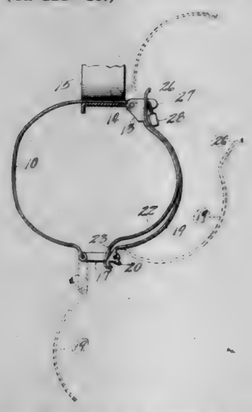
1,566,667. AUTOMATIC AIR PUMP FOR MOTOR-VEHICLE TIRES. FREDERICK F. FULLER, Govert, S. Dak. Filed Apr. 23, 1924. Serial No. 708,490. 1 Claim. (Cl. 152—11.)



An automatic tire inflating pump comprising a tubular member constructed to have air tight connection with the inner tube of a tire, a cylinder attached thereto, a tube fixed with relation to the cylinder and projecting thereinto, a piston upon the end of said tube, a piston in the first named cylinder, a movable cylinder carried by the last named piston and embracing the first named piston, a hollow piston rod by which the last named piston is carried and which slides through said tube, a pressure head upon the inner end of the hollow piston rod, which is slidable in the tubular member, a spring bearing upon the pressure head for effecting a movement, thereof, in one direction, check valves at each end of the hollow piston rod and a check valve opening into the first named cylinder, there being, ports formed in the hollow piston rods between the two pistons.

---

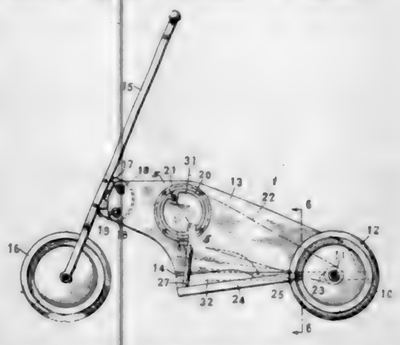
1,566,668. RIM AND TIRE CLAMP. OTTO GLASS, Rosebud, Tex. Filed Dec. 29, 1924. Serial No. 758,552. 5 Claims. (Cl. 224—29.)



1. In a spare tire and rim clamp, an arcuate supporting member adapted to be secured at one end to a fixed part, an arcuate arm pivoted adjacent the secured end of said member, a locking lever pivoted at the free end of said member and extending substantially concentric to said arm, a fulcrum member carried by said lever to engage the free end of said arm, and means for securing the free end of said lever adjacent the pivot of said arm.

---

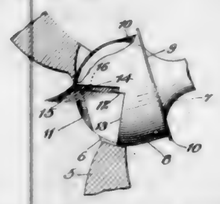
1,566,669. TREADLE-OPERATED VEHICLE. ALONZO M. GREENE, New London, Conn. Filed Dec. 29, 1922. Serial No. 609,567. 9 Claims. (Cl. 208—34.)



1. In a vehicle, a flat vertically disposed body, treadles pivoted at opposite sides thereof, bearing rings secured at opposite sides of said body, a rotatable member supported in said body by said bearing rings, links connecting said treadles and said rotatable member, a shaft mounted near the rear of said body, and a driving connection in said body between said rotatable member and said shaft.

---

1,566,670. DOLL EYE. LEO J. GRUBMAN, Belle Harbor, N. Y., assignor to Grubman Engineering & Manufacturing Co. Inc., Long Island City, N. Y., a Corporation of New York. Filed Feb. 27, 1925. Serial No. 11,909. 7 Claims. (Cl. 46—40.)

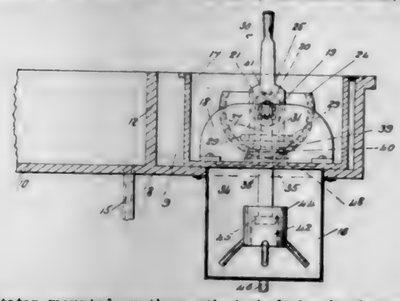


7. An eye for dolls having a part provided with a slot therein, eyelashes having an edge thereof positioned through said slot and fixed with relation to said part, and means extending along one edge of said slot and underlying the eyelashes in spaced relation to said fixed edge thereof to sustain said lashes in a definite angularly projecting position with respect to said slot.

---

1,566,671. WASHING MACHINE. EDWARD L. GUSTAFSON, Holdrege, Nebr. Filed Feb. 11, 1925. Serial No. 8,463. 2 Claims. (Cl. 259—101.)

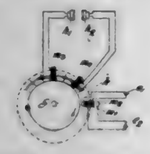
1. The combination, with a stationary supporting vessel, and a wash tub secured to the bottom thereof; of a removable box hinged at its top edge to the top edge of the said vessel and adapted to rest on the bottom of it, said box being provided with a removable section in its bottom over the wash tub, a horizontal shaft arranged inside the box, a beveled toothed segment supported on the said shaft, a removable handle for oscillating the toothed segment, a beveled toothed wheel meshing in the toothed segment and journaled in the said removable section, a vertical shaft revolved by the said wheel, an



agitator mounted on the vertical shaft inside the wash tub, and a lid which closes the removable box when the operating handle is removed from the toothed segment.

---

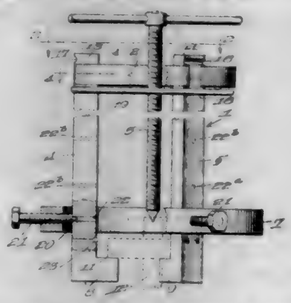
1,566,672. METHOD OF INVESTIGATING MECHANICAL IMPULSES SUCH AS SOUND WAVES. WALTER HAHNEMANN, Kitzeberg, near Kiel, Germany, assignor to Signal Gesellschaft mit beschränkter Haftung, Kiel, Germany, a Firm. Filed July 20, 1922. Serial No. 576,310. 8 Claims. (Cl. 181—26.)



7. The binaural method of making observations from acoustic impulses, which comprises employing two mutually unscreened receivers separately communicating with the ears of the observer and on a stationary base of sufficient length to produce separate sound impressions in the ears of the observer, and bringing the sound impressions over from the zone of separated impressions into the zone of change-over from extreme right impression to extreme left impression and vice versa by means of a traveling sound impression recorded in combination with a plurality of sound impression collectors adjustable relatively to each other.

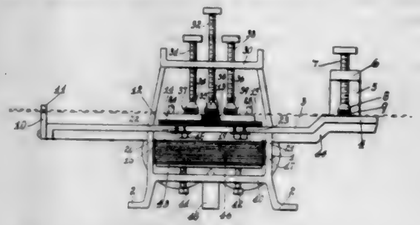
---

1,566,673. GEAR AND PULLEY PULLER. FRANK J. HEINRICH, Yakima, Wash. Filed Jan. 24, 1922. Serial No. 531,458. 5 Claims. (Cl. 29—85.)



1. A combined gear and pulley puller including a head, arms removably connected thereto, and means for holding said members removably connected, said means consisting of a resilient open ring.

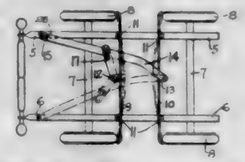
1,566,674. ELECTRIC BRAZING APPARATUS. FELIX J. HORTA, Oakland, Calif. Filed Feb. 11, 1922. Serial No. 535,722. 2 Claims. (Cl. 219—4.)



1. In an electrical brazing apparatus, a frame, a table mounted on said frame, said table including a pair of terminal plates mounted thereon and insulated therefrom, an insulated supporting element mounted on said table between said terminal plates, clamping means located above said terminal plates for holding the two pieces of a broken article in position, and means connected to said terminal plates for conducting an electric current through said plates for brazing said article.

---

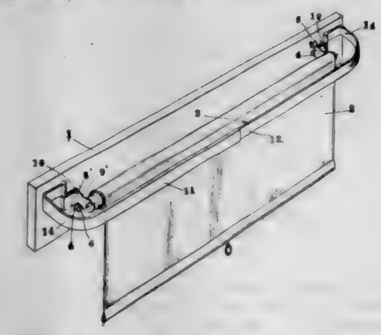
1,566,675. BABY-CARRIAGE BRAKE. MICHAEL KAHNE, New York, N. Y. Filed Aug. 9, 1924. Serial No. 731,167. 4 Claims. (Cl. 188—20.)



1. In combination with a baby carriage, a braking device comprising a pair of resilient wheel engaging members pivoted near their outer ends, a movable hand lever pivoted to one of said members, and adapted to swing on its pivot point, and means connecting said other wheel engaging member and said lever whereby when the latter is moved in one direction both of said resilient members will be caused to brake said wheels, and means for locking said hand lever to one of the handle bars of the carriage when the brake is applied.

---

1,566,676. SHADE BRACKET AND CURTAIN ATTACHMENT. MADS M. LARSEN, Colton, Calif. Filed Nov. 22, 1923. Serial No. 676,317. 8 Claims. (Cl. 156—24.)

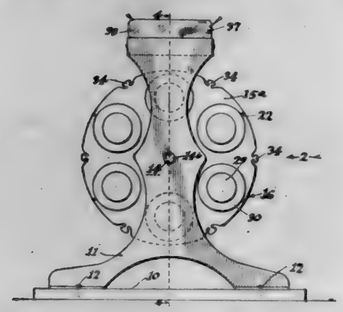


1. In a shade support, a wall element comprising a screw and an upstanding square stud adapted to interfit with a shade engaging element vertically slidable thereon,

and a shade-engaging element slidably mounted thereon and comprising a sleeve adapted selectively to interfit with said stud, said shade-engaging element being provided with a plurality of square sleeves aranged in a linear series.

---

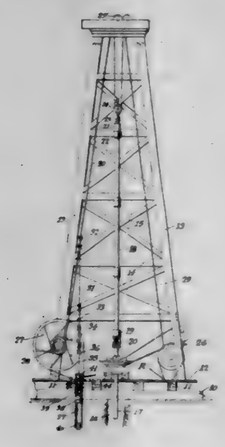
1,566,677. THREAD HOLDER AND PINCUSHION. MADS M. LARSEN, Colton, Calif. Filed Jan. 6, 1925. Serial No. 812. 6 Claims. (Cl. 242—137.)



1. A holder for spools of thread, comprising in combination a thread compartment formed substantially cylindrical with a closed wall at one end and an opening at the other through which spools may be inserted, a spool holding spindle having a spindle rod, a handle at one end of the rod, a flange at the handle and adapted to close the open end of the cylinder and means to secure the other end of the spindle rod to the closed end of the cylinder.

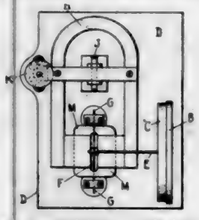
---

1,566,678. AUTOMATIC HOIST FOR ROTARY DRILL PIPES. HOMER L. LATIMER, Whittier, Calif. Filed Feb. 28, 1925. Serial No. 12,262. 4 Claims. (Cl. 254—145.)



1. In a drilling derrick, a hoist comprising a crown block and a traveling block, a line extending over said blocks having one end secured to an object upon the derrick providing a dead line and the other end secured to a hoisting means, and means for causing the dead line to exert a tension capable of lifting a stand of pipe after the hoisting means has ceased operation.

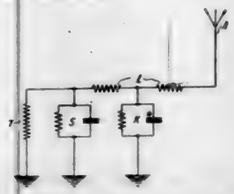
1,566,679. TELEPHONE. NORMAN WILLIAM MCLACHLAN, Rochester, Great Leighs, Chelmsford, England, assignor to Radio Corporation of America, a Corporation of Delaware. Filed Aug. 13, 1923. Serial No. 657,098. 13 Claims. (Cl. 179—117.)



1. A telephone comprising a soft iron reed so mounted that it can turn between the poles of a rotatably mounted magnet, which poles contain coils through which a current can be passed, and a diaphragm connected to the reed.

---

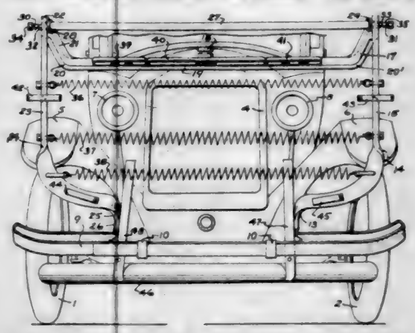
1,566,680. SENDING ARRANGEMENT. ALEXANDER MEISSNER, Berlin, Germany, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H. Hallesches, Berlin, Germany, a Corporation of Germany. Filed Sept. 3, 1921. Serial No. 498,421. 7 Claims. (Cl. 250—17.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



1. A sending arrangement for wireless telegraphy and telephony comprising a grounded antenna, a grounded loop circuit connected to the antenna in parallel with its grounded portion and tuned to the fundamental frequency of the arrangement, a second grounded loop circuit connected to the antenna in parallel with said first-mentioned circuit and also tuned to said fundamental frequency, and an inductance in the antenna between the points of connection of said loop circuits therewith.

---

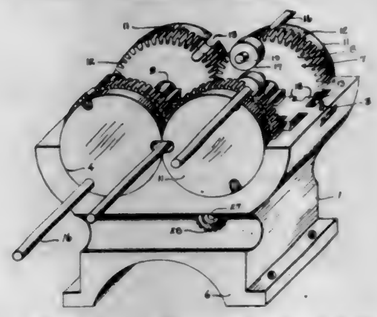
1,566,681. PROTECTIVE DEVICE FOR VEHICLES. WALTER J. MOORE, Brooklyn, N. Y. Filed Apr. 18, 1924. Serial No. 707,347. 24 Claims. (Cl. 293—52.)



1. The combination with a vehicle, of mud guards adjacent the forward end thereof and a collision screen comprising upstanding frame members mounted upon said mud guards, each of said members being of sheet metal of greater width at the bottom than at the top, and so disposed as to be edgewise to the line of vision of the operator and collision members extending between said frame members.

---

1,566,682. CANDY-PULLING MACHINE. CHARLES G. W. NITZ, Milwaukee, Wis. Filed Oct. 25, 1923. Serial No. 670,669. 7 Claims. (Cl. 107—30.)

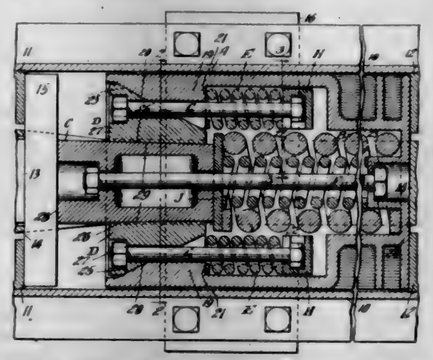


6. A device of the character described comprising a housing formed with a plurality of substantially horizontal bearing elements, rotatable members supported by said bearing elements, and a plurality of floating candy pulling members carried by the rotatable elements and extending axially from each end thereof, said floating members being transferable between said rotatable members to move in paths approximating the figure 8.

7. A candy pulling machine comprising a housing carrying drums which are substantially horizontally and revolubly mounted side by side, each of said drums formed with notched heads, the notches in adjacent heads at one end of the housing being in staggered relation to the notches in the heads at the other side of the housing, floating candy pulling members carried in the notches, means for transferring the floating members from one drum to the other at predetermined times, and means for rotating the drums simultaneously in opposite directions.

---

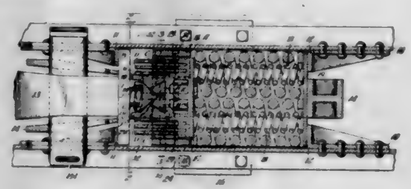
1,566,683. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Nov. 13, 1922. Serial No. 600,564. 5 Claims. (Cl. 213—36.)



1. In a friction shock absorbing mechanism, the combination with a friction shell having inwardly converged wedge faces; of a pressure-transmitting friction plunger tapered toward its inner end; a main spring resistance; friction gripping elements interposed between said plunger and said wedge faces of the shell; additional spring resistance elements; and spring pressure-transmitting means coacting with said additional spring resistance elements and friction gripping elements, said last named means being adapted to hold said gripping elements assembled with the shell.

---

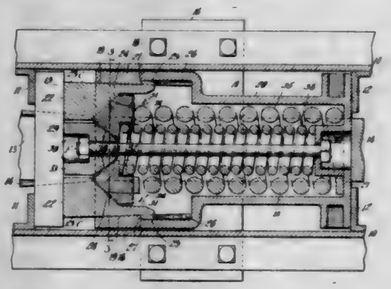
1,566,684. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Dec. 14, 1922. Serial No. 606,923. 9 Claims. (Cl. 213—33.)



1. In a friction shock absorbing mechanism, the combination with a follower-acting member; of a series of relatively stationary friction elements anchored thereto and responsive to pressure applied transversely thereof; a series of relatively movable friction elements intercalated with said stationary friction elements; a main spring resistance; an outer follower movable relatively toward and from said follower member; and a pressure-transmitting-wedge-system interposed between said outer follower and the spring resistance, arranged to exert pressure transverse to said intercalated friction elements, said system including wedge shoes coacting with said element; an expandible wedge coacting with said shoes and means for expanding said wedge to automatically adjust the same with respect to said shoes, to compensate for wear on the friction elements.

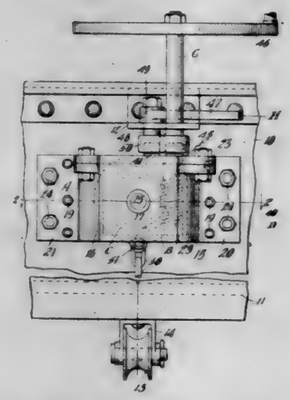
---

1,566,685. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Jan. 19, 1923. Serial No. 613,623. 6 Claims. (Cl. 213—32.)



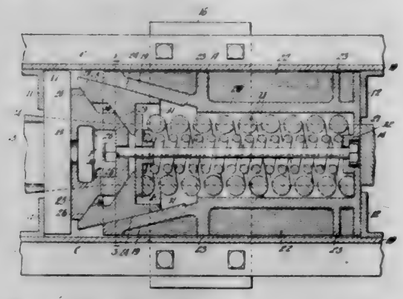
1. In a friction shock absorbing mechanism, the combination with a friction shell having opposed interior friction surfaces converging slightly inwardly of the mechanism; of a spring resistance; an outer follower, said follower and shell being movable relatively to each other; wedge friction shoes engaged by said follower and movable longitudinally inwardly of the shell on the friction surfaces thereof; a wedge pressure transmitting members movable with said follower; and auxiliary wedges having wedging engagement with said pressure transmitting member and said wedge shoes.

1,566,686. HAND BRAKE. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed July 28, 1923. Serial No. 653,112. 6 Claims. (Cl. 74—119.)



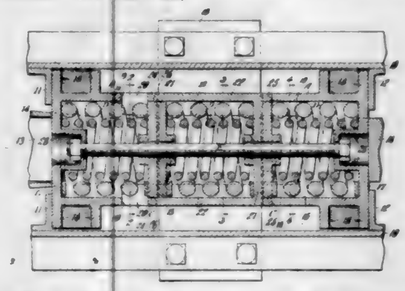
1. In a hand brake, the combination with a drum upon which the brake chain is adapted to be wound; of operating means for said drum, including a worm and worm wheel; automatically operated means for connecting said operating means to the drum; and manually operated means movable independently of said first named means for disengaging said automatically operated means from the drum to release the brakes.

1,566,687. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Oct. 12, 1923. Serial No. 668,055. 1 Claim. (Cl. 213—26.)



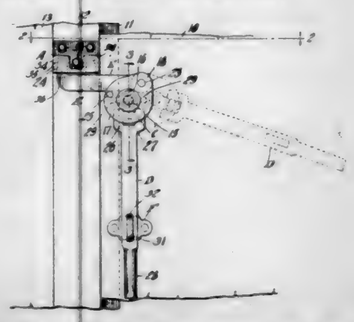
In a friction shock absorbing mechanism, the combination with a casing having a pair of opposed flat, inwardly converging wedge faces, said faces being disposed at relatively keen angles with reference to the axis of the mechanism; of a wedge pressure transmitting element adapted to directly cooperate with a main follower, said element having tandem arranged pairs of wedge faces disposed at relatively blunt angles with reference to said axis, said tandem arranged faces of each pair being spaced longitudinally apart and arranged respectively at the inner and outer ends of the wedge pressure transmitting element; a pair of friction wedge shoes, each having a wedge face coacting with the corresponding wedge faces of said pressure transmitting element, said shoes being laterally slidable on the wedge faces of said wedge pressure transmitting element, said shoes being spaced apart transversely of the mechanism to permit lateral approach thereof during a compression stroke; and a spring resistance opposing inward movement of said shoes.

1,566,688. SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Dec. 8, 1923. Serial No. 679,309. 7 Claims. (Cl. 213—48.)



1. In a shock absorbing mechanism, the combination with relatively movable end followers; a plurality of intermediate followers movable in unison with each end follower, all of said intermediate followers being separable from said end followers; and spring resistance means coacting with the respective followers.

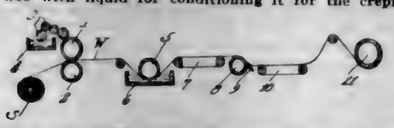
1,566,689. SIDE-DOOR OPERATING AND HOLDING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Dec. 8, 1923. Serial No. 679,310. 9 Claims. (Cl. 292—113.)



1. In an operating and locking mecahnism for a sliding door, the combination with pivoted operating means for opening and closing said door including a lever; means for locking the lever in a predetermined position; an abutment on the car structure; an engaging member swingably connected to said operating means; and an abutment element on said operating means for positively holding said member engaged with said abutment when the lever is in locked position.

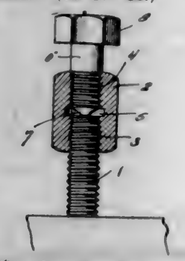
1,566,690. METHOD OF MAKING DECORATED CRÊPE PAPER. JOHN L. PERKINS, Holyoke, Mass., assignor to American Tissue Mills, Holyoke, Mass., a Corporation of Massachusetts. Filed Dec. 30, 1924. Serial No. 758,931. 3 Claims. (Cl. 41—26.)

3. The method of producing ornamented crêpe paper web which consists, in leading the web onto an offset roll and printing therefrom a design on said web, in treating the web with liquid for conditioning it for the crêping



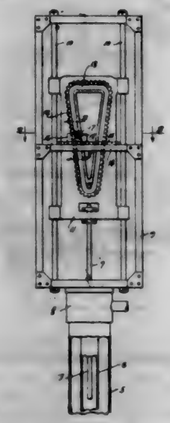
operation, and finally leading the paper web over a drum and removing it therefrom by a scraper to crêpe the said web to vary the design carried thereby.

1,566,691. STUD-BOLT TOOL. WILLIAM PERRY, Provincetown, Mass. Filed Nov. 21, 1924. Serial No. 751,312. 1 Claim. (Cl. 81—53.)



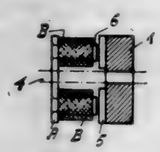
A device of the class described comprising a sleeve, the lower portion thereof being internally threaded in one direction for threaded engagement with the outer end of a stud bolt, the upper portion of the sleeve being internally threaded in the opposite direction, said sleeve having a recess provided therein for separating the oppositely threaded portions thereof, and a locking bolt threaded in the upper portion of the sleeve and having its lower end cone-shaped and terminating in the recess so as to provide a pointed terminal to engage the outer end of the stud bolt for preventing the rotation of the sleeve on the stud bolt when the outer end of the stud bolt is threaded in the lower portion of the sleeve, whereby the sleeve and stud bolt are adapted for simultaneous rotation when an implement engages and rotates the sleeve.

1,566,692. OPERATING HEAD FOR PUMPS. JOHN T. PHIPPS, Huntington Park, Calif. Filed Apr. 15, 1925. Serial No. 23,257. 2 Claims. (Cl. 74—14.)



1. In a reciprocating operating mechanism of the character described, the combination of a frame, a carriage mounted to be reciprocated therein, said carriage having an endless internally toothed track provided at one end with a substantially straight portion transverse to the path of the reciprocation of said carriage, and a laterally slidable driving gear in engagement with said track.

1,566,693. MAGNETO-ELECTRIC MACHINE. OTTO PLETSCHER, Albisrieden, near Zurich, Switzerland. Filed Apr. 11, 1922. Serial No. 551,685. 1 Claim. (Cl. 171—252.)

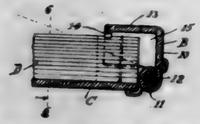


In a magneto electric machine, an electro-maguet and a permanent magnet arranged in confronting relation and for relative rotation, said permanent magnet being a circular disc and being provided, on the side opposed to the pole pieces of the electro-magnet with a groove extending centrally thereacross at right angles to the axis of rotation and thereby forming polar projections of relatively large superficial area.

1,566,694. METHOD OF ELECTROLYTICALLY PRODUCING ALUMINUM. JOHN B. RAILSBACK, Shreveport, La. Filed Oct. 20, 1924. Serial No. 744,827. 6 Claims. (Cl. 204—20.)

1. A bath for use in the production of aluminum comprising compounds of aluminum, and a metal whose oxide is not reducible by aluminum.

1,566,695. PAD HOLDER. CHARLES T. RASCHICK, St. Paul, Minn. Filed June 16, 1922, Serial No. 568,735. Renewed Nov. 11, 1925. 5 Claims. (Cl. 129—35.)



1. A clamp including a back, a jaw member hingedly connected to said back, resilient means for forcing said jaw member toward said back and stops formed on the ends of said jaw member and adapted to engage said back for limiting the movement thereof.

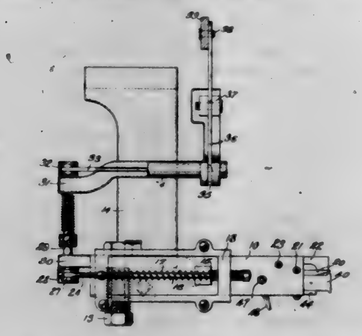
1,566,696. DISPENSING DEVICE. ARTHUR I. REID, Stockton, Ill. Filed Feb. 18, 1924. Serial No. 693,638. 1 Claim. (Cl. 221—60.)

A dispensing device comprising an open ended cylindrical casing adapted to contain a tube of shaving cream, an internal longitudinally curved abutment within the casing adapted to engage one side of said tube, said cas

ing being provided at a substantially diametrically opposite point with an opening in its wall, an elliptical spring interposed between the tube of cream and wall of the casing at a point substantially diametrically opposite the aforesaid abutment, a thumb-button carried by one stretch of said spring and projectable through the opening in the casing, a removable plug closing the lower end of said casing, and a socketed member closing the opposite end of the casing.

---

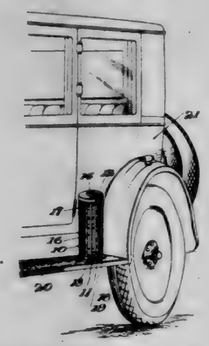
1,566,697. WEFT-DETECTING MECHANISM. EPPA H. RYON, Waltham, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Feb. 9, 1923. Serial No. 618,137. 8 Claims. (Cl. 139—270.)



1. In a loom, a weft detecting mechanism comprising a movable support, fixed and movable detectors mounted thereon, a supplementary weft contact member movably mounted on said support, means to hold said contact member from relative forward movement on said support when engaged by a weft carrier having a predetermined amount of weft thereon, thereby rendering said fixed and movable detectors inoperative, and means to disable said third member and to thereby render said fixed and movable detectors operative upon a predetermined weft depletion.

---

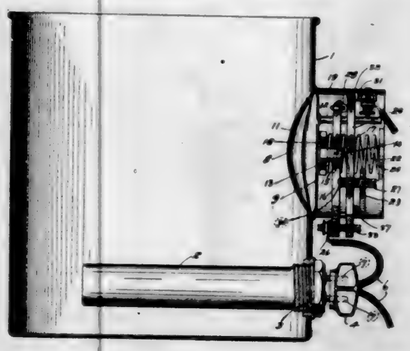
1,566,698. HOLDER FOR THERMOS BOTTLES AND THE LIKE. LEWIS SAIGER and MARKS RUSSELL, Johnstown, N. Y. Filed Nov. 24, 1924. Serial No. 751,972. 1 Claim. (Cl. 224—29.)



A holder of the character described of general cylindrical form including two semi-cylindrical sections one of which is shiftable circumferentially within the other, said sectons having slatted walls and spaced opposing end pieces of substantially circular form, connections axially of the said end pieces forming the movable pivots of the inner section, article engaging spring means carried by one of the end pieces of the inner section, and a spring controlled locking dog movably mounted upon one of the end pieces of the outer section and shiftable between slats of the inner section to lock the latter against movement.

---

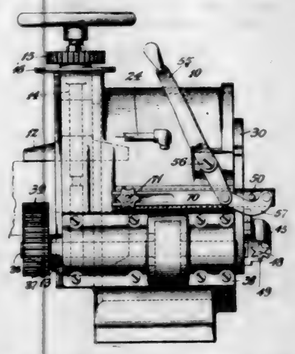
1,566,699. THERMOSTATIC CONTROL. EDWARD A. SCHOLTZ, San Francisco, Calif. Filed Apr. 22, 1924. Serial No. 708,256. 4 Claims. (Cl. 200—140.)



1. In a thermostatic control, a heat responsive element, a lever fulcrumed to follow the motions of said element, means for arresting the motion of one end of said lever and an arm pivoted near the free end of the lever having a contact thereon and allowing the free end of the lever to operate the same for opening and closing an electric circuit.

---

1,566,700. PIPE THREADING AND CUTTING-OFF MACHINE. CHARLES F. SCHMELZ, Bridgeport, Conn., assignor to Curtis & Curtis Co., Bridgeport, Conn., a Corporation of Connecticut. Filed Dec. 8, 1924. Serial No. 754,498. 6 Claims. (Cl. 10—106.)



5. A machine of the character described, comprising a shell, a die carrier gear rotatable in said shell and having spaced bearing rings forming in conjunction with the interior wall of the shell an oil chamber, threading and cutting off dies carried by said gear, means for manually shifting said gear longitudinally within said shell, means for supplying oil to said chamber, and ducts leading from the latter to said dies for supplying oil to the dies.

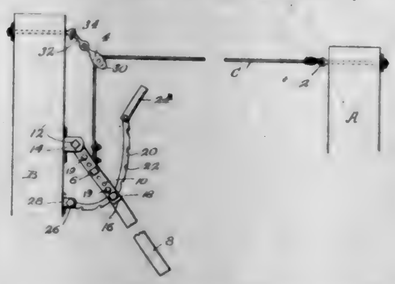
1,566,701. DELIVERY APPARATUS. JOHN SCHUMACHER, Los Angeles, Calif. Filed Oct. 25, 1924. Serial No. 745,780. 10 Claims. (Cl. 214—6.)

1. In a device of the character described, a reciprocable carriage having an extensible endless conveyor belt mounted thereon, means to reciprocate said carriage, and control means actuable by the travel of goods on said belt to control the reciprocation of said carriage.

4. In a device of the character described, a supporting frame, a reciprocable carriage mounted to travel longitudinally, carriage rollers mounted on said carriage at the front and rear, a conveyor belt passed over said rollers, one-way means to prevent travel of said belt upon said carriage upon advance of the latter, one-way means to hold said belt stationary and cause it to travel upon said carriage on the retraction of the latter, and means to progressively raise the front carriage roller.

---

1,566,702. CLOTHESLINE ADJUSTER. WILLIAM A. SIMMONS, Pleasanton, Kans. Filed Sept. 15, 1924. Serial No. 737,827. 1 Claim. (Cl. 68—8.)



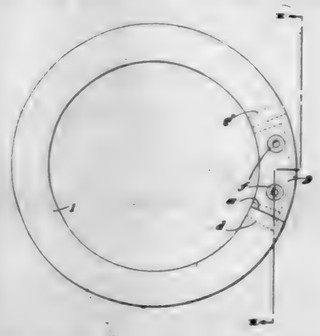
In a device of the character described, a stationary support, a lever operably associated with said support and having a series of transverse holes and a slot, an element adapted to be placed through any of said holes and to which a clothes-line is attached, a member fixed to the lever and extending through the slot therein, and a curved latch operably associated with the stationary support and having ratchet teeth for engaging said member secured to the lever to hold the latter at any point of its adjustment.

---

1,566,703. ILLUMINATING DEVICE FOR SIMULATING DAYLIGHT. ARTHUR REGINALD ST. CLAIR, Whitley Bay, England. Filed June 20, 1925. Serial No. 38,537. 4 Claims. (Cl. 240—1.)

1. A light filter for use with artificial light comprising a translucent medium having a tint lying between the following anayises according to Lovibond's tintometer:—Blue 3.50, red 0.05, and blue 6.0, red 0.50.

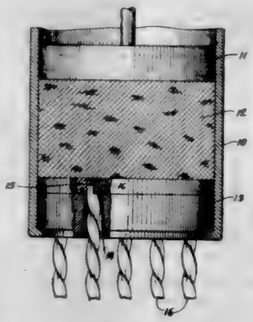
1,566,704. RUBBER FRICTION DRIVE RING. GEORGE M. STEVENS, San Francisco, Calif., assignor of one-third to John C. Balletti and one-third to William C. Anderson, both of San Francisco, Calif. Filed Sept. 17, 1924. Serial No. 738,317. 4 Claims. (Cl. 74—26.)



1. A soft rubber drive ring of the character described provided with a split joint, said joint comprising overlapping ends with a reinforcing plate vulcanized to each end arranged for bolting together, and the plate on each end extending beyond the overlapping of the joint into the solid body of the ring.

---

1,566,705. METHOD OF PRODUCING TWISTED MACARONI. GUIDO TANZI, Long Island City, N. Y., assignor to F. Maldari & Bro., New York, N. Y., a Corporation of New York. Filed June 13, 1922, Serial No. 567,998. Renewed May 15, 1925. 1 Claim. (Cl. 107—54.)



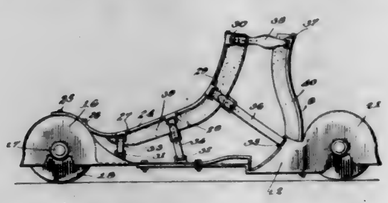
The method of producing spiral macaroni which consists in forming macaroni dough into thin strips, projecting said strips out of alignment and in close proximity to each other and retarding the flow of the edges of the strips, which are adjacent each other as compared with the flow of the free edges, whereby the adjacent edges are made to contact and adhere and the strip thus formed is given a spiral shape.

---

1,566,706. SKATE. CLIFFORD A. THOMAS, Yakima, Wash. Filed Jan. 7, 1925. Serial No. 1,065. 5 Claims. (Cl. 208—178.)

4. A skate of the character described comprising a foot plate consisting of a rear section having the rear end portion thereof downwardly offset, a front section slidably overlapping the front portion of the rear section, means for adjustably securing said lapped portions of

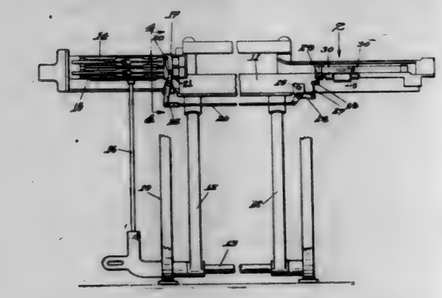
the front and rear sections of the foot plate together, means fixed to the rear section and upstanding from the downwardly offset rear end portion of the rear section for engaging the back part of the heel of a shoe of the wearer of the skate, the rearward end portion of the front section of the foot plate being curved upwardly and rearwardly adjacent to its rearward end to closely



contact with the arch portion of the sole of the shoe of the wearer, the extreme rearward end of the front section of the foot plate being bent downwardly into the downwardly offset portion of the rear section of the foot plate and being adapted to engage with the front face of the heel of the shoe of the wearer, and means for securing said foot plate to the foot of the wearer.

---

1,566,707. YARN-IMPINGING, LAY-ACTUATED, BOX-CONTROLLED WEFT DETECTOR. WALTER H. WAKEFIELD, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Mar. 6, 1925. Serial No. 13,585. 5 Claims. (Cl. 139—233.)

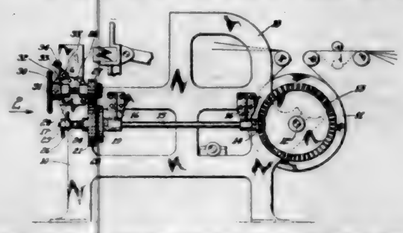


2. In a weft detector for looms having shifting shuttle boxes, a yarn impinging member to contact with the yarn of an active shuttle, a lay actuated member operatively connected to the yarn impinging member, an eccentric mounted on the lay to cooperate with the lay actuated member, means to vary the position of the eccentric in timed relation with the active shuttle, and additional means to vary the setting of said eccentric with respect to said lay actuated member.

---

1,566,708. REWINDING DEVICE FOR LOOM LET-OFFS. WALTER H. WAKEFIELD, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed July 27, 1925. Serial No. 43,569. 9 Claims. (Cl. 139—113.)

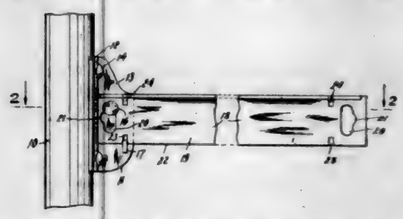
1. In a let-off mechanism for a loom having a warp delivery means, a pair of coacting friction elements to resist movement of the warp delivery means, one of said elements being operatively connected to and moving with the delivery means, a lock to hold the other element normally stationary but movable to release said second element, and means to reverse the second named element when the lock is moved to releasing position to cause a reverse movement of the warp delivery means, the con-



tacting portions of the friction elements being intermediate the warp delivery means and the means to reverse the second element.

---

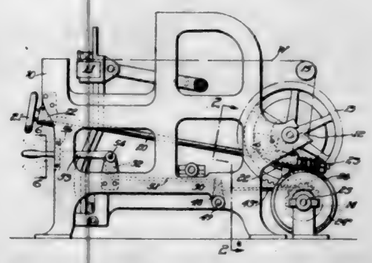
1,566,709. CORNER FASTENING FOR BEDSTEADS. DAVID WASSERMAN, Jersey City, N. J. Filed June 21, 1923. Serial No. 646,794. 1 Claim. (Cl. 5—299.)



A corner-fastening for bedsteads comprising a bracket for attachment to a cornerpost, a headed stud on said bracket, a lug formed on said bracket below said stud and at the side of the latter, and a side rail, angular in cross-section, having a slot in one of its flanges provided with an enlargement to permit the head of said stud to pass, said flange being furthermore provided in its free longitudinal edge with a notch in which said lug is adapted to be seated, said enlargement being centrally disposed in relation to said slot and said rail having an aperture at the junction of its flanges in alignment with said notch, thereby permitting said rail to be mounted upon said bracket either with its horizontal flange uppermost or lowermost.

---

1,566,710. FRICTION LET-OFF FOR LOOMS. HERBERT H. WATSON, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed May 4, 1925. Serial No. 27,719. 9 Claims. (Cl. 139—113.)

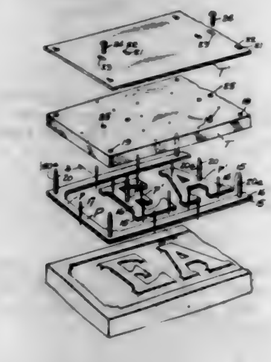


1. In a friction let-off for looms, a warp beam, a friction element movable therewith, a normally stationary friction element coacting with the first element to resist

forward movement of the warp beam, means to move the second element to reverse the movement of the warp beam, and means to adjust the pressure between said elements irrespective of the relative angular positions of said elements.

---

1,566,711. APPARATUS FOR SAND-BLAST CARVING. IRVING B. WELLINGTON, Los Angeles, Calif. Filed Apr. 1, 1925. Serial No. 19,946. 10 Claims. (Cl. 101—128.)



1. A pattern for sand blast carving comprising a laminated body having yieldable or compressible material disposed uppermost when the pattern is in applied position to a piece of work.

5. An apparatus for sand blast carving comprising a plurality of pattern elements, positioning pins projecting from the lower side of the elements for securing the elements to a piece of work in a manner to prevent movement of the elements on the work, and means by which the pattern elements can be removed from the work and maintained in fixed positions one with relation to the other to permit the application of the elements in the same positions to a second piece of work.

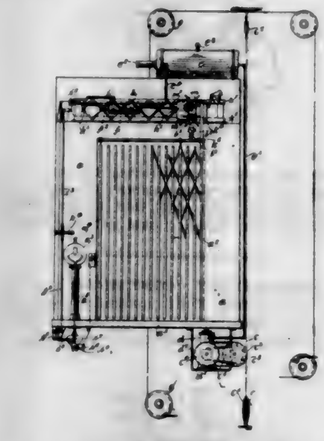
---

1,566,712. MANICURE AND PEDICURE IMPLEMENT. ANDERS BRYNOLF WALDEMAR WENDT, Umea, Sweden. Filed Aug. 1, 1923. Serial No. 655,125. 1 Claim. (Cl. 30—23.)

A manicure or pedicure implement, comprising a handle and a cutting and scraping tool, said tool consisting of a bar inclined to the axis of the handle and having a longitudinal groove extending along the whole length thereof, said bar being beveled from the grooved side backwards so as to form a cutting and scraping edge of concave shape, substantially as described.

---

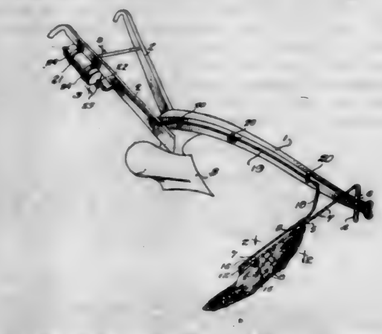
1,566,713. ELEVATOR. GLENN S. WILLIAMSON, Cedar Grove, N. J., assignor to Shur Loc Elevator Safety Co., Inc., New York, N. Y., a Corporation of New York. Filed June 15, 1922. Serial No. 568,396. 17 Claims. (Cl. 187—52.)



1. In an elevator, the combination of a car, elevator mechanism for operating the car, a car door, an air compressor in such operative relation with the elevator mechanism that its operation will be determined by the movement of the car and transmitting devices through which the power developed by the air compressor is applied to the movement of the door.

---

1,566,714. INSECT EXTERMINATOR. STEPHEN A. WILSON and EPHRIOM H. MARSH, Egypt, Ga. Filed Aug. 6, 1924. Serial No. 730,497. 2 Claims. (Cl. 299—30.)



1. A boll weevil exterminator comprising a substantially L-shaped supporting member adapted to be secured to an agricultural implement and extend laterally therefrom, a sheet of fabric secured to said arm and depending therefrom, clamps mounted on said supporting member, said clamps being laterally adjustable, a perforated pipe carried by said clamps, a tank adapted to be mounted on the implement, and a conduit connecting said pipe and said tank.

---

1,566,715. PERMUTATION VAULT LOCK. JOHN WINKLER, Philadelphia, Pa. Filed Mar. 14, 1925. Serial No. 15,446. 2 Claims. (Cl. 70—53.)

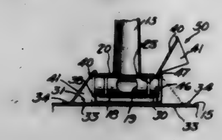
1. In a device of the character stated a vault door, a plurality of radially disposed locking bolts slidably

carried therein, rotatable permutation tumblers seated within said door in alignment with the edges of each of said locking bolts, a dial carried by the outer ends of

said tumblers for properly positioning the same, a central operating shaft extending through the door, actuating means carried by said shaft and means carried by each of said bolts for engaging said actuating device.

---

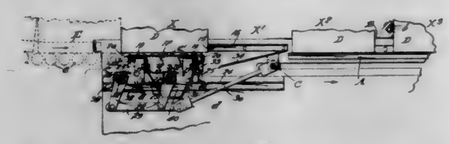
1,566,716. SWINGSPOUT CONTAINER. OZRO N. WISWELL, Los Angeles, Calif., assignor to Swingspout Measure Co., a Corporation of California. Filed May 18, 1922. Serial No. 561,854. 3 Claims. (Cl. 221—26.)



1. In a pouring attachment for a container; two projecting members adapted to be secured to a container, at least one of said projecting members having a passage adapted to communicate with the interior of a container; a tube of uniform diameter having its ends secured to said projecting members and communicating with said passage, said tube having spaced exterior peripheral grooves and an intermediate opening in its side wall; and a sleeve carrying a spout communicating with its interior and rotatably mounted on said tube and having interior peripheral beads intermeshed in said grooves of the tube to maintain the ends of said sleeve out of contact with the projecting members and the sleeve against longitudinal movement on said tube, said spout being adapted to register with said opening in the tube when brought to pouring position.

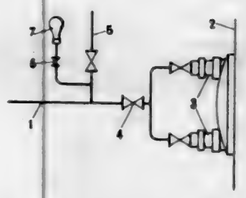
---

1,566,717. BOTTLE-FEEDING MECHANISM. FRANK F. WOLF, Buffalo, N. Y. assignor to Rice & Adams Corporation, Buffalo, N. Y. Filed Jan. 8, 1923. Serial No. 611,218. 7 Claims. (Cl. 198—219.)



6. The combination with a machine for treating bottles in cases, said machine having reciprocating feed means for passing said cases therethrough, and a conveyor for delivering said cases in contact, one behind the other to said machine, of a stop for successively arresting the cases as they are discharged from said conveyor, a fixed support adjacent to and beyond said stop, and means for successively lifting said cases away from said stop and depositing them on said support and then moving them from said support to a position to be engaged by said reciprocating feed means.

1,566,718. SAFETY DEVICE FOR BLAST-FURNACE GAS PIPES. FRIEDRICH WOLFF, Berlin, Germany. Filed May 21, 1925. Serial No. 31,981. 1 Claim. (Cl. 158—7.)



A safety device for blast furnaces comprising a gas supply pipe, having a valve, burners supplied by said pipe, a venting duct leading from the said supply pipe, and having a valve, a test burner, connected with the said supply pipe and having a valve, the said valve of the gas supply pipe being arranged between the venting duct and test burner connecting point and the first named burners.

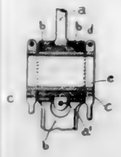
---

1,566,719. REMOVABLE HANDLE FOR UTENSILS. ELINOR M. WRIGHT and JOHN W. WRIGHT, San Francisco, Calif. Filed Nov. 15, 1924. Serial No. 750,083. 1 Claim. (Cl. 16—114.)

A device of the character described, comprising a sectional member composed of contiguously and longitudinally disposed sections bearing, respectively, longitudinally extending grooves adapted to fit around a utensil bail, and retaining spring elements adapted to maintain said sections in hinged relationship upon said bail, said retaining spring elements comprising a pair of flat spring clips in the form of staple-like members provided with sharpened ends adapted for insertion into respective sections of said sectional member and serving as the medium through which the sections of said sectional member are maintained against each other in longitudinal alignment, the spring urge of said clips being of sufficient strength to secure the said sectional member in closed relationship upon the utensil bail.

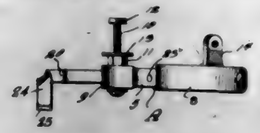
---

1,566,720. BEARING FOR ARTICULATION OF THREE CONNECTING RODS. JEAN EDOUARD ANDREAU, Leognan, France. Filed Oct. 2, 1925. Serial No. 60,050. 1 Claim. (Cl. 74—17.)



A triple connecting rod assembly comprising the main connecting rod, a tubular bushing clamped in the end thereof, the second connecting rod having a forked end journalled on the exterior of said bushing laterally of the first connecting rod, a second bushing journalled in the first bushing and extending beyond the ends of the latter, and the third connecting rod having a forked end connected to ends of the second bushing.

1,566,721. SHUTTLE LOCK. JOSEPH C. AYOTTE, Biddeford, Me. Filed Feb. 12, 1923. Serial No. 618,651. 1 Claim. (Cl. 139—186.)



A lock for shuttles of looms comprising a rocking body including an arm, a barrel formed on one end of the arm, a pivot bolt carried by said barrel, an arcuate extension formed on the opposite end of the arm, a shoe carried by said extension, a pad secured to said shoe, an arcuate resilient tensioning arm, means adjustably and detachably connecting said arm to the arm of the rocking body, and a right angularly extending foot formed on the free end of said tensioning arm.

---

1,566,722. SCAFFOLD BRACKET. CHARLES W. BALLMAN, Indianapolis, Ind. Filed Aug. 6, 1923. Serial No. 656,010. 2 Claims. (Cl. 304—35.)

1. A unitary collapsible and adjustable scaffold bracket comprising a bar having an end extending angularly thereof, bar means pivotally associated at one end with said angular end and having rung engageable portions at the other end, a stop upon the other end of the bar, said bar having a plurality of recesses in longitudinal arrangement adjacent said stop, a ring engageable reversible hook having oppositely positioned rung engaging portions and slidably supported upon said bar and a locking plunger permanently carried by said hook and receivable by any one of said recesses for locking said hook in the desired position, said hook being permanently secured to said bar by said stop, said bar means and hook being movable into collapsed position and said angular portion of said bar being adapted to limit outward movement of a supporting member supported by said bar means.

---

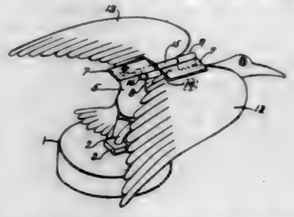
1,566,723. FASTENER. JOHN S. BARNETT, Oakland, Calif. Filed Jan. 21, 1924. Serial No. 687,495. 3 Claims. (Cl. 85—10.)

1. A fastener of the character described comprising a shank; a prong extending substantially at right angles from one end of said shank; and an extension at the other end of said shank comprising a portion extending at right angles from said shank and at right angles to said prong, and a portion folded upon said first portion and extending transversely of the longitudinal axis of the shank in substantially opposite directions.

---

1,566,724. FIGURE TOY. FRANCIS C. BATES, San Jose, Calif., assignor of one-half to Ruth Naismith, San Jose, Calif. Filed Dec. 6, 1921. Serial No. 520,353. 2 Claims. (Cl. 46—40.)

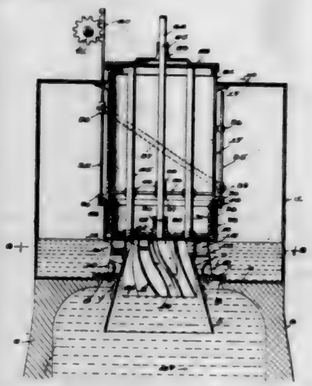
1. A device of the character indicated comprising a flat body portion delineating a bird, means for securing the same in a vertical position on a vehicle, a pair of winglike members, means for pivotally mounting said members upon opposite sides of the upper edge of said



body portion, and means carried by said body portion for limiting the movement of said members in either direction.

---

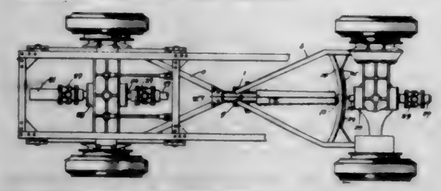
1,566,725. WATER MOTOR. CHARLES A. BLUME, Rocky Ford, Colo., assignor to The Whirl Pool Water Motor Company, Rocky Ford, Colo., a Corporation of Colorado. Filed Sept. 4, 1924. Serial No. 735,919. 6 Claims. (Cl. 253—121.)



1. A water motor comprising a flume, an opening in the bottom of the flume, a motor casing projecting through said opening and open at its lower ends, a motor revolubly mounted in the casing and provided with blades, a plurality of tangential passages connecting the flume with the interior of the motor casing, a second series of tangentially disposed passages located above the first mentioned passages and connecting the interior of the casing with the flume, alternate passages of the second series being inclined downwardly.

---

1,566,726. MOTOR VEHICLE. DURBIN H. BRADLEY, Sunnyvale, Calif. Filed Dec. 28, 1921. Serial No. 525,313. 3 Claims. (Cl. 180—14.)



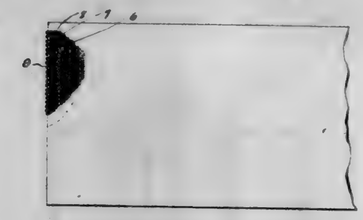
1. In a vehicle, the combination of a steering axle, a plurality of trailing axles, means for connecting the same so that all the axles follow substantially the same path and means for locking the rearmost axles in certain angu-

lar positions relative to the nearest axle, whereby all the axles are caused to substantially follow the path of the rearmost axle on a reversing motion.

3. In a vehicle the combination of a front or steering axle, a second axle, a frame supported by the first and second axles and pivoted to the second axle on a line running parallel to the latter axle, a third axle, a coupling connecting the second and third axles and arranged to cause the third axle to follow the track of the second axle when the vehicle is in motion, a power plant supported on the first frame above the front axle, means allowing the second and third axles to be driven from the power plant and a load carrying body supported on the two power driven axles, the coupling being independent of the load carrying body.

---

1,566,727. FABRIC AND METHOD OF MAKING THE SAME. FREDERICK L. BRIGHAM, Upper Montclair, N. J. Filed Nov. 18, 1924. Serial No. 750,528. 11 Claims. (Cl. 139—421.)



1. As an article of manufacture, an extensible fabric employing warp threads consisting of a core composed of an extensible thread and a non-extensible thread, both extending lengthwise of the warp thread, and a covering for said core, said warp threads being so constructed that the core threads will remain in position when the selvage of the fabric is cut.

---

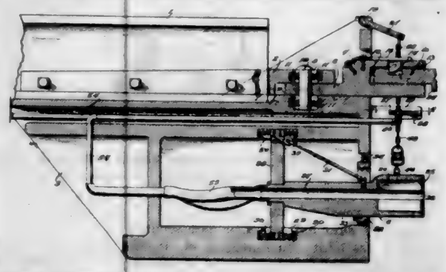
1,566,728. FABRIC AND METHOD OF MAKING THE SAME. FREDERICK L. BRIGHAM, Upper Montclair, N. J. Filed Sept. 4, 1925. Serial No. 54,406. 11 Claims. (Cl. 139—421.)

1. An article of manufacture comprising an elastic thread and a non-extensible thread twisted together and a covering spirally wrapped about said threads.

---

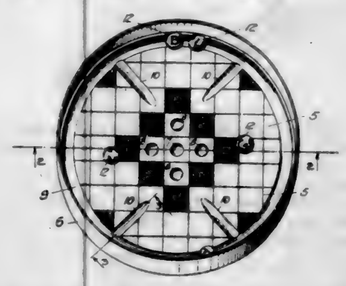
1,566,729. COUPLING FOR CARS AND TRAIN LINES. JAMES A. BROYLES, Dunglen, Ohio. Filed Feb. 29, 1924. Serial No. 696,028. 4 Claims. (Cl. 213—76.)

1. In coupling mechanism, a supporting frame having an outer end wall provided with an opening therethrough, a yoke suspended from the top wall of said opening, yieldable means resisting lateral movement of the yoke, a coupling head extending loosely through and supported at its outer end portion by said yoke, and a bridge secured to the inner end of the head and slidably mounted in the frame.



---

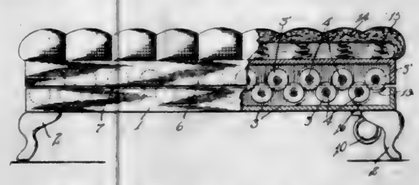
1,566,730. CROSS-WORD-PUZZLE GAME. CHARLES H. BUTLER, New York, N. Y. Filed Feb. 11, 1925. Serial No. 8,466. 3 Claims. (Cl. 273—115.)



1. A cross-word puzzle game comprising a board having a group of pockets arranged in intersecting lines, one of the pockets being at the point of intersection, and a number of balls adapted to rest in the pockets and bearing individual letters capable of spelling a plurality of words having one letter in common.

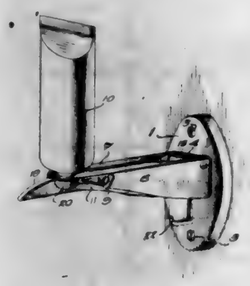
---

1,566,731. DEVICE FOR AIDING THE HEARING. CHARLES CARROLL, Chicago, Ill. Filed Apr. 21, 1923. Serial No. 633,770. 2 Claims. (Cl. 128—33.)



1. A device for aiding the hearing comprising a plurality of normally contacting rollers having their axes parallel and arranged in staggered relation to one another, one of said rollers being driven, said driven roller being arranged to drive the adjacent roller, and that roller in turn its adjacent roller, until movement is imparted to the furthermost roller, a stationary supporting frame for rotatably supporting every second of said rollers thereon, and a second frame rotatably supporting the remaining rollers, including the driven roller, said second named frame having upholstery thereon so that a person may lie on the frame.

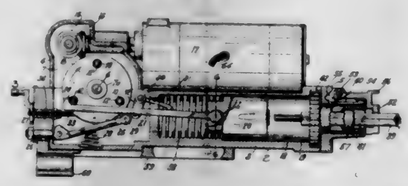
1,566,732. SUPPORT. EBEN H. CARRUTHERS, Astoria, Oreg. Filed July 11, 1923. Serial No. 650,930. 2 Claims. (Cl. 248—20.)



2. A holder for tooth paste tubes comprising a vertical base, a horizontal supporting member secured at its inner end to said base, said supporting member including a pair of spaced arms having horizontal portions at their outer ends provided with substantially semicircular cutout portions adapted to receive the neck of an inverted tube, a closure arm arranged below said supporting member, the inner end of said closure arm being turned upwardly and arranged between the arms of said supporting member, a pivot pin connected between the arms of said supporting member and pivotally supporting the upturned end of said closure arm, a pin carried by said base and passing through an aperture in the upturned end of said closure arm, a coil spring surrounding said last named pin and normally urging said closure arm to raised position, and a cap carried by said closure arm and adapted to cover the outlet opening of the tube when said closure arm is in normal position.

---

1,566,733. DRILLING MACHINE. ANDREW J. CARTER, Denver, Colo. Filed Mar. 3, 1922. Serial No. 540,911. 4 Claims. (Cl. 255—42.)

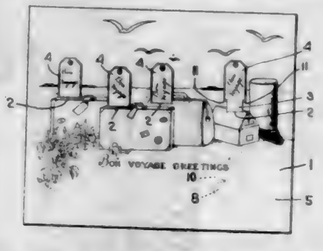


1. In a rock drill of the character described, the combination of a spring-urged reciprocating hammer, a pull bar in pivotal connection therewith, a rotary crank intermittently acting upon the pull bar, a spring-urged element loosely engaging a side of the pull bar to yieldingly maintain its operative relation with the crank, and an adjustable stop loosely engaging an exterior face of the pull bar in opposition to said element to limit the movement of the pull bar by action of the element.

---

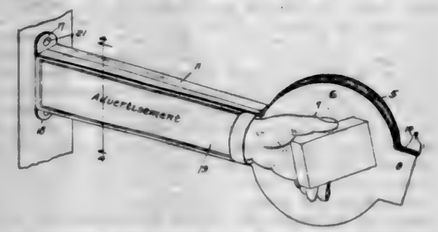
1,566,734. GREETING CARD. ERNEST D. CHASE, Winchester, Mass. Filed June 3, 1925. Serial No. 34,541. 3 Claims. (Cl. 40—65.)

1. A greeting card comprising a card member having a pocket and a slit leading to the pocket and a greeting bearing strip in the pocket and projecting through the slit, the exposed end of the strip constituting a tab or finger piece by which the strip may be withdrawn, said strip having at its lower end a lateral extension on one side only, the corner of said strip on the other side being rounded, said extension limiting the withdrawing movement of the strip when pulled straight outwardly but permitting said strip to be removed by swinging it into an angular position when it is at the outward limit of its movement.



---

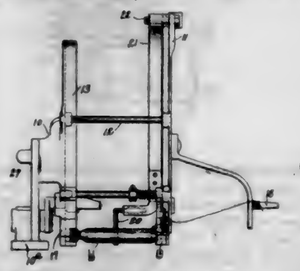
1,566,735. ADVERTISING STRUCTURE. MADISON R. CHESNEY, Los Angeles, Calif. Filed Aug. 3, 1925. Serial No. 47,810. 5 Claims. (40—126.)



2. An advertising device of the character described formed wholly of pasteboard and consisting of two pieces of pasteboard united along their longitudinal edges by scored bellows-like portions, said bellows-like portions having integral scored securing flaps at their rear ends which, when secured to a support, hold the bellows-like sections in distended position.

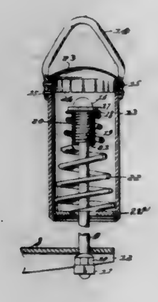
---

1,566,736. WEFT-CARRIER SUPPORT FOR WEFT-REPLENISHING LOOMS. AUGUSTIN J. CHEVRETTE, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Feb. 2, 1923. Serial No. 616,461. 6 Claims. (Cl. 139—251.)



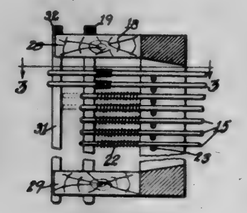
1. In a weft replenishing loom, a magazine, a transferrer, and means to support a weft carrier in transfer position in said magazine, said means comprising a pair of members supporting the butt of the weft carrier, a member supporting the tip of said weft carrier on its front side only, and a supporting member engaging the rear side of said weft carrier at a point intermediate its ends.

1,566,737. COMPENSATOR. VALLA J. CLARK, St. Petersburg, Fla. Filed May 7, 1923. Serial No. 637,342. 5 Claims. (Cl. 267—60.)



1. In a load compensator, a casing having a bail, means for suspending the casing on a plane above a vehicle spring, an element projecting from the bottom of the casing and slidable therein, means for anchoring the lower end of the element to a fixed part of the vehicle, a flanged sleeve within the casing through which the element projects, a washer above the flanged sleeve engaging the element for holding the parts in assembled relation to each other, a spring within the flanged sleeve having one end bearing against a rigid part of the sleeve and the other end against the said washer, and a spring encircling the flanged sleeve and that portion of the member within the casing, the said spring bearing against the flange of the sleeve and bottom of the casing, and means for adjusting the element to compress the last mentioned spring.

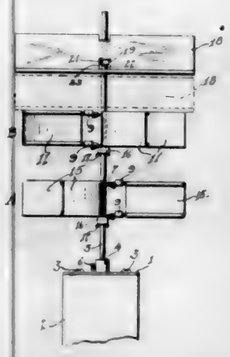
1,566,738. JACQUARD MECHANISM FOR LOOMS. EDWARD J. DACEY, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Aug. 18, 1925. Serial No. 51,012. 6 Claims. (Cl. 139—59.)



4. The combination in a jacquard mechanism for looms having risers, knives to cooperate with the same and needles movable longitudinally to position the risers, of a member extending transversely of the needles and engaging certain of the needles to hold the same permanently in inoperative position to place the risers corresponding thereto in inoperative position with respect to the knives.

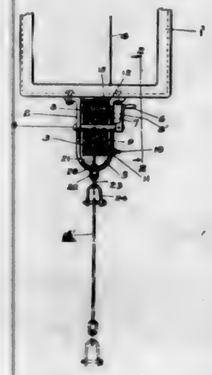
1,566,739. ADVERTISING DEVICE. HUBERT ROSS ESTES, Chicago, Ill. Filed Oct. 20, 1924. Serial No. 744,774. 5 Claims. (Cl. 40—30.)

1. An advertising device comprising a supporting rod, wind actuated members rotatably carried by said supporting rod, an advertising medium carried by said rod, and means for preventing the rotation of said medium,



said means being removably secured to said rod to permit said sign to be supported, and actuated by one of said wind actuated members when said means is removed.

1,566,740. TRACTOR HITCH. CURTIS T. FORREST, Le Grand, Calif. Filed Aug. 28, 1924. Serial No. 724,759. 3 Claims. (Cl. 280—33.14.)

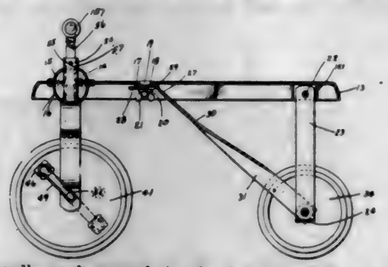


1. In a tractor hitch of the character described, a reel rotatably mounted on the tractor frame with a haulage rope secured to and wound around the reel, said rope extending rearward of the tractor for hitching to a trailer or the like, means for locking the reel against unreeling rotation and both automatic and manually operated means for rewinding the reel.

1,566,741. ALL-METAL KNOCKDOWN TOY VEHICLE. HARRY D. FORSE, Anderson, Indiana. Filed Aug. 14, 1924. Serial No. 732,029. 8 Claims. (Cl. 208—113.)

1. A knockdown toy vehicle comprising a seat having at opposite ends a pair of pivotal supports substantially transverse to each other, one being substantially transverse to the plane of the seat and the other being substantially parallel thereto, a steering wheel construction detachably mounted in the transverse pivotal support, a bolster pivotally connected to the parallel pivotal support, a U-shaped brace forming strap having its mid-

portion curved for detachable connection to the seat and its free ends extending outwardly, downwardly and



rearwardly and secured to the lower portion of the bolster, and means positionable in the mid-portion of the curved strap for securing the same to the seat.

1,566,742. AROMATIC DERIVATIVE OF CYANURIC CHLORIDE AND PROCESS FOR PRODUCING SAME. HERMANN FRITZSCHE and PAUL SCHÄDELI, Basel, Switzerland, assignors to the Firm Society of Chemical Industry in Basle, Basel, Switzerland. Filed Mar. 26, 1925. Serial No. 18,600. 10 Claims. (Cl. 260—27.)

6. As new products the new compounds of the general formula:

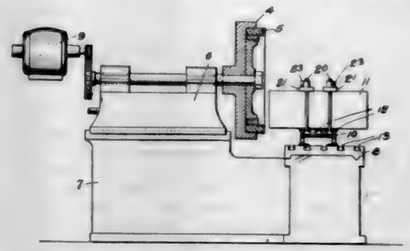
wherein A and B stand for any aromatic nuclei, of which one only may be a p-hydroxynaphthalene nucleus, the new products forming, when obtained by acidification of their alkaline solutions, red to red-violet and brown powders, insoluble in water, dissolving caustic soda solution with yellow, in concentrated sulfuric acid with red to violet coloration.

1,566,743. FENDER FOR ROAD VEHICLES. ERNEST P. GALASSI, Brooklyn, N. Y. Filed June 21, 1924. Serial No. 721,453. 7 Claims. (Cl. 293—55.)

1. In a fender of the class described, a front member, a plurality of rear members, a bridge plate connecting the rear members, and means loosely connecting the front member with said rear members.

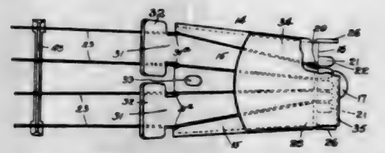
1,566,744. MEANS FOR GRINDING BLOCKS. ARTHUR E. GRAY, Pittsburgh, Pa., assignor to Pittsburgh Clay Pot Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Aug. 27, 1921. Serial No. 495,868. 1 Claim. (Cl. 51—240.)

The combination with the table of a grinding machine of a supplemental work supporting table, fastening means secured to said grinding table and adapted to engage the ends of said supplemental table to secure it in predetermined relation to said grinding table in either of its



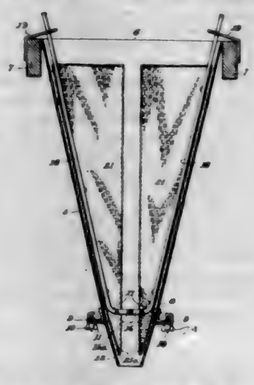
end for end reverse positions and means for securing work pieces on said supplemental table with a plurality of faces exposed for grinding.

1,566,745. TAILPIECE FOR STRINGED MUSICAL INSTRUMENTS. ALBERT D. GROVER, Long Island City, N. Y. Filed Apr. 18, 1923. Serial No. 632,846. 4 Claims. (Cl. 84—301.)



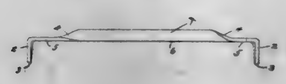
1. A tail piece for stringed musical instruments having a rim section and a head plate section, the latter being provided with T-shaped projections whose crosshead portions are of downwardly curved shape suitable to maintain only gradual curvatures in stretched instrument strings passing under said portions and up onto the upper surface of said head plate.

1,566,746. FEEDING AGITATOR. CARL R. HERMAN, Crafton, Pa., assignor to James F. Cook, Crafton, Pa. Filed May 21, 1924. Serial No. 714,855. Renewed Nov. 12, 1925. 17 Claims. (Cl. 259—47.)



2. In a device of the type described, the combination with an imperforate conical hopper, of agitating means within said hopper limited in its operation to the material in proximity to all the wall surface of the hopper for preventing the arching of material within the latter, and means for operating said agitating means.

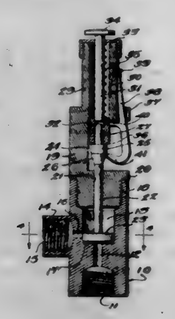
**1,566,747. PLASTERING STAPLE.** CHARLES HOLLOWAY, Jr., San Francisco, Calif. Filed Nov. 19, 1924. Serial No. 750,865. 3 Claims. (Cl. 72—118.)



1. A plastering staple comprising a flat section strip of metal having the end portion twisted to a plane at right angles to the plane of the strip and formed to lie with one flat side in line with one edge of the strip, and a point formed on the twisted end extending in the plane of the strip substantially at right angles to the run of the strip.

---

**1,566,748. AUTOMATIC VALVE.** JOHN H. HOULT, Fairmont, W. Va., assignor of one-half to Ora M. Doolittle, Fairmont, W. Va. Filed Mar. 23, 1925. Serial No. 17,765. 3 Claims. (Cl. 67—115.)

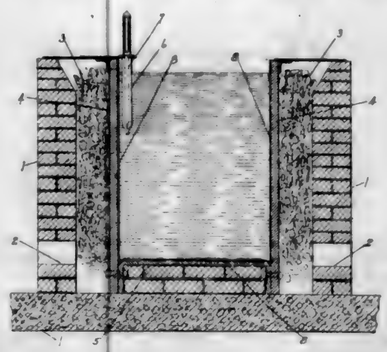


1. A device of the character described comprising a valve body having a valve seat therein, a valve in said valve body normally movable by gravity toward said valve seat and adapted to cooperate therewith to control the flow of gas through said valve body, a valve stem carried by said valve and projecting upwardly therefrom, said stem being provided near its upper end with a cam, a cylinder carried by said valve body above and in axial alinement with said valve stem, a plunger mounted to reciprocate in said cylinder and provided with a shoulder arranged below said cylinder, a compression spring arranged in said cylinder, said spring engaging said cylinder at its upper end and said plunger at its lower end and adapted to project said plunger downwardly against said valve stem to close said valve, and a latch loosely connected at its upper end to said cylinder and provided intermediate its ends with a finger adapted to engage the shoulder of said plunger to render said spring inoperative, said latch being further provided adjacent its lower end with a second finger arranged in the path of travel of said cam to be engaged thereby when said valve moves toward closed position to release said first named finger from the shoulder of said plunger.

---

**1,566,749. APPARATUS FOR USE IN HOT GALVANIZING AND THE LIKE.** WALLACE G. IMHOFF, Pittsburgh, Pa., assignor to Warren S. Smith, New York, N. Y. Filed Apr. 16, 1923. Serial No. 632,197. 4 Claims. (Cl. 263—48.)

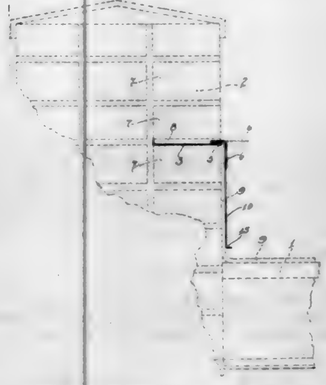
2. In apparatus for use in hot galvanizing and the like, an article to be brought into contact with molten zinc comprising a metallic body, said body having a coating of an enamel comprising a complex aluminum borosilicate as the basis thereof on the surface of the body



which comes into contact with the molten zinc to provide a heat conducting medium for protecting the body of the article from the solvent action of the molten zinc.

---

**1,566,750. ROOF FLASHING.** WILLIAM JACOBSON, Chicago, Ill., assignor of one-half to Charles W. Reynolds, Chicago, Ill. Filed Aug. 25, 1924. Serial No. 734,048. 2 Claims. (Cl. 108—26.)

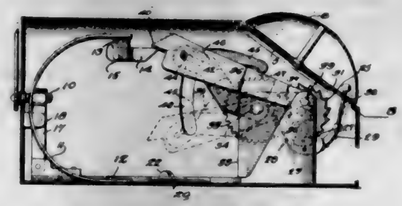


1. The combination with a roof, a fire wall, and flashing contiguous to said roof and said fire wall, of a horizontal plate carried by said fire wall above said roof, said plate having an S-shaped bend to constitute a socket, and a portion extending beyond said socket normally parallel with the roof, a retaining plate having a flange at its upper edge arranged to enter said S-shaped socket, the inner face of said retaining plate engaging with said flashing, and the outer face being arranged to be engaged by the extended portion when the latter is bent downwardly.

---

**1,566,751. OVEN SIGNAL.** RICHARD S. JOHNSON, York, Pa. Filed Aug. 18, 1925. Serial No. 51,057. 6 Claims. (Cl. 116—102.)

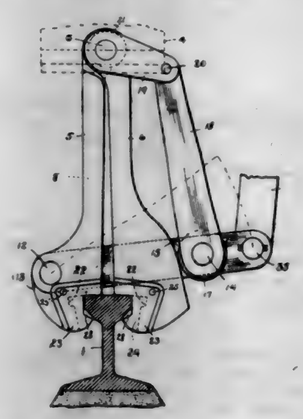
2. In a device of the character described, a casing, a dial arranged on said casing, a pointer associated with said dial, a thermostat arranged in said casing, a weight supporting member carried by a portion of said thermostat, a weight arranged in said casing and having a lip overhanging said weight supporting member and resting thereon, an alarm adapted to be actuated by said weight, said weight supporting member being movable away from said weight with the portion of said thermostat by which it is carried as the latter moves under the influence of increasing temperatures, a frame mounted in said casing



and carrying said weight, said frame being adjustable to move said weight toward and away from said weight supporting member to vary the overhang of said lip on said weight supporting member, and means connected between said pointer and said frame for adjusting the latter according to the position of said pointer.

---

**1,566,752. RAIL CLAMP.** CHARLES E. KIELLEY, Superior, Wis., assignor of twenty-five and one-half per cent to John L. McMahon, Milwaukee, Wis., and twenty-five and one-half per cent to Fred O. Brandt, St. Paul, Minn. Filed Aug. 8, 1924. Serial No. 730,936. 3 Claims. (Cl. 188—48.)

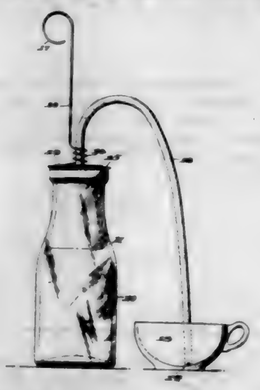


1. An anchoring means for portable superstructures carried upon railroad rails comprising a shaft carried by the superstructure above the rail, two opposed pendulum clamping members pivotally carried upon the shaft, said members extending downwardly upon either side of the bail of the supporting rail, means carried by one member and extending through the other member above the rail and means carried outboard of the last mentioned member for simultaneously adjusting said members to or from the rail.

---

**1,566,753. SIPHON.** PAUL HERMAN KRAETCH, Astoria, Oreg. Filed July 7, 1925. Serial No. 42,056. 2 Claims. (Cl. 137—20.)

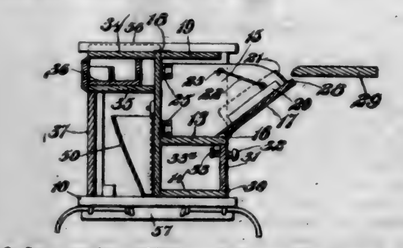
1. A siphon device including an elongated flexible tube having a flexible disk at one end through which the respective end of the tube opens, and a manual controlling and manipulating member having means to engage the disk and the adjacent end of the tube, and having an



elongated upstanding body provided with a handle whereby the disk may be forced downwardly into a receptacle to a desired position therein.

---

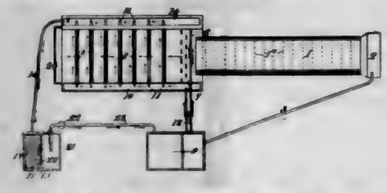
**1,566,754. SEWING CABINET.** FLORENCE G. LYLES, Muskegon, Mich. Filed Aug. 22, 1925. Serial No. 51,854. 6 Claims. (Cl. 223—53.)



2. In a sewing cabinet, a cloth receiving trough having one side wall thereof swingable outwardly from a vertical position where it combines with the remaining walls of the trough to form a closed receptacle to a position where it inclines outwardly and upwardly and is positionable beneath the table of a sewing machine and foldable end walls positionable to bridge the space between the side walls of the trough when said movable side wall is in the last named position.

---

**1,566,755. METHOD AND APPARATUS FOR TREATING ORES.** CHARLES A. MCCOURT, Oakland, Calif. Filed Jan. 12, 1924. Serial No. 685,790. 3 Claims. (Cl. 204—15.)

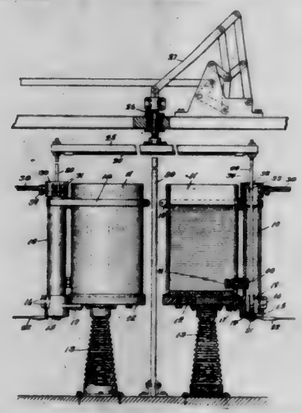


1. The method of recovering the lighter values from mineral value-bearing slimes, which comprises providing a continuous flow of an amalgamating solution through an electrolytic cell, diverting streams of said solution

flowing from the said cell onto the slimes at separated points during the course of the flow travel thereof for the recovery of the lighter values therefrom, separating the amalgamated values from said pregnant solution, and returning the spent liquor to the electrolytic cell for recharging.

---

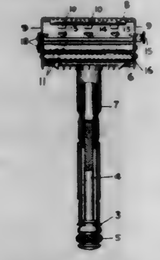
1,566,756. HIGH-TENSION SWITCH. JOSEPH N. MAHONEY, Brooklyn, N. Y., assignor, by mesne assignments, to Condit Electrical Manufacturing Corporation, Boston, Mass., a Corporation of Massachusetts. Filed June 14, 1921. Serial No. 477,373. 10 Claims. (Cl. 200—150.)



1. An electric switch including a relatively long and narrow upright tube adapted to contain a relatively long and slender column of arc-quenching fluid for the major portion of its height and having a vent to the atmosphere above the long fluid column, relatively separable switch members disposed in said tube beneath the fluid and arranged for separation adjacent the bottom of the column and in the direction of the length of said column, and means to maintain said column of fluid in said tube including a reservoir adapted to contain a supply of arc-quenching fluid and open to the atmosphere and disposed at said tube and extended approximately co-extensive the length thereof, a conduit in communication with the interior of said reservoir and tube below the fluid levels therein, and a fluid-actuated valve in said conduit arranged to permit fluid to flow from said reservoir into said tube and to prevent fluid flow in the reverse direction.

---

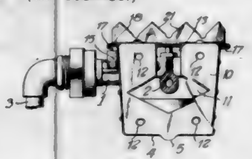
1,566,757. SAFETY RAZOR. ARTURO MARAVIGLIA, Savona, Italy. Filed May 13, 1925. Serial No. 30,098. 2 Claims. (Cl. 30—12.)



1. A safety razor comprising a handle, a blade guard thereon and provided with an axial opening, an axially movable rectangular yoke situated in the axial opening and including an outer crosspiece, means on the crosspiece for fastening a blade so as to allow in displacing the blade guard against the blade the adaptation of the tool for shaving, a sharpening device also carried by the yoke and including two rolls, toothed wheels engaging the rolls, and pins on the outer roll for engagement with the rolls of the blade to be sharpened, and adapted for engagement with a leather sharpening strip which is passed under the inner roll for coacting with the blade guard.

---

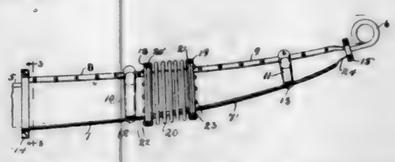
1,566,758. PROTECTING HOOD FOR GASOLINE TORCHES AND THE LIKE. BRUNO MARTIN, Saginaw, Mich. Filed June 12, 1925. Serial No. 36,603. 8 Claims. (Cl. 158—33.)



8. A protecting hood for gasoline torches, etc., comprising a body portion with sides having flanges at their upper ends, and a sliding top having side flanges cooperable with the first named flanges, the body portion having at one end legs adapted to overlap the adjacent end of the top and to be secured thereto, the top having a downturned deflector at one end, and the body portion having air inlet openings at the opposite end.

---

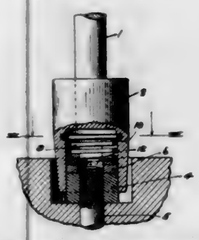
1,566,759. LUBRICATION RETAINER FOR LEAF SPRINGS. WILLIAM METZGER, New York, N. Y. Filed July 27, 1923. Serial No. 654,114. 2 Claims. (Cl. 267—37.)



1. A lubrication retainer for leaf springs comprising a casing, projections therein, for the reception of the spring clips and a flexible member formed from a continuous piece of metal and at approximately mid-length said casing, to allow said casing to follow the movement of the spring.

---

1,566,760. SOCKET OR SPEED WRENCH. CHRISTOPHER B. MICHEL, Oakland, Calif., assignor of one-half to John W. French, Oakland, Calif. Filed Oct. 11, 1923. Serial No. 667,988. 1 Claim. (Cl. 81—124.1.)

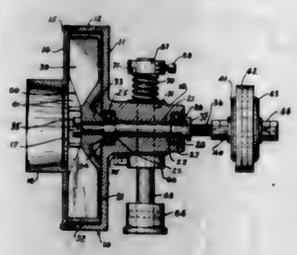


In a wrench having a socket formed to receive a nut for revolving the same, a coiled spring adapted to be received in the socket having an enlarged end turn adapted to be lodged in an internal groove in the socket

for anchoring the spring and a sleeve secured to the free end of the spring for bearing on the nut, the sleeve being grooved externally to receive the other end turn of the spring and being reduced in diameter above the groove to allow the spring to enter the groove.

---

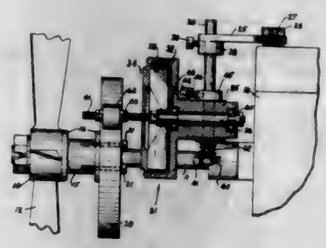
1,566,761. SIREN AND ATTACHING MEANS THEREFOR. LESTER H. MILES and JAMES W. BAYLESS, Los Angeles, Calif. Filed Mar. 16, 1925. Serial No. 15,798. 11 Claims. (Cl. 116—58.)



3. In a siren, a body, a member on which said body is mounted for swinging movement, means to swing said body about said member to driving position, said means comprising a universal connection secured on said body, a link connected to said universal connection, a bell crank, a pin on said bell crank, said link passing through said pin, said link extending beyond said pin and having a spring thereon, said spring engaging said pin at one end, and means on said link at the other end of said spring to hold said spring.

---

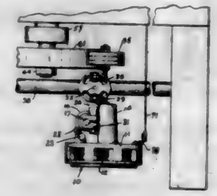
1,566,762. SIREN AND ATTACHING MEANS THEREFOR. LESTER H. MILES, Los Angeles, Calif. Filed May 13, 1925. Serial No. 29,891. 1 Claim. (Cl. 116—58.)



In a device of the class described, an engine, a fan shaft mounted to rotate thereon, a fan on said fan shaft, said fan having a hub thereon, means to drive said fan, a driving disc arranged on said fan shaft and adapted to be driven thereby, a supporting member mounted on said engine, a siren mounted on said member, said siren comprising a body part having a rotor therein, a drive shaft for said rotor, said drive shaft projecting from said body, a drive disc on said last metioned shaft, and normally disposed adjacent said driving disc, means to swing said siren upon its shaft to hold said drive disc spaced from said driving disc and means acting against said holding means to rotate said siren on its shaft and to bring said driving disc to engagement with said first driving disc.

---

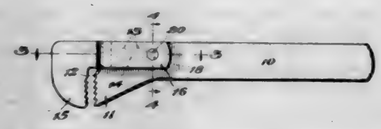
1,566,763. SIREN AND ATTACHING MEANS THEREFOR. LESTER H. MILES, Los Angeles, Calif. Filed June 8, 1925. Serial No. 35,610. 2 Claims. (Cl. 116—58.)



2. In a device of the class described, an automobile having a crank shaft thereon, an extension shaft having its inner end arranged upon and adapted to be driven by said crank shaft, means to hold said extension shaft in operative position, the outer end of said extension shaft having a threaded portion thereon, a driving disc fitted upon the said threaded portion and keyed thereto, a nut for securing said driving disc in position, a transverse supporting member on said automobile, a bracket including a base portion and an upper portion movable relative to the base portion, aligning arcuate slots in said upper portion whereby it may be adjustable, a U-bolt on said base having its arms extending through said slots, a stem adjustably mounted on said bracket and a siren mounted on said stem, said siren including a casing having a rotor therein, an offset portion on said casing, said stem extending through said offset portion, means to adjust said offset portion along said stem, means to limit the rotation of said siren about the axis of said stem in one direction, a shaft for said rotor, a disc adjustable along said rotor shaft, said disc being positioned adjacent said driving disc and means to bring said rotor disc into engagement with the driving disc.

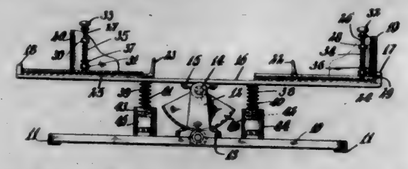
---

1,566,764. WRENCH. THOMAS MURPHY, Middletown, Conn., assignor of one-half to Berkley C. Stone, Middletown, Conn. Filed May 15, 1923. Serial No. 639,075. 1 Claim. (Cl. 81—110.)



In a wrench, a jaw carrying handle having a series of spaced circular openings diametrically bisected by a longitudinal slot having parallel side walls, a movable jaw carrying member having a bifurcated shank straddling the handle and formed in its sides with registering openings, and a key engageable through a selected one of the openings and composed of a strip like member having parallel side faces and rounded top and bottom edges, the key being arranged with its ends in said registering openings and with its parallel side faces extending at right angles to the longitudinal axis of the movable jaw carrying member, the extreme ends only of the key being upset into the respective openings of the bifurcated shank and with the side faces of the entire remainder of the key preserved in their said parallel relation.

1,566,765. SEESAW. ARCANGELO NATALE, Amsterdam, N. Y. Filed Apr. 21, 1925. Serial No. 24,727. 1 Claim. (Cl. 272—54.)

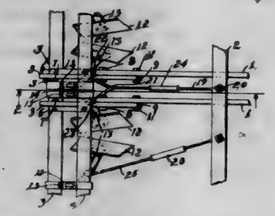


In a see-saw comprising a base, standards on said base, a shaft journaled in said standards, a board, brackets secured to said board, a pair of segmental members attached to said brackets, grooved at their lower faces, rollers engaging said grooves, means for cushioning the up and down movements of said board, seats on said board, foot-rests for said seats, a pair of racks laterally disposed to said seats, guides on said seats, pins in said guides adapted to engage with their lower ends between the teeth of said racks, and operating knobs on said pins for operating said pins to lock said seats in their adjusted positions farther from or closer to the center of gravity of said board to allow the simultaneous use of said see-saw by children of varying weights.

1,566,766. CASEHARDENING MATERIAL. GEORGE COLEMAN NIXON, Syracuse, N. Y. Filed Oct. 20, 1923. Serial No. 669,736. 11 Claims. (Cl. 148—30.)

11. Casehardening material including carbonaceous material impregnated with trisodium phosphate.

1,566,767. BEET LIFTER. GEORGE L. OLSEN, Salinas, Calif. Filed Oct. 2, 1924. Serial No. 741,246. 1 Claim. (Cl. 55—106.)

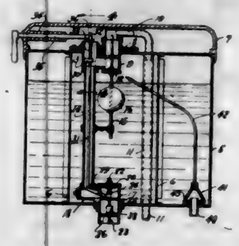


A beet lifter comprising in combination with a carriage frame, a pair of parallelly arranged bars spaced a distance apart laterally and vertically, means for securing said bars in rigid relation to each other, means for pivotally mounting said last mentioned means on said carriage frame to move in a vertical plane, means for adjusting said pivotally mounted means, and a pair of beet lifting elements adjustably mounted between said spaced parallelly arranged bars.

1,566,768. METHOD OF MAKING ELBOWS FROM SHEET METAL. FRANK H. OTIS, Skaneateles, N. Y. Filed Mar. 20, 1924. Serial No. 700,720. 4 Claims. (Cl. 113—116.)

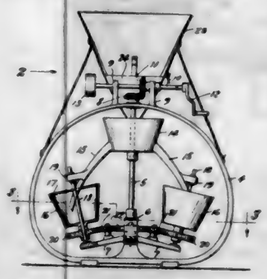
1. The method of forming sheet metal elbows which consists in shaping a flat sheet to provide a circular cupped portion and a flange beyond said cupped portion entirely surrounding said cupped portion, removing the flange except at two diametrically opposite portions to provide two projections, the inner ends of which widen and merge into the perimeter of the cupped portion, shaping the cupped portion to narrow the same in a direction transversely of the length of the projections, and, at the same time, bending the projections and portions of the cupped portion to provide flattened portions extending in one direction at angles to the general plane of the elongated cupped portion, concaving the outer faces of the flattened portions, and bending the concave portions toward each other so that their meeting edges may be interlocked.

1,566,769. TOILET TANK. JESSE C. OWENS, Los Angeles, Calif. Filed Sept. 16, 1924. Serial No. 737,994. 2 Claims. (Cl. 4—65.)



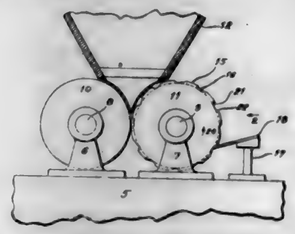
1. A flush tank comprising the combination of a closed receptacle having a discharge port at the bottom, a lift valve therefor, means for opening and for holding said valve open during the outflow of the water contained in said receptacle, an air port at the top of said receptacle, an air valve therefor, float means connected to said air valve for closing the latter at a predetermined upper level, a bypass connecting said air port beyond said air valve and said discharge port beyond said lift valve, a water inlet at the bottom of said receptacle freely connected to a source of water supply under pressure, and a refill tube extending from said inlet for directing water into said air port and thereby through said bypass and into said discharge port.

1,566,770. SEPARATOR. WILLARD N. PACKER, San Pedro, Calif. Filed Feb. 4, 1924, Serial No. 690,351. Renewed Oct. 13, 1925. 3 Claims. (Cl. 233—17.)



1. A separator comprising a revoluble arm, a stationary base gear mounted at the axis of said arm, a rolling gear journalled upon said arm, an idler pinion journalled on said arm and in mesh with said gear, and an imperforate cylinder open at the top and closed at the bottom secured to said rolling gear so as to be rotated and revolved therewith, said cylinder having its axis declined upwardly and outwardly

1,566,771. ROLL. SCOTT H. PERRY, Summit, N. J. Filed May 27, 1922. Serial No. 564,116. 5 Claims. (Cl. 107—10.)

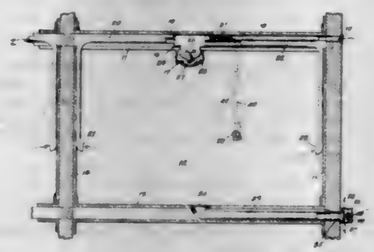


1. A roll comprising a plurality of flanges, said flanges having recesses formed therein, the following surfaces of said recesses being within an involute curve.

3. The combination with a roll comprising a plurality of flanges, means for feeding material to said roll and cooperating mechanism for forming said material into the form of a ribbon adhering to said roll, said flanges comprising recesses for forming cross ribs on said ribbon, of means for removing said ribbon from said roll, the following surfaces of said recesses being within an involute curve whereby the deformation of said ribs during the removal of said ribbon from said roll is avoided.

5. A roll comprising a plurality of flanges, grooves between said flanges, and recesses formed crosswise of said flanges, said recesses being more capacious than said grooves, whereby planes of cleavage are provided between the material formed by said recesses and the material formed by said grooves.

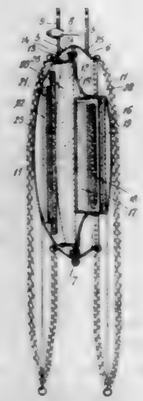
1,566,772. HEATING SYSTEM. ADOLPH F. ROTH, Newark, N. J. Filed Aug. 29, 1923. Serial No. 659,958. 8 Claims. (Cl. 219—39.)



1. A heating system for a chamber, comprising means providing a flue adapted to be arranged in the upper part of the chamber and having an air intake as well as having an outlet for delivery of air into the upper part of the chamber, a normally open electric circuit, heat emitting means interposed in the circuit for heating the air flowing through the flue from its inlet to its outlet when the circuit is closed, and a fan in the upper patr of the chamber operable with the closing of the circuit for causing the heated air in the chamber to circulate downwardly toward the lower part thereof.

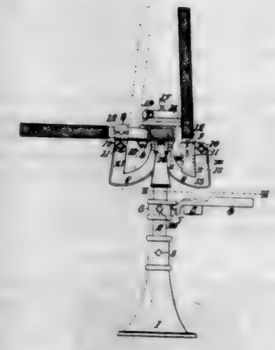
1,566,773. HAND BAG. HARRY BRADLEY ROWAN, North Attleboro, Mass., assignor to Whiting & Davis Company, a Corporation of Massachusetts. Filed Oct. 1, 1924. Serial No. 740,915. 5 Claims. (Cl. 150—28.)

1. A hand-bag comprising the combination of two circular members pivoted together at one side, a clasp for holding the two members detachably together at a point opposite the pivot, two bag-members of flexible material each secured to one of the circular members, a case pivotally mounted within the bag to turn relatively to both of the circular members, and a circumferential flange



on the case adapted to be received in grooves provided therefor in the adjacent faces of the said circular members.

1,566,774. IRONING BOARD. MARTHA E. SANTO, Mountain View, Calif. Filed June 23, 1924. Serial No. 721,904. 2 Claims. (Cl. 68—10.)

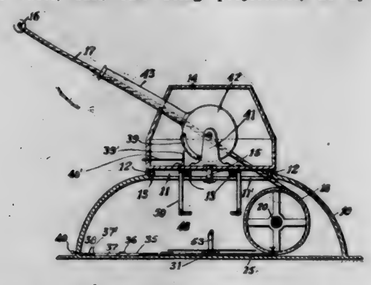


1. An ironing board stand including a support, an arcuate arm extending downwardly and outwardly from said support, an arm extending upwardly from the lower end of the arcuate arm and inclined inwardly with relation thereto, a transverse pivot located at the upper end of the last mentioned arm concentric to the arcuate arm, a socket for receiving an ironing board and provided with downwardly extending lugs mounted on said pivot, the said socket being movable between horizontal and inwardly and upwardly inclined positions, and an ironing board having one end received in said socket.

1,566,775. GOLF-STROKE-RECORDING APPARATUS. GEORGE E. SCHENK, Brooklyn, N. Y. Filed Feb. 25, 1924. Serial No. 694,901. 9 Claims. (Cl. 265—22.)

1. In an apparatus of the character described, in combination, a base, a fixed shaft, a drum mounted for rotation on said shaft, means for shifting the drum longi-

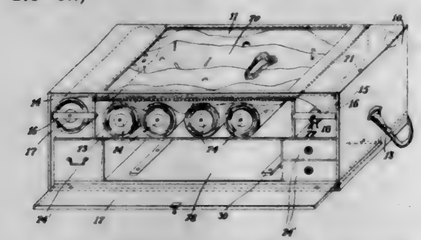
tudinally on said shaft as the drum rotates, spring means yieldingly holding the drum at one end of the shaft, a cable wound on said drum, and a captive ball attached to said cable, said ball being projectable, as by being



stroked with a golf club, whereby upon projection of the ball the cable unwinds from the drum and the drum rotates and advances on said shaft against the tension of said spring means.

---

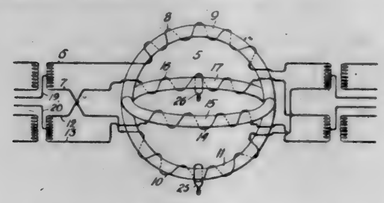
1,566,776. GAME. GEORGE E. SCHENK, Brooklyn, N. Y. Filed Feb. 25, 1924. Serial No. 694,902. 5 Claims. (Cl. 273—87.)



2. A game apparatus, comprising, in combination, a cabinet having an aperture in its upper face, and a sheet adapted to be rolled progressively across said opening, said sheet having represented thereon the characteristics of a golf course, means adapted to be actuated by a player for indicating various distances and angles, and means for plotting points on said sheet in accordance with such distance and angle indications.

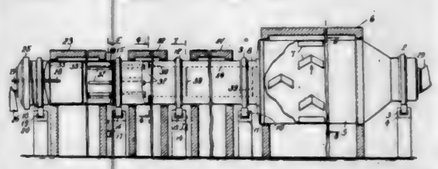
---

1,566,777. INDUCTANCE DEVICE. WILLIAM J. SHACKELTON, Scotch Plains, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Apr. 3, 1923. Serial No. 629,555. 6 Claims. (Cl. 178—46.)



1. An inductance device having a branched core, windings on different branches of said core, two of said windings having substantially the same effective resistances at one frequency and substantially different effective resistances at another frequency, and separate means for equalizing the effective resistances of said windings at said last mentioned frequency.

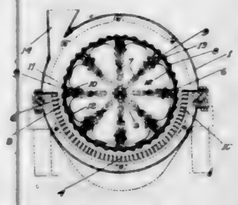
1,566,778. DRY-DISTILLATION APPARATUS. NOEL STATHAM, Irvington, N. Y., assignor to West Virginia Pulp and Paper Company, New York, N. Y., a Corporation of Delaware. Filed Dec. 12, 1921. Serial No. 521,663. 9 Claims. (Cl. 203—6.)



2. In apparatus adapted for treating and distilling ligneous acetate material, a combined rotary treating and distilling chamber formed of sheet metal and comprising an elongated distilling chamber having a series of transverse gas retarding devices and a treating chamber connected to said distilling chamber and having a greatly increased diameter, and graduated heating means cooperating with said distilling and treating chamber, means to rotate said treating and distilling chamber to agitate and uniformly heat the acetate material in each part of the chamber and gradually feed such material into a more highly heated portion of said chamber.

---

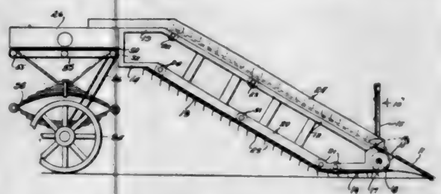
1,566,779. ALMOND SHELLER. ARCHIBALD R. STEPHEN, Lodi, Calif. Filed Jan. 16, 1925. Serial No. 2,821. 5 Claims. (Cl. 146—11.)



1. A nut shelling attachment for a nut hulling machine which includes a plurality of radially disposed beater boards, comprising a plurality of plates to form a complete drum, adapted to be mounted individually on the boards, said plates having abrading elements on their outer faces.

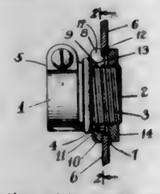
---

1,566,780. BEET HARVESTER. STANLEY TATAR, Detroit, Mich. Filed Dec. 11, 1923. Serial No. 679,963. 2 Claims. (Cl. 55—9.)



1. In a beet harvester, a housing; a pair of substantially semi-circular permanently horizontally aligned relatively movable retaining members, adapted for the reception of a beet between them; resilient means for normally maintaining said retaining members in closely approached position and permitting the relative withdrawal of the same against the tension of said resilient means; and a rotatable cutting member adapted for passage across the axis of the circle defined by said members for topping a beet retained by said members.

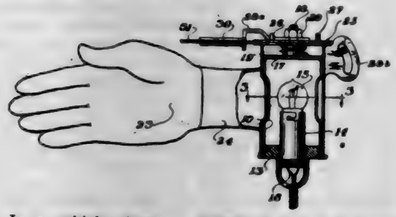
1,566,781. ADAPTER FOR CONNECTING DEVICES. GEORGE C. THOMAS, Jr., Elizabeth, N. J., assignor to The Thomas & Betts Co., of Elizabeth, N. J., a Corporation of New Jersey. Filed May 4, 1921. Serial No. 466,781. 3 Claims. (Cl. 247—25.)



1. The combination with a wall having an opening, of a connecter having a peripheral flange and a threaded neck, an expansible washer on said neck and extending into said opening, said washer and flange having a tapered surface engagement, and means comprising a nut adjustable on said neck for pressing said washer and flange together to expand said washer against the periphery of said wall opening.

---

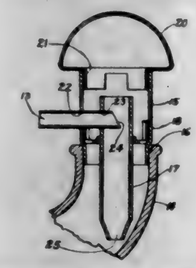
1,566,782. VEHICLE SIGNAL. GUSTAVE TILGER, Chicago, Ill. Filed Apr. 22, 1924. Serial No. 708,132. 2 Claims. (Cl. 116—48.)



1. In a vehicle signal, a stationary barrel, having a plurality of light ports, a rotatable barrel provided with a light port, a signal upon said rotatable barrel, and a light within said stationary barrel and adapted to play upon said signal when said rotatable barrel is moved, said signal comprising a hand having an enclosed wrist for concentrating the rays of light upon the palm of said hand.

---

1,566,783. OILING DEVICE. BENJAMIN LOUIS TOQUET, Westport, Conn. Filed Oct. 6, 1924. Serial No. 741,972. 4 Claims. (Cl. 184—11.)



4. In combination with a crank case and a breather tube adapted to allow the delivery of oil to said crank case, an extension piece adapted to fit said breather tube, a conduit located in said extension piece and having a delivery end situated well within said breather tube at considerable distance from the inlet of said tube, a separator insuring the position of the conduit in the extension piece, and an oil feed pipe fitted in the extension piece and entering the conduit.

1,566,784. EXPLOSIVE. NILS ALFRED UNGER, Vinterviken, Aspudden, Sweden. Filed Mar. 14, 1924. Serial No. 699,317. 3 Claims. (Cl. 52—7.)

1. An explosive, consisting substantially of a mixture of ammonium nitrate, silicon, and nitro-glycerine, the latter being gelatinized by nitro-cellulose.

---

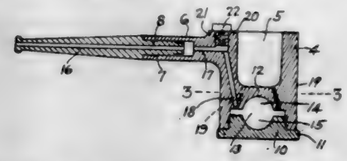
1,566,785. VULCANIZING FAT SUBSTANCES. JOHANNES HENDRIK VAN DER MEULEN, Arnhem, Netherlands. Filed July 14, 1923. Serial No. 651,617. 7 Claims. (Cl. 91—68.)

1. A process for producing a varnish coating on a body, consisting in coating the body with a vulcanizable oil and then vulcanizing the oil in situ with sulfur chloride vapor.

6. Material consisting of a body and of a lustrous coating on such body comprising a vulcanizable oil vulcanized in situ by sulfur chloride vapor.

---

1,566,786. TOBACCO PIPE. CHARLES A. ALDEN, Steelton, Pa. Filed Mar. 23, 1925. Serial No. 17,514. 5 Claims. (Cl. 131—12.)



1. A tobacco pipe comprising a bowl forming a tobacco receptacle, a stem extending from the upper portion of the bowl and having a smoke passage therein, a base member detachably connected to the lower portion of the bowl, the bowl and the base member forming a chamber between them for receiving matter resulting from smoking the pipe, and the bowl having a port therein connecting said receptacle and said chamber and having a smoke passage therein communicating at its lower end with said chamber and at its upper end with the passage in the stem, and a removable plug contained within an opening in the upper portion of the bowl, said opening communicating with said passages and affording access thereto when the plug is removed.

---

1,566,787. MATTRESS. HENRY G. BRANDWEIN, Chicago, Ill. Filed Jan. 7, 1922. Serial No. 527,611. 1 Claim. (Cl. 5—347.)

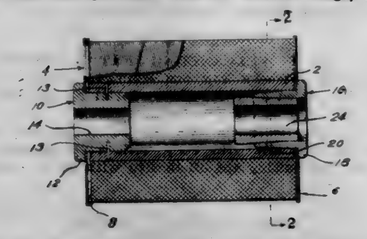
In a mattress, a pair of cover sheets having spaced registering apertures therethrough, textile grommets inserted through said registering apertures and secured at their ends to the cover sheets, the grommets being concentrically disposed, and a spring wound around the inner grommet and disposed intermediate the grommets.

---

1,566,788. SPOOL. ROBERT K. CLARK, Springfield, Mass., assignor to the American Thread Company, Jersey City, N. J., a Corporation of New Jersey. Filed June 16, 1923, Serial No. 645,776. Renewed Nov. 7, 1925. 4 Claims. (Cl. 242—124.)

1. A spool cop comprising a tube of fibrous material, a head for one end of the tube comprising an annular disk, and means for detachably securing the disk to said end of the tube comprising a tubular plug having

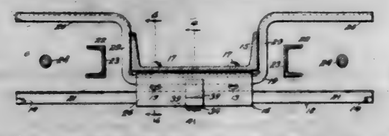
a flange on one end and having its inner end portion split longitudinally, extending through the disk and adapted to be inserted into said end of the tube, the outer surface of said inner end portion tapering toward its inner end and provided with an annular ridge, and a



tapering plug frictionally held within said tubular plug and adapted to be forced into the inner end of said tubular plug by endwise pressure when the latter is inserted in the end of said tube, so as to spread said inner end portion to cause its ridge to be embedded in said tube.

---

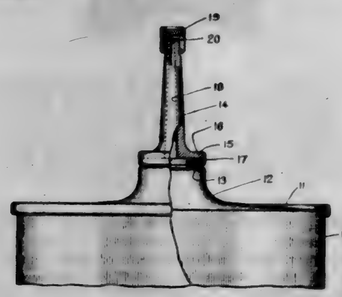
1,566,789. RAILWAY BRAKE-BEAM MECHANISM. SETH A. CROSS, East Orange, N. J., assignor to Buffalo Brake Beam Company, New York, N. Y., a Corporation of New York. Filed Jan. 13, 1925. Serial No. 2,086. 9 Claims. (Cl. 188—210.)



1. In a car-truck having a spring plank and inside hung brake-beams, inverted channel supporting brackets below the spring plank at opposite sides of the track, a longitudinal bar extending through each of said brackets and thence extending upwardly and longitudinally in opposite directions to form upper guard members extending above the end portions of the brake-beams, means rigidly securing said bars and brackets to the spring plank, emergency safety bar members removably secured within said supporting brackets and thence extending longitudinally in opposite directions below the end portions of the brake-beams.

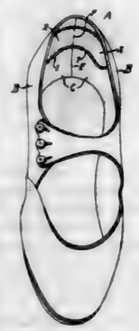
---

1,566,790. CAN MANUFACTURE. ROLLIN L. DRAKE, Port Arthur, Tex., assignor to The Texas Company, New York, N. Y., a Corporation of Texas. Filed Apr. 13, 1923. Serial No. 631,781. 3 Claims. (Cl. 221—56.)



1. A container having a neck, a flange in the interior of said neck, and a spout having an extended base seated on said flange and over which base the upper end of the neck is turned.

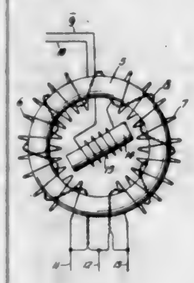
1,566,791. SHOE AND METHOD OF MAKING THE SAME. WALTER R. EKINS, St. Louis, Mo., assignor to Brown Shoe Company, Inc., St. Louis, Mo., a Corporation of New York. Filed June 26, 1925. Serial No. 39,663. 6 Claims. (Cl. 36—55.)



1. In a new article of manufacture an apparel shoe having an inner quarter provided with a relatively smooth inner face, and means whereby the heel portion of said shoe is prevented from accidentally moving relative to the heel of the wearer, said means comprising a section of material having a roughened face, said roughened face of said section of material being arranged flush with the relatively smooth inner face of said inner quarter.

---

1,566,792. INDUCTANCE DEVICE. FRANK E. FIELD, Somerville, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Apr. 17, 1922. Serial No. 553,619. 5 Claims. (Cl. 178—46.)



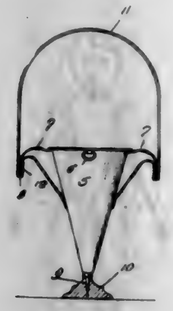
2. An inductance device comprising a substantially closed magnetic circuit core, a winding on one portion of said core, a second winding on a second portion of said core, an adjustable bar of magnetic material extending between said portions and a supplementary winding on said bar and connected in circuit with said windings.

---

1,566,793. METHOD OF ALLOYING RARE METALS AND ARTICLES MADE THEREFROM. WILLIAM BENJAMIN GEBO, East Orange, N. J., assignor to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed June 14, 1923. Serial No. 645,395. 11 Claims. (Cl. 75—1.)

1. The steps in the method of preparing a refractory metal from a comminuted form which comprise, coating the individual particles thereof with a volatile protective agent and sintering said particles into a coherent state.

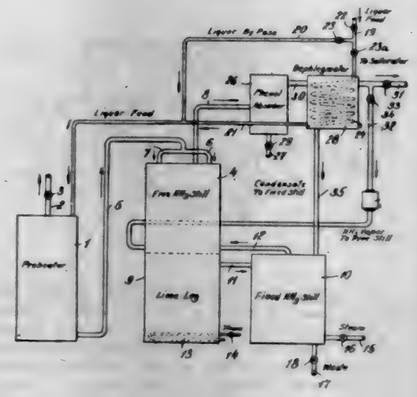
1,566,794. FLOWER BASKET. JOSEPH V. HARPER, Washington, N. C. Filed May 4, 1925. Serial No. 27,820. 2 Claims. (Cl. 220—94.)



1. A device of the class described including a container, a pair of strips each being bent upon itself and having one extremity attached to the upper portion of the container, and the other extremity attached to the intermediate portion of the container, so as to form an arm with the outer end or intermediate portion of the strip bent downwardly, and an inverted U-shaped bail having sockets on its extremities for receiving the ends of the arms.

---

1,566,795. TREATMENT OF GAS LIQUOR. LE ROY WILBUR HEFFNER, East Norristown Township, Montgomery County, and WILLIAM TIDDY, Jeffersonville, Pa. Filed Dec. 16, 1924. Serial No. 756,193. 25 Claims. (Cl. 260—154.)

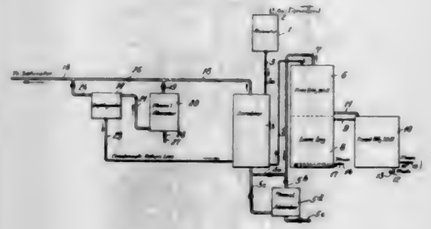


1. The process of recovering phenols from liquors containing the same in small amounts, which comprises subjecting the liquor to a temperature of 98° C. or higher, in the presence of sufficient ammonia to drive off the phenol as phenolate.

---

1,566,796. RECOVERY OF PHENOLS FROM AMMONIACAL LIQUOR. LE ROY WILBUR HEFFNER, East Norristown Township, Montgomery County, and WILLIAM TIDDY, Jeffersonville, Pa. Filed Dec. 16, 1924. Serial No. 756,194. 16 Claims. (Cl. 260—154.)

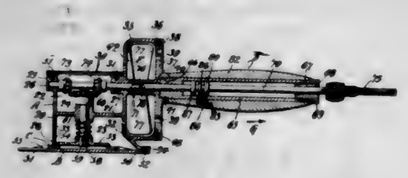
1. The process of treating gas liquors containing phenolic impurities which comprises subjecting the liquor to distillation for the recovery of ammonia therefrom, the temperature of the liquor and vapors at the outlet of



the ammonia from the still being about 98° C. or higher to drive off ammonium phenolate with the ammonia.

---

1,566,797. HAIR-CUTTER DEVICE. JOHN HOLTZMAN, New York, N. Y. Filed Dec. 2, 1921. Serial No. 524,270. 5 Claims. (Cl. 30—1.)



1. In a cutter of the character described the combination of a shell having inlet and outlet openings, a comb secured to one end of the shell forming a chamber therewith, a rotatable cutter blade in said chamber bearing on the comb with a portion thereof projecting out of the chamber, a second shell adjacent to the first shell forming a second chamber, the second chamber having inlet openings, the inlet openings of the first chamber connecting it with the second chamber, and a rotatable propeller in the second chamber to produce a draft through both chambers and over the cutter blade projecting out of the first chamber.

---

1,566,798. PROCESS OF WATERPROOFING STRAW HATS AND THE LIKE AND PRODUCT OF THE SAME. CHARLES J. KUNTZ, Glendale, New York, and JOSEPH SIMONS, East Orange, N. J. Filed Jan. 8, 1925. Serial No. 372. 3 Claims. (Cl. 2—192.)

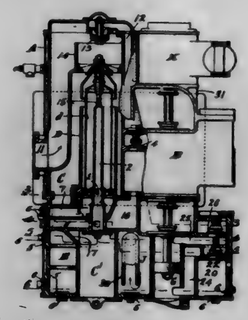
1. A straw hat having a waterproof coating comprising nitrocellulose and sandarach gum forming with nitrocellulose a pliable solid adhesive with the material of the hat.

---

1,566,799. FEED-WATER-HEATING APPARATUS. JOHN A. LE CAIN, Malden, MASS., assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Feb. 13, 1922. Serial No. 536,001. 9 Claims. (Cl. 261—34.)

1. A feed water heater unit having an upper section comprising a heater, a lower section suspended from the

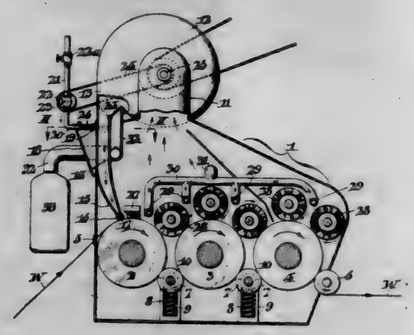
upper section and comprising a hot water chamber, a float tank, and a passage for delivery of excess water



from the float tank, and means for attachment of the upper section to a locomotive boiler for support of the unit by the upper section.

---

1,566,800. DEVICE FOR OFFSET PREVENTION AND SURFACE FINISHING IN PRINTING. CHARLES J. MACARTHUR, Glen Ridge, N. J., assignor to Charles Enen Johnson and Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Apr. 21, 1924. Serial No. 707,883. 7 Claims. (Cl. 91—59.)

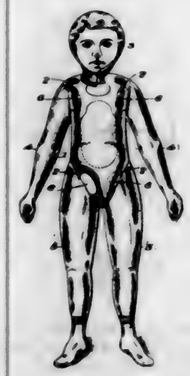


7. A device of the character described comprising an enclosure through which a freshly-printed web or sheet is passed, a blower whereby air laden with powdered absorbing and surface-finishing material is continuously circulated within the enclosure, a duct leading from the pressure outlet of the blower to direct the powder-laden air against the surface of the freshly printed web or sheet, a conduit also leading from the pressure outlet of the blower to a powder collector, and a swingable deflector whereby the outflow from the blower may be diverted to pass into the conduit for complete removal and collection of the powdered material from the circulatory course within the enclosure.

---

1,566,801. DOLL. JEAN S. MILLARD, Akron, Ohio. Filed Feb. 3, 1922. Serial No. 533,761. 8 Claims. (Cl. 46—40.)

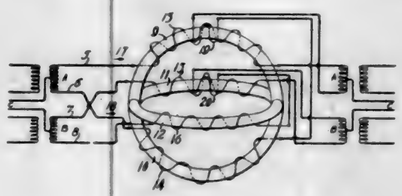
3. A doll comprising a body having a socket therein, a body member having a socket therein, a flexible connecting link having a ball portion on each end, each ball portion being adapted to be sprung into said sockets to



thereby secure said body member to said body in adjustable flexible relation therewith.

---

1,566,802. LOADING COIL AND METHOD OF CONSTRUCTION. IVAN L. MILTON, Western Springs, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed May 1, 1923. Serial No. 635,869. 5 Claims. (Cl. 178—46.)

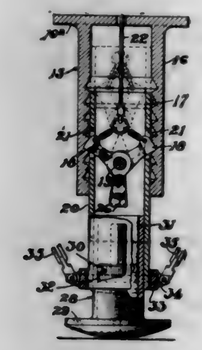


1. The method of compensating for different permeability between sections of the core of an induction coil which carry the main windings for the physical circuits in which the coil is to be connected mounted on different sections, which method comprises connecting to one main winding a supplementary winding mounted on that section of the core which carries the mate winding for said one main winding and proportioning the number and direction of the turns of said supplementary winding to obtain an inductance balance between the windings of the induction coil.

---

1,566,803. ADJUSTABLE SUPPORT FOR TRUCKS AND TRAILERS. ROY H. MORRIS, Piedmont, Calif. Filed Apr. 2, 1924. Serial No. 703,696. 5 Claims. (Cl. 280—33.1.)

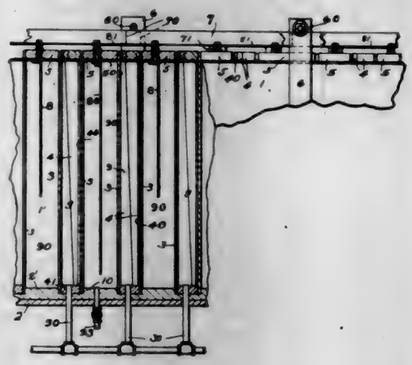
1. An adjustable support for a semi-trailer comprising a cylinder disposed beneath and connected to said trailer, a sleeve having its upper ends telescoped within said cylinder and having a foot member at its lower ends engageable with the ground, latching means carried by the sleeve and adapted to detachably connect the sleeve to said cylinder, whereby the support will sustain the weight of the trailer, and operating means connected to



said latching means and adapted upon operation to simultaneously release the locking means to disconnect the sleeve from the cylinder and elevate the sleeve.

---

1,566,804. ELECTROLYTIC-CELL BATTERY. WILLIAM E. MORTRUDE, Jr., Seattle, Wash., assignor of one-fourth to Charles W. Littlefield, one-fourth to Philip T. Molleur, and one-fourth to Dan C. Brownell, all of Seattle, Wash. Filed Aug. 13, 1924. Serial No. 731,703. Renewed Oct. 26, 1925. 5 Claims. (Cl. 204—58.)

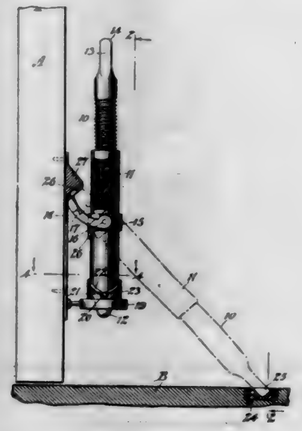


1. An electrolytic cell battery having a bottom and side walls provided at intervals with channels each extending across the inner faces of the bottom and the side walls, diaphragm sheets fitting against each side wall of said channels and extending across the cell, and securing members wedging in said channels between the edges of the diaphragm sheets.

---

1,566,805. DOOR BOLT. BERNARD ACKERMAN, New York, N. Y. Filed May 11, 1925. Serial No. 29,554. 4 Claims. (Cl. 293—338.)

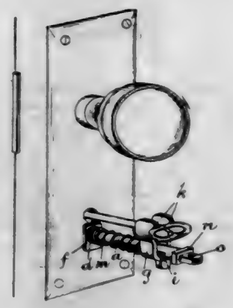
1. A door bolt including telescoping bolt sections having threaded engagement with each other, an element in which one of said sections has turning and sliding movement, means to rockably mount said element on a door to permit the bolt sections to move to an approximately upright position adjacent the door or to oblique position



for engagement with a floor adjacent the door bolt holding means, and means to sustain said bolt holding means on the door.

---

1,566,806. ATTACHMENT FOR MAINTAINING KEYS IN KEYHOLES. PALMER ABERDEEN, Toronto, Ontario, Canada. Filed Dec. 13, 1924. Serial No. 755,795. 2 Claims. (Cl. 70—65.)



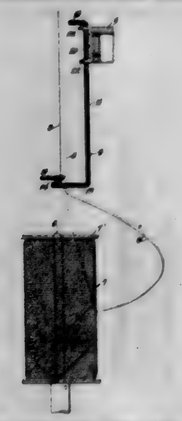
1. A device of the class described, a shank adapted to be longitudinally adjusted, said shank comprising a screw threaded spindle and an internally screw threaded sleeve, a curved tongue formed on the outer end of said spindle, a claw member slidably and pivotally arranged on the said sleeve, a tension spring for maintaining the said claw member in adjusted positions on the said shank, substantially as and for the purpose specified.

---

1,566,807. THREAD GUIDE. CHARLES JAMES BACON, Buffalo, N. Y., assignor to Du Pont Fiberslik Company, Inc., a Corporation of Delaware. Filed Jan. 31, 1924. Serial No. 689,658. 15 Claims. (Cl. 117—21.)

1. A thread guide adapted to be used in connection with a throwing machine with which is associated a source of thread supply comprising a pair of connected

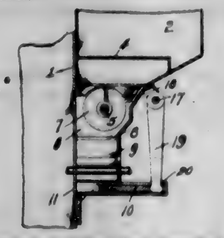
legs arranged in an adjacent relation to each other and having an eyelet associated therewith through which the



thread is adapted to pass, said legs being adapted to cooperate for positioning the eyelet with respect to said source of thread supply.

---

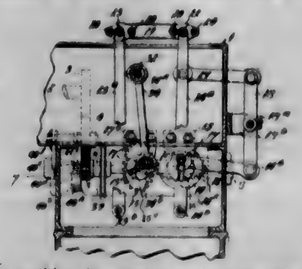
1,566,808. STOKER. ABNER D. BAKER, Swanton, Ohio. Filed July 18, 1924. Serial No. 726,689. 2 Claims. (Cl. 110—114.)



1. In an apparatus of the class described, a feed hopper having a pocket with a discharge opening therein, a feed worm in the hopper above said pocket, a ratchet wheel rotatable with the feed worm, means for intermittently driving said ratchet wheel, a plunger operable to discharge fuel from said pocket through the discharge opening therein, positive means including an element associated with the periphery of said ratchet wheel for moving said plunger in one direction, and means for automatically actuating said plunger in the opposite direction.

---

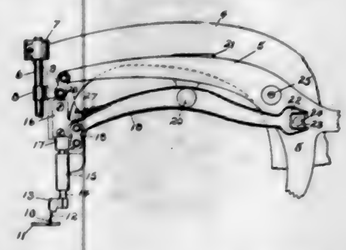
1,566,809. CIGARETTE-MAKING MACHINE. LOUIS BERNHARD BARON, London, England. Filed Oct. 28, 1919. Serial No. 333,874. 11 Claims. (Cl. 131—37.)



10. In a machine for moving a cigarette rod, said machine having a carriage reciprocatable parallel to the line of movement of the cigarette rod and means for cutting the rod mounted on said carriage, means including meshing elliptical gears for moving said cutting means forwardly and backwardly transversely to the line of movement of the cigarette rod while said carriage is reciprocated.

---

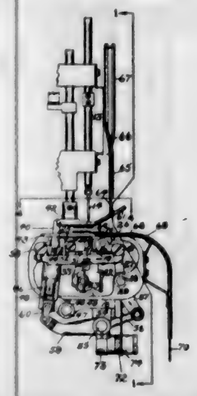
1,566,810. TRIMMER FOR SEWING MACHINES. ADELMER M. BATES and ALBERT KRASA, Chicago, Ill., assignors to Bates Valve Bag Company, Chicago, Ill., a Corporation of West Virginia. Filed Jan. 26, 1924. Serial No. 688,724. 3 Claims. (Cl. 112—122.)



1. A trimmer for sewing machines, comprising a knife, a carrier for the knife, means to reciprocate the carrier in a direction substantially perpendicular to the knife edge, a guide for the carrier pivoted about an axis substantially parallel with the knife edge, and a spring tending to turn the guide about its pivot to press the knife against a cooperating shearing edge.

---

1,566,811. TRIMMER FOR SEWING MACHINES. ADELMER M. BATES and ALBERT KRASA, Chicago, Ill., assignors to Bates Valve Bag Company, Chicago, Ill., a Corporation of West Virginia. Filed Jan. 26, 1924. Serial No. 688,725. 12 Claims. (Cl. 112—122.)



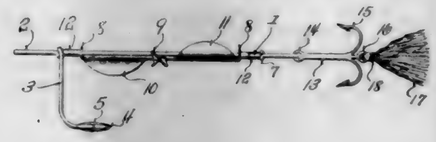
1. In a sewing machine, a substantially L-shaped guide pivoted at the end of one of its arms, a carrier slidable longitudinally of the other arm of the guide, a cutter mounted in the carrier beyond the end of said other arm, means to oscillate the guide, and means to reciprocate the carrier.

---

1,566,812. ARTIFICIAL BAIT. ALBERT A. BAYER, Milwaukee, Wis. Filed May 25, 1925. Serial No. 32,708. 3 Claims. (Cl. 43—47.)

1. An artificial bait comprising a spindle having a line receiving eye at one end, and a hook receiving eye at its other, an arm extending downwardly from adjacent the

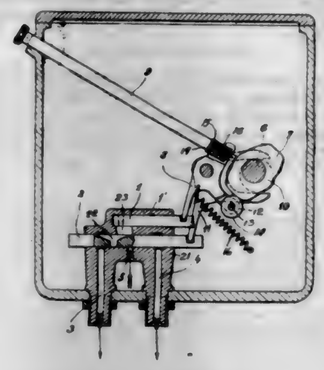
first mentioned end of said spindle and having a rearwardly bent weighted portion, a spinner revolubly mounted upon said spindle and having a pair of forward arms,



and a pair of rearward arms curved in opposite directions, and a propeller between said pair of arms, and a movable hook interlinked with said last mentioned eye.

---

1,566,813. VARIABLE-STROKE FLUID PUMP. EMANUEL BLAUHORN and OTTO HAJEK, Vienna, Austria. Filed Oct. 20, 1920. Serial No. 418,291. 3 Claims. (Cl. 184—27.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

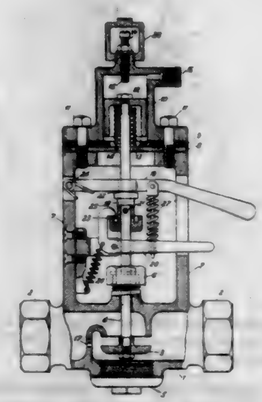


1. In a valveless fluid pump having a pump piston and a distributing piston, means to reciprocate both pistons positively comprising a driving shaft, a cam on said driving shaft, a rocking lever in operative connection with the distributing piston, a fork on said lever enclosing the cam to effect positive control of the movement of said lever, a second cam on said driving shaft provided with a pair of faces, a rocking lever adjacent to said second cam in operative connection with the pump piston, and two lugs on said lever adapted to come alternately in operative contact with each of the faces of said pair to effect positive driving of the piston in both directions at a speed double to that of the distributing piston.

---

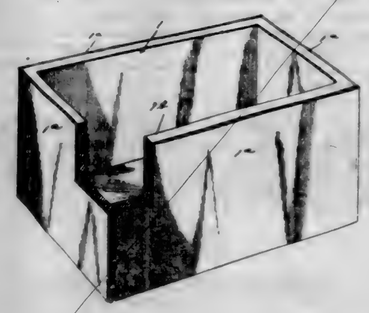
1,566,814. HEATING APPARATUS. WILLIAM L. BLISS, Niagara Falls, N. Y., assignor to Vapor Car Heating Company, Inc., Chicago, Ill., a Corporation of New York. Filed Jan. 31, 1918, Serial No. 214,603. Renewed May 2, 1924. 15 Claims. (Cl. 237—6.)

1. In combination with a railway car, a heating device located in the car, a supply pipe leading thereto and adapted to be connected to a source of supply of heating medium, a pipe adapted to be connected with a source of supply of pressure fluid, and a governing device for controlling the supply of medium from the source of supply to the heating device having a port and comprising automatic means whereby said port is restricted without being closed on the disappearance of pressure fluid in said last named pipe and is opened to a greater extent when said pipe is put under pressure.



---

1,566,815. MOLDED BOX WITH VENEER EXTERIOR AND METHOD OF PRODUCING THE SAME. GEORGE W. BULLEY, Akron, Ohio, assignor to The Miller Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Apr. 3, 1925. Serial No. 20,476. 5 Claims. (Cl. 18—59.)



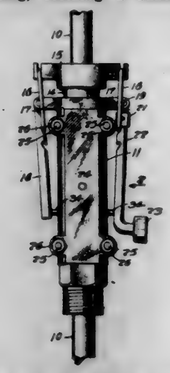
1. A composite article composed of a surface layer of wood impregnated with a phenolic condensation product and a body of cellular hard rubber united by vulcanization.

---

1,566,816. STUFFING BOX. FRANK W. CARLSON, Oilfields, Calif. Filed Mar. 29, 1923. Serial No. 628,548. 2 Claims. (Cl. 286—16.)

2. A stuffing box comprising a housing having an opening in one side corresponding substantially to the diameter of the bore of the housing, a door having a member fitting into the opening in the housing and provided

with a segmental inner surface supplementary to the bore of the housing, forming a substantially circular



chamber, a follower in one end of the housing, and means for forcing the follower into and maintaining it in compressing condition in the housing.

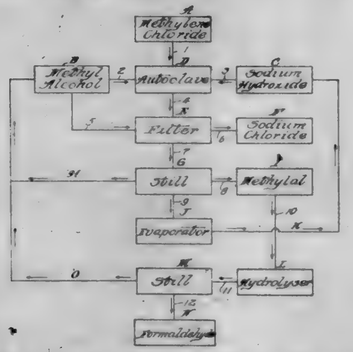
1,566,817. PRODUCTION OF PHENOL-METHYLAL RESIN. CARNIE B. CARTER and ALBERT E. COXE, Pittsburgh, Pa., assignors to S. Karpen & Bros., Chicago, Ill., a Corporation of West Virginia. Filed Aug. 23, 1922. Serial No. 583,917. 5 Claims. (Cl. 260—4.)

1. The method of producing a phenolic condensation product which comprises: subjecting to the action of heat and pressure a phenolic body and a methylal in the presence of acid and water.

1,566,818. MANUFACTURE OF ALCOHOLS. CARNIE B. CARTER and ALBERT E. COXE, Pittsburgh, Pa., assignors to S. Karpen & Bros., Chicago, Ill., a Corporation of West Virginia. Filed Aug. 28, 1922. Serial No. 584,843. 1 Claim. (Cl. 260—156.)

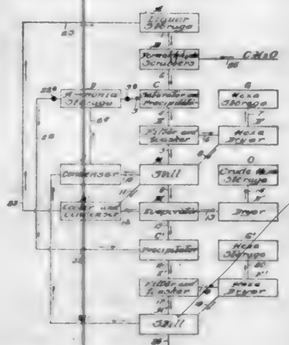
The continuous process of producing alcohol which comprises causing a reaction between a mono-halogenated hydrocarbon and an alkali dissolved in water and a small percentage of an alcohol of the aliphatic series, such reaction being effected at a temperature of approximately 100° C., under pressure, and removing alcohol from time to time to maintain a concentration of alcohol which is lower than 20%.

1,566,819. PROCESS OF PRODUCING METHYLALS. CARNIE B. CARTER, Pittsburgh, Pa., assignor to S. Karpen & Bros., Chicago, Ill., a Corporation of West Virginia. Filed July 26, 1924. Serial No. 728,461. 10 Claims. (Cl. 260—151.)



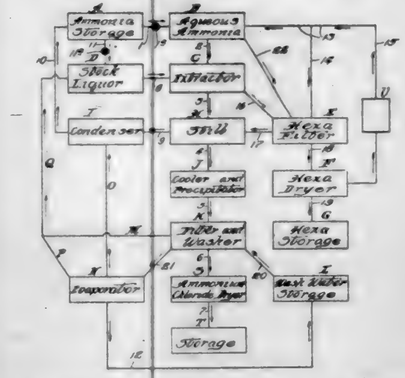
1. The process of producing methylal which comprises causing a reaction between methylene chloride, alcohol and an alkali.

1,566,820. PRODUCTION AND PURIFICATION OF HEXAMETHYLENETETRAMINE. CARNIE B. CARTER, Pittsburgh, Pa., assignor to S. Karpen & Bros., Chicago, Ill., a Corporation of West Virginia. Filed July 26, 1924. Serial No. 728,462. 11 Claims. (Cl. 260—141.)



1. In the production of hexamethylenetetramine, the step which comprises introducing ammonia into a solution of hexamethylenetetramine and thus lowering the saturation point and causing hexamethylenetetramine to be precipitated.

1,566,821. RECOVERY OF HEXAMETHYLENETETRAMINE FROM MIXTURES CONTAINING AMMONIUM CHLORIDE. CARNIE B. CARTER, Pittsburgh, Pa., assignor to S. Karpen & Bros., Chicago, Ill., a Corporation of West Virginia. Filed July 26, 1924. Serial No. 728,463. 9 Claims. (Cl. 260—141.)

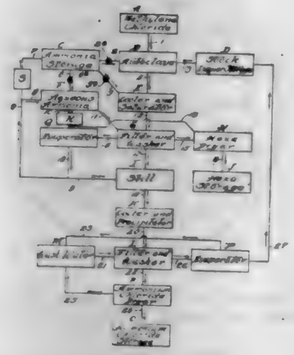


1. The method of effecting separation of hexamethylenetetramine from ammonium chloride which comprises employing aqueous ammonia in strong solution, whereby the solvent power for hexamethylenetetramine is decreased and the solvent power for ammonium chloride increased.

1,566,822. PRODUCTION OF HEXAMETHYLENETETRAMINE AND AMMONIUM CHLORIDE. CARNIE B. CARTER, Pittsburgh, Pa., assignor to S. Karpen & Bros., Chicago, Ill., a Corporation of West Virginia. Filed July 26, 1924. Serial No. 728,464. 6 Claims. (Cl. 260—141.)

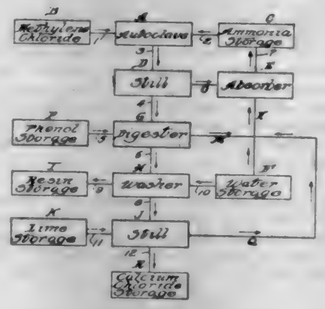
1. The process of producing and separating hexamethylenetetramine and ammonium chloride which comprises: heating methylene chloride and aqueous ammonia and employing excess ammonia to lower the solvent power of

the liquor for hexamethylenetetramine and increase the same for ammonium chloride, separating the precipitated hexamethylenetetramine from the liquor, and distilling



ammonia from the liquor and cooling the liquor and thus precipitating ammonium chloride and separating the precipitated ammonium chloride from the liquor.

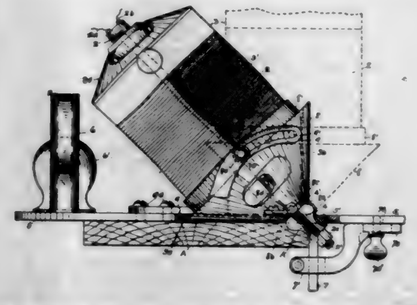
1,566,823. PROCESS OF PRODUCING A PHENOLIC CONDENSATION PRODUCT. CARNIE B. CARTER, Pittsburgh, Pa., assignor to S. Karpen & Bros., Chicago, Ill., a Corporation of West Virginia. Filed July 26, 1924. Serial No. 728,465. 5 Claims. (Cl. 260—4.)



1. The method of producing a phenolic condensation product which comprises: producing hexamethylenetetramine and ammonium chloride by reaction between methylene chloride and ammonia; digesting a phenolic body with a solution of said salts, the phenolic body being taken in excess of the molecular proportions with respect to the hexamethylenetetramine formed in the reaction; separating the fusible, soluble resin thus produced from the liquor; and purifying the resin.

1,566,824. SHAPER. RAY L. CARTER, Phoenix, N. Y. Filed Sept. 3, 1925. Serial No. 54,371. 8 Claims. (Cl. 144—134.)

1. The combination with a hand-propelled shaper including an encased motor and a tool rotated thereby, of a detachable hollow conical head adapted to be adjustably mounted upon the motor casing and having its expanded end formed cylindrical to receive the motor casing, said head having an axial opening in its reduced end through which the tool projects, and trunnions extend-



ing laterally from the reduced end of the head adapted for pivotally mounting the head upon a base or other support.

1,566,825. METHOD OF PREVENTING EVAPORATION FROM STORAGE TANKS. GENTRY CASH, Whiting, Ind., assignor to Standard Oil Company, Chicago, Ill., and Whiting, Ind., a Corporation of Indiana. Filed May 4, 1923. Serial No. 636,591. 6 Claims. (Cl. 220—88.)

1. A method of preventing evaporation losses from storage tanks which consists in freely connecting the vapor vent of such a tank with a chamber open to the atmosphere whereby vapors from the tank are discharged into said chamber and are retracted therefrom into the tank on contraction of the contents of the latter, and means for maintaining the gaseous contents of the chamber in quiescence between the inlet to the chamber from the tank and its outlet.

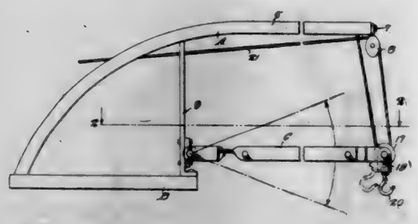
1,566,826. METHOD OF TREATING SEPARATORS. RUFUS N. CHAMBERLAIN, Chicago, Ill., assignor, by mesne assignments, to Gould Storage Battery Company, Inc., New York, N. Y., a Corporation of New York. Filed Mar. 24, 1922. Serial No. 546,477. 7 Claims. (Cl. 136—148.)

1. The method which consists in treating a separator with an acid resistant material and subjecting the treated separator to the action of an alkali at high temperature, substantially as described.

1,566,827. UNIVERSAL PROTECTOR BAR. CLAUDE E. CHILSON, Elmira, N. Y. Filed Feb. 13, 1925. Serial No. 8,997. 1 Claim. (Cl. 214—86.)

The combination with a vertical bracket, of a pair of bearings carried thereby, a shaft revoluble in the bearings, a U-shaped member having its ends fixed to the shaft and

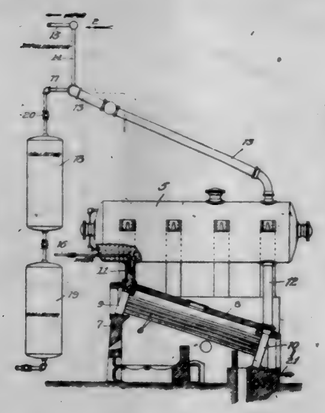
provided with a flattened portion intermediate its ends, an arm pivoted to the flattened portion to swing about a horizontal axis, a pulley journaled in the outer end of



the arm, a hook depending from the outer end of the arm, and disposed below the pulley and flexible means engaged with the pulley whereby to raise or lower the arm.

---

1,566,828. ART OF DISTILLING PETROLEUM OILS. EDGAR M. CLARK, New York, N. Y., assignor to Standard Development Company, a Corporation of Delaware. Filed Apr. 24, 1920. Serial No. 376,252. 3 Claims. (Cl. 196—84.)

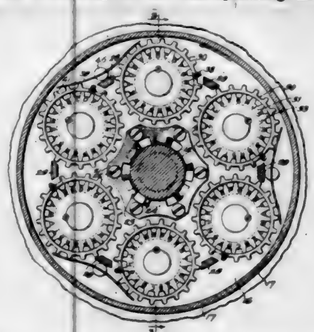


1. The process of utilizing the contained heat of a fire-heated still and setting at the end of a pressure-distillation of a heavy oil for the production of gasoline for the treatment of the residues of the distillation, said residues being of about 20 degrees Bé. density, which consists in withdrawing the still fire, subsequently passing steam thru the residues and condensing the evolved vapors until about 60 per cent of the oil of the residues have been removed and condensed, and withdrawing the residual oil from the still.

---

1,566,829. COMBINATION LOCK. FRANCISCO CLARK, Durango, Mexico. Filed Feb. 12, 1924. Serial No. 692,398. 1 Claim. (Cl. 70—53.)

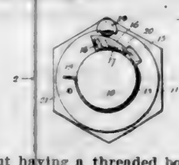
1. A combination lock including a base plate having an approximately central opening, a turnable bolt operating member disposed at the back of the plate and having a hub extending through said opening, a handle attached to said hub at the front of the base plate, a ring-like element on the base plate at the back and having an annular series of spaced tooth-like projections, members on said hub adapted to pass through the spaces between said projections and adapted to move to the back of the said projections by a turning of the bolt-operating member, a



series of tumblers, and means on the tumblers to oppose or to permit the turning of said bolt-operating member.

---

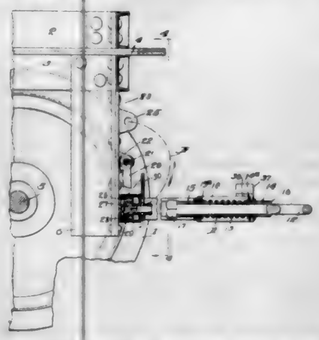
1,566,830. LOCK NUT. FRANCISCO CLARK, Durango, Mexico. Filed Apr. 30, 1925. Serial No. 27,044. 3 Claims. (Cl. 151—25.)



1. A lock nut having a threaded bore to receive a bolt, a headed pin on said nut at the rear face thereof, said nut having a pin hole remote from the headed pin, and a locking device comprising a head having teeth at the inner surface thereof adapted to grip the threads of the bolt, and a bowed spring extending from said head at one end and adapted to partially encircle the bolt, said head having a gradually reduced thickness from one end toward the opposite end and positioned adjacent to the headed pin to bear against the same to cause the pin to effect engagement of the teeth of said head with the threads of the bolt.

---

1,566,831. ADJUSTABLE DRAWBAR. CHARLES G. CLEMENT, Edgerton, Wis., assignor to Highway Trailer Company, Edgerton, Wis., a Corporation of Wisconsin. Filed Sept. 16, 1922. Serial No. 588,556. 9 Claims. (Cl. 280—33.44.)

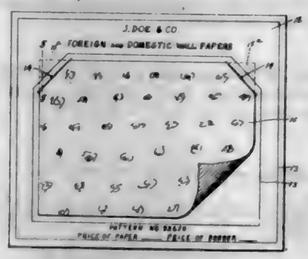


1. In combination with a vehicle frame, a drawbar with a link connected to the frame and to the drawbar by horizontal pivots extending transversely of the vehicle,

whereby said link is adapted to swing up or down to guide the drawbar into a higher or lower position, and means for connecting the drawbar to the frame independently of said link at either the higher or the lower position.

---

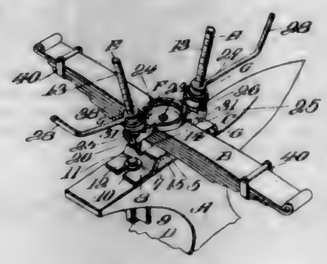
1,566,832. WALL-PAPER-ADVERTISING DEVICE. BENJAMIN A. COOK, Fitchburg, Mass. Filed Jan. 17, 1925. Serial No. 3,084. 1 Claim. (Cl. 211—28.)



A wall paper-advertising device, comprising a relatively stiff backing sheet, having two spaced apart oblique slits relatively near one of its edges, and a wall paper swatch of smaller area than the backing sheet and inserted at two corner portions, in said slits, the inserted portions being superimposed on, and cemented to, the back side of the sheet, so that the swatch is adequately secured to the sheet, and its major portion is exposed at the front side of the sheet without evidence of the presence of an adhesive on either the major portion of the swatch, or the front side of the sheet, the exposed portion of the swatch being free from attachment to the backing sheet, so that it may be displaced to permit inspection of its back side, and surrounded by a framelike marginal portion of the backing sheet, the backing sheet and swatch constituting a display unit which may be assembled loosely with other like units, in a receptacle for transportation, and handled and inspected independently of each other.

---

1,566,833. TOOL FOR ASSEMBLING SPRINGS. CHARLES W. CRANNELL, Chappell, Nebr., assignor of one-half to Benjamin J. Connor, Chappell, Nebr. Filed Jan. 5, 1925. Serial No. 629. 15 Claims. (Cl. 29—87.1.)



1. In a device of the character described, a base, a movable clamping ring above said base, and means to lock said clamping ring in clamping position upon the work, whereby said work is accessible through said clamping ring.

---

1,566,834. MINE-ANCHOR DEVICE. SAMUEL CLARK CROSS, Washington, D. C. Filed June 20, 1923. Serial No. 646,649. 13 Claims. (Cl. 102—3.)

1. In a mine mooring device, the combination with a mine, of a mooring therefor, a connection between the mooring and the mine, a mine sweep slip device in such connection operative in certain positions only, and having a by-pass therein, a swivel joint in such connection

comprising links, one of which has a swivel socket, and the other of which has a guard, and means for directing a mine sweep through said by-pass for preventing the sweeping of the mine.

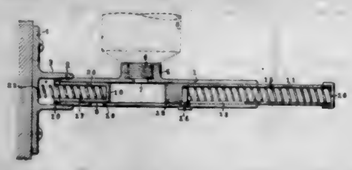
---

1,566,835. HEATING STOVE. LESLIE DANA, St. Louis, Mo., assignor to The Charter Oak Stove and Range Company, St. Louis, Mo., a Corporation of Missouri. Original application filed Oct. 29, 1924, Serial No. 746,658. Divided and this application filed June 6, 1925. Serial No. 35,429. 5 Claims. (Cl. 126—277.)

1. In a stove, an ash pit and pan, a jacket surrounding said ash pit, and supported by the pan, and legs for supporting the stove above the floor and engaging the pan only at the corners, said legs having an upper skirting to overlap and cover the edge of the ash pit and the lower edge of the jacket.

---

1,566,836. DISPENSING DEVICE. PHILIP G. DARLING, Bridgeport, Conn., assignor to Manning, Maxwell & Moore, Inc., New York, N. Y., a Corporation of New Jersey. Filed Mar. 16, 1922. Serial No. 544,162. 2 Claims. (Cl. 221—102.)

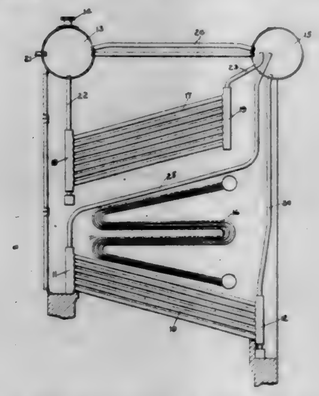


1. A device of the class described comprising a tubular barrel supported at one end, said barrel having an inlet opening in its side wall surrounded by an outstanding internally threaded nipple for the reception of the threaded neck of a collapsible dispensing tube, a piston

provided with a tubular stem sliding in the outer portion of the barrel, a pin fixed in the barrel and projecting into the stem of the piston through a slot in the side wall of the stem, a helical spring disposed within the stem bearing at one end against the pin and at the other against a part carried by the stem, a plunger sliding in that end of the barrel at which the latter is supported, the barrel having an outlet opening longitudinally spaced from the inlet opening and normally covered by the plunger, and a spring for holding the plunger in normal position.

---

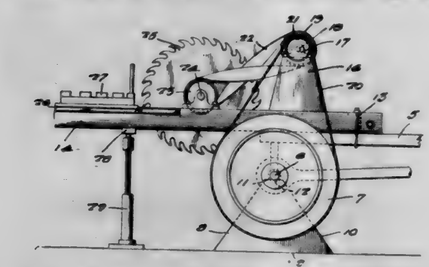
1,566,837. STEAM BOILER. CHRISTOPHER SAMUEL DAVY and CHRISTOPHER HUMPHREY DAVY, Beckenham, England, assignors to The Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Filed Dec. 27, 1924. Serial No. 758,363. 2 Claims. (Cl. 122—299.)



1. In a water tube boiler, a first steam and water drum having a steam outlet, a second steam and water drum, tubes connecting said drums and arranged to conduct steam and water therebetween, a lower bank of horizontally inclined water tubes having their ends connected to said second drum, an upper bank of horizontally inclined water tubes above said lower bank and having their uptake ends connected to said second drum and their downtake ends connected to said first drum, and a water supply connected to said first drum.

---

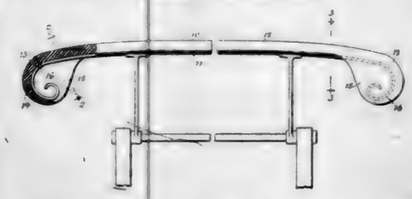
1,566,838. AUTOMOBILE SAWING MACHINE. JOSEPH TOUPHIL DE MAROIS, Anaconda, Mont. Filed Dec. 4, 1924. Serial No. 753,955. 2 Claims. (Cl. 143—43.)



1. A tool attachment for automobiles comprising a frame designed to be supported at one end upon the side members of an automobile chassis, spaced bearings positioned intermediate the length of the frame and carried by the side members thereof, a shaft journalled in said bearings, a rotary tool fixed to an end of said shaft and disposed at one side of the frame, a pulley fixed to an intermediate portion of the shaft, a pair of upright standards carried by the side members of the frame between said shaft and that end of the frame which is adapted to be supported upon the chassis, an elevated shaft journalled in bearings carried by the upper ends of said standards, pulleys fixed to the ends of said elevated shaft outwardly of said standards and adapted to be belted directly to the rear wheels of the automobile, an intermediate pulley carried by said elevated shaft and a belt connecting said last mentioned pulley to the pulley on the tool carrying shaft.

---

1,566,839. BUMPER PROTECTOR CUSHION. ROBERT DENELS, New York, N. Y. Filed May 14, 1925. Serial No. 30,289. 2 Claims. (Cl. 293—55.)



1. A bumper protecting cushion comprising an element made of a single piece of rubber to provide a pliable and elastic body, and an expansible bumper end receiving pocket at each end of said body.

---

1,566,840. METHOD OF MAKING DENTAL PLATES. EDWARD L. DILLMAN, Jamaica, N. Y. Filed Nov. 25, 1924. Serial No. 752,275. 2 Claims. (Cl. 18—47.5.)

1. The method of forming dental plates from fusible material, which consists in forming a model of a material soluble in the presence of moisture, subsequently forming the porcelain plate thereon, fusing the porcelain plate and the model, and subsequently removing the model by adding moisture thereto and causing disintegration thereof.

---

1,566,841. METHOD OF MAKING PORCELAIN ARTICLES. EDWARD L. DILLMAN, Jamaica, N. Y. Filed Mar. 19, 1925. Serial No. 16,862. 1 Claim. (Cl. 25—157.)

The herein described method of making porcelain articles, consisting in forming a mold of non-fusing composition, then making an impression in the mold, then filling the impression with fusible material, then placing the mold with the fusible material therein in a kiln and subjecting the same to the proper temperature for a desired period, then allowing the mold and the article to cool, and then removing the mold from the article by immersing the mold in water so that the material of the mold will disintegrate.

---

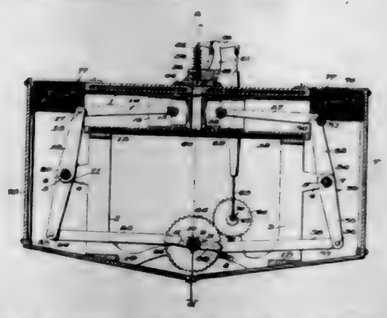
1,566,842. SWEATER. NATHAN I. DRYFOOS, Cleveland, Ohio. Filed Feb. 18, 1922. Serial No. 537,633. 1 Claim. (Cl. 2—90.)

In a sweater the combination of a body portion having a neck opening and a collar attached thereto adapted to be raised about the ears and head, said collar being

open at the front and formed with the front edges extending outwardly to leave a wide angle in its normal position, the inner half of the front edges being provided with complementary fastening means to secure the collar edges together to form a folded collar adapted to fit snugly about the neck of the user, the outer edges of the folded collar flaring slightly, and a strap removably attached to the under side of the outer half of the collar near the front and extending around the collar and adapted to lie flat between the folds in the folded position of said collar but adapted to be passed over the head of the wearer in the raised position of the collar.

---

1,566,843. GAS ENGINE. RAPHAEL EDGAR DU BS, Denver, Colo. Filed Apr. 8, 1925. Serial No. 21,648. 3 Claims. (Cl. 123—195.)



3. In an internal combustion engine a horizontal cylinder, a frame supporting said cylinder and comprising a pair of longitudinal and arcuately shaped beams, a pair of standards rising from the opposite ends of said beams, a plate connecting a pair of the standards at the ends of the frame and curved to conform to the curvature of the cylinder for receiving said cylinder, brackets extending outwardly from the standards, a shaft mounted in each pair of brackets, a rock lever carried by each shaft, pistons in the cylinder, means connecting a piston with a lever, a crank shaft and means connecting each lever with the crank shaft whereby said shaft is revolved, a housing enclosing said frame, crank shaft and rock levers, and a removable cover plate connected to each end of the cylinder and the housing.

---

1,566,844. SHIELD FOR GLASS HYPODERMIC SYRINGES. LOGAN EISELE, Nashville, Tenn. Filed May 14, 1921. Serial No. 469,679. 1 Claim. (Cl. 128—216.)

A hypodermic syringe comprising a glass body, a metal shield covering said glass body, and having a rearward cylindrical extension projecting over the said glass body and a diminished forward extension adapted to support a needle base, said forward extension being provided with a boring, and said glass body having a forwardly projecting tip coextensive with said forward extension, and means between said glass tip and said forward extension for permanently securing said shield to said glass body for preventing the contents of said syringe from being forced backward between said tip and said forward extension.

---

1,566,845. JEWELRY COMPONENT. FREDERIC A. FAIRBROTHER, Providence, R. I. Filed May 7, 1923. Serial No. 637,075. 5 Claims. (Cl. 29—160.6.)

1. As an improved article of manufacture, a jewelry component comprising a pliable end portion substantially circular in cross section and a comparatively rigid body portion having a plurality of faces and having a cross section relatively larger than that of the end portion, the latter being freely bendable in all directions.

---

1,566,846. ANCHOR. FREDRICK C. FIELDING, Coalinga, Calif., assignor of one-third to Edward A. Webb, Coalinga, Calif. Filed Mar. 14, 1923. Serial No. 625,146. 1 Claim. (Cl. 189—90.)

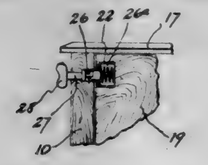
An anchor structure comprising a plate having opposite side edges converging towards each other from the intermediate portion of the plate toward the end thereof, the plate being pointed at one end and provided at its opposite end with a socket the axis of which is in alignment with the median longitudinal dimension of the plate, the plate being provided at its under side with a lip disposed at an acute angle to the plane of the plate and extending from the intermediate portion of the plate under the socket an eye carried by the plate and located upon the median longitudinal dimension thereof and at a point between the ends of the converging side edges of the pointed end of the plate and a rod having link connection with the eye.

---

1,566,847. RADIOCABINET. LOUIS FIRMBACH, Sr., Ridgewood, N. Y. Filed Mar. 5, 1924. Serial No. 696,944. 2 Claims. (Cl. 292—74.)

1. In combination with a horizontally hinged door means for latching the corners of said door in closed position either releasably or positively, comprising sleeves embedded in the corners of the door, said sleeves having an internal shoulder, a hemispherical member slidable and adapted to partly project from said sleeve, a flange on said hemispherical member movable within the sleeve, a spring engaging the flange of the hemispherical member and adapted to urge the latter to pro-

ject, said door being adapted to be rotatable in a frame, the frame having recesses therein adapted to receive the projecting end of the hemispherical member, and



means in said frame cooperating with the door for engaging the hemispherical member to lock the latter in extended position.

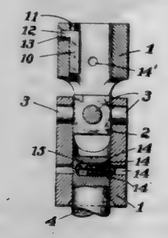
---

1,566,848. INCANDESCENT LAMP. GORTON R. FONDA, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Jan. 26, 1922. Serial No. 532,044. 9 Claims. (Cl. 176—16.)

1. An electric lamp comprising the combination of an incandescent body of refractory metal, a sealed bulb, a carbon-containing material in said bulb available for chemical reaction with gases in said bulb at the operating temperature of said body and in such quantity that by combination thereof with impurities in said lamp the operating properties of said body are improved.

---

1,566,849. COUPLING FOR FLEXIBLE SHAFTING. WILLIAM R. FOX, Jackson, Mich., assignor to Fox Machine Company, Jackson, Mich., a Corporation of Michigan. Filed Feb. 24, 1921. Serial No. 447,514. 1 Claim. (Cl. 287—58.)

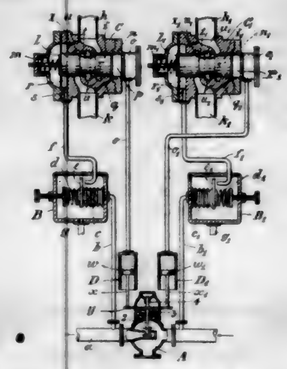


A shaft coupling comprising an outer tubular member having a cylindrical recess in the wall thereof, the axis of which is perpendicular to the axis of the tubular member, and an inner cylindric spindle member to fit said tubular member having a cylindric recess extending transversely thereof, and part way therethrough and of larger diameter than the recess in the tubular member, a cylindric plunger in the recess of the spindle member having a reduced cylindric end to fit the recess in said tubular member, said reduced end of the plunger forming a shoulder, the wall of said recess in the inner cylindric member, having a stop to cooperate with said shoulder to limit the outward movement of the plunger, and a compression spring located between said plunger and the bottom of the recess in the cylindric spindle member.

---

1,566,850. CONTROLLING APPARATUS. NILS FRENNE and ÅKE GÖRAN SAXBERG, Stockholm, Sweden, assignors to Aktiebolaget Vaporackumulator, Stockholm, Sweden, a Corporation. Filed Aug. 7, 1920. Serial No. 402,037. 22 Claims. (Cl. 50—10.)

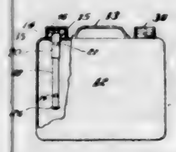
1. In a control apparatus adapted to be influenced by separate impulses, the combination of a main control member, liquid pressure operated means to control the position of said member, liquid pressure operated means to control the operation of the first mentioned means,



separate streams of liquid under pressure for operating each of said means and means responsive to said impulses to control the operation of said second means.

---

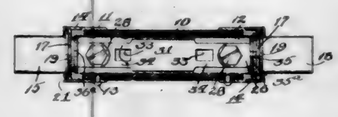
1,566,851. DISCHARGE SPOUT FOR LIQUID CONTAINERS. SIGMUND FREY, Los Angeles, Calif. Filed Feb. 28, 1924. Serial No. 695,720. 5 Claims. (Cl. 221—21.)



1. The combination with a liquid container of a sleeve valve in the wall of the container provided with a port, a tube slidably mounted in the sleeve valve and provided with a port and closed at its inner end, and valve means in the tube operable by the sleeve valve to uncover said second port when the tube is slid through the sleeve valve.

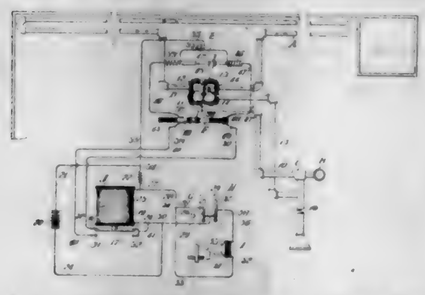
---

1,566,852. CARTRIDGE-FUSE KNIFE-BLADE TYPE FOR RENEWABLE FUSE ELEMENTS. JOHN B. GLOWACKI, Chicago, Ill. Filed Aug. 8, 1923. Serial No. 656,315. 3 Claims. (Cl. 200—132.)



1. A fuse device comprising a tube of insulating material, removable knife contacts in each end of the tube, discs mounted on said knife contacts, caps for securing said contacts and discs to each end of the tube, said knife contacts having an apertured extension within said tube, clamping blocks having one end abbutting members secured on said contacts, and cap screws passing through said apertured extension and threaded in said blocks, the ends of said cap screws being riveted over to prevent withdrawal.

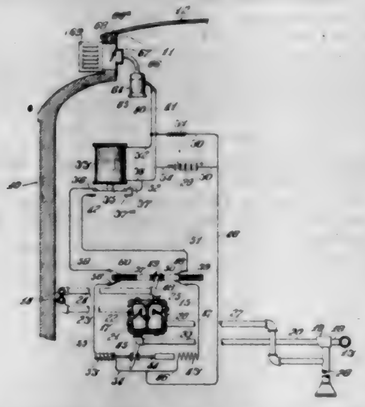
1,566,853. THERMOSTAT FOR CAR-HEATING SYSTEMS. EGBERT H. GOLD, Chicago, and PAUL B. PARKS, Oak Park, Ill., assignors to Vapor Car Heating Company, Inc., Chicago, Ill., a Corporation of New York. Filed July 27, 1923. Serial No. 654,216. 33 Claims. (Cl. 236—38.)



1. In combination with a railway car, a radiator therein, a thermostat inside the car for controlling the circulation of heating medium through the radiator, a housing having an air passage therethrough, and a support for the thermostat in said air passage composed of heat insulating material.

---

1,566,854. THERMOSTATICALLY-CONTROLLED HEATING SYSTEM. EGBERT H. GOLD and EDWARD A. RUSSELL, Chicago, Ill.; said Russell assignor to Vapor Car Heating Company, Inc., Chicago, Ill., a Corporation of New York. Filed July 27, 1923. Serial No. 654,217. 12 Claims. (Cl. 236—36.)



1. In combination with a railway car, a radiator therein, a thermostat for controlling the circulation of heating medium through the radiator, and means independent of the radiator for creating a forced draft of air in contact with the thermostat.

---

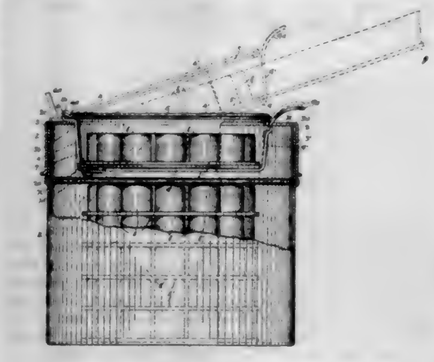
1,566,855. ELECTRICAL FURNACE. ALLAN GRAUBL, Kitchener, Ontario, Canada, assignor of one-tenth to William Junor and one-tenth to Walter H. Warrington, both of Toronto, Ontario, Canada. Filed Apr. 30, 1923. Serial No. 635,626. 4 Claims. (Cl. 219—38.)

1. An electrical furnace, comprising a casing enclosing a water jacket and having a central closed heat chamber forming a part thereof, an electric insulation lining the bottom of said heat chamber, a bed of loose carbon particles arranged within the lined portion of said closed chamber, and electrodes inserted through the walls of said water jacket and insulated therefrom and forming

of said carbon particles an incandescent heat radiating body directing heat rays directly to the inner surface of the water jacket.

---

1,566,856. STORAGE AND DISPLAY RECEPTACLE. JOHN M. GREGORY, Skaneateles, N. Y., assignor to The Campfire Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed May 5, 1925. Serial No. 28,227. 5 Claims. (Cl. 220—82.)



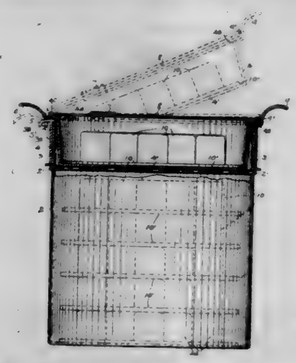
1. The combination with a receptacle cover having an open top, of a display device comprising a split circular part adapted to support a transparent disc above said opening the members of said circular part and adapted to be spread apart for inserting and removing said disc, said circular part having a split depending portion extending part-away around the opening in said part adapted to support goods to be displayed within the cover and to enable said goods to be removed without disturbing the disc, and a lever pivoted beneath said depending portion, the free end of said lever comprising a finger-grip by which the display parts may be lifted away from the cover.

---

1,566,857. DISPLAY RECEPTACLE. JOHN M. GREGORY, Skaneateles, N. Y., assignor to The Campfire Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed May 5, 1925. Serial No. 28,228. 3 Claims. (Cl. 220—82.)

1. The combination with an open top receptacle, and a hoop surrounding said top, of a display tray closing the top of the receptacle comprising a circular flange adapted to overlap and rest upon the top margin of the receptacle, and a depending drawn portion that sinks concentrically

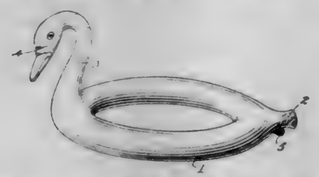
into the receptacle, a transparent disc for closing the mouth of the tray imposed upon said flange, clips mounted on the opposite sides of said flange for loosely holding



the disc in place, means for hinging the edge of said flange between said clips to said hoop, and a handle supported by the edge of said flange opposite the hinge and preventing the disc from shifting away from said clips.

---

1,566,858. SWIMMING RING. EDWIN A. GUINZBURG, New York, N. Y. Filed Feb. 27, 1925. Serial No. 12,079. 1 Claim. (Cl. 9—17.)



A swimming ring acting as a combined float and toy, comprising a substantially circular hollow body having a hollow projection at one point representing the tail of a fowl and a post extending at right angles to the plane of the body at the diametrically opposite point, said post being formed as the neck and head of a fowl, and an inflating valve connected to said body, the interior of the body, tail and the post being in free communication.

---

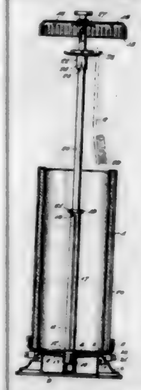
1,566,859. COAT AND HAT RACK. HIRAM D. GUNTHER, Chicago, Ill. Filed Nov. 2, 1923. Serial No. 672,350. 1 Claim. (Cl. 248—24.)

A device of the character described including a shank portion, brace members extending upwardly from the shank at an angle relative thereto, a substantially rectangular bracket at the upper end of the brace members,

a U-shaped supporting member arcuately curved longitudinally and having its ends pivotally mounted upon the lower longitudinal portion of the bracket with its side portions engaging the upper portion of the bracket when in an operative position to limit the outward swinging movement of the supporting member.

---

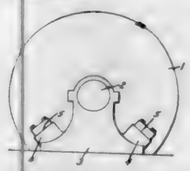
1,566,860. TOOTHBRUSH HOLDER. JAMES P. HAINSIGIANIS, New York, N. Y. Filed Mar. 9, 1925. Serial No. 14,292. 6 Claims. (Cl. 248—63.)



6. In a tooth brush holder, a container, a telescoping structure connected to the bottom of the container, a cap connected to the upper end of the telescoping structure, and a rotatable member formed with a plurality of hooks carried by the upper part of the telescoping structure, the proportion of the telescoping structure being such that when the same is distended to its full extent the rotatable hook carrying structure will be an appreciable distance above the container and when collapsed until the cover engages the container the brush supporting structure will be positioned within the container.

---

1,566,861. ELASTIC-FLUID TURBINE. REGINALD FRANCIS HALLIWELL, Leamington Spa, England, assignor to General Electric Company, a Corporation of New York. Filed June 30, 1925. Serial No. 40,623. 5 Claims. (Cl. 253—39.)



1. In an elastic fluid turbine comprising a shaft, a casing, and a bearing pedestal formed separately from the casing, means for supporting said casing on the pedestal, said means comprising coperating members on the pedestal and casing having engaging surfaces capable of radial movement relative to the center of the shaft to correct for relative expansion of the casing and pedestal.

---

1,566,862. CENTRIFUGAL VAPORIZER. JAMES RAYMOND HALTERMAN, Cairo, Ill. Filed Oct. 27, 1924. Serial No. 746,150. 5 Claims. (Cl. 48—180.)

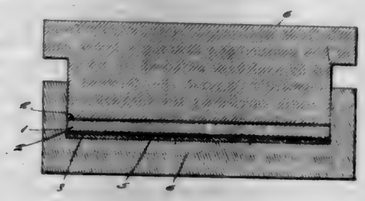
1. A device of the class described, comprising a casing adapted to be operatively mounted between the carbureter and manifold of a gas engine, said casing being provided

with an inwardly opening annular groove at one of its ends and an annular shoulder spaced from its other end, an inner circular breaker section having its sides tapering from an intermediate point toward each end, a plurality of spaced parallel vanes extending at an angle from

said breaker section, projections on said vanes for engagement with the shoulder, and an annular ring fitting tightly within the casing and engaging the vanes to maintain said breaker section in fixed position within the casing.

---

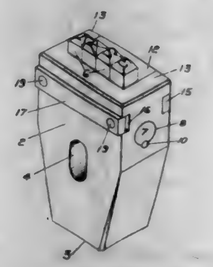
1,566,863. PANEL AND METHOD OF MAKING THE SAME. MARION M. HARRISON, Akron, Ohio, assignor to The Miller Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Aug. 5, 1925. Serial No. 48,315. 3 Claims. (Cl. 18—59.)



1. The hereindescribed method of forming panels for radio cabinets and analogous purposes, which consists in coating a wood veneer sheet with a phenol-formaldehyde artificial resin, applying to one surface thereof a sheet of fibrous material, juxtaposing a sheet of rubber compound to said fibrous material, and subjecting the laminated sheet to vulcanizing heat and pressure in a suitable mold.

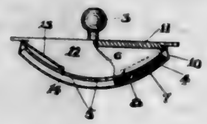
---

1,566,864. DIE HOLDER. LEON C. HAUER, Pittsburgh, Pa., assignor to Pannier Bros. Stamp Co., Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Dec. 19, 1924. Serial No. 757,071. 6 Claims. (Cl. 101—28.)



5. A holder for a removable die consisting of a body member having a die socket, a round bar extending through the body member having a flattened bearing face forming a die seat, means for non-rotatably holding the bar, and means for clamping a die in the socket.

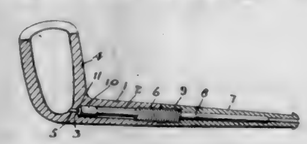
1,566,865. SELF-INKING DUPLICATOR. EDWIN P. GUTHRIE, San Francisco, Calif., assignor to E. S. Hamilton and Hugh B. E. Brown. Filed Apr. 18, 1925. Serial No. 22,573. 6 Claims. (Cl. 101—125.)



1. A self-inking duplicator comprising a block provided with a chamber, an opening in the block through which ink may be inserted into the chamber, a perforated material attached to the block so as to enclose the chamber, a pad attached to the perforated material, and a stencil paper removably attached to the surface of the pad.

---

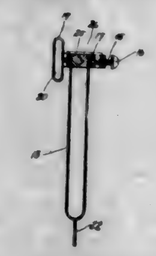
1,566,866. TOBACCO PIPE. WILLIAM WALLACE HESSON, Toronto, Ontario, Canada, assignor to Albert Freeman, New York, N. Y. Filed Apr. 16, 1925. Serial No. 23,709. 2 Claims. (Cl. 131—12.)



1. A tobacco pipe comprising a bowl having an integral shank or stem and a mouthpiece, the shank having an enlarged counter-bore extending from its outer end entirely through the shank and terminating in a flat annular shoulder close to the interior wall of the bowl and a short perforation connecting said counter-bore with the interior of the bowl, the mouthpiece having a longitudinal perforation and a counter-bore opening at its inner end, and a tubular member permanently secured in the counter-bore of the mouthpiece and fitted into the shank and having a squared end abutting and fitting said annular shoulder to prevent leakage when the parts are assembled, whereby a continuous passage without lateral pockets is formed leading from the interior of the bowl through the mouthpiece, and contamination of the shank of the bowl is avoided.

---

1,566,867. SWIMMING PURSE. JOSEPH HETZER, Corona, and ERICH KOHLHOF, New York, N. Y. Filed Feb. 4, 1925. Serial No. 6,688. 2 Claims. (Cl. 150—5.)

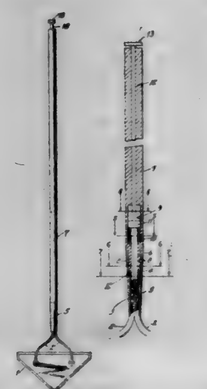


1. A swimming purse comprising a rigid elongated frame, a resilient pouch rotatably mounted in said rigid frame, stays on the top of said frame intermediate its length, loop members mounted on said frame, resilient strips integral with the upper open edges of said pouch, said strips being adapted to be mutually spread to expose

the chamber of the pouch, a triangular reset extending longitudinally on one of said strips, a triangular ridge extending longitudinally on the opposite strip and being adapted to register in the recess of the first-named strip to form a leak-proof joint, and a wedge bar movable in said frame and being adapted to mutually compress the pouch strips to seal the open end of said pouch.

---

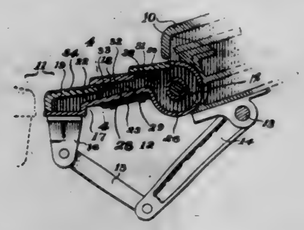
1,566,868. SCUFFLE HOE. AUGUST HINKELMANN, Elberta, Ala. Filed Oct. 1, 1923. Serial No. 665,904. 2 Claims. (Cl. 97—60.)



1. In a scuffle hoe, a cutting blade, a core connected to said blade, a stem receiving said core, a handle connected to said stem, a longitudinally movable rotary rod extending through said handle and normally into said core whereby rotation of the same is effected, and means for yieldingly retaining said rod and core in separate relation.

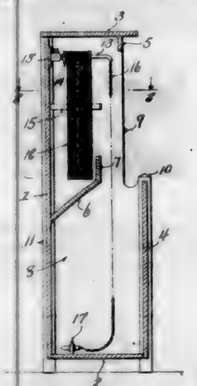
---

1,566,869. SECTIONAL GRATE FRAME. FREDERICK P. HOOSER, Hamilton, Ohio. Filed Dec. 4, 1923. Serial No. 678,423. 4 Claims. (Cl. 110—33.)



1. In a dumping grate of the character described, a supporting frame comprising a bottom having a narrow part provided with integral parallel side walls and a broader part provided with side walls offset outward from the first named side walls and spaced therefrom, side pieces including walls alining with and abutting the second named side walls, respectively, and integral transverse parts abutting the ends of the first named side walls respectively, each said side piece including an integral base plate joined to the wall and transverse part thereof and lying in overlapped relation to the bottom of the frame, and fastening means engaging the base plate and bottom of the frame.

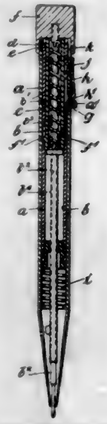
1,566,870. TOWEL-DISPENSING CABINET. GEORGE M. HUBINGER, Milwaukee, Wis. Filed Apr. 14, 1924. Serial No. 706,510. 2 Claims. (Cl. 45—32.)



1. A towel dispensing cabinet comprising an upright body portion having a back extending the complete length of the device, a forwardly and upwardly extending partition carried by said back and projecting therefrom, a part length front wall extending upwardly from the front portion of the cabinet and defining a lower compartment, a bar carried by said back adjacent its upper portion and projecting forwardly beyond the forward edge of said partition, a chain carried by the forward end of said bar and loosely hanging downwardly and extending into the lower compartment and provided with an enlarged lower end, said bar being adapted to receive eyeletted towels, a U-shaped bar secured to said back at a point spaced below said supporting bar and adapted to surround an intermediate portion of said towels.

---

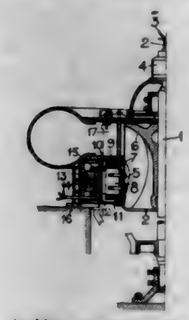
1,566,871. PROPELLER PENCIL. GEORGE REGINALD HUDSON, London, England. Filed Feb. 27, 1924. Serial No. 695,503. 2 Claims. (Cl. 120—12.)



1. The improved mechanical pencil comprising the combination of an outer casing with open ended guiding slot at its rear end and a locking aperture, a coiled spring in the forward end of said casing, an inner tubular member carrying a propelling mechanism and provided with an end knob for rotatably operating said propelling mechanism and for pushing the tubular member forward against the coiled spring, said inner tubular member also having a rearwardly projecting locking tongue mounted on its side towards the rear end and coacting with the rear edge of the locking aperture in the outer casing, and intermediate sleeve having a limited sliding movement on said inner tubular member and provided with a projecting nib slidable in the guiding slot of the outer casing and also having a slot through which the locking tongue on the inner tubular member passes, means for releasably retaining said intermediate sleeve and the inner tubular member in the outer casing, a resilient finger piece mounted on the exterior of the outer casing and provided on the underside of its free end with a projecting nib coacting with the locking tongue to disengage the same from the locked position when said finger piece is depressed.

---

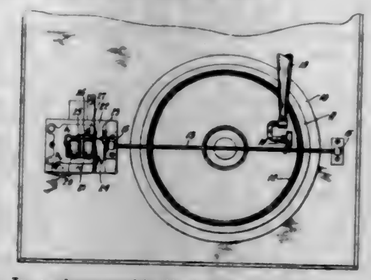
1,566,872. WATER-TURBINE GENERATOR. SANSAKU ISHIZAKA, Kochi-Ken, Japan. Filed Aug. 25, 1924. Serial No. 735,927. 2 Claims. (Cl. 290—52.)



1. A water turbine generator comprising a series of field magnets, a water turbine runner to the outside of which the field magnets are attached, and a stationary armature surrounding said magnets, the generator part of the device thus being continuously cooled by water flowing through the turbine part of the device.

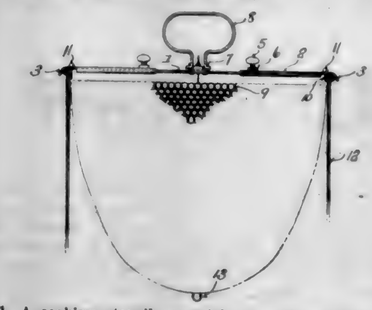
---

1,566,873. TIME-ANNOUNCING PHONOGRAPH. FELIX ISMAN, New York, N. Y., assignor to Edwin N. Duffy, New York, N. Y. Filed Dec. 10, 1924. Serial No. 754,970. 3 Claims. (Cl. 58—14.)



1. In a phonographic time announcer having a sound record provided with a plurality of concentric circular grooves and the sound reproducer co-operating therewith having an arm provided with a screw-threaded bore; the combination of a screw-threaded spindle rotatably disposed above said sound record and having eccentric journals, the threads of said spindle meshing with those of said arm, and a clock controlled means for giving said spindle a complete turn at predetermined time intervals, whereby said sound reproducer is disengaged from a groove in said record, shifted into alignment with the succeeding groove and lowered into engagement therewith.

1,566,874. COOKING UTENSIL. WALTER C. JACKSON, Abbotsford, Wis. Filed July 28, 1925. Serial No. 45,599. 3 Claims. (Cl. 53—1.)



1. A cooking utensil comprising a spider provided with a plurality of outwardly projecting slotted arms adapted to fit over the upper edge of a vessel, a mesh bag positioned below said spider and having a plurality of rods projecting from its upper edge, said rods being adapted to be positioned within the slot of said spider and having balls at their upper ends adapted to rest upon the upper surface of the arms of said spider adjacent the outer ends of such arms.

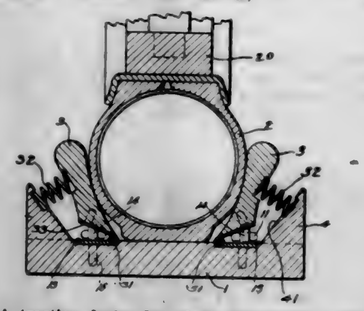
---

1,566,875. SLED. ANDERS WALFRID JACOBSON and WILLIAM GEORGE SHASTAL, Hurkett, Ontario, Canada. Filed Oct. 13, 1924. Serial No. 743,502. 2 Claims. (Cl. 208—159.)

1. In a sled, a frame, steering runners therefor, a pair of spaced crank shafts carried by said frame, supporting runners at the ends of said crank shafts, and steppers carried by the cranks of said crank shafts.

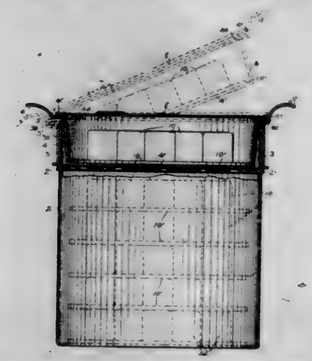
---

1,566,876. WHEEL TRACK. HJALMAR T. JOHNSON, Seattle, Wash. Filed Mar. 17, 1924. Serial No. 699,722. 7 Claims. (Cl. 305—6.)



5. A traction device for wheels comprising a plurality of transverse blocks connected in an endless tread, a pair of spaced chocks upon the inner face of each of said blocks, each of said chocks having an inwardly directed face, a side plate hinged by one end to each of said blocks inward of and adjacent to each of said chocks, and a spring interposed between the inclined face of each chock and its side plate to yieldingly support the plate from the chock.

into the receptacle, a transparent disc for closing the mouth of the tray imposed upon said flange, clips mounted on the opposite sides of said flange for loosely holding



the disc in place, means for hinging the edge of said flange between said clips to said hoop, and a handle supported by the edge of said flange opposite the hinge and preventing the disc from shifting away from said clips.

---

1,566,858. SWIMMING RING. EDWIN A. GUINZBURG, New York, N. Y. Filed Feb. 27, 1925. Serial No. 12,079. 1 Claim. (Cl. 9—17.)

A swimming ring acting as a combined float and toy, comprising a substantially circular hollow body having a hollow projection at one point representing the tail of a fowl and a post extending at right angles to the plane of the body at the diametrically opposite point, said post being formed as the neck and head of a fowl, and an inflating valve connected to said body, the interior of the body, tail and the post being in free communication.

---

1,566,859. COAT AND HAT RACK. HIRAM D. GUNTHER, Chicago, Ill. Filed Nov. 2, 1923. Serial No. 672,350. 1 Claim. (Cl. 248—24.)

A device of the character described including a shank portion, brace members extending upwardly from the shank at an angle relative thereto, a substantially rectangular bracket at the upper end of the brace members, a U-shaped supporting member arcuately curved longitudinally and having its ends pivotally mounted upon the lower longitudinal portion of the bracket with its side portions engaging the upper portion of the bracket when in an operative position to limit the outward swinging movement of the supporting member.

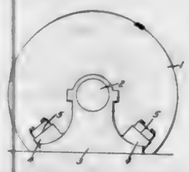
---

1,566,860. TOOTHBRUSH HOLDER. JAMES P. HAINZIGIANIS, New York, N. Y. Filed Mar. 9, 1925. Serial No. 14,292. 6 Claims. (Cl. 248—63.)

6. In a tooth brush holder, a container, a telescoping structure connected to the bottom of the container, a cap connected to the upper end of the telescoping structure, and a rotatable member formed with a plurality of hooks carried by the upper part of the telescoping structure, the proportion of the telescoping structure being such that when the same is distended to its full extent the rotatable hook carrying structure will be an appreciable distance above the container and when collapsed until the cover engages the container the brush supporting structure will be positioned within the container.

---

1,566,861. ELASTIC-FLUID TURBINE. REGINALD FRANCIS HALLIWELL, Leamington Spa, England, assignor to General Electric Company, a Corporation of New York. Filed June 30, 1925. Serial No. 40,623. 5 Claims. (Cl. 253—39.)



1. In an elastic fluid turbine comprising a shaft, a casing, and a bearing pedestal formed separately from the casing, means for supporting said casing on the pedestal, said means comprising coperating members on the pedestal and casing having engaging surfaces capable of radial movement relative to the center of the shaft to correct for relative expansion of the casing and pedestal.

---

1,566,862. CENTRIFUGAL VAPORIZER. JAMES RAYMOND HALTERMAN, Cairo, Ill. Filed Oct. 27, 1924. Serial No. 746,150. 5 Claims. (Cl. 48—180.)

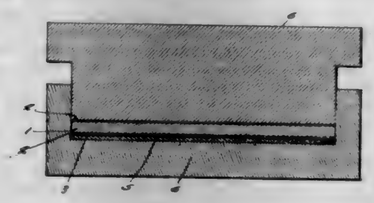
1. A device of the class described, comprising a casing adapted to be operatively mounted between the carbureter and manifold of a gas engine, said casing being provided

with an inwardly opening annular groove at one of its ends and an annular shoulder spaced from its other end, an inner circular breaker section having its sides tapering from an intermediate point toward each end, a plurality of spaced parallel vanes extending at an angle from

said breaker section, projections on said vanes for engagement with the shoulder, and an annular ring fitting tightly within the casing and engaging the vanes to maintain said breaker section in fixed position within the casing.

---

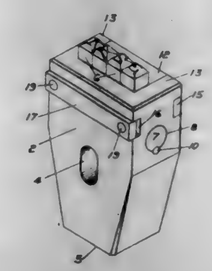
1,566,863. PANEL AND METHOD OF MAKING THE SAME. MARION M. HARRISON, Akron, Ohio, assignor to The Miller Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Aug. 5, 1925. Serial No. 48,315. 3 Claims. (Cl. 18—59.)



1. The hereindescribed method of forming panels for radio cabinets and analogous purposes, which consists in coating a wood veneer sheet with a phenol-formaldehyde artificial resin, applying to one surface thereof a sheet of fibrous material, juxtaposing a sheet of rubber compound to said fibrous material, and subjecting the laminated sheet to vulcanizing heat and pressure in a suitable mold.

---

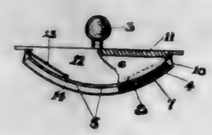
1,566,864. DIE HOLDER. LEON C. HAUER, Pittsburgh, Pa., assignor to Pannier Bros. Stamp Co., Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Dec. 19, 1924. Serial No. 757,071. 6 Claims. (Cl. 101—28.)



5. A holder for a removable die consisting of a body member having a die socket, a round bar extending through the body member having a flattened bearing face forming a die seat, means for non-rotatably holding the bar, and means for clamping a die in the socket.

---

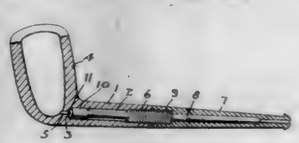
1,566,865. SELF-INKING DUPLICATOR. EDWIN P. GUTHRIE, San Francisco, Calif., assignor to E. S. Hamilton and Hugh B. E. Brown. Filed Apr. 13, 1925. Serial No. 22,573. 6 Claims. (Cl. 101—125.)



1. A self-inking duplicator comprising a block provided with a chamber, an opening in the block through which ink may be inserted into the chamber, a perforated material attached to the block so as to enclose the chamber, a pad attached to the perforated material, and a stencil paper removably attached to the surface of the pad.

---

1,566,866. TOBACCO PIPE. WILLIAM WALLACE HEBSON, Toronto, Ontario, Canada, assignor to Albert Freeman, New York, N. Y. Filed Apr. 16, 1925. Serial No. 23,709. 2 Claims. (Cl. 131—12.)



1. A tobacco pipe comprising a bowl having an integral shank or stem and a mouthpiece, the shank having an enlarged counter-bore extending from its outer end entirely through the shank and terminating in a flat annular shoulder close to the interior wall of the bowl and a short perforation connecting said counter-bore with the interior of the bowl, the mouthpiece having a longitudinal perforation and a counter-bore opening at its inner end, and a tubular member permanently secured in the counter-bore of the mouthpiece and fitted into the shank and having a squared end abutting and fitting said annular shoulder to prevent leakage when the parts are assembled, whereby a continuous passage without lateral pockets is formed leading from the interior of the bowl through the mouthpiece, and contamination of the shank of the bowl is avoided.

---

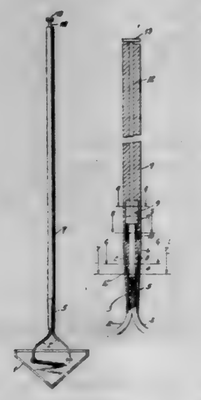
1,566,867. SWIMMING PURSE. JOSEPH HETZER, Corona, and ERICH KOHLHOF, New York, N. Y. Filed Feb. 4, 1925. Serial No. 6,688. 2 Claims. (Cl. 150—5.)

1. A swimming purse comprising a rigid elongated frame, a resilient pouch rotatably mounted in said rigid frame, stays on the top of said frame intermediate its length, loop members mounted on said frame, resilient strips integral with the upper open edges of said pouch, said strips being adapted to be mutually spread to expose

the chamber of the pouch, a triangular reset extending longitudinally on one of said strips, a triangular ridge extending longitudinally on the opposite strip and being adapted to register in the recess of the first-named strip to form a leak-proof joint, and a wedge bar movable in said frame and being adapted to mutually compress the pouch strips to seal the open end of said pouch.

---

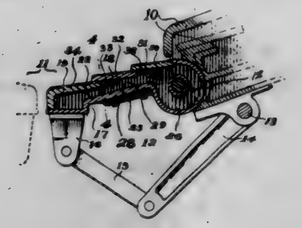
1,566,868. SCUFFLE HOE. AUGUST HINKELMANN, Elberta, Ala. Filed Oct. 1, 1923. Serial No. 665,904. 2 Claims. (Cl. 97—60.)



1. In a scuffle hoe, a cutting blade, a core connected to said blade, a stem receiving said core, a handle connected to said stem, a longitudinally movable rotary rod extending through said handle and normally into said core whereby rotation of the same is effected, and means for yieldingly retaining said rod and core in separate relation.

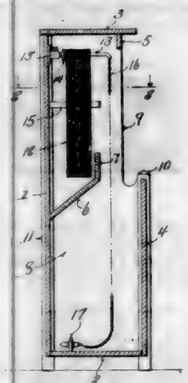
---

1,566,869. SECTIONAL GRATE FRAME. FREDERICK P. HOOBER, Hamilton, Ohio. Filed Dec. 4, 1923. Serial No. 678,423. 4 Claims. (Cl. 110—33.)



1. In a dumping grate of the character described, a supporting frame comprising a bottom having a narrow part provided with integral parallel side walls and a broader part provided with side walls offset outward from the first named side walls and spaced therefrom, side pieces including walls alining with and abutting the second named side walls, respectively, and integral transverse parts abutting the ends of the first named side walls respectively, each said side piece including an integral base plate joined to the wall and transverse part thereof and lying in overlapped relation to the bottom of the frame, and fastening means engaging the base plate and bottom of the frame.

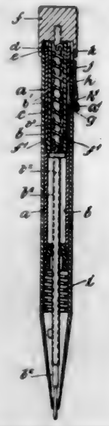
1,566,870. TOWEL-DISPENSING CABINET. GEORGE M. HUBINGER, Milwaukee, Wis. Filed Apr. 14, 1924. Serial No. 706,510. 2 Claims. (Cl. 45—32.)



1. A towel dispensing cabinet comprising an upright body portion having a back extending the complete length of the device, a forwardly and upwardly extending partition carried by said back and projecting therefrom, a part length front wall extending upwardly from the front portion of the cabinet and defining a lower compartment, a bar carried by said back adjacent its upper portion and projecting forwardly beyond the forward edge of said partition, a chain carried by the forward end of said bar and loosely hanging downwardly and extending into the lower compartment and provided with an enlarged lower end, said bar being adapted to receive eyeletted towels, a U-shaped bar secured to said back at a point spaced below said supporting bar and adapted to surround an intermediate portion of said towels.

---

1,566,871. PROPELLER PENCIL. GEORGE REGINALD HUDSON, London, England. Filed Feb. 27, 1924. Serial No. 695,503. 2 Claims. (Cl. 120—12.)

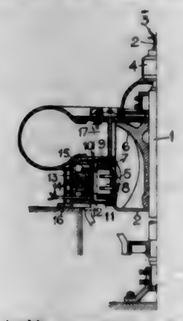


1. The improved mechanical pencil comprising the combination of an outer casing with open ended guiding slot at its rear end and a locking aperture, a coiled spring in the forward end of said casing, an inner tubular member carrying a propelling mechanism and provided with an end knob for rotatably operating said propelling mechanism and for pushing the tubular member forward against the coiled spring, said inner tubular member also having

a rearwardly projecting locking tongue mounted on its side towards the rear end and coacting with the rear edge of the locking aperture in the outer casing, and intermediate sleeve having a limited sliding movement on said inner tubular member and provided with a projecting nib slidable in the guiding slot of the outer casing and also having a slot through which the locking tongue on the inner tubular member passes, means for releasably retaining said intermediate sleeve and the inner tubular member in the outer casing, a resilient finger piece mounted on the exterior of the outer casing and provided on the underside of its free end with a projecting nib coacting with the locking tongue to disengage the same from the locked position when said finger piece is depressed.

---

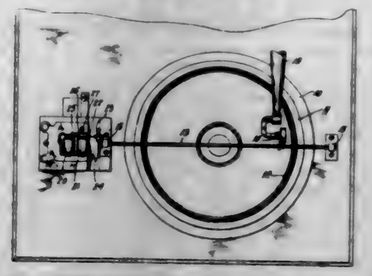
1,566,872. WATER-TURBINE GENERATOR. SANSAKU ISHIZAKA, Kochi-Ken, Japan. Filed Aug. 25, 1924. Serial No. 733,927. 2 Claims. (Cl. 290—52.)



1. A water turbine generator comprising a series of field magnets, a water turbine runner to the outside of which the field magnets are attached, and a stationary armature surrounding said magnets, the generator part of the device thus being continuously cooled by water flowing through the turbine part of the device.

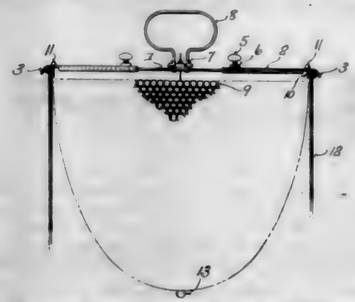
---

1,566,873. TIME-ANNOUNCING PHONOGRAPH. FELIX ISMAN, New York, N. Y., assignor to Edwin N. Duffy, New York, N. Y. Filed Dec. 10, 1924. Serial No. 754,970. 3 Claims. (Cl. 58—14.)



1. In a phonographic time announcer having a sound record provided with a plurality of concentric circular grooves and the sound reproducer co-operating therewith having an arm provided with a screw-threaded bore; the combination of a screw-threaded spindle rotatably disposed above said sound record and having eccentric journals, the threads of said spindle meshing with those of said arm, and a clock controlled means for giving said spindle a complete turn at predetermined time intervals, whereby said sound reproducer is disengaged from a groove in said record, shifted into alignment with the succeeding groove and lowered into engagement therewith.

1,566,874. COOKING UTENSIL. WALTER C. JACKSON, Abbotsford, Wis. Filed July 23, 1925. Serial No. 45,599. 3 Claims. (Cl. 53—1.)



1. A cooking utensil comprising a spider provided with a plurality of outwardly projecting slotted arms adapted to fit over the upper edge of a vessel, a mesh bag positioned below said spider and having a plurality of rods projecting from its upper edge, said rods being adapted to be positioned within the slot of said spider and having balls at their upper ends adapted to rest upon the upper surface of the arms of said spider adjacent the outer ends of such arms.

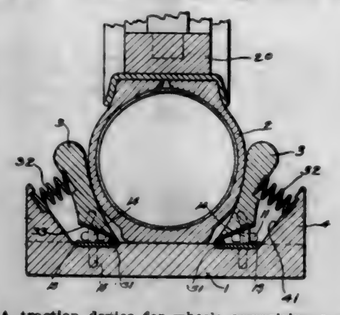
---

1,566,875. SLED. ANDERS WALFRID JACOBSON and WILLIAM GEORGE SHARTAL, Hurkett, Ontario, Canada. Filed Oct. 13, 1924. Serial No. 743,502. 2 Claims. (Cl. 208—159.)

1. In a sled, a frame, steering runners therefor, a pair of spaced crank shafts carried by said frame, supporting runners at the ends of said crank shafts, and steppers carried by the cranks of said crank shafts.

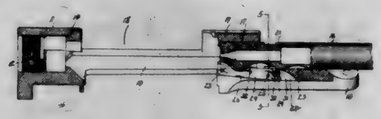
---

1,566,876. WHEEL TRACK. HJALMAR T. JOHNSON, Seattle, Wash. Filed Mar. 17, 1924. Serial No. 699,722. 7 Claims. (Cl. 305—6.)



5. A traction device for wheels comprising a plurality of transverse blocks connected in an endless tread, a pair of spaced chocks upon the inner face of each of said blocks, each of said chocks having an inwardly directed face, a side plate hinged by one end to each of said blocks inward of and adjacent to each of said chocks, and a spring interposed between the inclined face of each chock and its side plate to yieldingly support the plate from the chock.

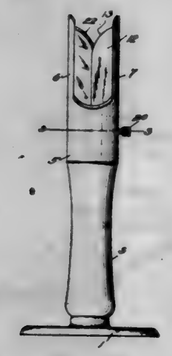
1,566,877. BOLT-ACTION FIREARM. THOMAS C. JOHNSON, New Haven, Conn., assignor to Winchester Repeating Arms Co., New Haven, Conn. Filed Oct. 22, 1925. Serial No. 64,077. 5 Claims. (Cl. 42—16.)



1. A bolt-action firearm having a receiver, a breech-bolt located therein, a positive bolt-stop, and a one-piece, combined bolt-retainer and ejector, whereby the unintentional escape of the breech-bolt from the receiver is prevented when the positive bolt-stop is out of play.

---

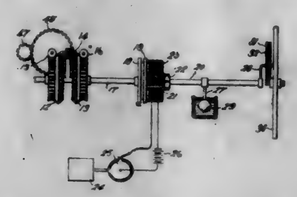
1,566,878. TWINE CUTTER. ERWIN R. JONES, Columbus, Ohio. Filed May 2, 1923. Serial No. 636,099. 8 Claims. (Cl. 30—14.)



1. A device of the class described comprising a handle, a collar carried by the handle, a pair of fingers carried by the collar, spaced plates fixed interiorly of one of the fingers, a cutting blade slidable between the plates, and means for sliding and locking the blade in adjusted positions with respect to the fingers.

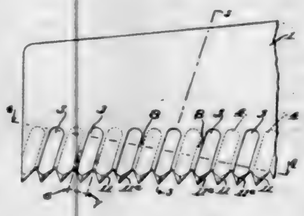
---

1,566,879. METERING SYSTEM. VLADIMIR KARAPETOFF, Ithaca, New York, assignor to General Electric Company, a Corporation of New York. Filed Mar. 7, 1922. Serial No. 541,842. 9 Claims. (Cl. 172—245.)



2. A system of supply comprising a plurality of supply lines for conveying a medium, means for determining the unbalancing of supply in one of said lines comprising means for measuring the quantity of medium supplied by said one line, means for obtaining the average quantity supplied by all of said lines and differential means for comparing said quantities.

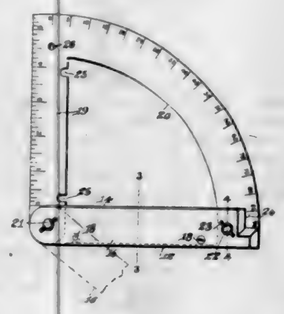
1,566,880. SAW. JOHN E. KELLEY, Fitchburg, Mass., assignor to Simonds Saw and Steel Company, Fitchburg, Mass., a Corporation of Massachusetts. Filed Feb. 8, 1923, Serial No. 617,738. Renewed July 18, 1925. 6 Claims. (Cl. 143—133.)



1. A saw blade having thin portions adjacent to its edge, each of said thin portions terminating in a tooth projection having a transverse cutting edge, and a web substantially the full thickness of the main body of the blade interposed between adjacent tooth projections.

---

1,566,881. COMBINATION IMPLEMENT. LOGAN M. KERR, Ebensburg, Pa. Filed May 31, 1923. Serial No. 642,630. 1 Claim. (Cl. 33—75.)



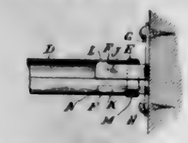
An implement of the class described comprising a straight blade and a segmental blade, said straight blade having inwardly opening recesses in spaced relation, a stock formed of spaced members and pivoted at one end to opposite faces of the straight blade and having threaded apertures in the free ends and movable over the segmental blade, said spaced members constituting the stock and connected by spaced pins which engage in the spaced recesses of the straight blade when the members of the stock are disposed over the straight blade and limit the movement in one direction, and said straight blade and segmental blade being provided respectively with threaded sockets spaced at equal distances from the pivot of the stock and at right angles to each other, and a threaded holding pin engageable alternately in the threaded apertures of the stock or against the segmental blade between the spaced sockets.

---

1,566,882. CURTAIN FIXTURE. CHARLES W. KIRSCH, Sturgis, Mich., assignor to Kirsch Manufacturing Company, Sturgis, Mich., a Corporation of Michigan. Filed Feb. 28, 1924. Serial No. 695,696. 2 Claims. (Cl. 156—22.)

1. In combination, a hollow curtain rod having an opening adjacent one end, a constriction within said

end, and a wall bracket having two fingers adapted to extend into said rod, one having an extension adapted



to engage said opening in the rod, the other finger having a depression on its lower edge adapted to engage said constriction.

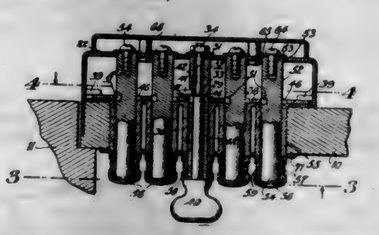
---

1,566,883. SIGN LETTERS AND METHOD OF MAKING SAME. VICTOR N. KLITHOLM, Wilson, Conn. Filed Sept. 28, 1925. Serial No. 58,977. 5 Claims. (Cl. 41—24.)

1. The method of forming sign letters the component elements of which are concave in cross-sections, characterized by cutting the letter from sheet material which is semiplastic and transversely flexing each element of the letter progressively along its length to give the element a permanent concave set without substantially distorting the shape of the letter outline.

---

1,566,884. COMBINATION LOCK. ROCCO LAROSA, New York, N. Y. Filed July 30, 1925. Serial No. 47,106. 4 Claims. (Cl. 70—53.)

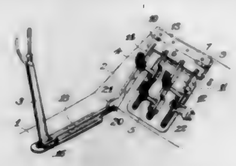


1. In a permutation lock, a casing, a shiftable bolt, a movable manipulating member engageable therewith for effecting shifting movement thereof and having a keeper opening, and a permutation mechanism for locking the member against movement and for releasing the same, comprising a locking plate having a locking lug and normally shiftable in one direction to disengage the locking lug from the keeper opening in the manipulating member to disengage and unlock said manipulating member for free movement, and a plurality of relatively adjustable devices engageable with the locking plate for preventing normal shifting movement thereof to a released position except when relatively adjusted with respect to each other in a predetermined position.

---

1,566,885. AUTOMOBILE LOCKING DEVICE. MATHIAS LASKA, New Orleans, La. Filed June 17, 1924. Serial No. 720,712. 1 Claim. (Cl. 70—126.)

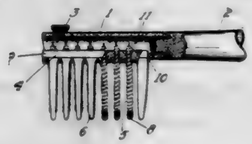
A locking device for automobiles having an operative element extending through the floorboard, which comprises a pivoted plate connected to the board, an arm connected to said plate, a second arm pivoted to said first arm at its outer end, means for moving the plate to dispose it along the floorboard, said arms in this position of the plate being extended, and means on the first



arm to lie over the second arm in its extended position to limit its movement in one direction, said second arm adapted when thus extended to engage the operative element.

---

1,566,886. FOUNTAIN COMB. GEORGE C. LILLIE, Chicago, Ill. Filed Jan. 28, 1925. Serial No. 5,244. 2 Claims. (Cl. 132—13.)



1. In a fountain comb, a hollow body, a handle therefor, hollow teeth removably carried by said comb, and wick carried by said teeth and extending into the said hollow body.

---

1,566,887. PAPER BAG. ZENO LITTMAN, New York, N. Y., assignor to Cohoes Envelope Co. Inc., New York, N. Y. Filed June 9, 1922. Serial No. 567,002. 4 Claims. (Cl. 229—76.)

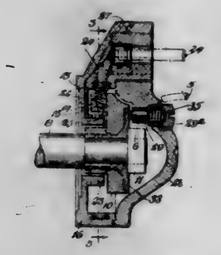
1. In an envelope, a closure flap forming an extension of one wall of the envelope, and a second closure flap member attached to the inner surface of the other wall at the end thereof and folded back along said wall for a distance substantially equaling the extension of the other flap beyond the end of the wall, said second closure member being folded back on itself at and extending inwardly from the open end of the envelope to a distance substantially equal to the projection of the other flap member.

---

1,566,888. IGNITION SYSTEM. GUNTHER LUCKEMAN, Morsemere, N. J. Filed Dec. 22, 1924. Serial No. 757,560. 1 Claim. (Cl. 200—20.)

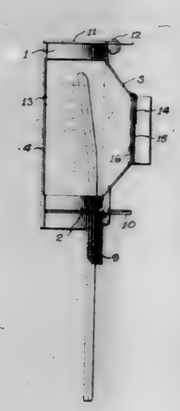
A timer-distributor unit for an ignition system having a primary and secondary circuit and spark plugs, comprising in combination a rotatable member having

spaced contacts, a brush adapted to periodically connect the spaced contacts with the primary circuit, a conductor ring electrically connected with the secondary circuit, stationary contacts adapted to be electrically connected with the spark plugs, a pair of brushes periodically connecting the ring with the stationary contacts, a casing formed of insulating material and carrying the stationary contacts, and a cover for the casing, said first mentioned brush being slidably mounted in the cover.



---

1,566,889. TOOTHBRUSH HOLDER. ERNEST F. LUNDGREN, Brooklyn, N. Y. Filed Aug. 3, 1923. Serial No. 655,445. 3 Claims. (Cl. 248—63.)

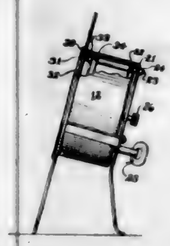


2. A tooth brush holder comprising an elongated cylindrical casing closed at one end, and a plurality of spring pressed blades pivotally mounted on said casing to form a closure for the other end thereof, said blades being cut away sufficiently to permit the brush handle to engage the inner edges thereof to separate the blades and to permit insertion of a brush without touching the bristles.

---

1,566,890. CLOCK MOUNTING. FREDERICK LUX, Waterbury, Conn., assignor to Lux Clock Manufacturing Company, Waterbury, Conn., a Corporation of Connecticut. Filed Nov. 8, 1924. Serial No. 748,570. 7 Claims. (Cl. 58—56.)

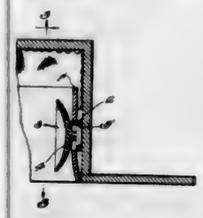
1. In a clock-mounting, a casing containing a clock movement, said casing having a front flange, a front supporting plate surrounding said casing and engaging said flange, a rear supporting bracket having a plurality of



arms embracing said casing, said bracket also having a depending leg, said supporting plate and depending leg being adapted to rest upon a table or the like.

---

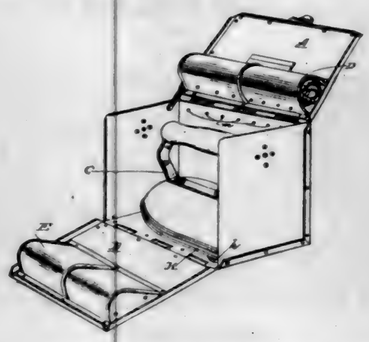
1,566,891. HAT RETAINER. CHARLES DOWNEY LYON, Chicago, Ill. Filed Aug. 30, 1924. Serial No. 735,189. 2 Claims. (Cl. 132—59.)



1. In combination with a hat band having a button hole, a cup shaped resilient holder having a button for passage through said hole.

---

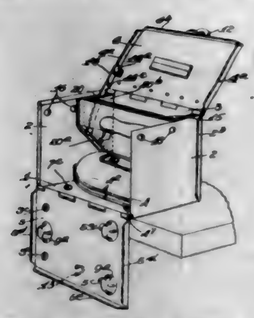
1,566,892. CONTAINER FOR ELECTRIC IRONS. MICHAEL W. MCARDLE, Chicago, Ill. Filed Feb. 25, 1924. Serial No. 694,846. 8 Claims. (Cl. 206—16.)



1. A container for the purpose indicated having a hinged closure member and means for carrying the electric cable of the iron in a position out of contact with the latter, said means being mounted on the inner side of said closure member and positioned thereon for holding the cable in a position at one side of the handle of the iron when the closure member is in closed position.

---

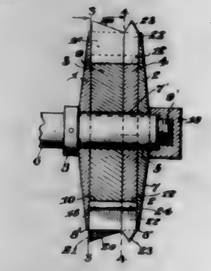
1,566,893. STAND AND CONTAINER FOR ELECTRIC IRONS. MICHAEL MCARDLE, Chicago, Ill. Continuation of application Serial No. 687,181, filed Jan. 19, 1924. This application filed Mar. 24, 1924. Serial No. 701,319½. 10 Claims. (Cl. 206—16.)



1. A container and stand for an electric iron consisting of a case which is openable forwardly and upwardly for entrance and exit of the iron, said case having mounted on its back wall and extending down behind the position of the handle or the iron and upwardly open pocket dimensioned for storing the detachable electric cable of the iron.

---

1,566,894. CUTTER. GEORGE G. MCCLENNY, Woodville, N. C., assignor to George T. McClenny, Woodville, N. C. Filed Nov. 20, 1924. Serial No. 751,084. 3 Claims. (Cl. 144—238.)

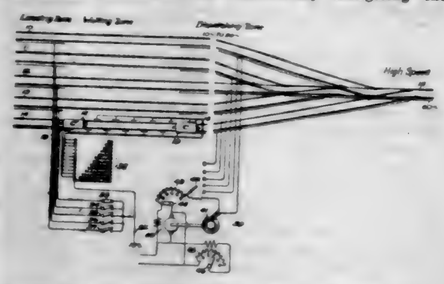


1. In a cutter for the purpose set forth, a pair of abutting bit holders each provided with a series of bit receiving grooves opening at the edge and sides thereof, each of said grooves having one side wall thereof offset at its inner end, the grooves in one of said holders disposed diagonally throughout with respect to the edge thereof and the grooves in the other of said holders extending throughout parallel to the axis thereof, the diagonally extending grooves being of a greater length than and registering at their inner ends with the inner ends of the other of said grooves, said holders being circular and of like diameter, and a bit retaining disk positioned against the outer face of each of and of the same diameter as said holders.

---

1,566,895. ELECTRIC-RAILWAY SYSTEM. ROBERT H. MCLAIN, New York, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Nov. 21, 1924. Serial No. 751,228. 7 Claims. (Cl. 104—149.)

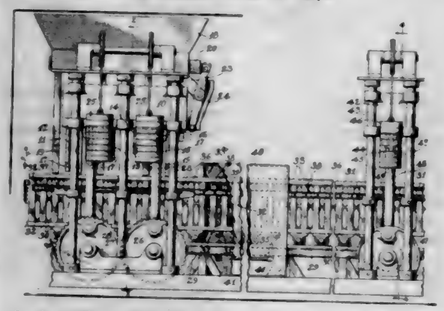
7. An automatic alternating current electric railway system comprising a plurality of feeder tracks joining a normally energized main track and a plurality of alternating current motor driven cars arranged to operate thereon, each of said cars having a coupler at each end thereof and each of said feeder tracks having a normally de-energized dispatching zone adjacent said main track and a sectionalized waiting zone disposed adjacent thereto, switch mechanism for successively energizing the



sections of said sectionalized zone to individually move the last car entering thereupon into coupling engagement with the preceding car, and means including a source of variable voltage and frequency for accelerating and feeding a coupled train of cars from each of said dispatching zones to said main track.

---

1,566,896. METHOD OF AND APPARATUS FOR MAKING COMPOSITION CORK SLABS. CHARLES E. MCMANUS, New York, N. Y. Filed June 27, 1923. Serial No. 648,110. 16 Claims. (Cl. 18—5.)



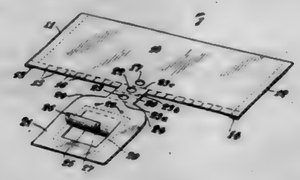
1. A method of making composition cork slabs consisting of intermittently moving a sequence of closely adjacent, spaced molds with relation to a packing mechanism adapted to progressively compact succeeding charges of granular cork having a thin coating of an adhesive or binder, in alternate molds, said molds each having an angular mold space therein of relatively greater height than width and having a narrow top opening, delivering coated granular cork in measured quantities through the narrow top opening of the molds intermediate those in which cork is being compacted, inserting a plug in the open top of each mold after the final charge of granular cork has been compacted therein, and thereafter successively passing the molds through a high temperature zone and a low temperature zone, to condition and set the thin coating of adhesive or binder upon the cork granules.

15. An apparatus for making composition cork slabs embodying therein a sequence of plungers of progressively decreasing, graduated lengths, means imparting reciprocatory movement to said plungers, a hopper adapted to receive composition cork, means operating in synchronism with said plungers, whereby a measured quantity of composition cork is delivered from said hopper to molds in advance of each of said plungers, an oven, means whereby an elevated temperature may be maintained in said oven, an ejecting mechanism consisting of

a single reciprocatory plunger, crank wheels, connecting rods between said crank wheels and said plunger, the movement of said last named plunger being synchronized with that of said first named sequence of plungers, a continuous track structure extending adjacent said plungers, through said oven and adjacent said ejecting mechanism, said ejecting mechanism being spaced away from said oven to form a low temperature zone, a carriage movable upon said track structure, a plurality of molds thereon, said molds being so positioned that when said plungers respectively are operative upon the composition cork within alternate molds, a charge of composition cork will be delivered to each mold adjoining that upon which a plunger is operative, and removable means closing the bottoms of said molds, whereby said molds may progressively have composition cork compacted therein, be subjected to an elevated temperature while passing through said oven, and to a cooling action while passing from said oven to said ejecting mechanism, and have the completely formed composition cork slabs successively ejected therefrom after leaving said low temperature zone.

---

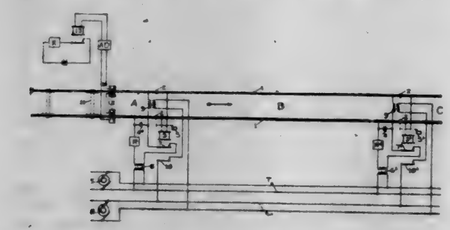
1,566,897. AUTOMOBILE HOOD COVER. FRANCIS A. MAHAN and CHARLES H. MCCARTHY, Waterbury, Conn. Filed Jan. 17, 1925. Serial No. 3,194. 3 Claims. (Cl. 257—132.)



3. In an automobile hood cover, a hood section adapted to lie against the outer surface of an engine hood, a radiator section adapted to lie in front of the radiator, a foldable neck member for joining said hood section to said radiator section, said hood section having a central aperture in its front portion to fit over the radiator filling inlet, said neck member having a pair of apertures adapted to fit about said radiator inlet, and adapted when said neck is folded to aline with the aperture in said hood portion, said cover being formed of a single piece of flat sheet material and bent into contact with the outer surfaces of said hood and radiator.

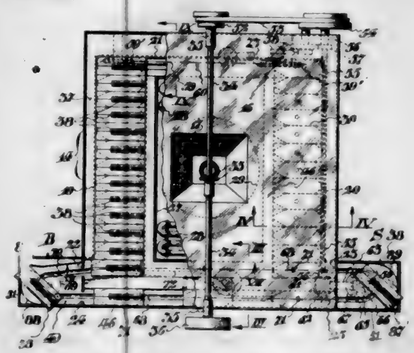
---

1,566,898. TRAIN CONTROL. WADE H. REICHARD, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y. Filed Apr. 12, 1924. Serial No. 706,117. 9 Claims. (Cl. 246—63.)



6. A system of train control of the character described, comprising in combination with direct current track circuits and a floating charge system for the track batteries thereof, means for interrupting the charging of each track battery while the track of the block in advance is occupied.

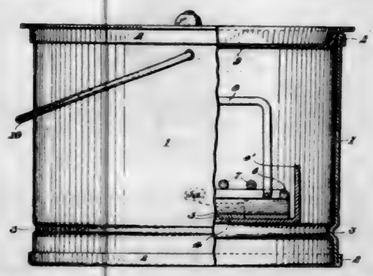
1,566,899. AUTOMATIC DRIER FOR HOSIERY. HARRY H. WIGGLESWORTH, Philadelphia, Pa., assignor to the Philadelphia Drying Machinery Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 17, 1924. Serial No. 713,907. 15 Claims. (Cl. 198—19.)



1. A drier for hosiery and the like comprising a drying corridor, a continuous horizontal trackway therefor, a series of detached form carriers traversable over the trackway, boosting means adapted to intimately advance said form carriers along opposed directional lines, and coordinated means operative to transfer consecutive carriers from one line to the other with provision for exterior exposure and partial turning at definite positions.

---

1,566,900. PORTABLE BAKING AND COOKING OVEN. CHARLES E. ADAMSON, Wabash, Ind., assignor of one-half to Philip L. Zorbaugh, Fort Wayne, Ind. Filed May 22, 1925. Serial No. 32,225. 4 Claims. (Cl. 126—275.)



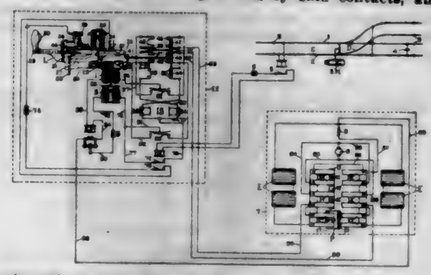
1. In a device of the type described, an oven body open at its bottom and top, a plate removably supported in said oven body and partially closing the bore of the same, means carried by the plate and cooperating with the walls of the oven body to form heat flues at the unclosed parts of the bore of said body, a radiated heat deflector positioned on said plate to direct said heat toward the walls of the oven body, a cover for closing the top of said body, and a food rack adapted to rest upon the said deflector or the flue forming means.

---

1,566,901. ELECTRIC INTERLOCKING SYSTEM. PAUL E. CARTER, Bronxville, N. Y., and ROY CONNELL, Westfield, N. J., assignors to General Railway Signal Company, Rochester, N. Y. Filed Aug. 16, 1923. Serial No. 657,715. 16 Claims. (Cl. 246—135.)

16. In an electric interlocking system, the combination with a movable lever, contacts closed during a limited range of movement of said lever near one extreme

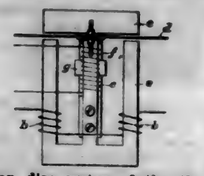
position, locking means effective to hold mechanically said lever against movement from said position far enough to open said contacts, a power-operated device having a control circuit governed by said contacts, and



automatic means preventing operation of said device irrespective of the closure of said contacts unless the lever is moved far enough to permit said locking means to be effective.

---

1,566,902. INDUCTION METER. ZALMANN CIFFRINOWITSCH, Berlin, Germany, assignor to General Electric Company, a Corporation of New York. Filed Oct. 16, 1922. Serial No. 594,752. 3 Claims. (Cl. 171—264.)



3. An induction disc meter of the three legged type having a potential coil on the middle leg and current coils on the outer legs, said legs being considerably longer than said coils and said potential coil being arranged nearer the meter disc than said current coils, a magnetic shunt for said middle leg, said parts being so proportioned and arranged that the effective current and voltage fluxes are in phase at unity power factor.

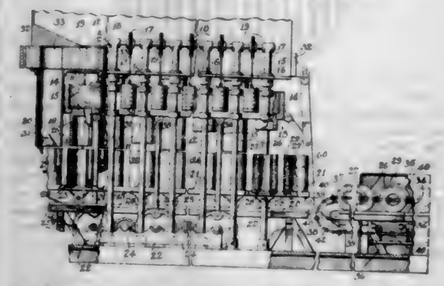
---

1,566,903. CORING IMPLEMENT FOR CONCRETE BLOCKS. WILLIAM B. DURST, Gainesville, Fla. Filed June 15, 1925. Serial No. 37,287. 3 Claims. (Cl. 25—128.)

1. In a coring device for concrete blocks, an air supply conduit in the form of a pipe closed at one end and tapered at its opposite end, said pipe being provided with screw threads adjacent its end and inward of these threads with air escape ports, and a pair of tube retaining collars mounted on the threaded ends of said pipe, the peripheral edges of said collars being tapered and formed with anti-slipping grooves, and the opposed inner faces of the collars being formed with recesses, said collars being adapted to be associated with and disposed adjacent to said air ports.

---

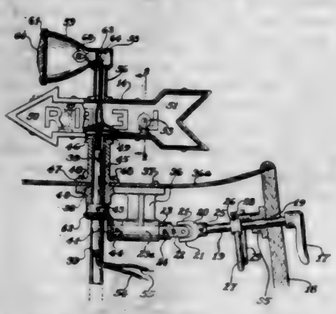
1,566,904. METHOD OF AND APPARATUS FOR MAKING COMPOSITION CORK SHEETS. CHARLES E. MCMANUS, New York, N. Y. Filed June 27, 1923. Serial No. 648,111. 11 Claims. (Cl. 18—48.)



2. An apparatus for making composition cork sheets embodying therein a packing unit including an open end cylindrical ram, means imparting reciprocatory movement thereto, a support for a mold having an annular mold space therein in operative relation to said ram, a baker, means whereby a portion of said baker is maintained at an elevated temperature and another portion thereof at a relatively lower temperature, means whereby a mold and its contents are conveyed through said baker so as to be successively subjected to an elevated temperature and to a relatively lower temperature, and an ejecting mechanism whereby the tube of composition cork is removed from the mold.

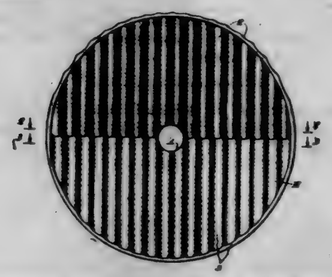
---

1,566,905. DIRECTION SIGNAL. NAPOLEON MAILLETTE, Waterbury, Conn. Filed Apr. 18, 1924. Serial No. 707,245. 2 Claims. (Cl. 116—47.)



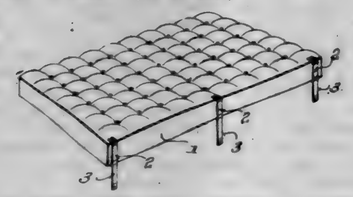
1. In a direction indicator for a motor vehicle, a signal member, means for operating said member comprising a horizontal shaft located under the vehicle hood, an inclined shaft connected with said horizontal shaft by a universal joint, a handle on the end of said inclined shaft located in position to be operated by the driver, a wire formed into a semi-circular resilient member, a depending rod on said inclined shaft, said wire being adapted to resiliently press against said rod, said wire having a central recess to hold the rod in central position, and a pair of stops at the end of said wire for limiting the extreme rotation of said rod.

1,566,906. REFLECTOR FOR HEADLIGHTS. CARL MATISSE and ALBERT MATISSE, New York, N. Y. Filed Apr. 8, 1925. Serial No. 21,658. 1 Claim. (Cl. 240—41.)



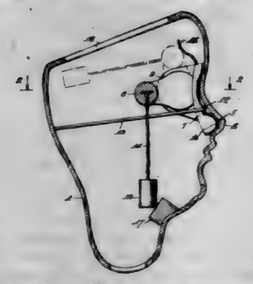
A reflector having a series of vertically disposed parallel transversely curved surfaces, the upper portion of the reflector having convex reflecting surfaces and the lower portion of the reflector having concave reflecting surfaces, said reflecting surfaces in the upper and lower portions of the reflector meet in a horizontal line extending through the axis of the reflector, said reflector composed of glass, and a mirrored surface on the back of the reflector.

1,566,907. MATTRESS HANDLE. JACOB R. MERTES, Milwaukee, Wis. Filed Apr. 27, 1925. Serial No. 26,087. 1 Claim. (Cl. 5—345.)



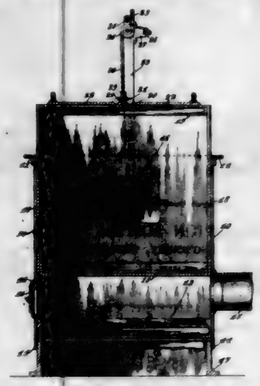
A strap-like handle for a mattress comprising an enclosing sheath, angle irons carried within said sheath and adapted for positioning adjacent the upper and lower corners of the mattress, said angle irons being apertured for the reception of securing means passed through said sheath, angle irons and mattress, a hook carried by one of said angle irons, said sheath having an extension projecting from adjacent the other angle iron, and a reenforcing plate positioned in the outer end of said extension, said extension and plate being apertured for the reception of said hook.

1,566,908. DOLL'S EYES. LESTER HUBERT MESSINGER, Jr., Bridgeport, Conn. Filed July 29, 1924. Serial No. 728,964. 1 Claim. (Cl. 46—40.)



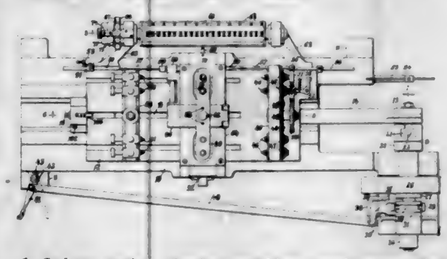
A mounting for doll's eyes, comprising a frame, rearwardly projecting bearings at the ends of the frame adapted to receive the side portions of a doll's eyes, a forwardly projecting section at the intermediate portion of the frame and adapted to project into the nose recess of the doll's head and fit the inner face of the head, upwardly and rearwardly projecting tongues on the frame adapted to limit the movement of the eyes in one direction, and a brace connecting the frame with the back of the doll's head.

1,566,909. COMBINATION COOKING AND HEATING STOVE. FRANCIS M. MOORE, Hannibal, Mo. Filed Feb. 13, 1925. Serial No. 8,932. 1 Claim. (Cl. 126—4.)



A combination cooking and heating stove, comprising an outer shell open at its upper end and formed with a lower fire chamber, an inner shell forming an oven, inserted through the open upper end of the outer shell, and snugly telescope in the latter for sliding movement, the top of the oven being provided with openings, hinged lids closing the openings and adapted to swing toward and away from each other, and means for raising and lowering the oven, one side of the oven being formed with an opening and closed on the descending movement of said oven within the outer shell.

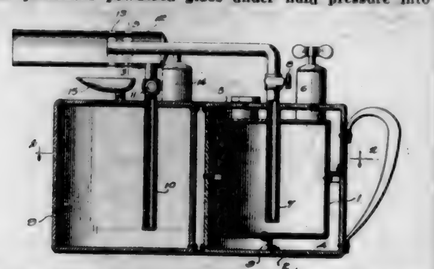
1,566,910. ENGINE-CHASING MACHINE. LUCIFER J. MOSS, New York, N. Y. Filed May 3, 1924. Serial No. 710,862. 11 Claims. (Cl. 90—24.3.)



1. In an engine chasing machine, work supporting means mounted to reciprocate, a chasing tool mounted to bear upon the work, a master-mandrel for actuating the chasing tool, automatic means for displacing the work angularly, and adjustable manual means for displacing the work through a predetermined angle independent of the automatic means.

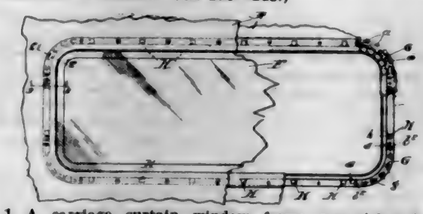
1,566,911. METHOD OF APPLYING PROTECTIVE COATINGS. CHARLES EDWIN NELSON, Haines City, Fla. Filed Dec. 29, 1923. Serial No. 683,463. 1 Claim. (Cl. 91—72.)

The herein described method of coating articles with glass having a high melting point, which consists in producing a blow flame, preheating powdered glass to a temperature slightly below its melting point, feeding the preheated powdered glass under fluid pressure into



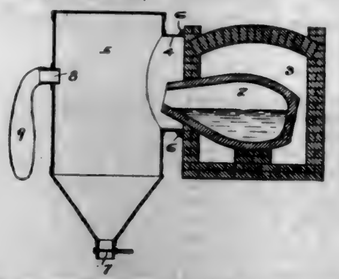
the blow flame and in the direction of the travel thereof to form a stream of molten glass, and directing the stream of molten glass upon an article to form a coating thereon.

1,566,912. CARRIAGE-CURTAIN WINDOW FRAME. LAWRENCE C. NELSON, Chicago, Ill., assignor to Stewart Manufacturing Corporation, Chicago, Ill., a Corporation of Delaware. Filed May 8, 1922. Serial No. 559,148. 4 Claims. (Cl. 296—145.)



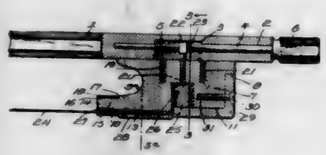
1. A carriage curtain window frame comprising in combination with two frame members between which a glass may be clamped, curtain-engaging clips securely lodged in one frame member in the face thereof at which said frame member is seated against the other member for engaging the curtain therebetween, said clips being adapted for engaging the surface of the curtain fabric at a marginal area thereof adjacent to an edge of the fabric past which said clips project, one of the two engaged elements, viz, the clip and the fabric, being folded about an edge of the other for securing the engagement.

1,566,913. APPARATUS FOR MANUFACTURING METAL DUST. MINTON H. NEWELL, San Francisco, Calif., assignor, by mesne assignments, to The Alloys Company, San Francisco, Calif., a Corporation of California. Filed Aug. 29, 1916. Serial No. 117,430. 9 Claims. (Cl. 266—19.)



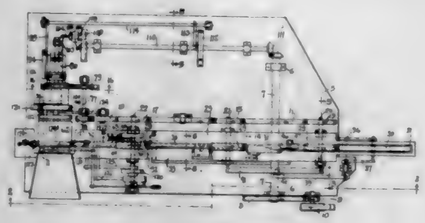
1. In an apparatus for manufacturing metal dust, a condensing chamber provided with an aperture and means for retarding the inflow of air through said aperture, said chamber being otherwise substantially air tight.

1,566,914. VIOLIN BOW. OTTO A. NEWMAN, Edwardsport, Ind. Filed Oct. 12, 1922, Serial No. 594,051. Renewed May 29, 1925. 4 Claims. (Cl. 84—282.)



4. A violin bow frog comprising a body portion formed with a series of vertically disposed spaced threaded sockets, adjustable means carried by the staff of the bow and engaging in any one of said sockets for adjustably connecting the body portion of the staff, said body portion provided at its bottom with a groove and further provided intermediate its ends with a vertically disposed pocket for communicating with said groove for the reception of the rear terminal portion of the bow hair, a cap mounted on said body portion for connecting the bow hair therewith, a wedge extending into said cap for clamping the bow hair therete, a holding member positioned in said groove for maintaining the bow hair therein, and a clamping element detachably seated in said groove and in the rear end of the body portion and having one end thereof clamping said holding member in the groove and the bow hair in said pocket, and said body portion and said clamping element having associated means to provide a dove-tail connection therebetween.

1,566,915. MACHINE FOR MAKING PAPER-BOX NECKS. CHARLES H. OHLSSON, New York, N. Y., assignor to Hefter & Company, a Firm composed of David Hefter and Ray Hefter, New York, N. Y. Filed Aug. 19, 1924. Serial No. 732,911. 21 Claims. (Cl. 93—40.)

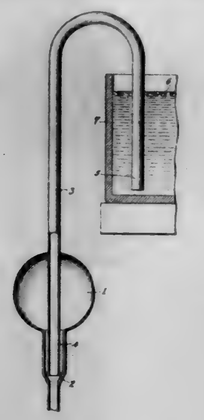


1. A paper-box neck making machine comprising a blank holder, means for feeding the blanks, means for partially covering said blanks with a binder, a traveling knife member for severing the binder to separate the blanks and means for forming said blanks into necks for subsequent insertion into boxes.

1,566,916. SIPHON. TANEZO OKIHARA, Honolulu, Territory of Hawaii. Filed July 18, 1924. Serial No. 726,820. 1 Claim. (Cl. 137—20.)

A siphon device, which comprises a rubber bulb, a discharge tube of rubber connected thereto, an admission tube extending into the bulb and formed integral there-

with, one end of the admission tube projecting into the discharge tube, the other end of the admission tube adapted to be connected to a body of liquid to be siphoned



whereby contraction of the bulb will force the air therein past the end of the second tube to cause a suction action thereon.

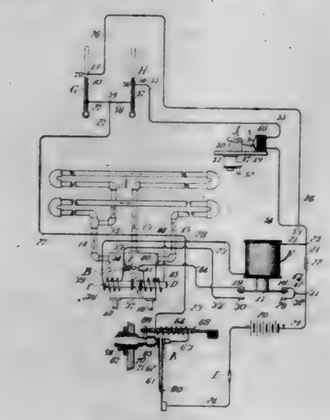
---

1,566,917. FLEXIBLE CEMENT COMPOSITION. OLAF OLESEN, New York, N. Y. Filed Mar. 18, 1924. Serial No. 700,168. 2 Claims. (Cl. 106—24.)

1. A flexible cement, which comprises eight parts of sand, four parts of cement, four parts of a calcium soap, and one part of zinc soap.

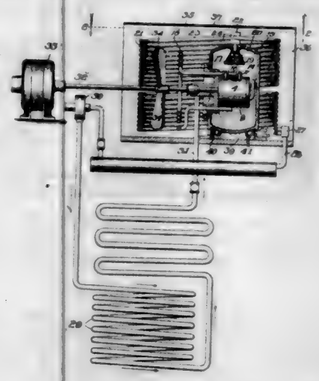
---

1,566,918. HEATING SYSTEM. PAUL B. PARKS, Oak Park, and JOHN VAN VULPEN, Chicago, Ill., assignors to Vapor Car Heating Company, Inc., Chicago, Ill., a Corporation of New York. Filed Apr. 20, 1923. Serial No. 633,405. Renewed June 22, 1925. 10 Claims. (Cl. 236—36.)



8. In a heating system, the combination of a radiator, a valve to control the circulation of heating medium through the radiator, an electric motor for operating said valve, and heat sensitive means in the motor circuit actuated when heated to break the circuit through the motor.

1,566,919. REFRIGERATING APPARATUS. HERBERT A. PARKYN, Chicago, Ill., assignor to Leonard Pump & Motor Company, Chicago, Ill., a Corporation of Maine. Filed July 16, 1918. Serial No. 245,196. 11 Claims. (Cl. 62—115.)

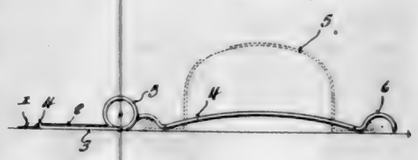


2. In a refrigerating apparatus, the combination of a rotary pump for compressing the gasified refrigerant, a shaft connected therewith, a motor directly connected with said shaft for driving it, a member into which the refrigerant compressed by the pump passes, a condenser for the compressed gas, a housing containing an inlet and an outlet for air and in which said condenser and member are located, and a fan on said shaft for causing air to pass through said housing.

9. In a refrigerating apparatus, the combination of a compressor for compressing the gasified refrigerant, a receptacle for oil and in which receptacle said compressor is located and into which said compressor discharges, means for operating said compressor, a condenser for said compressor, a conduit opening into said receptacle and into the interior of said compressor for leading oil into said compressor, and means for circulating cooling currents of air against said condenser receptacle and conduit.

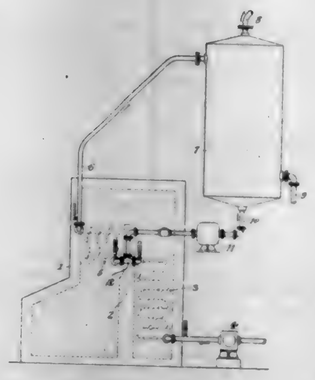
---

1,566,920. HAT HOLDER. RICHARD PIE, Racine, Wis. Filed May 3, 1923. Serial No. 636,363. 1 Claim. (Cl. 45—13.)



A hat holder comprising a wire frame having a crown receiving ring-like body portion, said body portion being upwardly arched between its front and rear ends and having an outwardly projecting curved portion forming a manipulating hook and having a pair of spaced rearwardly directed arms joined to the body portion by loops, said manipulating hook arching upwardly to accommodate a hat having a beaded brim and extending beyond such brim and a retaining plate having grooves pressed upwardly from its under side adapted to receive and clamp said arms when said plate is attached to a support, said plate having apertures at the ends of the grooves, and said arms having upturned terminal portions adapted to fit within said apertures.

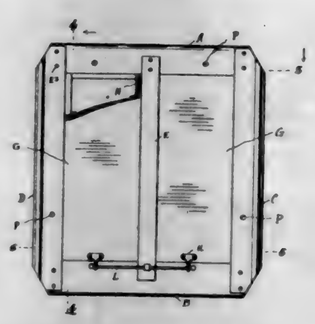
1,566,921. OIL STILL. JOHN PRIMROSE, New York, N. Y., assignor to Power Specialty Company, New York, N. Y., a Corporation of New York. Filed June 19, 1920. Serial No. 390,088. 4 Claims. (Cl. 196—108.)



1. The combination with an oil still having banks or groups of tubes exposed to the hot gases in different parts of their course, of means for taking off, returning to and causing to reflow through the bank or group of hottest tubes only, oil that has already passed through the still, for the purpose set forth.

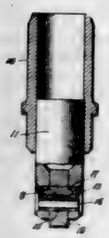
---

1,566,922. SHIELD FOR MOTOR-CAR RADIATORS. MILO D. RATHBUN, Grand Rapids, Mich., assignor to Thomas E. Wier, Muncie, Ind. Filed Jan. 3, 1922. Serial No. 526,822. Renewed May 28, 1925. 3 Claims. (Cl. 257—132.)



2. In a shield for automobile radiators, a frame comprising top and bottom plates having interior opposed inturned flanges, side plates having interior opposed inturned flanges, a central plate having an inturned flange on both sides, doors to fit the openings formed by the said plates, hinge bars through said doors and journaled in said flanges, a bracket having an eyelet secured on the end of each door, a connecting rod having its ends disposed loosely in said eyelets, an actuating bar journaled slidingly at a point between the doors and having a head with a transverse bore to engage said connecting bar loosely, and a spring to urge the said actuating bar to retracted position.

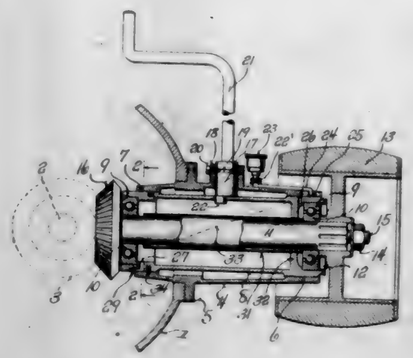
1,566,923. BEARING. GEORGE W. ROBERTS, Vicksburg, Miss. Filed May 22, 1925. Serial No. 32,100. 2 Claims. (Cl. 308—63.)



2. A wear compensating bearing comprising a bearing member having a bearing face and an aperture in said bearing face at one side of the bearing member, a second bearing member having a bearing face supported against the bearing face of the first bearing member and covering the aperture therein, said first bearing member having an opening extending therethrough from an outer exposed side to said aperture, and a filler of soft bearing metal packed in the slot and aperture and exposed at its inner end to the bearing faces of both of the bearing members and exposed at its outer end through said outer side of the first bearing member, said soft filler metal adapted to receive impact against its outer end to advance and spread the inner end of the soft filler metal between said bearing faces to take up wear therebetween.

---

1,566,924. PULLEY ATTACHMENT FOR TRACTORS. RICHARD W. ROBERTSON, Plymouth, Wis., assignor to Plymouth Foundry & Machine Company, Plymouth, Wis., a Corporation of Wisconsin. Filed July 6, 1925. Serial No. 41,826. 2 Claims. (Cl. 308—187.)



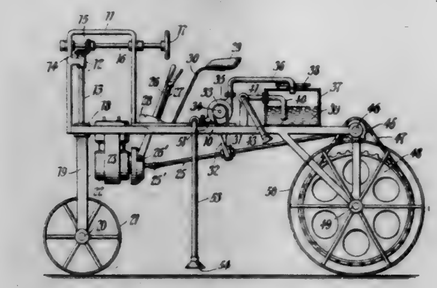
1. The combination of a tractor provided with a casing, a drive shaft and a bevel gear carried by said drive shaft, and an attachment comprising a stationary sleeve rigidly carried by said casing, a movable sleeve slidably mounted within said stationary sleeve, means for sliding said movable sleeve inwardly or outwardly, ball bearings carried adjacent the outer end of said movable sleeve, a pulley shaft mounted within said ball bearings and having a bevel gear at its inner end and power transmitting means at its outer end, means for oiling the outer of

said ball bearings when said movable sleeve is slid outwardly, said movable sleeve having means for returning oil to said casing in a greater volume when said movable sleeve is in its innermost position than when said movable sleeve is in its outermost position.

---

**1,566,925. INSECT EXTERMINATOR.** RICHARD ROKOHL, Orange Grove, Tex. Filed Dec. 11, 1924. Serial No. 755,126. 1 Claim. (Cl. 43—140.)

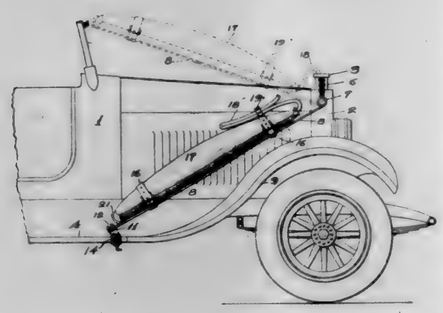
An insect exterminator and catcher comprising a pump, a tank partly filled with an insecticide, a pipe discharging into said tank from the pump, a spray pipe communicating with the tank and directed towards the earth, a plurality of spray nozzles on said spray pipe arranged



in spaced groups to spray a plurality of plant rows simultaneously, and a pair of inlets to said pump to suck insects into said tank.

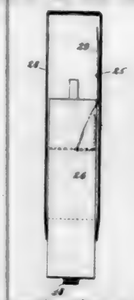
---

**1,566,926. WATER CARRIER.** JOHN A. ROSS, Reno, Nev. Filed Oct. 20, 1924. Serial No. 744,657. 10 Claims. (Cl. 224—29.)



1. A water carrier for motor vehicles comprising a yoke arranged to fit over the radiator opening of said vehicle and to be held in position by the cap of said radiator, said yoke having a lateral extension extending beyond a side of said radiator; a frame pivotally mounted at one end thereof upon said extension and having its opposite end lower than said pivotal end; and a water container mounted upon said frame and having a suitable dispensing outlet adjacent the upper end of the frame whereby water may be dispensed from said container into the radiator.

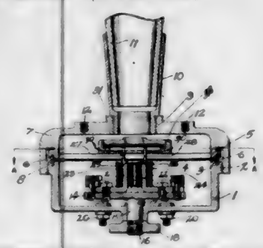
**1,566,927. DRY BATTERY.** DAVID ROSEN, New York, N. Y.; Bessie Rosen administratrix of said David Rosen, deceased. Filed Mar. 25, 1924. Serial No. 701,822. 9 Claims. (Cl. 136—113.)



1. In a battery construction, a cell including a plurality of normally inactive elements, a container for said cell, and means actuated by the withdrawal of said cell from said container for rendering said elements active.

---

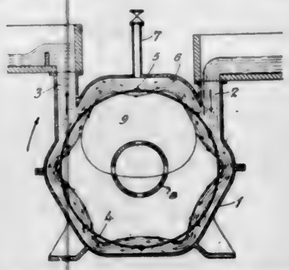
**1,566,928. LOUD SPEAKER.** MAURICE C. RYPINSKI, Yonkers, N. Y., assignor, by mesne assignments, to Brandes Laboratories, Inc., Newark, N. J., a Corporation of New Jersey. Filed Mar. 4, 1925. Serial No. 13,008. 3 Claims. (Cl. 179—116.)



1. An electromagnetic sound reproducer comprising in combination a main casing forming a chamber, a diaphragm closing one end of said chamber, an electromagnetic operating mechanism carried within said chamber and arranged to actuate said diaphragm, a supplemental chamber supported from said main casing, a diaphragm carried within said supplemental chamber, and means whereby said electromagnetic operating mechanism operates each of said diaphragms for reproducing sound over a broad range of tone frequencies.

---

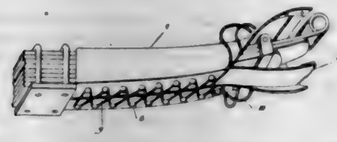
**1,566,929. SCREEN FOR WOOD PULP, ETC.** SVERRE THONE, Skolen, near Christiania, Norway. Filed Dec. 12, 1924. Serial No. 755,406. 4 Claims. (Cl. 99—36.)



1. Screen for wood pulp, etc., comprising a closed casing, an intake for unscreened pulp therein, a rotating screening drum mounted inside said closed casing, an outlet for screened pulp from the inside of said rotating drum, the inner surface of said closed casing having such a form that the radial distance between said inside surface and the screening surface varies along the circumference of the casing.

---

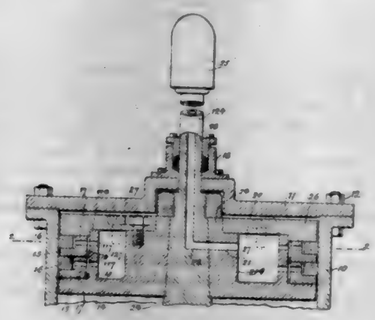
**1,566,930. COVER FOR LEAF SPRINGS.** DONALD H. THURBER, Watertown, Mass., assignor to Melvin J. Bean, Natick, Mass. Filed Nov. 28, 1923. Serial No. 677,409. 2 Claims. (Cl. 267—37.)



1. A device of the class described comprising a piece of flexible material constructed to be wrapped about a spring intermediate its ends, said piece having its edges where the spring emerges therefrom turned inwardly, and a strip of material folded over said inwardly turned edges and made fast thereto to space the piece from said spring to form a pocket for lubricant surrounding said spring.

---

**1,566,931. PISTON.** ARTHUR TICKLE, Brooklyn, N. Y. Filed July 3, 1925. Serial No. 41,366. 3 Claims. (Cl. 74—108.)

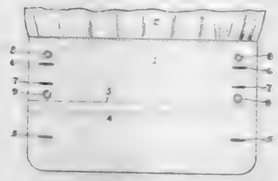


1. An assemblage of the class described, including a cylinder, a piston operating in said cylinder, and a piston rod carrying the piston, said piston rod having a member extending through the cylinder to the exterior thereof, said piston including a central boss receiving the piston rod, and an annular flange co-operating with said boss to define a steam chamber, bull rings disposed outwardly of said flange, and piston rings mounted in the bull rings, annular members spacing the bull rings from the flange, and providing a restricted annular chamber between the bull rings and the flange, said bull rings and flange having registering ports therein for conducting steam from behind the piston rings to the chamber defined by the boss and flange, and passageways for conducting said steam from the chamber through the piston rod extension to the outer air.

---

**1,566,932. ADJUSTABLE CUFF.** MARGARET TINGLE, Cleveland, Ohio. Filed Mar. 24, 1924. Serial No. 701,376. 5 Claims. (Cl. 2—128.)

1. A foldable cuff attached at its upper edge to a sleeve, a pair of button-holes positioned adjacent each side edge of said cuff, a pair of eyelets provided adjacent the upper button-holes and in spaced relation



thereto, said button-holes and eyelets, respectively, being adapted to be placed in registry when said cuff is folded into position for wear.

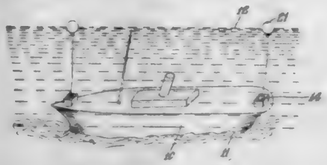
---

**1,566,933. SADIRON HOLDER.** HENRIETTA TOEPFER, New York, N. Y. Filed Oct. 23, 1923. Serial No. 670,341. 1 Claim. (Cl. 68—27.)

In a sadiron holder, the combination with a normally flat padded disk of heat insulating material constituting a base member adapted to surround and grip the handle of the iron, a central upwardly projecting thickened body member expanded at its base laterally and secured at its lower edges to said disk, said thickened body member extending forwardly and rearwardly and upwardly beyond the periphery of said disk, and finger protecting pockets connected to the side edges of said disk and overlapping side portions of said body member.

---

**1,566,934. SALVAGE-INDICATING BUOY.** HELEN TOMIC, South Bethlehem, Pa. Filed May 9, 1925. Serial No. 28,994. 3 Claims. (Cl. 9—9.)



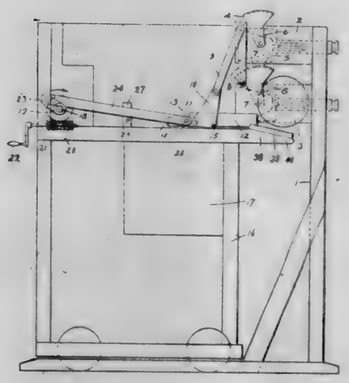
1. An indicating buoy unit comprising a housing having straps mounted thereon, the straps being formed into an annular seat, a spherical buoy operated on said seat, a cylinder extending upwardly into the buoy and open at its lower end, means on said buoy for releasably locking the latter in place on the housing, and additional means movable in said cylinder for releasing said locking means when engaged by a rising level of water.

---

**1,566,935. ELECTRIC SWITCH.** HENRY TRENCHAM, Ruislip, and HERBERT CHRISTOPHER HEATH, Wembley, England, assignors to General Electric Company, a Corporation of New York. Filed Oct. 22, 1923. Serial No. 670,146. 8 Claims. (Cl. 200—50.)

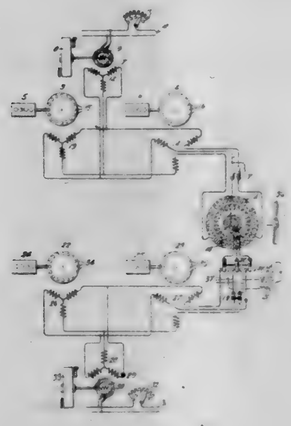
1. In an electric switch gear of the truck type, co-operating contacts carried by the stationary and truck

portions thereof, a movable shutter adapted in one position to cover the contact carried by said stationary portion, and means actuated by the truck in its movement away from the stationary portion for moving the shutter to said contact covering position.



---

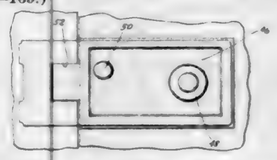
1,566,936. ELECTRIC POWER SYSTEM. PANFILO TROMBETTA, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Mar. 19, 1924. Serial No. 700,436. 3 Claims. (Cl. 290—4.)



1. An electric power system comprising a load device and a machine aggregate for supplying current to said load device, said aggregate including a plurality of series connected induction generators, a plurality of independent internal combustion engines for driving said generators, and means for controlling the frequency of the current delivered by said generators.

---

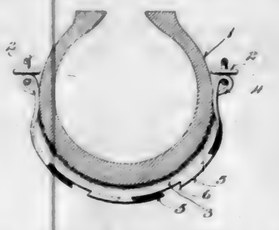
1,566,937. LOCK. FREDERICK A. TURNBULL, Brooklyn, N. Y., assignor to Edward Biersack, New York, N. Y. Filed Dec. 11, 1924. Serial No. 755,123. 13 Claims. (Cl. 292—169.)



1. In a lock, a main body, a sealing bolt rigid thereon, a keeper and movable means cooperating with the sealing bolt for preventing transverse movement of the sealing bolt away from the keeper when the latter and the sealing bolt are in locked interengagement.

---

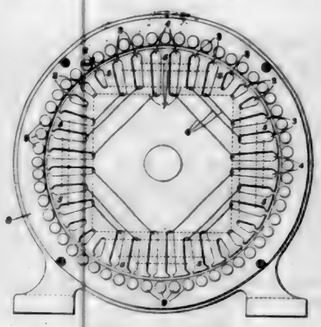
1,566,938. ANTISKID DEVICE. MELVIN E. WALTY, Lone Rock, and FRANK O. WALTY, Avoca, Wis. Filed Mar. 16, 1925. Serial No. 15,891. 1 Claim. (Cl. 152—14.)



An anti-skid device for a tire comprising a pair of side chains forming continuous circles on opposite sides of the tire, a plurality of rigid members having a U-shaped cross section and conforming to said tire, said members having malleable hooks folded into removable interlocking engagement with said chains, said U-shaped members having opposed flanges extending transversely of said tire and having ears, with the ears of one flange staggered with respect to the ears of the other flange.

---

1,566,939. DYNAMO-ELECTRIC MACHINE. ALFRED F. WELCH, Fort Wayne, Ind., assignor to General Electric Company, a Corporation of New York. Filed Nov. 13, 1923. Serial No. 674,577. 12 Claims. (Cl. 172—278.)



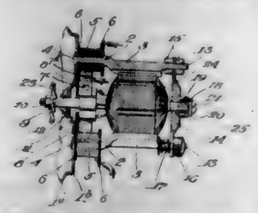
1. In a dynamo electric machine, a magnetic member having slots therein, the area of certain of said slots being different from the area of other of said slots, and a winding non-uniformly distributed in said slots and substantially filling said slots, the width of the teeth between said slots being substantially equal and uniform.

1,566,940. SELF-RETAINING ANTIFRICTION INSERT FOR LEAF SPRINGS. JOHN C. WHITE, Bowling Green, Ohio. Filed Jan. 27, 1925. Serial No. 5,091. 5 Claims. (Cl. 267—49.)

1. An anti-friction insert for leaf springs comprising a flat strip provided with anti-friction means and insertable between adjacent spring leaves, one end of said strip being bent to form a hook clampably engageable with the end of the overlying spring leaf.

---

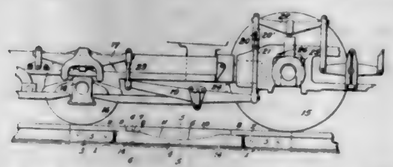
1,566,941. ELECTRIC MOTOR FOR WARNING SIGNALS. FREDERIK G. WHITTINGTON, Chicago, Ill., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill., a Corporation of Virginia. Filed Sept. 13, 1920. Serial No. 409,792. 8 Claims. (Cl. 177—7.)



1. In combination with a signal horn comprising a vibratory member, a shell in which said vibratory member is mounted, said shell having its outer wall at one side of said member provided with a sunft-bearing opposite the vibratory member; an electric motor having its rotating armature shaft journaled in said bearing and field coil cores mounted directly on the outer side of said shell wall having said bearing.

---

1,566,942. RAIL. WILLIAM A. WILLIS, Parsons, Kans. Filed May 2, 1924. Serial No. 710,518. 8 Claims. (104—51.)



1. A rail of the character described having a longitudinally curved recess formed intermediate its ends and a removable section adapted to be received in said recess.

---

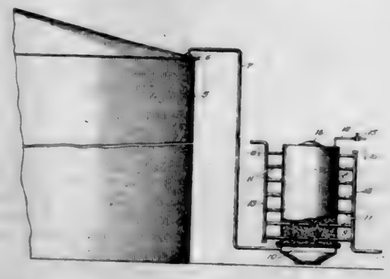
1,566,943. FABRIC IMPERVIOUS TO PETROLEUM HYDROCARBON VAPORS. ROBERT E. WILSON, Chicago, Ill., and EUGENE P. BROWN, Whiting, Ind., assignors to Standard Oil Company, Whiting, Ind., a Corporation of Indiana. Filed June 27, 1923. Serial No. 648,161. 7 Claims. (Cl. 91—68.)

1. The method of preparing a fabric impervious to the vapors of petroleum oil products which consists in applying to a textile fabric a continuous coating of a mixture of glue and glycerine and dusting a finely divided inert solid thereupon.

4. A fabric impervious to petroleum hydrocarbon vapors consisting of a textile fabric, a continuous coating of glue and glycerine upon said fabric and a coating of adherent finely divided solid matter thereupon.

---

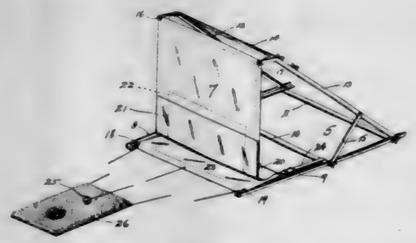
1,566,944. ART OF PREVENTING LOSS BY EVAPORATION FROM STORAGE TANKS. ROBERT E. WILSON, Chicago, Ill., assignor to Standard Oil Company, Whiting, Ind., a Corporation of Indiana. Original application filed June 22, 1923, Serial No. 647,114. Now Patent No. 1,489,725, dated Apr. 8, 1924. Divided and this application filed Jan. 30, 1924. Serial No. 689,472. 2 Claims. (Cl. 183—1.)



1. The method of preventing loss by evaporation from a vented storage tank which comprises providing a sole outlet from the vapor space of such a tank to and through a body of silica gel, and attemperating the silica gel to a temperature at least as high during suction into the tank as that prevailing during expiration from the tank.

---

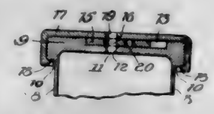
1,566,945. GOLF APPARATUS. ERASTUS E. WINKLEY, Lynn, Mass. Filed Nov. 8, 1923. Serial No. 673,490. 11 Claims. (Cl. 273—35.)



7. A hanging stop for golf practice of flexible sheet material having a smooth, vertical target portion, a transverse fold at the lower edge of said portion, and its extreme lower edge secured in substantially the plane of the floor.

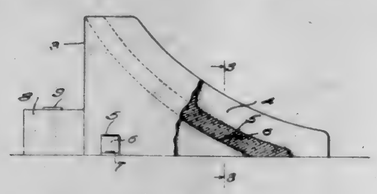
---

1,566,946. RECEPTACLE CLOSURE. ANDREW S. WITWER, Joliet, Ill. Filed July 23, 1925. Serial No. 45,537. 6 Claims. (Cl. 221—60.)



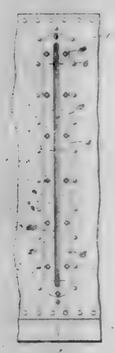
1. A closure device for a receptacle, comprising an end piece on the receptacle containing an aperture, a slide on said end piece and containing an aperture positioned to register with the aperture in said end piece when said slide is in one position, an apertured rotary member on said end piece, and means for imparting rectilinear movement to said slide by rotating said member.

1,566,947. SHIPPING BLOCK. ARTHUR E. WOODWORTH, Kenosha, Wis., assignor of one-half to P. J. Moohan, Kenosha, Wis. Filed May 10, 1923. Serial No. 638,130. 1 Claim. (Cl. 188—32.)



A block of the class described having vertically extending end and side walls and a curved face, the latter having therein a groove to receive a portion of a wheel, a retaining strip secured to a suitable base and abutting the end wall of the block to prevent longitudinal movement, horizontal passages extending through the block adjacent its base, and said passages having passing therethrough metallic strips the end portions of which are bent down at right angles against the side walls of the block and then outwardly to form means for securing the block to a base.

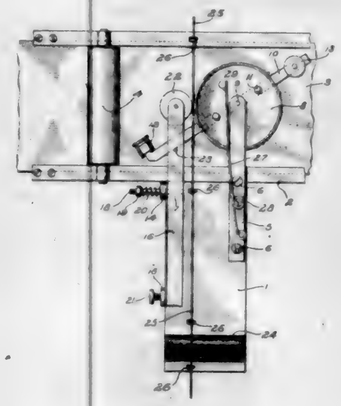
1,566,948. TANK GAUGE. ROBERT A. WYATT, Parkersburg, W. Va. Filed Apr. 13, 1925. Serial No. 22,794. 4 Claims. (Cl. 73—54.)



2. The combination with a tank having a substantially vertical slot in the wall thereof extending close to the bottom of the tank, of a gauge including a body secured in the tank and having an elongated recess exposed within the slot, there being an elongated slot in the inner wall of the recess, a glass plate mounted in the recess and having a prismatic inner surface, and means seated in the slot in the wall and secured to the body for retaining the glass in the recess.

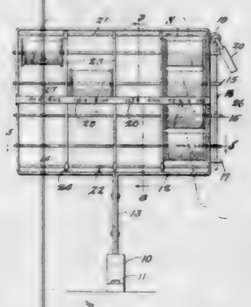
1,566,949. EVENNESS TESTER. HOLMES STOUT WYCKOFF, Little Falls, N. J. Filed Oct. 31, 1924. Serial No. 747,074. 2 Claims. (Cl. 33—148.)

1. An apparatus of the character described, comprising a support, a bar fixed to the support, an eccentric roller carried by said bar, a pair of brackets fixed to the support, a second bar, a bolt fixed to the intermediate portion of the second bar and projecting through one of the brackets, a nut on the bolt, a spring on the bolt interposed between the nut and the bracket, an adjusting screw located in the other bracket and engaging the second mentioned bar, a member on the second mentioned bar adapted to be adjusted relative to the periphery of the eccentric roller, and means for guiding a continuously



moving thread between said member and the periphery of the eccentrically mounted roller whereby when an enlargement or thickened portion of the thread engages the eccentric roller it will cause the latter to turn and indicate an unevenness in the thread.

1,566,950. SPOOL HOLDER. THOMAS YUSHKA, Baltimore, Md., assignor of one-half to Isabella Yushka, Baltimore, Md. Filed Aug. 1, 1925. Serial No. 47,600. 7 Claims. (Cl. 242—139.)

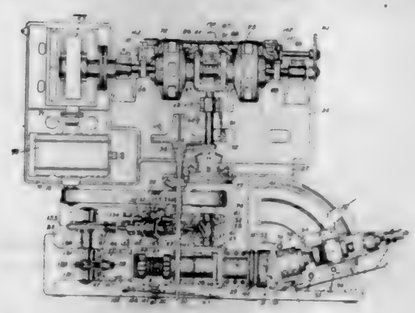


1. In a spool holder, a frame, spool supporting rods extending across said frame and removably supported therein, each of said rods having an eye at one end, a locking bar for insertion through said eyes, and means for securing said locking bar removably to said frame.

1,566,951. METHOD OF FORMING TEETH ON GEARS. HAROLD N. ANDERSON, Cleveland, Ohio. Filed June 25, 1923. Serial No. 647,596. 13 Claims. (Cl. 80—16.)

1. The method of forming teeth on gears, which comprises rolling a toothed die against a heated gear blank,

repeatedly reversing the direction of rotation but rotating them farther in one direction than in the other, so



that at each reversal a different part of the die and of the blank are in contact, and concurrently pressing the die teeth into the blank.

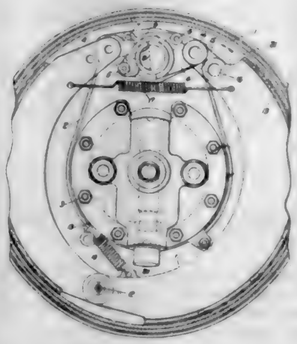
1,566,952. COLLAR FASTENER. JOHN BECKER, Warren, Idaho. Filed Dec. 10, 1924. Serial No. 755,091. 5 Claims. (Cl. 24—97.)

1. A fastener for the purpose indicated comprising a base plate provided with an intermediately positioned post, an intermediate plate pivotally connected at one end to the base plate and having an intermediate clearance opening for said post, and a latch plate pivotally connected at the opposite end of the intermediate plate and provided with spring jaws engaging the post when the plates are disposed in parallelism.

1,566,953. PIPE COUPLER. JOHN BECKER, Warren, Idaho. Filed Feb. 13, 1925. Serial No. 8,972. 2 Claims. (Cl. 285—186.)

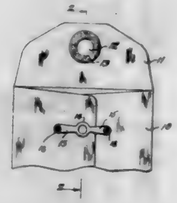
1. A pipe coupling consisting of diametrical contractible sleeve, a clamp member having interlocking engagement with the sleeve and adapted to contract the latter upon relative longitudinal movement of the two, and a key member insertable between the clamp member and the sleeve and having transverse ribs engaging transverse grooves formed in the sleeve.

1,566,954. BRAKING MECHANISM. VINCENT BENDIX, Chicago, Ill., and ADIEL Y. DODGE, South Bend, Ind., assignors to Bendix Brake Company, Chicago, Ill., a Corporation of Illinois. Filed May 15, 1924. Serial No. 713,429. 3 Claims. (Cl. 188—78.)



1. A brake comprising, in combination, a drum, a shoe pivotally anchored at one end within the drum in a manner permitting the anchored end to move radially against the drum, an unanchored shoe, a connection operated by the unanchored shoe to force the anchored shoe against the drum, and means to force the unanchored shoe against the drum.

1,566,955. ENVELOPE FASTENER. FRANK W. CURNAN, Derby, Conn. Filed Aug. 15, 1923. Serial No. 657,638. 3 Claims. (Cl. 229—78.)

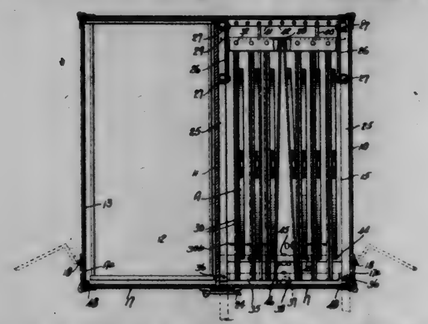


1. A fastener of the character described stamped from sheet metal stock and having a central or body portion, means for securing said central or body portion to an envelope, one or more wings integral with said body portion and adapted to be bent to and from the plane thereof, said wing or wings being substantially plain and flat to nearly the outer end or ends thereof and provided with a bump forming a raised portion adjacent their free ends on the side of the burr or sharp edge formed incident to the stamping or cutting operation to prevent injury to the fingers of the operator by said bur or sharp edge.

1,566,956. WARDROBE TRUNK. ALBERT L. DUFF and JAMES WM. MATHESON, Brooklyn, N. Y.; said Duff assignor to said Matheson. Filed Jan. 10, 1922. Serial No. 528,252. 7 Claims. (Cl. 211—16.)

1. In a wardrobe trunk, garment-supporting means including a backboard approximately parallel with the front and back of the trunk, and movable therein toward or from the front, supporting arms mounted on said

backboard to move bodily therewith and extending forward therefrom to be projected beyond the front of the trunk in the forward position of the backboard, and



means adapted to be positioned across the garment-hanging space at the front of the trunk to constitute a support for the forward ends of said supporting arms when the trunk is closed.

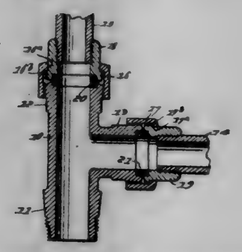
---

1,566,957. PAINT. HARRY J. DUFFEY, Middleburg, Va. Filed July 3, 1924. Serial No. 724,101. 2 Claims. (Cl. 134—39.)

1. A paint comprising a suitable filler, and waste used lubricating oil such as obtained from engine crank cases.

---

1,566,958. COUPLING FOR BOILER CONNECTIONS. BENJAMIN F. GILL and CHARLES A. REED, Tulsa, Okla.; said Gill assignor of his right to T. E. Roderick, Tulsa, Okla. Filed Sept. 6, 1921. Serial No. 498,622. 1 Claim. (Cl. 285—120.)

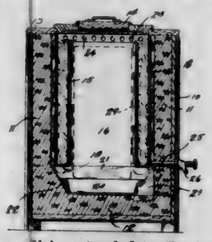


A coupling including a fitting, a pipe connected thereto, said coupling comprising a thimble threaded to one end of the pipe with a flanged end adjacent the end of the fitting, the adjacent end portions of the fitting and the thimble having internal concentric annular seats, a resilient gasket under compression engaging both of said annular seats and overlapping the junction of the fitting and the thimble, the adjacent edges of the fitting and the thimble being beveled off divergently from their internal walls, whereby the connected pipe may fulcrum yieldably at a point on its internal wall, when the pipe is connected slightly out of alignment with the fitting, still maintaining a compression seal and preventing leakage at said junction diametrically opposite said fulcrum, and a union nut coupling the adjacent ends of the fitting and the thimble.

---

1,566,959. ICE-CREAM-STORAGE CABINET. FRANK M. GRAHAM, Ottumwa, Iowa. Filed Apr. 27, 1925. Serial No. 26,061. 5 Claims. (Cl. 62—87.)

1. In an ice cream storage cabinet, an outer cabinet, a container for refrigerant therein comprising a narrow pan extending entirely around the interior of the cabinet, spaced from the walls and the bottom thereof, the inner wall of the pan terminating short of the top of the cabinet



while the outer wall is extended to the top of the cabinet and provided at its upper part with holes to allow air circulation across the top of the pan.

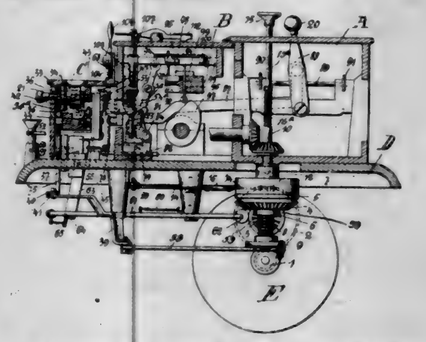
---

1,566,960. CHECKROW-WIRE RELEASE FOR CORN PLANTERS. WILLIAM H. GROVER, Burt, Iowa. Filed Sept. 4, 1924. Serial No. 735,784. 1 Claim. (Cl. 111—48.)

An automatic check row wire release for corn planters, comprising in combination with a control lever for the runners of the corn planter and a check row wire mechanism, a transverse shaft rotatably mounted in bearings on the frame of said planter, an arm on said shaft, a link connection between said arm and said control lever, a spring interposed between the lever and said link and forming a part of said link connection, a link connection between said shaft and the check row wire mechanism whereby movement of the lever will impart movement to the check row wire mechanism, and a second spring secured to said arm for normally retaining said shaft and said check row mechanism in a predetermined position.

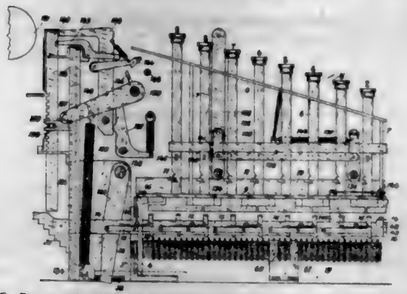
---

1,566,961. AUTOMATIC CALCULATING MACHINE. CHRISTEL HAMANN, Mehlis, Germany. Filed Feb. 15, 1915, Serial No. 293,339. Renewed Apr. 28, 1919. 29 Claims. (Cl. 235—62.)



1. In a computing machine having a travelling number table, a driving shaft, a power source, a coupling between said shaft and said power source, a pawl on said number table, the combination of a slide with abutments in the path of the pawl, and a connection between said slide and said coupling whereby said coupling is engaged on the striking of the pawl against one of said abutments.

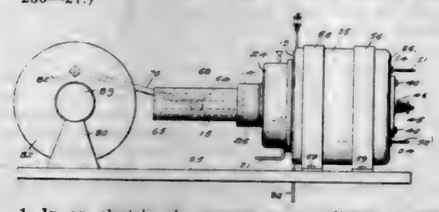
1,566,962. CALCULATING MACHINE. CHRISTEL HAMANN, Neubabelsberg, Germany, assignor to Mercedes Büromaschinen- und Waffenwerke, Benshausen I/Thur, Post Mehlis, Germany. Filed June 1, 1923. Serial No. 642,770. 20 Claims. (Cl. 235—60.)



1. In a calculating machine of the type described, multiplication elements newly arranged in accordance with the products of the multiplication table at each setting of the multiplicator, and members selected at the setting of a multiplicand and adapted for movement in dependence upon the arrangement of said multiplication elements.

---

1,566,963. AIR COMPRESSOR. GALEN C. HARGROVE, Paducah, Ky., assignor of one-half to Charles E. Riglesberger, Paducah, Ky. Filed Dec. 11, 1922. Serial No. 606,325. Renewed Sept. 21, 1925. 6 Claims. (Cl. 230—27.)



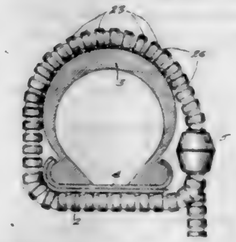
1. In an electric air compressor, a cylinder, a field winding therefor, a piston reciprocable within said cylinder, a fly wheel, connecting rods between said fly wheel and said piston, a circuit maker and breaker on said fly wheel and electrical conductors connecting said field winding with said circuit maker and breaker.

---

1,566,964. FOLDABLE CONTAINER. HUBERT J. HIGGINS, Warwick, R. I. Filed May 5, 1924. Serial No. 711,017. 9 Claims. (Cl. 229—22.)

1. In a cross knob milling machine for instrument a back, a bottom, converging sides inclined relative to the bottom, and a member upon the front overlapping one side and the back and having a binding flap entirely concealed within the container.

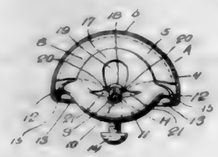
1,566,965. TIRE-LOCK CABLE. COLVIN L. JOHNSON, Chicago, Ill., assignor to Johnson Automobile Lock Co., a Corporation of Illinois. Filed June 27, 1921. Serial No. 480,896. 1 Claim. (Cl. 70—90.)



An armored tire lock device comprising a cable, a head on one end thereof, a passaged terminal member rotatably engaged on said cable and head, a plug rigidly secured in one end of said terminal member to enclose said head, a plurality of interfitting ball and socket links engaged on said cable, a ball member integral with said terminal member and engaging into one of said links, a second passaged terminal member engaged on the other end of the cable and engaged by the end link at that end of the cable, a split wedge engaged on said cable and driven into said second terminal member to tension said cable for holding the links in interfitting operating relation, and a plug secured into the end of said second terminal member to enclose the end of the cable.

---

1,566,966. ADJUSTABLE MOUNTING FOR ARTIFICIAL EYES. ALEXANDER KONOFF, New York, N. Y. Filed May 7, 1925. Serial No. 28,602. 11 Claims. (Cl. 46—40.)



9. A doll's eyeball comprising a semi-spherical eye-shell and means whereby said shell is connected with the usual carrying rod, said connecting means consisting of a plurality of separately formed parts by which the eye-shell is mounted for manual adjustment longitudinally along the rod, and said parts also providing angularly related pivots one of which is on a horizontal axis transverse to the length of the carrying rod to thereby provide for rotatable adjustment of the shell on said axis.

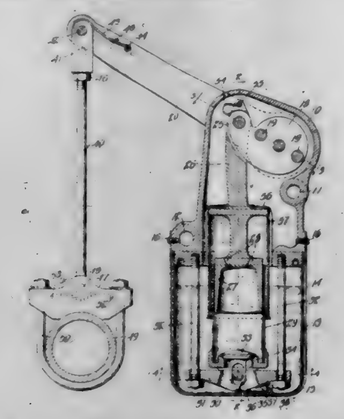
---

1,566,967. CONVERTIBLE TOURING COUCH. JOHN B. KRING, Galion, and FRANK E. PETERS, Marion, Ohio. Filed Aug. 17, 1922. Serial No. 582,476. 1 Claim. (Cl. 5—112.)

A convertible couch comprising side bars composed of sections hinged together and having abutting inner ends and offset outer end portions provided at their ex-

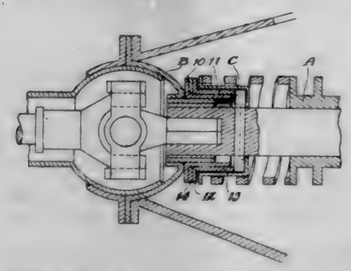
tremities with seat recesses leading in from their end edges, cross bars having reduced end portions which enter the seat recesses, said reduced end portions being notched to receive the sides of the offset end portions of the sections, a webbing attached to the cross bars, transverse reinforcing strips attached to the webbing and having end notches which receive the side bars and foldable legs pivoted to the side bar sections.

1,566,968. SHOCK DIFFUSER. FRANK F. LANDIS, Waynesboro, Pa. Filed Jan. 31, 1925. Serial No. 6,108. 16 Claims. (Cl. 188—88.)



1. In a shock diffuser, a casing, a body of liquid therein, an upwardly-opening cylinder therein, a fluid passage at the bottom of the cylinder, and means to prevent access of air to the cylinder, substantially as set forth.

1,566,969. ENGINE-SHAFT THRUST BEARING. GENE E. PRUITT, Frederick, Okla. Filed Dec. 22, 1923. Serial No. 682,311. 1 Claim. (Cl. 308—167.)



In combination with the universal ball cap and clutch spring support of an automobile transmission, and with a bearing sleeve at the forward end of the ball cap, a thrust bearing structure interposed between said elements, and comprising a disk having a sleeve surrounding the bearing sleeve, a second disk having a sleeve telescoping the firstnamed sleeve and fitting within the transmission clutch spring support, and a renewable washer fitting between said disk.

1,566,970. CHICKEN ROOST. FRANCIS WM. RIDGLEY, Exira, Iowa, assignor of one-half to George C. Voss, Exira, Iowa. Filed Apr. 2, 1923. Serial No. 629,312. 1 Claim. (Cl. 119—25.)

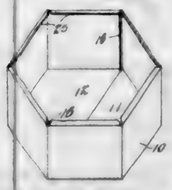
A chicken roost of the class described, including a roost member having its longitudinal upper edges rounded, a groove running lengthwise in the top thereof, said groove being deepened near the ends of said roost member and terminating short of said ends of forming germicide retaining wells, a wick adapted to rest in said groove, having its ends extending into said wells, a shoulder adjacent

each side of said groove, slats on said shoulders for pinching said wick for retaining it in said groove and for causing a portion thereof to extend above said slats where said portion may come in contact with fowls roosting on said roost.

1,566,971. BUCKLE. EVERETT I. ROGERS, Providence, R. I. Filed Sept. 3, 1925. Serial No. 54,246. 8 Claims. (Cl. 24—194.)

1. A buckle, comprising a hollow main frame having end bars and side bars integrally joined together, the rear end bar forming a belt attaching bar and the inner edges of said side bars having slideways formed by flanges projecting backwardly and then outwardly to form lips parallel to said side bars and offset therefrom, and a sliding frame comprising side bars, an end bar at the front end thereof and a central clamping cross bar integrally joined together, the front edge of said cross bar being forwardly inclined to form a clamping surface to clamp a belt end against the inner edge of the front end bar of the main frame on outward movement on said sliding frame, the outer edges of said side bars having cooperating slideways formed by flanges projecting forwardly and then inwardly to form lips parallel to said side bars and offset therefrom, said inwardly projecting lips registering in the guideways of said main frame to secure said frames against lateral movement and to permit longitudinal movement of said sliding frame in rear of and on said guideways, and means on said frames to limit the sliding movement of said sliding frame in both directions, comprising a stop lip projecting integrally backwardly from the front end bar of the main frame adapted to abut the front edge of said sliding frame to limit its outward movement and stop lugs projecting from the rear end of said main frame slideways to limit the inward movement of said sliding frame.

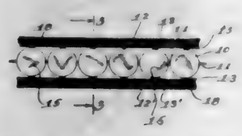
1,566,972. BOX. FREDERICK ARTHUR ROSE, Memphis, Tenn., assignor to Memphis Paper Company, a Corporation of Tennessee. Filed Mar. 11, 1924. Serial No. 698,520. 4 Claims. (Cl. 229—41.)



1. A box having collapsible sides, a collapsible bottom comprising folding sections with joints between them extending between opposed corners on the box,

means at said corners for guiding the sections of the bottom, and means at said corners for locking the bottom in position when fully opened, substantially as set forth.

1,566,973. ORNAMENTAL DEVICE. HYMAN ROSEN, New York, N. Y. Filed July 31, 1922. Serial No. 578,636. 8 Claims. (Cl. 2—278.)



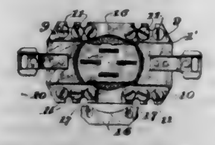
1. In a device of the character described, a plurality of ornamental members secured to each other to form a continuous length by means held within the ornamental member and extending peripherally therefrom and an attaching border secured to each side of said members parallel to said length.

1,566,974. HOLLOW BALL AND PROCESS OF MAKING THE SAME. ADDISON T. SAUNDERS, Akron, Ohio, assignor to A. G. Spalding & Bros., New York, N. Y., a Corporation of New Jersey. Filed May 8, 1923. Serial No. 637,532. 10 Claims. (Cl. 154—16.)

1. A gas filled playing ball of the tennis type having its vulcanized rubber wall provided on its inner side with an adherent air proof layer of dehydrated non-coagulable compound comprising gelatine and a softening material in proportions to be non-fluent under heat and to give a greater firmness to said wall than would a like increase in the thickness of the rubber wall itself, substantially as described.

10. In a process of making gas filled hollow balls formed of sections united into a hollow member, the steps comprising laying adjacent the edges of the sections to be joined, a ring of gelatinous material adapted to flow under gentle heat and to be rendered nonflowing by a higher temperature, joining the sections into a hollow wall with the gelatinous material on the inside, applying a heat sufficient to cause the gelatinous material to flow and seal the joint, and following with a higher heat to render the gelatinous material non-flowing under subsequent heat.

1,566,975. ELECTRICAL FITTING. HARRY I. SCHAER, Washington, D. C. Filed July 17, 1924. Serial No. 726,616. 3 Claims. (Cl. 247—14.)

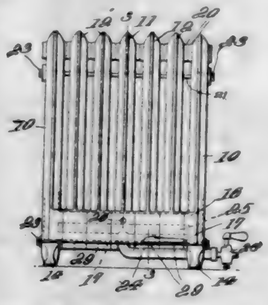


1. In combination with an electrical appliance having an insulating body, a plurality of groups of electrically inter-connected junction terminals thereupon, said groups being adapted to receive electrical conductors of different polarity, and jumper contact plates engageable with certain of the junction terminals of said groups whereby to electrically inter-connect the same for engagement with electrical conductors of corresponding polarity.

1,566,976. WATCHCASE CONSTRUCTION. DAVID SCHMIDT, New York, N. Y. Filed July 23, 1925. Serial No. 45,648. 4 Claims. (Cl. 63—2.)

2. In an article of the class described, a case section, an ornamental element within the case section, a top mount, said ornamental element having an opening therein, the top mount being attached to said case section, said top mount having an opening therein which coincides with the opening in said ornamental element, and means for supporting the ornamental element from the top mount.

1,566,977. RADIATOR. GEORGE P. SCHMITT, Oakland, Calif., assignor to Pacific Heating Company, a Corporation of California. Filed Jan. 20, 1923. Serial No. 613,951. 2 Claims. (Cl. 126—9.)

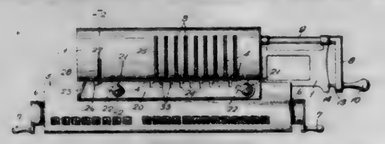


1. A radiator of the character described comprising a plurality of hollow sections of approximately inverted U-shape, the lower extremity of one leg of each section having an enlarged portion of rectangular shape provided with a bottom wall having an air inlet opening therein, the lower end of each of the other legs having a transversely disposed opening means uniting said section in alignment, whereby said rectangular portions provide a combustion chamber of uniform rectangular cross section throughout the length of the radiator and said transversely disposed chambers provide a vent chamber of uniform cross-section throughout the length of the radiator, one of said sections having an outlet opening leading from the vent chamber, a burner feed pipe extending beneath the radiator and having its discharge end extending through the bottom wall of the combustion chamber, and a burner extending longitudinally within the combustion chamber and connected intermediate between its ends with the discharge end of the feed pipe.

1,566,978. CLEARING DEVICE FOR SETTING DISKS OF CALCULATING MACHINES. OTTO P. SCHUMAN, Philadelphia, Pa., assignor to Rapid Calculator Company, Philadelphia, Pa. Filed Aug. 29, 1924. Serial No. 734,990. 7 Claims. (Cl. 235—144.)

1. In a calculating machine in combination with a setting mechanism and a full-stroke mechanism: means normally permitting free travel of the setting disks and adapted to be moved into the path of travel of said disks to cause the same to be brought into alignment

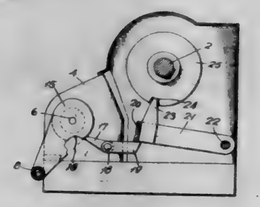
when the setting mechanism is rotated, said movement of said means into the path of the setting disks automatically operating to disengage the full-stroke mecha-



nism of the machine to permit said setting disks to be returned to zero position by reverse movement of the operating crank of the machine.

---

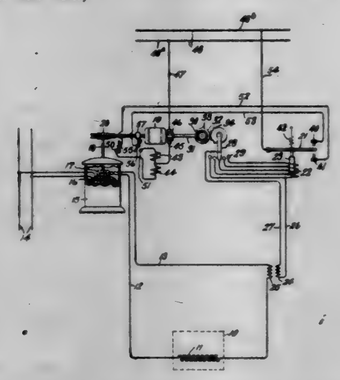
1,566,979. LOCKING DEVICE FOR ZERO-SETTING MECHANISMS OF CALCULATING MACHINES. OTTO P. SCHUMAN, Philadelphia, Pa., assignor to Rapid Calculator Company, Philadelphia, Pa. Filed Aug. 29, 1924. Serial No. 734,991. 4 Claims. (Cl. 235—130.)



2. In a calculating machine in combination with a setting mechanism and a registering mechanism: separate locking levers each pivotally mounted adjacent to and adapted to engage one of said mechanisms, said levers having engagement with one another, whereby both of said mechanisms are unlocked when they are in normal cleared position, said setting mechanism is locked against movement when said registering mechanism is in abnormal position, and said registering mechanism is locked against movement when said setting mechanism is in abnormal position.

---

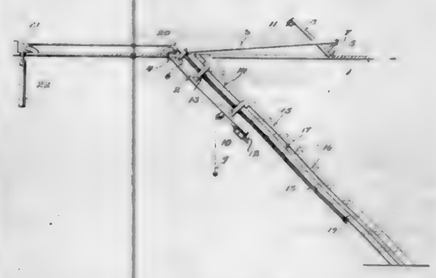
1,566,980. REGULATOR FOR ELECTRIC HEATERS. JOHN A. SEEDE, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed May 7, 1924. Serial No. 711,713. 8 Claims. (Cl. 204—64.)



1. A regulator for electric resistance heaters in which the heating resistance changes as the heating operation proceeds comprising means responsive to the current in said resistance for varying the voltage impressed on said resistance inversely in proportion to the current so as to maintain a substantially constant power input.

---

1,566,981. LOFT STAIRWAY. LOUIS G. SEIBERLICH, Oshkosh, Wis. Filed Oct. 20, 1924. Serial No. 744,801. 1 Claim. (Cl. 228—50.)



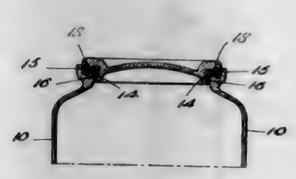
In a loft stair construction, the combination of a floor provided with an opening therethrough, a pair of trap doors pivoted to said floor adjacent said opening and adapted to be rocked in opposite directions, link mechanism connecting said trap doors and causing simultaneous motion thereof, a latch having cooperating portions carried by said trap doors and having a downwardly extending release cord, guides carried by the downwardly opening trap door, a ladder having a groove formed in each side thereof for the reception of said guides, a rope attached to said ladder at a point intermediate its ends, pulleys carrying said rope, and a counter weight attached to the other end of said rope.

---

1,566,982. FLOWER HOLDER. PARKE E. SHEE, Lancaster, Pa., assignor of one-half to Daniel M. Rothenberger, Leesport, Pa., and one-half to Maurice L. Dries, Wyomissing, Pa. Original application filed Aug. 30, 1922, Serial No. 585,221. Divided and this application filed Apr. 7, 1923. Serial No. 630,583. 1 Claim. (Cl. 248—20.)

The combination with a flower holder of a substantially U-shaped bracket having an opening in one arm thereof, a screw extending through said opening for detachably securing the bracket to the ledge, a lug having a rectangular socket projecting from the closed end of said bracket, a vertical rod having a hooked upper end provided with a depending flat portion arranged to engage said bracket and prevent lateral movement of the rod relative thereto, and a container connected exteriorly to the rod.

1,566,983. VACUUM CONTAINER. J ED SHERIFF, New York, N. Y., assignor to George A. Sykes, New York, N. Y. Filed July 28, 1922, Serial No. 578,128. Renewed June 10, 1925. 3 Claims. (Cl. 215—40.)



1. A package comprising a container having an opening surrounded by a biting ridge, a cover fitting over said opening and provided with a biting ridge whose apex lies substantially vertically over the apex of the ridge on the container, and a sealing ring of yielding material adapted to come between said cover and container so as to receive the biting compression of the two opposed ridges.

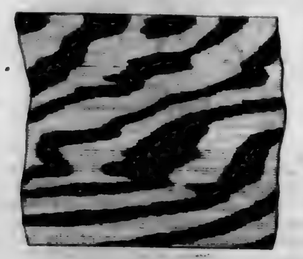
---

1,566,984. ELECTROPLATING METHOD AND ELECTROPLATED ARTICLES. ROBERT JAY SHOEMAKER, Chicago, Ill. Filed Oct. 1, 1923. Serial No. 665,951. 26 Claims. (Cl. 204—13.)

1. Improvement in the method of electroplating iron articles which consists in covering the surface of the article to be plated with a permanently adherent film of mercury and a metal with which mercury will amalgamate and thereafter electro-plating said surface.

---

1,566,985. PROCESS OF TREATING WOOD. JOHN SHULER, Columbus, Ohio. Filed July 23, 1925. Serial No. 45,698. 3 Claims. (Cl. 41—41.)

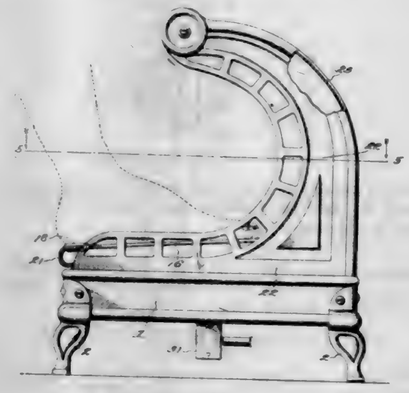


1. A process of treating wood which consists in coating the surface thereof with a solution which protects the softer portions thereof against charring to a greater degree than the harder portions, then applying heat to the coated surface which chars the harder portions to a greater extent than the softer portions, then rubbing the surface to remove the charred surface of the softer portions and leaving the harder portions charred.

---

1,566,986. FOOT-REST ELECTRIC HEATER. LEO SIMMONS, Washington, D. C. Filed Apr. 3, 1925. Serial No. 20,492. 12 Claims. (Cl. 219—19.)

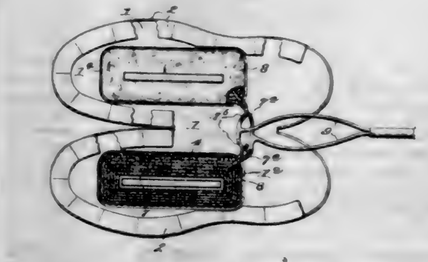
5. A portable electric heater arranged to heat and circulate the air of a room, said heater embodying an electric resistance heating unit, a foot support arranged a distance above said unit and in foot heating relation thereto, and an upstanding hood projected forwardly above said support, means being provided to protect the feet on said rest from burning or injurious heat and to



cause upward discharge of heated air adjacent to said support, and means for supporting said unit and the foot support in a low down foot rest position.

---

1,566,987. ELECTRIC WARMER FOR THE FEET. LEO SIMMONS, Washington, D. C. Filed May 19, 1925. Serial No. 31,356. 7 Claims. (Cl. 219—46.)



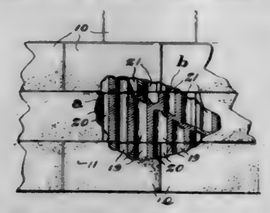
5. An electric warmer for the human feet, with therapeutic tendencies, embodying double open flexible receiving inclosures for the human feet and ankles; having a common supporting base forming the bottom or soles of said receiver housings, provided with electric resistance wire heat generating coils, confined in recesses through the base or soles of said housings, with means for connecting same to the ordinary electric light supply.

---

1,566,988. BUILDING-BLOCK CONSTRUCTION. JOÃO P. SIMMONS and MANUEL C. PACHECO, New Bedford, Mass. Filed Feb. 9, 1924. Serial No. 691,659. 1 Claim. (Cl. 72—41.)

A building block comprising inner and outer integral sections each having a longitudinally arranged series of vertical passages therethrough in equal spaced relation, the passages of one section being in staggered relation to those in the other, slots of less diameter than the passages and opening on the top and bottom of the blocks being formed at each end of the block forming commu-

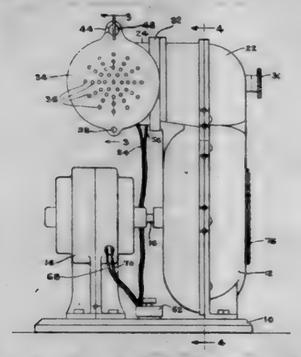
nication between respective passages and the ends of the block, and being of a width to permit the formation of a substantial key to oppose longitudinal separation



of the blocks by the extrusion of mortar from joints on which the slots and passages abut when such blocks are laid as described.

---

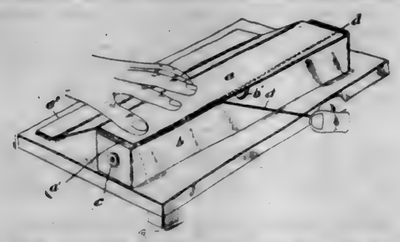
1,566,989. ELECTRIC HEATER. MAX SKOLNIK, Minneapolis, Minn. Filed Oct. 13, 1924. Serial No. 743,202. 4 Claims. (Cl. 219—42.)



1. An electric heater for rooms comprising blower whose casing has a central air inlet opening, an extension member leading from the periphery of the blower casing, the delivery end of said extension member being deflected laterally at right angles, a forwardly extending nozzle swivelly attached at its side to said deflected end, an electric resistance element in said nozzle extending out centrally from the rear end thereof, and means whereby current may be supplied to said element.

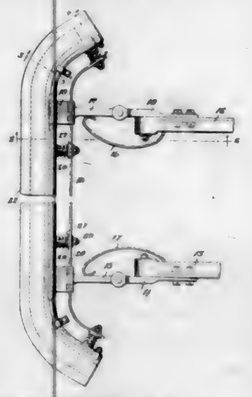
---

1,566,990. DISPENSING PACKAGE FOR PAPER. RAYMOND E. SMITH, Portland, Oreg., assignor to Nashua Gummed & Coated Paper Company, Nashua, N. H., a Corporation of Massachusetts. Filed May 19, 1925. Serial No. 31,378. 3 Claims. (Cl. 206—58.)



1. A paper-roll holder comprising two members and a string having its ends detachably connected to one of them to permit it to be employed to retain the said two members in assembled relationship or to cut a section of paper drawn from a roll contained in the holder.

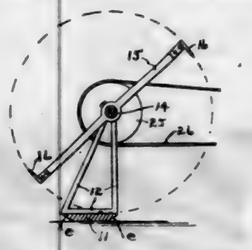
1,566,991. AUTOMOBILE BUMPER. JOSEPH SONNENFELD, Brooklyn, N. Y. Filed Aug. 5, 1925. Serial No. 48,292. 5 Claims. (Cl. 293—55.)



1. An automobile bumper which comprises a front guard-plate, cushioning means on said front guard-plate, a more flexible rear guard-plate and resilient means disposed between said plates permitting movement of the one with respect to the other.

---

1,566,992. CUTTER ATTACHMENT FOR TRACTORS. JOSEPH SPENCE, Maywood, Nebr. Filed Feb. 27, 1925. Serial No. 12,131. 3 Claims. (Cl. 55—118.)



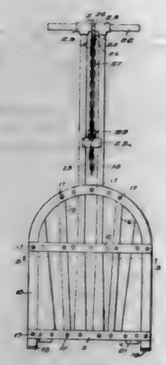
1. In a cutter attachment for tractors, a base-plate provided with upright frames and having a convexed bottom for engaging the ground transversely of the line of travel of the tractor, a revoluble operating-shaft having bearings in said upright frames, cutter-bars arranged in pairs at longitudinal intervals of the base-plate and rigidly mounted on said shaft, blades mounted on the ends of the cutter-bars of each pair, pull-bars connected at their respective ends with the base-plate and tractor, a radius rod having a pivotal connection with the shaft and pivotally connected with the tractor, a yoke on the tractor having arms receiving the pull-bars, and a pair of springs carried by said yoke for pressing the pull-bars toward the ground.

---

1,566,993. TRUCK. BURTON A. SPINNEY, Des Moines, Iowa. Filed May 28, 1923. Serial No. 641,882. 1 Claim. (Cl. 214—65.4.)

In a device of the class described, a yoke-shaped member, a cross member at the end thereof, a cross member spaced from the ends thereof curved out of the plane of the yoke member, slats connecting said cross members and the closed end of the yoke, a handle comprising a pair of parallel members secured to said cross members and the closed end of the yoke, a transverse handle mem-

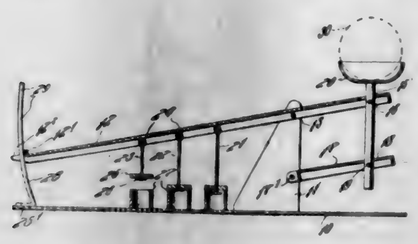
ber mounted on the outer end of said first handle members, a yoke mounted on said last handle member between the first two handle members, a link chain connected with said yoke having a hook on its free end, a sliding



member mounted on and between the first two-described handle members having upwardly projecting spaced members terminating in curved ends, and supporting antifriction elements on the underside of said cross member.

---

1,566,994. SCALE. LEON SPIRO and EDWARD T. WHITE, Everett, Wash. Filed June 11, 1924. Serial No. 719,401. 2 Claims. (Cl. 265—48.)

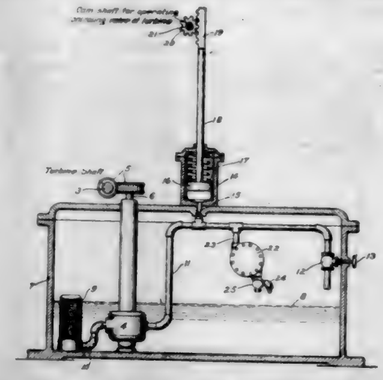


1. An egg grading scale of the character described comprising a base having a pair of spaced parallel arms secured to the upper side thereof, a scale beam fulcrumed off center and between the arms and having a slot in one end thereof, a vertically extending shaft received within the slot and pivotally secured to the scale beam, the long arm of the scale beam being bifurcated at its end thereof, a curvilinear gage bar secured to the base adjacent the end of the long arm and adapted to be received within the bifurcated end portion, a plurality of weights, means for suspending the weights from the underside of the scale beam between the gage bar and the parallel arms, a plurality of weight receiving members positioned directly beneath the weights, and a receptacle carried by the upper end of the vertically extending shaft.

---

1,566,995. OIL GOVERNOR. REGINALD G. STANDERWICK, Marblehead, Mass., assignor to General Electric Company, a Corporation of New York. Filed Jan. 14, 1924. Serial No. 686,139. 4 Claims. (Cl. 264—14.)

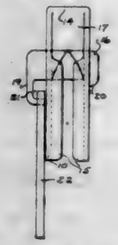
1. In combination, a machine having a shaft, a pump driven in accordance with the speed of the shaft, a conduit to which the pump delivers fluid, means forming a discharge orifice for the conduit which serves to build up pressure in the conduit, regulating means for the machine operated by such pressure, means forming a second discharge orifice in parallel with the first-named



orifice, and means responsive to variations in the temperature of the fluid for varying the area of said second discharge orifice.

---

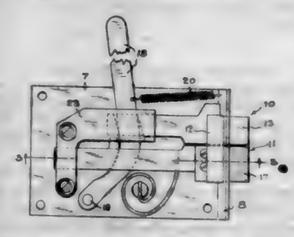
1,566,996. SEPARABLE FASTENER SLIDER. GIDEON SUNDBACK, Meadville, Pa., assignor to Hookless Fastener Company, Meadville, Pa., a Corporation of Pennsylvania. Filed May 8, 1923. Serial No. 637,447. 22 Claims. (Cl. 24—205.)



1. A slider comprising wings forming diverging channels, means holding the wings against spreading, and a pull device pivoted between the channels adjacent one wing to confine the actuating force to substantially the intermediate portion of the slider.

---

1,566,997. DOOR LATCH. GEORGE M. TAGGART, Jr., Seattle, Wash. Filed June 22, 1925. Serial No. 38,653. 1 Claim. (Cl. 292—173.)

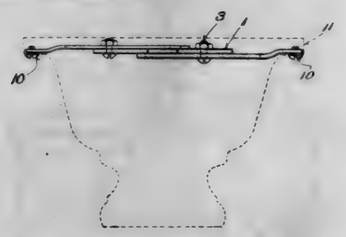


In a lock, keeper means affording bolt receiving space having a straight wall and an inclined wall, a bolt having a straight outer wall arranged to lock against

the straight wall of said keeper, a spring pressed bolt having an inclined outer wall arranged to wedge against the inclined wall of said keeper and means for simultaneously retracting both of said bolts.

---

1,566,998. FIXTURE STRAP. MORRIS TAX, Milwaukee, Wis. Filed May 3, 1923. Serial No. 636,337. 3 Claims. (Cl. 240—85.)



1. A fixture strap comprising a body plate having a centrally located threaded aperture, a plurality of bolts carried by said body plate, and members having elongated slots through which said bolts pass, said members being slidably related to said body portion and having threaded apertures adjacent their outer portions.

---

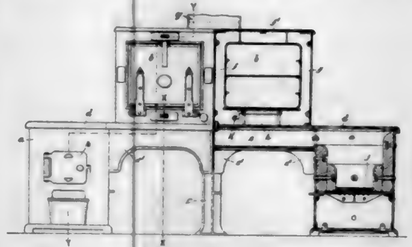
1,566,999. AUTOMOBILE SPOTLIGHT. JAMES ALFRED THOMAS, Albert Lea, Minn. Filed Nov. 2, 1923. Serial No. 672,307. 4 Claims. (Cl. 240—61.)

1. A spot light provided with supporting means to be clamped to and supported from the filler spout of the radiator of an automobile, said spot light rotatably mounted in position under said support and operatively connected to one end of a flexible shaft, a shaft attached at one of its ends to the other end of said flexible shaft, and supported in position parallel to the steering column of the automobile, a gear loosely mounted on the upper end of said shaft in mesh with a gear secured to the steering wheel of the automobile, said upper end of said shaft being hollow and having a plunger therein, a spring back of said plunger, pins on said plunger adapted to rest in notches in said shaft in inoperative position and arranged so that one of said pins will be in a slot in said shaft, and the other of said pins will be in a notch in said loosely mounted gear when the device is in operative position.

---

1,567,000. COOKING STOVE AND RANGE. HERBERT ALEXANDER THOMPSON, Morpeth, England, assignor of one-half to Swinney Brothers Limited, Morpeth, England, a Company organized and existing under the laws of Great Britain. Filed May 12, 1924. Serial No. 712,758. 2 Claims. (Cl. 126—18.)

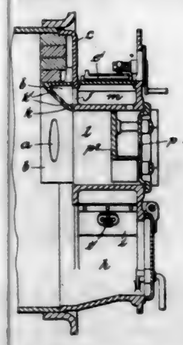
1. A stove unit for use in required numbers in ships' galleys comprising a stove structure having a fire box at one end thereof, a hot plate extending over the entire stove structure including the end in which the fire box is situated, a lateral flue immediately beneath the hot plate communicating with the space above the fire box, said hot plate above said flue having an opening at the rear portion of the stove structure, an oven structure fitted directly on the portion of the hot plate above said flue and having bottom, side and top flues about the oven with the rear portion of the bottom flue communicating directly with the opening in said hot plate, a



chimney communicating with the top flue of the oven structure, baffle plates in said flues of the oven structure, and a damper extending in common to the bottom flue of the oven structure and said opening of the hot plate and adapted to direct the products of combustion either to said bottom flue or to the chimney.

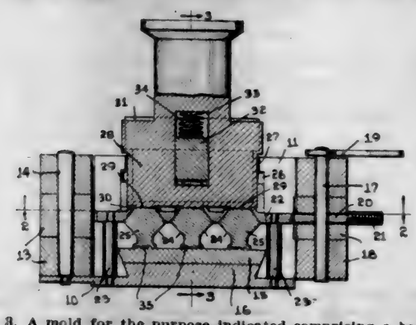
---

1,567,001. FORCED-DRAFT-FURNACE FRONT WHICH IS CONVERTIBLE FOR FIRING WITH COAL OR OIL OR BOTH. HERBERT ALEXANDER THOMPSON. Morpeth, England, assignor of one-half to Swinney Brothers Limited, Morpeth, England, a British Company. Filed Dec. 26, 1924. Serial No. 758,188. 6 Claims. (Cl. 158—1.5.)



1. A furnace front of the type referred to comprising the combination of inner and outer plates of the furnace front, a fire opening formed by a casting made in one with the outer and inner plates of the furnace front, hollow perforated wing baffles, air directing cones arranged on each side of the firing opening casting and made integral with the hollow perforated wing baffles, a hollow perforated arch baffle open at its ends to the wing baffles, the said inner plate of the furnace front having openings leading to said arch baffle, saddle plates extending between the outer and inner plates of the furnace front, said saddle plates being sloped outwardly and downwardly, saddle valves mounted in said saddle plates, lower plates extending between the outer and inner plates of the furnace front and sloping upwardly from the lower part of the fire opening casting, said plates meeting and supporting the ends of the saddle plates and together therewith enclosing an air chamber leading to the air directing cones and the arch baffle, oil burners mounted in the front plate and extending through said air chambers and arranged coaxially with the air directing cones.

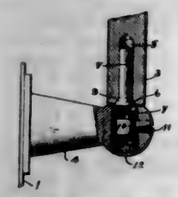
1,567,002. FOUNT CUT. ALBERT J. THROM, Grapeville, Pa. Filed June 23, 1925. Serial No. 39,078. 9 Claims. (Cl. 49—72.)



3. A mold for the purpose indicated comprising a base and movable side members secured to the base, a shell supported by the base and enclosed by the side members, the latter and the shell defining the shape of articles to be cast and the side members above the shell being hollowed out to provide a fount, and a plunger insertible in the fount and having shell engaging means to shear the surplus glass from the cast article.

---

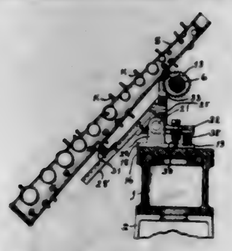
1,567,003. KEY-SHAFT BEARINGS FOR MUSICAL INSTRUMENTS. EDWARD J. GULICK, Elkhart, Ind., assignor to C. G. Conn, Ltd., Elkhart, Ind., a Corporation of Indiana. Filed Mar. 12, 1921. Serial No. 451,869. 6 Claims. (Cl. 84—385.)



2. In a wind musical instrument, the combination with a rotatable key-shaft and a post, of a bearing pin telescopically connecting said shaft and post, said pin being provided with cylindrical and conical bearing sections, and said pin being bodily adjustable in said post and axially of said shaft.

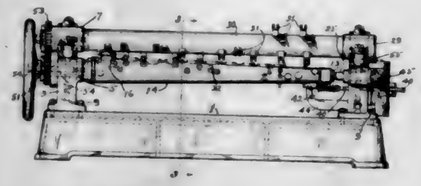
---

1,567,004. MILLING MACHINE FOR CROSS-KNOBS FOR MUSICAL INSTRUMENTS. EDWARD J. GULICK, Elkhart, Ind., assignor to C. G. Conn, Ltd., of Elkhart, Ind., a Corporation of Indiana. Filed Nov. 1, 1922. Serial No. 598,252. 12 Claims. (Cl. 90—11.)



1. In a cross knob milling machine for instrument bodies, the combination of a tool shaft extending transversely of the axis of the instrument body, and means for supporting said instrument body on the knobs to be machined by said tool.

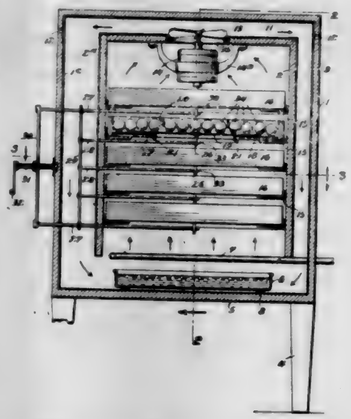
1,567,005. KNOB-GAUGING MACHINE FOR MUSICAL INSTRUMENTS. EDWARD J. GULICK, Elkhart, Ind., assignor to C. G. Conn, Ltd., Elkhart, Ind., a Corporation of Indiana. Filed Nov. 6, 1922, Serial No. 599,243. Renewed May 21, 1925. 17 Claims. (Cl. 29—89.)



1. In a machine for gauging the knobs of musical instruments of the character described, the combination of a support for an instrument body, a gauge carrier and means for moving said carrier and body relatively to each other.

---

1,567,006. INCUBATOR. JOHN F. MACKAY, Lancaster, Pa., and ROLLA E. FADER, Norwalk, Ohio. Filed Sept. 21, 1921, Serial No. 502,139. Renewed Mar. 25, 1925. 7 Claims. (Cl. 119—35.)



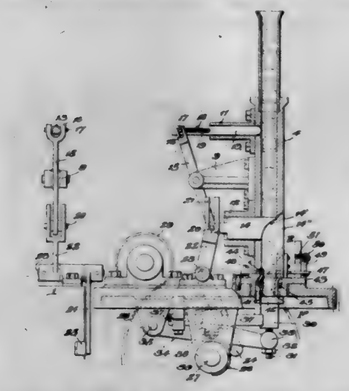
1. An incubator comprising inner and outer casings affording intervening top and opposed side circulation spaces the latter communicating with the lower interior of the inner casing, a fan arranged in an opening at the top of the inner casing for creating a draft, heating means in the lower portion of the casing, and egg supporting means in the inner casing, all so arranged that heated air drawn upwardly is deflected through the circulation spaces back to the bottom of the incubator and up again.

---

1,567,007. MACHINE FOR STRIPPING RUBBER NIPPLES FROM METAL FORMS. PAUL A. RAICHE, Providence, R. I., assignor to Davol Rubber Company, Providence, R. I. Filed Dec. 24, 1924. Serial No. 757,956. 11 Claims. (Cl. 18—2.)

1. In a machine for stripping nipples from metal forms, a magazine having a discharge outlet, means for moving the magazine vertically, centering and locating means for the forms and nipples thereon, means for successively delivering the forms from the magazine to the centering means, releasable means for gripping the

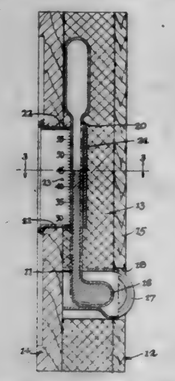
nipples carried by the magazine, an air tube formed with a beveled mouth to engage between the roll of the nipple and the form, means to admit air under pressure into



the tube, and means to release the gripping means upon upward movement of the magazines to permit the air pressure to eject the nipple through the discharge outlet.

---

1,567,008. REFRIGERATOR THERMOMETER. CHARLES C. SPREEN, Detroit, Mich., assignor, by mesne assignments, to Kelvinator Corporation, Detroit, Mich., a Corporation of Michigan. Filed Dec. 11, 1924. Serial No. 755,212. 2 Claims. (Cl. 73—52.)

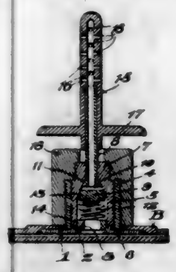


1. In combination, a refrigerator wall having an inner recess extending into said wall from the inner face thereof and an outer recess extending into said wall from the outer face thereof and an aperture extending in said wall between said recesses, and a thermometer having its bulb disposed in said inner recess and its indicating portion disposed in said outer recess and connected to said bulb by a connecting stem extending from said bulb to said indicating portion through said aperture.

---

1,567,009. RUBBER INTERNAL-BATH BAG. ROBERT E. STERRITT, Cranston, R. I., assignor to Davol Rubber Company, of Providence, R. I. Filed May 29, 1925. Serial No. 33,662. 6 Claims. (Cl. 128—226.)

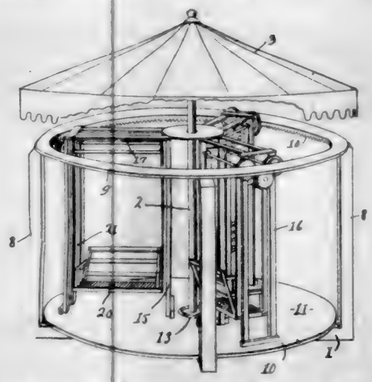
3. A valve structure for rubber bags, including a base engaged with a wall of the bag, a sleeve carried by the base, a valve casing carried by the sleeve and located therewithin and having an internal valve seat, a hollow valve stem slidable in the casing and having a valve engaged with the seat and formed with a port communicating with the valve stem interior, a spring seat within



the casing a spring supported on the seat and engaged with the valve a nozzle on the valve stem, and an outer casing surrounding the sleeve and engaged with said bag wall to clamp same against the base.

---

1,567,010. SWING. HERMAN H. SPECK, Cincinnati, Ohio; Josephine Speck executrix of said Herman H. Speck, deceased. Filed Jan. 2, 1923. Serial No. 610,136. 2 Claims. (Cl. 272—33.)



2. In combination with a frame having a circular rack mounted thereon, a carrier revolving on said frame, a plurality of swing devices mounted on the carrier and adapted to swing to and fro when energized by an occupant, a pair of shafts secured to each swing device and rocking with said swings, said shafts having gear and ratchet trains including gears to mesh with the circular rack, and each gear and ratchet train being arranged to drive all rack meshing gears in the same direction.

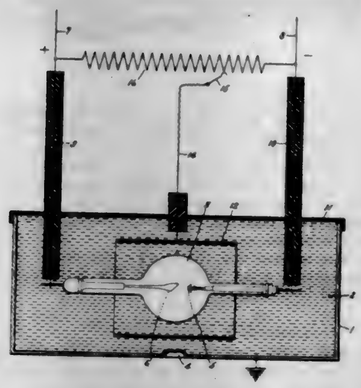
---

1,567,011. HAIR-TRIMMING GUIDE. JEAN PARZIALE, New York, N. Y. Original application filed Feb. 6, 1925, Serial No. 7,355. Divided and this application filed Oct. 12, 1925. Serial No. 62,133. 2 Claims. (Cl. 132—45.)

1. As a new article of manufacture, a guide for trimming sideboards, comprising a pair of members each having an arcuate rear portion constituting means for guiding the user in shaving around the ears, and a lower edge having a series of parallel teeth formed with angular inwardly projecting terminals through which the portions of the sideboards to be trimmed project.

---

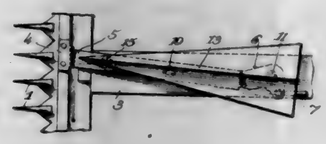
1,567,012. ELECTRON-DISCHARGE APPARATUS. HECTOR PAUL PILON, Paris, France, assignor to General Electric Company, a Corporation of New York. Filed Apr. 27, 1922. Serial No. 556,917. 3 Claims. (Cl. 250—84.)



2. An X-ray apparatus, comprising the combination of a tank, an X-ray bulb mounted therein, a body of insulating liquid surrounding said bulb, a conductive body surrounding said bulb in contact with said liquid, and means for charging said conductive body to an electrostatic potential.

---

1,567,013. MOWING MACHINE. ARNOLD RUTISHAUSER, Olten, Switzerland. Filed July 6, 1925. Serial No. 41,644. 4 Claims. (Cl. 56—2[illegible].)

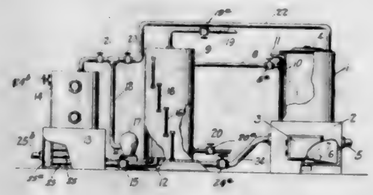


1. In a mowing machine, the combination with a wheeled frame having a middle, forwardly projecting part and a cutter, of a distributing member extending toward the cutter and having surfaces rising from the front towards the rear and mounted above said forwardly projecting part, and means to impart an oscillating movement in a substantiallily horizontal plane to said distributing member for separating the cut material falling on said distributing member and laying it in two swaths to both sides of said part.

---

1,567,014. APPARATUS FOR REDUCING THE OFFAL IN SLAUGHTERHOUSES TO GREASE AND TANKAGE. HUGH P. TAYLOR, Dayton, Ohio, assignor to Pearl B. Brokamp, Dayton, Ohio. Filed Aug. 5, 1922. Serial No. 579,942. 1 Claim. (Cl. 87—13.)

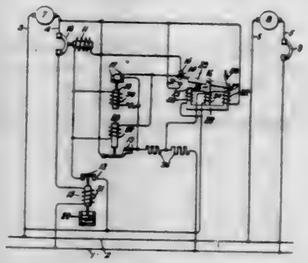
In an apparatus of the type described, an offal tank for cooking a quantity of offal and having an opening in its side, near its top, covered by a screen, means for injecting steam behind said screen to keep it clear of obstacles, a receiving tank, a conduit connecting the receiving tank with that portion of the offal tank located behind said screened opening to float melted grease and portions of finely divided protein from the offal tank to the receiving tank, a grease outlet conduit at the top of the receiving tank, means for introducing water into



the bottom of the receiving tank to force the grease into said grease outlet, an evaporating tank, a steam jacket in the bottom of the latter, means for introducing steam to said jacket, means for drawing protein from the bottom of the receiving tank into the evaporating tank, and means for conducting the concentrated protein from said evaporating tank to the first tank for removal.

---

1,567,015. AUTOMATIC RECLOSING CIRCUIT-BREAKER SYSTEM. OLIVER C. TRAVER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Dec. 20, 1921. Serial No. 523,754. 12 Claims. (Cl. 175—294.)



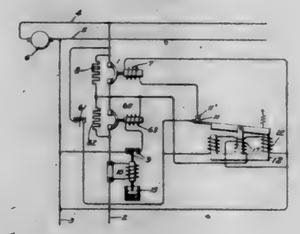
1. In an automatic reclosing circuit breaker system, the combination with a direct current load circuit supplied with current at a plurality of points, a direct current supply circuit adapted to be connected to said load circuit, a circuit breaker for controlling the connection between said load circuit and said supply circuit, and closing means for said circuit breaker, of means responsive to the relative polarities of the voltages across said supply circuit and said load circuit and the magnitude of the voltage across said load circuit for controlling the operation of said closing means.

---

1,567,016. AUTOMATIC RECLOSING CIRCUIT-BREAKER SYSTEM. OLIVER C. TRAVER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Dec. 20, 1921. Serial No. 523,756. 10 Claims. (Cl. 175—294.)

1. In an automatic reclosing circuit breaker system, the combination with a supply circuit, a load circuit connected to said supply circuit, a circuit breaker adapted to control the connection between said supply circuit and said load circuit, an impedance adapted to be inserted in series with said supply circuit and said load circuit

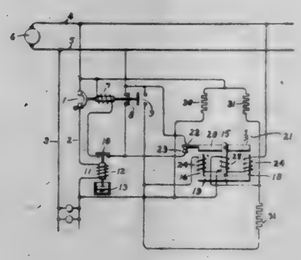
when said circuit breaker is open and closing means for said circuit breaker, of a polarized relay for controlling the operation of said closing means comprising an operating winding connected across the load circuit so that its energization varies with the resistance of the load circuit when the circuit breaker is open and said supply circuit is energized.



8. In an automatic reclosing circuit breaker system, the combination with a supply circuit, a load circuit connected to said supply circuit, a circuit breaker adapted to control the connection between said supply circuit and said load circuit, and closing means for said circuit breaker, of a relay responsive to the voltage across the load circuit for controlling the operation of said closing means, and means connected in circuit with a winding of said relay for compensating for variations in the resistance thereof due to temperature changes.

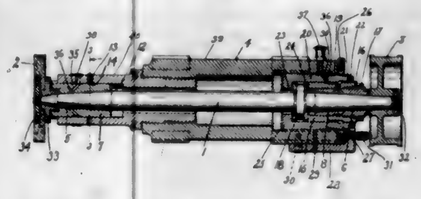
---

1,567,017. AUTOMATIC RECLOSING-CIRCUIT-BREAKER SYSTEM. OLIVER C. TRAVER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Jan. 19, 1922. Serial No. 530,442. Renewed July 8, 1925. 5 Claims. (Cl. 175—294.)



4. In an automatic reclosing circuit breaker system, the combination with a supply circuit, a load circuit connected to said supply circuit, a circuit breaker adapted to control the connection between said supply circuit and said load circuit and closing means for said circuit breaker, of a resistance adapted to be placed in series with the load circuit when the circuit breaker is open, a second resistance adapted to be placed in parallel with said first resistance and said load circuit when the circuit breaker is open, and a polarized relay for controlling said closing means having a coil connected between points of said resistances.

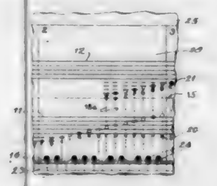
1,567,018. GRINDING-MACHINE-SPINDLE BEARING. SIDNEY HAROLD AMSDEN, Worcester, Mass., assignor to Norton Company, Worcester, Mass., a Corporation of Massachusetts. Filed Aug. 11, 1920. Serial No. 402,891. 6 Claims. (Cl. 308—70.)



1. A grinding machine spindle fixture comprising a housing, a spindle having oppositely tapered bearing portions within said housing, a bearing for one of said tapered portions adapted to be held immovable relative to the housing, a movable bearing connected with the spindle to move longitudinally therewith for the other of said tapered portions, means for moving said movable bearing with the spindle to adjust the fit between the immovable bearing and the spindle and means to adjust the movable bearing relative to the spindle for both radial and longitudinal wear.

---

1,567,019. MUSICAL-INSTRUCTION DEVICE. IRVING BARNES, Westwood, N. J. Filed Oct. 17, 1924. Serial No. 744,108. 2 Claims. (Cl. 84—478.)



1. A device of the character described adapted to be applied to a key-board of a musical instrument, comprising a sheet having notes arranged thereon on two spaced staves in the order of the musical scale, a section of said sheet being adapted to overlie a portion of the key-board to position the notes in correlation with the key-board, said sheet being constructed to fold on the portions thereof between the two staves and adjacent said section to conform with parts of the instrument.

---

1,567,020. METHOD OF MAKING ARTICLES OF CERAMIC BONDED GRANULAR MATERIAL. MILTON F. BEECHER and MACDONALD C. BOOZE, Worcester, Mass., assignors to Norton Company, Worcester, Mass., a Corporation of Massachusetts. Filed May 15, 1923. Serial No. 639,216. 6 Claims. (Cl. 25—157.)

1. The method of making a ceramic article comprising the steps of mixing abrasive grains and a vitrifiable bond in dry condition and thereafter firing the unformed dry mixture to vitrify the bond.

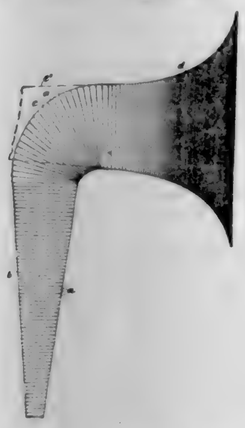
---

1,567,021. COMBINED NECKLACE AND GAME APPARATUS. PAUL DETLEFSEN and GEORGE GRAHAM IZARD, Chicago, Ill. Filed May 12, 1924. Serial No. 712,706. 8 Claims. (Cl. 63—2.)

8. A necklace game counter including a flexible member shaped to form a loop and a plurality of objects loosely threaded thereupon, all of the objects being adapted to be moved ad-libitum upon and lengthwise of the said flexible member, the combined length of the said objects being considerably less than the length of the portion of the flexible member forming the loop so that adjacent objects at any point throughout the loop of objects may be separated and slid for a considerable distance upon the flexible member, and means other than the said objects for retaining the said objects in proximity to each other and substantially against movement lengthwise of the said flexible member, one of the said objects having a distinguishing characteristic from the remaining objects and dividing the objects into adjacent groups.

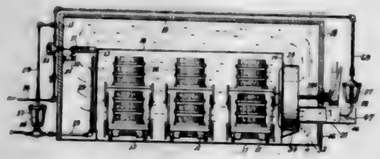
---

1,567,022. WOODEN TUBULAR STRUCTURE. JOSHUA GREEN, London, England. Filed Nov. 8, 1923. Serial No. 673,475. 8 Claims. (Cl. 181—27.)



1. A tubular structure consisting wholly of non-metallic sheet material in narrow strip form, wound spirally and having its edge portions permanently cemented together.

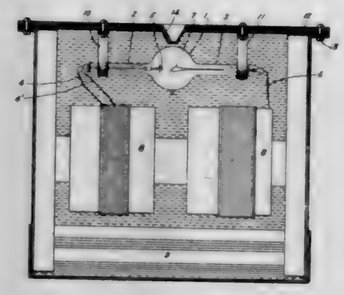
1,567,023. CONTINUOUS DRYING KILN AND METHOD OF DRYING WARE. THURE LARSSON, Worcester, Mass., assignor to Norton Company, Worcester, Mass., a Corporation of Massachusetts. Filed Oct. 30, 1920. Serial No. 420,606. 30 Claims. (Cl. 34—46.)



30. In a continuous drying kiln, a series of heaters arranged longitudinally thereof, thermostatically controlled devices to regulate said heaters independently of each other, means including fans to circulate the air transversely of the dry room repeatedly in one direction, means providing inlet and outlet openings to and from the kiln to the external atmosphere and a return passage from the outlet to the inlet opening, means for circulating the air longitudinally of the kiln and the return passage to the inlet opening and a thermostatically controlled device to regulate the forward movement of the repeatedly circulating air in said kiln and to condition the air entering the kiln by mixing the return air with fresh air to obtain a fixed moisture content.

---

1,567,024. X-RAY APPARATUS. CHESTER N. MOORE, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Mar. 10, 1922. Serial No. 542,757. 1 Claim. (Cl. 250—34.)



An X-ray apparatus comprising the combination of a sealed container having a wall containing a reentrant window which is transparent to X-rays, a filling of oil in said container, an X-ray bulb immersed in the oil within said container and supported at a substantial distance from the wall through which X-rays emerge to prevent accidental short-circuit of the terminals of said bulb by an external conductor, but being so oriented with respect to said reentrant window that X-rays from said bulb are projected through only a thin layer of oil between said bulb and said window.

Patents Nos. 1,567,025 to 1,568,039.

# THE OFFICIAL GAZETTE
OF THE
# United States Patent Office.

Vol. 341—No. 5. TUESDAY, DECEMBER 29, 1925. Price—$5 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $5.00 per annum; single numbers, 10 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

## Interference Notices.

U. S. Patent Office, *Washington, Dec. 5, 1925.*

*Continental Candy Company, its assigns or legal representatives, take notice.*

An interference has been declared by this Office between the application of Hawley & Hoops, of 271 Mulberry Street, New York, N. Y., for registration of a trade-mark and trade-mark registered June 15, 1913, No. 92,571, to Novelty Candy Company, of 346 Claremont Avenue, Jersey City, N. J. The assignment records of this Office show that said trade-mark was assigned to Continental Candy Company, of 37 Wall Street, New York, N. Y., and because of prima facie evidence in the record to the effect that Continental Candy Company is no longer in business notice is hereby given that unless said Continental Candy Company, its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. Patent Office, *Washington, Dec. 8, 1925.*

*Hudson Condensed Milk Co., Inc., its assigns or legal representatives, take notice:*

An interference having been declared by this Office between the application of The United Dairy Company Inc., Barnesville, Ohio, for registration of a trade-mark and trade-mark registered February 23, 1915, No. 102,799, to Hudson Condensed Milk Co., Inc., 81 Fulton Street, New York, N. Y., and a notice of such declaration sent by registered mail to said Hudson Condensed Milk Co., Inc., at the said address having been returned by the post office as undeliverable, notice is hereby given that unless said Hudson Condensed Milk Co., Inc., shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. Patent Office, *Washington, Dec. 4, 1925.*

*Charles C. Copeland & Co., its assigns or legal representatives, take notice:*

An interference having been declared by this Office between the application of Spartan Mills, Spartansburg, S. C., for registration of a trade-mark and trade-marks registered March 19, 1907, No. 61,438, and April 2, 1907, No. 61,700, to Charles C. Copeland & Co., 45 Worth Street, New York, N. Y., and a notice of such declaration sent by registered mail to said Charles C. Copeland & Co. at the said address having been returned by the post-office authorities as undeliverable, notice is hereby given that unless said Charles C. Copeland & Co., its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. Patent Office, *Washington, Dec. 4, 1925.*

*Fulfashon Hosiery Company, its assigns or legal representatives, take notice:*

An interference having been declared by this Office between the application of Wm. Hahn & Co., Seventh and K Streets NW., 1318 G Street NW., 414 Ninth Street NW., Washington, D. C., and also 37 West Lexington, Baltimore, Md., for registration of a trade-mark and trade-mark registered Sept. 14, 1920, No. 134,651, to Fulfashon Hosiery Company, 288 Fourth Avenue, New York, N. Y., and a notice of such declaration sent by registered mail to said Fulfashon Hosiery Company at the said address having been returned by the post-office authorities as undeliverable, notice is hereby given that unless said Fulfashon Hosiery Company, its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

## Notice of Cancellation.

U. S. Patent Office, *Washington, Dec. 11, 1925.*

*Son Brothers & Co., their assigns or legal representatives, take notice:*

A cancellation proceeding having been instituted by this Office upon the application of The Yale and Towne Mfg. Co., 9 East Fortieth Street, New York, N. Y., to effect the cancellation of the trade-mark registration of Son Brothers & Co., doing business at 2124 Broadway, San Francisco, Calif., and in Meriden, Conn., under the name of Yale Cutlery Co., No. 58,930, dated December 26, 1906, and the notice of such proceeding sent by registered mail to the said Son Brothers & Co. at the said addresses having been returned by the post office as undeliverable, notice is hereby given that unless said Son Brothers & Co., their assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the cancellation will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

## Condition of Applications Under Examination at Close of Business December 18, 1925.

(Total number of applications awaiting action, excluding Trade-Mark Division, 39,797; Trade-Mark Division, 1,978. Oldest new case, June 10, 1925; oldest amended, June 9, 1925. The dates given are 1925.)

| Room No. | Divisions, Examiners, and Subjects of Inventions. | Oldest new application and oldest action by applicant awaiting office action. New. | Amended. | No. of applications awaiting action. |
|---|---|---|---|---|
| 112 | 1. LOEFFLER, F. A., Closure Operators; Fences; Gates; Harrows and Diggers; Plant Husbandry; Plows; Planting; Scattering Unloaders. | Oct. 5 | Oct. 8 | 568 |

# DECISIONS IN PATENT AND TRADE-MARK CASES.

## Commissioner's Decision.

EX PARTE GUINZBURG.

*Decided July 24, 1925.*

1. DESIGNS—STATEMENT AS TO IMMATERIALITY OF CONTOUR OF THE ARTICLE—OBJECTIONABLE.

Where a design application discloses an ornamented article, a statement that the design is not limited to the specific outline shown *Held* improper as an attempt to claim surface ornamentation as applied to the article named irrespective of its contour.

2. SAME—DRAWING—DOTTED LINES.

Where a design application discloses an ornamented article, *Held* that there is no objection to showing the outline of the article in dotted lines provided a complete article is shown.

ON PETITION.

Application for design patent filed March 10, 1925, Serial No. 12,677, Bathing Cap.

*Mr. Joseph L. Levy* for the applicant.

FENNING, *Assistant Commissioner:*

This is an application for a design patent and as filed showing a bathing cap having certain ornamentation thereon, the outline of the bathing cap being indicated by a dot-and-dash line. The claim is for a bathing cap.

The Examiner objected to the drawing on the ground that a complete cap was not illustrated. The applicant thereupon directed that the drawing be inked to show the outline of the cap in full line and that the following be added to the specification:

It is understood that this design is not limited to a cap having the specific outline disclosed in the drawing as the design or surface ornamentation of the cap is capable of application to caps of various outlines or shapes.

The Examiner objected to this amendment on the ground that mere surface ornamentation was not an article of manufacture and required that applicant limit his application to the particular article shown and covered by the title.

Applicant petitions that the Examiner be ordered either to allow applicant to incorporate in his specification the statement that the design is not limited to the outline of the cap shown or else permit this outline to be shown in dotted lines.

The Examiner was clearly right in objecting to the amendment to the specification. With this amendment applicant is in effect claiming the surface ornamentation shown when applied to a bathing cap of any configuration. The statute speaks of a design for an article of manufacture. There is nothing to establish that applicant has invented any other article of manufacture than that which he shows. It might be that if the surface ornamentation shown were applied to a bathing cap of an entirely different shape from that shown in the drawing an entirely different design would be presented. The question whether such design would be infringed by the patent is one to be decided by the court, if a suit is brought on the patent, and this Office should not undertake to anticipate the decision on what is the equivalent to constitute infringement of applicant's design as shown.

In so far as the drawing is concerned, the question is different. It is not seen that it is material whether the outline of the cap be shown in full lines or dotted lines, as long as a complete article is shown, so as to inform the public of the design invented and so that the Examiner will have before him in making his search a definite article of manufacture and will not have to search for a surface ornamentation, irrespective of the article on which it is applied. If the form and appearance of an article are adequately disclosed, dotted lines may be employed.

In so far as the decisions in *Ex parte Cady*, 232 O. G. 619; 1916 C. D. 57; *Ex parte Andrews*, 234 O. G. 373; 1917 C. D. 13; and *Ex parte Northwood*, 236 O. G. 889; 1917 C. D. 30, are inconsistent with the holding above made they are overruled.

The petition that the Examiner be ordered to permit the proposed statement to be incorporated in the specification is denied, and the petition that the drawing be allowed to show the outline of the cap in dotted lines, as originally presented, is granted, and the draftsman will comply with a formal request to this effect if filed by applicant.

## Court of Appeals of the District of Columbia.

IN RE STOFFREGEN.

*No. 1,750. Decided June 1, 1925.*

TREATIES—NOT SELF-EXECUTING SO FAR AS THEY RELATE TO PATENTS—TREATY OF PEACE WITH GERMANY NOVEMBER 11, 1921.

Where it appears that the Congress of the United States and the Patent Offices of this country and of Germany have proceeded upon the theory that the treaty of peace between the United States and Germany on November 11, 1921, is not self-executing so far as it relates to patents and that this theory is consistent with judicial interpretation of similar treaties, *Held* that the ruling of the Patent Office refusing to allow applicant's claims because of his German patent covering the same subject matter and granted on an application filed more than twelve months prior to the filing of his application in this country, was right, and applicant was not given an extension of six months from November 11, 1921, for filing his application in this country.

Certiorari denied Oct. 19, 1921.

APPEAL from Patent Office. Affirmed.

*Mr. A. D. Lunt, Mr. C. E. Tullar, Mr. Melville Church*, and *Mr. Wm. G. Johnson* for Stoffregen.

*Mr. T. A. Hostetler* for the Commissioner.

Before MARTIN, Chief Justice, and ROBB and VAN ORSDEL, Associate Justices.

ROBB, *J:*

Appeal from concurrent decisions of the Patent Office tribunals refusing to allow appellant's claims

for a patent, on the ground that his application is barred by lapse of time, under section 4887, Revised Statutes, his German patent covering the same subject matter having been granted on an application filed more than twelve months prior to the filing of his application in this country.

The German application was filed October 11, 1915, and a patent issued thereon October 20, 1919. Appellant's present application was filed May 10, 1922, approximately six and one-half years after the filing of the German application. It is conceded that this application is barred by section 4887, Revised Statutes, and was not saved by the Nolan Act of March 3, 1921 (41 Stat. 1313), which expired September 3, 1921. Appellant contends, however, that under the treaty of peace between the United States and Germany on November 11, 1921, the time for filing in this country was extended six months from that date, within which period appellant's application was filed. In other words, it is the contention of appellant that this treaty was self-executory. The Patent Office, on the other hand, insists that the treaty requires legislation to make it effective, so far as it relates to patents.

The Nolan Act in part provided—

> that the rights of priority provided by section 4887 of the Revised Statutes, for the filing of applications for patent for inventions and designs, which rights had not expired on the 1st day of August, 1914, or which rights have arisen since the 1st day of August, 1914, shall be, and the same are hereby, extended until the expiration of a period of six months from the passage of this act in favor of the citizens of the United States or citizens or subjects of all countries which have extended, or which now extend, or which within said period of six months shall extend substantially reciprocal privileges to citizens of the United States, and such extension shall apply to applications upon which patents have been granted, as well as to applications now pending or filed within the period herein.

The object of this statute was to relieve certain applicants whose applications became abandoned during the World War. *Seror and Hoyer* v. *Dick*, No. 1670, present term; 331 O. G. 228. It will be noted that it was all-embracing in its terms, for its privileges are extended to "citizens of the United States or citizens or subjects of *all countries*" which have or within the period specified may extend reciprocal privileges to citizens of the United States.

On July 2, 1921, the state of war between the United States and the Imperial German Government was terminated by joint resolution and a treaty of peace signed in Berlin on August 25th, following. On July 14, 1921, there was published in the Reichs-Gesetzblatt, in Berlin, an act extending such reciprocal privileges to American citizens until September 3, 1921, the date mentioned in the Nolan Act. It thus appears that German citizens received the benefits of the Nolan Act.

That Germany entertains the same view as does our Patent Office regarding the effect of the treaty of peace with the United States, so far as it relates to patents, is evident from the fact that it has accorded no extension to citizens of the United States beyond September 3, 1921, specified in the Nolan Act. In a decision on German Patent No. 259,398, in the annulment department of the German Patent Office, reported in Blatt für Patent-Muster- und Zeichenwesen for March 31, 1923, page 33, it was held that the treaty of peace did not, ipso facto, grant extensions to American citizens. This view was in direct conflict with that urged by appellant here. Although appeal is provided from such a decision to the appeal department and thence to the Reichsgericht, (Supreme Court at Leipzig), apparently no appeal from this decision was prosecuted, so that it may be assumed that the ruling of the patent court was in harmony with the policy of the German Government. Appellant, therefore, is here claiming a privilege not granted to American citizens under German laws, and, so far as appears, not claimed by the nationals of any other country.

Substantially the same question here involved was passed upon by this court in *Rousseau* v. *Brown*, 21 App. D. C. 73. Rousseau, a citizen of France, relied upon an application filed in France prior to the earliest date established by Brown, and claimed this right under the provisions of the International Convention for the Protection of Industrial Property concluded at Paris on March 20, 1883. The United States, although a party to that convention, had enacted no legislation to effectuate its provisions, and this court said:

> The convention is in the nature of a contract between the parties thereto, and is not self-executing. It requires the action of Congress to give it full force and effect. This is the construction that has been placed upon it by most of the parties to it, and they have adopted legislation giving effect to it; • • • But without regard to the action of other states, the uniform construction of that convention by the Patent Office officials, and by the courts of this country, has been that the convention is not self-executing, but requires the aid of an act of Congress.

In *Cameron Septic Tank Co.* v. *Knoxville*, 227 U. S. 39, the Cameron United States application expired on the date of his British patent, unless saved by the treaty of Brussels. The court ruled that this treaty should be construed in accordance with the declarations of Congress and that it was not self-executing. In concluding its opinion the court said:

> If the treaty be construed, as we think it must be construed, in accordance with the declaration of the conference at the instance of the American delegates, it has no application to the Cameron patent. If it be not self-executing, as it is certainly the sense of Congress that it was not and seems also to be the sense of some of the other contracting nations, and as the act of 1903 did not make effective article 4bis, the provisions of sec. 4887 apply to the Cameron patent, and caused it to expire with the British patent for the same invention.

In the present case, it appears that the Congress of the United States, and the Patent Offices of this country and of Germany, have proceeded upon the theory that the treaty relied upon by appellant is not self-executing, and that this theory is consistent with judicial interpretation of similar treaties. We therefore hold that the ruling of the Patent Office was right, and accordingly affirm the decision.

Affirmed.

## Adhesion of Free State of Ireland to International Convention for the Protection of Industrial Property.

U. S. PATENT OFFICE,
*Washington, Dec. 16, 1925.*

The following communication, referred to this Office by the Secretary of Commerce, is published for the information of those concerned.

THOMAS E. ROBERTSON,
*Commissioner.*

DEPARTMENT OF STATE, *Washington, Dec. 8, 1925.*

The honorable the SECRETARY OF COMMERCE.

SIR: I have the honor to inclose for your information and that of the Commissioner of Patents a translation of a note from the Minister of Switzerland concerning the adherence of the Free State of Ireland to the Convention for the Protection of Industrial Property, signed at Paris, March 20, 1883, revised at Brussels on December 14, 1900, and at Washington on June 2, 1911. It will be observed that the Irish Government desire to be put in the third class with regard to its quota in the expenses of the International Bureau, and that the adherence of that Government will take effect on December 4, 1925.

I have the honor to be, sir, your obedient servant,
For the Secretary of State:
LELAND HARRISON,
*Assistant Secretary.*

## ADJUDICATED PATENTS.

(C. C. C. A. N. Y.) The Scott & Williams patent, No. 1,233,714, for seamless stocking having structural variation imitative of seam in full-fashioned stocking *Held* invalid. *Scott & Williams* v. *Aristo Hosiery Co.*, 7 F. (2d) 1003.

## ADVERSE DECISIONS IN INTERFERENCE.

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,500,076, W. E. Holland, Battery plate and process of making same, decided November 21, 1925, claims 1 and 3.

Pat. 1,503,124, J. J. Hoppes, Hydroelectric power plants, decided December 4, 1925, claim 10.

## PATENT SUITS.

## TRADE-MARKS CANCELED.

135,400. Scrim. Boutwell Fairclough & Gold Inc., (now by change of name Fairclough & Gold, Inc.,) Boston, Mass. Registered October 12, 1920. Canceled December 7, 1925.

174,018. Leather preservative. George L. Reish, Mifflinburg, Pa., assignor to Robert V. Foster, Mifflinburg, Pa. Registered October 2, 1923. Canceled November 18, 1925.

178,581. Candy. C. F. Blanke Candy Company, branch of C. F. Blanke Tea & Coffee Company, St. Louis, Mo. Registered January 15, 1924. Canceled December 7, 1925.

189,574. Macaroni. The New Haven Bread Co., New Haven, Conn. Registered September 23, 1924. Canceled December 7, 1925.

195,967. Candy. Chocolate Products Company, Wilmington, Del., and Baltimore, Md. Registered March 3, 1925. Canceled December 7, 1925.

## Changes in Classification.

Order No. 2940, December 11, 1925, provides:

In *class 188, Brakes* (Division 47), establish the following subclass and definition, the patents contained in this subclass having been taken for the most part from class 74, Machine Elements, subclass 118, Cranks and levers, Railway type, Rotating, Locking ratchet:

Wheel
One way
81.1 Brake-staff stops.

81.1. WHEEL, ONE WAY, BRAKE-STAFF STOPS. Stops, usually ratchets, applied to the brake staff to prevent retrograde motion.

In *class 192, Clutches and Power-Stop Control* (Division 47), establish the following subclasses and definitions, the patents contained in subclass .01 having been taken for the most part from class 74, Machine Elements, subclass 107, Combined motor and transmission control, those contained in subclass .02 having been taken from class 172, Electricity, Motive Power, subclass 179, Motors, Hand operating devices, and those contained in subclasses 43.1, 43.2, 45.1, and 45.2 having been taken for the most part from class 74, Machine Elements, subclasses 16, Pawls and ratchets, 53, Intermittent-grip devices, and 54, Intermittent-grip devices, Ratchet:

.01 Motor control and clutch
.02 Electric motor.
Clutches
Automatic
One-way engaging
Reversible
43.1 Pivoted pawls.
43.2 Slidable pawls.
45.1 Wedging pawl or block.
45.2 Two-point gripper.

.01. MOTOR CONTROL AND CLUTCH. Mechanism for the joint control of a motor and clutch.

Note.—Patents showing this combination even though including other controlled devices are placed in this subclass or the subclass indented thereunder and cross-referenced into other subclasses found below in this class.

Note.—For patents showing combined motor control and transmission control see class 74, MACHINE ELEMENTS, subclass 107, Combined motor and transmission control.

.02. MOTOR CONTROL AND CLUTCH, ELECTRIC MOTOR. Where, in the combination as defined in subclass .01, the motor is electric.

Note.—This subclass includes the motor where it is conventional or is broadly claimed.

Search Class—
179—ELECTRICITY, MOTIVE POWER, for patents claiming this combination where the motor is modified to effect its control.

43.1. CLUTCHES, AUTOMATIC, ONE-WAY ENGAGING, REVERSIBLE, PIVOTED PAWLS. A one-way reversible clutch in which the engaging elements are pivoted pawls, each set of pawls comprising a pair of oppositely-directed pivoted pawls, which may be an integral single member.

Search Class—
142—WOODWORKING TOOLS, subclass 72, Bitstocks, Ratchet, Pivoted pawls.

43.2. CLUTCHES, AUTOMATIC, ONE-WAY ENGAGING, REVERSIBLE, SLIDABLE PAWLS. A one-way reversible clutch in which the engaging elements are slidable pawls.

Search Class—
142—WOODWORKING TOOLS, subclasses 73, Bitstocks, Ratchet, Sliding pawls, and 74, Bitstocks, Ratchet, Sliding pawls, Changeable face.

45.1. CLUTCHES, AUTOMATIC, ONE-WAY ENGAGING, WEDGING PAWL OR BLOCK. One-way clutches in which the engaging element is a wedging pawl or block.

45.2. CLUTCHES, AUTOMATIC, ONE-WAY ENGAGING, TWO-POINT GRIPPER. One-way clutches in which the engaging element has a two-point frictional gripping contact.

## Disclaimers.

1,293,855.—*Robert Michle*, Chicago, Ill. COMBINATION TWO-COLOR AND PERFECTOR PRINTING PRESSES. Patent dated February 11, 1919. Disclaimer filed December 5, 1925, by the patentee.

Hereby enters this disclaimer to that part of the claim in said specification which is in the following words, to wit:

*40. A rotary printing press including a printing couple having two cylinders; a driving gear for driving each cylinder; and registering mechanism having an element connected with each of said cylinders, one of said cylinders having a ledge engaging the base of the registering element connected with this cylinder.*

1,488,479.—*Sidney G. Down*, Pittsburgh, Pa. FLUID-PRESSURE BRAKE. Patent dated April 1, 1924. Disclaimer filed December 1, 1925, by the assignee, *The Westinghouse Air Brake Company.*

Hereby enters this disclaimer to the claims of the said Letters Patent, as follows:

*1. In a locomotive brake equipment, the combination with a primary reservoir adapted to be charged with fluid under pressure, a secondary reservoir, and a reducing valve device through which fluid under pressure is supplied at a reduced pressure from the primary reservoir to the secondary reservoir, of a brake pipe and a brake valve device having a release position in which fluid under pressure is supplied from the secondary reservoir to the brake pipe.*

*2. In a locomotive brake equipment, the combination with a reservoir charged with fluid at the pressure normally carried in the brake system, of a brake pipe and a brake valve device having a release position in which fluid under pressure is supplied from said reservoir to the brake pipe.*

*3. The method of controlling the release of fluid pressure brakes which consists in supplying fluid to the brake valve device directly from a reservoir containing fluid at the pressure normally carried in the brake system and in moving the brake valve handle to a position in which fluid is supplied from the reservoir to the brake pipe and then allowing the handle to remain in said position so long as the brakes are released.*

# TRADE-MARKS

OFFICIAL GAZETTE, DECEMBER 29, 1925.

[VOL. 341. No. 5.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

*Particular description of goods.*—Preserved Fruits.

*Claims use* since 1923.

---

Ser. No. 205,122. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) INDUSTRIA MARMELLATE E CONSERVE ALIMENTARI, Voghera, Italy. Filed Nov. 11, 1924.

*Particular description of goods.*—Preserved Fruits.

*Claims use* since 1923.

---

Ser. No. 205,674. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) BARNA COMPANY, INC., New York, N. Y. Filed Nov. 22, 1924.

TWILLS

*Particular description of goods.*—Cakes.

*Claims use* since 1919.

---

Ser. No. 205,887. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) RECORD-O-PHONE COMPANY, Washington, D. C. Filed Nov. 25, 1924.

Applicant disclaims "Radio-Recorder" and "Magnetic Sound Recorder and Producer" and the representation of the goods apart from the mark shown.

*Particular description of goods.*—Machines for Electromagnetically Recording and Reproducing Sound.

*Claims use* since Nov. 19, 1924.

Ser. No. 206,025. (CLASS 16. PAINTS AND PAINTERS' MATERIALS.) PRAGLER-GAULBERT CO., Louisville, Ky. Filed Nov. 29, 1924.

MILITE

*Particular description of goods.*—Ready-Mixed Paints.
*Claims use* since 1919.

Ser. No. 206,487. (CLASS 39. CLOTHING.) LUSTBERG, NAST & CO., New York, N. Y. Filed Dec. 9, 1924.

BUCKSKEIN

*Particular description of goods.*—Dress and Negligee Shirts.
*Claims use* since May 1, 1923.

Ser. No. 206,626. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) LA FRANCE ART COMPANY, Philadelphia, Pa. Filed Dec. 12, 1924.

The exclusive right to the word "La France" is herein disclaimed apart from the mark shown in the drawing, without, however, waiving any common-law rights thereto.

*Particular description of goods.*—Tapestry, Pictures, or Hangings Woven of Textile Fabrics.
*Claims use* since January, 1923.

Ser. No. 206,726. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) WILTON R. DUDLEY, Chicago, Ill. Filed Dec. 15, 1924.

Voltone

*Particular description of goods.*—Audio-Frequency Transformers.
*Claims use* since Oct. 11, 1924.

Ser. No. 208,217. (CLASS 26. MEASURING AND SCIENTIFIC APPLIANCES.) THE C. W. ARCHER SHOE CO., Cincinnati, Ohio. Filed Jan. 17, 1925.

Arch-er-graph

*Particular description of goods.*—Hand Tool Identified as a Tracer for Tracing the Outline of an Object and Principally Used in Tracing the Outline of the Human Foot for Determining Shoe Size.
*Claims use* since Nov. 28, 1924.

Ser. No. 208,479. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) PHARMACIA GYÓGYSZER VEGYÉSZETI GYAR, GYÓGYÁRUNAGYKERESKEDÉS, R. T., Budapest, Hungary. Filed Jan. 22, 1925.

VÉTÓ

*Particular description of goods.*—Liquid Prophylactic Substance Applied Externally for Protection Against Sexual Diseases.
*Claims use* since May 25, 1920.

Ser. No. 208,739. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) AUTOMATIC RADIO CORPORATION OF AMERICA, Wilmington, Del. Filed Jan. 28, 1925.

RADIO AUTOMAT

No claim is made to the word "Radio" apart from the mark as shown.

*Particular description of goods.*—Radio Receiving Sets.
*Claims use* since Jan. 10, 1925.

Ser. No. 209,460. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) THE BRUNSWICK-BALKE-COLLENDER COMPANY, Wilmington, Del., and Chicago, Ill. Filed Feb. 12, 1925. Under section 5b of the act of 1905 as amended in 1920.

Brunswick

*Particular description of goods.*—Radio Products—Namely, Receiving Sets and Parts Thereof, Antennæ, Radio Lightning Arresters, Batteries, Battery Chargers, Battery Switches, Binding Posts, Inductance Coils, Loading Coils, Coil Mounts, Variable Condensers, Fixed Condensers, Galena Crystals, Silicon Crystals, Synthetic Crystals, Crystal Detectors, Dials, Grid Leaks, Grid Condensers, Jacks, Knobs, Loops, Sockets, Transformers, Variocouplers, Variometers, Loud Speakers, Panels of Hard Rubber, Panels of Bakelite, Phones, Potentiometers, Rheostats, Phone Plugs, Rectifiers for Battery Charging, and Loud-Speaker Horns.

Ser. No. 209,725. (CLASS 27. HOROLOGICAL INSTRUMENTS.) THE DUEBER-HAMPDEN WATCH COMPANY, Canton, Ohio. Filed Feb. 17, 1925. Under ten-year proviso.

DUEBER W.C. Co

*Particular description of goods.*—Watchcases.
*Claims use* since July 2, 1894.

Ser. No. 209,990. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) JOSEPH KOLLATH, Schenectady, N. Y. Filed Feb. 21, 1925.

KOLITE

*Particular description of goods.*—Electrical Display Signs, Such as are Used for Outdoor Advertising Purposes.
*Claims use* since June, 1923.

Ser. No. 210,005. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) PARFUMERIE MONPELAS STEINFELS FRÈRES & CO., Vincennes, France. Filed Feb. 21, 1925.

The printed matter, with the exception of the word "Luyna," is disclaimed when used apart from the trade-mark shown.

*Particular description of goods.*—Perfumed Face Powder.
*Claims use* since Sept. 15, 1924.

Ser. No. 210,258. (CLASS 12. CONSTRUCTION MATERIALS.) UNITED MILLS LTD., New Westminster, British Columbia, Canada. Filed Feb. 27, 1925.

No claim is made to the representation of a bundle of shingles or words used therewith as a trade-mark apart from their particular association in the present mark.

*Particular description of goods.*—Wood Shingles.
*Claims use* since Feb. 1, 1925.

Ser. No. 210,397. (CLASS 26. MEASURING AND SCIENTIFIC APPLIANCES.) HARRY D. MORGAN, San Francisco, Calif. Filed Mar. 2, 1925.

NEXT DOSE

*Particular description of goods.*—Dosage Spoons.
*Claims use* since Oct. 15, 1924.

Ser. No. 211,206. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) ALLAN T. HANSCOM, Woonsocket, R. I. Filed Mar. 18, 1925.

SUPERUNIT

No claim is made to "Unit" except in connection with the rest of the mark.

*Particular description of goods.*—Radio Receiving Sets and Parts Thereof.
*Claims use* since Oct. 28, 1924.

Ser. No. 211,351. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) GENERAL MALT SALES CO., Cincinnati, Ohio. Filed Mar. 20, 1925.

*Particular description of goods.*—Malt Sirup and Extract of Barley Malt for Food Purposes.
*Claims use* since Jan. 2, 1925.

Ser. No. 211,423. (CLASS 39. CLOTHING.) OHRBACH'S AFFILIATED STORES INC., New York, N. Y. Filed Mar. 21, 1925.

Ohrbach's

No claim is made to the exclusive use of the surname except in the distinctive presentation shown in the drawing.

*Particular description of goods.*—Ladies' and Misses' Costumes in One, Two, and Three Piece Garments.

*Claims use* since Feb. 11, 1925.

---

Ser. No. 211,642. (CLASS 36. MUSICAL INSTRUMENTS AND SUPPLIES.) WELDA WARE PRODUCTS COMPANY, Erie, Pa., assignor to C. Bruno & Son, New York, N. Y., a Corporation of New York. Filed Mar. 25, 1925.

MAXITONE

*Particular description of goods.*—Resonators for Banjos and Musical Instruments.

*Claims use* since July 24, 1924.

---

Ser. No. 213,098. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) NORTHWESTERN RADIO MFG. COMPANY, Portland, Oreg. Filed Apr. 21, 1925.

NORCO

*Particular description of goods.*—Radio Receiving Sets and Parts Thereof—Namely, Dials, Knobs, Audiotransformers, Radiotransformers, Variometers, Couplers, Sockets, and Speakers.

*Claims use* since Jan. 1, 1924.

Ser. No. 213,114. (CLASS 36. MUSICAL INSTRUMENTS AND SUPPLIES.) AARON BURDWISE, Baltimore, Md. Filed Apr. 22, 1925.

Piano-ette

*Particular description of goods.*—Accordions, Pianos, Zithers, Banjos, Guitars, Mandolins, and Ukuleles.

*Claims use* since Apr. 20, 1924.

---

Ser. No. 213,146. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) RADIUM REMEDIES COMPANY, Helena, Mont. Filed Apr. 22, 1925.

PYRADIUM

*Particular description of goods.*—Preparation for Pyorrhea.

*Claims use* since April, 1923.

---

Ser. No. 213,200. (CLASS 16. PAINTS AND PAINTERS' MATERIALS.) THE SOUDER COMPANY, INC., Ardmore, Pa. Filed Apr. 23, 1925.

SAFE BRAND
THE SOUDER CO. INC.
ARDMORE PA.
TRADE MARK

The words appearing in the drawing, except the word "Safe," are hereby disclaimed except in the form and association shown.

*Particular description of goods.*—Oil Colors, Turkey Red, Lampblack, American Vermillion, Cobalt Blue, Indian Red, Bulletin Red, Drop Black, Bronze Green, Flat Brick Red, Flake White, Metallic Brown, Raw Umber, Umber, Raw Sienna, Burnt Sienna, Rose Pink, Varnish Remover, General-Purpose Varnish, Prepared Shellac, Putty.

*Claims use* since Dec. 1, 1924.

Ser. No. 213,291. (CLASS 50. MERCHANDISE NOT OTHERWISE CLASSIFIED.) FIBROC INSULATION COMPANY, Valparaiso, Ind. Filed Apr. 25, 1925.

Fibroc

*Particular description of goods.*—Composite Material Consisting of Fibrous Material and a Condensation-Product Binder.

*Claims use* since Jan. 21, 1921.

---

Ser. No. 213,665. (CLASS 50. MERCHANDISE NOT OTHERWISE CLASSIFIED.) THE OWENS BOTTLE COMPANY, Toledo, Ohio. Filed May 1, 1925.

SQUARE O SEALS

Applicant makes no claim to the words "Square Seals" apart from the mark shown on the drawing.

*Particular description of goods.*—Caps or Closure Devices for Bottles and Other Containers.

*Claims use* since Mar. 31, 1924.

---

Ser. No. 213,709. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) EDWARD M. HILL, doing business as Edward M. Hill & Co., New York, N. Y. Filed May 2, 1925.

Turkish Maid

*Particular description of goods.*—Turkish Towels, Terry Cloths, Turkish Face Cloths, Turkish Bath Mats, Turkish Bath Sheets, Terry Robings, and All Terry Piece Goods.

*Claims use* since Mar. 16, 1925.

---

Ser. No. 213,722. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) NATIONAL PNEUMATIC COMPANY, New York, N. Y. Filed May 2, 1925.

NP

*Particular description of goods.*—Electrical Safety Signaling Lights and Systems of Lights and Semaphores, Electrical Door Motors, Electrical Control Apparatus for Door Operation, Electrical Control Apparatus for Door and Step Operation, Electrical Step-Operating Motors.

*Claims use* since Jan. 1, 1925.

Ser. No. 214,588. (CLASS 34. HEATING, LIGHTING, AND VENTILATING APPARATUS, NOT INCLUDING ELECTRICAL APPARATUS.) DOROTHY W. DAY, Chicago, Ill. Filed May 20, 1925.

HUMIDAIR

*Particular description of goods.*—Radiator Cupboards and Radiator Closets.

*Claims use* since Apr. 15, 1925.

---

Ser. No. 215,226. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) THE WRIGHT CORPORATION, San Francisco, Calif. Filed June 2, 1925.

The surname "Wright" and the descriptive notations "Grown," "Selected," "Packed," and "Quality" are herewith disclaimed apart from other features of the trademark.

*Particular description of goods.*—Fresh Asparagus.

*Claims use* since Mar. 1, 1925.

---

Ser. No. 215,693. (CLASS 28. JEWELRY AND PRECIOUS-METAL WARE.) THE HOMAN MANUFACTURING COMPANY, Cincinnati, Ohio. Filed June 12, 1925.

SANI-TITE

*Particular description of goods.*—Silver-Plated Bottle-Shaped Cocktail Shakers and Beverage Mixers.

*Claims use* since Oct. 10, 1924.

Ser. No. 215,713. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) J. L. STIFEL & SONS, Wheeling, W. Va. Filed June 12, 1925.

STIFEL

*Particular description of goods.*—Cotton Piece Goods.
*Claims use* since October, 1924.

Ser. No. 215,760. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) J. L. STIFEL & SONS, Wheeling, W. Va. Filed June 13, 1925.

J. L. STIFEL & SONS
TELA DE
STIFEL
STIFEL
CON
LA BOTA
WHEELING, W. VA. U. S. A.

No claim is made to the descriptive or geographical words or abbreviations shown in the drawing except in association with the other features of the mark, without, however, waiving any common-law right to the use of the same to form the complete mark.
*Particular description of goods.*—Cotton Piece Goods.
*Claims use* since Apr. 24, 1924.

Ser. No. 215,989. (CLASS 4. ABRASIVE, DETERGENT, AND POLISHING MATERIALS.) LENTHERIC, INC., New York, N. Y. Filed June 18, 1925.

AMBRE MOUSSE

No claim is made to the exclusive right to the use of the words in any combination other than the combination "Ambre Mousse."
*Particular description of goods.*—Toilet Soap.
*Claims use* since Mar. 1, 1925.

Ser. No. 216,000. (CLASS 19. VEHICLES, NOT INCLUDING ENGINES.) TYREE AUTO RADIATOR MFG. CO., Chicago, Ill. Filed June 18, 1925.

BALLOON
AUTOMOBILE
CORES AND RADIATORS

No claim is made to the words "Automobile Cores and Radiators" or "Above All in Value" or to the representation of a radiator when used apart from the remainder of the mark.
*Particular description of goods.*—Automobile Radiators and Radiator Cores.
*Claims use* since about Oct. 1, 1924.

Ser. No. 216,047. (CLASS 39. CLOTHING.) THE ISBELL-KENT-OAKES DRY GOODS COMPANY, Denver, Colo. Filed June 19, 1925.

BELKO
BRAND

Applicant disclaims exclusive use of the words "Brand" and "Trade-Mark" apart from the mark shown.

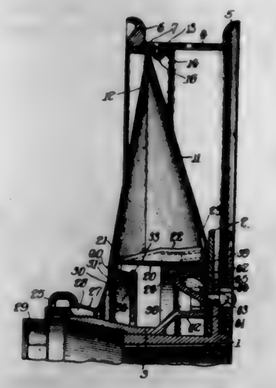
# REISSUES

## DECEMBER 29, 1925.

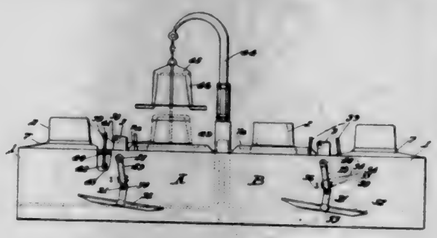
16,235. TENSION-PLATE WHEEL. WILLIAM ERASTUS WILLIAMS, Wilmette, Ill., assignor, by mesne assignments, to Steel Wheel Corporation, Lansing, Mich., a Corporation of Michigan. Filed Feb. 27, 1923. Serial No. 621,682. Original No. 1,398,615, dated Nov. 29, 1921, Serial No. 350,108, filed Jan. 8, 1920. 16 Claims. (Cl. 301—63.)



1. The combination with a rim and a hub barrel of two discs secured to the rim and having their hub zones forced laterally into and closely fitting the interior of the opposite ends of the hub, respectively, and corresponding clamping rings pressed into and permanently fixed in the in-bent portions of the disks.

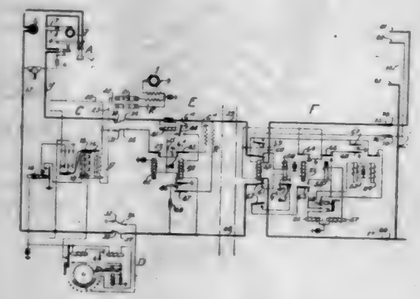
---

16,236. WIRE-DRAWING MACHINE. FRED B. CROSBY, Worcester, Mass., assignor to Morgan Construction Company, Worcester, Mass., a Corporation of Massachusetts. Filed Aug. 7, 1925. Serial No. 48,907. Original No. 1,482,348, dated Jan. 29, 1924, Serial No. 401,840, filed Aug. 7, 1920. 19 Claims. (Cl. 205—16.)



15. In wire drawing apparatus of the class described, a pair of blocks, a die located therebetween, and means selectively operable to impart rotation to either of said blocks, thereby to draw wire through said die in either direction.

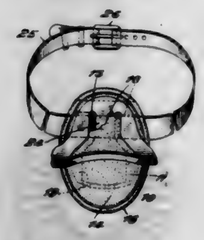
16,237. SPECIAL SERVICE TRUNK FOR AUTOMATIC TELEPHONE SYSTEMS. TALBOT G. MARTIN, Chicago, Ill., assignor to Automatic Electric Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 30, 1924. Serial No. 710,178. Original No. 1,415,001, dated May 2, 1922, Serial No. 179,310, filed July 9, 1917. 26 Claims. (Cl. 179—27.)



1. In a telephone system comprising a main exchange and a sub-exchange, the combination with subscribers' line in the sub-exchange classified in accordance with the kind of service to which they are entitled, of an operator's position, means including an automatic switch in each exchange for extending a talking circuit from a calling line in the sub-exchange to the said operator's positions, and automatic means controlled by the operator for connecting a distinctive tone to said talking circuit for informing the operator of the class to which the calling subscriber belongs.

---

16,238. GUN REST FOR SPORTSMEN. GEORGE THOMPSON, New York, N. Y. Filed Aug. 28, 1924. Serial No. 734,808. Original No. 1,469,285, dated Oct. 2, 1923, Serial No. 594,426, filed Oct. 14, 1922. 9 Claims. (Cl. 224—1.)

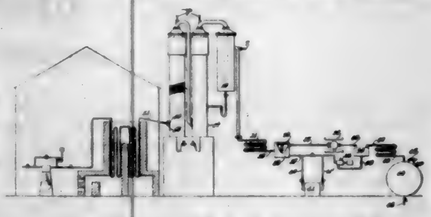


9. A gun rest adapted for quick attachment to or detachment from the clothing of the wearer, comprising a curved seat for supporting the gun, a substantially ver-

tical hook portion for attaching the rest to the belt or clothing of the user, and means forming part of the said hook portion to prevent accidental displacement of the rest from the clothing when the gun is removed therefrom.

16,239. PROCESS OF MAKING MOTOR FUEL. LUIS DE FLOREZ, Pomfret, Conn., assignor, by mesne assignments, to The Texas Company, a Corporation of Texas. Filed Oct. 10, 1924. Serial No. 742,925. Original application filed Dec. 4, 1917, Serial No. 205,290. Renewed June 29, 1922, Serial No. 571,768. Original No. 1,437,045, dated Nov. 28, 1922. 11 Claims. (Cl. 196—12.)

1. A process of making motor fuel which comprises (*a*) cracking under a superatmospheric pressure of several atmospheres and at an elevated temperature, a flowing current of hydrocarbon material containing fractions not sufficiently volatile to serve as constituents of motor fuel, (*b*) removing from the gases and vapors substantially the entire amount of those fractions having boiling points above about 200° C., while at a pressure below that used in the cracking operation, and while leaving in the vapor state, substantially the entire amount of material volatile at such temperature, (*c*) cooling the remaining mixture of gases and vapors to about atmospheric

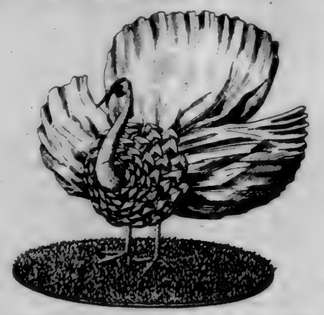


temperature, to condense the major portion of the vapors as a light liquid, (*d*) compressing the remaining gases to a pressure not over about ten atmospheres, (*e*) and absorbing the same in said light liquid while under approximately that pressure.

# DESIGNS

## DECEMBER 29, 1925.

69,106. TABLE ORNAMENT. FLOSSIE G. ALLEBAUGH, Nederland, Colo. Filed Mar. 28, 1925. Serial No. 12,941. Term of patent 3½ years.

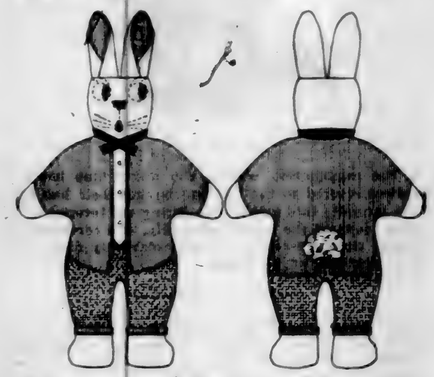


The ornamental design for a table ornament as shown.

69,107. REFLECTOR FOR USE IN LIGHTING FIXTURES. WILLIAM T. BLACKWELL, Westfield, N. J. Filed Apr. 4, 1925. Serial No. 13,019. Term of patent 7 years.

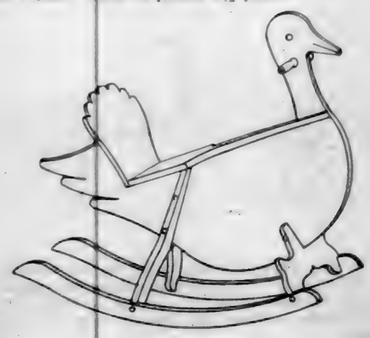
The ornamental design for a reflector for use in lighting fixtures, as shown.

69,108. RABBIT DOLL. NELLIE BLOOM, Bridgewater, Iowa. Filed July 28, 1925. Serial No. 14,242. Term of patent 7 years.



The ornamental design for a rabbit doll, as shown.

69,109. CHILD'S ROCKER. FRANK BRAUN and DWIGHT KIMBLE, Decatur, Ind. Filed Sept. 23, 1925. Serial No. 14,885. Term of patent 3½ years.



The ornamental design for a child's rocker, as shown.

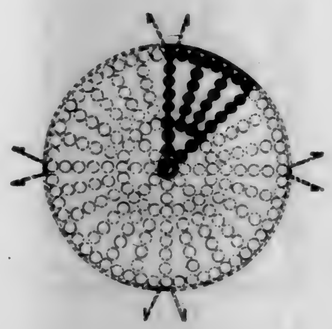
69,110. ATOMIZER NOZZLE. HENRY L. BRUEN, Orange, N. J., and EDWIN B. GROSS, Thomaston, Conn. Filed June 29, 1923. Serial No. 6,623. Term of patent 3½ years.

The ornamental design for an atomizer nozzle as shown.

69,111. WALL PAPER. CHARLES E. BURCHFIELD, Buffalo, N. Y., assignor to M. H. Birge & Sons Co., Buffalo, N. Y. Filed Sept. 4, 1925. Serial No. 14,710. Term of patent 3½ years.

The ornamental design for wall paper, as shown.

69,112. ORNAMENT FOR THE BELL OF A HORN. HARRY L. BUSKEY, Arcadia, Fla. Filed Aug. 21, 1925. Serial No. 14,549. Term of patent 3½ years.



The ornamental design for an ornament for the bell of a horn, as shown.

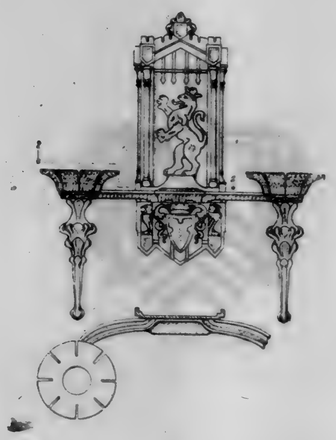
69,113. BADGE. EMILY H. BUTTERFIELD, Farmington, Mich., assignor to Theta Kappa Nu Fraternity, Springfield, Mo., a Corporation of Missouri. Filed June 24, 1925. Serial No. 13,870. Term of patent 14 years.

The ornamental design for a badge, as shown.

69,114. LAMP. PAUL CRICCHIO, New York, N. Y., assignor to Merit Lamp & Novelty Co., New York, N. Y., a Firm composed of Sidney Biahousze and Stanley Pomyzalski, both of New York, N. Y. Filed Oct. 28, 1925. Serial No. 15,281. Term of patent 3½ years.

The ornamental design for a lamp as shown.

69,115. LIGHTING FIXTURE. STANLEY CRAPSE, Detroit, Mich., assignor to Radiant Specialty Co., a Corporation of Michigan. Filed Oct. 31, 1925. Serial No. 15,311. Term of patent 3½ years.

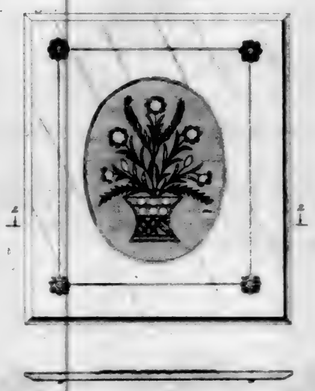


The ornamental design for a lighting fixture, as shown.

69,116. GLASS-TUMBLER HOLDER. BOLESLAW V. CZARNECKI, Schenectady, N. Y. Filed Mar. 11, 1922. Serial No. 1,115. Term of patent 3½ years.

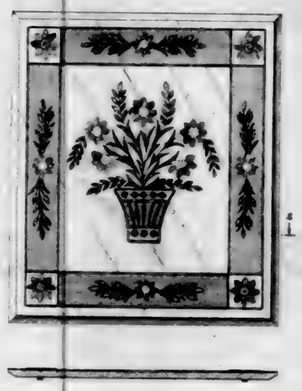
The ornamental design for glass tumbler holder.

69,117. MIRROR. ANDREW D'ARINO and MURRAY ALSOFROM, New York, N. Y. Filed Sept. 12, 1925. Serial No. 14,771. Term of patent 7 years.



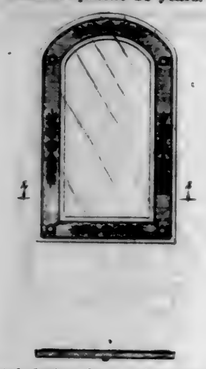
The ornamental design for a mirror as shown.

69,118. MIRROR. ANDREW D'ARINO and MURRAY ALSOFROM, New York, N. Y. Filed Sept. 12, 1925. Serial No. 14,772. Term of patent 14 years.



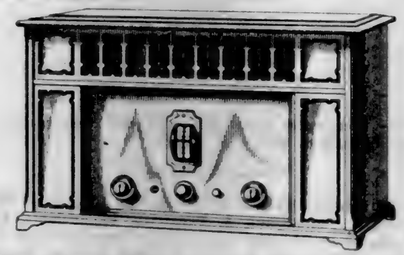
The ornamental design for a mirror as shown.

69,119. MIRROR. ANDREW D'ARINO and MURRAY ALSOFROM, New York, N. Y. Filed Sept. 12, 1925. Serial No. 14,773. Term of patent 14 years.



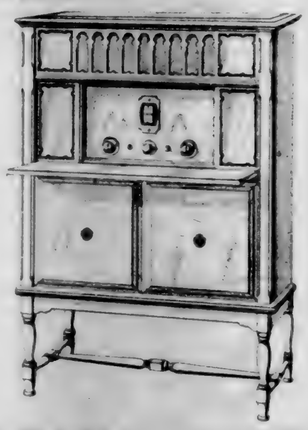
The ornamental design for a mirror as shown.

69,120. RADIOCABINET. ROBERT C. EDWARDS, New York, N. Y., assignor to Federal Telegraph Company, San Francisco, Calif., a Corporation of California. Filed Aug. 24, 1925. Serial No. 14,574. Term of patent 3½ years.



The ornamental design for a radiocabinet substantially as shown.

69,121. RADIOCABINET. ROBERT C. EDWARDS, New York, N. Y., assignor to Federal Telegraph Company, San Francisco, Calif., a Corporation of California. Filed Aug. 24, 1925. Serial No. 14,575. Term of patent 3½ years.

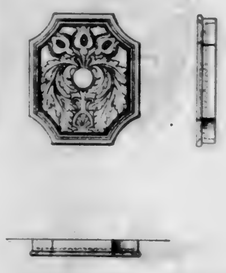


The ornamental design for a radiocabinet substantially as shown.

69,122. BRACKET WALL PLATE. FREDERICK A. FREICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Inc., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 27, 1925. Serial No. 12,898. Term of patent 7 years.

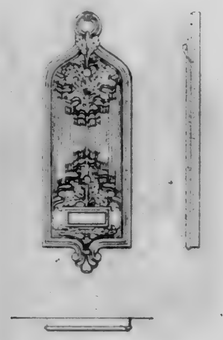
The ornamental design for a bracket wall plate for lighting fixtures, as shown.

69,123. BRACKET WALL PLATE FOR LIGHTING FIXTURES. FREDERICK A. FREICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Inc., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 1, 1925. Serial No. 12,899. Term of patent 7 years.



The ornamental design for a bracket wall plate for lighting fixtures, as shown.

69,124. BRACKET WALL PLATE FOR LIGHTING FIXTURES. FREDERICK A. FREIICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Inc., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 27, 1925. Serial No. 12,900. Term of patent 7 years.



The ornamental design for a bracket wall plate for lighting fixtures, as shown.

69,125. BRACKET WALL PLATE FOR LIGHTING FIXTURES. FREDERICK A. FREIICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Inc., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 27, 1925. Serial No. 12,901. Term of patent 7 years.

The ornamental design for a bracket wall plate for lighting fixtures, as shown.

69,126. BRACKET WALL PLATE FOR LIGHTING FIXTURES. FREDERICK A. FREIICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Inc., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 27, 1925. Serial No. 12,903. Term of patent 7 years.

The ornamental design for a bracket wall plate for lighting fixtures, as shown.

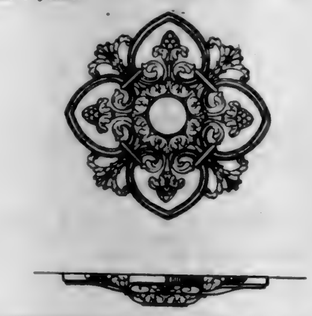
69,127. BRACKET WALL PLATE FOR LIGHTING FIXTURES. FREDERICK A. FREIICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Inc., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 27, 1925. Serial No. 12,904. Term of patent 7 years.

The ornamental design for a bracket wall plate for lighting fixtures, as shown.

69,128. BRACKET WALL PLATE FOR LIGHTING FIXTURES. FREDERICK A. FREIICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Inc., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 27, 1925. Serial No. 12,905. Term of patent 7 years.

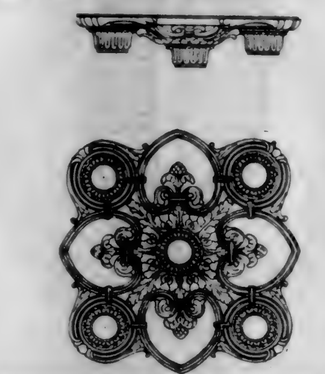
The ornamental design for a bracket wall plate for lighting fixtures, as shown.

69,129. CEILING PLATE FOR LIGHTING FIXTURES. FREDERICK A. FREIICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Inc., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 27, 1925. Serial No. 12,906. Term of patent 7 years.



The ornamental design for a ceiling plate for lighting fixtures as shown.

69,130. CEILING PLATE FOR LIGHTING FIXTURES. FREDERICK A. FREIICHS, Philadelphia, Pa., assignor to The Horn & Brannen Manufacturing Co., Inc., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 27, 1925. Serial No. 12,907. Term of patent 7 years.



The ornamental design for a ceiling plate for lighting fixtures, as shown.

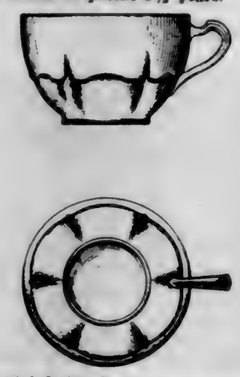
69,131. LIGHTING FIXTURE. JOSEPH W. GOSLING, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Oct. 15, 1925. Serial No. 15,138. Term of patent 14 years.

The ornamental design for a lighting fixture as shown.

69,132. LANTERN. JOSEPH W. GOSLING, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Oct. 15, 1925. Serial No. 15,139. Term of patent 14 years.

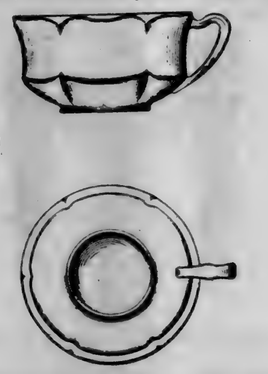
The ornamental design for a lantern as shown.

69,133. CUP OR SIMILAR ARTICLE. GEORGE HAVILAND, Limoges, France. Filed Nov. 4, 1925. Serial No. 15,344. Term of patent 3½ years.



The ornamental design for a cup or similar article, as shown.

69,134. CUP OR SIMILAR ARTICLE. GEORGE HAVILAND, Limoges, France. Filed Nov. 4, 1925. Serial No. 15,345. Term of patent 3½ years.



The ornamental design for a cup or similar article, as shown.

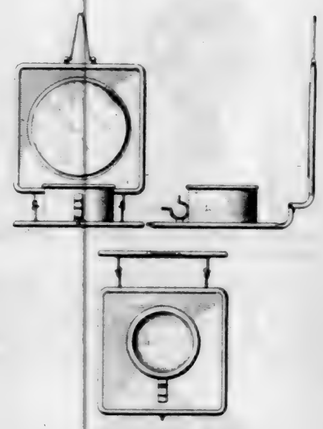
69,135. RUG. HARRY S. HUMPHREYS, Lancaster, Pa., assignor to Armstrong Cork Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Jan. 23, 1925. Serial No. 12,120. Term of patent 7 years.

The ornamental design for a rug, as shown.

69,136. RUG. CHARLES F. HUMPHREYS, Lancaster, Pa., assignor to Armstrong Cork Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Jan. 23, 1925. Serial No. 12,123. Term of patent 7 years.

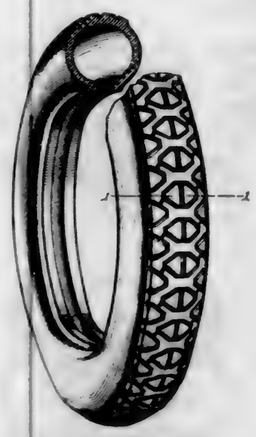
The ornamental design for a rug, as shown.

69,137. COMBINED MIRROR, SOAP RECEPTACLE AND BRUSH HOLDER. LEW JOSEPH, New York, N. Y. Filed Oct. 20, 1925. Serial No. 15,200. Term of patent 3½ years.



The ornamental design for a combined mirror, soap receptacle, and brush holder, as shown in the accompanying drawing.

69,138. AUTOMOBILE TIRE. ROBERT H. KEATON, San Francisco, Calif. Filed May 10, 1924. Serial No. 9,552. Term of patent 3½ years.



The ornamental design for an automobile tire, substantially as shown.

69,139. BADGE. JOHN W. KNOCH, Philadelphia, Pa., assignor to Federation of College Catholic Clubs, Philadelphia, Pa., a Fraternity. Filed July 24, 1925. Serial No. 14,199. Term of patent 14 years.

The ornamental design for a badge, as shown.

69,140. CANDLESTICK. MAX KLEIN, New York, N. Y., assignor to Shapiro & Aronson, Inc., a Corporation of New York. Filed Jan. 25, 1924. Serial No. 8,413. Term of patent 3½ years.

The ornamental design for a candlestick as shown.

69,141. PLATE OR SIMILAR ARTICLE OF MANUFACTURE. AUGUSTUS J. KOCH, Syracuse, N. Y., assignor to New York Central Railroad Company, New York, N. Y., a Corporation of New York. Filed June 8, 1925. Serial No. 13,698. Term of patent 14 years.

The ornamental design for a plate or similar article of manufacture, substantially as shown.

69,142. GLASS BOX OR SIMILAR ARTICLE. RENÉ LALIQUE, Paris, France. Filed Apr. 24, 1923. Serial No. 5,923. Term of patent 3½ years.

The ornamental design for a glass box or similar article, as shown.

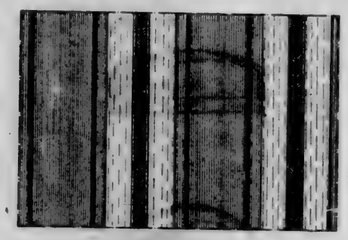
69,143. CANDLEHOLDER. LULU VERHOREN LAVELL, Minneapolis, Minn. Filed May 11, 1925. Serial No. 13,410. Term of patent 3½ years.

The ornamental design for a candleholder as shown.

69,144. DOLL. WILLIAM B. LILLARD, Jackson, Tenn. Filed Sept. 26, 1925. Serial No. 14,916. Term of patent 7 years.

The ornamental design for a doll, substantially as shown.

69,145. TEXTILE FABRIC. JOSEPH H. MACK, Passaic, N. J. Filed July 23, 1925. Serial No. 14,196. Term of patent 3½ years.



The ornamental design for a textile fabric, as shown.

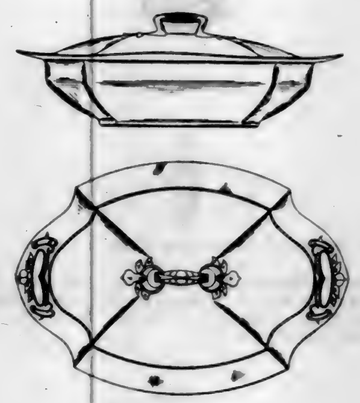
69,146. ROAD SIGN. SAVERIO DI MAGNO, Swatara Station, Pa. Filed Oct. 16, 1925. Serial No. 15,151. Term of patent 14 years.

The ornamental design for a road sign, as shown.

69,147. PLATE OR SIMILAR ARTICLE OF MANUFACTURE. CHARLES McKAIG, Syracuse, N. Y., assignor to United Hotels Company, New York, N. Y., a Corporation of Delaware. Filed June 8, 1925. Serial No. 13,699. Term of patent 14 years.

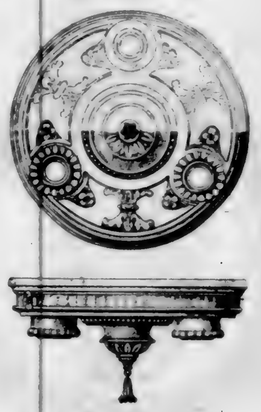
The ornamental design for a plate, or similar article of manufacture, substantially as shown.

69,148. COVERED DISH. THOMAS CLEMENT MERRIMAN, Tunstall, England, assignor to William S. Pitcairn Corporation, New York, N. Y., a Corporation of New York. Filed Sept. 22, 1925. Serial No. 14,846. Term of patent 3½ years.



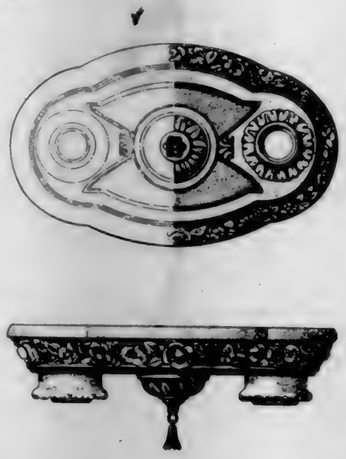
The ornamental design for a covered dish as shown.

69,149. LIGHTING FIXTURE. LOUIS MICHELOTTI, Philadelphia, Pa., assignor of one-half to Samuel Uhr and Samuel J. Pariser, Philadelphia, Pa., Copartners trading as Advance Electric Lighting Fixture Manufacturing Company, and one-half to Louis Michelotti and Saull Marcheni, Philadelphia, Pa., Copartners trading as Philadelphia Ornamental Lamp Company. Filed June 19, 1925. Serial No. 13,820. Term of patent 3½ years.



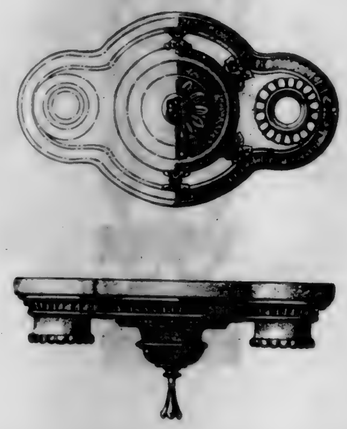
The ornamental design for a lighting fixture, as shown.

69,150. LIGHTING FIXTURE. LOUIS MICHELOTTI, Philadelphia, Pa., assignor of one-half to Samuel Uhr and Samuel J. Pariser, Philadelphia, Pa., Copartners trading as Advance Electric Lighting Fixture Manufacturing Company, and one-half to Louis Michelotti and Saull Marcheni, Philadelphia, Pa., Copartners trading as Philadelphia Ornamental Lamp Company. Filed June 19, 1925. Serial No. 13,821. Term of patent 3½ years.



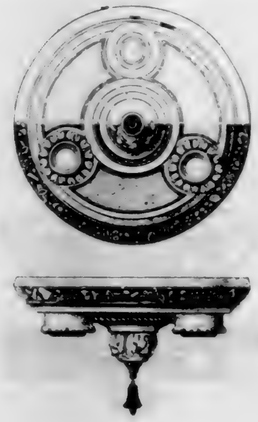
The ornamental design for a lighting fixture, as shown.

69,151. LIGHTING FIXTURE. LOUIS MICHELOTTI, Philadelphia, Pa., assignor of one-half to Samuel Uhr and Samuel J. Pariser, Philadelphia, Pa., Copartners trading as Advance Electric Lighting Fixture Manufacturing Company, and one-half to Louis Michelotti and Saull Marcheni, Philadelphia, Pa., Copartners trading as Philadelphia Ornamental Lamp Company. Filed June 19, 1925. Serial No. 13,822. Term of patent 3½ years.



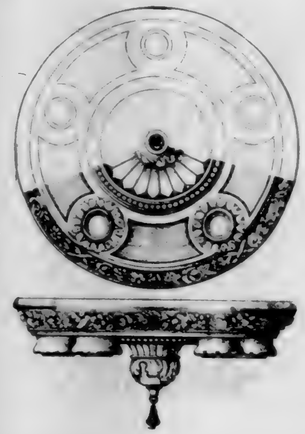
The ornamental design for a lighting fixture, as shown.

69,152. LIGHTING FIXTURE. LOUIS MICHELOTTI, Philadelphia, Pa., assignor of one-half to Samuel Uhr and Samuel J. Pariser, Philadelphia, Pa., Copartners trading as Advance Electric Lighting Fixture Manufacturing Company, and one-half to Louis Michelotti and Saull Marcheni, Philadelphia, Pa., Copartners trading as Philadelphia Ornamental Lamp Company. Filed June 19, 1925. Serial No. 13,823. Term of patent 3½ years.



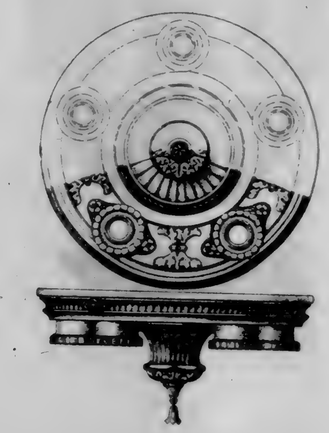
The ornamental design for a lighting fixture, as shown.

69,153. LIGHTING FIXTURE. LOUIS MICHELOTTI, Philadelphia, Pa., assignor of one-half to Samuel Uhr and Samuel J. Pariser, Philadelphia, Pa., Copartners trading as Advance Electric Lighting Fixture Manufacturing Company, and one-half to Louis Michelotti and Saull Marcheni, Philadelphia, Pa., Copartners trading as Philadelphia Ornamental Lamp Company. Filed June 19, 1925. Serial No. 13,824. Term of patent 3½ years.



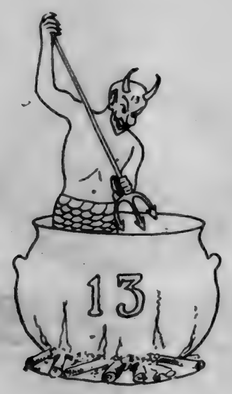
The ornamental design for a lighting fixture, as shown.

69,154. LIGHTING FIXTURE. LOUIS MICHELOTTI, Philadelphia, Pa., assignor of one-half to Samuel Uhr and Samuel J. Pariser, Philadelphia, Pa., Copartners trading as Advance Electric Lighting Fixture Manufacturing Company, and one-half to Louis Michelotti and Saull Marcheni, Philadelphia, Pa., Copartners trading as Philadelphia Ornamental Lamp Company. Filed June 19, 1925. Serial No. 13,825. Term of patent 3½ years.



The ornamental design for a lighting fixture, as shown.

69,155. INCENSE BURNER. PAUL CHARLES MORRIS, Youngstown, Ohio. Filed Nov. 24, 1924. Serial No. 11,457. Term of patent 3½ years.

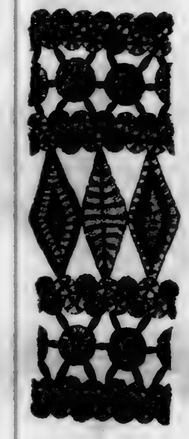


The ornamental design for an incense burner, as shown.

69,156. STAND LAMP. EDWARD CARL NYQUIST, Chicago, Ill. Filed Oct. 19, 1925. Serial No. 15,165. Term of patent 7 years.

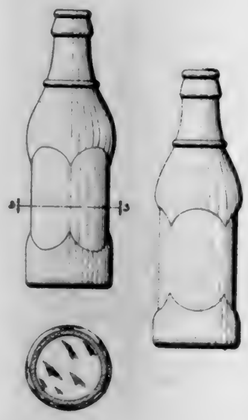
The ornamental design for a stand lamp, as shown.

69,157. EMBROIDERED LACE. ELIZABETH A. DAVIS PRESS, White Plains, N. Y., assignor to Blanck & Co., Inc., New York, N. Y. Filed June 12, 1925. Serial No. 13,752. Term of patent 3½ years.



The ornamental design for embroidered lace, as shown.

69,158. BOTTLE. CHAPMAN J. ROOT, Terre Haute, Ind. Filed Jan. 24, 1925. Serial No. 12,135. Term of patent 14 years.



The ornamental design for a bottle as shown and described.

69,159. PLATE OR SIMILAR ARTICLE. EMIL L. SCHNEFF, Trenton, N. J., assignor to Scammell China Company, Trenton, N. J. Filed July 18, 1925. Serial No. 14,134. Term of patent 14 years.

The ornamental design for a plate or similar article as shown.

69,160. BOTTLE. FREDERICK W. SCHWENCK, Cincinnati, Ohio. Filed Oct. 13, 1925. Serial No. 15,111. Term of patent 3½ years.

The ornamental design for a bottle, as shown.

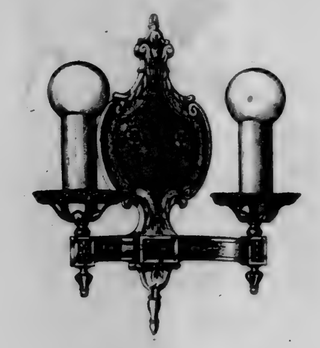
69,161. WIND NOVELTY. WALTER B. SCOTT, Marblehead, Mass. Filed June 15, 1925. Serial No. 13,785. Term of patent 7 years.

The ornamental design for a wind novelty, as shown.

69,162. ARM FOR ELECTRIC CHANDELIERS. ALFRED P. SEIDELL, Bloomfield, N. J., assignor to Orange Lighting Fixture Manufacturing Company, Orange, N. J., a Corporation of New Jersey. Filed Aug. 8, 1925. Serial No. 14,346. Term of patent 3½ years.

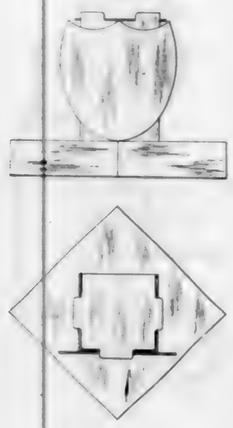
The ornamental design for an arm for electric chandeliers, as shown.

69,163. WALL BRACKET FOR LIGHTING FIXTURES. ALFRED P. SEIDELL, Bloomfield, N. J., assignor to Orange Lighting Fixture Manufacturing Company, Orange, N. J., a Corporation of New Jersey. Filed Aug. 8, 1925. Serial No. 14,347. Term of patent 3½ years.



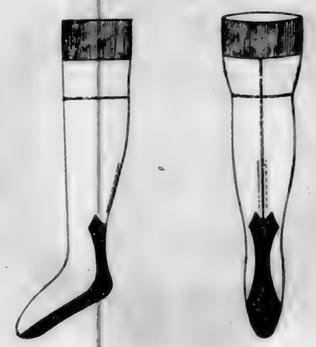
The ornamental design for a wall bracket for lighting fixtures, as shown.

69,164. DISPLAY STAND. DAVID M. SINGER, Chicago, Ill. Filed July 24, 1924. Serial No. 10,246. Term of patent 3½ years.



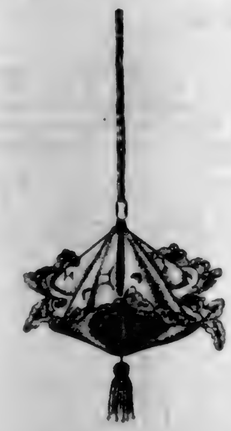
The ornamental design for a display stand, as shown.

69,165. STOCKING. ELMER L. SMITH, Mack, Colo. Filed June 15, 1925. Serial No. 13,784. Term of patent 14 years.



The ornamental design for a stocking, as shown.

69,166. HAND BAG. JULIUS STEINER, West New York, N. J., assignor of one-half to R. Dalia Rovere, a Partnership, Woodcliff, N. J., composed of Richard Dalia Rovere and Alfred Pretrobelli. Filed Nov. 7, 1925. Serial No. 15,377. Term of patent 3½ years.

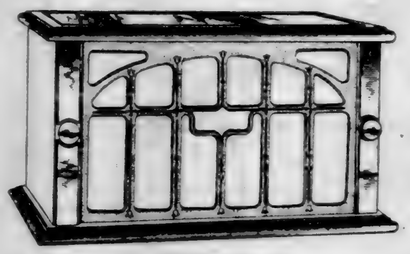


The ornamental design for a hand-bag as shown.

69,167. CAPE. ALICE ELAINE WAREMAN, New York, N. Y. Filed Oct. 9, 1925. Serial No. 15,075. Term of patent 3½ years.

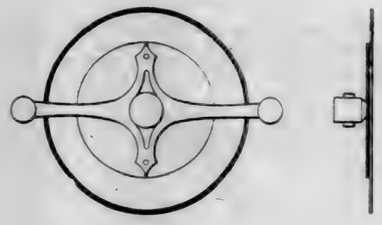
The ornamental design for a cape, as shown.

69,168. CABINET FOR RADIO LOUD SPEAKER. ELMER H. WILKINSON, Detroit, Mich., assignor to The Jewett Radio and Phonograph Company, Pontiac, Mich., a Corporation of Michigan. Filed July 6, 1925. Serial No. 14,004. Term of patent 3½ years.



The ornamental design for a cabinet for radio loud speaker as shown.

69,169. COMBINED RADIO CONTROL LEVER AND DIAL. HENRY F. WORNER, Philadelphia, Pa. Filed Aug. 21, 1924. Serial No. 10,511. Term of patent 14 years.



The ornamental design for a combined radio control lever and dial, as shown.

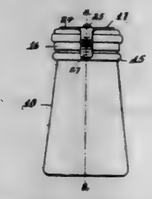
# PATENTS

## GRANTED DECEMBER 29, 1925.

1,567,025. AUTOMOBILE TIRE TOOL. OLIVER JOHN ALLISON, New Orleans, La. Filed Apr. 20, 1925. Serial No. 24,702. 1 Claim. (Cl. 157—6.)

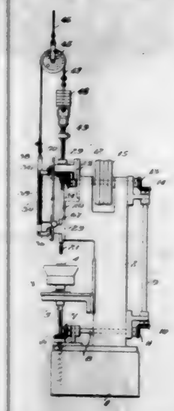
A tire tool having a substantially straight shank, said shank at one end being provided with an extension which as a whole describes a curve of about one-fourth of a circle, said extension on the outside of the curve at about the middle thereof having a sharply backturned hook adapted to engage a tire-retaining flange of a rim and suspend the shank radially of the rim, the further extension of said curve beyond said hook being slightly recurved in the opposite direction and being sufficient in extent to span the inside width of a complete tire so as to engage under both flanges of the tire and lift the same onto a rim and then engage substantially the height of the tire and push the same bodily laterally of the rim.

1,567,026. SALT AND PEPPER SHAKER. MAURICE M. BALSAM, Brooklyn, N. Y., assignor of one-half to Samuel Herman, New York, N. Y. Filed Apr. 1, 1925. Serial No. 19,791. 1 Claim. (Cl. 65—45.)



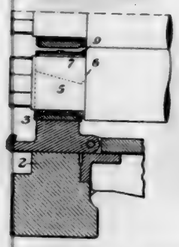
The combined salt and pepper shaker described, comprising a body with a neck thereon and an exterior swell and a partition dividing the interior of said body and neck into two compartments, a cap received on said neck and having the inner face of its top disposed to lie closely upon the upper edges of said neck and partition, said top having two groups of holes each group communicating with one of said compartments, means for joining said cap to said neck and compressing said top upon said edges, a disk slidably mounted on the upper face of said top and having slots, headed studs on said top received in such slots, said disk having two groups of perforations arranged to register alternately with said groups of holes, and a downwardly extended spring finger formed integrally with said disk, and in longitudinal alignment with said slots and having its lower end free and outwardly curved and arranged to coact with an adjacent surface of said swell of said body and hold said disk normally with one group of its perforations in register with one of said groups of holes and to close the other group of holes, and by pressure thereon to shift said disk to interrupt such registry and establish registration of the other of said groups of holes and perforations.

1,567,027. INSULATOR-THREADING MACHINE. CORNELIUS VAN DUKE BENNETT, Lima, N. Y., assignor to The Porcelain Insulator Corporation, Lima, N. Y., a Corporation of New York. Filed Oct. 10, 1923. Serial No. 667,761. 14 Claims. (Cl. 25—3.)



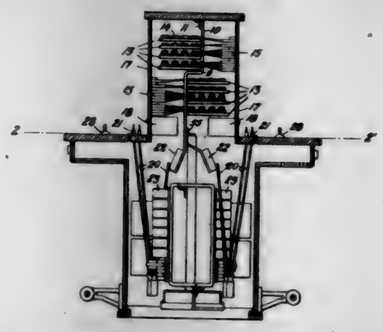
1. In an insulator threading machine, the combination with a threading tool movable in a plane vertically and horizontally at a right angle to its vertical travel, of means for effecting such horizontal movement, said means being automatically brought into operation at a predetermined point in the vertical travel of the threading tool.

1,567,028. SCALE GUARD. FLORENCE C. BIGGERT, Jr., Pittsburgh, Pa., assignor to United Engineering & Foundry Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Jan. 6, 1925. Serial No. 927. 7 Claims. (Cl. 80—1.)



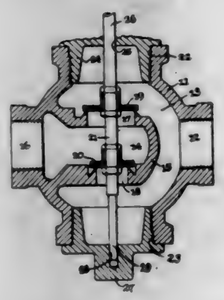
7. In a mill, a bearing having longitudinally inclined upper edges, and a scale guard cooperating with said inclined edges and movable thereon, said guard also having longitudinally inclined supporting edges co-operating therewith, substantially as described.

1,567,029. TELEPHONE SWITCHBOARD. CHARLES BORGMANN, Great Neck, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed May 1, 1924. Serial No. 710,473. 4 Claims. (Cl. 179—91.)



1. A double-sided switchboard comprising two oppositely situated operators' positions, said positions having substantially identical faces and desks, equipment for each of said positions being staggered with respect to the equipment of the other, said equipment being so disposed within the space between said positions that the wiring for the equipment of each of said positions is located adjacent to the equipment of the other position.

1,567,030. VALVE. CHARLES L. BRYANT, Cleveland, Ohio. Filed Aug. 25, 1924. Serial No. 734,042. 3 Claims. (Cl. 251—156.)



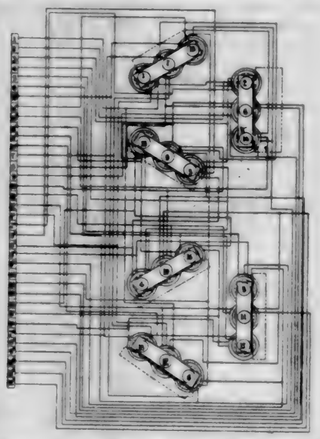
1. A valve assembly comprising a valve casing having an inlet and an outlet and a valve seat and two openings disposed in opposite directions from said valve seat, a valve adapted to close said seat from one side only, a valve stem adapted to carry said valve and extend through either of said openings, and a plug adapted, to close either of said openings.

3. A valve assembly comprising a valve casing having an inlet and an outlet and a valve seat and two openings disposed in opposite directions from said valve seat, a valve adapted to close said seat from one side only, a valve stem adapted to carry said valve, a plug adapted to screw threadedly engage and close either of said openings and apertured to permit said stem to pass therethrough and to support said stem, and a second plug also adapted to screw threadedly engage and close the other of said openings.

1,567,031. PROCESS FOR TREATING HYGROSCOPIC MATERIALS. ALFRED CHARLES BUENSOD, New York, N. Y., assignor to Carrier Engineering Corporation, New York, N. Y., a Corporation of New York. Filed Dec. 30, 1921. Serial No. 525,997. 31 Claims. (Cl. 34—24.)

4. A process for progressively treating hygroscopic materials, comprising the subjection of the materials being treated to previously saturated air having a substantially fixed dew point and a variably increased temperature which corresponds to the moisture content of the materials after the air has come in contact with the materials one or more times.

1,567,032. CONVERTING AND TRANSFORMING ELECTRIC CURRENTS. JOHN EARNSHAW CALVERLEY PRESTON and WILLIAM EDEN HIGHFIELD, London, England, assignors to The English Electric Company, Limited, London, England. Filed Dec. 13, 1921. Serial No. 522,073. 13 Claims. (Cl. 172—238.)

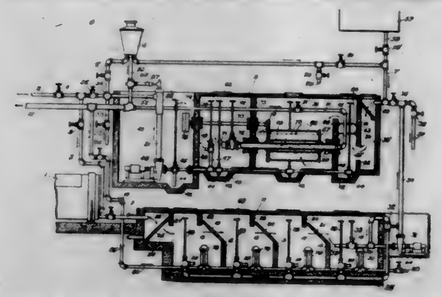


4. Apparatus for converting alternating current from a polyphase system of one number of phases to another polyphase system of a different number of phases, comprising a relatively large number of transformer cores, windings on each of said cores connected in each of the systems, some of the said cores having on each of them windings connected in two of the phases of the system having the smaller number of phases, and supplementary coils on some of the cores connected to form a plurality of closed circuits joined together to form a symmetrical system in which any of its closed paths there is zero resultant emf under balanced flux conditions in the cores linked with the said system and in which currents circulate if these conditions do not exist.

1,567,033. APPARATUS FOR CONSERVING SOAP. JOHN EDWARD CAPS, Wilmette, Ill. Filed Nov. 7, 1921. Serial No. 513,575. 2 Claims. (Cl. 210—52.)

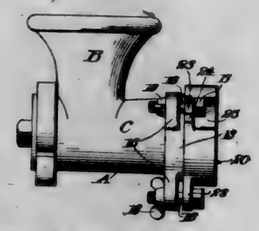
1. In a device of the class described a settling tank divided into a series of compartments by transverse partitions which terminate below the top of the tank,

heaters in the compartments, a pump for exhausting the liquid from the last compartment, a filter tank, means for introducing the liquid from the pump to the filter tank, a compartment in the filter tank, a hollow shaft communicating the filter tank with the compartment so that water may flow from the filter tank into the compartment through the hollow shaft, a heater, a pump communicating with said compartment and with the heater and means for circulating the liquid from the heater back into the filter tank.



---

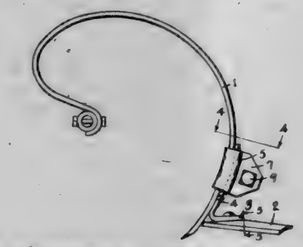
1,567,034. COMMINUTING OR GRINDING MACHINE. ELLIOTT CARNS, South Boston, Mass., assignor to Dayton Scale Company, Dayton, Ohio, a Corporation of New Jersey. Filed Feb. 18, 1924. Serial No. 693,613. 11 Claims. (Cl. 146—187.)



1. In combination with the bowl of a comminuting machine or the like, an adapter means applicable thereto, and a replacement end ring different in structure from the original end ring of the machine associated with said means.

---

1,567,035. HARROW TOOTH. HARRY L. CARR, Hastings, Mich. Filed Mar. 5, 1925. Serial No. 13,240. 10 Claims. (Cl. 55—97.)

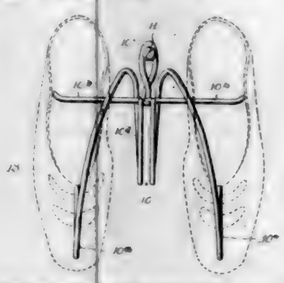


6. The combination of a curved spring harrow tooth, a triangular horizontally disposed blade, a shank for said blade disposed at the rear of said tooth, and a clamp for securing said shank to said tooth whereby the parts are placed under spring tension by the springing of the tooth.

7. The combination of a harrow tooth, a triangular horizontally disposed blade, a spring shank for said blade disposed at the rear of said tooth, and a clamp for securing said shank to said tooth whereby the parts are placed under spring tension by the springing of the shank.

---

1,567,036. SHOE SUPPORT. EUGENE L. CAVANNA, Chicago, Ill. Filed Nov. 30, 1923. Serial No. 677,837. 3 Claims. (Cl. 211—17.)



1. A shoe engaging and supporting device, formed of wire, with a portion insertable in and engageable with the toe of a shoe or the like, and with a portion engageable with the exterior of the heel of such a shoe, said device intermediate the toe and heel engaging portions being coiled to provide a spring portion whereby such shoe will be securely and resiliently supported when engaged by said first named portions.

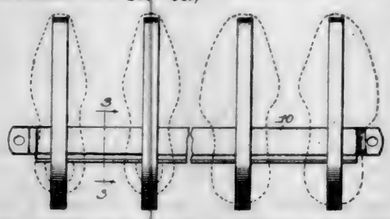
---

1,567,037. SHOE SUPPORT. EUGENE L. CAVANNA, Chicago, Ill. Filed Nov. 12, 1923. Serial No. 674,108. 4 Claims. (Cl. 211—17.)

1. A shoe supporting device having a toe engaging portion insertable in the toe of a shoe and a body portion extending therefrom and terminating in a portion engageable with the exterior of a heel, said toe engaging and heel engaging portions being so constructed and arranged as to yieldingly lock said shoe under tension with the upper facing outwardly.

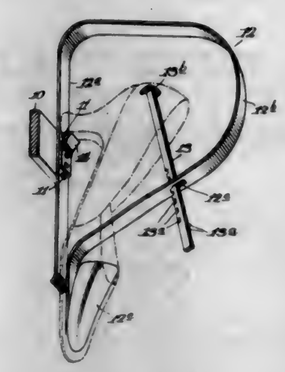
---

1,567,038. SHOE SUPPORT. EUGENE L. CAVANNA, Chicago, Ill. Filed May 23, 1924. Serial No. 715,277. 8 Claims. (Cl. 211—14.)



1. A resilient shoe support comprising a member having a portion insertable in the toe of a shoe or the like and a second portion extending therefrom to underlie and contact the sole of said shoe.

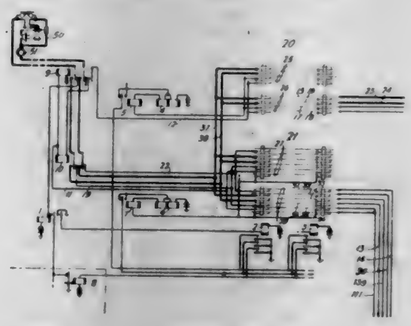
1,567,039. SHOE FORM AND SUPPORT. EUGENE L. CAVANNA, Chicago, Ill. Filed Sept. 4, 1924. Serial No. 735,759. 9 Claims. (Cl. 12—128.1.)



1. A device of the class described comprising a shoe supporting member attachable to a fixed support, said member being provided with a toe engaging portion, means coacting therewith to engage the heel of a shoe exteriorly thereof, and a second means coacting with said member and engageable with the inner heel portion of a shoe.

---

1,567,040. TELEPHONE-EXCHANGE SYSTEM. EDGAR H. CLARK, Richmond Hill, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 6, 1923. Serial No. 678,936. 18 Claims. (Cl. 179—18.)

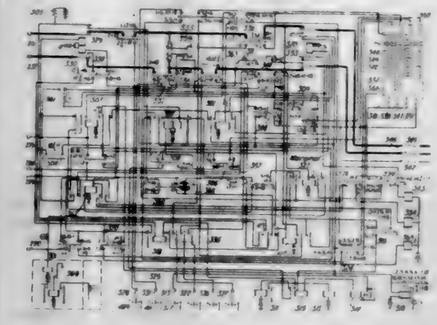


1. In a telephone exchange system, a calling subscriber's line, a group of lines of one character, a group of lines of another character, an automatic switch, means under the control of said calling line for operating said automatic switch to independently connect an idle one of each of said group of lines to said calling line.

---

1,567,041. TELEPHONE-EXCHANGE SYSTEM. RUSSELL O. COVELL, Philadelphia, Pa., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Feb. 28, 1924. Serial No. 695,667. 12 Claims. (Cl. 179—18.)

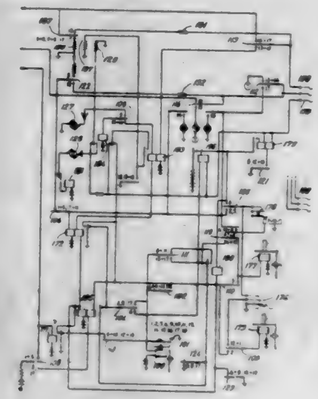
1. In a registering system, a pair of registering devices, a control circuit, means for normally extending said control circuit to said registering devices in succession, means operated over said control circuit for positioning said registering devices, and means operated in response to the positioning of said first registering device in a particular position to transfer the extension of said control circuit from the second registering device back to the first registering device whereby said first registering device may be further positioned.



9. In a telephone exchange system, an incoming line, a register sender, means for associating said sender with said incoming line, a relay in said sender, means for establishing a pulsing circuit over said incoming line and including said relay, and means for establishing a second circuit for said relay during a predetermined interval to render said relay unresponsive to disturbances on said incoming line.

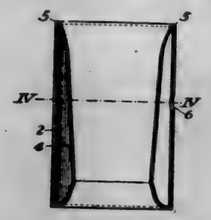
---

1,567,042. TELEPHONE-EXCHANGE SYSTEM. GERALD DEAKIN and LIPA POLINKOWSKY, Antwerp, Belgium, assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 16, 1923. Serial No. 668,806. 6 Claims. (Cl. 179—27.)



1. In a telephone exchange system, a group of lines extending to a private branch exchange, switching apparatus for extending local and toll connections to said branch exchange over said lines, and means operative upon the extension of a toll connection to a line which tests as the final line of the group for causing the line immediately preceding said line to thereupon test as a final line of said group.

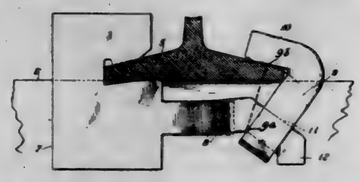
1,567,043. VENTURI AND METHOD OF MAKING THE SAME. HENRI DE BOISCHEVALIER, Detroit, Mich., assignor to Societe du Carburateur Zenith, Lyon, France, a Corporation of France. Filed Oct. 20, 1922. Serial No. 595,878. 10 Claims. (Cl. 137—75.)



1. A venturi, comprising an outer casing adapted to be bodily inserted within the air passage of a carburetor, and an inextensible inner sheet metal venturi member carried thereby and extending substantially coextensive therewith, substantially as described.

---

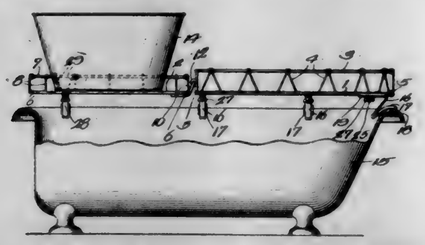
1,567,044. RAIL ANCHOR. WILLIAM H. DE BUSK, Chicago, Ill., assignor to The P. & M. Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 13, 1924. Serial No. 749,656. 12 Claims. (Cl. 238—321.)



1. In a rail anchor, the combination with a member comprising jaws adapted to engage the flange of a rail at one side thereof, and an arm extending across beneath the rail in spaced relation thereto, of a clip engaging the arm and adapted to swing from a position at one side of the rail into engagement with the upper face of the flange, the arrangement being such that as the clip approaches its operative position the downward pressure of the arm on the clip tends to swing the clip into such operative holding position.

---

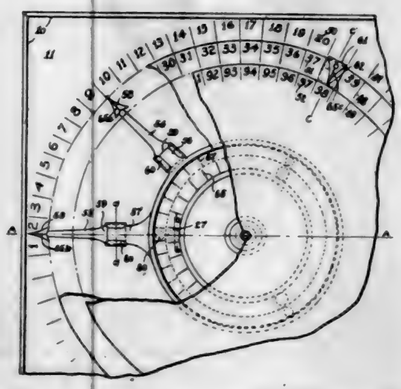
1,567,045. TRAY. CHARLES W. EBEL, La Fayette, Ind. Filed May 16, 1925. Serial No. 30,726. 6 Claims. (Cl. 4—4.)



1. A tray formed in sections that are hinged together, one of these tray sections having a railing terminating at the sides and hinged edge of the second tray section which latter tray section has a railing around it, the transverse portion of this latter railing at the hinged edges of the tray sections substantially closing the gap between the ends of the first railing when the tray is adjusted for use, the second tray section being receivable within the railing of the first when the tray sections are superimposed, one upon the other.

---

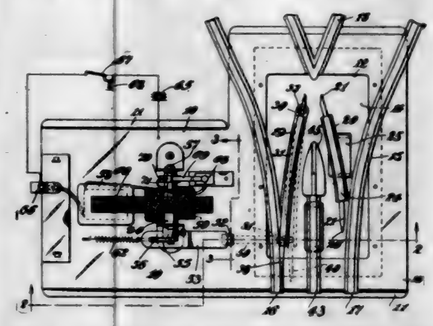
1,567,046. GAME DEVICE. WILLIAM H. FAUBER and HAZEL L. FAUBER, Brooklyn, N. Y. Filed July 23, 1925. Serial No. 45,563. 41 Claims. (Cl. 273—141.)



1. In combination, a lower member; an upper plate above said lower member; ball bearings between said member and plate; an auxiliary plate spacing said bearings; a disk on said upper plate having characters; and a pointer cooperating with said characters.

---

1,567,047. TOY TRACK SWITCH. JULIUS FORCHHEIMER, New York, N. Y. Filed Jan. 21, 1925. Serial No. 3,713. 9 Claims. (Cl. 246—240.)

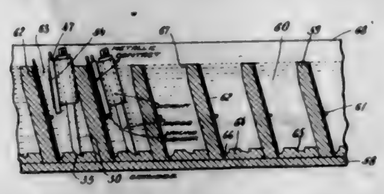


1. A toy switch formed of a sheet metal base member having a rectangular opening therein, diverging tracks secured to said members, a supporting plate secured beneath said opening and a fixed switch point and a movable switch point carried by said supporting plate.

---

1,567,048. APPARATUS FOR MAKING ROOFING ELEMENTS. JULIUS H. GILLIS, Elizabeth, N. J., assignor, by mesne assignments, to Anaconda Sales Company, a Corporation of Delaware. Filed Sept. 10, 1923. Serial No. 661,972. 49 Claims. (Cl. 204—5.)

1. Apparatus of the class described comprising an electrolytic tank having a plurality of anodes therein, a support for the element to be plated adjacent each anode, contact means for bearing against an article on



the support to withdraw the plating current therefrom, and means movable along the tank and adapted to release the contact means successively from the elements.

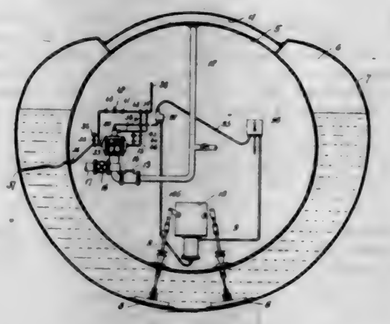
---

1,567,049. CHROMIUM SOAP. THOMAS T. GRAY, Elizabeth, N. J. Filed Oct. 3, 1922. Serial No. 592,042. 6 Claims. (Cl. 87—16.)

2. A detergent compound containing alkali metal soap and chromium soap in approximately equal proportions.

---

1,567,050. BALLAST-TANK AUTOMATIC BLOW-OUT VALVE. HUGO EUGENE GRIESHABER and LEWIS BERRY DOANE, Groton, Conn., assignors to Electric Boat Company, a Corporation of New Jersey. Filed Nov. 12, 1923. Serial No. 674,120. 15 Claims. (Cl. 114—16.)

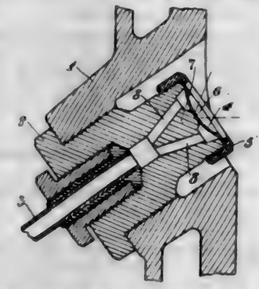


1. In a submarine boat, the combination of a ballast tank having a drain valve, positively operating means for opening and closing this drain valve, a source of air under pressure connected to the ballast tank, and a control device automatically operating, when the pressure of the water of submergence exceeds a predetermined value, to cause air to be admitted to the ballast tank and to cause the opening means to open the drain valve in timed relation.

---

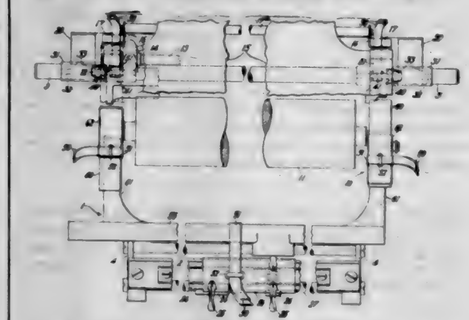
1,567,051. MEANS FOR INJECTING LIQUID FUEL AND OTHER LIQUIDS INTO EXPLOSION MOTORS, FURNACES, AND THE LIKE. OSCAR ROBERT GRÖNKWIST, Stockholm, Sweden. Filed June 27, 1921. Serial No. 480,799. 1 Claim. (Cl. 299—133.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

A means for injecting liquid fuel and other liquids into explosion engines, comprising a resilient diaphragm secured all around its periphery and provided with an outlet aperture in its central portion, and an abutment located entirely to one side of said diaphragm and normally engaged by said central portion of the diaphragm so as to normally close the aperture therein, the opposite side of the diaphragm inward of the periphery being entirely uncovered and directed towards the explosion chamber of the engine.



---

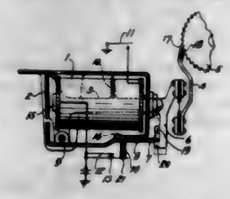
1,567,052. TYING DEVICE FOR TYPEWRITING MACHINES. WILLIAM F. HELMOND, Hartford, Conn., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Jan. 28, 1921. Serial No. 440,618. 15 Claims. (Cl. 197—193.)



1. In combination with a typewriting machine having a fixed frame and a movable carriage, means for tying said machine to prevent movement of the parts thereof, said means comprising sleeves mounted on the fixed frame of the machine and provided with projections adapted to abut against the carriage to prevent lateral movement of said carriage, said sleeves being removable at will, and means engaging said sleeves and carriage for preventing vertical movement of said carriage.

---

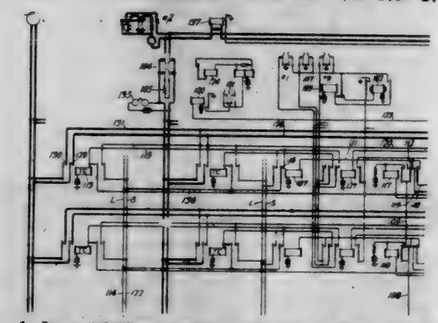
1,567,053. STEPPING MECHANISM. FRANK H. HIBBARD, Arlington, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Mar. 3, 1924. Serial No. 696,479. 3 Claims. (Cl. 172—126.)



1. In a stepping mechanism, a motor magnet, a main armature, an auxiliary armature, a circuit interrupter controlled by the auxiliary armature for opening and

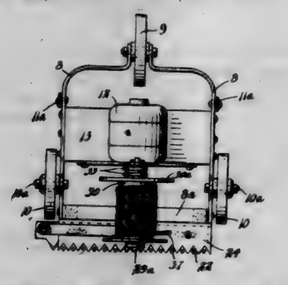
closing the circuit of the motor magnet, and means controlled by the main armature for overcoming the magnetic effect between the motor magnet and the auxiliary armature.

1,567,054. AUTOMATIC TELEPHONE SYSTEM. EDWARD E. HINRICHSEN, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Mar. 30, 1922. Serial No. 548,078. 11 Claims. (Cl. 179—27.)



1. In a telephone system, subscribers' lines, impulse senders therefor, link circuits each having their ends normally connected together, means for connecting a calling line to an idle link, a register comprising a series of counting relays common to said links, means whereby the first impulse from the impulse sender of a calling line causes the association of said register exclusively with the seized link, relays for connecting called lines to link circuits, and a selecting circuit for actuating a certain one of said latter relays including normal contacts of said counting relays.

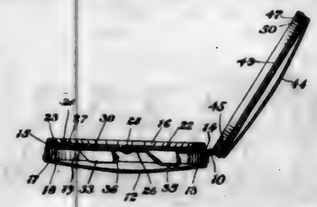
1,567,055. ELECTRIC LAWN MOWER. ERNEST HUFF, Boyceville, Wis., assignor to Huff Manufacturing Company, Boyceville, Wis., a Corporation of Wisconsin. Filed Mar. 28, 1925. Serial No. 18,998. 5 Claims. (Cl. 191—12.)



1. An automatic winding reel for electric lawn mowers and other power driven devices employing a flexible connection member, having in combination a rotary driving means and a rotatable drum to which one end of said flexible connection is secured, said drum having driving engagement with said driving means when said flexible connection is slack and being automatically disengaged therefrom when said flexible connection is taut to permit unwinding thereof.

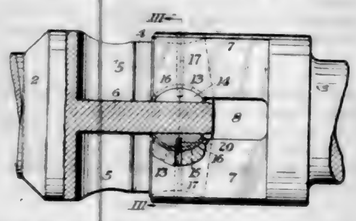
1,567,056. VANITY CASE. FRITZ R. JOHNSON, Providence, R. I. Filed June 11, 1925. Serial No. 36,368. 6 Claims. (Cl. 132—83.)

1. In a vanity case, a box comprising a bottom, a side, a closure plate supported by the side above the bottom and provided with a hole, a plate loosely engaging the lower face of the closure plate movable therebeneath and



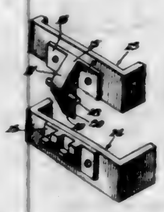
provided with an opening, and a downwardly directed scoop member upon the movable plate beside the opening in alignment with the hole.

1,567,057. UNIVERSAL COUPLING. LANE JOHNSON, Pittsburgh, Pa., assignor to United Engineering and Foundry Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Sept. 12, 1924. Serial No. 737,276. 7 Claims. (Cl. 64—91.)



1. In a coupling, a rotary member having a bifurcated end, the arms of which are connected by an integral web, and a second rotary member having a slotted tongue adapted to be received between said arms and adapted to receive said web in the slot thereof, said arms and said slot being of greater length than required for normal operating assembly of the coupling to permit relative axial movement of said members towards each other for uncoupling one of said members from another member, substantially as described.

1,567,058. MOLDING FLASK. WILLIAM C. JONES, Niantic, Ill. Filed Apr. 10, 1925. Serial No. 22,042. 7 Claims. (Cl. 22—105.)

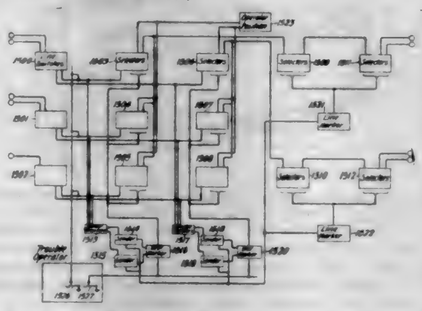


1. A molding flask composed of two separable parts, securing and aligning means on a plurality of the sides thereof to hold the two parts in proper alignment when assembled, said securing and aligning means including one member having a pair of outwardly extending brackets provided with aligning grooves or recesses in their upper face and the other of said members having a lug projecting outwardly and downwardly and adapted to be positioned between said brackets, said lug being provided with a pin to fit in the grooves or recesses in said brackets, said lug also being formed with a flat face adapted to engage and bear against the front face of the other aligning and securing member.

1,567,059. FOUNTAIN PEN. STORMONT JOSSELYN, Atlantic, Mass., assignor to George Zain, Brookline, Mass. Filed Nov. 25, 1924. Serial No. 752,109. 3 Claims. (Cl. 120—46.)

1. A fountain pen comprising a barrel having an interior groove in the wall thereof extending from its inner end an appreciable distance, a pen-carrying section secured to the barrel, a collapsible sack within the chamber of the barrel, a presser bar for said sack, a lever, means for mounting the lever to have operative engagement with the presser bar when the lever is actuated for compressing the sack, a spring bar fixed to the presser bar, a holder for the spring bar inside the barrel and arranged to occupy a determinate position therein when the lever and presser bar are occupying proper operative relation to one another, and a projection from the holder contained within said groove in the barrel when the holder is occupying its determinate position as aforesaid.

1,567,060. TELEPHONE-EXCHANGE SYSTEM. LEO KELLER, New York, and SAMUEL B. WILLIAMS, Brooklyn, N. Y., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Mar. 31, 1923. Serial No. 628,988. 11 Claims. (Cl. 179—27.)



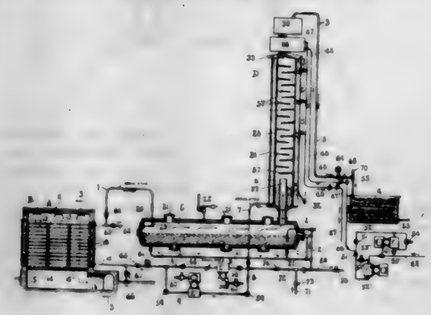
1. In a telephone system, a number of selective switches, means for directing incoming calls to said switches, a plurality of register senders and a common marker for governing the selective operation of said switches, and means for diverting away from said switches calls which are normally directed thereto.

1,567,061. PROCESS OF MAKING BITUMINOUS EMULSIONS. LESTER KIRSCHBRAUN, Chicago, Ill. Filed Jan. 17, 1921. Serial No. 438,050. Renewed Mar. 31, 1924. 3 Claims. (Cl. 134—1.)

1. A process of forming a non-adhesive emulsion consisting in emulsifying an adhesive bituminous substance with an emulsifying agent in an aqueous vehicle, and adding a flocculating agent to the emulsion to cause the emulsifying particles to more tenaciously cluster about the adhesive substance.

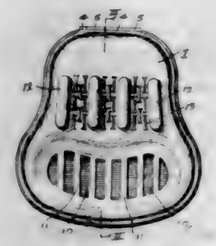
1,567,062. PROCESS OF AND APPARATUS FOR CRACKING HYDROCARBONS. FREDERICK B. KOONTZ, Tulsa, Okla., assignor to Cosden & Company, Tulsa, Okla., a Corporation of Oklahoma. Filed May 8, 1924. Serial No. 711,866. 30 Claims. (Cl. 196—48.)

6. In the art of cracking hydrocarbons, the process which comprises conducting a stream of hydrocarbons through a cracking zone where a cracking temperature is maintained, discharging the resultant highly heated stream into a separating chamber and depositing the carbonaceous residue in said chamber, maintaining the contents of said separating chamber at a temperature high enough to cause free evaporation of relatively low boiling point liquid in the carbonaceous residue, removing the carbonaceous residue as it accumulates in said separating chamber and discharging it from the system, discharging the vapors from said separating chamber in an upward direction and at a velocity low enough to permit free precipitation of carbonaceous material in the rising vapors, at the same time dropping carbonaceous material from the rising stream of vapors to said separating chamber, then subjecting the relatively clean vapors



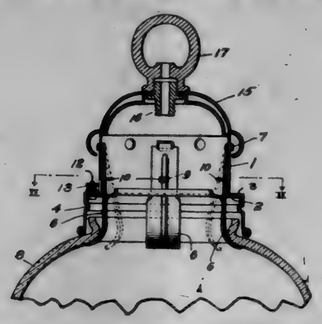
to a reflux condensing action to obtain clean reflux condensate freed from said carbonaceous material, at the same time heating fresh charging stock and removing low boiling point vapors therefrom, controlling the reflux condensing action to condense more than 70 percent of the vapors, separately condensing the remaining vapors, controlling the admission of charging stock in accordance with the reflux condensing action to provide a supply of charging stock and reflux condensate in proportions of less than 25 percent charging stock and more than 75 percent reflux condensate, mixing the liquid portion of the chargingq stock with the hot reflux condensate pumping the hot mixture through said cracking zone and into said separating chamber, and regulating the pump to maintain a substantially uniform cracking condition in said cracking zone.

1,567,063. TOBACCO-SMOKER'S ACCESSORY. DENNIS F. LARKIN, San Francisco, Calif. Filed Jan. 29, 1924. Serial No. 689,247. 3 Claims. (Cl. 131—51.)



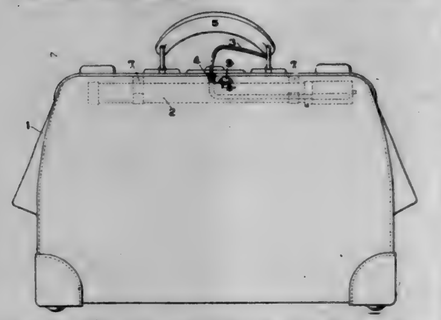
1. A smoker's accessory comprising a tray having a cover with perforations therethrough and projecting embossments arranged adjacent the perforations; and embossed ridges arranged between said projecting embossments.

1,567,064. GLOBE HOLDER. MICHAEL LA SCOLA, Pittsburgh, Pa., assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y., a Corporation of New York. Filed Jan. 19, 1925. Serial No. 3,233. 3 Claims. (Cl. 240—133.)



1. A globe holder comprising an annular casing having a cylindrical side wall, a ring rotatably mounted in and extending transversely within the casing and provided with a plurality of eccentric curved slots, and a plurality of globe-engaging fingers extending through said slots and pivotally mounted at their upper ends in the casing side wall, the side wall of said casing and said fingers being provided with cooperating openings and tongues to prevent sidewise displacement of the fingers when said ring is rotated to move the fingers radially within the casing.

1,567,065. ARTICLE-CARRYING CONTAINER. RUBEN B. LAWRENCE, Bellevue, Pa., assignor to Federal Laboratories, Incorporated, Pittsburgh, Pa., a Corporation of Delaware. Filed June 21, 1922. Serial No. 569,824. 8 Claims. (Cl. 109—6.)

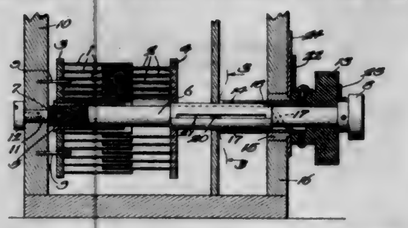


1. The combination with a container adapted for transporting articles of a gas-emitting device for protecting the container and its contents against robbery, the gas-emitting device being adapted to continue to emit an incapacitating gas over a substantial period of time after being once set in action, and means for setting the device into action, said means comprising a member adapted to be grasped by the carrier of the container and arranged to set the gas emitting means into operation when the member is actuated by the carrier, substantially as described.

1,567,066. NICKEL-COPPER ALLOY. JUSTUS W. LEHR, Baltimore, Md., assignor, by mesne assignments, to U. S. Industrial Alcohol Co., a Corporation of West Virginia. Filed Aug. 28, 1923. Serial No. 659,841. 7 Claims. (Cl. 75—1.)

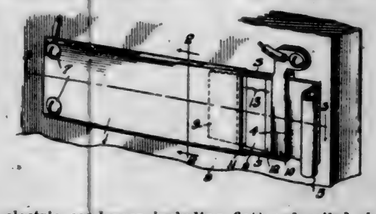
1. A non-corrodible alloy containing nickel 20 to 40%, tin 1 to 6%, lead 1 to 8%, the remainder copper, and containing no zinc.

1,567,067. CONDENSER. JOHN F. LINDBERG, Chicago, Ill., assignor to Reliance Die and Stamping Company, Chicago, Ill., a Corporation of Illinois. Filed July 20, 1922. Serial No. 576,227. 6 Claims. (Cl. 250—41.)



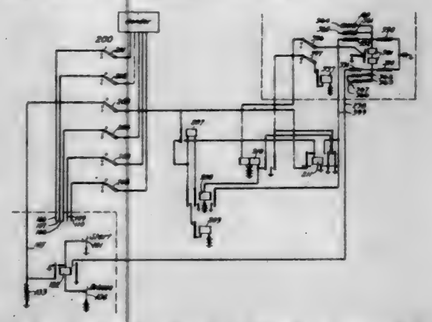
1. A condenser including two substantially parallel sides both mounted to move along a straight line; and an adjusting device individual to each condenser side for moving it with respect to the other condenser side, said adjusting devices being constructed to adjust the condenser sides pertaining thereto at different rates.

1,567,068. ELECTRIC CONDENSER. JOHN F. LINDBERG, Chicago, Ill., assignor to Reliance Die and Stamping Company, Chicago, Ill., a Corporation of Illinois. Original application filed Apr. 17, 1922, Serial No. 553,728. Divided and this application filed Jan. 26, 1924. Serial No. 688,676. 1 Claim. (Cl. 250—41.)



An electric condenser including flattened coiled sheets of dielectric material and sheet metal, the latter surrounding the former and constituting one side of the condenser; and a flat sheet of metal constituting the remaining side of the condenser and located within the bore of the coiled dielectric and movable longitudinally thereof to adjust the capacity of the condenser.

1,567,069. ALLOTTER-CONTROLLING SYSTEM. ALBEN E. LUNDELL, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Sept. 21, 1923. Serial No. 663,977. 3 Claims. (Cl. 179—27.)



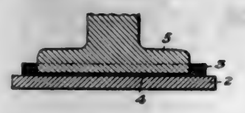
1. In a telephone system, a plurality of switching devices, an allotter to determine the order in which said switching devices are put into use, said allotter including

a Wheatstone bridge and numerous side circuits, a relay operable when the bridge is electrically unbalanced and capable of restoration when the bridge is electrically balanced, and means for unbalancing and balancing said Wheatstone bridge by electrical connections to its numerous side circuits.

1,567,070. ILLUMINATED LICENSE PLATE. LOUIS J. MALLOT, East St. Louis, Ill. Filed Mar. 26, 1923. Serial No. 627,683. 1 Claim. (Cl. 40—132.)

In a device of the character described a casing member comprising of each a top, a bottom, a back and an end wall; downwardly and upwardly extending flanges from the edges of the top and bottom walls respectively; longitudinal parallel beads in said top and bottom walls equidistant from and parallel with said flanges; a second casing member telescoped within the first one and comprising of each a top, a bottom, a back and an end wall, and having an elongated slot in said back wall; downwardly and upwardly extending flanges from the edges of the top and bottom walls respectively of said second casing member; longitudinal parallel beads in said top and bottom walls of said second casing member equidistant from and parallel with said second named flanges and receiving said first named beads; a fastener passing through said slot and through the back wall of said first casing member for holding said casing members in different relative positions; and a license plate in said casing members between said beads and said flanges.

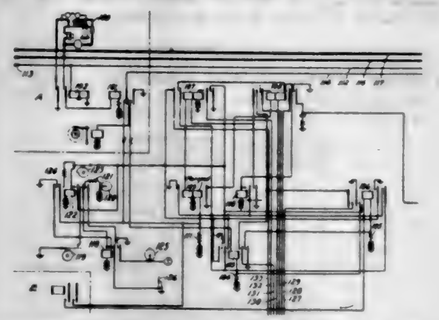
1,567,071. METHOD OF MAKING ABRASIVE DISKS. HARRY C. MARTIN, Niagara Falls, N. Y., assignor to The Carborundum Company, Niagara Falls, N. Y., a Corporation of Pennsylvania. Continuation of application Serial No. 363,480, filed Mar. 5, 1920. This application filed Jan. 25, 1922. Serial No. 531,554. 6 Claims. (Cl. 51—278.)



1. The herein described method of making abrasive disks which consists in mixing abrasive grains with shellac in the approximate proportions of 9 to 1 parts, spreading the same in a suitable mold upon a backing, placing the mold in a melting oven and bringing its contents to a temperature sufficient to soften the shellac, then applying a pressure to the abrasive material sufficient to agglomerate it but not to reduce the porosity of the finished disk below about 30%, and then baking the article so formed, substantially as described.

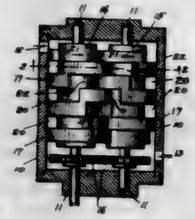
1,567,072. TELEPHONE-EXCHANGE SYSTEM. WILLIAM H. MATTHIES, Hackensack, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 16, 1924. Serial No. 743,884. 8 Claims. (Cl. 179—18.)

1. In a telephone exchange system, a plurality of subscribers' lines divided into groups, a trip circuit for each group, a start circuit common to all groups, a plurality of link circuits, a plurality of line finders, a plurality of register senders, means in said link circuits for preselecting a line finder and means in said link circuit



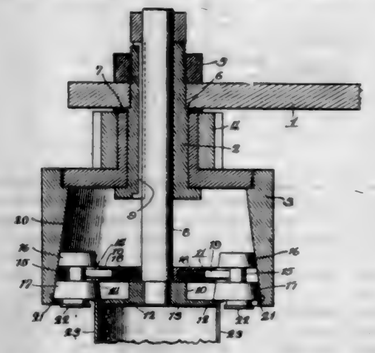
responsive to the initiation of a call over said trip, start and link circuits to said line finder for hunting for an idle register sender.

1,567,073. SCREW PUMP. EMANUEL MOCIGEMBA, Rheinbach, Germany. Filed July 23, 1925. Serial No. 45,561. 2 Claims. (Cl. 103—128.)



2. A screw pump comprising oppositely rotating intermeshing worm shafts, each of which has a continuous helical tooth having alternate stepped portions parallel and perpendicular to the axis.

1,567,074. CAN-SEALING MACHINE. GARRETT WILLIAM MUDD, Chicago, Ill., assignor of one-half to Harry Raymond Baker, Chicago, Ill. Filed Oct. 27, 1923. Serial No. 671,116. 10 Claims. (Cl. 113—24.)

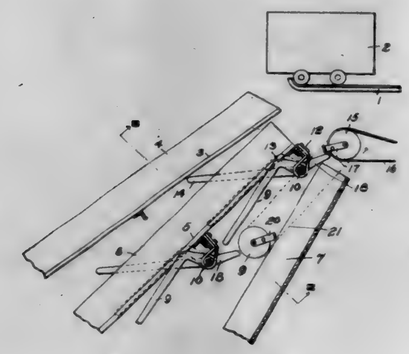


1. In a can sealing machine, the combination of non-rotary means for holding the cover down on the can, so that the can does not rotate, and revolving instrumentali-

ties for engaging and swaging the edge portions of the cover to fasten the cover in place on the can, said revolving means being movable upward to force them toward the axis of rotation, thereby to bend the edge portions of the cover in the desired manner.

---

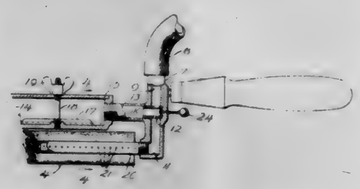
1,567,075. TIPPLE-SCREEN CLEANER. JAMES S. PATES, Pittsburgh, Pa. Filed Oct. 23, 1919. Serial No. 332,711. 1 Claim. (Cl. 209—384.)



In a coal tipple, a screen composed of spaced stationary bars, inclined for the gravital movement of coal therealong, a shaft rotatably mounted in spaced relation to said bars, cleaning arms secured to said shaft, an actuating arm mounted on said shaft and a rotating member adapted to intermittently strike said arm so as to swing said cleaning arms between said bars to remove lumps of coal therefrom.

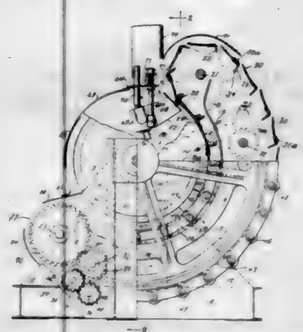
---

1,567,076. FOUNTAIN BRUSH. JAMES O. PATTY, Chicago, Ill. Filed Apr. 6, 1923. Serial No. 630,198. 1 Claim. (Cl. 15—128.)



A fountain brush, comprising a hollow body member, a water supply connected thereto, a U-shaped brush connected thereto at an angle, a perforated pipe connected to the interior of said body member and disposed between the arms of said brush and in the plane thereof to discharge water over the whole interior brush surface, a soap box also connected to the interior of said body member, disposed parallel with said brush and perforated to discharge its contents on said brush, and a valve in said body member for controlling the flow of water to said pipe and soap box, said valve adapted for exclusive discharge of water to either the pipe or the soap box or for conjointly discharging to both.

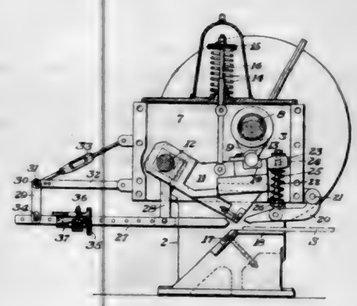
1,567,077. TUMBLING MILL. LOUIS D. PEIK, Cleveland, Ohio. Filed Mar. 1, 1922. Serial No. 540,127. 21 Claims. (Cl. 51—14.)



1. A tumbling mill comprising a base, supporting side walls, said base having an endless belt conveyor mounted thereon to form a partial peripheral wall and with said side walls form a chamber, said conveyor being bodily movable with respect to said base for discharging the contents thereof.

---

1,567,078. BEVEL SHEARS. HARLEY D. PENNINGTON, Pittsburgh, Pa., assignor to United Engineering & Foundry Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Aug. 4, 1923. Serial No. 655,689. 2 Claims. (Cl. 164—45.)

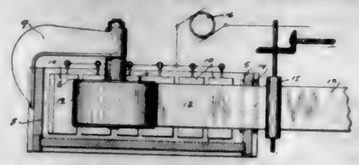


1. In a bevel shear, a substantially upright housing having a horizontal work supporting table, an oblique stationary lower shear blade at one end of said table, an operating shaft arranged above and transversely of said table, an upper shear blade for cooperation with said lower blade, a carrier for said upper blade mounted to oscillate about an axis parallel to said operating shaft, means operatively connecting said upper blade with said operating shaft, clamping means for holding the work on said table during the shearing operation, and yielding means operatively connecting said upper blade carrier with said clamping means, substantially as described.

---

1,567,079. PROCESS FOR PRODUCING SHEET METAL. JOSEPH PORZEL, Buffalo, N. Y. Filed Oct. 26, 1923. Serial No. 671,023. 4 Claims. (Cl. 204—6.)

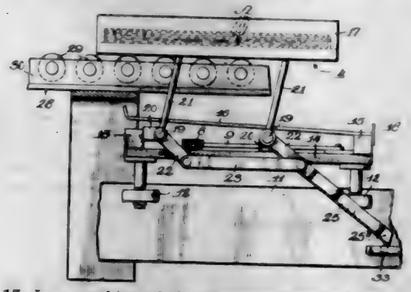
1. A continuous electrolytic process of forming a metallic sheet cathode comprising the initial formation of the cathode on a horizontally moving, vertically disposed surface in a winding direction, and then parting such



cathode from the moving surface in an unwinding direction without interrupting the electrodeposition.

---

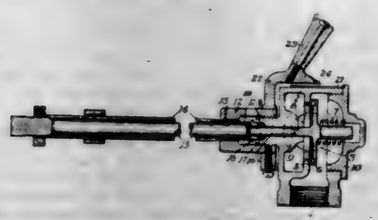
1,567,080. SHEET-GATHERING MACHINE. WILLET B. RANNEY, Chicago, Ill., assignor to Wm. Wrigley, Jr. Company, Chicago, Ill., a Corporation of West Virginia. Filed Dec. 13, 1923. Serial No. 680,307. 18 Claims. (Cl. 107—7.)



17. In a machine of the character described, the combination with sheet delivery conveyor, a substantially circular track passing beneath the delivery end of said delivery conveyor, a plurality of carriages mounted to travel about said track carriage propelling means comprising a drive shaft operatively connected with said carriages, trays removably mounted on said carriages above the path of said carriages, tray elevating medium carried by said carriages and comprising levers depending adjacent the track, a cam plate mounted on said track adjacent the receiving end of said discharge track, said levers having an offset end portion adapted in the normal positions thereof to pass the cam plate without contact, and tripping mechanism comprising an endwise shiftable rod provided with a cam engaging member, a rotative cam in driving connection with said drive shaft, and adapted to engage the cam member of said rod, to shift the end of the same into the path of said levers, whereby said levers are tripped to engage said cam plate.

---

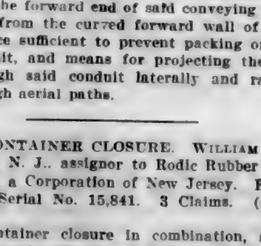
1,567,081. THERMOSTAT. FREDERICK W. ROBERTSHAW, Pittsburgh, Pa., assignor to Robertshaw Thermostat Company, Youngwood, Pa., a Corporation of Pennsylvania. Filed July 24, 1923. Serial No. 653,407. 6 Claims. (Cl. 236—102.)



1. The combination with a thermostat and a valve for actuation thereby, of separate threaded controlling means between the valve and thermostat, and means cooperating with said controlling means for preventing leakage from the valve into the thermostat and for maintaining a load on said threads, substantially as described.

---

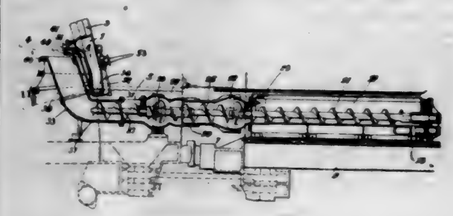
1,567,082. REFRIGERATOR. FAY T. RODGERS, Memphis, Tenn. Filed July 18, 1925. Serial No. 43,135. 3 Claims. (Cl. 62—69.)



3. Means for cooling a refrigerator, comprising a plurality of refrigerant containers, near one end of the refrigerator, disposed one above the other and spaced apart, the bottom of any container and the top of the container below being downwardly inclined, in substantially parallel planes, toward the adjacent end of the refrigerator casing, whereby inclined channels are provided to induce air flow between said containers.

---

1,567,083. STOKER. FRANK P. ROESCH, Chicago, Ill., and ANDREW M. HUNT, New York, N. Y., assignors to Standard Stoker Company, Incorporated, a Corporation of Delaware. Filed May 19, 1924. Serial No. 714,338. 13 Claims. (Cl. 110—101.)



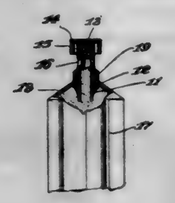
1. The combination with a boiler of an unobstructed conduit without sharp bends curving from horizontal to vertical without sudden changes in its cross-sectional dimensions, said conduit being of substantially the same cross-sectional area throughout, the vertical end of said conduit projecting above the level of the fire and the horizontal end being outside the fire box, a conveying apparatus for delivering coal to the horizontal portion of the conduit and forcing the coal forward through said conduit, and the forward end of said conveying apparatus being spaced from the curved forward wall of said conduit a distance sufficient to prevent packing of the coal in said conduit, and means for projecting the coal delivered through said conduit laterally and radially to the fire through aerial paths.

---

1,567,084. CONTAINER CLOSURE. WILLIAM H. ROSE, Jersey City, N. J., assignor to Rodic Rubber Co., Garwood, N. J., a Corporation of New Jersey. Filed Mar. 16, 1925. Serial No. 15,841. 3 Claims. (Cl. 221—60.)

1. In a container closure in combination, a tubular slidable plunger of resilient material open at one end and

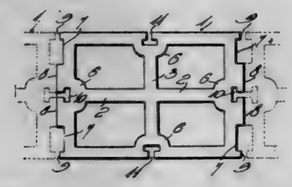
closed at the other end and having an opening in a side thereof and an exterior shoulder upon the open end



portion of the plunger, the closed end of the plunger having a spaced circumferential flange.

---

1,567,085. BUILDING BLOCK. VALBY E. ROWLAND, Indianapolis, Ind. Filed Jan. 19, 1925. Serial No. 3,374. 1 Claim. (Cl. 72—41.)



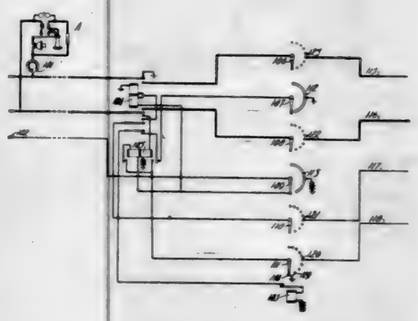
A building block of the kind described comprising a hollow pre-cast tile embodying duplicate inner and outer side walls, and duplicate end walls, internal intersecting vertical webs joined to the intermediate portions of the walls through the medium of reinforcing ribs, vertical T-shaped keyways formed in said walls at the outer ends of said webs, vertical channeds formed in said end walls and spaced from each other and from said side walls, the portions of said end walls between said channels being in the form of protuberances functioning as abutments, and the outer walls of said channels forming flanges, the latter being shorter in width than the thickness of said abutments, whereby to terminate on planes spaced inwardly from the contacting surfaces of the abutments.

---

1,567,086. CHAIN. CARL SCHRAYSSHUEN, Providence, R. I., assignor to Speidel Chain Co., Providence, R. I., a Firm composed of Frederick Speidel and Eugen Speidel, both of Pforzheim, Germany. Filed Sept. 8, 1925. Serial No. 54,971. 3 Claims. (Cl. 59—80.)

1. In a chain, two elongated loop links set one within the other, each having depressions in its side arms forming corresponding projections on their inner surfaces extending toward each other, the inward projections of one extending into the spaces in the other interlocking the two together to present the appearance of a plurality of separate links.

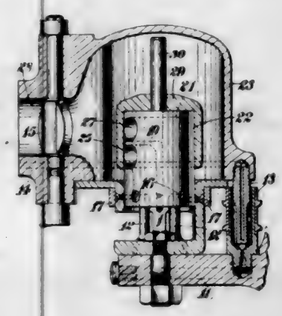
1,567,087. TELEPHONE-EXCHANGE SYSTEM. PERCY C. SMITH, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 12, 1923. Serial No. 668,072. 21 Claims. (Cl. 179—18.)



1. In a telephone system, a subscriber's line, switching mechanism for extending connections from said line, and a central office sender for controlling said switching mechanism in accordance with call designations registered thereon, said sender having a unitary registering mechanism comprising cooperating elements for registering all digits of call designations.

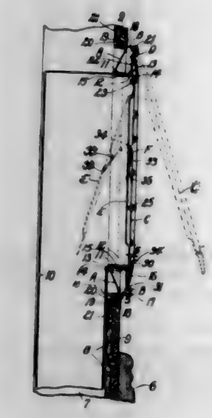
---

1,567,088. CARBURETING DEVICE. HERBERT WILLIAM SPILLER, Hampstead, London, England, assignor to S. Smith & Sons (Motor Accessories) Limited, Cricklewood, London, England, a British Company. Filed Feb. 14, 1924. Serial No. 692,749. 1 Claim. (Cl. 261—41.)



In a carbureting device, the combination of a suction chamber having a delivery outlet at one side thereof and an intake opening at one end, a duct block of elongated form having one end in said intake opening and extending in said chamber with its longitudinal axis lying transversely to the axis of said delivery outlet, which block has a plurality of ducts extending each, separately from the others, from the said intake opening to a delivery mouth at one side of the block facing said delivery outlet, the delivery mouths of which ducts are situated at different positions along the length of the block, and a suction-operated sleeve-valve movable axially along the peripheral surface of the block to successively cover and uncover the said delivery mouths, substantially as described.

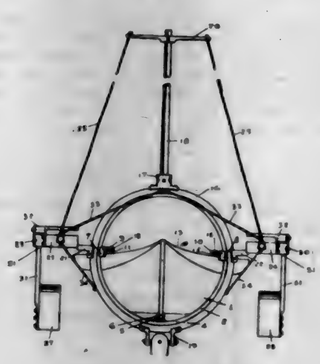
1,567,089. WALL-REGISTER CONSTRUCTION. HERBERT W. SYMONDS, St. Louis, Mo. Filed May 29, 1925. Serial No. 33,651. 7 Claims. (Cl. 98—54.)



1. The improvement in wall register construction comprising a wall frame arranged to be telescopically mounted over a stack head of ordinary construction and having a marginal beveled flange provided with plaster-engaging apertures.

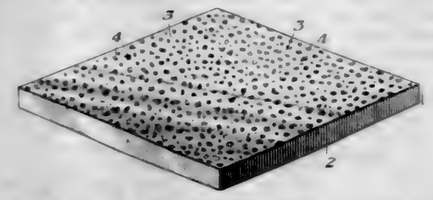
---

1,567,090. WIND-PROPELLED WATER CRAFT. WILLIAM HENRY THORBURN, Collingwood, Ontario, Canada. Filed Feb. 9, 1925. Serial No. 7,967. 13 Claims. (Cl. 114—61.)



1. A wind propelled boat comprising, a hull, a mast stepped to transmit the forward thrust of the wind thereto and to oscillate athwartship, independently of the listing movement of the hull, means for guiding the oscillating movements of the mast athwartship and preventing its movement in a direction axially of the hull, and two floats, one on each side of the hull, connected with the mast for normally maintaining it in, and restoring it to, a position perpendicular to the hull when not subjected to wind pressure.

1,567,091. ANTISLIP TILE. FRANK J. TONE, Niagara Falls, N. Y., assignor to The Carborundum Company, Niagara Falls, N. Y., a Corporation of Pennsylvania. Filed Jan. 25, 1922. Serial No. 531,771. 3 Claims. (Cl. 94—5.)



1. As a new article of manufacture, a burned tile having in its tread surface clusters of abrasive grains previously bonded by a ceramic binder.

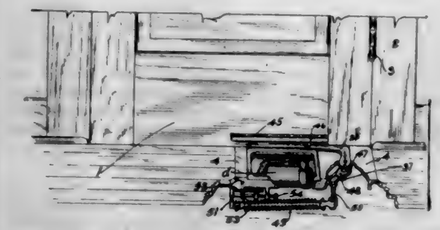
---

1,567,092. COSMETIC-POWDER DISPENSER. ROY M. WARBERG, BERNHARD ANDERSON, and FRANK ANDERSON, Chicago, Ill. Filed Mar. 5, 1925. Serial No. 13,038. 6 Claims. (Cl. 132—83.)

1. A powder holder capable of use as a vanity case, comprising a body portion for containing a powder, an endless powder conveyor movably arranged in said case and extending into the powder space of the body portion for contact with the powder, said conveyor being capable of carrying adhering powder thereon to a point where the powder may be removed from the conveyor by the application of a powder puff or the like.

---

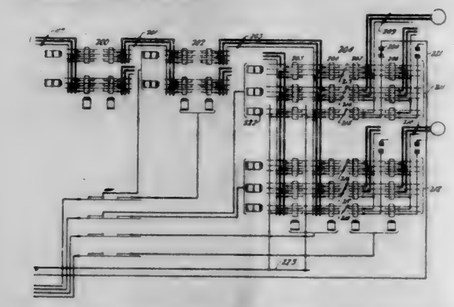
1,567,093. DOORCHECK. LEONIDAS D. WEST, Denver, Colo. Filed Feb. 16, 1923. Serial No. 619,400. 4 Claims. (Cl. 16—55.)



4. A door closing and retarding device comprising a supporting member adapted to be secured in an opening in the floor, said opening being wholly in front of the door when the latter is in the closed position, a removable plate for closing said opening, a lever pivotally mounted on the support and adapted to swing in a plane parallel to the upper surface thereof, a crank

arm non-rotatably connected to said lever at the lower side of the support, a dash pot operatively connected between the support and the crank, said dash pot being adapted to retard the movement of the crank and lever in one direction and permit free movement in the other direction, and spring means connected with said crank and adapted to move the lever against the retarding action of the dash pot.

1,567,094. TELEPHONE-EXCHANGE SYSTEM. SAMUEL B. WILLIAMS, Brooklyn, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Original application filed Oct. 23, 1922, Serial No. 596,179. Patent No. 1,517,331, dated Dec. 2, 1924. Divided and this application filed June 21, 1924. Serial No. 721,377. 10 Claims. (Cl. 179—9.)



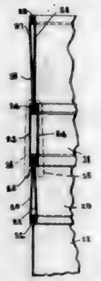
1. In a telephone system, a calling line, a register for said line, called subscribers' lines, selective switches for establishing connection between the calling line and said called lines, a controlling mechanism for selectively governing the operation of said switches, means controlled by one of said switches for setting up a record in said mechanism when connections are extended to certain ones of said called lines, means for operating said register, and means controlled by said mechanism when said record is set up therein for disabling the register operating means.

1,567,095. SELF-WINDING MEANS FOR SHADE ROLLERS. ALASTA ANDERSON, Troy, Ohio. Filed May 1, 1923. Serial No. 635,984. 1 Claim. (Cl. 156—36.)

A journal of the class described comprising a trunnion having means for coaction with an escapement pawl, a socket adapted for reception of a roller trunnion, said socket being open at a side thereof, and a cap carried by the socket and movable with respect thereto normally closing said opening, said cap being adapted to be opened to expose the opening for removal of the roller trunnion.

1,567,096. REVERSIBLE SHIRT. CHARLES E. ANDERTON, Jr., Milwaukee, Wis., assignor to Walton Duplex Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 12, 1922. Serial No. 594,129. 6 Claims. (Cl. 2—115.)

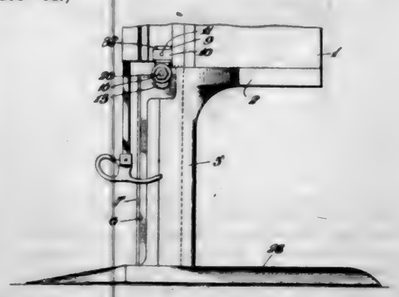
1. As a new article of manufacture, a complete reversible shirt including a collar formed as an integral part thereof and having a body portion, a neck band, and shoulder strips, the neck band being formed of a pair of strips, the shoulder strips being arranged in pairs, the adjacent edges of one of said pairs of strips being embraced by and secured between the adjacent edges of the other, the shoulder strips also embracing edges of the said body portion to provide an overlapping engagement on two sides between the neck band and the collar and the shoulder strips and the body to form substantially the same appearance in either position of use.



1,567,097. WELL FIRE EXTINGUISHER. ANTON AXEL ANTHONY, Memphis, Tenn. Filed Dec. 18, 1924. Serial No. 756,769. 4 Claims. (Cl. 169—4.)

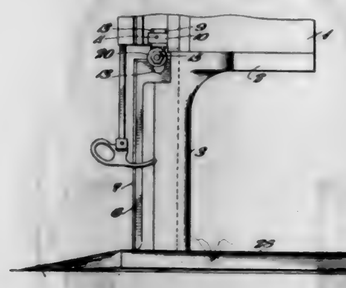
1. In a device of the class described, the combination, with a well-pipe and a source of supply for fire-extinguishing material, of a pipe line leading from said source, and having communication with said well-pipe through means which constitute, with said well-pipe, an injector, whereby fire-extinguishing material is drawn into said well-pipe by the fluid passing therethrough.

1,567,098. BLADE FOR FABRIC-CUTTING MACHINES. ISAAC APPELBAUM, Philadelphia, Pa. Filed Dec. 14, 1922. Serial No. 606,773. 14 Claims. (Cl. 164—58.)



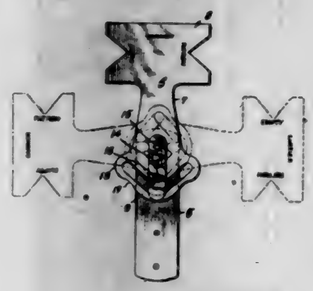
1. A vertically reciprocable knife for fabric cutting machines having opposed vertical cutting edges and a plurality of openings arranged in a group intermediate said cutting edges.

1,567,099. FABRIC-CUTTING MACHINE. ISAAC APPELBAUM, Philadelphia, Pa. Original application filed Dec. 14, 1922, Serial No. 606,773. Divided and this application filed Aug. 18, 1925. Serial No. 50,892. 12 Claims. (Cl. 164—75.)



1. In a fabric cutting machine, a blade, a retainer slot for the blade, a guide channel, a guide plate rigid with the blade and operating in said channel to direct the movements of the blade in a straight line, a slidable mounting adapted to be reciprocated, and a transversely yieldable head on the mounting having jaws for connection with one end of the blade.

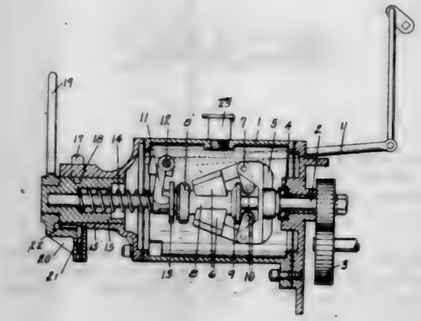
1,567,100. SIGNAL FOR MAIL BOXES. KEMPER W. BABER, Richmond, Va. Filed Dec. 3, 1924. Serial No. 753,749. 4 Claims. (Cl. 232—34.)



1. In a signalling device for mail boxes or the like, a bracket, a pair of vertically alined pins extending transversely from the bracket, a plate connecting the pins and spaced from the bracket, a signal provided with a longitudinally extending slot for receiving the uppermost pin and a transversely extending slot for receiving the lower pin.

1,567,101. CENTRIFUGAL GOVERNOR FOR GASOLINE ENGINES. CURTIS L. BAILEY, Lansing, Mich., assignor to "New Way" Motor Company, Lansing, Mich. Filed May 20, 1922. Serial No. 562,490. 2 Claims. (Cl. 264—3.)

1. The combination of a centrifugal governor, a suitable casing therefor with an axially projecting hub containing a bearing surface, an adjustable cap with a spiral groove notch in the periphery embracing the governor spindle adapted to and supported in said bearing, a governor spring on the said spindle with its outer end seated in said cap, a pointed screw pin in said hub the point engaging the said groove in the periphery of said cap, a lever for adjusting the said cap, a spring pin carried by said lever, and a notched segment on said hub extension and integral therewith yieldingly engaged by said spring pin, coacting as specified.



1,567,102. HEDDLE. LLOYD BALDERSTON, Wilmington, Del., assignor to J. E. Rhoads & Sons, Philadelphia, Pa., and Wilmington, Del., consisting of George A. Rhoads, William E. Rhoads, and Joseph Edgar Rhoads. Filed Nov. 4, 1925. Serial No. 66,849. 5 Claims. (Cl. 139—96.)

3. The combination in a heddle structure, of a base, and a series of heddles secured at the lower ends of the base and free at the upper ends, said heddles having tongues offset to form eyes.

1,567,103. AUTO-CHAIN FASTENER. DONALD V. BANDS, Kinross, Iowa. Filed June 4, 1924. Serial No. 717,785. 1 Claim. (Cl. 24—241.)

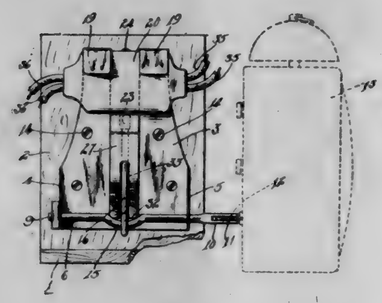
A connecting device for connecting the ends of chains, and including a body portion comprising a bar having an enlarged portion formed with a shoulder at its inner end and having a hook formed integral therewith, a slidable housing adapted to move over the body portion to close the hook member, said housing having a down-

wardly extended tongue adapted to engage the shoulder, said body portion having an opening arranged adjacent to the shoulder, a cotter key adapted to be positioned

in the opening, said cotter key adapted to cooperate with the shoulder to restrict movement of the housing, and said hook adapted to be housed by the housing.

---

1,567,104. SWITCH-OPERATING DEVICE. MARTIN JULIUS BECK and CARL L. BECK, St. James, Minn. Filed Feb. 1, 1923. Serial No. 616,897. 1 Claim. (Cl. 200—35.)

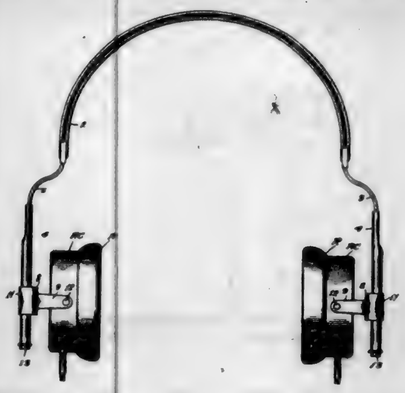


A device of the character described, comprising a base member, clamping lugs integral with said base member for holding an electrical switch mechanism having a push rod for operating the mechanism, a crank shaft rotatably mounted on said base member with its axis perpendicular to the axis of said push rod of said switch mechanism, said crank shaft being fashioned with one of its ends for engagement with the winding key of an alarm clock, a connecting rod connected at one end to said crank shaft and having its opposite end adjacent to the end of said push rod, whereby rotation of said crank shaft may occasion a longitudinal movement of said push rod, and bearing means for maintaining said connecting rod in registration with said push rod, said bearing means being formed integral with said base member and cooperating with said clamping lugs and securing said switch mechanism to said base member and encompassing the space occupied by said switch push rod when it is projected toward said connecting rod.

---

1,567,105. HEAD RECEIVER SET. ERNEST A. BOHLMAN, Chicago, Ill., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed May 20, 1922. Serial No. 562,313. 5 Claims. (Cl. 179—156.)

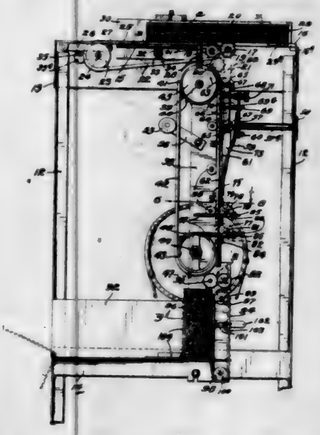
2. A device of the character described comprising a head band having a cylindrical member secured thereto, an adjustable receiver supporting member having its body portion intermediate its ends formed into a loop of a size to receive said cylindrical member by means of a



force fit so as to bear pressure against the same to retain said supporting member in its adjusted position under normal pressure.

---

1,567,106. PAPER-FOLDING MACHINE. VITUS A. BOKAN, Minneapolis, Minn. Filed June 30, 1922. Serial No. 572,081. 25 Claims. (Cl. 270—66.)



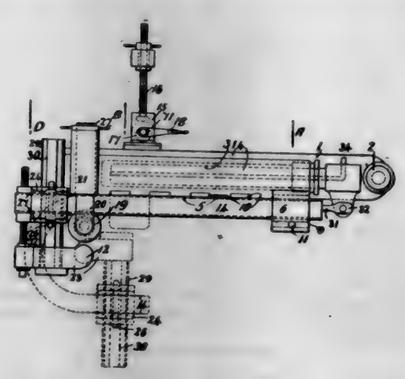
1. In a folding machine, means for holding a stack of sheets, reversely acting revoluble friction devices, and a stop located beyond said friction devices for holding the lowermost sheet, the friction device farthest from the stop having a circumference materially greater than that of the other friction device, whereby the respective portion of the lowermost sheet will be moved toward the stop and thereby buckled at its intermediate portion and fed between the friction devices.

---

1,567,107. MACHINE FOR BENDING TUBES AND THE LIKE. CARL ROBERT HUGO BONN, Hillhead, Glasgow, Scotland. Filed Aug. 4, 1922. Serial No. 579,673. 14 Claims. (Cl. 153—40.)

1. A tube bending machine comprising a supporting element; a cylinder and a ram so mounted thereon as to

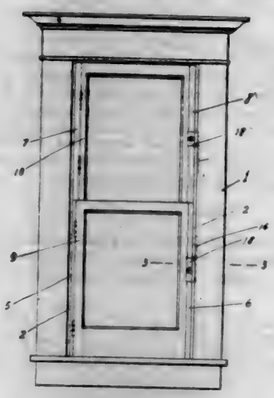
provide relative movement therebetween; means for clamping a tube to be bent to said cylinder; a guide roller for said tube; an axis; an arm mounted on said



axis; and a clamp-member carried by said arm adapted to engage said tube, whereby the latter may be bent upon a movement of the same.

---

1,567,108. COMBINED WINDOW SAFETY LOCK. HUGO R. BOTHE, Kenosha, Wis. Filed June 18, 1924. Serial No. 720,830. 1 Claim. (Cl. 292—142.)



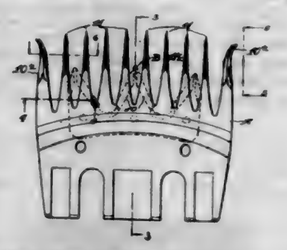
A locking means for the purpose set forth, comprising a casing, a bolt which is round in cross section slidable through the casing, said bolt having its upper edge formed with equi-distantly spaced notches, and its opposite edge at the center thereof provided with teeth, a roller having its ends journaled in the sides of the casing and provided with teeth for engagement with the teeth of the bolt, a removable operating element for the roller, a substantially U-shaped member in the casing having the ends of its parallel arms rounded inwardly to straddle the bolt and its said rounded portions centrally formed with tongues to engage the notches of the bolt, and an arched spring supported in the casing and having its ends contacting with the corners of the U-shaped member to influence the arms thereof into bolt engagement.

1,567,109. OVERSHOT. ALEXANDER BOYNTON, San Antonio, Tex. Filed Mar. 26, 1925. Serial No. 18,045. 12 Claims. (Cl. 294—86.)

1. An overshot including a hollow body portion adapted to receive a plastic substance, and a frangible packing member designed to prevent the escape of the plastic substance and yet admit the passage of the object to be recovered into the body portion and into the plastic substance whereby when the plastic substance hardens the object to be recovered will be firmly bound to the overshot.

---

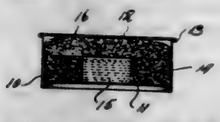
1,567,110. SHEEP SHEAR. FRANCIS G. W. BRISTOW, Sydney, Australia. Filed Apr. 9, 1925. Serial No. 21,805. 11 Claims. (Cl. 30—1.)



1. In a sheep shear and the like in combination with a vibrating toothed cutter, a comb and fixed cutter member having the comb teeth severally, at points situated forwardly of the line of stroke of the points of the teeth of the vibrating cutter, flexed away from the plane of shearing contact of the vibrating cutter and the comb for terminating at a substantial distance from said plane; whereby the vibrating cutter is upheld and the plane of shearing is positioned at a distance from the pelt to insure adequate length of stubble.

---

1,567,111. LUBRICATING DEVICE. WILLIAM B. BURR, North Plate, Nebr. Filed May 19, 1925. Serial No. 31,341. 1 Claim. (Cl. 15—138.)

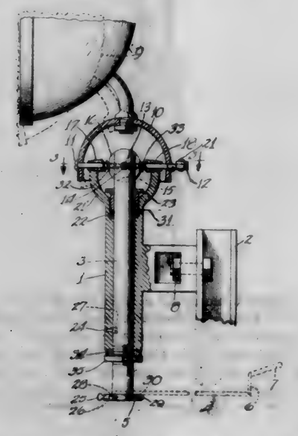


A lubricator of the character described comprising a casing, an annular pad of absorbent material disposed in the casing, the central aperture of the pad defining an

oil well, a pad projecting above the casing and extending entirely over this oil well, and a cover adapted to fit upon the casing.

---

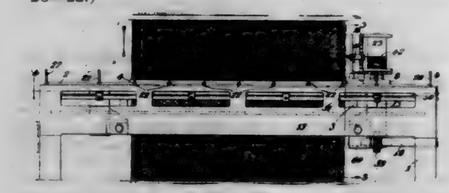
1,567,112. DIRIGIBLE HEADLIGHT FOR VEHICLES. JAMES M. CALKINS, Chicago, Ill., assignor to Scott Head Lamp Control, Miami, Fla., a Corporation of Florida. Filed July 19, 1923. Serial No. 652,632. 4 Claims. (Cl. 240—62.)



1. A dirigible headlight construction for vehicles having a steering mechanism, headlight supporting standards carried by said vehicle and having cam surfaces, headlight carrying members having a universal connection with each standard, a cam carried by said members for swinging said lights downwardly when said members are rotated, means for automatically moving said cams to take up wear, and means connecting said member with said steering mechanism, whereby said members are rotated when said steering mechanism is actuated.

---

1,567,113. MACHINE FOR UNWINDING WARP SHEETS. EDWIN E. CARLSON, Chester, Pa. Filed Feb. 5, 1925. Serial No. 6,979. 3 Claims. (Cl. 28—22.)

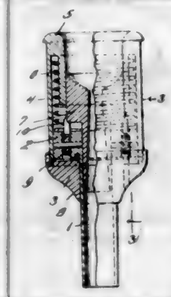


1. In a machine for unwinding warp sheets, an endless carrier encompassing the warp sheet, a spool carrier attached thereto, a spool spindle and spool carried thereby, a reversing screw rotatably mounted on the spool carrier, a thread guide operatively connected with the reversing screw, a series of pins disposed adjacent the path of travel of the spool carrier, and a star wheel fixed to the reversing screw adapted for engagement with the pins and to be rotated thereby.

---

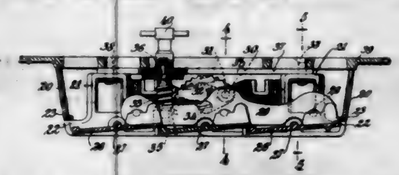
1,567,114. MOUTHPIECE. RURIC E. COBB, Longwood, Fla. Filed May 22, 1924. Serial No. 715,206. 2 Claims. (Cl. 84—398.)

1. In a mouth piece, a tubular member, gear wheels, journaled on the tubular member, a base collar slidably mounted upon the tubular member, a shell carried by the base collar, a rim member inserted in the shell, a spring interposed between the tubular member, and the rim member, a cup slidably mounted in the rim member and the tubular member, and rack arms carried by the cup and the base collar and engaging the gear wheels at opposite sides thereof.



---

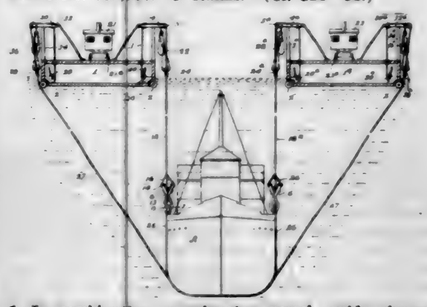
1,567,115. CONVERTIBLE REGISTER. LEONARD J. COLGAN, Glendale, N. Y., assignor to Tuttle & Bailey Manufacturing Company, Brooklyn, N. Y., a Corporation of New York. Filed Oct. 15, 1921. Serial No. 507,908. 13 Claims. (Cl. 98—49.)



1. In a convertible register, the combination with the usual casing, cover plate and dampers, of damper operating mechanism comprising a toothed sector, a worm in meshed relation therewith, and bearings for said worm, said sector, worm, and one of said bearings being detachable whereby a manual operating sector may be readily substituted for said worm and toothed sector, thereby converting said register from one of the "lock" type to one of the "non-lock" type.

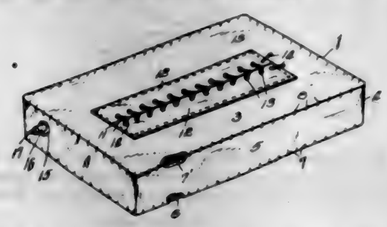
---

1,567,116. SHIP-HOISTING APPARATUS. JAMES G. CURRY, Leavenworth, Kans. Filed Nov. 18, 1924. Serial No. 750,607. 5 Claims. (Cl. 114—51.)



1. In combination, a salvaging vessel, guide sheaves supported above said vessel, a drum mounted on said vessel, a hoisting cable connected at one end to said drum and running over and depending from said guide sheaves, and an antifriction roller at the adjacent lower corner of the salvaging vessel for engagement by said cable.

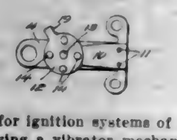
1,567,117. PNEUMATIC MATTRESS. ELMER G. DANIELS, St. Louis, Mo. Filed June 20, 1924. Serial No. 721,363. 2 Claims. (Cl. 5—348.)



1. In a mattress structure, an air inflated elastic receptacle, a fabric casing for said elastic receptacle, a slit formed in the fabric casing, facing strips having openings therein for the side edges of said slit, a lacing string receivable in said opening for closing the slit, and a pair of opposed endless wire frame members disposed within the fabric casing and sewed thereto by means of stitches for reinforcing the upper and lower edges of the fabric casing.

---

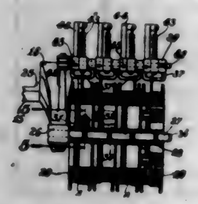
1,567,118. VIBRATOR STRUCTURE FOR SPARK COILS. MARION H. DICKSON, Lewistown, Ill. Filed Aug. 3, 1925. Serial No. 47,867. 4 Claims. (Cl. 200—90.)



1. A spark coil for ignition systems of an internal combustion engine having a vibrator mechanism; comprising a stationary element, a vibratory element, rotatable members, one of said rotatable members being mounted on each element, and a plurality of contact points mounted in spaced relation on said rotatable members, any one contact member being adapted for positioning to engage any one contact on the other member for circuit controlling cooperation.

---

1,567,119. FASTENER-STOCK-SUPPLYING MECHANISM FOR FASTENER-INSERTING MACHINES. STEPHEN A. DOBYNS, St. Louis, Mo., assignor to Champion Shoe Machinery Company, St. Louis, Mo., a Corporation of Missouri. Filed Nov. 25, 1922. Serial No. 603,287. 12 Claims. (Cl. 242—103.)

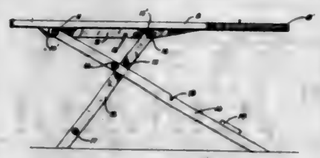


1. Mechanism for feeding a strand of fastener stock from a reel to means for operating on fastener stock, comprising, means for restraining the reel adapted to cause sudden release thereof.

---

1,567,120. IRONING BOARD. JOHN P. DORAU, Horicon, Wis. Filed Aug. 13, 1923. Serial No. 657,236. 1 Claim. (Cl. 68—10.)

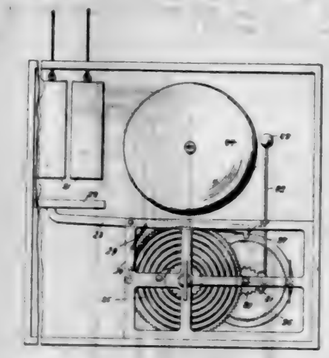
An ironing table, comprising a board member having a pair of spaced, longitudinally extending and downwardly projecting rails connected to the bottom portion thereof, a pair of legs pivotally connected to said rails near the mid-portion of said board, another pair of legs somewhat longer than the first-mentioned legs and pivotally connected to said rails near one end of the board, said pairs of legs crossing each other medially of their length with one pair extending between the other pair



of legs when the legs are moved away from the board, and lying parallel to and adjacent the board and extending in the same direction when folded toward the board, and stop rods carried by each pair of legs to abut against the other pair of legs to limit the unfolding movement of said legs and to hold them firmly in unfolded position.

---

1,567,121. FIRE AND BURGLAR ALARM SYSTEM. SCOTT IRVING DRESSER, Conticook, Quebec, Canada. Filed Apr. 4, 1925. Serial No. 20,790. 1 Claim. (Cl. 116—94.)



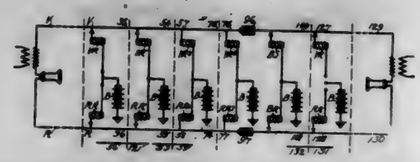
A combined burglar and fire alarm, comprising a motor operated alarm, and said motor including a notched wheel, a pivotally supported brake lever having a tooth to engage in the notch of the wheel to hold the motor inactive, weights suspended above the lever, flexible burnable and breakable elements to which the weights are attached, and said elements designed to be trained around the rooms of a building, a bracket to which the ends of the elements are secured, a lever pivotally secured on the bracket having a flared opening terminating in a knife edge through which the flexible element passes, and said lever having a loose connection with a swingable or movable portion of the building such as a door or window whereby the lever will be swung upon the opening of such element to sever the flexible element and permit of the weight dropping on to the brake to influence the latter to permit of the actuation of the motor.

---

1,567,122. AUTOMATIC TELEPHONE-EXCHANGE SYSTEM. BERT G. DUNHAM, Chicago, Ill., assignor, by mesne assignments, to Western Electric Company, Incorporated, a Corporation of New York. Filed Oct. 5, 1904. Serial No. 227,287. 6 Claims. (Cl. 179—18.)

1. In a telephone system, a metallic circuit line, a substation therefor, a selector for said line, selecting contacts in said selector, a pair of controlling magnets bridged across said line, a source of current adapted to energize said magnets over the limbs of said line and a

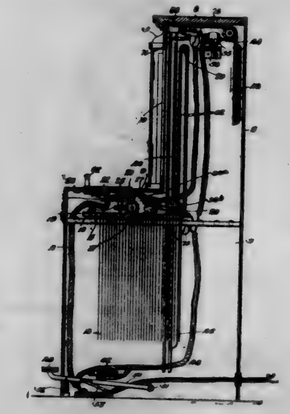
third conductor, means at the substation for connecting one limb of said line to said third conductor for energizing one of said magnets to cause the movement of said selecting contacts in one direction, means at the substation for closing the circuit between the other limb of said line and said third conductor for energizing the sec-



ond of said magnets to cause the movement of said selecting contacts in another direction, a side switch adapted to disconnect both of said magnets and said line, and means controlled by said second magnet for operating said side switch to disconnect both of said magnets from said line, substantially as described.

---

1,567,123. DISPLAY DEVICE. SOLOMON ELIAS DUVECK, Montreal, Quebec, Canada, assignor to Public Service Directories, Inc., New York, N. Y. Filed Apr. 8, 1922, Serial No. 550,726. Renewed Nov. 9, 1925. 6 Claims. (Cl. 40—28.)

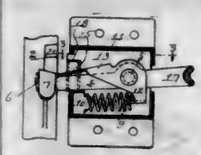


1. In a machine of the character described, the combination of a plurality of display cards, means for supporting the same, means for selecting certain of said cards, electrical means for raising and lowering said cards, means for locking the selecting means, means engageable by the cards when in one position for causing the electrical means to cease operation, and means actuated by the cards upon movement to another position, to throw the selecting mechanism locking means out of operation.

---

1,567,124. DOOR LATCH. ANDREW EKMAN, Grand Rapids, Mich., assignor to Grand Rapids Brass Company, Grand Rapids, Mich., a Corporation of Michigan. Filed May 9, 1924. Serial No. 712,014. 3 Claims. (Cl. 292—332.)

1. In combination with a keeper therefor, a door latch comprising: a bolt having a rocking movement into and out of latching engagement with the keeper; a support; a member having a rocking movement parallelly with the bolt's said movement and a swinging movement transversely thereto; means for yieldingly pressing said member in resting position on the support and in latch-operating engagement with the bolt, said member being movable from the support by striking the keeper.



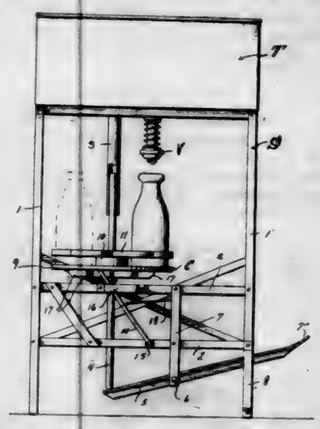
---

1,567,125. DOOR LATCH. ANDREW EKMAN, Grand Rapids, Mich., assignor to Grand Rapids Brass Company, Grand Rapids, Mich., a Corporation of Michigan. Filed Feb. 19, 1925. Serial No. 10,207. 2 Claims. (Cl. 292—164.)

1. In combination with a swingable door; a latch having an operating lever fulcrumed on the outer side of the door; a lever fulcrumed on the inner side of the door; a lever fulcrumed on the inner side of the door and having an arm engaged by an arm of the second-mentioned lever; a slidable rod extending through the door and engaging the first-mentioned lever and engaged by the other arm of the third-mentioned lever to swing the first-mentioned lever to unlatching position by the swinging movement of the second-mentioned lever.

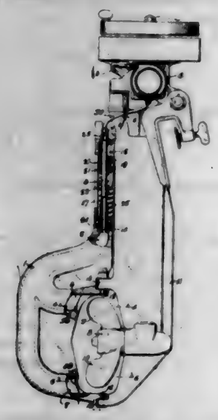
---

1,567,126. BOTTLE-FILLING APPARATUS. JAMES G. ERION, Grand Island, Nebr. Filed Sept. 4, 1924. Serial No. 735,916. 6 Claims. (Cl. 226—96.)



1. A bottle filling machine comprising, in combination, a supply tank, a normally closed filling valve depending therefrom, a member supported for both vertical movement and rotary movement, a bottle holding plate carried by said member and moving therewith, said bottle holding plate being adapted to position the bottles below the valve, means for raising said bottle holding plate to bring a bottle into engagement with the filling valve, and means coacting with the bottle holding plate upon downward movement thereof to rotate said plate a distance sufficient to bring a succeeding bottle in position directly below the filling valve.

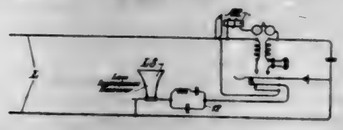
1,567,127. WATER-COOLING SYSTEM FOR OUTBOARD MOTORS. OLE EVINRUDE, Milwaukee, Wis., assignor to Elto Outboard Motor Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed June 28, 1924. Serial No. 722,885. 21 Claims. (Cl. 115—18.)



1. In a water cooling system for outboard motors, in combination, a housing, a propeller supported at the lower end of said housing, said rudder being provided with a passage having the inlet end thereof arranged adjacent to said propeller, a water jacket supported by said housing, a tube connecting said water jacket with the outlet end of said passage, and an outlet connection leading from said water jacket.

---

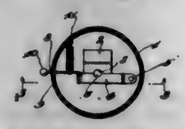
1,567,128. WIRE PROGRAM-TRANSMISSION SYSTEM. CHARLES H. EWITT, Millburn, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 18, 1923. Serial No. 668,447. 5 Claims. (Cl. 179—81.)



1. In a program transmission system, a subscriber's telephone line having a subscriber's telephone set at the subscriber's station and a program receiving circuit normally bridged across said line at the subscriber's station when the telephone set is not in use, said receiving circuit including a low impedance receiver for program currents and means in said circuit to prevent direct current from flowing through said circuit.

---

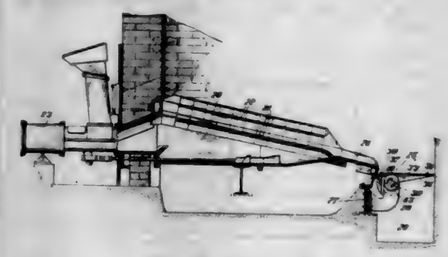
1,567,129. FASTENER. IRLEY C. FIFE, Chicago, Ill. Filed Jan. 18, 1924. Serial No. 687,112. 1 Claim. (Cl. 24—211.)



A fastener including a casing having an opening in one wall and a slot in the side of said casing, an angular plate in the casing having one flange secured to the wall of the casing opposite the opening and the other flange spaced from the walls of the casing and having an arcuate recess in the outer edge thereof, a movable arm arranged parallel with the aligning flange of the angular plate, said arm having one end offset and pivotally connected to the wall of the casing to which the angular plate is attached, an arcuate recess in one edge of the arm cooperating with the first recess to normally form an opening aligning with the opening in the wall of the casing, a rod attached to the free end of the arm, said rod being movable in the slot, and a coil spring connected to the rod and to the casing whereby to normally retain the arm in abutting relation with the flange of the angular plate which is spaced from the walls of the casing.

---

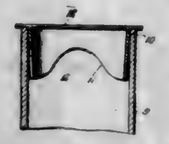
1,567,130. ASH-DUMPING MEANS FOR UNDERFEED STOKERS. FRANK E. FLEMING and WILLIAM E. DE VOE, Detroit, Mich., assignors, by mesne assignments, to Riley Stoker Corporation, Worcester, Mass., a Corporation of Massachusetts. Filed Dec. 24, 1920. Serial No. 433,011. 6 Claims. (Cl. 110—32.)



3. A furnace ash-dump platform structure, comprising a shaft of noncircular section and a plurality of platform-sections each having a hub with a recess shaped similarly to the cross-section of the shaft for engagement with the latter by movement of the platform-section in a predetermined direction with respect to the shaft, adjacent platform-sections having detachably inter-engageable means arranged to be interengaged by movement of one said platform-sections relative to another in the same direction that engages the first said platform section with the shaft.

---

1,567,131. CAP FOR WASTE AND VENT PIPES. JOHN R. FLINN, Johnstown, Pa., assignor of one-half to Timothy P. Flinn and P. H. Farrell, both of Johnstown, Pa. Filed Jan. 29, 1925. Serial No. 5,573. 1 Claim. (Cl. 137—76.)



A cap for waste and vent pipes including an integral body comprising a tapering tubular portion one terminal of which is scalloped and the other terminal equipped a circular head the periphery of which protrudes beyond the outer periphery of the pipe.

---

1,567,132. TOY BALLOON. HARRY R. GILL, Ashland, Ohio, assignor to The Eagle Rubber Company, Ashland, Ohio, a Corporation of Ohio. Filed Jan. 30, 1925. Serial No. 5,904. 4 Claims. (Cl. 46—37.)

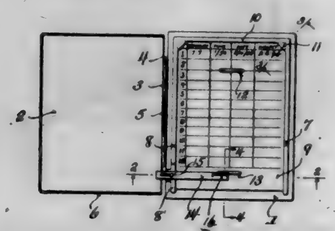
1. As a new article of manufacture, a thin-walled inflatable rubber body, the walls whereof are substantially transparent in the distended condition of the body, the

latter having a design imprinted on its outer surface which is visible in the normal collapsed condition of the body but becomes substantially invisible upon distention

thereof and a second design imprinted on its inner surface which becomes visible upon such distention of the body.

---

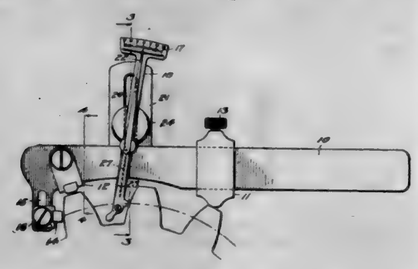
1,567,133. CARD CONTAINER. EDGAR NATHAN GOLDSTINE, Milwaukee, Wis. Filed Mar. 3, 1925. Serial No. 12,878. 3 Claims. (Cl. 40—10.)



1. A card container comprising a base having marginal flanges adjacent two of its edges and having retaining webs for the upper corners of a card, a cover movably held to said base, and a retainer adapted to be moved across the lower portion of such card to hold such portion in position.

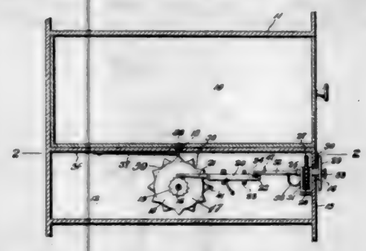
---

1,567,134. GEAR-TOOTH GAUGE. JAMES W. GOSNELL, Baltimore, Md., assignor to Poole Engineering and Machine Company, Baltimore, Md., a Corporation of Maryland. Filed Apr. 8, 1925. Serial No. 21,621. 6 Claims. (Cl. 33—174.)



1. In an instrument for measuring the pitch or tooth spacing of gears, the combination of a handle member, two supporting legs spaced longitudinally of said handle and adapted to engage the face of two teeth, a gauge on said handle adapted to engage the pitch line of one of said teeth, a movable indicator carried by said handle adapted to engage the pitch line of a third tooth, and a scale carried by said handle cooperating with said indicator.

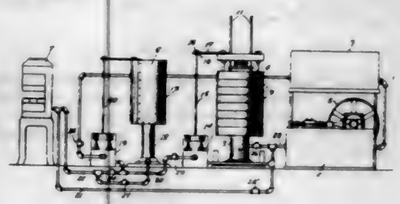
1,567,135. SAFE-DEPOSIT-BOX LOCK. JAMES G. GREGORY, Quincy, Fla. Filed Apr. 25, 1925. Serial No. 25,859. 16 Claims. (Cl. 70—53.)



1. A locking device of the character described including a series of latches, a series of disks each having a series of lugs each engageable with the corresponding latch and when engaged shifting the latch to a locking position, and single means for selectively giving a step by step movement to anyone of the disks independently of any other disk to carry its lugs successively into or out of operative engagement with the corresponding latch.

---

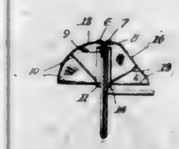
1,567,136. PRESSURE-CONTROL SYSTEM. HENRY J. GRIGOLEIT, Chicago, Ill., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Original application filed July 2, 1923, Serial No. 649,185. Divided and this application filed Dec. 17, 1924. Serial No. 756,488. 20 Claims. (Cl. 138—16.)



1. A valve device of the character described including a plurality of valve units, mechanism for operating said valve units, means for simultaneously operating said mechanism, and different sized passages through said valve controlled by said different valve units.

---

1,567,137. EYESHIELD. WILLIAM C. GULDE, St. Paul, Minn., assignor to Lawrence Welp, Bancroft, Iowa. Filed May 26, 1924. Serial No. 715,981. Renewed May 12, 1925. 1 Claim. (Cl. 2—13.)



An eyeshade including a curved body portion, means for securing the curved body portion to the frame of an eye glass, said body portion having a concaved outer surface, curved members secured to the inner surface of the body portion adjacent to the ends thereof, said curved members having concaved inner surfaces, a flexible covering supported by the body portion and adapted to move within the outer concaved surface thereof, flexible members at the ends of the body portion and adapted to move within the concaved surfaces of the curved members that are secured to the inner surface of the body portion.

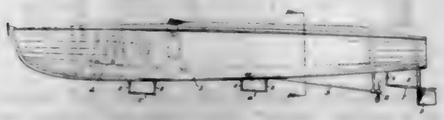
---

1,567,138. HOLDER AND GUIDE FOR SKEINS OF SILK, COTTON, OR OTHER SIMILAR MATERIAL. FERDINAND Q. HARTMAN and EUGENE ATWOOD HARTMAN, Danville, Pa. Filed May 16, 1924. Serial No. 713,730. 11 Claims. (Cl. 242—127.)

1. A stationary skein holder comprising, a frame having a continuous peripheral band, and a series of skein holding supports, each of said supports having one end free to receive the skein and the opposite end fixed to one side of said frame.

---

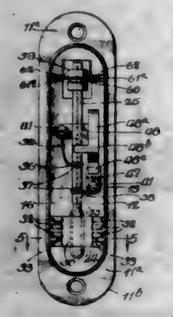
1,567,139. HYDROPLANE. GUNNAR J. HARTVIG, Highland Park, Mich. Filed June 16, 1924. Serial No. 720,156. 3 Claims. (Cl. 114—66.5.)



1. In combination with the hull and propeller of a vessel, hydro-planes spaced below said hull forward of said propeller, and stern planes spaced below said hull abaft said propeller, said planes being supported by struts at the front and back thereof.

---

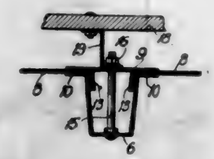
1,567,140. MERCURY-TUBE SWITCH. WILLIAM G. HARTWIG, Chicago, Ill. Filed May 11, 1923. Serial No. 638,165. 2 Claims. (Cl. 200—141.)



1. A switch comprising a mercury tube, means for supporting said mercury tube adjacent each end thereof, a pair of contacts connected to said tube between said supports, a metallic clip connected to one of said contacts and provided with a resilient arm having a part engaging the outer side of said tube between said supports, and a second metallic clip connected to the other of said contacts and adapted to be engaged by said resilient arm upon breakage of said tube between said supports.

---

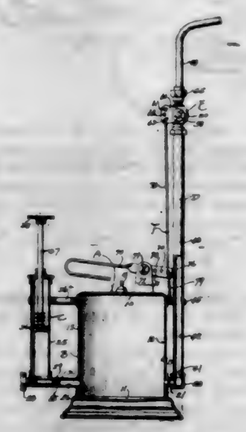
1,567,141. CAR ROOF. ROBERT D. HAWKINS, Wilmington, N. C. Filed Oct. 27, 1924. Serial No. 746,011. 5 Claims. (Cl. 108—5.4.)



1. A car roof comprising channel-shaped carlines extending from side plate to side plate and rigidly secured thereto, roof sheets extending from side plate to side plate with their side margins supported on the side walls of adjacent carlines, cap strips extending from side plate to side plate and covering the carlines and the side marginal portions of the sheets supported thereby, and means for securing said caps in position, said means comprising a plurality of upright fastening members removably engaging said cap strips and permanently secured directly to the webs of the carlines.

---

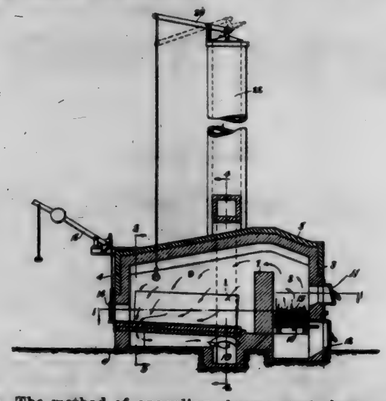
1,567,142. POWER OIL CAN. CLARKSON GLEN HAWORTH, Russiaville, Ind. Filed Apr. 28, 1924. Serial No. 709,648. 10 Claims. (Cl. 221—52.)



1. In an oil can of the class described a container, a spout for the container, a valve for the spout, and means for varying the maximum open position to which the valve may be moved.

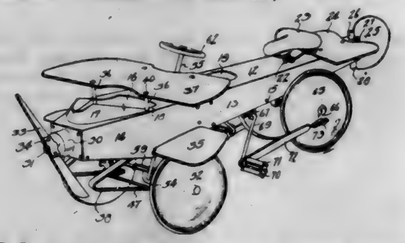
2. In an oil can of the class described a container, a spout for the container, a valve for the spout, means for varying the maximum open position to which the valve can be moved, and means for building up pressure within the can for the full speed of lubricant through said spout.

1,567,143. ANNEALING STEEL SHEETS. JOHN THOMAS HAY, Canton, Ohio, assignor to United Alloy Steel Corporation, New York, N. Y., a Corporation of New York. Filed Jan. 19, 1925. Serial No. 3,309. 10 Claims. (Cl. 148—16.)



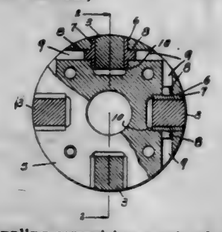
1. The method of annealing chrome steel sheets which includes heating the sheets for annealing in an oxidising atmosphere to form a soluble scale thereon.

1,567,144. TOY VEHICLE. NICKOLAS HECK, Sioux City, Iowa, assignor of one-half to James R. Carnes, Sioux City, Iowa. Filed Apr. 30, 1925. Serial No. 26,964. 5 Claims. (Cl. 208—42.)



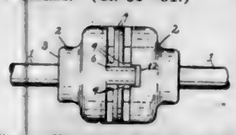
5. In a toy vehicle, a base, an inverted, channel-shaped shell secured to the sides of said base, having an upper wall and side walls, wheels supporting the vehicle, a pair of sleeves supported by the base and extending through said upper wall, a plane supported upon the upper ends of said sleeves, and bolts extending through the planes, the sleeves and the base, securing the plane in fixed relation above the body.

1,567,145. SHAFT COUPLING. EUGENE HIGGINS, Jackson, Mich. Filed Mar. 15, 1924. Serial No. 699,529. 2 Claims. (Cl. 64—91.)



1. A shaft coupling comprising a pair of shaft members each having driving lugs and recesses adapted to receive the driving lugs of the other member, a cruciform coupling member coacting with the driving lugs of both shaft members, and bearing members mounted on the bearing faces of said coupling member to coact with said driving lugs, said coupling member having bores disposed transversely of its bearing faces, said bearing members having lugs engaging said bores whereby the bearing members are retained in position when the driving lugs are in position.

1,567,146. SHAFT COUPLING. EUGENE HIGGINS, Jackson, Mich. Filed May 24, 1924. Serial No. 715,541. 6 Claims. (Cl. 64—91.)

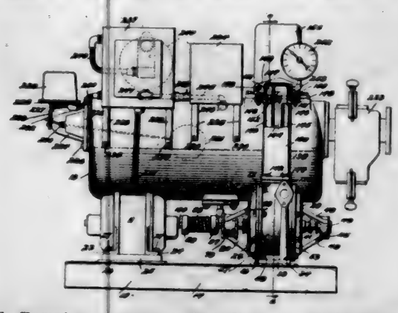


1. A shaft coupling comprising a pair of cup-shaped shaft members formed as stampings with driving lugs projecting from the edges thereof, said driving lugs having inturned flanges at their longitudinal edges, and a coupling member comprising a pair of sheet metal disks having radial openings with laterally disposed flanges at the edges thereof providing bearings for said driving lugs, said disks being disposed back to back and having tongues and slots, the tongues of one interlocking with the slots of the other.

1,567,147. POTATO-SEED CUTTER. ALBERT T. HUGAAS, Hetland, S. Dak. Filed May 26, 1925. Serial No. 33,025. 2 Claims. (Cl. 146—169.)

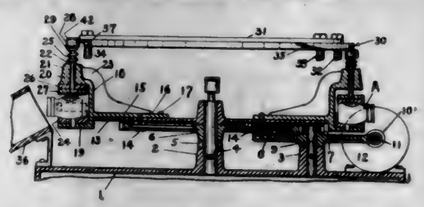
1. A vegetable cutter of the class described comprising a cylinder provided at its bottom with cutters, the vegetables adapted to be dropped into said cylinder, a hopper by means of which the vegetables are fed into the cylinder, a plunger reciprocable in said cylinder, and means pivotally mounting said plunger upon said hopper to dispose it in fixed relation with respect to the cylinder and cutters.

1,567,148. PUMPING APPARATUS. IRVING C. JENNINGS, South Norwalk, Conn. Filed Feb. 21, 1924. Serial No. 694,414. 55 Claims. (Cl. 103—6.)



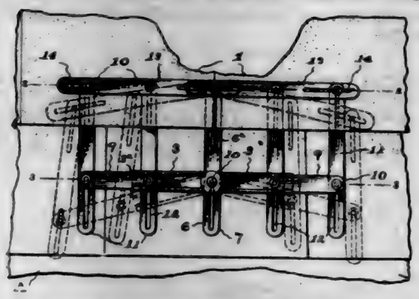
1. Pumping apparatus including in combination, a base, a tank mounted on the base, water and air pumps on the base, and means providing communication between said pumps and tank, said means including a manifold having all the air passages between said pumps and tank.

1,567,149. BOTTLE-LABEL PRESS. EDWARD E. KALLENBACH, New York, N. Y. Filed Jan. 11, 1924. Serial No. 685,591. 19 Claims. (Cl. 216—9.)



1. In a bottle label press, the combination with a plurality of radially extending supports for carrying bottles provided with labels, driving means for rotating supports in a horizontal plane about a common axis, pressure faces travelling with said supports and disposed above said supports, a cam stationary relative to said supports and disposed directly above the path of movement of said pressure faces in order to act in a straight line for causing the said pressure faces to be mechanically and positively lowered into engagement with the labeled surfaces of the bottles during a portion of their rotation, and springs for raising the pressure surfaces out of pressure exerting position and for normally maintaining said pressure faces in position to permit a bottle to be discharged, to receive a succeeding bottle and thereupon again to be actuated by said cam.

1,567,150. SHINGLE STRAP. JOHN A. KAYE, Sault Ste. Marie, Ontario, Canada. Filed Aug. 18, 1924. Serial No. 732,854. 14 Claims. (Cl. 108—38.)

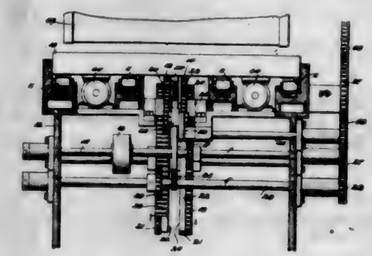


1. A shingle strap including a plurality of articulated retaining strips adapted to be adjusted relative to each other, and means for fastening the retaining strips in position on the top of the shingles in such an adjusted position as to prevent warping or curling thereof.

1,567,151. TRACK TORPEDO. HUGH WILLIAMSON KELLY, Woodbridge, N. J. Filed July 11, 1925. Serial No. 42,920. 4 Claims. (Cl. 246—487.)

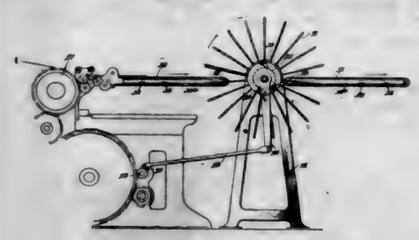
1. A track torpedo comprising in combination, a body of detonating material; and retaining and enclosing means for the said body of non-metallic elastic material surrounding the body on all sides to protect it from moisture and including a member having upper and lower walls intergrally joined together at their ends and having integrally formed depending rail engaging lugs adjacent the ends of the walls, the said member being initially of uniform shape and cross section from side to side so that it may be formed by extrusion.

1,567,152. PRINTING-PRESS-BED MOVEMENT. WILLIAM M. KELLY, Jersey City, N. J. Filed Apr. 23, 1921. Serial No. 463,932. 7 Claims. (Cl. 74—98.)



1. The combination with a reciprocating member and means for reciprocating the same including two racks on said member, a pair of oppositely rotating gears each having teeth on a portion only of its periphery, a pinion interposed between each gear and one of the racks and constantly in mesh with said rack, the toothed portion of the gears being arranged so that the member is driven alternately in opposite directions of a reversing mechanism including a second member which is reciprocated parallel to the first reciprocating member, and movable racks constituting means for directly connecting the two members while the second member is reversing.

1,567,153. SHEET-DELIVERY APPARATUS. WILLIAM M. KELLY, Westfield, N. J. Filed Sept. 7, 1922. Serial No. 586,700. 21 Claims. (Cl. 34—28.)

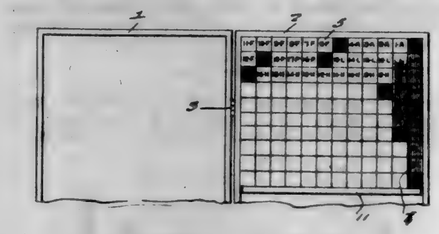


1. A sheet delivery apparatus comprising, in combination, means for conveying sheets, positively acting means for delivering sheets, relatively slow acting means for taking successive sheets from said conveying means and operating step by step in timed relation to said conveying means, such slow acting means depositing the sheets on said delivery means and including a heater to which the sheets are exposed during their slow travel from said conveying means to said delivery means.

1,567,154. GAME. THEODORE KNUTSON, Fertile, Minn. Filed Apr. 16, 1925. Serial No. 23,565. 3 Claims. (Cl. 273—135.)

3. A game of the class described comprising a box formed of a pair of mating sections hinged together at

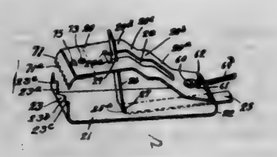
one side for cooperation in opposed relation, and a plurality of cubic blocks provided with indicating indicia



on one face and other indicia on the opposite face and controlling means for determining the position of the blocks in one section of the box.

---

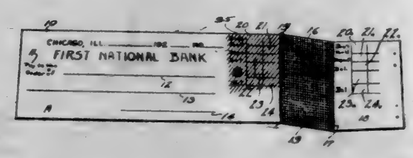
1,567,155. ELECTRIC CONNECTER. ISAAC W. LITCHFIELD, Newtonville, Mass. Filed May 7, 1921. Serial No. 467,659. 16 Claims. (Cl. 173—273.)



13. An electric connecter having a pair of integral spaced-apart resilient arms terminating in opposed clamping jaws, one of said arms formed with a cam face and a slot extended along the length of the arm through said cam face, said other arm having a perforation, an operating lever having a reduced portion pivotally received in said perforation and formed with a notched upper end portion which is received in said slot with the side walls of the slot received in the notches, whereby said lever is arranged to engage said cam face and move said jaws forcibly toward each other and binding means for a circuit lead.

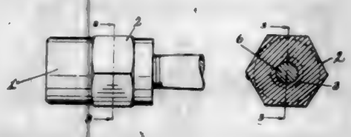
---

1,567,156. SAFETY BANK CHECK. WILLIAM F. LOHFF, Holstein, Iowa. Filed Dec. 20, 1924. Serial No. 757,139. 4 Claims. (Cl. 283—8.)



1. In a device of the class described, a check body having an appropriately designated column in which the amount of the sum ordered by the check, and the balance of deposit, must be written, in order to render the check negotiable, a balance indicating stub underlying that portion of the check body which contains said column, and means for transmitting to the stub an impression of the characters written in said column, said stub being sealed at its edges to the under surface of the check body, a second balance-indicating stub underlying said first mentioned stub, and means for transmitting a second duplicate impression of said characters to said second stub.

1,567,157. WHEEL PULLER AND THE LIKE. JOHN L. MCCLELLAND, Kalamazoo, Mich., assignor to American Sharpening Machine Company, Kalamazoo, Mich. Filed Sept. 4, 1924. Serial No. 735,797. 4 Claims. (Cl. 29—85.)



3. A device of the class described comprising a body member having a threaded bore with a recess at the inner end, and an impact block of harder material than the body member seated in said recess and projecting centrally into the bore in overlapping relation to the threads thereof.

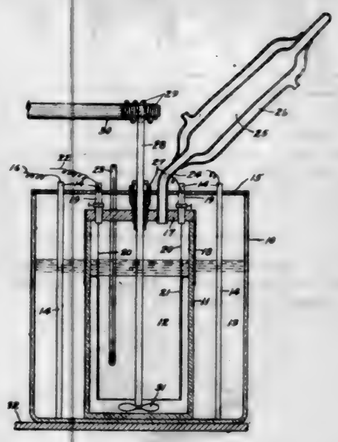
---

1,567,158. INDIGOID DYESTUFF OF THE ANTHRAQUINONE SERIES AND INTERMEDIATE PRODUCTS AND PROCESS OF MAKING SAME. BERTRAM MAYER and WILHELM MOSER, Basel, Switzerland, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Filed Nov. 18, 1924. Serial No. 750,659. 8 Claims. (Cl. 260—51.)

4. The method of producing new indigoid dyestuffs, consisting in condensing glycine with 2-halogen-anthraquinone-3-carboxylic acid, treating the anthraquinone-3-carboxylic acid thus obtainable with condensing agents, converting the indoxyl compounds of the 2:3-anthraquinone series thus obtainable into indigoid dyestuffs by treatment with the usual well known agents that convert the indoxyl compounds into indigoid dyestuffs and treating the new indigoid dyestuffs with halogenating agents.

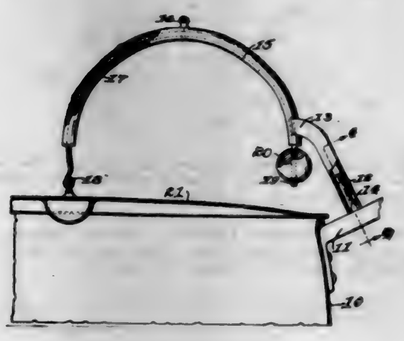
---

1,567,159. METHOD FOR PRODUCING LEAD COMPOUNDS. BRIAN MEAD, Boston, Mass., assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed June 14, 1923. Serial No. 645,465. 14 Claims. (Cl. 204—9.)



1. The process of producing a lead alkyl which comprises forming an emulsion of an alkyl halide in water, placing lead in contact with the emulsion, and reducing the reaction mass thus formed.

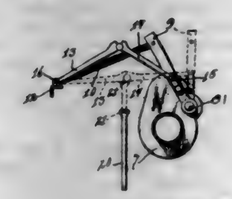
1,567,160. COOKING-UTENSIL-COVER SUPPORT. HENRY J. MEYER, New Orleans, La. Filed Aug. 27, 1924. Serial No. 734,518. 11 Claims. (Cl. 53—8.)



1. In combination with a cooking utensil, a cover therefor, means carried by the utensil for supporting the cover, said supporting means being so constructed and arranged as to permit the cover to be raised by pressure within the utensil and to automatically retain the cover in any one of a plurality of lifted positions.

---

1,567,161. ICE-CAN FILLER. VAN P. MILLER, Chicago Heights, Ill. Filed July 26, 1924. Serial No. 728,407. 2 Claims. (Cl. 226—127.)

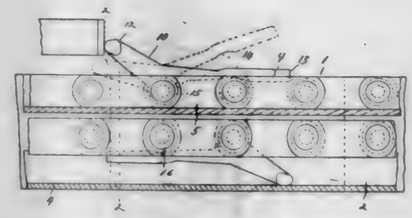


1. An ice can filler of the type described comprising a portable frame fashioned so as to be partially received within an upright ice can, means for conducting water to said frame whereby the water is delivered to said ice can, a normally closed valve associated with said water conducting means, a break-joint consisting of a pair of pivotally connected links for maintaining said valve open when the cooperating links of the break-joint are in longitudinal alignment, a float carried by said frame, and a rod extending upwardly from said float and having its upper portion adapted to engage with said break-joint in the proximity of the pivotal connection between the cooperating links thereof, whereby the rod as the float is elevated may open the break-joint to close said valve.

---

1,567,162. CONVEYER CHAIN. HORACE H. MORGAN, Detroit, Mich., assignor to Palmer-Bee Company, Detroit, Mich., a Corporation of Michigan. Filed Nov. 27, 1922. Serial No. 603,684. 2 Claims. (Cl. 198—170.)

1. The combination with a conveyer chain having a series of pivotally connected links, of a dog having a head, a tail, and an intermediate pivot portion, said pivot portion being connected to the chain by one of the pivots



connecting the links and said tail extending over an adjacent pivot connecting the links.

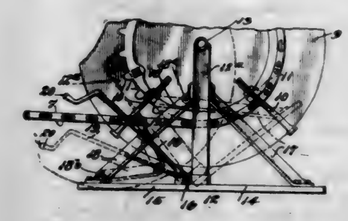
---

1,567,163. PROCESS FOR PREVENTING DISCOLORATION OF CANNED FOODS. THURLOW W. MORGAN and WILLIAM W. MURRAY, Chicago, Ill., assignors to Continental Can Company, Inc., New York, N. Y., a Corporation of New York. Filed May 16, 1925. Serial No. 30,873. 1 Claim. (Cl. 99—1.)

The process of preventing the discoloration of canned foods comprising providing the inner surface or a portion thereof, of the metal forming the container for the food, with a lacquer coating having an insoluble metallic compound of such metal or metals forming sulphides which are not dark colored thoroughly incorporated with the ingredients and homogeneously distributed through the lacquer prior to the application of the lacquer to the surface of the metal, so that said compound is permanently embodied in the lacquer and held in place on the inside of the container during processing and subsequent thereto.

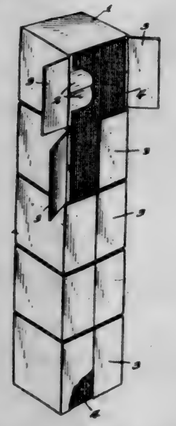
---

1,567,164. WELL-DRILLING-CABLE SPOOLER. JESSE A. MORRISON, Salt Creek, Wyo.; Harriett Morrison administratrix of said Jesse A. Morrison, deceased. Filed June 16, 1923. Serial No. 645,788. 1 Claim. (Cl. 242—54.)



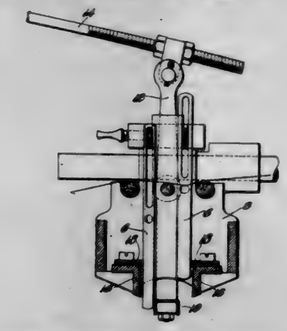
In machinery for use in well drilling operations, a support, a spool rotatively mounted thereon, a driven sprocket for the spool, hook members detachably connecting the driving sprocket with the spool at one end of the latter, the support for the spool comprising a journal post, a base for said post made in sections, one section rigid with the post and the other pivotally attached to the post, and a jacking contrivance for moving the post and its section relatively to the other section of the base, including a base connecting the pivoted section of the base with the post, and including toggle links, with a screw actuating means for said links.

1,567,165. PACKAGE AND METHOD OF PACKING. EDWARD T. NOLAND, St. Louis, Mo., assignor to Liggett & Myers Tobacco Company, New York, N. Y., a Corporation of New Jersey. Filed Mar. 21, 1925. Serial No. 17,182. 8 Claims. (Cl. 229—6.)



7. A unitary package containing a selected number of similar cartons having folded end flaps, and arranged side by side in abutting relation, and connected by strips of semi-rigid material of a length to extend across the ends of all of the cartons, and sealed beneath the flaps.

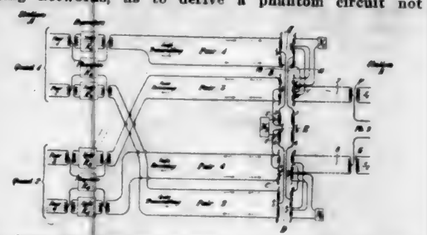
1,567,166. WARP STOP MOTION FOR LOOMS. JONAS NORTHROP, Hopedale, Mass., assignor to Hopedale Manufacturing Company, Milford, Mass., a Corporation of Massachusetts. Filed Nov. 16, 1923. Serial No. 675,122. 2 Claims. (Cl. 139—351.)



1. A warp stop motion for looms having, in combination, drop wires having slots at their upper ends, a drop wire bar in the slots, a feeler adapted to engage with the lower end of a fallen drop wire, and stationary means cooperating with the feeler above the latter to turn the drop wire to spread the warp on either side thereof to indicate the place of warp breakage.

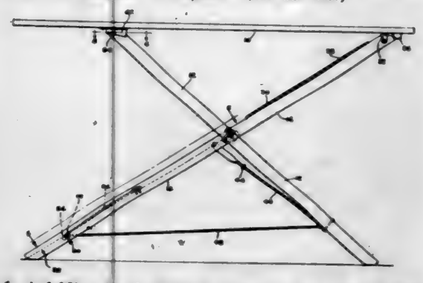
1,567,167. FOUR-WIRE REPEATER CIRCUITS. HARRY NYQUIST, Elmhurst, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed July 8, 1921. Serial No. 483,331. 7 Claims. (Cl. 179—170.)

1. In a signaling system, the combination with one four-wire signaling circuit of a second four-wire signaling circuit, a two-wire circuit individual to each four-wire circuit, a network adapted to balance each of the said two-wire circuits, and a plurality of repeating coils having their windings so connected with the said four-wire circuits and with the said two-wire circuits and the balancing networks, as to derive a phantom circuit not



only from the four-wire circuits but also from the two-wire circuits, the said phantom circuit being thereby rendered electrically continuous.

1,567,168. FOLDING IRONING TABLE. KEMUEL B. OLANDER, Minneapolis, Minn. Filed June 30, 1924. Serial No. 723,235. 4 Claims. (Cl. 68—10.)

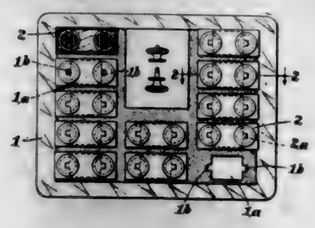


1. A folding ironing table comprising an ironing board, an inclined support pivotally attached to one end of said board, a pair of inclined legs pivotally attached to said support, means for removably attaching the upper ends of said legs to the other end of said board, and a pair of cross links connecting the lower portion of said legs with intermediate portions of said support respectively below the pivotal connection of the legs therewith whereby the lower ends of said legs will be spread during the unfolding operation and will be brought toward each other during the folding operation.

1,567,169. REAR-VIEW MIRROR. RALPH R. PATTERSON, Alameda, Calif. Filed Dec. 29, 1924. Serial No. 758,612. 4 Claims. (Cl. 88—1.)

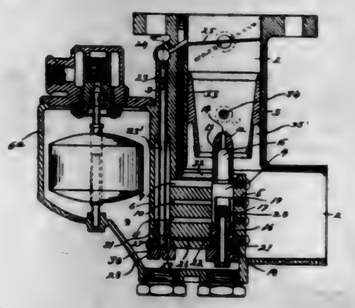
1. The combination with a vehicle-body and a window thereof, of a rear view mirror comprising a strip of reflective material mounted within said window and constituting a stop therefor.

1,567,170. DISPLAY DEVICE. JOHN V. PILCHER, Louisville, Ky. Filed Mar. 16, 1925. Serial No. 16,001. 4 Claims. (Cl. 211—24.)



1. Display means of the character described a foundation sheet having an opening therein, and an article carrying card carrying spaced articles which have parts projecting in rear of the card, which parts detachably engage the edges of said opening.

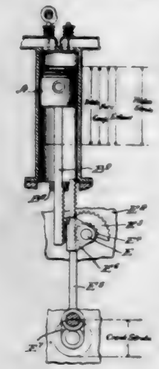
1,567,171. CARBURETOR. ANTOINE P. PLAUT, Detroit, Mich., assignor of one-half to Roberts Brass Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Aug. 22, 1921. Serial No. 494,361. 3 Claims. (Cl. 261—41.)



3. In a carburetor the combination with an induction passage and a throttle therein, of a main fuel nozzle in said induction passage having an emulsifying chamber communicating therewith, an auxiliary well open to the atmosphere, a series of vertically spaced air ducts between said emulsifying chamber and said auxiliary well, a fuel inlet tube extending into said emulsifying chamber, a tubular member surrounding said inlet tube and extending slightly above the same to form an idling chamber, an idling by-pass tube communicating with said induction passage above the throttle, and a passageway located below the lowermost of said air ducts for connecting the lower end of said idling chamber to said idling by-pass tube.

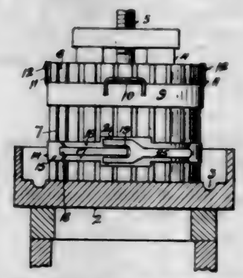
1,567,172. INTERNAL-COMBUSTION ENGINE. ALVAH L. POWELL, Miles City, Mont., assignor to The A. L. Powell Power Co. Inc., Miles City, Mont., a Corporation. Filed Sept. 12, 1921. Serial No. 500,170. 3 Claims. (Cl. 74—14.)

1. In an internal combustion engine, a cylinder, a piston slidable therein, a piston rod operatively connected to said piston, a rack forming an integral part of said piston rod, a pin, a segmental gear and a pinion carried by said pin, said gear having a greater radius than said



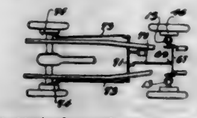
pinion, a crank rod, a crank operated thereby, means to cause said gear to mesh with said piston rod and means operatively connecting said pinion and crank rod.

1,567,173. TUB FOR CIDER PRESSES. DANIEL E. REED, Brooklyn, N. Y. Filed May 27, 1924. Serial No. 716,102. 5 Claims. (Cl. 217—73.)



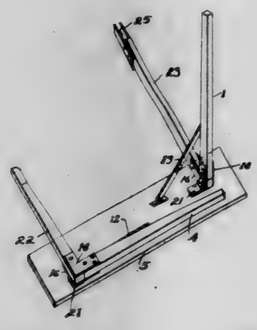
1. A tub for cider presses, comprising bars, strap members each connected with the bars of one section of the tub, pivotal connections between said strap members whereby separate sections of the tube may pivot from a line adjacent one end of the tub, the pivotal line extending transversely of the tub, a strap member attached to the bars adjacent the opposite end of one of the tub sections, a strap attached to the bars adjacent the end of the other tub section and having ends overlapping said last mentioned strap, and a clamp for drawing on said ends of the last mentioned strap to hold the tub sections in closed position.

1,567,174. AUTOMATIC BRAKE CONTROL. WALTER J. SPIRO, White Plains, N. Y. Filed Apr. 23, 1924. Serial No. 708,449. 20 Claims. (Cl. 188—181.)



9. In a brake control, a wheel member, brake members having peripheral seats and mounted thereon but disconnected therefrom when the wheel is at rest, and a centrifugally operable lever carrying a contact face to engage said seats when the wheel is under rotation.

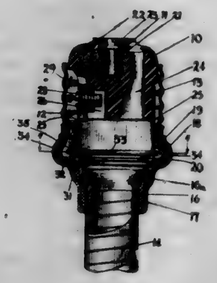
1,567,175. FOLDING TABLE. HAROLD R. BASFORD, San Francisco, Calif. Filed Feb. 13, 1922. Serial No. 536,338. 8 Claims. (Cl. 45—116.)



1. In a folding table a top member, a leg, an L shaped hinge secured to said leg and to the under-side of said top member, a top supporting side rail pivotally connected to the leg member to turn to a position parallel to the length of the leg when the latter is folded, and having an extension on both sides of the L shaped hinge member whereby the leg cannot be moved away from the top member when the side member is folded against the leg, and a locking brace for preventing the leg from collapsing when it is unfolded.

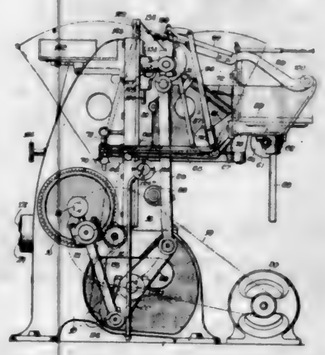
---

1,567,176. ATTACHMENT PLUG. REUBEN B. BENJAMIN, Chicago, Ill., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 6, 1920. Serial No. 356,673. 4 Claims. (Cl. 173—359.)



1. A swivel attachment plug comprising an insulating base, wiring terminals supported thereby, a threaded shell contact surrounding said insulating base, a cylindrical sleeve also surrounding said insulating base and located inside said threaded shell contact and secured to said insulating base and having a cylindrical portion extending beyond said insulating base and a spring supported by said extension and engaging said threaded shell contact to hold the parts together.

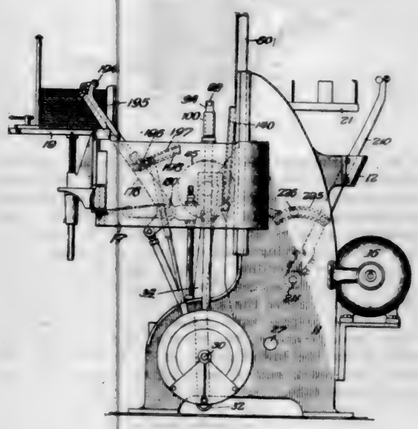
1,567,177. PRINTING PRESS. EDWARD CHESHIRE, Milwaukee, Wis., assignor, by mesne assignments, to Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 25, 1918. Serial No. 224,426. 96 Claims. (Cl. 101—272.)



1. In a printing press, the combination of stock supply means, a cylinder mounted for vertical rectilinear movement, a transfer table movable upwardly and downwardly with said cylinder, and means for transferring stock from said stock supply means to said transfer table.

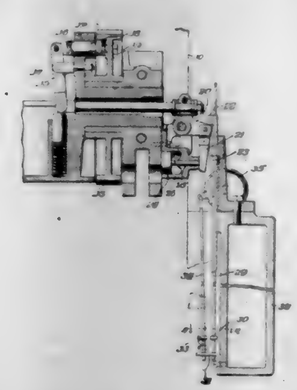
---

1,567,178. PRINTING PRESS. EDWARD CHESHIRE, Milwaukee, Wis., assignor, by mesne assignments, to Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 11, 1919. Serial No. 329,976. 57 Claims. (Cl. 101—172.)



1. In a printing press, a movable type bed, a cooperating cylinder mounted for rotation and also for reciprocating motion, and means pneumatically controlled by a fed sheet of material whereby said cylinder rotates during a movement in one direction and does not rotate during a movement in another direction.

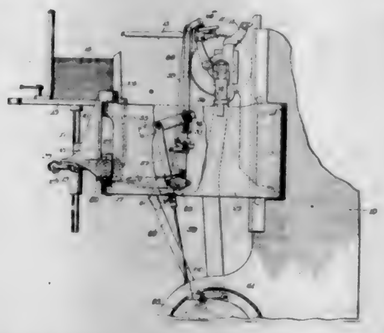
1,567,179. PRINTING-PRESS COUNTING AND SIGNALING MECHANISM. EDWARD CHESHIRE, Milwaukee, Wis., assignor, by mesne assignments, to Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 16, 1920. Serial No. 358,971. 12 Claims. (Cl. 101—285.)



1. In a printing press, the combination of counting means, signal means, and automatically operated means for selectively operating said counting and signal means.

---

1,567,180. PRINTING-PRESS STOCK-TABLE-CONTROL MECHANISM. EDWARD CHESHIRE, Milwaukee, Wis., assignor, by mesne assignments, to Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 12, 1920. Serial No. 365,132. 15 Claims. (Cl. 271—62.)

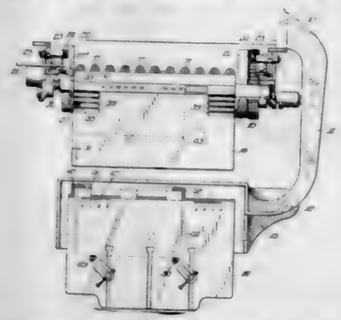


5. In a printing press, the combination of a movably mounted stock table, a transfer arm whereby stock is carried from said table, and means pivotally mounted on said arm having a variable throw for controlling the position of said stock table.

---

1,567,181. PRINTING PRESS. EDWARD CHESHIRE, Milwaukee, Wis., assignor, by mesne assignments, to Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed June 21, 1920. Serial No. 390,327. 26 Claims. (Cl. 271—53.)

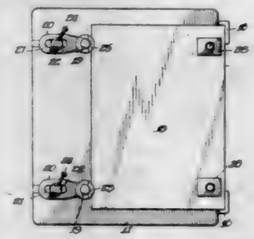
1. In side register mechanism for printing presses having a main frame, a cylinder frame and a transfer table, and side register means carried by said cylinder frame and in a relative movement cooperating with said



transfer table for registering a sheet of material on said transfer table.

---

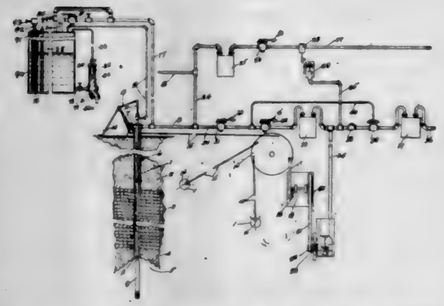
1,567,182. SHEET-FEEDING MECHANISM. EDWARD CHESHIRE, Milwaukee, Wis., assignor, by mesne assignments, to Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed June 28, 1920. Serial No. 392,452. 13 Claims. (Cl. 271—61.)



1. In mechanism for feeding sheet material from a pile, the combination of means for limiting movement of sheet material in one direction, and gravity-actuated means for advancing said sheet material toward said limiting means normally causing the sheet to buckle for separating the latter from the next sheet.

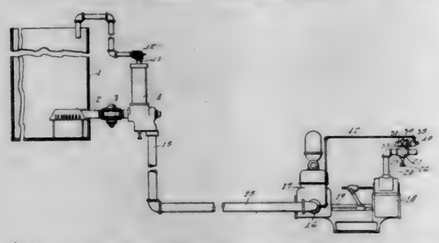
---

1,567,183. OIL-WELL APPARATUS AND METHOD OF OPERATING THE SAME. RUDOLPH CONRADER, Erie, Pa. Filed Aug. 29, 1921. Serial No. 496,194. 20 Claims. (Cl. 166—21.)



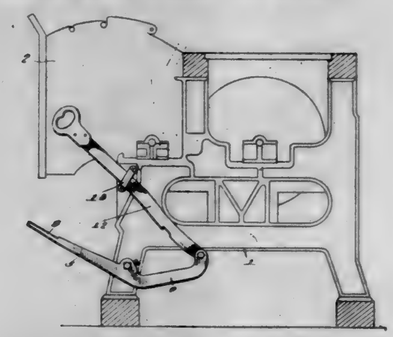
1. The method of operating oil wells which consists in maintaining a predetermined pressure on the well; drawing off sufficient gas for local operation; and delivering the excess to a separate low pressure line.

1,567,164. PUMP-CONTROLLING APPARATUS. RUDOLPH CONRADER, Erie, Pa. Filed May 11, 1922. Serial No. 560,240. 7 Claims. (Cl. 103—13.)



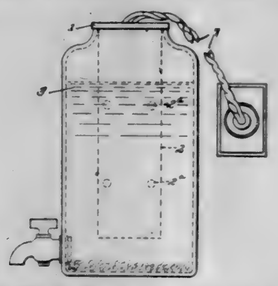
1. In a pump controlling apparatus, the combination of a pump; a liquid level controlled mechanism controlling the inlet to the pump; a pump motor; and means responding to inlet pressure controlling the motor.

1,567,185. LIFT FOR GIN BREASTS. FREDERICK B. CUMPSTON, Blooming Grove, Tex. Filed Feb. 9, 1925. Serial No. 8,084. 3 Claims. (Cl. 19—55.)



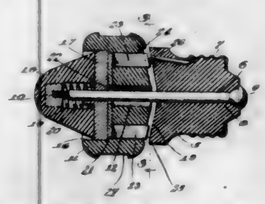
1. In a lift for gin breasts, a rock shaft, motion transmission means between the shaft and the gin breast, a foot lever fixed on said shaft having a forwardly extending arm designed to be engaged by the foot of the operator and also having a rearwardly extending arm, and a combined hand and lock lever connected to said rearwardly extending arm.

1,567,186. WATER PURIFIER. FRANK KRAEMER, Los Angeles, Calif., assignor to Sun-Ray Works, Inc., a Corporation of California. Filed Dec. 3, 1923. Serial No. 678,144. 6 Claims. (Cl. 204—25.)



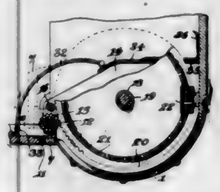
1. In a device of the character referred to, two electrodes, a head for supporting the same, thermostatic supports for said electrodes interposed between said head and said electrodes and adapted to move the same toward and from each other as said thermostatic supports contract and expand, and means for connecting a source of electric energy to said supports and electrodes.

1,567,187. MULTIPLE FUSE PLUG. CHARLES LAY, San Antonio, Tex. Filed Oct. 21, 1924. Serial No. 744,985. 4 Claims. (Cl. 200—125.)



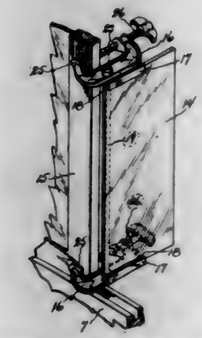
1. A fuse plug comprising a body of insulating material having its upper face concaved, rachet teeth formed around the marginal edge of the concaved face, an outer contact shell threaded to fit a socket, a contact point mounted on one of said teeth having connection with said shell, a contact pin extending axially through said body, a fuse magazine rotatably mounted on the upper end of said pin having its base tapered to fit the concaved face of said body, rachet teeth formed around the marginal edge of said base, adapted to cooperate with the corresponding teeth of said body, a recess in the upper face of said magazine, a fuse plate mounted on said pin and seated in said recess having a plurality of fuse members extending through said magazine the free extremities of which are bent at right angles over the ratchet teeth of said magazine, a pressure disk bearing against said fuse plate, a knob threadedly mounted on the end of said contact pin, and a compression spring seated in a recess formed in said knob bearing against said pressure plate, whereby the fuse magazine and body are held firmly together.

1,567,188. DIRECTION INDICATOR FOR MOTOR VEHICLES. GOLDBURN C. RAY and LOUIS W. TERRILL, Cripple Creek, Colo. Filed Nov. 17, 1924. Serial No. 750,407. 1 Claim. (Cl. 116—54.)



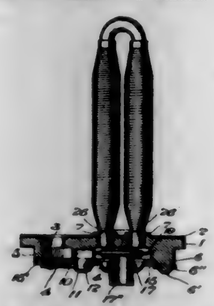
A direction indicator comprising a support, a signalling means shiftable to and from signalling position with respect to one side of said support, a combined suspension and operating means for said signalling means extending transversely of said support, said combined suspension and operating means further forming a hinge between said signalling means and said support, a vertically disposed gear element arranged on an axis extending transversely of said support and operatively engaging with said operating means for actuating it to shift the signalling means to and from signalling position, said gear element provided concentrically on one side with a circular rack of less diameter than the gear element, and means revolvably mounted in and projecting outwardly from the other side of said support and disposed at right angles with respect to the axis of said gear element and engaging with the rack for revolving the gear element to actuate said operating means.

1,567,189. SAFETY-FIRST VISION-PROTECTING SHIELD FOR ENGINEERS, ATTACHABLE TO THE SIDE WINDOW OF A LOCOMOTIVE. OSCAR H. REBENSCHIED, Kansas City, Kans., and CHARLES G. MEE, Los Angeles, Calif. Filed Mar. 2, 1925. Serial No. 12,545. 4 Claims. (Cl. 98—21.)



1. In combination with a longitudinally sildable side window of a locomotive cab, a vision protecting shield extending at substantially right angles therefrom and means for removably maintaining said shield in the operative position.

1,567,190. MAGNETIC VALVE FOR ORGANS AND THE LIKE. WILLIAM H. REISNER, Hagerstown, Md., assignor to The W. H. Reisner Mfg. Co., Inc., Hagerstown, Md., a Corporation of Maryland. Filed Apr. 17, 1925. Serial No. 23,890. 4 Claims. (Cl. 84—338.)



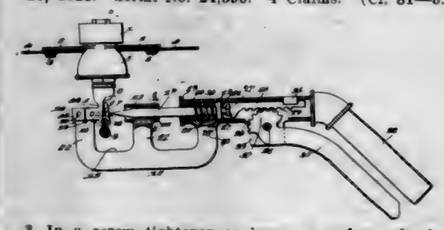
1. A valve for organs and the like, comprising a base having a recess therein and a port therethrough communicating with said recess, a transverse abutment on said plate adjacent one edge of said recess, a stud on said abutment, a washer secured to said stud and projecting over the edge of said abutment, an electromagnet supported by said base with its poles adjacent said recess, a plate overlying and covering said recess having an edge cooperating with said abutment and underlying said washer, said plate also having a ported valve seat and an opening therein, a valve in said recess cooperating with said valve seat and actuated by said magnet, a stud on said base engaging the opening in said plate, and means cooperating with said stud for locking the plate to the base.

1,567,191. LINT DEFLECTOR. WILLIAM HENRY REYNOLDS, Hastings, Okla. Filed Jan. 18, 1924. Serial No. 687,154. 1 Claim. (Cl. 19—72.)

A deflector of the class described comprising a supporting plate, a guard member formed integral with the supporting plate and arranged at an oblique angle with respect thereto, said guard being arranged adjacent to one end of the supporting plate, a hinge section mounted between the plate and obliquely disposed guard, a deflector carrying a hinge section at one end and adapted to cooperate with the first mentioned hinge section to pivotally support the deflector, a bracket member formed

on the rear surface of the deflector and having an elongated opening, and a rod having a bolt operating within the elongated opening to adjustably connect the rod and deflector.

1,567,192. SCREW TIGHTENER AND LOOSENER. REED D. RICHARDSON, Spokane, Wash., assignor of one-fourth to C. E. Clark, Spokane, Wash. Filed Apr. 20, 1925. Serial No. 24,590. 4 Claims. (Cl. 81—8.)



3. In a screw tightener or loosener, a frame having an abutment for the screw end, a screw driver for engagement with the screw head and having a polygonal cross section, a thrust bar in end to end relation to said screw driver, said frame having bearings for said screw driver and thrust bar and exposing a portion of the polygonal screw driver for application thereto of a turning instrument to loosen or tighten a screw, and means for actuating said thrust bar to force said screw driver into sustained relation with the groove of a screw.

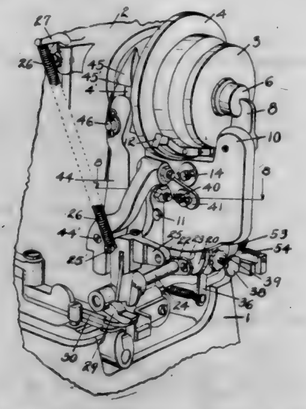
1,567,193. LAMP FOR MOTOR VEHICLES. OLIVER C. RITS-WOLLER, Chicago, Ill. Filed Mar. 14, 1925. Serial No. 15,622. 11 Claims. (Cl. 40—131.)

1. As an article of manufacture, a license plate support, having an extension with a cutout portion, a lamp casing, a paraboloid reflector in the casing, a fix-

ture for holding a source of light in the focus of the reflector, and a lens inserted into the cutout portion of the extension having on one of its faces a plurality of prismatic projections angularly disposed with relation to one another.

---

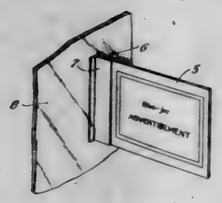
1,567,194. CONTROL MEANS FOR POWER SEWING MACHINES. MORRIS G. ROSENTHAL, Cincinnati, Ohio, assignor to Rose Patch & Label Company, Grand Rapids, Mich. Filed Sept. 15, 1920. Serial No. 410,446. 10 Claims. (Cl. 192—149.)



4. In a control means for power sewing machines the combination in a drive means, of a tight pulley, clutch means therefor, a brake for the said pulley, a lever for applying the same, a control rock shaft, a cam on the control rock shaft, and adjustable springs on the said lever for coaction with said cam for applying the brake to said pulley, as specified.

---

1,567,195. DISPLAY CARD. FRANK L. ROUSSEAU, Pittsburgh, Pa., assignor to Bauer & Black, Chicago, Ill., a Corporation of Illinois. Filed Nov. 12, 1921. Serial No. 514,446. 3 Claims. (Cl. 40—138.)

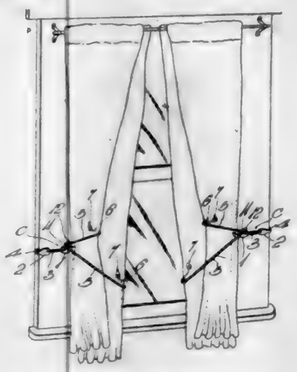


1. A display card provided at one of its edges with a flexible adhesive strip extending along the length of the edge of the card and projecting beyond the same and constituting a hinge connection to be adhered to a support, and a removable protective strip adhered to and covering the adhesive surface of the adhesive strip.

---

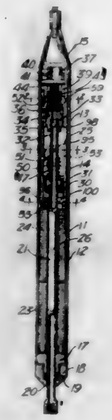
1,567,196. CURTAIN AND DRAPERY HOLDER. EDOUARD ROY, Lewiston, Me. Filed June 11, 1925. Serial No. 36,459. 2 Claims. (Cl. 156—33.)

1. A device of the class described comprising a pair of sheet metal plates connected by a tension spring and having hooks at their outer ends for engagement with the side of a door or window frame, a plurality of wire arms adjacent one of said plates, and a clamping bolt passing through one end of the arms and adjustably pivoting them to said one plate, said bolt being provided with a clamping nut, the free ends of said arms having hooks being relatively vertically spaced and adjustable for engagement with curtains and draperies.



---

1,567,197. WELL DRILL. BENJAMIN F. SCHMIDT, Los Angeles, Calif., assignor of one-fourth to King C. Gillette and one-fourth to King G. Gillette, both of Los Angeles, Calif. Filed July 11, 1922. Serial No. 574,305. 16 Claims. (Cl. 255—4.)

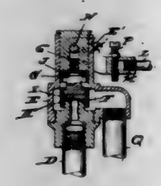


1. In a device of the class described, the combination of: a tubular shell adapted to be suspended within a well; a reciprocable core member extending within said shell and comprising a solid central portion having integrally formed tubular ends extending therefrom; solenoids adapted to reciprocate said reciprocable member by attracting said central portion thereof; a stuffing box at each end of the arrangement of said solenoids, through which said reciprocable member may operate; a head upon the upper end of said reciprocable member; a spring adapted to engage said head at the downward stroke thereof; a resiliently supported member adapted to recede when engaged by said head near the end of its upward stroke; means for partly rotating said resiliently supported member, and thereby said reciprocable member, during the mentioned engagement therebetween; a rod

extending parallel to said reciprocable member and having means thereupon adapted to be engaged when said head is near an extreme position; a switch adapted to be closed by said rod when so engaged; an electric sensible device; and means providing an electric circuit between said switch and said device.

---

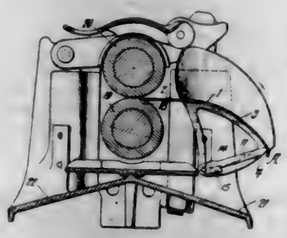
1,567,198. WATER-INLET VALVE FOR TANKS. WILLIAM SHERWOOD, Detroit, Mich., assignor to Sherwood Brass Works, Detroit, Mich., a Corporation of Michigan. Filed Oct. 15, 1923. Serial No. 668,515. 1 Claim. (Cl. 137—104.)



In a device of the character described, a water inlet pipe for a flushing tank, a valve casing located on the upper end of said pipe and having a valve chamber adapted to communicate with the tank and having laterally projecting trunnions a valve seat in said chamber, a plunger valve adapted to seat against the flow of water into the tank, a float rod, a float carried by the rod, a bifurcated fitting secured to the float rod and having its leg portions embracing the valve casing and provided with slots to receive said trunnions, and a transverse pin connecting the bifurcated fitting with said plunger and disposed normally in substantially a horizontal plane with said trunnions and relatively close thereto, said slots in the leg portions being inclined upwardly at an angle to a horizontal plane through the axis of said pin when the valve plunger is seated whereby the bifurcated fitting is prevented from rocking laterally upon said trunnions and whereby the float is maintained against lateral movement to prevent the float from rubbing against the inner faces of the front and back walls of the tank and thereby insuring a positive vertical movement of the plunger within the casing to prevent binding of the valve in its movement within the casing.

---

1,567,199. SAFETY DEVICE FOR WRINGERS. HOWARD F. SNYDER, Newton, Iowa, assignor to The Maytag Company, Newton, Iowa, a Corporation of Iowa. Filed July 14, 1921. Serial No. 484,681. 8 Claims. (Cl. 68—32.)

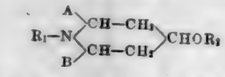


6. The combination with wringer rolls, of a fabric receiving and supporting member mounted contiguous to said rolls so as to be movable toward and from the rolls, said member having a free and unobstructed surface on which the fabric is adapted to be positioned when said member is removed from the rolls and over which said fabric may be freely drawn during fabric feeding, said member having a projecting lip over which the fabric may be draped so that it will be movable with said member toward said rolls, and means for arresting movement of said member toward said rolls when said lip is positioned opposite the bite of the rolls, said member constituting the sole means for bringing the fabric up to the rolls and being movable towards said rolls by manual means alone.

---

1,567,200. MANUFACTURE OF DERIVATIVES OF 4-HYDROXYPIPERIDINES AND PROCESS OF MAKING SAME. HERMANN STAUDINGER, Zurich, Switzerland, assignor to Society of Chemical Industry in Basle, Basel, Switzerland. Filed Mar. 28, 1925. Serial No. 19,154. 12 Claims. (Cl. 260—43.)

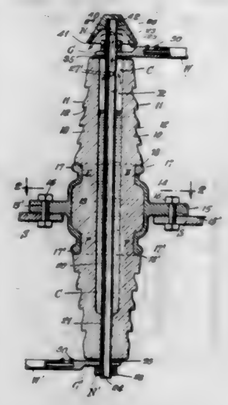
8. As new products the herein described derivatives of 4-hydroxypiperdines of the general formula:



wherein A and B=alkyl, $R_1$=H, alkyl, aryl or aralkyl, $R_2$=H or acidyl, in which formula $R_1$ and $R_2$ cannot at the same time mean H, and in which the sum of carbon atoms in $R_1$ and $R_2$ is greater than 1.

---

1,567,201. INSULATED CONNECTER. LOUIS STEINBERGER, Brooklyn, N. Y. Filed Apr. 11, 1919. Serial No. 289,231. 2 Claims. (Cl. 173—318.)



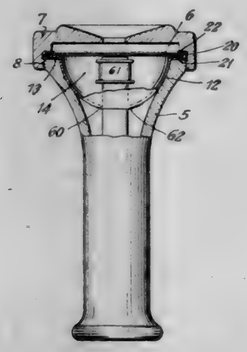
1. In a device of the class described, an insulator body, a hollow electric conductor secured within the central portion of said insulator body, a body of oil surrounding said conductor through the greater part of its length, said oil being contained in a cavity formed in said insulator body, said conductor having an opening leading from said cavity into the interior of said conductor above the oil and another opening leading from said conductor to the atmosphere.

---

1,567,202. DIAPHRAGM FOR SOUND RECEIVERS AND MEANS FOR MOUNTING THE SAME. LOUIS STEINBERGER, Brooklyn, N. Y. Filed Jan. 24, 1921. Serial No. 439,410. 1 Claim. (Cl. 179—115.)

A sound receiver having an inner cup like shell with an outer annular flange formed thereon, a diaphragm closing one end of said shell seated on said flange, and an annular coupling ring having in-turned flanges, the

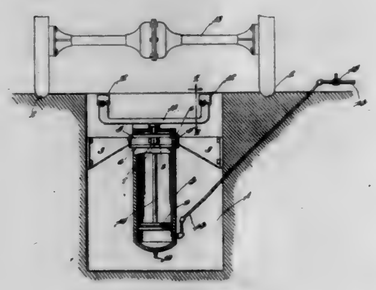
said coupling ring fitting over the edges of the diaphragm and of the annular flange of the shell, the flanges of the coupling ring directly and closely engaging respectively



the diaphragm and the flange of the shell to form an air tight joint between the diaphragm and the shell thus forming a unitary structure.

---

1,567,203. JACK. CARL STEINKAMPER, Chicago, Ill. Filed Jan. 5, 1925. Serial No. 691. 2 Claims. (Cl. 138—9.)

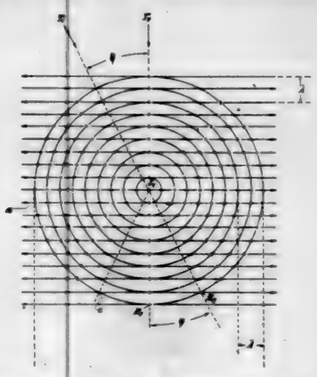


1. A device of the character described, including cylinders, spaced ribs carried thereby, a support bracket adjacent the cylinder having an arcuate arm fitted between said ribs, an arcuate clamping member fitted between the ribs and having its ends connected to the ends of the arcuate arm for supporting said cylinder, a crossbar at one end of the cylinder, arcuate bearing members carried thereby and means connected to the cross-arm for moving the same relative to the cylinder, and manually controlled means for actuating said first means.

---

1,567,204. RADIO TRANSMITTING SYSTEM. JOHN STONE STONE, San Diego, Calif., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Jan. 29, 1925. Serial No. 5,580. 7 Claims. (Cl. 250—11.)

1. In a radio transmission system, two transmitters and two receivers on the same frequency, and a secondary relay station, each receiver being at a point where the waves build up from a respective transmitter and the



said relay station and where they are null from the other transmitter and said relay station.

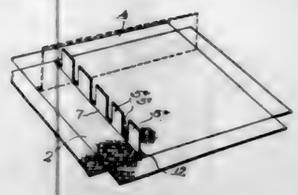
---

1,567,205. ROOFING STRUCTURE. JOHN FRANKLIN STUCKERT, Philadelphia, Pa. Filed Dec. 10, 1924. Serial No. 754,899. 4 Claims. (Cl. 108—1.)

1. In a roof construction, including complemental rafters, the combination of channel beams supported upon said rafters, roofing boards arranged above said channel beams, relatively thin sheets of roofing material superimposed upon the roofing boards, rigid strips of material arranged upon the roofing material along meeting edges thereof and vertical means, arranged between the channel beams and said roofing material for predetermined adjustment of securing of said roofing material at the time the same is fitted in place.

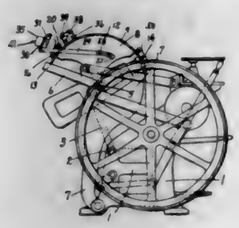
---

1,567,206. CUSHION-COVER CONSTRUCTION. SAMUEL SUSKOFF, Chicago, Ill. Filed July 18, 1925. Serial No. 44,416. 3 Claims. (Cl. 5—353.)



1. A cushion cover construction comprising top and bottom cover pieces, a plurality of parallelly disposed combs each consisting of a single piece of material sewn to said cover pieces along one edge and provided with spaced cuts extending from the free outer edge substantially down to said sewn edge, a plurality of partition strips arranged transversely of said combs and sewn to said cover pieces along lines passing through aligned cut portions of said combs, and said combs being slightly more than one-half the height of the completed cushion and sewn together along their abutting edges.

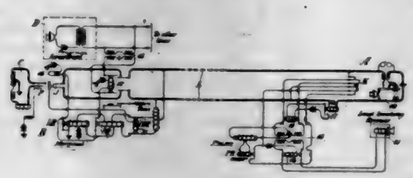
1,567,207. INKING ATTACHMENT FOR BED AND PLATEN JOB-PRINTING PRESSES. JOHN J. SULLIVAN, Cincinnati, Ohio. Filed Dec. 18, 1924. Serial No. 756,753. 3 Claims. (Cl. 101—339.)



1. A bed and platen job printing press comprising a press frame, a rocking bed pivotally mounted on the frame, a shaft extending transversely of the rocking bed, a materially curved distributing plate mounted for oscillation on the shaft, means for applying ink to one end of the distributing plate, distributing rollers carried by the rocking bed for movement therewith, the distributing plate adapted upon movement about its pivotal mounting to move relative to said distributing rollers for distributing ink longitudinally of the distributing plate, other rollers for receiving ink from the distributing plate and delivering the ink to the type form, and means for moving the rocking bed and the distributing plate about their respective mountings.

---

1,567,208. PROGRAM TRANSMISSION OVER WIRES. JOHN F. TOOMEY and HENRY E. PHELPS, New York, N. Y., assignors to American Telephone and Telegraph Company, a Corporation of New York. Filed Nov. 11, 1922. Serial No. 600,355. 11 Claims. (Cl. 179—73.)

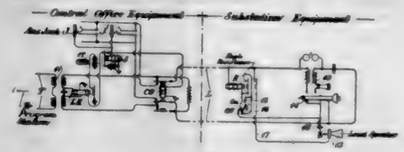


3. In a telephone system, a telephone line terminating at a subscriber's station at one end and in a central office at the other end, a telephone set at said subscriber's station, switching means at said central office for interconnecting said line with other lines for ordinary telephonic intercommunication, a program transmitting station normally disconnected from said line, special receiving equipment at the subscriber's station for receiving program transmission, and means to associate said equipment with the line and to connect said program station to the line at the will of the subscriber.

---

1,567,209. SUBSCRIBER'S EQUIPMENT FOR PROGRAM TRANSMISSION. JOHN F. TOOMEY, New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Dec. 1, 1923. Serial No. 677,992. 5 Claims. (Cl. 179—2.)

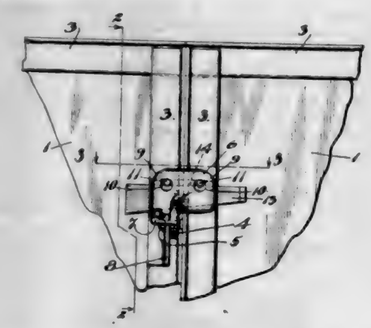
1. In a program system, a telephone line having switching terminals, means to connect said telephone line to a program station, program receiving equipment associated with said telephone line, means controlled by a subscriber for connecting said receiving equipment to the line and means responsive to the establishment of a telephone connection to the switching terminals of



the line for automatically disconnecting said receiving equipment and thereafter connecting the line to the switching terminals.

---

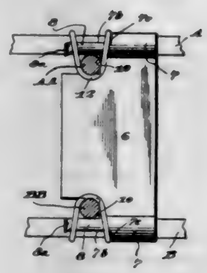
1,567,210. FORM-LOCKING DEVICE. HERAULT A. TRESTER, Milwaukee, Wis., assignor to Metal Forms Corporation, Milwaukee, Wis., a Corporation. Filed May 21, 1925. Serial No. 31,949. 9 Claims. (Cl. 25—131.)



1. The combination with form units and a tie rod, of a fastening member for securing the form units together, said fastening member being provided with a seat to receive the tie rod, and means for clamping the tie rod in position upon the seat.

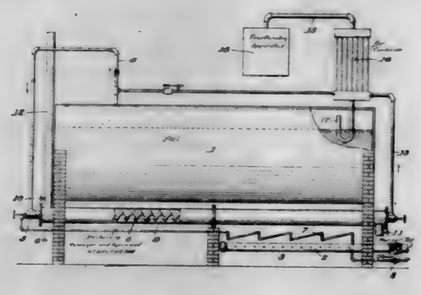
---

1,567,211. REENFORCED ROAD STRUCTURE. EARL D. TUBBS, New York, N. Y. Filed Aug. 15, 1925. Serial No. 50,457. 6 Claims. (Cl. 94—8.)



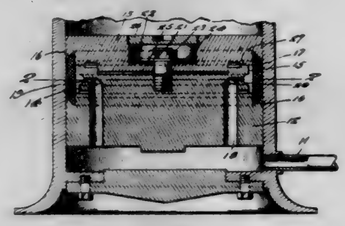
1. A device of the character described comprising a body portion having arcuately formed flanges at the ends thereof, elongated projections extending longitudinally with respect to said flanges, said body portion being reduced in length at one side thereof and lateral projections extending from said reduced portion.

1,567,212. APPARATUS FOR TREATING HYDROCARBONS. FRANK C. VANDE WATER and FREDERICK R. SUNDERMAN, Newburgh, N. Y., assignors to Petroleum Laboratories Inc., Newburgh, N. Y., a Corporation of New York. Filed May 17, 1923. Serial No. 639,581. 1 Claim. (Cl. 196—61.)



In combination, a still, a vapor outlet therefrom, a cracking tube receiving vapors from the still and located beneath the still, a protective element completely surrounding the cracking tube and spaced therefrom, common means to heat the protective element and the still, and means to cause a current of cool air to circulate entirely around the cracking tube and between the cracking tube and the protective element.

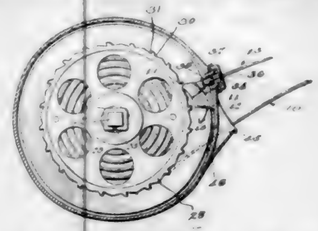
1,567,213. PISTON CONSTRUCTION. ADRIAN C. VAN HOOYDONK, Monroe, Mich., assignor of one-half to George J. Schrauder, Monroe, Mich. Filed Dec. 1, 1924. Serial No. 753,302. 3 Claims. (Cl. 74—109.)



1. A piston comprising a body, a cap secured to said body, said body being reduced at one end and the cap extending outward over such reduced end and defining an annular recess and having substantially V-shaped annular grooves in the opposed walls of the recess, an annular packing within the recess, said packing having its opposite edges shaped to fit the annular grooves and its inner periphery spaced from the adjacent wall of the recess, an annular transversely disposed seat between the body and cap at one end of the recess, means for securing the cap to the body and passages extending through the piston into the recess.

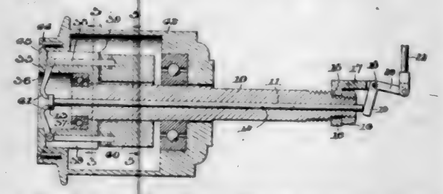
1,567,214. ANIMAL TRAP. LOVELL R. VAN TASSEL, Reynoldsville, Pa. Filed June 6, 1925. Serial No. 35,367. 4 Claims. (Cl. 43—87.)

1. An animal trap including a casing having anchoring means, a snare line movable through the casing and having a slip noose, a spring actuated drum rotatable within the casing on which the snare line is wound, a trip line extending from the casing, a toothed ring on the drum having oppositely facing angular surfaces presented by the teeth thereof, and a member controlled by the trip line and cooperating with the toothed ring to normally prevent rotation of the drum under tension of



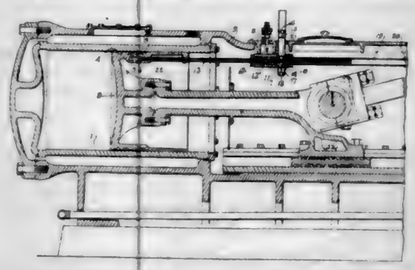
its spring and to prevent rotation of the drum in the opposite direction after the tension of its spring has been exhausted.

1,567,215. THROTTLE-CONTROL MECHANISM. JOSEPH A. WARD, Crowell, Tex. Filed June 24, 1922. Serial No. 570,626. 1 Claim. (Cl. 264—15.)



A device of the character described comprising a hollow pulley, a tubular shaft passing through the hollow pulley, a cap closing one face of the hollow pulley and provided with a recess and further provided with a plurality of longitudinal grooves, a plurality of bell crank levers pivoted to the cap and each having one leg normally disposed within one of the grooves and its other leg projecting into the recess, weight elements carried by the inner ends of the bell crank levers and disposed in the hollow pulley, a longitudinally movable rod passing through the tubular shaft and having one end disposed in the recess and adapted to be engaged by the last mentioned legs of the bell crank levers upon movement of the same in one direction, and a mechanism actuated by the opposite end of the longitudinally movable rod upon actuation of the same by the bell crank levers, the latter being actuated by the weight elements upon over speeding of the hollow pulley.

1,567,216. LUBRICATING THE BORE OF CYLINDERS OF ENGINES. ELMER A. WATTS, Springfield, Ohio, assignor to The Miller Improved Gas Engine Company, Springfield, Ohio, a Corporation of Ohio. Filed Oct. 20, 1924. Serial No. 744,640. 5 Claims. (Cl. 184—18.)

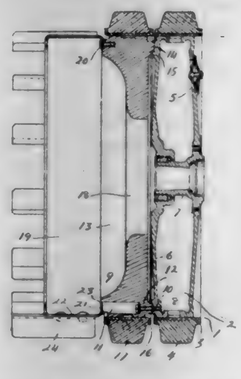


4. In a lubricating mechanism, a casing having oil and air inlet ports and a mixing chamber into which they discharge, a tubular cylinder secured to said casing and adapted to receive lubricant from said chamber, and a tubular piston mounted to reciprocate in the casing and the tubular cylinder and having a clearance between it and the bore of the cylinder in excess of a working fit.

1,567,217. DYNAMO-ELECTRIC MACHINE. HANS WEICHSEL, St. Louis, Mo., assignor to Wagner Electric Corporation, St. Louis, Mo., a Corporation of Delaware. Filed Mar. 22, 1924. Serial No. 701,085. 8 Claims. (Cl. 172—280.)

7. In an alternating current motor, the combination of an induced member, and an inducing member provided with an inducing winding and with a commuted winding, the conductors of the commuted winding being so located as to embrace a portion only of the total magnetic flux passing through the inducing member and being positioned further from the periphery of the inducing member than the conductors of the inducing winding.

1,567,218. AUXILIARY WHEEL RIM. THOMAS C. WHITEHEAD, Detroit, Mich. Filed July 5, 1924. Serial No. 724,529. 11 Claims. (Cl. 301—40.)

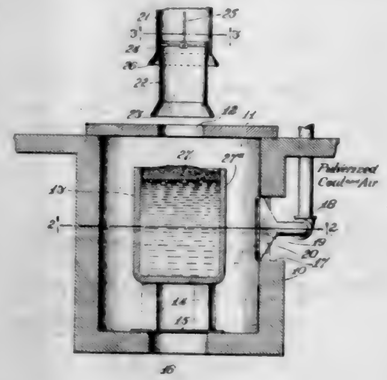


1. The combination with a vehicle wheel, of a weighted lateral extension for said wheel having transversely extending sockets therein providing relatively thin portions adjacent to said wheel, and headed elements engaging said thin portions and securing said extension to said wheel.

1,567,219. METAL-MELTING METHOD. WISTER C. WILLIAMS, Decatur, Ill., assignor to McLaughlin Coal Reduction Company, Decatur, Ill., a Corporation of South Dakota. Filed Oct. 13, 1923. Serial No. 668,319. 8 Claims. (Cl. 263—14.)

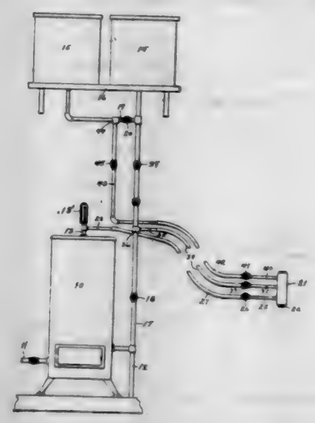
3. Method of melting metal which consists in subjecting the metal in an open container arranged in a confined space to the heat of a pulverized fuel flame directed circularly around said container and issuing out of the space above the container and baffled at its outlet so that it deposits incombustibles on the metal in the container.

8. Method of melting metal which consists in subjecting the metal in an open container to the heat of a



flame directed to pass around the container circularly and over the top of the same and produced by the combustion of a solid fuel pulverized so that substantially one-fourth of it, by weight, is fine enough to pass a screen having 800 meshes to the linear inch and mixed with air at a pressure of less than one-half ounce per square inch.

1,567,220. CLEANSING AND PAINT-REMOVING DEVICE. GEORGE L. WILLIAMSON, Chicago, Ill. Filed Mar. 24, 1924. Serial No. 701,580. 4 Claims. (Cl. 299—84.)

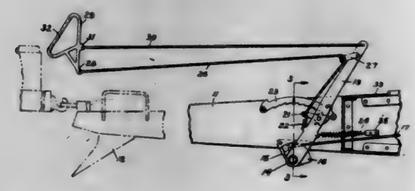


1. A cleansing and paint-removing apparatus, comprising a heater, a tank separate from the heater adapted to contain cleansing liquid, another tank separate from the heater and first tank adapted to contain a liquid neutralising agent, a water-supply system communicating with said heater and tanks, a valve in said system controlling the supply of water to said tanks, a valve-controlled conduit leading from said heater, a valve in said supply system between the inlets therefrom to the respective tanks, valve-controlled conduits leading from the supply

system between the first valve and the inlets to the respective tanks, valves controlling the connections between said conduits and the supply system and tanks, and a nozzle common to and communicating with all of said conduits, whereby separate liquids supplied by the tanks may be discharged by and with a jet of water from said heater, the ratio of quantities of said liquids and the heated water being controlled by the valves in the respective conduits.

---

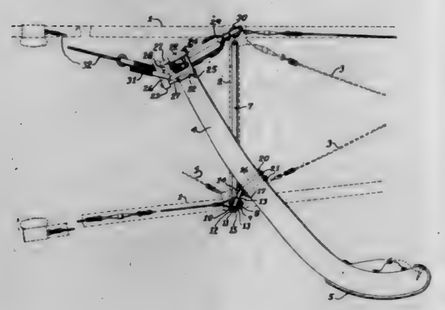
1,567,221. BRAKE CONTROL. HARRY C. ZIMMERMAN, Washington, D. C. Filed Sept. 30, 1924. Serial No. 740,859. 2 Claims. (Cl. 74—39.) (Granted under the act of Mar. 3, 1883, 22 Stat. L., 625.)



1. Means for operating a plurality of flexible connections embodying a handle having a grip portion, means formed on said handle centrally with respect to the grip portion for attachment of one cable and an angularly disposed arm on said handle extending beyond the path of rotation of said central portion for attachment of another cable.

---

1,567,222. TAIL SKID. PAUL G. ZIMMERMANN, Keyport, N. J., assignor to Aeromarine Plane & Motor Company, New York, N. Y., a Corporation of New York. Filed Aug. 17, 1921, Serial No. 492,957. Renewed May 16, 1925. 7 Claims. (Cl. 244—2.)

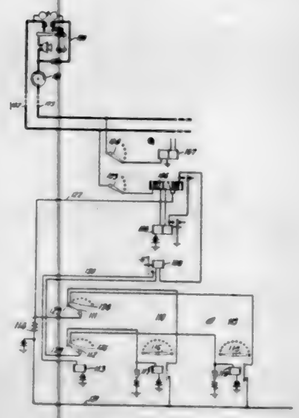


4. In an aeroplane, a bottom cross member, a tail-skid member passing over and behind said cross member, an eye-bolt fastening swiveled in said cross member, and an engaging U-bolt fastening in the tail-skid member.

---

1,567,223. CONTROLLING SYSTEM. WALTER P. ALBERT, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 17, 1922. Serial No. 568,948. 8 Claims. (Cl. 179—18.)

1. The combination with a line and means for transmitting a series of impulses thereover, of a relay responsive to each succeeding impulse of the series having a winding for actuating the same, means opposing said



winding to prevent the actuation of said relay, and means made active upon the actuation of said relay for overcoming the effect of said opposing means.

---

1,567,224. WEIGHING IMPLEMENT THE DEFLECTION OF WHICH IS MADE VISIBLE OR ENLARGED BY OPTICAL MEANS. ANTHON JOHANNES BAAGØE, Copenhagen, Denmark, assignor to Aktieselskabet Nielsen & Winther, Copenhagen, Denmark. Filed Mar. 25, 1924. Serial No. 701,862. 2 Claims. (Cl. 265—62.)

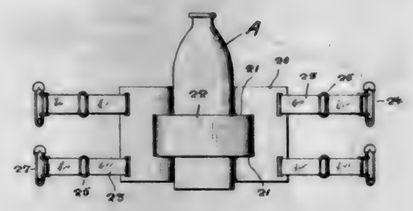
1. In a scale, in combination, a stationary part, a weighing mechanism, and optical means including a part and means for movably suspending said part of the optical means so that it is responsive to gravity and moves relatively both with respect to the weighing mechanism and stationary part of the scale.

---

1,567,225. NURSING-BOTTLE HOLDER. LEO LOUIS BARBIN, Berlin, N. H. Filed Oct. 31, 1923. Serial No. 671,993. 1 Claim. (Cl. 248—65.)

A device of the character described comprising a rectangular sheet of rubber having spaced parallel slits therein defining a central tongue and a pair of side tongues, said sheet being adapted to serve as a holder for a bottle inserted between the central and said pair

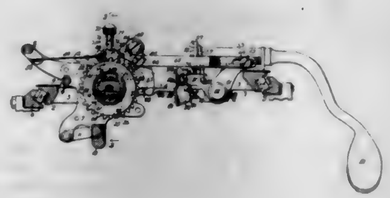
of tongues, the formation of the sheet from rubber insuring elasticity and providing a gripping of the bottle, the corners of the sheet being formed with openings, and



longitudinally adjustable tabs of flexible material detachably engaged through said openings and carrying securing elements.

---

1,567,226. TYPEWRITING MACHINE. EDWIN E. BARNEY, New Rochelle, N. Y., assignor to Remington Typewriter Company, Ilion, N. Y., a Corporation of New York. Filed Dec. 30, 1922. Serial No. 610,058. 35 Claims. (Cl. 197—114.)



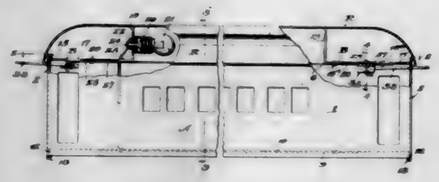
1. In a typewriting or like machine, the combination of a platen, a line spacing ratchet wheel, a pawl for moving the line spacing wheel a definite distance at each actuation, and automatically operating means for rendering said line spacing wheel effective and ineffective on the platen.

---

1,567,227. HEADLIGHT FOR TOY ELECTRIC LOCOMOTIVES. HARRY S. BECKER, Chicago, Ill., assignor to American Flyer Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 16, 1925. Serial No. 9,668. 10 Claims. (Cl. 240—7.1.)

9. A headlight construction for toy locomotives comprising the combination with the cab roof having an opening, of a support including electrical lamp terminals arranged beneath said opening and adapted to receive the plug of a lamp, and a hood simulating a headlight casing of standard locomotives detachably engaging the cab roof adjacent the opening.

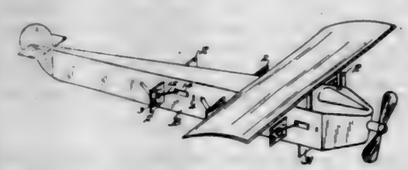
1,567,228. TOY-CAR CONSTRUCTION. HARRY S. BECKER, Chicago, Ill., assignor to American Flyer Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 2, 1925. Serial No. 12,724. 13 Claims. (Cl. 46—48.)



10. A toy car construction comprising a car body made of sheet material, means for connecting and bracing the upper edges of the car body, a lamp carried by said means, and a roof fitted to the body and covering said lamp.

---

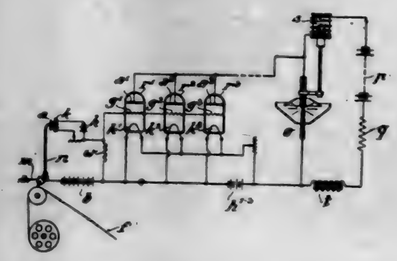
1,567,229. SPEED-RETARDING DEVICE FOR AIRPLANES. FRANK M. BOHLER, Los Angeles, Calif. Filed June 3, 1925. Serial No. 34,672. 7 Claims. (Cl. 244—29.)



1. Means for braking the speed of air craft comprising a set of rigid plates hinged to the craft body to swing outward, fluid pressure control means for regulating opening, and closing, the plates, and pneumatic cushioning, piston means hingedly connected to the backs of and for bracing and controlling the opening of the plates.

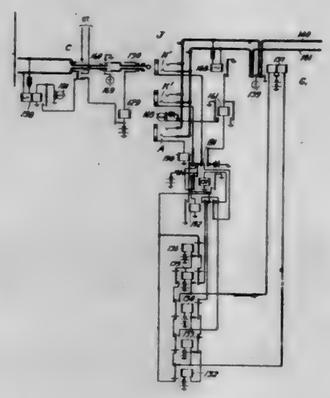
---

1,567,230. DEVICE FOR ELECTRICALLY REPRODUCING SOUNDS. OTTO BOTHE, Steglitz, near Berlin, Germany. Filed Mar. 23, 1922. Serial No. 546,106. 2 Claims. (Cl. 179—100.1.)



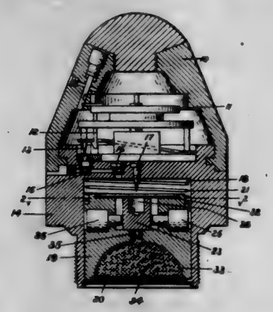
1. In an arrangement for electrically reproducing sounds, a thermionic valve, means for converting sound waves into corresponding electric fluctuations and for impressing these fluctuations on the grid of the thermionic valve, and an electric arc affected by the anode circuit of the thermionic valve, said arc being connected in parallel to the said anode circuit.

1,567,231. TELEPHONE-EXCHANGE SYSTEM. LANGFORD J. BOWNE, Howard Beach, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed July 26, 1922. Serial No. 577,501. 10 Claims. (Cl. 179—43.)



2. In a telephone system, a first exchange, a plurality of other exchanges, a continuous line circuit connecting the plurality of other exchanges with said first exchange, and a train of relays associated with the line and responsive to the seizure of the line at the first exchange for transmitting a number of impulses over the line to selectively signal any desired one of said other exchanges.

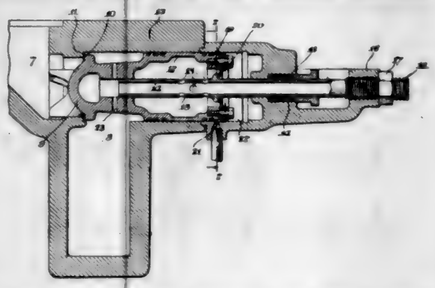
1,567,232. PERCUSSION ELEMENT FOR TIME FUSES. HAROLD M. BRAYTON, Dover, N. J. Filed Aug. 20, 1924. Serial No. 733,199. 12 Claims. (Cl. 102—39.) (Granted under the act of Mar. 3, 1883, 22 Stat. L., 625.)



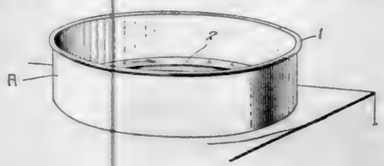
1. An attachment for a time fuse including a casing forming a closure for the fuse, a percussion plunger mounted in the casing, a rotor pivotally carried by the plunger, a detonator in the rotor, means automatically released during flight for normally locking the rotor in unarmed position, and a booster charge carried by the plunger.

1,567,233. AUTOMATIC AUXILIARY CLEARANCE CONTROL. WILLIAM C. BROWN, Prescott, Ontario, Canada, assignor to Stumpf Unaflow Engine Company, Inc., a Corporation of New York. Filed Jan. 4, 1922. Serial No. 526,990. 7 Claims. (Cl. 121—125.)

1. The method which consists in utilizing excessive compression pressure in a steam engine cylinder, against the pressure of live working steam exerted upon an effective area greater than that upon which the excessive compression pressure is exerted, to establish communication with an auxiliary clearance, and utilizing atmospheric pressure to close said communication when the pressure in the cylinder drops below atmosphere.

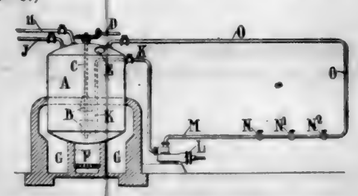


1,567,234. COMBINATION BAKING PAN. HENRY BRUCKER, Newark, N. J., assignor to American Aluminum Ware Co., a Corporation of New Jersey. Filed Mar. 7, 1922. Serial No. 541,672. 1 Claim. (Cl. 53—6.)



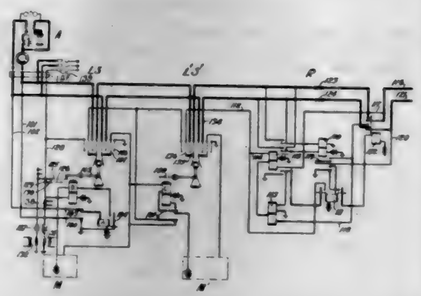
A filler-cake baking-pan, comprising a rim open at both ends and having an inwardly projecting annular flange at one end, and a pan having a closed bottom and inclined side walls with an annular flange projecting outwardly from the edge of said side walls and adapted to fit within said rim and form a dough-tight joint upon said annular flange of the rim with its side walls projecting upwardly into said rim in spaced relation thereto, said rim and pan combined as set forth forming a baking disk for the cake body with a bottom to seat on the oven floor and the pan forming a recess in said cake body and the pan when removed from the rim forming a baking dish for a filler for said recess with a bottom to seat on the oven floor.

1,567,235. PROCESS FOR THE PRODUCTION OF LIQUID-FUEL MIXTURES. THOMAS HOWARD BUTLER, FREDERICK JAMES WILLIAM POPHAM, Bristol, JOHN CHRISTOPHER MANN, Birmingham, and HERBERT WILLIAM ROBINSON, Cleobury Mortimer, England. Filed Aug. 13, 1925. Serial No. 50,058. 3 Claims. (Cl. 44—9.)



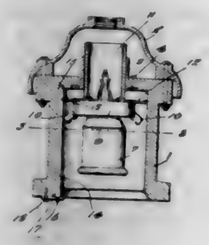
1. A process for obtaining homogeneous mixtures of pitch and petroleum residue which consists in melting the pitch, raising the latter to a temperature substantially above its melting point, and gradually admitting the petroleum residue while continuously stirring.

1,567,236. TELEPHONE SYSTEM. EDWARD D. BUTS, Palisade, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed July 31, 1923. Serial No. 654,804. 12 Claims. (Cl. 179—27.)



1. In a telephone system, telephone lines of different character, a local conductor for each line, a tone source for certain of said lines, and means actuated by the closure of one of said certain calling lines for connecting its local conductor to said source.

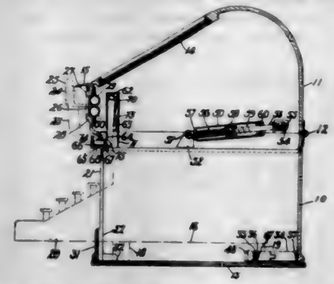
1,567,237. INCANDESCENT-ELECTRIC-LAMP FIXTURE. THOMAS B. CABELL, Jackson, Miss. Filed May 18, 1925. Serial No. 31,174. 1 Claim. (Cl. 240—78.)



In an incandescent electric lamp fixture, the combination of an insulating body hollow in form and having an opening in its end wall and also having a socket in the inner side of said wall, an interiorly threaded bushing connected to the body and arranged in said opening thereof, a receptacle threaded through the bushing and equipped with a lamp socket and with means for the connection of electric conductors, a plate carried by the receptacle and having a notch in its periphery, a pin movably arranged in the body and against the inner side of the wall thereof and also arranged in the notch of said plate and with its end in the socket in the end wall of the body, and a plate detachably connected to the body and receiving the opposite end of the said pin.

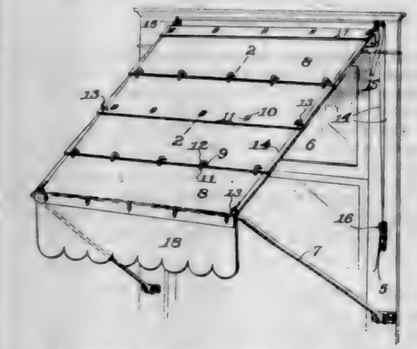
1,567,238. TYPEWRITING MACHINE. GEORGE W. CAMPBELL, Hartford, Conn., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Dec. 19, 1921. Serial No. 523,340. 10 Claims. (Cl. 197—186.)

1. A sound-deadening casing for a typewriting machine having a frame, feet at the corners of said frame, a carriage, and an operating finger-piece projecting from said carriage, said casing having a slot in which the operating finger-piece travels with the carriage, said casing having fixed means for locating the feet at the front of the frame, positioning the machine so as to avoid interference with the operation of the finger-piece in the slot, and adjustable means for locating the feet at the rear of the



frame in conformity with the location of the feet at the front, thereby compensating for slight variations in the relative positioning of the feet in different machines.

1,567,239. AWNING COVERING AND CLOSURE FOR OPENINGS IN WALLS. CARL F. CAPELL, Santa Monica, Calif. Filed Feb. 4, 1925. Serial No. 6,730. 3 Claims. (Cl. 156—43.)

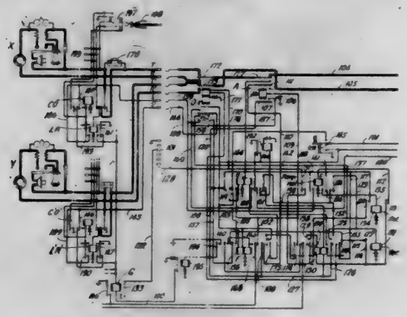


1. An awning comprising a U-shaped frame adapted to be pivotally secured to the casement of a window; a ledge adapted to be secured to the top of the casement of a window; a covering comprising a plurality of strips of metal, each strip having a line of perforations along one of its edges and two lines of perforations along the other edge; wire staples connecting said strips of metal by being passed through the single line of perforations of one strip and through the double line of perforations of an adjacent strip and clinched, said strips of metal being used in multiples of two and the lines of staples projecting alternately from opposite sides of the strips, said strips being secured to the ledge at the top and the frame at the bottom of staples, eyes secured to the lower edges of the pairs of strips; pulley blocks adapted to be secured to the window casement and cables passed through said pulley blocks and eyes and secured to the lower strip.

1,567,240. RESTRICTED-SERVICE AUTOMATIC TELEPHONE SYSTEM. WARREN W. CARPENTER, Queens, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 11, 1923. Serial No. 667,796. 5 Claims. (Cl. 179—18.)

1. In a telephone system, telephone lines of different classes, means for establishing different electrical conditions on the terminals of one of the talking conductors of

certain of said classes of lines, selectors having groups of trunks, means automatically operated upon the closure of the calling line for extending the line to an idle selector, means controlled by the calling party for setting said selector to any trunk group, means thereupon automatically operated for driving the selector over the



trunk group, a switch closed by the selector when set to a certain group, and means jointly controlled by the electrical condition of the calling line terminal and said switch for determining whether the selector shall select an idle trunk or pass over idle trunks when set to the said group.

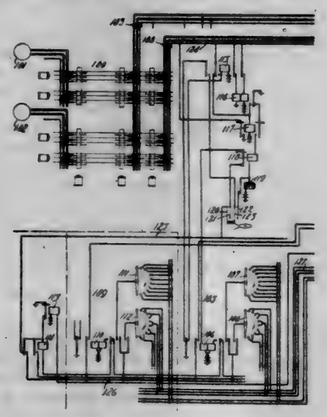
---

1,567,241. PROCESS OF MANUFACTURING HYDROCARBONS AND CYANIDES. JOHN COLLINS CLANCY, Asbury Park, N. J. Filed Apr. 18, 1925. Serial No. 24,270. 8 Claims. (Cl. 23—81.)

7. The process of manufacturing hydrocarbons and cyanides which comprises, destructively distilling comminuted carbonaceous material in contact with molten alkali metal cyanide, collecting the volatile reaction products, and subjecting the distillation residues to a cyanide forming reaction to reconstitute the cyanide decomposed in the distilling step and to form additional cyanide.

---

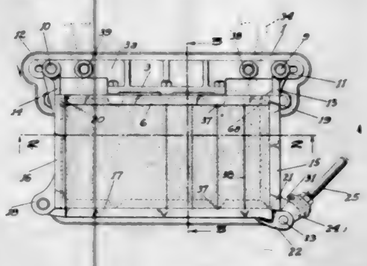
1,567,242. TELEPHONE-EXCHANGE SYSTEM. EDGAR H. CLARK, Richmond Hill, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 26, 1923. Serial No. 670,818. 5 Claims. (Cl. 179—18.)



1. In a telephone system, a selective switch comprising a number of rows each including a plurality of separately operable sets of contacts, switching bars, one for each row, a line extending to said switch and appearing in the contacts thereof, and means individual to the line and responsive to impulses sent thereover directly to the switch for causing the operation of said bars to selectively extend the line through said switch.

---

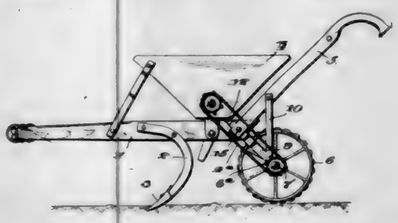
1,567,243. MOLD FOR FORMING CONCRETE BUILDING UNITS. HARRY E. CLOUSER, San Jose, Calif. Filed Nov. 29, 1924. Serial No. 752,925. 9 Claims. (Cl. 25—121.)



1. A mold including a fixed side, hinge elements at points removed from the fixed side, the ends of the mold being mounted on the removed hinges and engaging the free ends of the fixed side, the other side of the mold being hinged to one end and arranged for interlocking engagement with the other to close the mold.

---

1,567,244. AGRICULTURAL IMPLEMENT CONSTRUCTION. EUGENE M. COLE, Charlotte, N. C. Filed Feb. 2, 1924. Serial No. 690,180. 2 Claims. (Cl. 97—238.)



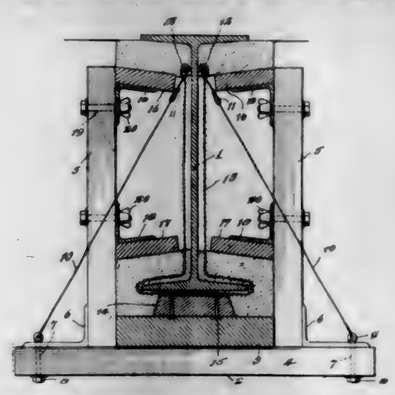
1. The combination in an agricultural implement having a ground engaging element, of a pair of supporting arms for said element, said arms being of relatively thin flat cross-section, a wooden beam located between said arms and having at each side a notch to receive said arms, said notch being of substantially the same depth as the thickness of said arms, whereby the outer face of said arms lies substantially flush with the surface of the beam, a pair of handle bars fitted to the sides of the beam and overlying said notches and arms, and a bolt passing through said handle bars, arms, and beam rigidly securing said parts together.

---

1,567,245. METHOD OF AND MEANS FOR INCASING GIRDERS OR THE LIKE. BRYAN C. COLLIER and WILLIS LEHICH, Allentown, Pa., assignors to Cement-Gun Contracting Company, Allentown, Pa., a Corporation of Delaware. Filed May 2, 1925. Serial No. 27,401. 12 Claims. (Cl. 25—131.5.)

1. A device for use in incasing a girder by shooting the material into place, comprising a continuous member to be placed beneath the flanged lower edge of the girder to determine the lower surface of the flange incasement,

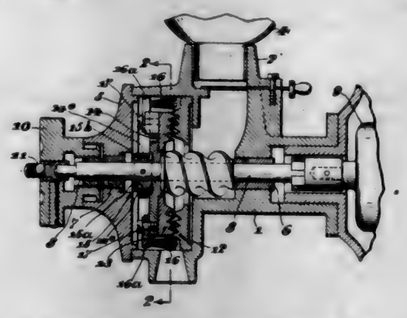
means to support said member, and strips detachably carried by said supporting means to form the upper sur-



faces of the incasement for the flanges at said lower edge when material is shot in from the side around said flanges.

---

1,567,246. GRINDING MILL. LOUIS J. COSTA, Philadelphia, Pa., assignor to Standard Electric Products, Inc., Philadelphia, Pa., a Corporation of Delaware. Filed Feb. 19, 1925. Serial No. 10,199. 7 Claims. (Cl. 83—8.)



1. In a grinding mill, a casing, co-acting fixed and rotatable grinding members in said casing, a brush supporting member movable with said rotatable grinding member, said last mentioned member having a channel, a brush-holder in said channel, and a flexible brush element secured to said brush holder.

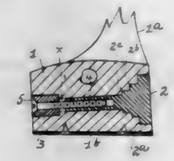
---

1,567,247. COLLAR FASTENER. HARRY L. CROSON, Oakland, Calif., assignor of one-half to William W. Laidley, Piedmont, Calif. Filed June 18, 1923. Serial No. 646,120. 1 Claim. (Cl. 24—101.)

A collar fastener comprising a stamping of sheet material provided with a head of a width adapted to fill the space between the button hole and the top of the pocket in the neckband of a shirt, the head having two virtually straight and parallel side edges joined to round end edges, and a tongue extending approximately midway from one side edge of the head and having two virtually straight and parallel side edges at approximately right angles to the side edges of the head, the side edges of the tongue being joined to a round edge at the free end of the tongue, and the tongue having an obtuse-angled bend at its junction with the head, and a reverse, obtuse-angled bend near to the first bend, so that the free end of the tongue is in a plane virtually parallel with the plane of the head, the edges and surfaces of the finished collar fastener being free from projections, depressions or notches.

---

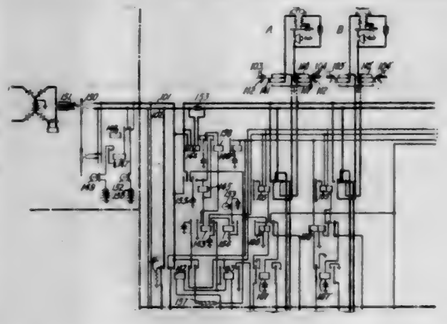
1,567,248. GOLF CLUB. JOSEPH A. DAHLMAN, Duluth, Minn. Filed Apr. 7, 1925. Serial No. 21,335. 9 Claims. (Cl. 273—77.)



1. In a golf club, the combination of a club head body portion, a striking head member inserted in the front face thereof, a rear weight inserted in the rear face thereof, an internally threaded traction member attached to one of said members and extending toward the other of said members, an externally threaded traction member extending through said other of said members and into engagement with said internally threaded member, whereby said striking head and said rear weight may be drawn toward each other and tightly into the recesses into which they are inserted.

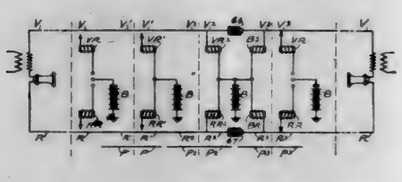
---

1,567,249. TELEPHONE-EXCHANGE SYSTEM. LUCIEN DEVAUX, Paris, France, assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 9, 1923. Serial No. 667,470. 9 Claims. (Cl. 179—42.)



9. In a telephone system, subscribers' lines, a link circuit, a monitor's position, a signal for each of said lines at said monitor's position, means responsive to the initiation of a call on one of said lines for operating the signal thereof, means individual to each of said lines and under the control of said monitor for interconnecting said lines over said link circuit, and means in said link circuit operative in response to the termination of a conversation between two subscribers' lines over said link circuit for operating the signals of the respective lines.

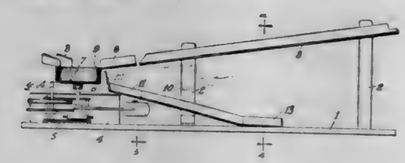
1,567,250. AUTOMATIC TELEPHONE-EXCHANGE SYSTEM. BERT G. DUNHAM, Chicago, Ill., assignor, by mesne assignments, to Western Electric Company, Incorporated, a Corporation of New York. Filed Oct. 5, 1904. Serial No. 227,289. 2 Claims. (Cl. 179—18.)



1. In an automatic telephone system, the combination with a telephone line of an automatic switch at the central office connected in a conversational circuit with said line, release means for said switch controlled only over said line, a second switch at the central office having contacts also in the conversational circuit with said line, and a release magnet for said second switch actuated upon the complete release of said first switch, substantially as described.

---

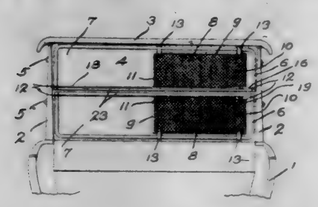
1,567,251. GAME. JOSEPH EKSTEIN, New York, N. Y. Filed June 19, 1925. Serial No. 38,142. 9 Claims. (Cl. 273—138.)



1. In a game a base, an inclined chute mounted on said base, a motor mounted on said base at one end thereof, a series of rotating channels mounted on said motor, said channels being adapted to register intermittently with the lower end of said chute, game pieces adapted to travel along said chute, and a receptacle to receive the game pieces after they have passed from the end of the chute through the channels.

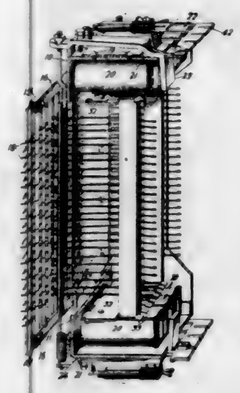
---

1,567,252. WINDSHIELD GUARD. SAMUEL J. EPARD and EVERETT B. SAUTER, Touchet, Wash. Filed Oct. 29, 1923. Serial No. 671,298. 2 Claims. (Cl. 296—95.)



1. In a windshield guard, the combination with a windshield comprising a frame and a glass mounted in the frame, of a guard mounted on the inside of the windshield and movable therewith, and comprising a screen mounted in a frame, said frame having one of its sides extended beyond the screen, means to adjust the length of said extended side, and to rigidly secure said side to the windshield frame, and means to secure the other side of the guard to the frame of the windshield.

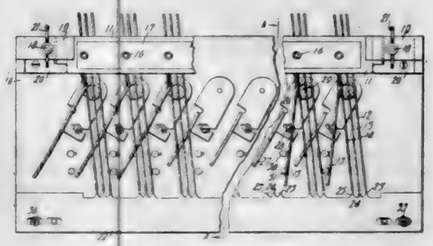
1,567,253. SWITCHING DEVICE. OSCAR F. FORSBERG, Yonkers, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed July 2, 1921. Serial No. 482,106. 28 Claims. (Cl. 179—27.5.)



28. A switch comprising movable contacts, fixed contacts, and means for moving said first contacts in a plane at right angles to the plane of said fixed contacts and along the length thereof, whereby a wiping engagement is effected between said contacts.

---

1,567,254. MEANS FOR ADJUSTING COORDINATE SWITCH PARTS. OSCAR F. FORSBERG, Yonkers, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Jan. 19, 1923. Serial No. 613,570. 5 Claims. (Cl. 153—10.)



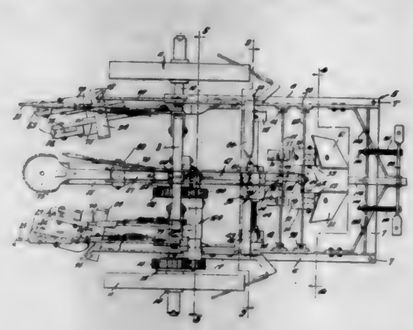
1. A jig for a switch having a plurality of flexible elements, said jig comprising means for securing the flexible elements thereto, a guide for regulating the tension of some of said elements and a pulrality of reference markers for predetermining the relative positions and tensions of other of said elements.

---

1,567,255. COTTON CULTIVATOR. ROBERT J. FOSTER, Westplains, Mo. Filed Aug. 6, 1923. Serial No. 656,004. 2 Claims. (Cl. 97—213.)

1. In a machine of the class described, a wheel supported frame, a rotary chopping member including a hub, arms radiating from the hub and having elongated openings, blade supporting arms having elongated openings,

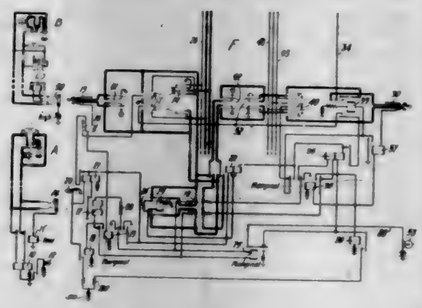
means disposed within the openings to adjustably connect the arms, blades pivotally mounted at the outer ends of the blade supporting arms, coiled springs con-



nected with the blades for normally holding the blades to their active positions, and means for rotating the chopping member.

---

1,567,256. TELEPHONE SYSTEM. CLARENCE B. FOWLER, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Aug. 27, 1923. Serial No. 659,509. 15 Claims. (Cl. 179—27.)



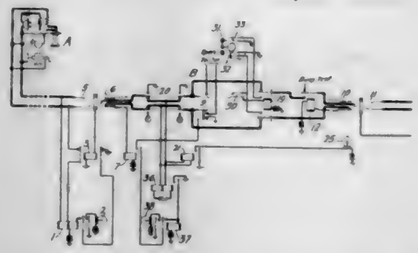
1. In a telephone system, a plurality of trunk circuits having different dialing characteristics, a cord circuit, a dial circuit for supplying different dialing potentials, a key for connecting the dial circuit to the cord, and means operative in response to the connection of said cord circuit with one of said trunk circuits and the actuation of said key for conditioning said dial circuit to supply the particular dialing potential required for the trunk circuit taken for use.

---

1,567,257. TELEPHONE SYSTEM. CLARENCE B. FOWLER, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 20, 1923. Serial No. 681,693. 13 Claims. (Cl. 179—27.)

1. A telephone system comprising a trunk circuit extending from a manual to an automatic central office, a link circuit at the manual office, an impulse sender, means for associating said sender with the link circuit, subscribers' lines at the automatic office, an automatic switch at the automatic office, an impulse responsive relay for the control of said switch to establish a connection between the trunk circuit and a subscriber's line,

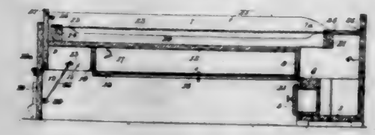
and means responsive to the connection of the sender to the link circuit, the link circuit to the trunk circuit and the operation of the sender for closing a control circuit



for said impulse responsive relay including only a portion of one of the talking conductors of said trunk circuit, through said circuits from said impulse sender.

---

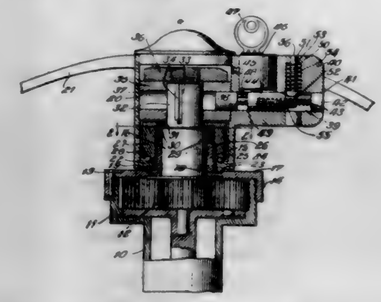
1,567,258. COMBINED WARDROBE AND BED. FRANK GALIK, Fairgrove, Mich. Filed Dec. 6, 1923. Serial No. 678,882. 1 Claim. (Cl. 5—1.)



In a combined wardrobe and bed, a base structure, an upper structure hinged thereto in the form of a combined wardrobe and bed, the upper structure supporting a bed spring having transverse end rails with the upper edge of the rail adjacent the base being bevelled, and a pillow board hinged to the base and having a forward bevelled edge supported on the bevelled edge of the bed rail when the bed is lowered the bevels being so arranged that the upward folding movement of the bed displaces the pillow board from the bed rail and folds it upwardly.

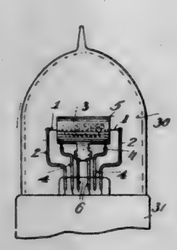
---

1,567,259. AUTOMOBILE LOCK. WILLIAM GANZ, Chicago, Ill. Filed Jan. 28, 1922. Serial No. 532,412. 8 Claims. (Cl. 70—129.)



4. In an automobile, a steering gear, a steering column, a steering shaft rotatably mounted in said column, a steering wheel adapted to rotate said steering shaft, and a combined thrust bearing and a swivel connection between said steering wheel and said steering column.

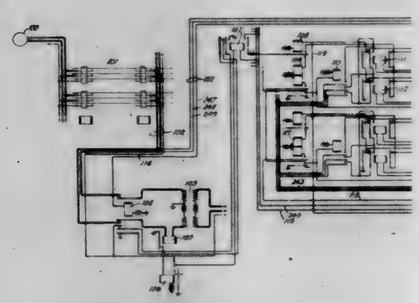
1,567,260. AUDION ELECTRODE STRUCTURE. WILLIAM GARITY, Brooklyn, N. Y., assignor to De Forest Radio Telephone & Telegraph Company, Jersey City, N. J., a Corporation of Delaware. Filed Mar. 17, 1923. Serial No. 625,911. 14 Claims. (Cl. 250—27.)



1. In an audion structure, a plate electrode comprising a blank having tongues extending from opposite edges thereof, the said blank being formed into a cylinder with the tongues positioned against each other, a support for said cylinder, and means for securing said tongues to said support.

---

1,567,261. TELEPHONE-EXCHANGE SYSTEM. EARL S. GIBSON, Ridgewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Sept. 28, 1923. Serial No. 665,309. 8 Claims. (Cl. 179—18.)

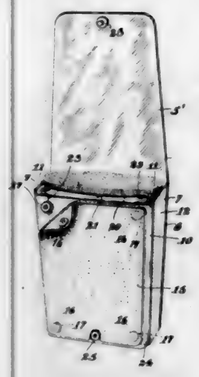


1. In combination, a plurality of central office senders, a connecting circuit for each of said senders, a plurality of selective switches in which said circuits appear, each switch having access to a different portion of said senders as first choice and to the remainder of said senders as second choice, and means for operating one of said switches to select the connecting circuit individual to any one of said senders.

---

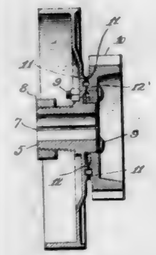
1,567,262. COMBINATION WHISK-BROOM HOLDER AND SHOE POLISHER. LAWRENCE E. GOELLER, Circleville, Ohio. Filed June 11, 1925. Serial No. 36,506. 8 Claims. (Cl. 15—227.)

1. A shoe shining device comprising an open ended casing adapted to receive the human hand, a shoe shining element detachably carried by one wall of the casing and extending entirely across the same, and a flap carried by one end of the casing and normally overlying the shoe shining element, and means for detachably connecting the free end of the flap to the casing.



---

1,567,263. COMBINED PULLEY AND GEAR. ROBERT W. GOSSETT, Spartanburg, S. C., assignor to Manufacturers' Equipment Company, Spartanburg, S. C., a Corporation of South Carolina and North Carolina. Filed Oct. 17, 1924. Serial No. 744,238. 5 Claims. (Cl. 74—28.)



1. A combined wheel and gear embodying a pulley having an integral body and hub and provided on one face of its body with an annular series of serrations, a hubless gear provided on one of its faces with a similar series of serrations, bolts for clamping the gear and the pulley together with their serrations interlocking, said hub being longitudinally slit its entire length, said slit extending outwardly into the body to a point beyond said serrations, and means resiliently clamping the hub on a shaft.

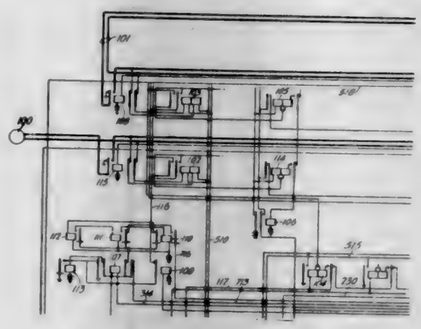
---

1,567,264. PROCESS FOR TREATING COTTON TEXTILES TO IMPART A LINEN-LIKE APPEARANCE THERETO. RENÉ MARIE LOUIS GUSTAVE HÉBERT, Gisors, France, assignor to Alphonse Vergé, Paris, France. Filed Apr. 7, 1925. Serial No. 21,445. 1 Claim. (Cl. 8—20.)

A process for treating cotton textile fabrics to impart the appearance of linen thereto, which comprises scouring the fabric with sodium carbonate, chlorinating the scoured fabric, treating it in a bath of sulphuric acid having a temperature not exceeding 15° C. and a concentration between 53° and 53.5° Bé., the period of impregnation being between 14 and 18 seconds; the two last-mentioned conditions being varied slightly between the said limits in accordance with the nature of the material; rinsing the material after the acid treatment, and thereafter subjecting it to a dressing operation.

---

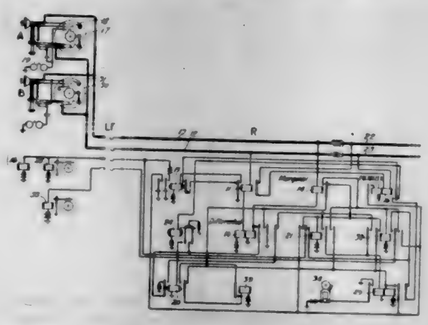
1,567,265. TELEPHONE-EXCHANGE SYSTEM. EDWARD E. HINRICHSEN, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 8, 1923. Serial No. 678,142. 14 Claims. (Cl. 179—27.)



1. In a telephone system, a plurality of local subscribers' lines arranged for connection with each other, outgoing trunks for extending connections from any of said lines, incoming trunks for extending connections to any of said lines, and a single unitary cross-bar switching device for effecting all of said connections.

---

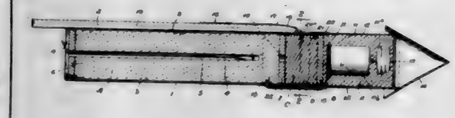
1,567,266. MESSAGE-REGISTER SYSTEM. EDWARD E. HINRICHSEN, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Mar. 27, 1924. Serial No. 702,235. 18 Claims. (Cl. 179—9.)



1. The method of operating a party-line message register automatic telephone system consisting in establishing an identifying condition at each selective operation of the calling subscriber whereby a meter corresponding to the calling subscriber may be operated when the called party answers, and preventing the operation of the meter if the identifying condition established at the successive selective operations by the calling subscriber are not identical.

---

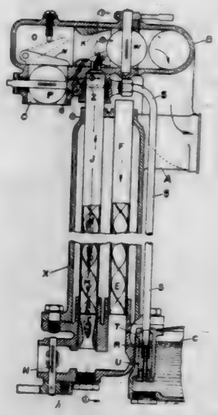
1,567,267. ROCKET. THOMAS G. HITT, Seattle, Wash. Filed Dec. 4, 1924. Serial No. 753,858. 2 Claims. (Cl. 102—28.)



2. A pyrotechnic rocket comprising a shell having a carrying charge and a bursting charge therein, said shell being provided with a hole through the side thereof opposite the bursting charge, a cover for said hole and a guide for the shell, said guide having a flexible tube filled with an explosive carried thereby, said tube having one end bent to perforate the cover and contact with the bursting charge, said guide and said tube being adjustably connected to the said shell.

---

1,567,268. CARBURETOR. GEORGE M. HOLLEY, Detroit, Mich. Filed July 19, 1922. Serial No. 576,016. 2 Claims. (Cl. 261—13.)



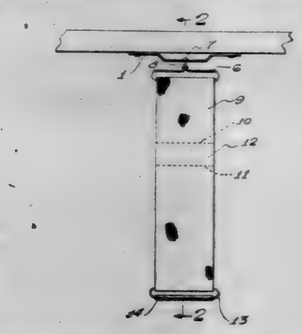
1. In combination with an internal combustion engine, an exhaust pipe, a carburetor comprising primary and secondary mixing chambers, a fuel nozzle discharging into said primary mixing chamber, an air passage leading to said primary mixing chamber in heat conducting relationship with said exhaust pipe, a cold air entrance located between said air passage and said primary mixing chamber, means for controlling said air entrance for regulating the temperature in said primary mixing chamber, a passage connecting said primary mixing chamber to said secondary mixing chamber, said passage being in heat conducting relationship with said exhaust pipe, a secondary air entrance leading to said secondary mixing chamber to form therein an explosive mixture for said internal combustion engine.

---

1,567,269. WORK HOLDER. MINNIE HOYA, Chicago, Ill. Filed Dec. 15, 1923. Serial No. 681,011. 2 Claims. (Cl 223—54.)

1. In combination with an attaching plate, the central portion of said attaching plate being offset laterally

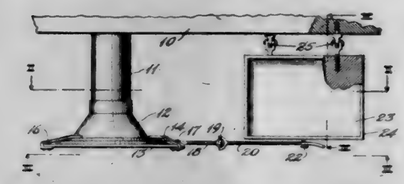
relative to the ends and having an opening therethrough, of a fabric holder including spaced parallel side portions having spaced parallel rows of stitching intermediate



its ends, a weight attached to one end of the holder and means carried by the other end for loosely connecting the said holder to the plate.

---

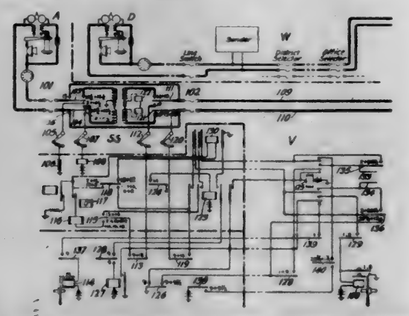
1,567,270. AUTOMATIC LAVATORY APPLIANCE. HENRY NEWTON JAMES, Miami, Fla. Filed Oct. 5, 1925. Serial No. 60,589. 5 Claims. (Cl. 4—8.)



1. A sanitary closet for railroad cars including a receptacle, a valve for opening and closing the bottom of said receptacle, a wind vane swingingly mounted on the car transverse the direction of its movement, and an operative connection between said vane and valve.

---

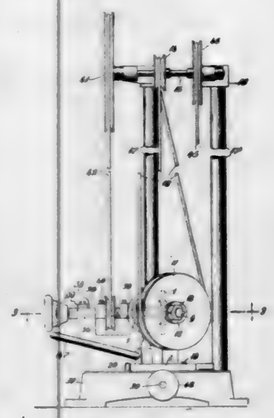
1,567,271. TELEPHONE-EXCHANGE SYSTEM. LEWIS H. JOHNSON, Madison, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Aug. 21, 1923. Serial No. 658,512. 11 Claims. (Cl. 179—27.)



1. In a telephone exchange system, a trunk, a selector switch for extending a connection therefrom, control means for said switch, a control circuit extending thereto over said trunk, means for further extending said connection, means at said switch for disassociating said control circuit from said control means and for extending it to said connection extending means, and means at said switch for compensating the resistance of said control circuit incident to the extension of said circuit.

---

1,567,272. GRINDING APPARATUS. ROBERT MCC. JOHNSTONE, Roselle Park, N. J., assignor to Cameron Machine Company, Brooklyn, N. Y., a Corporation of New York. Filed Apr. 4, 1921. Serial No. 458,448. 5 Claims. (Cl. 51—106.)



1. Grinding apparatus comprising: a grinding element, a work holder, a pivotal support for the work holder whereby said work holder may be swung with respect to the grinding element to effect different angular grinding relations between the two, and an adjustable eccentric bushing surrounding said pivot.

---

1,567,273. NAIL EXPANSION AND METHOD. JOHN KARITZKY, Garwood, N. J., assignor to Henry B. Newhall, Plainfield, N. J. Filed Sept. 20, 1924. Serial No. 738,804. 7 Claims. (Cl. 85—2.4.)

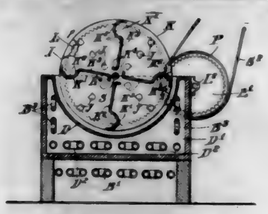
1. The method of manufacturing a wire nail expansion consisting in bending a strand of wire back on itself to form a two strand wire, then bending the two strand wire on itself to form a four strand expansible shield.

---

1,567,274. APPARATUS FOR TREATING LACTIC FLUIDS. JOSEPH MOSES WARD KITCHEN, East Orange, N. J. Filed June 2, 1923. Serial No. 643,022. 8 Claims. (Cl. 99—2.)

3. In an apparatus of the class described, a rotor comprising a rotatable shaft, means for rotating said shaft,

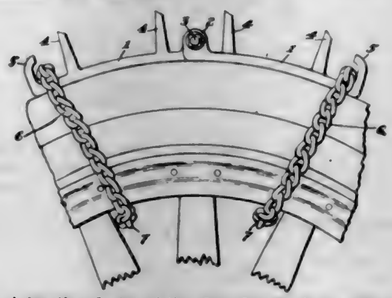
spaced perforated disks secured to said shaft, perforated blades connecting said disks, said blades being radially disposed to said shaft, the outer portion of said blades



forming perforated elongated trough-dippers, and the inner longitudinal edges of said blades being spaced from the shaft.

---

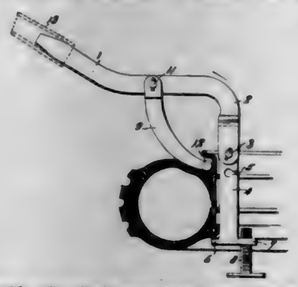
1,567,275. TRACTION SHOE. MACK KLEIN, Revere, Mass. Filed Dec. 6, 1923. Serial No. 679,023. 2 Claims. (Cl. 152—14.)



1. A traction device of the class described, comprising a pair of plates hinged to each other at one end, each plate at its opposite end being provided with a pair of spaced alined hooks and with a vertical upstanding rib extending parallel to the plane of said hooks and inset from the end of the plate, and a pair of chains disposed across the free ends of said plates in the space between said hooks and said last-named ribs for anchoring the traction device in position.

---

1,567,276. TIRE TOOL. GUST KOWALCYK and JOSEPH KOWALCYK, Houtsdale, Pa., assignors of one-third to George H. McGrath, Houtsdale, Pa. Filed Mar. 27, 1923. Serial No. 628,080. 1 Claim. (Cl. 157—6.)



A portable tire tool comprising an L-lever having a handle portion extending at an angle to the lever proper, a straight jaw having a T end and adjustably secured to the short arm of said L lever, a curved pusher jaw pivoted to the other arm of said L lever and having a T end to engage the tire, the T head of said first mentioned jaw adapted to engage the rim, and an adjustable screw support threaded into the T head of said first mentioned jaw for the purposes described, said pusher jaw being arranged with its convex surface to be opposed to the tire when the tool is in use and the length of said straight jaw being approximately that of the width of the rim whereby to bring the pivot point down close to the rim, and all being arranged whereby a push action on the handle part of the lever will cause said pusher member to force the tire off the rim substantially as shown and described.

---

1,567,277. COMPOSITION FOR ELECTRIC INSULATORS AND METHOD OF PREPARING SAME. ARMAND L. LABBE, Murray, Utah, assignor to American Smelting and Refining Company, New York, N. Y., a Corporation of New Jersey. Filed Aug. 16, 1921. Serial No. 492,654. 2 Claims. (Cl. 106—12.)

1. A process of forming an electrical insulating material for high voltage electric current which consists in mixing slacked lime substantially free from magnesia in the proportion of not less than 40% and Portland cement and sand in substantial proportions, said ingredients being mixed together and formed into shape and then baked prior to use for insulating purposes.

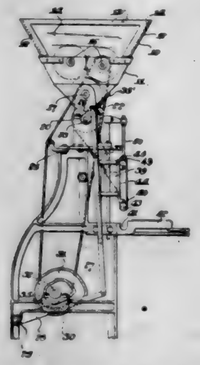
---

1,567,278. COMPOSITE OR SKELETON METAL WORK AND METHOD OF PRODUCING THE SAME. LAURENCE S. LACHMAN, New York, N. Y. Filed Aug. 24, 1923. Serial No. 659,046. 6 Claims. (Cl. 219—10.)

1. Composite metal work one member of which consists of two pieces of metal adjacent to one another but with a slight space between them at the point of weld and another member welded against the same in said space on the line of division or separation between the elements comprising the first-named member.

---

1,567,279. CIGAR BUNCHING. BERNARD LIBERMAN, Philadelphia, Pa. Filed Nov. 24, 1920, Serial No. 426,184. 18 Claims. (Cl. 131—42.)



7. In a cigar bunching machine, the combination of a bunching apron, means operating upon the apron to form a bunching pocket and to close the ends of said pocket, means for delivering measured charges of filler to said

pocket and means for pressing the entire upper surface of the charge into a horizontal plane below the margin of the pocket until after the withdrawal of said delivering means.

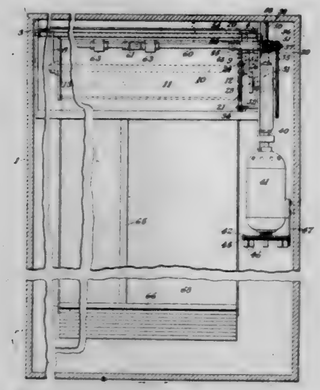
---

1,567,280. TELEPHONE-EXCHANGE SYSTEM. GEORGE ALBEN E. LUNDELL, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Mar. 11, 1920. Serial No. 364,999. 39 Claims. (Cl. 179—27.5.)

1. In an automatic switch, a plurality of rows of terminals, a plurality of sets of brushes engageable therewith, resilient supporting means for said brushes, a shaft for moving said brushes, brush-controlling means for laterally flexing said supporting means whereby said brushes are caused to occupy an inoperative position between said terminal rows, and a tripping device operated by said shaft whereby said brush sets may be selectively released.

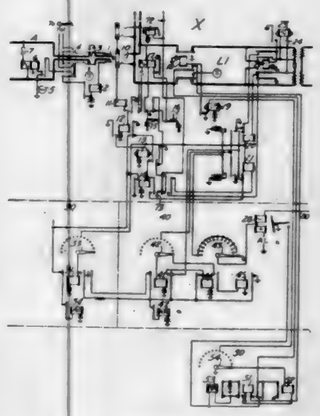
---

1,567,281. DISPLAY APPARATUS. LESLIE R. MCDONALD, Montreal, Quebec, Canada. Filed Nov. 8, 1924. Serial No. 748,537. 20 Claims. (Cl. 40—35.)



1. In a display apparatus, the combination of placard carrier rotating means and a rotatable placard carrier, a series of flexible placards each attached by one end thereto and partially rolled thereupon with their free ends depending therefrom, and means for frictionally engaging the back of and lifting the depending portion of the placard.

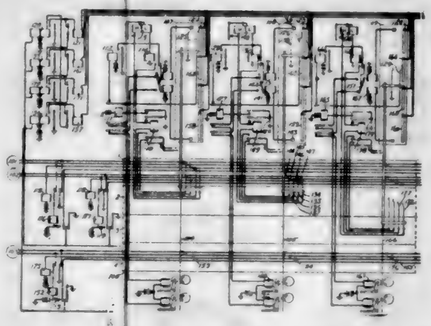
1,567,282. TELEPHONE SYSTEM. HARRY W. MACDOUGALL, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 19, 1921. Serial No. 523,264. 16 Claims. (Cl. 179—43.)



15. The method of signaling which comprises translating alternating signaling current into a code of direct current impulses, translating the direct current impulses into a step by step movement, translating the step by step movement into a code of direct current impulses, and translating the last said code of impulses into a steady signal indication.

---

1,567,283. TELEPHONE-EXCHANGE SYSTEM. WILLIAM H. MATTHIES, Hackensack, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Feb. 23, 1924. Serial No. 694,533. 5 Claims. (Cl. 179—18.)



1. In a telephone exchange system, a plurality of line finders having no normal position, a plurality of subscribers' lines terminating in said line finders, said lines being divided into groups, a start circuit common to the lines of each of said groups, means controlled over each common start circuit for starting all idle line finders whose brushes are at the time standing within the group to which the start circuit is assigned, and means operative when no idle line finders have brushes standing within the calling group to render effective the start circuit common to the lines of a subsequent group for starting such idle line finders as at the time have their brushes standing in such subsequent group.

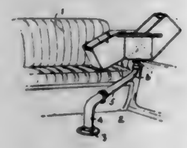
1,567,284. METHOD AND APPARATUS FOR FORMING CANDY WHISTLES. FRANK B. MILLER, Norwalk, Ohio. Filed Feb. 21, 1925. Serial No. 10,828. 17 Claims. (Cl. 107—10.)

1. A molding apparatus for forming the hollow body of a candy whistle, comprising a mold having an aperture through one end and being open at the other end, a stud projecting inwardly in said mold for forming an air outlet passage for the hollow body, and a core reciprocable through the open end of said mold for forming an air chamber and inlet passage in the whistle body, said core projecting into and closing the aperture in the end of said mold and bearing against said stud when inserted into the mold.

13. The method of forming a candy article comprising, casting in a suitable mold a body of candy, forming, by means of a suitable core, a passage through said body comprising a restricted inlet passage and an air chamber, withdrawing the core forming the air chamber through an open end in the body, and closing said open end by molding molten candy around a handle and forming from the molten candy an end wall for said hollow body.

---

1,567,285. BABY CARRIER. FRANK A. MITCHELL, San Francisco, Calif. Filed Dec. 11, 1924. Serial No. 755,294. 3 Claims. (Cl. 5—94.)

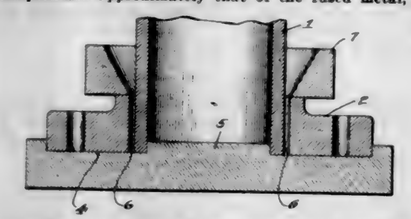


1. A baby carrier comprising a container having a central portion and two end portions, each of said portions having sides and a base member said three base members hinged together, and the sides and base member of each portion hinged together, means for locking together the sides of adjacent portions, and a folding end plate on each end portion, all constructed and adapted to fold together into a flat package.

---

1,567,286. FLANGED PIPE AND METHOD OF PRODUCING. WILLIAM DAVIS MOORE and DOUGLAS BEATTY, Birmingham, Ala., assignors to American Cast Iron Pipe Company, Birmingham, Ala., a Corporation of Georgia. Filed Jan. 30, 1925. Serial No. 5,791. 5 Claims. (Cl. 22—204.)

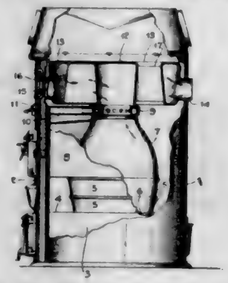
1. The step in the method of connecting a cast flange to a cast pipe length through the intermediary of a fused metal which consists in heating the flange and pipe to a temperature approximately that of the fused metal, and



with the temperature of the flange higher than that of the pipe lengths prior to the insertion of the fused metal, whereby the parts will be shrunk upon each other.

---

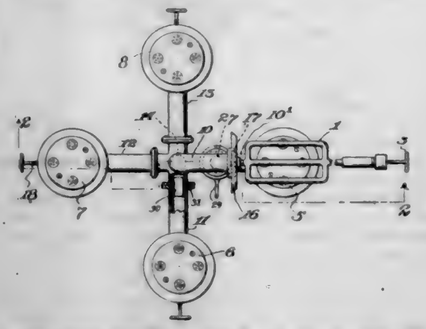
1,567,287. WARM-AIR FURNACE. DAVID M. MORPHY, De Kalb, Ill., assignor to Utica Heater Company, Utica, N. Y., a Corporation of New York. Filed June 16, 1923. Serial No. 645,723. 17 Claims. (Cl. 126—112.)



1. In an air heating furnace, the combination of a radiator comprising a horizontal ring-form flue having a downwardly opening gas inlet elbow at the center and an upward air passage between said flue and elbow, a fire chamber having a fuel feed conduit and a restricted gas outlet above the level of said conduit and of substantially the same diameter as said elbow, a separately made, air-conducting ring interposed between and connecting the fire chamber outlet with said elbow inlet, an air supply duct open to atmosphere for admitting supplemental air to said ring and exit means in the ring for delivering such air into the fire-gas flow in the ring connection.

---

1,567,288. BURNER. CLYDE W. MUMMERY, Richmond, Mich. Filed Nov. 24, 1924. Serial No. 751,979. 1 Claim. (Cl. 158—65.)

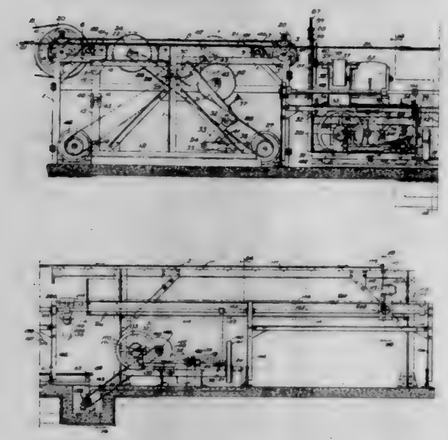


The combination with a retort, of a downwardly curved mixing chamber into which the retort discharges, said mixing chamber having an air inlet at its upper end com-

prising a series of holes surrounding the connection between the retort and the chamber, a shield surrounding said connection, between the retort and said holes, the mixing chamber also having a depending branch pipe forming an additional air inlet.

---

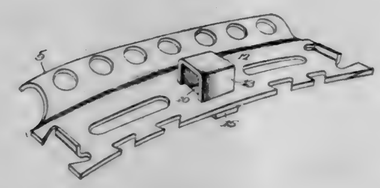
1,567,289. MACHINE FOR CUTTING SHEETS INTO SUITABLE LENGTHS AND WIDTHS. TREADWAY B. MUNROE, Forest Glen, Md. Filed Mar. 3, 1923. Serial No. 622,577. 18 Claims. (Cl. 143—47.)



1. In a machine for cutting continuously moving material the combination of a clamp; a transversely movable cutting means adapted to cut said material adjacent said clamp into predetermined lengths; and means actuated by said material for moving said cutting means and actuating said clamp.

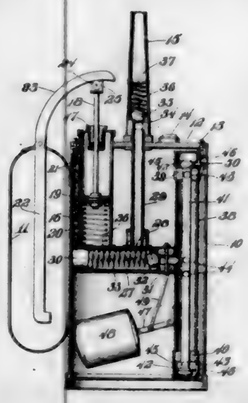
---

1,567,290. BRAKE SHOE. ALBERT NELSON, Chicago, Ill., assignor to The American Brake Shoe & Foundry Company, Wilmington, Del., a Corporation of Delaware. Filed Jan. 26, 1925. Serial No. 4,655. 9 Claims. (Cl. 188—258.)



5. A brake shoe comprising a reinforcing back having an opening therein extending transversely of the back and terminating at its ends in parallel slots extending lengthwise of the back, a fastening lug comprising a metal strap bent to form an arch and having its legs engaged with said slots and bent outwardly in opposite directions under and transversely of the back, projections on the back forming sides for said opening extending inwardly of the lug between the legs thereof, whereby said legs are engaged at the inside, the outside and the edges thereof by portions of the back, and shoulders at the edges of the legs directly engaging the back at the edge of the opening therein.

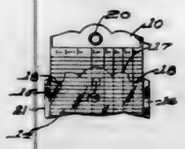
1,567,291. OIL CAN. ANTON NOVAK, Jr., Milford, Nebr. Filed Feb. 5, 1925. Serial No. 7,066. 3 Claims. (Cl. 221—51.)



1. In an oil can, a casing, a removable cover therefor, a pump cylinder directed through and supported from the cover, a piston reciprocable therein and operable from the exterior of the casing, a tube with which the discharge of the pump communicates, a check valved spout carried by said cover, a connection between the spout and said tube, closures for opposite ends of the tube, one of which comprises a spring seated check valve normally closing communication between the tube and the interior of the casing, a second tube with which the check valved end of the first named tube communicates and extending vertically in the casing and provided at adjacent opposite ends thereof with valve seats, a member reciprocable through said second named tube and having valves coacting with said seats, said member being hollow and forming a conduit for the transmission of fluid from the interior of the casing to the interior of the second named tube and means for bringing the valve of said member which is arranged uppermost into engagement with the adjacent seat of the tube to thereby seal against communication of the corresponding end of the member with the casing.

---

1,567,292. HOLDER FOR SIGNS. HARVEY M. OWENS, Leominster, Mass. Filed Feb. 19, 1925. Serial No. 10,379. 5 Claims. (Cl. 40—159.)



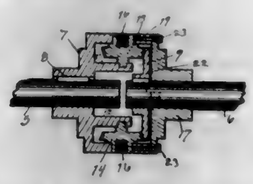
1. As an article of manufacture, a combined sign or card and holder therefor, comprising a card or sign of sheet material cut out from a blank thereof, three margins of said blank beyond the card having secured to their opposite faces around three edges a pair of sheets of transparent material constituting with said margins a casing or holder for the card and open at the fourth side, said card projecting to said fourth side of said holder and being capable of being drawn out at the fourth side, two of said margins constituting guides therefor.

1,567,293. ARRANGEMENT FOR PREVENTING MARGINAL DISCHARGES. EMIL PFIFFNER, Fribourg, Switzerland. Filed Apr. 7, 1923. Serial No. 630,668. 3 Claims. (Cl. 250—41.)

1. An arrangement for preventing marginal discharge particularly in condensers, comprising an insulating material, a conducting material the margin of which rests on the insulating material, and a margin of resistance-material enveloping the margin of the conducting material in order to gradually decrease the potential difference at the edges of the latter acting on the insulating material.

---

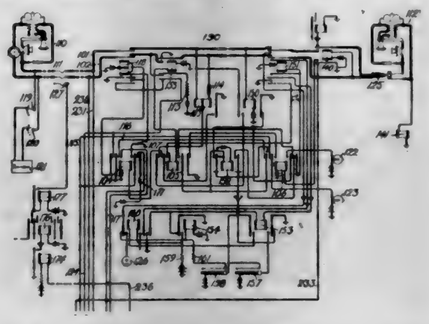
1,567,294. ADJUSTABLE COUPLING. ALFRED C. PIHL, Eureka, Calif. Filed Jan. 30, 1925. Serial No. 5,895. 2 Claims. (Cl. 64—90.)



2. In a device of the character described, a casting keyed adjacent the end of a shaft, a second shaft in axial alignment with said first mentioned shaft, a casting freely rotatable on said second mentioned shaft, a pair of radially disposed gears positioned in said first mentioned casting, a gear positioned on said second mentioned shaft and adapted to mesh with said radially disposed gears, means for rotating said last mentioned gears, and means for locking said gears against rotation.

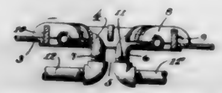
---

1,567,295. TELEPHONE-EXCHANGE SYSTEM. LIPA POLINKOWSKY, Antwerp, Belgium, assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Nov. 17, 1922. Serial No. 601,473. 6 Claims. (Cl. 179—27.)



1. In a telephone system, subscribers' lines, a trunk for making connections with said lines, an automatic selective switch for extending a connection over said trunk, a supervisory signal operated in response to the replacement of his receiver by the called subscriber, and means for operating said signal in response to the extension of a second connection over the trunk before such trunk is disassociated from the first called line.

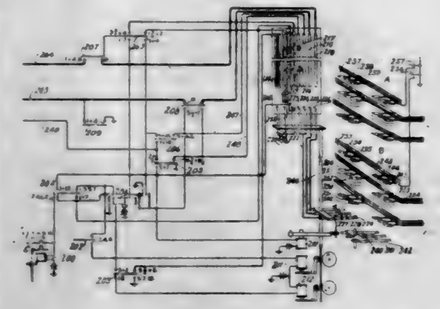
1,567,296. WATER HEATER. ADOLPH PRICE, Norfolk, Nebr. Filed Nov. 15, 1923. Serial No. 674,853. 1 Claim. (Cl. 126—53.)



In combination with a stove having a series of openings in the top thereof, a grate mounted in each opening and consisting of an annular rim and radial ribs connected therewith; of a series of water heating units each comprising an annular water pipe supported in the lower edges of said radial ribs and in spaced relation to and within the annular rim of the grate, the ends of each annular water pipe terminating in slightly spaced apart and downwardly extending parallel inlet and outlet stems, said stems having their lower ends threaded, elbow sections engaged respectively with said threaded stems and having their outer ends disposed in outwardly opposite directions, and inlet and outlet pipes threaded into engagement with the outer ends of said elbow sections and extending laterally in opposite directions, said parallel stems and the inlet and outlet pipes of the complete series of water heating units being disposed in the same longitudinal and vertical plane, as and for the purpose described.

---

1,567,297. SELECTIVE SWITCH. FRANK N. REEVES, Newark, N. J., and EDGAR H. CLARK, Richmond Hill, N. Y., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 29, 1919. Serial No. 347,936. 10 Claims. (Cl. 179—27.)

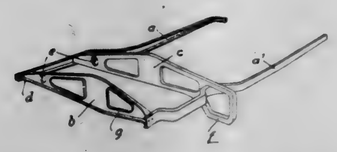


1. In a selective switch, a series of stationary terminals, a movable element arranged to cooperate with said terminals, means for driving said movable element, selective means responsive to the electrical condition of certain of said terminals for stopping said movable element to select any one thereof, a circuit including said movable element, means for closing said circuit to change the electrical condition of said movable element to in turn change the electrical condition of the selected terminal, said selective means being responsive to the electrical condition of a particular terminal of said series for stopping the movable element to select such terminal, and means for opening said circuit when said particular terminal is selected to prevent the changing of the electrical condition of the movable element.

1,567,298. MUFFLER. ELMER F. REINHARDT, Owensboro, Ky. Filed Sept. 12, 1923. Serial No. 662,243. 3 Claims. (Cl. 137—160.)

1. In a muffler construction, a casing having a tubular body circular in cross section and heads at ends of said body, a partition in said casing intermediate the length of said body and dividing the casing into forward and rear compartments, and inlet and exhaust tubes disposed longitudinally in said casing with their ends engaged with said heads and their intermediate portions passing through said partition, the inlet-tube having its inlet end registering with an opening in one of the heads and the exhaust tube having its outlet end registering with an opening in the other head and said tubes being provided in the forward and rear compartments with slots formed in their opposed side portions and extending longitudinally of the tubes.

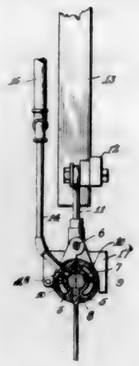
1,567,299. FRAME. THEODOR RICHTER, Spandau, Germany. Filed Feb. 13, 1924. Serial No. 692,619. 3 Claims. (Cl. 56—1.)



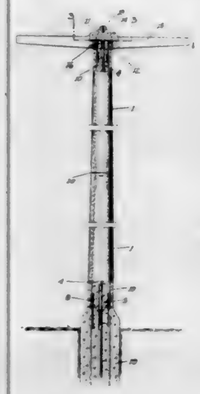
1. As an article of manufacture a frame for a mowing and binding machine consisting of four main members of pressed metal shaped to a channel or U form in cross section and made relatively wide at intermediate portions thereof and being substantially uniformly tapered toward their ends to thereby render them of uniform strength throughout their length, without excess weight, with respect to the loads to be carried, all of said members having their web portions vertically and their flange portions, horizontally disposed, two of said members being materially longer than the others and being disposed transversely of the line of travel of the frame when in use, with their open sides inward and the other two of said members being disposed adjacent each other and toward the same end of the first named members with the terminal ends of one of said members and one end of the other of said members snugly interfitted into the open sides of the first named members.

1,567,300. GLASS BAIT. GEORGE G. ROBERTS, Washington, D. C., assignor to The Virginia Plate Glass Corporation, Washington, D. C., a Corporation of Virginia. Filed May 11, 1923. Serial No. 638,294. 4 Claims. (Cl. 49—17.)

1. A bait for drawing glass in plate form consisting of a pair of separable sections pivoted together along their longitudinal edges and having a longitudinal slot between their lower meeting edges and an enlarged interior cavity extending the length of the slot, removable clamping means being employed to hold the sections together in closed relation.



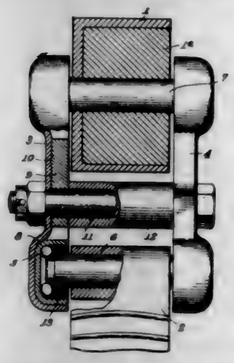
1,567,301. SECTIONAL CONCRETE POLE. ALFRED C. ROSS, Valley Springs, Calif. Filed Dec. 16, 1924. Serial No. 756,196. 3 Claims. (Cl. 72—84.)



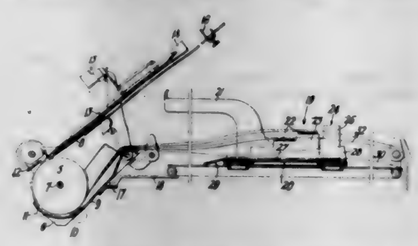
1. A concrete pole comprising a plurality of independent sections, connecting means between the sections arranged centrally of the cross sectional area thereof, a metal ring embedded in one end of each section and lying flush with the end thereof, the concrete being removed from around the inner periphery of the ring for a certain portion of the depth thereof, and a similar ring on the other end of each section projecting a certain distance outwardly thereof and adapted to fit inside the first ring of an adjacent section, the sections then abutting outwardly of the rings whereby the latter are concealed.

1,567,302. VEHICLE SPRING BEARING. RAYMOND R. SEARLES, New Britain, Conn., assignor to The Fafnir Bearing Company, New Britain, Conn., a Corporation of Connecticut. Filed Mar. 10, 1925. Serial No. 14,393. 6 Claims. (Cl. 267—54.)

1. In a vehicle spring bearing, a pair of shackle links having bearing surfaces at the ends, shackle pins, anti-friction bearing members between said bearing surfaces and said pins, and means for holding said links together with the anti-friction bearing members engaging said pins and bearing surfaces, said holding means being positioned substantially farther from one end of said links than from the other end.



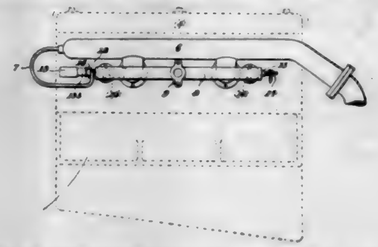
1,567,303. TYPEWRITING MACHINE. JESSE A. B. SMITH, Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Mar. 1, 1923. Serial No. 621,992. 8 Claims. (Cl. 197—126.)



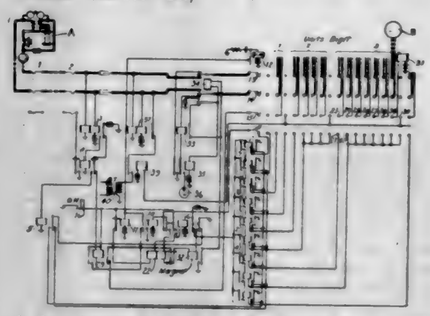
1. In a typewriting machine, in combination, a revoluble platen, a work-presenting frame behind said platen, carbon-withdrawal mechanism mounted on said work-presenting frame, means mounted on said carbon-withdrawal mechanism to facilitate the insertion of a separate work-sheet underneath the main web to be drawn around said platen to a position on top of said web, said insertion means comprising a chute having a body-portion, a downwardly-bent forward edge and upturned side edges forming rearwardly-converging side guides having forwardly-inclined surfaces on their tops that slope from their rear ends down to a point at their forward ends where they join the bottom of said chute, said inclined surfaces being provided with slots or cutout portions in their rear ends to allow for the passage of gages that may be adjusted transversely of said chute, and gaging means mounted on said carbon-withdrawal mechanism to guide said pack or web.

1,567,304. MANIFOLD HEATER. WILLIAM H. SMITH, Bridgeport, Conn. Filed Dec. 31, 1924. Serial No. 759,163. 3 Claims. (Cl. 123—122.)

1. The combination with an internal combustion engine having an exhaust manifold, of an intake manifold, an elongated chamber formed in the intake manifold and having its opposite open end portions projecting therefrom, one of said projecting portions having a lateral inlet and the other having its opening controlled by a valve structure, a removable heating element positioned within the bore of the chamber through the open end having the lateral inlet, and means for feeding exhaust gases from the exhaust manifold to the inlet of the chamber.

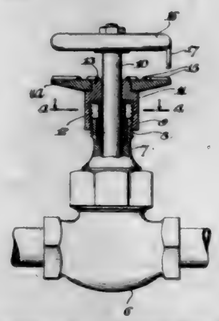


1,567,305. TELEPHONE SYSTEM. EDWIN H. SMYTHE, Evanston, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 24, 1923. Serial No. 682,368. 8 Claims. (Cl. 179—18.)



1. In a telephone system, a selector switch, a register-marker individual to said switch for determining one factor in the extent of the primary movement of said switch, and means variable at will for determining another factor in the extent of the primary movement of said switch.

1,567,306. REGULATING VALVE. JOHN F. STRAITS, Philadelphia, Pa., assignor to National Airoil Burner Company, Philadelphia, Pa., a Corporation of Delaware. Filed July 9, 1923. Serial No. 650,221. 1 Claim. (Cl. 116—125.)

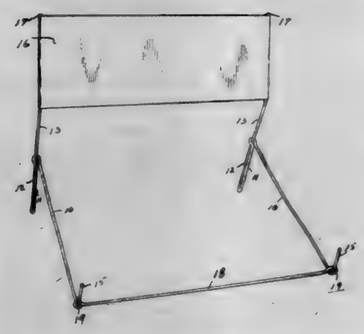


In a regulating valve, the combination of a valve body, a valve, a valve spindle, a spindle operating hand wheel, a hand operated rotatably adjustable graduated disc sur-

rounding the spindle and in friction relationship with the valve body, the hand wheel provided with direction arrows and suitable legends associated therewith, and a pointer connected with the wheel for cooperating with the disc graduations.

---

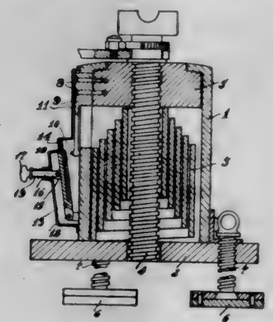
1,567,307. FOLDING DISPLAY FRAME. CHARLES W. TAUSSIG, New York, N. Y., assignor to Jersey Biscuit Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 26, 1923. Serial No. 664,888. 4 Claims. (Cl. 211—24.)



1. A folding display frame comprising a pair of end wires, each having an upright and a base portion extending approximately at right-angles to each other with an upturned portion at the end of the base portion, all of said portions lying in substantially a single plane, an upper cross member detachably connected to each of said upright portions at points relatively widely spaced, and a lower cross member detachably connected to the base portions, said end wires having no connection with each other other than said detachable cross members.

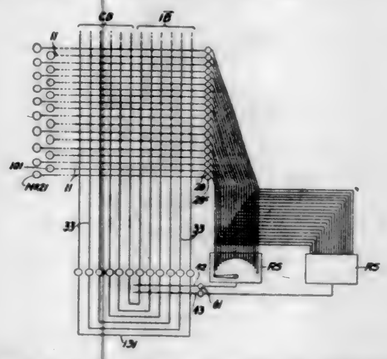
---

1,567,308. WEIGHING JACK FOR DETERMINING THE WHEEL PRESSURE OF VEHICLES. ABRAHAM VAN L. VAN DEN HEUVELL, Zwolle, Netherlands. Filed Nov. 17, 1922. Serial No. 601,640. 3 Claims. (Cl. 263—8.)



1. A weighing jack for determining the wheel pressure of vehicles, comprising, a movable head, a spring for supporting and for controlling movement of the head, a marking device movable with the head, a card holding device associated with the marking device, and means for causing the marking device to mark a card in the card holding device, the mark on the card indicating the wheel pressure of a vehicle supported by the movable head.

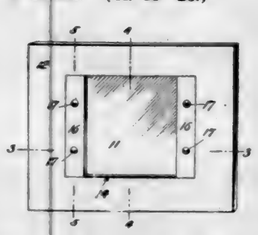
1,567,309. AUTOMATIC TELEPHONE SYSTEM. LEE R. WALLER, Westmount, Canada, assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 17, 1923. Serial No. 669,102. 16 Claims. (Cl. 179—18.)



1. In an automatic telephone system, the combination of line bars, a first and second group of trunk bars associated with said line bars, subscribers' line circuits normally connected to said line bars, impulse senders in said line circuits, preselecting means for selectively associating one of said line bars with one of said first group trunk bars, and rotary switches operable under control of said senders for selectively connecting one of said second group trunk bars to another of said line bars for establishing telephone connections therebetween.

---

1,567,310. LANTERN SLIDE. FRANK A. WEEKS, Plainfield, N. J. Filed Apr. 6, 1921. Serial No. 459,075. 2 Claims. (Cl. 88—26.)



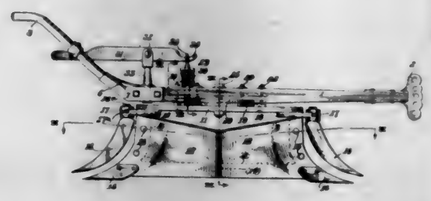
1. A lantern slide of the character hereinbefore described, comprising a thin flexible transparent picture-carrying film and a hard stiff non-frangible open frame holding and protecting said film, said frame having at its film-opening an inset seat for the film and said film having spaced apart initially formed openings in pairs in its opposite edges over said seat, cleats pressing the apertured end portions of the film against said seat and being flush with the adjacent outer surface of said frame and fasteners extending through said cleats and said openings and entering the body of the frame and securing said cleats and film rigidly in position, said fasteners in their portions which enter said openings being substantially less in diameter than the openings.

---

1,567,311. REVERSIBLE PLOW. STANISLAW WIELOUS, Sun, W. Va. Filed Oct. 7, 1922. Serial No. 592,996. 1 Claim. (Cl. 97—30.)

In a plow of the class described, a longitudinally extending upper rail bar having laterally extending ends terminating in downwardly bent portions forming standards, the lower ends of said standards being connected

by a longitudinally extending base rod forming a landside bar, a pair of oppositely directed plows each carried by a respective standard, a brace rod extending between the base rod and plows, a plow beam extending longitudinally over the top rail, a turntable ring fixed to the underside of the plow beam, a second turntable ring fixed to the top of the top rail and cooperating with the first ring, said rings having cooperating lock-



ing pin holes, a locking pin movable vertically through the plow beam and engageable with the ring openings, a collar on said pin above the beam and forming a stop to limit downward movement of the pin, an inverted U-shaped yoke carried by the plow beam and having a guide opening in its top for said pin, a spring surrounding the pin between the top of the yoke and the collar, and means to raise the pin against the tension of said spring.

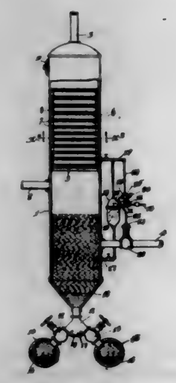
---

1,567,312. MANUFACTURE OF FORMAMIDE. RUDOLF WIETZEL, Ludwigshafen-on-the-Rhine, Germany, assignor to Badische Anilin- & Soda-Fabrik, Ludwigshafen-on-the-Rhine, Germany, a Corporation of Germany. Filed May 20, 1925. Serial No. 31,703. 6 Claims. (Cl. 260—124.)

1. The process of manufacturing formamide which consists in acting on alkyl formate with ammonia at a pressure exceeding atmospheric pressure.

---

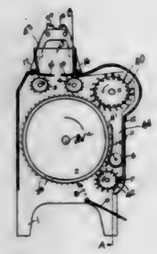
1,567,313. SEPARATOR FOR GAS, OIL, WATER, AND SAND. GEORGE A. WILSON, Huntington Beach, and ROBERT W. EDENS, Los Angeles, Calif. Filed Sept. 6, 1921. Serial No. 498,797. 4 Claims. (Cl. 183—2.7.)



1. In a device of the character described, a tank having a gas outlet communicating with its upper portion, an oil outlet communicating with its lower portion, and located at a level to withdraw only oil, and intermediate inlet for the oil, gas, and water, a plurality of sediment receptacles each communicating with the lower end of the tank, and valve means controlling communication between each receptacle and the tank.

---

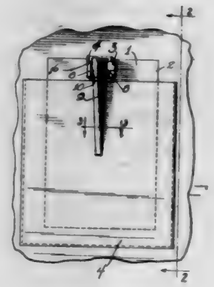
1,567,314. HULLER AND CLEANER FEEDER FOR COTTON GINS. CHARLES ROBERT WOOD, Memphis, Tenn. Filed Sept. 1, 1921. Serial No. 497,792. 8 Claims. (Cl. 19—35.)



1. A cotton cleaner comprising a casing, a drum journalled therein for rotation, feed rollers journalled above the drum, means for rotating the feed rollers intermittently and simultaneously, valves movably mounted above the rollers, and means for manually moving the valves simultaneously to vary and control the size of the delivery opening therebetween.

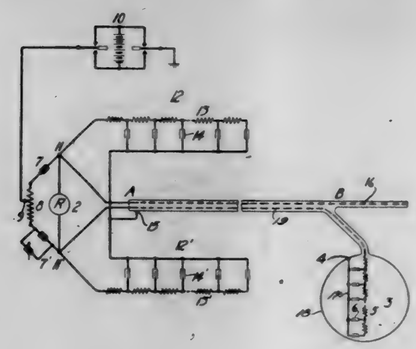
---

1,567,315. NOTE BOOK CLIP. ANTHONY ZAREMBA, Chicago, Ill. Filed Aug. 1, 1925. Serial No. 47,601. 1 Claim. (Cl. 24—3.)



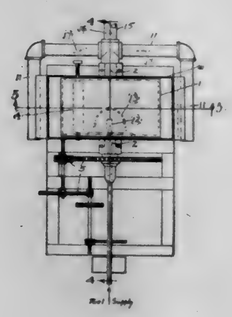
The combination with a note book having a cover, of a spring actuated gripping member, a body member associated with the gripping finger having an overlapped portion arranged for engaging with the horizontal edge of the note book when the gripping finger is in a vertical position, and having a further folded portion arranged for engagement with the vertical edge of the note book when the gripping finger is in a vertical position.

1,567,316. MEANS FOR REDUCING INTERFERENCE. OLIVER E. BUCKLEY, Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed May 2, 1921. Serial No. 466,129. 14 Claims. (Cl. 128—63.)



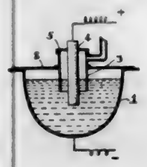
1. A duplex signaling system comprising a pair of conducting signaling paths, a receiver bridged across said paths, and a separate artificial line simulating distributed capacity and resistance connected to each side of the receiver in parallel with each path.

1,567,317. METHOD OF MAKING ANHYDROUS MAGNESIUM CHLORIDES. PAUL COTTRINGER and WILLIAM R. COLLINGS, Midland, Mich, assignors to The Dow Chemical Company, Midland, Mich., a Corporation of Michigan. Filed Apr. 1, 1921. Serial No. 457,611. 4 Claims. (Cl. 23—91.)



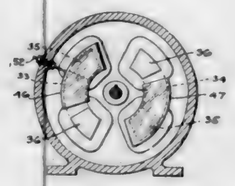
1. In a method of treating liquefiable chemical compounds, the steps which consist in bringing successive portions of the exterior cylindrical surface of an interiorly heated rotary drum into contact with a liquid body of such a compound, whereby a film of the latter is caused to adhere to such surface, simultaneously passing currents of gases of combustion having different degrees of heating intensity over the portions of such film lying on opposite sides of a vertical plane passing through the axis of such drum, and then removing such film.

1,567,318. METHOD OF MAKING METALLIC MAGNESIUM. PAUL COTTRINGER and SHELDON B. HEATH, Midland, Mich., assignors to The Dow Chemical Company, Midland, Mich., a Corporation of Michigan. Filed May 21, 1923. Serial No. 640,344. 19 Claims. (Cl. 204—19.)



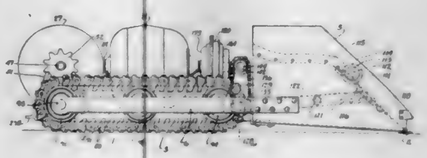
1. In the production of metallic magnesium, the steps which consist in electrolyzing a molten bath including magnesium chloride, and introducing more magnesium chloride into such bath adjacent the anode.

1,567,319. INDUCTION MOTOR. KENNETH DAVIS, St. Benedict, Pa., assignor to Rembrandt Peale, New York, N. Y. Filed Nov. 22, 1920. Serial No. 425,841. 12 Claims. (Cl. 172—278.)



1. An induction motor including in combination an inducing member with definite poles, a rotor having induced current carrying circuits, and a metal plate interposed in the gap between a pole piece and the rotor and covering the entire pole piece.

1,567,320. MACHINE FOR HANDLING AND TRANSPORTING LOOSE MATERIALS. KENNETH DAVIS, St. Benedict, Pa., assignor to Rembrandt Peale, St. Benedict, Pa. Filed July 13, 1922. Serial No. 574,613. 36 Claims. (Cl. 214—131.)

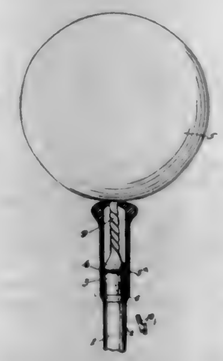


1. A material handling machine for use in thin coal seams including in combination a machine body, a traction tread at either side thereof, driving means engaging the treads, a shovel extending forwardly from the front of the body, a motor on the bed on substantially the same level with the shovel, a speed reduction and direction reversing gearing connected to the motor shaft and to the driving means for the treads, and means for discharging the load of material from the shovel.

1,567,321. THERMOMETER. ANDREW V. GROUPE, Philadelphia, Pa. Filed Dec. 13, 1923. Serial No. 680,378. 5 Claims. (Cl. 73—52.)

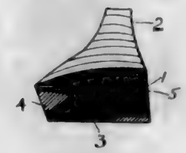
1. In a thermometer, a body portion formed of a single piece of pressed sheet metal and having a vertically extending panel and a base flange extending forwardly from the lower end thereof and having an opening therein and being provided with a downwardly directed tubular connecting member extending fixedly therefrom, the panel having a front surface in a vertical plane rearward of the axis of the tubular connecting member and in front of the rear portion of the inner surface of the wall of the member, a mercury tube in parallel contact with said surface and extending through said opening and through the central portion of the tubular connecting member, and means to connect the mercury tube to the panel.

1,567,322. CANE. PAUL JONES, Cincinnati, Ohio. Filed July 24, 1924. Serial No. 727,872. 2 Claims. (Cl. 135—47.)



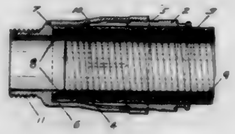
1. An article of manufacture comprising a cane or stick, having a shaft with a channeled end, adapted to receive the beaded mouth ring of an inflated balloon, a head in tubular form, adapted to fit over the shaft to conceal the channeled end thereof, said head projecting above the said shaft end to form a chamber for the deflated balloon, and having a mouth of less dimension than the chamber forming a narrow mouth to frictionally engage the walls of the inflated balloon and preventing the untwisting thereof, after inflation and imparting of an air retaining twist to the neck of the said balloon, and passageway means within the shaft communicating with the end thereof, for the purpose described.

1,567,323. GOLF CLUB. HARRY I. JORDAN, Auburn, Me., assignor to Lamino Manufacturing Company, a Corporation of Massachusetts. Filed Oct. 19, 1921. Serial No. 508,707. Renewed Mar. 14, 1925. 2 Claims. (Cl. 273—77.)



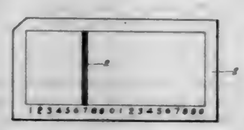
1. A golf club head having its playing face on one side, composed of wood veneer strips cemented and pressed together, a portion of said strips having their edges terminate in the said playing face of the club and having the grain of the wood also terminate in the said playing face.

1,567,324. HOSE COUPLING. ALBERT E. JURS, Oakland, Calif., assignor to The Threaded Products Company, a Copartnership consisting of Albert E. Jurs and Reginald C. Shand, both of Oakland, Calif. Filed July 24, 1923. Serial No. 653,492. 5 Claims. (Cl. 285—86.)



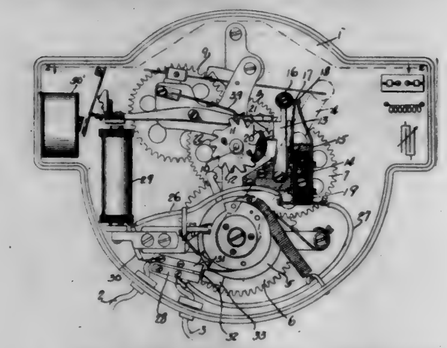
1. A coupling for attachment to a hose comprising a sleeve having spring fingers thereon engaging said hose, whereby a pressure is maintained thereon, and a clamp member having a groove at one end adapted to receive the end of said hose and at the other end to engage said sleeve and having a tapered bore intermediate said ends engaging said spring fingers, whereby a movement of said clamp member to assemble said coupling, forces the spring fingers into the hose and forces the end of the hose into the groove.

1,567,325. RECORD FOR ACCOUNTING SYSTEMS. WILLIAM W. LASKER, Jr., Brooklyn, N. Y. Filed Oct. 1, 1921. Serial No. 504,817. 7 Claims. (Cl. 283—19.)



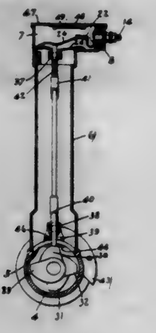
1. A document adapted to be sorted and tabulated in accordance with a record formed by electrical conducting and insulating portions disposed on the surface of same.

1,567,326. FIRE-ALARM-SIGNAL-TRANSMITTING APPARATUS. ALEXANDER PALMER LOPER, Stonington, Conn. Filed Dec. 14, 1921. Serial No. 522,302. 2 Claims. (Cl. 177—361.)



1. A signal transmitting apparatus, which comprises means for transmitting signals over a metallic circuit, means for transmitting wireless signals of a definite characteristic, means actuated by the movement of the first means for actuating the second means, means for locking the first means when the metallic line is being used by another signal apparatus, and means associated with said locking means and moved thereby to vary the characteristic of the wireless signals when the transmission of signals over the metallic line is being arrested.

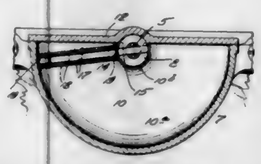
1,567,327. TIMER. VIRGIL H. MATHES, Indianapolis, Ind. Filed Jan. 16, 1922. Serial No. 529,705. 6 Claims. (Cl. 200—27.)



2. In a timer, the combination with a cam having a plurality of cam faces, of a plurality of circuit forming contacts, a plurality of longitudinally movable plungers operable by said cam for intermittently forming circuits through said contacts, and means for shifting the position of the lower ends of said plungers for advancing or retarding contact with the cam faces.

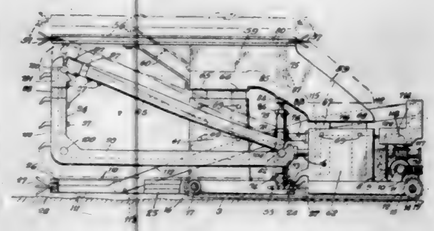
1,567,328. MOTOR FOR WINDSHIELD CLEANERS. JOHN R. OISHEI, Buffalo, N. Y. Filed Apr. 8, 1922. Serial No. 550,588. 11 Claims. (Cl. 121—97.)

1. In a fluid pressure motor adapted for operating windshield cleaners and the like, the combination of a pressure chamber having inner and outer concentric, segmental-circular walls of different radii, a vane arranged to oscillate in said chamber about the axis of said walls and having its inner and outer ends conforming in shape to and slidably contacting with said walls, said vane including spaced substantially parallel plates and packing members having flexible edge portions extending inwardly beyond said plates and towards each other, the edges of one packing member engaging the edges of the opposite packing member in line with the space between said plates, and means for causing said vane to oscillate in said chamber.



10. In a fluid pressure motor having a pressure oscillable in an arc of a circle, a segmental-circular pressure chamber therefor, a rock shaft on which said vane is mounted, and a pair of valves and fluid pressure connections for causing a preponderance of fluid pressure in the piston chamber alternately on the faces of the vane for causing oscillations of the vane, the combination of a pivoted rocker for shifting said valves, said rocker having an actuating arm, a spring connected at one end to said rocker actuating arm and extending across the pivot of said rocker, the other end of said spring being adapted to be moved first to one side and then to the other side of the pivot of said rocker, and means fixed on a portion of said rock shaft for shifting said other end of the spring to one side or the other of the pivotal axis of said rocker.

1,567,329. COAL-MINING MACHINE. RICHARD PEALE, St. Benedict, Pa., assignor to Rembrandt Peale, St. Benedict, Pa. Filed July 29, 1918. Serial No. 247,212. 57 Claims. (Cl. 262—5.)

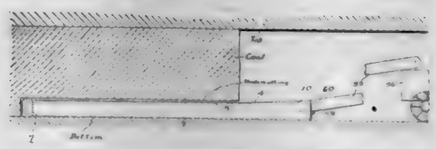


1. A coal mining machine including in combination a horizontal top chain kerf cutter, a horizontal bottom chain kerf cutter, vertical chain kerf cutters at either side, a platform extending rearwardly of the cutter chain frames, a motor mounted on said platform, a caterpillar tread for traveling the machine, located at the rear of the machine beneath the platform and of less width than the cutters, and driving connections from the motor to said cutters and to said tread.

1,567,330. COAL CONVEYER AND CONVEYING SYSTEM. RICHARD PEALE, St. Benedict, Pa., assignor to Rembrandt Peale, St. Benedict, Pa. Filed Jan. 13, 1919. Serial No. 270,909. 49 Claims. (Cl. 198—92.)

1. A coal conveying mechanism adapted to be placed in an undercut kerf to receive the undercut coal when dislodged, including in combination, a plurality of very thin and flat cooperating conveyer units lying horizontally on the mine floor and adapted to be slid into the undercutting and having conveying devices arranged

substantially on the same level and one of said conveying devices discharging the dislodged coal to another of said conveying devices.

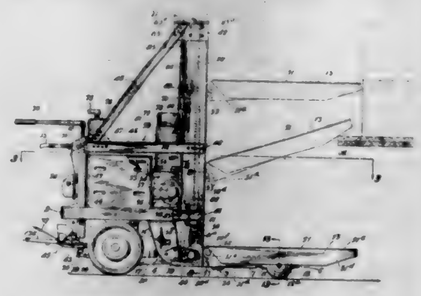


4. A coal conveying mechanism adapted to be placed in an undercut kerf to receive the undercut coal when dislodged, including in combination, a plurality of very thin and flat cooperating conveyer units lying horizontally on the mine floor and adapted to be slid into the undercutting and having continuously forwardly traveling conveying devices arranged substantially on the same level, said conveying device of one unit moving in a transverse direction with respect to the conveying device of another unit and discharging the dislodged coal to said conveying device of said other unit.

32. A conveyer mechanism including in combination a plurality of connected flat conveyer units each having an upper reach directly above its corresponding lower reach, adapted to move together into an undercut kerf in a mine, a motor driving selectively one or more of the conveyers, and means operated by the motor and mounted on one or more of said units for moving the conveyer mechanism into the undercutting.

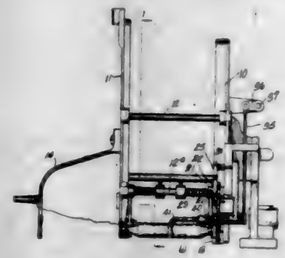
33. A conveyer unit consisting of a plurality of separable side by side frames, each with an endless conveyer, the upper reach of which is directly above its corresponding lower reach, the several conveyers running in abutting contiguity, and connections for driving the several conveyers together.

1,567,331. INDUSTRIAL TRUCK. EDWARD H. REMDE, Cleveland, Ohio, assignor to The Baker R. & L. Company, Cleveland, Ohio, a Corporation of Ohio. Filed Apr. 14, 1922. Serial No. 552,780. 13 Claims. (Cl. 187—11.)



5. In apparatus of the class described, the combination of a truck frame comprising a main section and a drop section disposed in a plane below said main section, wheels for supporting said frame, means for driving certain of said wheels, a pair of vertical guides disposed adjacent the inner ends of said main and drop sections, an elevating member normally disposed on said drop section and provided at its inner end with shoes engaging said guides, and means for raising and lowering said member, said means comprising a motor and a drum driven thereby and flexible elements connected to said member between said guides and suspended and operating from a point on the latter vertically above their connection with said member.

1,567,332. WEFT-CARRIER SUPPORT AND RELEASING DEVICE. EPPA H. RYON, Waltham, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Feb. 2, 1923. Serial No. 616,465. 6 Claims. (Cl. 139—251.)



1. In a weft replenishing loom, a weft carrier magazine and means to support a weft carrier in transfer position therein and to release said weft carrier from such position, said supporting means comprising devices engaging said weft carrier at separated points on the rear side thereof removed from the tip portion, and means additional to the weft carrier to move said devices positively and simultaneously rearward from supporting position.

1,567,333. PROCESS FOR PRODUCING REPRODUCTION MEANS FOR BOOK PRINTING AND THE LIKE. DAVID SCHARSCHAWSKY, Bern, Switzerland, assignor to the Firm: Polygraphische Gesellschaft, Laupen-Bern, Switzerland. Filed Oct. 29, 1923. Serial No. 671,477. 36 Claims. (Cl. 41—41.5.)

1. In a process for producing a reproducing means, the steps of placing a developed silver colloid layer onto a platen, and thereupon treating said layer with a tanning agent.

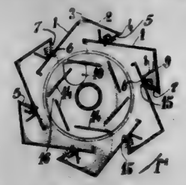
1,567,334. MOWING MACHINE. HEINRICH SCHIEFERSTEIN, Berlin-Charlottenburg, Germany. Filed Mar. 1, 1923. Serial No. 622,161. 12 Claims. (Cl. 74—48.)

5. In a mowing machine, a relatively stationary member, a spring secured to said member, a reciprocable mower knife connected with said spring, a crank, and a resilient driving connection between the crank and spring.

1,567,335. ROTARY DRYING APPARATUS. PAUL SCRIVE, Paris, France. Filed Jan. 12, 1924. Serial No. 685,855. 3 Claims. (Cl. 34—6.)

1. In a rotary drying apparatus having an inclined axis for pulverulent materials, a drum constituted by the assemblage of several longitudinal buckles, the concavi-

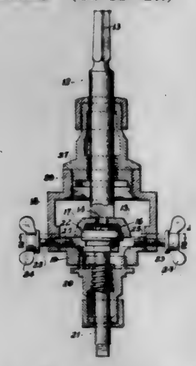
ties of which are turned inwardly, the said buckets being arranged in a geometrically similar manner relatively to the axis of the drum, and providing between them



equal intervals, longitudinal plates obturating the said intervals, these plates being perforated on a portion of their width.

---

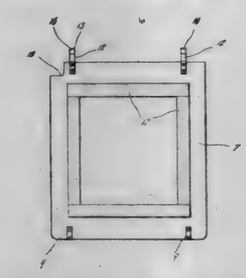
1,567,336. VALVE-RESEATING TOOL. IRA CLAYTON SHAW, Indiana, Pa., assignor of one-half to Lynn M. Kelly, Indiana, Pa. Filed June 11, 1924. Serial No. 719,400. 5 Claims. (Cl. 51—27.)



1. In a tool of the character described, the combination of a cage having internally threaded means at its lower end for receiving the threaded end of a valve hood with the valve disposed within the cage, means extending through the sides of the cage for clamping the valve head against rotation, a tool stem having a valve grinding head at its lower end, and means at the upper end of the cage for rotatably supporting and grinding the stem with the grinding head in contact with the valve.

---

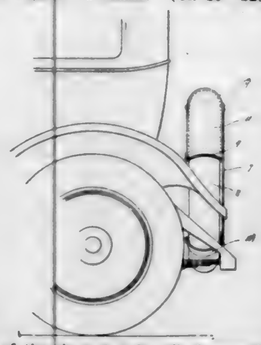
1,567,337. AUTOMOBILE DOOR SIGN. PAUL SIEVER, Minneapolis, Minn. Filed May 14, 1925. Serial No. 30,321. 1 Claim. (Cl. 40—125.)



A device of the character described comprising a sign panel to be applied to the door of an automobile, hooks connected to the lower edge portion of the panel to engage upwardly with the lower end of the automobile door, and resilient hooks connected to the upper edge portion of the panel and adapted to be sprung upwardly so as to pass over a cross member of the door and then engage behind said member for holding the panel in place against the door.

---

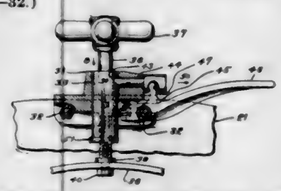
1,567,338. SPARE-TIRE SIGN AND PROTECTOR. PAUL SIEVER, Minneapolis, Minn. Filed May 14, 1925. Serial No. 30,322. 1 Claim. (Cl. 40—129.)



A device of the character described comprising a panel to be disposed across a spare tire, upper and lower curved leaf springs connected to the panel to engage across the tread of the tire at the upper and lower portions of the tire and holding the panel in place against the tire, and a transversely and longitudinally convexed tire cover mounted on and carried by the upper leaf springs to be applied over the upper portion of the tire when the panel is applied to the tire.

---

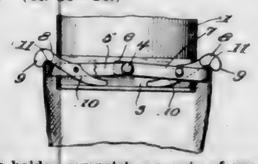
1,567,339. WRINGER. GEORGE SLIDER, Baltimore, Md. Filed Nov. 12, 1921. Serial No. 514,515. 1 Claim. (Cl. 68—32.)



In a wringer, the combination with rolls having pintles and bearing blocks for said pintles, of a hollow frame for supporting said bearing blocks, a nut guide secured to said frame, a nut slidably mounted in said guide, a spring for producing pressure of one roll upon the other, a screw threaded in said nut for varying said pressure and a pin slidably mounted in said guide and entering a hole in said nut for locking said nut in fixed relation to said guide.

---

1,567,340. SACK HOLDER. JOHN W. STARK, Kensington, Minn. Filed July 27, 1925. Serial No. 46,413. 3 Claims. (Cl. 83—26.)



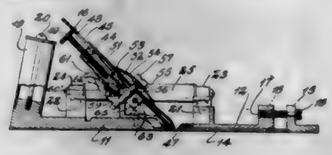
1. A sack holder comprising a pair of supporting members, a pair of sack engaging members pivoted to each supporting member and extending in opposite directions and a holding dog pivoted to each sack engaging member intermediate the ends of such member.

1,567,341. HOLE-CUTTING TOOL. MARTIN J. SWANSON, Bradford, Pa., assignor to Fred W. Wagner, Bradford, Pa. Filed Mar. 24, 1924. Serial No. 701,494. 2 Claims. (Cl. 145—31.)

2. A hole boring tool comprising a nonflexible elongated shank having a uniform taper from one end to the other, a handle at the large end of the shank, said shank having a flat bottom side constituting the active face thereof, the side walls of the shank converging toward the top and said top being rounded, obliquely arranged transverse cutting teeth formed in the flat bottom side of the shank, said teeth having their perpendicular walls undercut, the side walls flaring out toward the flat bottom side causing the points of the teeth to project at each side, and a V-shaped point formed at the small end of the shank and having an inclined flat side provided with cutting edges to initially penetrate the wood, said point being bent inwardly toward the side having the teeth and having the back beveled to the point.

---

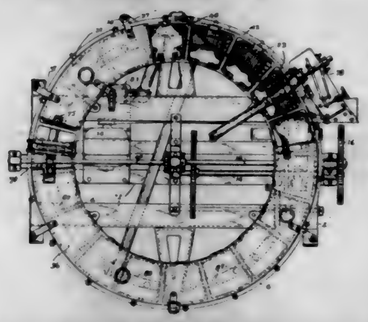
1,567,342. PLANE. JOHN SZAKO, New York, N. Y. Filed Apr. 4, 1924. Serial No. 704,160. 6 Claims. (Cl. 145—11.)



5. A bench plane bit clamping means comprising a bed, a blade, a spring plate having a central screw-threaded aperture, a locking bolt having a threaded portion engaging said threaded aperture, said bolt extending through said blade and bed and having a slot in its lower end, a pawl pivoted to the under side of said bed, and a finger carried by said pawl adapted to engage the slot in said bolt for locking the parts in their adjusted positions.

---

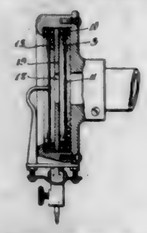
1,567,343. BAKING MACHINE. CARL R. TAYLOR, Cleveland, Ohio. Filed Mar. 29, 1922. Serial No. 547,886. 21 Claims. (Cl. 107—58.)



18. In a machine of the class described, a rotary table, a plurality of baking units mounted on said table between radial webs, a heating element disposed beneath said units, said units comprising a middle plate having a chamber therethrough and upper and lower leaves cooperating with said middle plate and forming therewith cake receiving compartments, said middle plate having an overhanging projection at one side thereof to direct gases through said chamber and having an overhanging projection on the other side thereof, said projections substantially filling the space between the adjacent radial webs to prevent escape of hot gases except through said chamber.

---

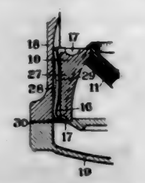
1,567,344. SOUND REPRODUCER. GEORGE C. TICHENOR, Los Angeles, Calif. Filed July 31, 1922. Serial No. 578,599. 1 Claim. (Cl. 274—27.)



In a sound producing device, the combination of a container, a diaphragm rigidly mounted therein, a stiff sound restricting member rigidly mounted adjacent thereto and having a single central aperture through which the vibrations of the producing diaphragm are emitted, and a clarifying diaphragm having a single aperture alined with and of equal diameter to the first of said apertures, and adapted to absorb vibrations of the sound producing diaphragm.

---

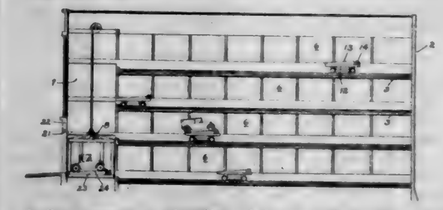
1,567,345. METER. JAMES A. TILDEN, Boston, Mass. Filed June 8, 1923. Serial No. 644,270. 5 Claims. (Cl. 73—98.)



2. A meter comprising an outer casing provided with inlet and outlet-ports, an inner chamber having a port to register with one of those in the casing, and a member situated between the casing and chamber and arranged both to force the ports of the inner and outer casings into co-operation and to lock and positively retain the casings against relative rotation.

---

1,567,346. GARAGE. MURRAY C. TUNISON and SAMUEL J. NUNN, Los Angeles, Calif., assignors to Nunn & Tunison, a Firm composed of said Tunison and Nunn. Filed July 26, 1923. Serial No. 653,874. 7 Claims. (Cl. 214—16.)

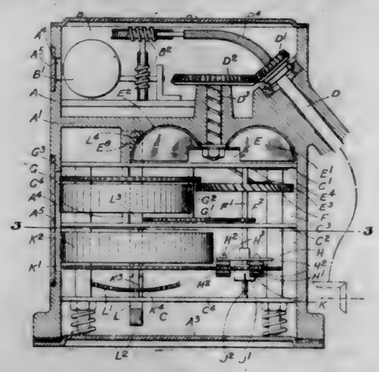


1. In a garage, a plurality of floors each having a row of stalls at different sides of a passage, an elevator communicating with said passage, trucks associated with

the respective floors and movable horizontally from one end of said passage, revoluble platforms mounted on the elevator and trucks, and power operated means exclusive of the automobile for drawing an automobile on one of said platforms.

---

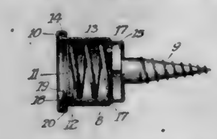
1,567,347. GRADOMETER. ROBERT AERNOUT BARON VAN LYNDEN, London, England. Filed Nov. 22, 1923. Serial No. 676,422. 11 Claims. (Cl. 33—220.)



1. In a gradient meter mounted on a moving body, the combination of a gravity-actuated gradient indicator, a member adapted to be rotated at a speed proportional to that of the moving body, and means for causing the rotation of said member to give corrections for errors due to the inertia of the gravity-actuated indicator.

---

1,567,348. SOCKET FOR CURTAIN FASTENERS. JOHN VODICKA, Chicago, Ill., assignor, by mesne assignments, to Cinch Manufacturing Corporation, Chicago, Ill., a Corporation of Illinois. Filed Jan. 16, 1924. Serial No. 686,586. 2 Claims. (Cl. 24—211.)



1. A socket for curtain fasteners of the class described comprising a cup having an outer flange at its mouth angular in outline, an annular member of similar angular periphery fitting over and embracing the flange and having an inwardly projecting lip, the cup being formed adjacent its bottom with a portion angular in transverse section, a screw, the shank of which projects axially through the bottom of the cup, the head of the screw being angular in outline to fit closely within the angular bottom portion of the cup, a plate closing against the lip of said angular member and a spring interposed between the plate and the bottom of the cup.

---

1,567,349. WATER COCK. HEINRICH WEBER, Feuerbach-Stuttgart, Germany. Filed May 5, 1925. Serial No. 28,128. 8 Claims. (Cl. 277—27.)

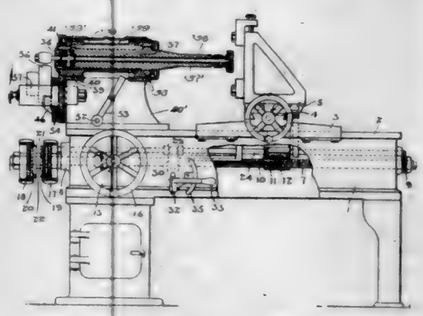
2. A water cock comprising a discharge branch pipe; a cut-off member in said pipe, said member comprising a plurality of passages for the water, an interrupted flange at the lower-end, and a packing disc at the upper end; and a discharge nozzle adapted for connection to the branch pipe and adapted to actuate said member by means of said flange.

8. A water-cock comprising a cut-off valve, a cut-off member having a hollow interior and disposed in axial alignment with the cut-off valve and in the bore of a water-discharge pipe common to both the said valve

and cut-off member, a partition disposed at the upper end of the cutoff member and having through-way passages communicating with the interior of the cut-off member and means to effect axial displacement of the cut-off member in order to displace the cut-off valve.

---

1,567,350. CYLINDER-GRINDING MACHINE. ROY HARRISON WEBBER, Toronto, Ontario, Canada. Filed Jan. 23, 1922. Serial No. 531,192. 5 Claims. (Cl. 51—90.)



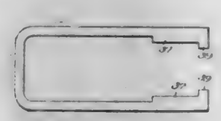
1. A grinding machine, comprising, a bed, a carriage movable longitudinally on said bed, a sleeve rotatable in the head end of the machine, a grinder spindle eccentrically mounted in said sleeve, a spur gear mounted on said sleeve, a spur gear ring meshing with said spur gear, an expansible sheave arranged within said spur gear ring and adapted to grip said ring, means for rotating said sheave, and means for moving said carriage longitudinally.

---

1,567,351. METHOD OF FORMING PULL-ROD JAWS. LOREN L. WHITNEY, Hammond, Ind., assignor to American Steel Foundries, Chicago, Ill., a Corporation of New Jersey. Filed July 5, 1924. Serial No. 724,241. 3 Claims. (Cl. 29—164.)

1. The method of forming jaws or the like which comprises reducing the depth of one end of each of a pair of strips of metal offsetting the strips at the opposite end, heating the offset ends, placing the offset ends together, the reduced portions being spaced apart, welding the offset ends together and reducing same to form a relatively large intermediate pivot portion.

1,567,352. METHOD OF FORMING DRAWBAR YOKES. LOREN L. WHITNEY, Hammond, Ind., assignor to American Steel Foundries, Chicago, Ill., a Corporation of New Jersey. Filed July 14, 1924. Serial No. 725,764. 1 Claim. (Cl. 29—167.)



The method of forming draw bar yokes or the like which comprises heating an end of a blank, placing said end in a die recess of given depth and upsetting said end to thicken it, then placing said end in another die recess of greater depth and upsetting said end to increase the thickness, then placing said end in another recess having an offset portion and upsetting said end to form a lip thereon, similarly treating the other end of the blank, and bending the blank into U-shape.

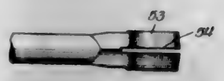
---

1,567,353. METHOD OF FORMING BRAKE LEVERS. LOREN L. WHITNEY, Hammond, Ind., assignor to American Steel Foundries, Chicago, Ill., a Corporation of New Jersey. Filed July 14, 1924. Serial No. 725,766. 2 Claims. (Cl. 29—164.)

1. The method of forming a brake lever or the like, which comprises hammering a blank to form the body and connecting portions of the lever, forging one end to form trunnions thereon, and sawing from the trunnions excess metal from the forging operation.

---

1,567,354. METHOD OF FORGING DOUBLE JAWS. LOREN L. WHITNEY, Hammond, Ind., assignor to American Steel Foundries, Chicago, Ill., a Corporation of New Jersey. Filed July 14, 1924. Serial No. 725,768. 5 Claims. (Cl. 29—164.)

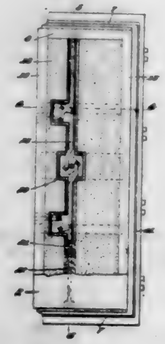


1. The method of forming double jaws or the like, which comprises forming jaws on one end of a blank, and supporting said jaws by a mandrel and die recesses while forming jaws upon the opposite end of the blank whereby deformation of the first formed jaws is prevented.

---

1,567,355. SAFE-DOOR STRUCTURE. CLIFFORD G. CARLSON, Jamestown, N. Y., assignor to Art Metal Construction Company, Jamestown, N. Y., a Corporation of Massachusetts. Filed Sept. 9, 1920. Serial No. 409,205. 2 Claims. (Cl. 109—2.)

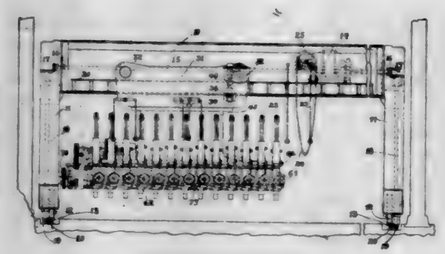
1. A safe door comprising an outer plate having its edge portions bent laterally form the same side, molding strips attached to the bent edge portions of the plate, nailing strips secured to the molding strips, insulating material occupying the space defined by the molding, strips and the nailing strips, and insulating material having a depression formed therein for reception of the bolt or lock mechanism, supporting means embedded in



the insulating material and having connection with the nailing strips and an inner plate attached to the nailing strips.

---

1,567,356. MULTIPLE DRILL. LYNDON C. COLE, OTTO PABST, and CARL MAY, Hamilton, Ohio, assignors to Niles-Bement-Pond Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 26, 1922. Serial No. 609,112. 8 Claims. (Cl. 77—22.)



1. In a machine of the class described, the combination of an elongated support, a carriage supported thereon for movement therealong, a member supported by and extending below the carriage, a guide-rail on said member, a plurality of drill spindles supported for individual adjustment on said guide-rail, means for securing the spindles in adjusted position, and power operated means for moving the carriage on its support and for swiveling the said member about a vertical axis.

---

1,567,357. CABINET FIXTURE. EARL W. CUMMINGS, Santa Barbara, Calif., assignor of one-half to Santa Barbara Lumber Company, Santa Barbara, Calif., a Corporation of California. Filed Oct. 7, 1924. Serial No. 742,149. 3 Claims. (Cl. 45—51.)

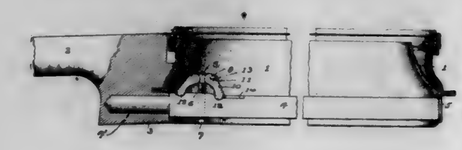
2. A fixture comprising a wall frame cabinet a service board pivotally mounted at one end therein for swinging downwardly from a collapsed vertical position to an extended horizontal position, an arm on said service

board within the cabinet, an outwardly movable back for the board linked to the cabinet, and a strut for the

board pivoted to the cabinet, both the said back and strut being pivotally connected to said arm for actuation thereby upon extending the board.

---

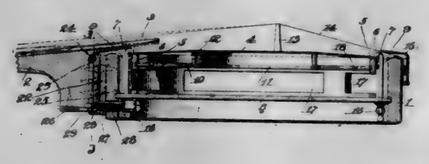
1,567,358. **NECK ATTACHMENT FOR BANJOS AND THE LIKE.** ROBERT C. DANLY, Chicago, Ill., assignor to Ludwig & Ludwig, Inc., Chicago, Ill., a Corporation of Illinois. Filed Dec. 24, 1924. Serial No. 757,817. 5 Claims. (Cl. 84—293.)



5. In a banjo or like musical instrument, the combination of a body member, a neck member for the same formed for contact with the side of the body member and having a fixed brace bar extending across the body member, an operating screw shaft journalled in said bar, a wing nut having screw thread engagement with said shaft, and a pair of complementary toggle links pivotally connected to the wings of said nut with the free end of one link having abutment against the body member and the free end of the other link having abutment on the brace bar aforesaid, each of said links having lateral flanges at its ends for guiding engagement with the brace bar, and for pivotal connection with the wing nut aforesaid.

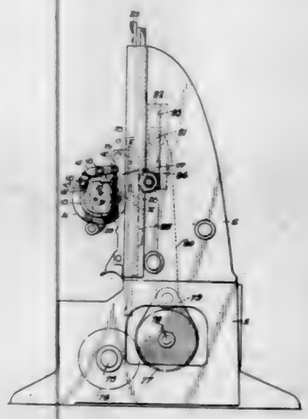
---

1,567,359. **NECK FOR BANJOS AND THE LIKE MUSICAL INSTRUMENTS.** WILLIAM H. DE WICK, Brooklyn, N. Y. Filed Sept. 19, 1922. Serial No. 589,058. 6 Claims. (Cl. 84—293.)



2. A musical instrument of the character described, comprising a body, a member secured to the outside of the body, a plate pivoted to the member, a neck rigidly secured to the plate, means for pivoting the plate relatively to the member, said means acting to lock the member against movement.

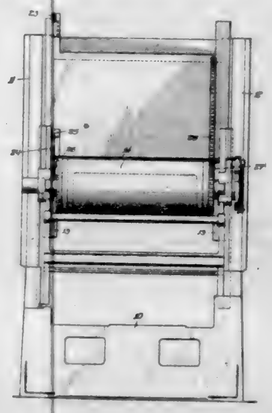
1,567,360. **CYLINDER-CONTROL MECHANISM.** EDWARD F. DUDLEY, Oak Park, and BURT D. STEVENS, Evanston, Ill., assignors to Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 25, 1922. Serial No. 546,566. 16 Claims. (Cl. 101—285.)



1. In a printing press, the combination of a cylinder, means for rotating same, means for connecting said cylinder and its rotary driving means, and means for holding said cylinder against rotation and disconnecting said cylinder from its rotary driving means, said connecting means and holding means being operable on each other to make same effective and ineffective.

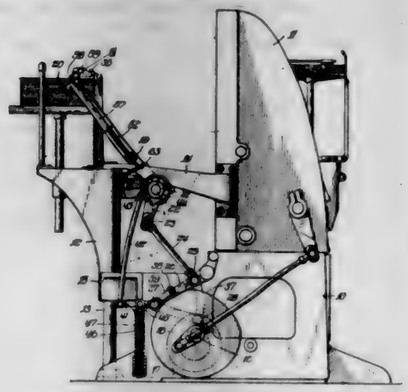
---

1,567,361. **CYLINDER-CONTROL MECHANISM.** EDWARD F. DUDLEY, Oak Park, Ill., assignor to Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 25, 1922. Serial No. 546,607. 12 Claims. (Cl. 101—285.)



1. In a printing press, the combination of a cylinder, means for rotating said cylinder, and means whereby the rotative movement of said cylinder depends upon the proper registration of a sheet of material relative to said cylinder.

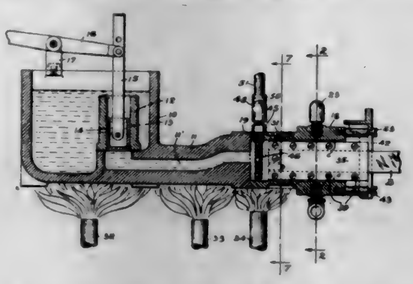
1,567,362. **PRINTING-PRESS MECHANISM.** EDWARD F. DUDLEY, Oak Park, Ill., assignor to Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 22, 1922. Serial No. 555,952. 11 Claims. (Cl. 101—279.)



1. In a printing press, the combination of two pivotally connected frame members, a shaft carried by one of said frame members, cooperating rockably mounted clutch members, one carried by each on said frame members and one carried by said shaft, a feeder arm secured to said shaft and movable with one of said frame members and through said shaft secured to one of said clutch members, and driving means for said feeder arm carried by the other frame member and operatively connected to said other clutch member, said feeder arm and its driving mechanism being releasably connected through said clutch members whereby said feeder arm may be moved out of operative association with its driving means when one frame member is moved with respect to the other.

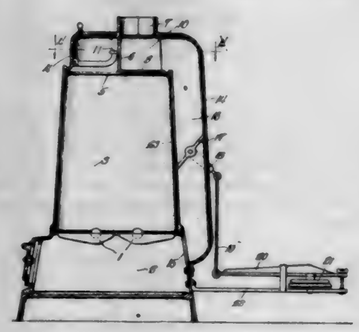
---

1,567,363. **FORMING CONTINUOUS SOFT-METAL BARS FROM MOLTEN METAL.** BENJAMIN S. ELROD and WILLIAM HECTOR, Omaha, Nebr., assignors, by mesne assignments, to Omaha Trust Company, trustee, a Corporation of Nebraska. Filed Oct. 14, 1920. Serial No. 416,904. 17 Claims. (Cl. 207—1.)



4. In a mechanism of the class described, a die body having a continuous longitudinal channel through it, means connected with said die-body for delivering molten metal to one end of said channel, means for cooling the die to solidify the metal during its passage through the channel, and a central partition in the die-channel extending from the cooled portion thereof to a point at which the metal is constantly molten, whereby to divide the molten stream and cool the same into separate bars.

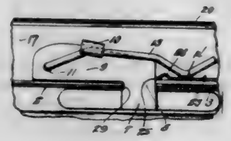
1,567,364. **BROODER STOVE.** HUGH L. GADDIS, Macomb, Ill., assignor to American Steel Products Co., Macomb, Ill., a Corporation of Illinois. Filed May 10, 1924. Serial No. 712,229. 6 Claims. (Cl. 126—58.)



1. The combination with a stove having an ashpit below its combustion chamber, of a flue chamber connected to and overhanging the upper portion of the said combustion chamber, a flue pipe leading from the flue chamber, and an air by-pass duct leading from the ashpit to the flue chamber, the flue chamber having a bottom disposed under the lower end of the flue pipe and having a lateral opening also below the flue pipe and to which the said duct is connected, and means responsive to the temperature outside the stove for controlling the duct.

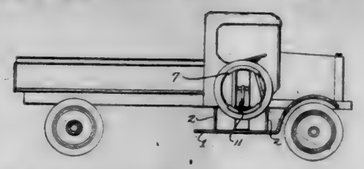
---

1,567,365. **LAMP CONSTRUCTION.** CHARLES E. GODLEY, Detroit, Mich., assignor to Edmunds & Jones Corporation, Detroit, Mich., a Corporation of New York. Filed Mar. 25, 1925. Serial No. 18,107. 6 Claims. (Cl. 240—41.)



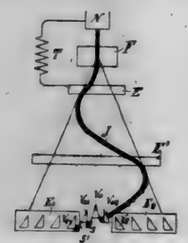
1. In a lamp, a reflector having a laterally directed flange at its mouth, a forwardly open body housing and supporting the reflector, a spring support secured to the body and having a portion thereof disposed forwardly of the said flange; a wire spring detachably carried by the said portion of the spring support and having a part adapted to engage the flange of the reflector, the spring being also adapted to have its flange-engaging parts swung radially outward of the reflector by a corresponding flexing of the spring, so as to clear the flange and permit the removal of the reflector; the spring support and the spring having interengaging portions preventing a bodily movement of the spring radially outward of the lamp; and a lens-carrying ring having a portion adapted to be slid between the reflector flange and the said engaging portion of the spring upon rotation of the lens-carrying ring with respect to the body, so as to cause the spring to lock the ring to the body.

1,567,366. TIRE CARRIER. WALTER R. GREEN, Chicago, Ill. Filed July 14, 1924. Serial No. 725,806. 4 Claims. (Cl. 224—29.)



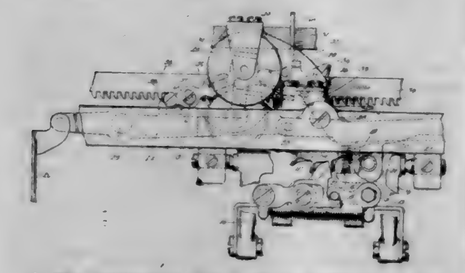
4. In a tire carrier, a channel member, a shoe secured upon one end of the channel member, a second shoe having parallel arms slidably positioned in said channel member, an operating member connected to said channel member, a link connecting said second shoe and operating member, and means for locking said operating member to said link.

1,567,367. ELECTRIC JET-WAVE COMMUTATOR AND INTERRUPTER. JULIUS FREDERIK GEORG POUL HARTMANN, Copenhagen, Denmark. Filed May 19, 1925. Serial No. 31,351. 9 Claims. (Cl. 175—363.)



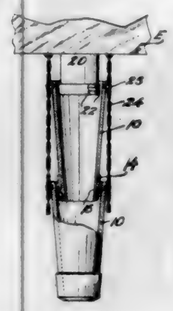
1. In an electric jet-wave apparatus the combination of means for producing a conductive jet-wave, and a sharp-edged member of conductive material adapted to cut the bends of said jet-wave, said conductive member being so shaped and positioned that the interruption of an electric current passed through said jet-wave takes place between the jet-wave and a part of the said conductive member distant from its sharp edge which is thus screened from the corrosive action of the interruption-sparks.

1,567,368. CARRIAGE BRAKE FOR TYPEWRITERS. OTTO A. HOKANSON, Woodstock, Ill., assignor to Woodstock Typewriter Company, Woodstock, Ill., a Corporation of Illinois. Filed Apr. 2, 1923. Serial No. 629,272. Renewed May 25, 1925. 11 Claims. (Cl. 197—64.)



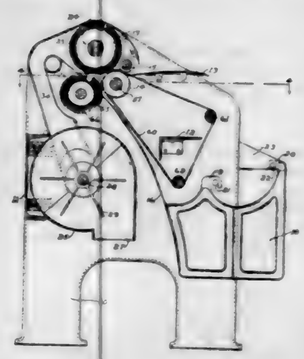
1. The combination with a platen carriage rack, of an escapement wheel for controlling said rack, a platen carriage brake, means for connecting said brake with said rack independently of said escapement wheel and while said rack is in operative connection with said escapement wheel, a dog for controlling said escapement wheel, and means for releasing said escapement wheel from said dog subsequent to connection of said brake with said track.

1,567,369. GLASS LOADING SPOUT FOR GRAIN ELEVATORS. HIRAM C. HOLST, Genoa, Colo. Filed Oct. 9, 1922. Serial No. 593,238. 6 Claims. (Cl. 193—28.)



1. A hollow grain spout section having a body of tough glass and a protecting band on one end thereof.

1,567,370. NAP-BRUSHING MACHINE. JOSEPH HUEBSCH, Milwaukee, Wis. Filed Dec. 31, 1923. Serial No. 683,607. 9 Claims. (Cl. 26—37.)

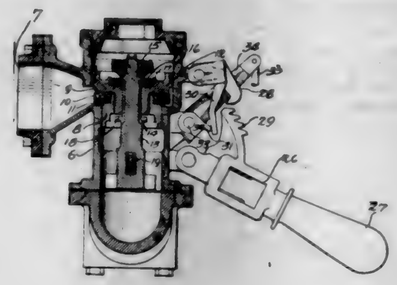


1. A nap brushing machine comprising a pair of feed rolls, one of said rolls having an inclined wire surface and the other of said rolls a resilient surface, a rotating brush adapted to engage a blanket as it passes over the incline wire surface, the projections on said inclined wire surface extending in the opposite direction to the movement of said surface.

1,567,371. AUTOMATIC VALVE FOR WASHING MACHINES. JOSEPH HUEBSCH, Milwaukee, Wis. Filed Jan. 12, 1925. Serial No. 1,783. 11 Claims. (Cl. 137—68.)

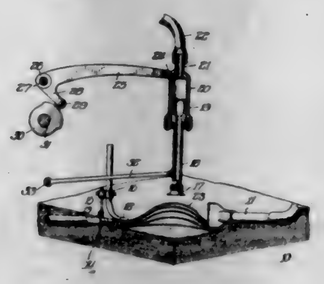
1. In a device of the class described the combination with a washing machine and a float chamber connected thereto of a float in said chamber, valves for controlling the fluid supplied to said washing machine, a stem in each of said valves, a shaft extending through the side

of the valve casing, an arm rigidly engaged on said shaft inside of said casing, said arm being adapted to actuate said stem, an arm rigidly engaged on said shaft outside of said casing, a lever operable in a plane normal to said outside arm having a handle and slot therein, said slot being adapted to engage said outside arm to actuate the same and cause the valve to be opened.



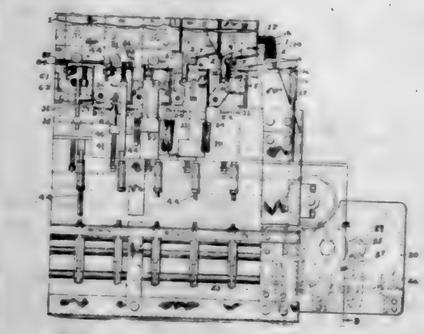
10. In a device of the class described, a casing, a vertical valve in said casing, an auxiliary valve in said valve adapted to be opened prior to the opening of said valve and to be closed prior to the closing of said valve, means for opening said auxiliary and said main valves, locking means therefor adapted to hold said opening means in adjusted open position, means for releasing said locking means for causing said opening means to actuate said valves to closed position.

1,567,372. SHEET-SEPARATING MECHANISM. ARTHUR G. JACOBSON, Chicago, Ill., assignor to Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 15, 1922. Serial No. 588,340. 6 Claims. (Cl. 271—20.)



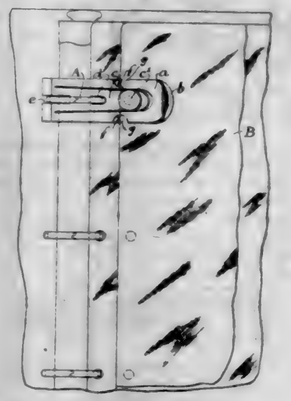
1. In mechanism for separating sheet material in a pile, the combination of means for fluffing sheet material in a pile, and suction gripper means comprising a plurality of relatively movable parts whereby when one of said parts grips the top sheet of material it recedes with said sheet regardless of the movement of the other relatively movable part, whereby separation of the top sheet from the second sheet is maintained.

1,567,373. MACHINE FOR HEATING METAL STOCK. ERNEST S. JEFFERIES, Hamilton, Ontario, Canada, assignor of one-third to Ebenezer A. W. Jefferies, Worcester, Mass. Filed July 31, 1922. Serial No. 578,836. 32 Claims. (Cl. 219—11.)



1. In a machine of the class described, containing means for pieces of stock, a plurality of pairs of electrical contacts, and means for automatically moving pieces of stock in succession from said containing means to positions between different pairs of contacts.

1,567,374. DEVICE FOR PERFORATING THE LEAVES OF LOOSE-LEAF BOOKS AND OTHER PAPERS TO BE FILED. JAMES ADAMS KEENE, London, England. Filed June 30, 1924. Serial No. 723,136. 2 Claims. (Cl. 129—7.)

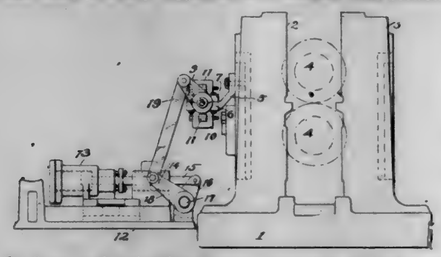


1. A device of the kind described, comprising a pair of leaf-embracing strips connected together at one end, a spring strip connected with said pair of strips, and provided with a punch, said device being provided with registering cutaway portions at separated points to engage the filing wire of a loose leaf book, and hold the said device from turning while sheets are being punched therefor.

1,567,375. BAR-SCRAPING APPARATUS FOR ROLLING MILLS. JOHN P. MCCASLIN, Lakewood, Ohio, assignor to The McKinney Steel Company, Cleveland, Ohio, a Corporation of Ohio. Filed Sept. 7, 1922. Serial No. 586,631. 4 Claims. (Cl. 29—81.)

1. The combination with a pair of rolls of a rolling mill, of a pair of scraper bars extending lengthwise with respect to said rolls and in front of the same, common

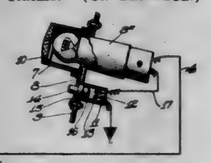
mountings for the adjacent ends of the bars, said mountings being pivotally supported on a common axis between

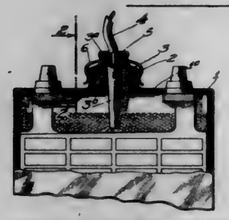


the bars and actuating means connected to both said mountings to turn the same simultaneously about said axis.

---

1,567,376. BATTERY ELECTROLYTE-LEVEL-INDICATING MEANS. GEORGE C. MCINTYRE and STEPHEN L. BARLOW, San Diego, Calif. Filed June 11, 1923. Serial No. 644,678. 4 Claims. (Cl. 200—152.)

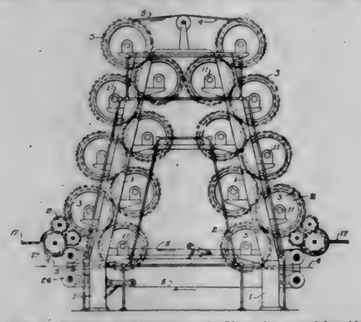




1. A means of the class described, including a conventional storage battery cell cap detachably secured to the cell container and provided with an opening therethrough, an electrode provided with a shoulder thereon removably positioned in said cap, and a resilient metallic electrode retaining member secured to said electrode and adapted to resiliently engage said cap and secure said electrode in position.

---

1,567,377. PAPER DRIER AND THE LIKE. HOMER D. MARTINDALE, Middletown, Ohio. Filed July 10, 1925. Serial No. 42,701. 7 Claims. (Cl. 34—48.)



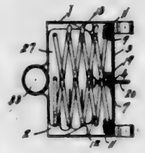
1. In a drying machine, including in combination with drier rolls, web carriers, normally disconnected from the rolls into synchronized operative relation with said rolls and to carry the leading end of said web as the same is threaded thereon.

1,567,378. DESULPHURIZATION AND CONCENTRATION OF SULPHIDE IRON ORES. WILLIAM SOMERVILLE MILLAR, London, England. Filed Mar. 10, 1925. Serial No. 14,583. 1 Claim. (Cl. 75—60.)

A process of desulphurizing and concentrating sulphide iron ores which comprises subjecting the ore reduced to a suitable size to the action of sulphur di-oxide gas in a muffle or other furnace, said gas containing at least 50% $SO_2$ and the ore being continuously agitated and progressively heated to a temperature not exceeding 950°, in such manner that no surface fusion of the ore occurs.

---

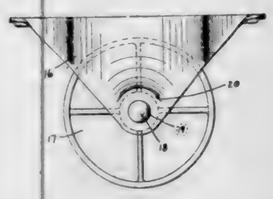
1,567,379. SIGNAL DEVICE FOR MOTOR VEHICLES. HANS R. MILLER and CLIFFORD M. TORGERSON, Fergus Falls, Minn. Filed Aug. 1, 1925. Serial No. 47,596. 2 Claims. (Cl. 116—40.)



1. In a signal device as described, embodying the combination of a case for securing to the windshield; a track mounted in said case; spring set truckies engaging said track; coil springs on said track engaging said truckles; spaced pivoted extension bars secured to said truckles; a buckle engaging said spaced pivoted extension bars; an operating lever on the steering post; a connecting rod for said buckle and operating lever; a signal case, the faces pierced with the word "Turn" at the outer extremities of said extension bars; and a light for said signal case energized by the regular light circuit.

---

1,567,380. RIGID CASTER. WILLIAM H. NOBLTING and EMIL A. SMITHFIELD, Evansville, Ind., assignors to Faultless Caster Company, Evansville, Ind., a Corporation. Filed July 14, 1924. Serial No. 725,999. 4 Claims. (Cl. 16—40.)



1. In a caster, the combination of a supporting sheet metal base including two oppositely extending base extensions, and a pair of wheel supporting ears depending therefrom, each ear including a central bowed portion and a pair of corrugations extending substantially transverse to the base and positioned at the junction of the base with the extensions.

---

1,567,381. SHOCK ABSORBER. MIKE OPANCHYK, Birmingham, Ala., assignor of three-fourths to Sallie M. Bradley and one-fourth to T. M. Bradley, jr., both of Birmingham, Ala. Filed Feb. 9, 1925. Serial No. 8,007. 7 Claims. (Cl. 267—45.)

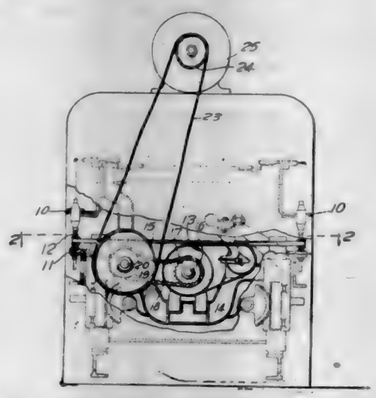
1. An auxiliary spring shock absorber comprising reversely acting springs, an endless flexible belt passed about said springs in position to have its motion in one direction jointly resisted by opposite movement of said

springs, means to connect said belt to one part of the vehicle so that motion in said direction will be im-

parted to the belt on rebounds, and means to mount the springs on an element of the vehicle movable relatively to said first mentioned element.

---

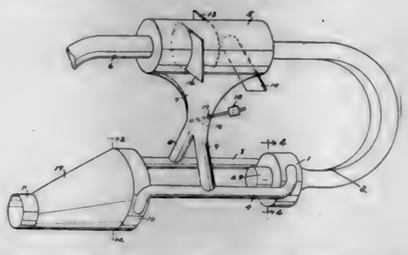
1,567,382. RING-SPINNING MACHINE. JAMES C. POTTER, Pawtucket, R. I. Filed Oct. 11, 1922. Serial No. 593,818. 6 Claims. (Cl. 118—4.)



1. In a ring spinning machine having stationarily supported rings and traversing spindles the combination of spindle rotating means comprising a rotatable member belted to the spindles and mounted for movement with the spindles when the latter traverse through the rings, a stationarily supported rotating power transmitting element, a rotatable power receiving element for rotating the rotatable spindle driving member and partaking of the movement of the latter during the traverse of the spindles, and a single flexible power transmitting means extending directly between said driving and driven elements.

---

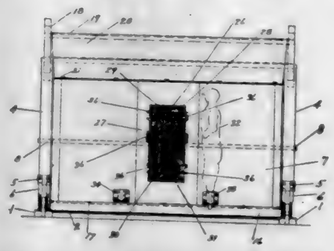
1,567,383. DELIVERY MECHANISM. JEFFREY J. POWER, Madison, Wis., assignor to Power-Stevens Fan Devices Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Aug. 17, 1923. Serial No. 657,866. 11 Claims. (Cl. 302—23.)



1. In a delivery apparatus; a rotary discharge device having a casing provided with an inlet conduit and a pair of opposite outlets extending tangentially therefrom, means for by-passing particles of solids carried by the fluids circulated by said device and delivering said particles to said outlets.

---

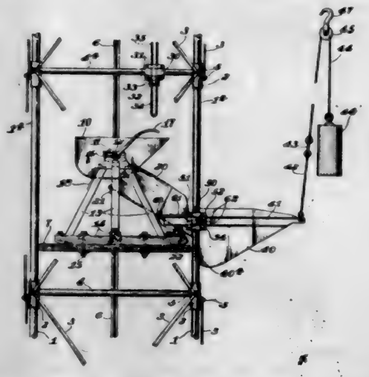
1,567,384. PITCHING TARGET. HENRY J. RECTENWALD and WILLIAM E. BERNHARDT, Pittsburgh, Pa. Filed Apr. 12, 1923. Serial No. 631,578. 10 Claims. (Cl. 273—266.)



10. A target for use in pitching and fielding practice by baseball pitchers comprising a frame, a boarding comprising layers of relatively non-resilient material and a layer of rubber between said non-resilient layers tiltably mounted in said frame, said boarding having on one face thereof a mark the width of the home plate in the game of baseball and a height equal to the distance between the knees and shoulders of a batter of average height, and a backing of rigid material on the other side of said boarding and covering at least the area embraced by said mark.

---

1,567,385. CONCRETE-DISTRIBUTING APPARATUS. ALEXANDER R. REED, Pittsburgh, Pa. Filed Oct. 21, 1924. Serial No. 744,954. 9 Claims. (Cl. 214—120.)



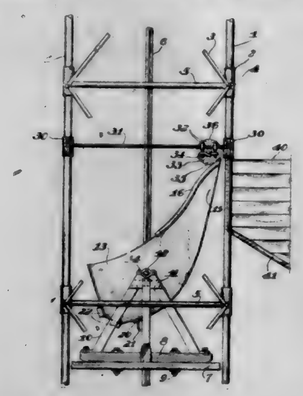
1. The combination with a construction elevator and its tower of a removable rockable concrete bucket and a supporting frame therefor mounted on the elevator, automatic means to tilt the bucket to discharge position upon arrival of the elevator at a predetermined height, and means normally outside the elevator shaft adapted to receive the concrete discharged by tilting of the bucket and to carry it outside of the elevator shaft.

---

1,567,386. CONCRETE-DISTRIBUTING APPARATUS. ALEXANDER R. REED, Pittsburgh, Pa. Filed Nov. 18, 1924. Serial No. 750,714. 5 Claims. (Cl. 214—120.)

1. The combination with an ordinary construction elevator and its tower of a removable supporting carriage

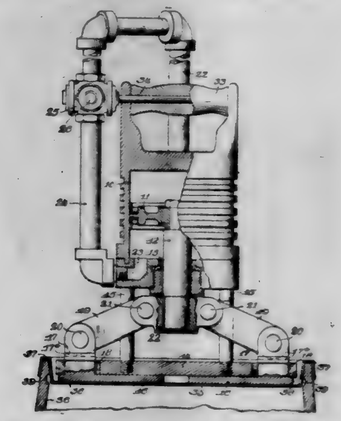
adapted to be fixed upon the elevator, a concrete-carrying bucket rockably mounted in said carriage, the bucket having an extended spout long enough to discharge concrete outside of the elevator shaft when the bucket is



tilted, and removable vertically adjustable means attached to the elevator tower adapted to engage the spout of the bucket whereby to tilt it into discharge position upon arrival of the elevator at a predetermined height.

---

1,567,387. EXPANDER FOR METAL BARREL HEADS. FREDRICH J. RODE, Chicago, Ill. Filed Aug. 9, 1924. Serial No. 731,042. 6 Claims. (Cl. 113—18.)

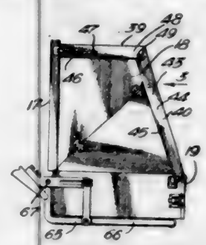


1. A barrel head expander including a cylinder and piston, a support for the cylinder, expander members adjacent and beneath the said support, said members having sliding contact with the said support, connections between the said piston and the respective said members above the said support for causing the members to move with respect to the support when the piston is moved in the cylinder, and means for causing the piston to be moved by fluid pressure.

---

1,567,388. EXPANSIBLE AUTO TRUNK. ROBERT E. ROHNE, Los Angeles, Calif. Filed June 4, 1923. Serial No. 643,261. 7 Claims. (Cl. 190—19.)

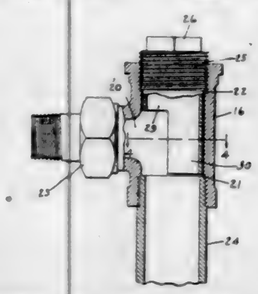
3. In an auto trunk of the class described, the combination of: a container adapted for use in upright and horizontal positions; a cover at the top of said container when said container is in upright position, for providing access to the interior of said container; and foldable members on the side of said container arranged to be expanded to form a housing in which articles may



be carried, one of said foldable members being hinged to said container and utilized as a cover for concealing other of said foldable members when said members are disposed in collapsed position.

---

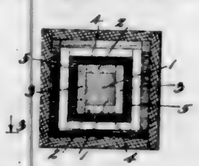
1,567,389. CIRCULATION-REGULATING PLUG VALVE. WILLIAM RUBLY, Indianapolis, Ind. Filed Mar. 27, 1922. Serial No. 547,171. 1 Claim. (Cl. 251—95.)



A regulating plug valve comprising a standard T fitting provided with a pair of aligned and similarly threaded identical openings communicating with each other, a third opening at an angle thereto and communicating therewith, and a control plug having a body portion as large as the identical openings and complementarily threaded and positionable in either of said aligned openings, said plug including a tool-engageable portion integral therewith and projecting therefrom for turning the same, and an oppositely projecting semi-cylindrical skirt of less diameter than the threaded body portion and integral therewith projecting through the T fitting and beyond the third opening and cooperating with the wall of said fitting adjacent the third opening for control purposes.

---

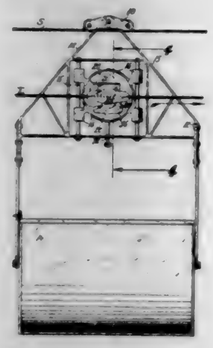
1,567,390. WOOD LAMP-BASE CONSTRUCTION. STEVEN A. RUPPERT, Cleveland, Ohio. Filed Apr. 10, 1925. Serial No. 22,129. 2 Claims. (Cl. 20—75.)



1. In a composite ornamental wood structure of the class described, in combination, a body comprising a polysided core, a plurality of layers of wood of varying color correspondingly applied to each side of said core, the body aforesaid being turned down symmetrically to expose each layer of each side whereby to form a corresponding distinctive panel design with respect to opposing sides of the body.

---

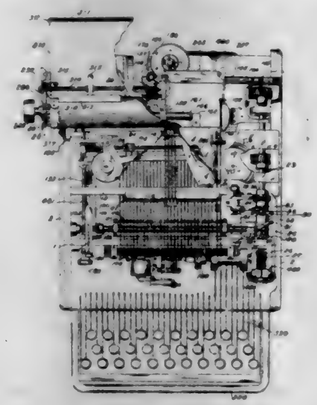
1,567,391. AERIAL TRAMWAY GRIP. EDWARD H. SACKETT, Arvada, Colo., by Louisa Sackett, conservatrix, Arvada, Colo. Filed Apr. 18, 1924. Serial No. 707,439. 12 Claims. (Cl. 104—206.)



5. A grip for aerial tramways having a movable cable-engaging jaw, means to actuate the same to engaging position, means for positively adjusting the engaging position thereof and compensating means to limit the pressure of the jaw upon the cable.

---

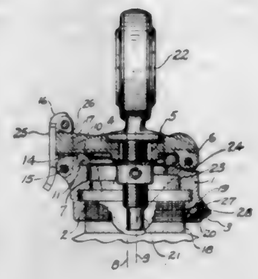
1,567,392. TELEGRAPH TYPEWRITER. EDWARD E. KLEINSCHMIDT, Brooklyn, N. Y., assignor, by mesne assignments, to Morkrum-Kleinschmidt Corporation, Chicago, Ill., a Corporation of Delaware. Filed July 5, 1923. Serial No. 649,562. 48 Claims. (Cl. 178—27.)



1. In a printing telegraph machine, a set of selectors; a printing mechanism controlled by said selectors and comprising type carrying and shift mechanisms; common operating means for said mechanisms; and a single cam supplying and controlling the entire acuating energy to said operating means.

---

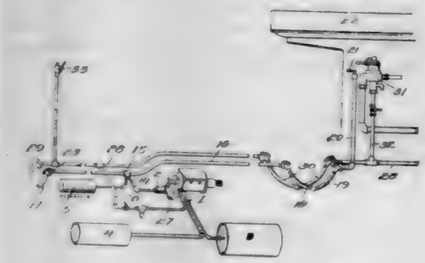
1,567,393. RADIATOR CAP. HERMAN SCHLAICH, Long Island City, N. Y. Filed Mar. 16, 1925. Serial No. 15,710. 8 Claims. (Cl. 220—24.)



1. A radiator cap comprising a body portion, a cover for said body portion hinged in the body portion, said cover having a central aperture for receiving the stem of an indicating instrument, the upper part of said body portion being provided with a circular opening, a substantially circular gasket seat surrounding the circular opening, the opening and the gasket seat being eccentric to the cap body to provide clearance for the stem of the instrument in the swinging of the cover between open and closed positions, and means to secure the body portion to the radiator.

---

1,567,394. VALVE CONSTRUCTION FOR AIR-BRAKE SYSTEMS. HENRY SCHMARGE, Belen, N. Mex. Filed May 25, 1925. Serial No. 32,769. 9 Claims. (Cl. 303—42.)



1. In an air brake system the combination of a triple valve, a train pipe connected with said triple valve, an auxiliary train pipe, an auxiliary cylinder connected with said triple valve and having means for preventing movement of said valve to emergency position at undesired periods, means for reducing the pressure in said auxiliary train pipe, and means responsive to the reduction in pressure in said auxiliary train pipe for rapidly reducing the pressure in said auxiliary cylinder for enabling said triple valve to move to emergency position at desired periods.

---

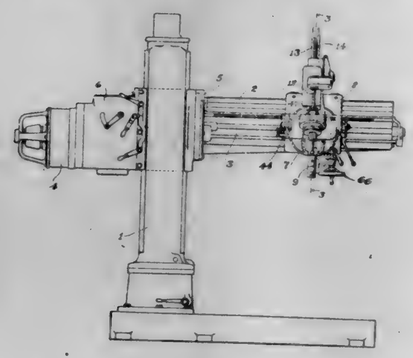
1,567,395. PROCESS OF CHLORINATION OF SULPHITE LIQUOR. ALBERT SCHMIDT, Paris, France. Filed Mar. 30, 1922. Serial No. 548,184. 3 Claims. (Cl. 260—159.)

1. The method of chlorinating sulphite liquor which comprises first treating the liquor with chlorine gas and then treating the resultant precipitate with nascent chlorine.

1,567,396. SOLDERING ALLOY AND METHOD OF MAKING THE SAME. EPHRAIM D. SCHWALM, Chicago, Ill. Filed Apr. 29, 1925. Serial No. 26,805. 5 Claims. (Cl. 75—1.)

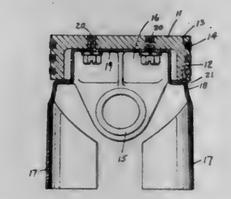
1. The herein described method of making an aluminum solder of copper and tin, consisting of fusing the two metals with sodium and then introducing zinc into the fused elements, substantially as described.

1,567,397. TOOL-FEEDING MECHANISM. WILLARD T. SEARS, Montclair, N. J., assignor to Niles-Bement-Pond Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 23, 1922. Serial No. 590,112. 9 Claims. (Cl. 77—32.)



1. In a drilling machine, the combination of a spindle, means including a double clutch for feeding the spindle longitudinally, a member operated in timed relation with the feeding movement of the spindle, a dog adjustable on the member, and means operated in a single direction by the dog for moving the clutch from either of its driving positions to a neutral position after a predetermined feeding movement of the spindle.

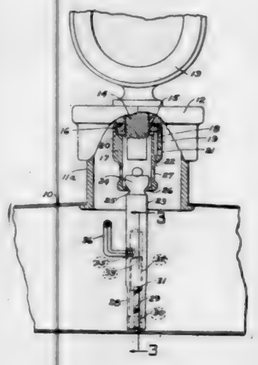
1,567,398. PISTON. WALTER J. SIX, Indianapolis, Ind. Filed June 20, 1925. Serial No. 38,517. 4 Claims. (Cl. 74—108.)



1. A piston comprising a cast metal head provided with double wrist pin bosses cast integral with the under top surface thereof, and a skirt formed of sheet metal separately from said head, said skirt being rigidly secured to the under top surface of said head intermediate said bosses.

1,567,399. LOCK FOR RADIATOR CAPS. IVAN H. STANT, Connersville, Ind. Filed July 5, 1924. Serial No. 724,499. 4 Claims. (Cl. 220—24.)

1. In a lock of the character described adapted for attachment to a radiator cap comprising a hollow stem, means for connecting said stem to said cap, an anchor member pivotally connected to the lower end of said stem, a pin slidably mounted in said hollow stem in position to have one end in engagement with said anchor member,



and a plug having a recessed head for receiving a tool adapted to be screwed into said stem in engagement with the other end of said pin for maintaining it in locking engagement with said anchor member.

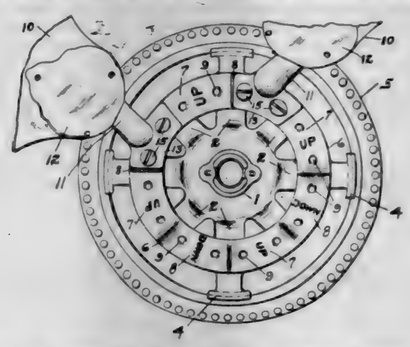
1,567,400. SPRING WHEEL. FREDERICK STITZEL, Louisville, Ky.; John J. Davis administrator of said Frederick Stitzel, deceased. Filed Nov. 12, 1923. Serial No. 674,263. 7 Claims. (Cl. 152—37.)

1. A spring wheel, having an inner member and an outer member, a series of interconnecting hangers, ballways supported in these hangers and each ballway containing a pair of balls movable in the direction of the circumference of the wheel and another pair of balls movable in the direction of the axis of the wheel by displacement.

1,567,401. FAN. HARVE R. STUART, Springfield, Ohio, assignor to The Robbins & Myers Company, Springfield, Ohio, a Corporation of Ohio. Filed June 26, 1924. Serial No. 722,450. 2 Claims. (Cl. 170—173.)

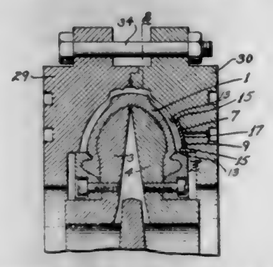
1. In a structure of the character described, a rotor, a series of spider-like arms projecting from said rotor, a ring supported by said arms in concentric relation with the axis of said rotor, the outer face of said ring being formed with a set of faces inclined in one direction

with respect to the plane of rotation of said ring and with another set of faces in alternating relation with the faces of said first set and inclined in another direc-



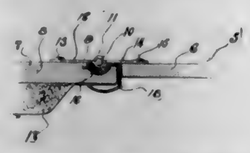
tion with respect to the axis of rotation, and a series of fan blades adapted to be detachably connected with either set of faces.

1,567,402. TIRE MOLD. CHARLES J. VENN, Chicago, Ill., assignor to Century Rubber Works, Cicero, Ill., a Corporation of Illinois. Filed May 17, 1922. Serial No. 561,554. 2 Claims. (Cl. 18—38.)



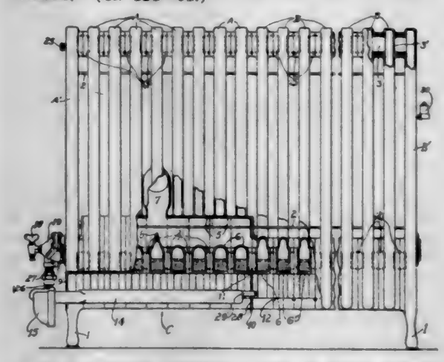
1. In apparatus of the class described, in combination, a mold for a resilient tire, a plate adapted to fit removably in said mold, a legend engraved upon the plate, a border engraved around the edge of the plate, whereby the engraved plate produces a raised legend upon the molded article, and the engraved border produces a raised border upon the article.

1,567,403. TRUNK FITTING. GEORGE HENRY WHEARY, Racine, Wis., assignor to Wheary Burge Trunk Company, Racine, Wis., a Corporation of Wisconsin. Filed Aug. 13, 1923. Serial No. 657,079. 5 Claims. (Cl. 190—19.)



1. A trunk construction comprising trunk sections having meeting marginal edges, a continuous hinge fitting connecting the meeting edges, the hinge fitting extending substantially the length of the edges, and means engageable with the hinge fitting throughout its length to prevent the passage of foreign matter between the trunk sections at the fitting.

1,567,404. RADIATOR. HUBERT L. WHITELAW, St. Louis County, and WALTER G. VOLLMER, St. Louis, Mo., assignors to Jesse M. Williams, Santa Monica, Calif. Filed Dec. 1, 1922. Serial No. 604,320. 3 Claims. (Cl. 126—91.)

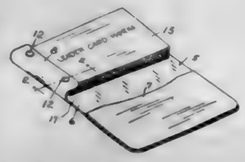


1. In a sectional radiator, a row of hollow sections having a combustion chamber in their lower ends, said combustion chamber having an end wall adjustable longitudinally of the combustion chamber to vary the length thereof with respect to the length of the radiator, and a burner in said combustion chamber.

1,567,405. TOY. WILLIAM G. WHITELEY, Boonton, N. J. Filed Oct. 6, 1921. Serial No. 505,698. 1 Claim. (Cl. 273—147.)

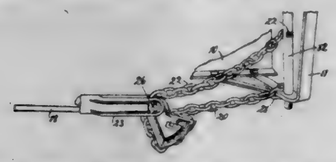
In a toy of the class described, an integral wire structure adapted to be spun as a top, the spinning point of the same being formed at one end of said wire, and the finger portion of said top being formed at the other end of said wire, a dial member adapted to be retained upon said finger portion, an indicator member also adapted to be retained upon said finger portion over said dial, and one of said members rotatable independently of said structure.

1,567,406. CARD PACKAGE. GUSTAVE A. WILKE, Milwaukee, Wis. Filed June 11, 1924. Serial No. 719,371. 6 Claims. (Cl. 129—1.)



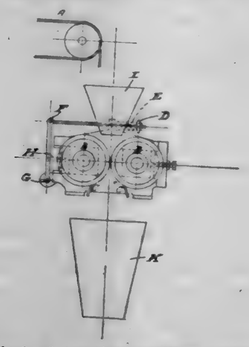
2. In a card package, the combination of a plurality of individual calling cards and attached stubs formed integrally with respective cards and separable therefrom, the boundary between each card and its respective stub being defined by continuous straight scoring or cutting adapted to permit the card to be torn from the stub with a clean-cut margin and the remaining boundaries of each card being free, all of said stubs being provided with laterally spaced aligned openings adapted to receive mounting posts, whereby to secure said stubs pending the separation of cards therefrom.

**1,567,407. BRAKE MECHANISM FOR RAILWAY CARS.** HENRY I. WEIGLEY, Chicago, Ill., assignor to Universal Draft Gear Attachment Co., Chicago, Ill., a Corporation of Illinois. Filed Dec. 9, 1922. Serial No. 605,872. 8 Claims. (Cl. 254—149.)



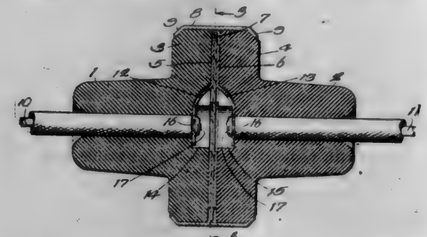
1. In a brake mechanism for railway cars, the combination of a brake staff, a brake lever and an extensible and contractible connection between said brake staff and brake lever including a reversing lever having arms of different length provided with grooved working surfaces, the shorter arm having an eccentric extension projecting laterally therefrom and the long arm having an extension projecting opposite to said eccentric extension and a cable looped about said lever with one end connected with said brake staff and the other end anchored.

**1,567,408. PROCESS OF TREATING FERTILIZERS.** PETER TOMY AXELSEN, Rjukan, Norway, assignor to Norsk Hydro-Elektrisk Kvaelstofaktieselskab, Christiania, Norway. Filed Jan. 14, 1924. Serial No. 686,166. 4 Claims. (Cl. 18—11.)



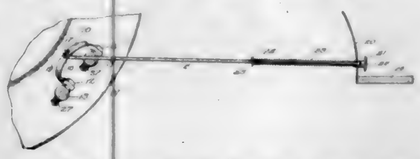
1. The method of treating fertilizer which comprises passing the fertilizer in a solid pulverulent condition under pressure between smooth rotating surfaces and thereby forming the fertilizer into thin, polished compacted sheaves capable of being stored without coalescing into lumps.

**1,567,409. CONDENSER.** ALBERT E. BERDON, Detroit, Mich. Filed May 29, 1922. Serial No. 564,293. 4 Claims. (Cl. 250—41.)



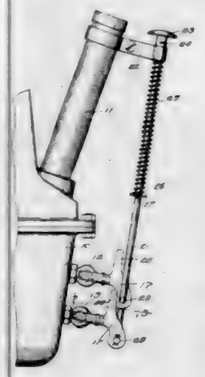
1. A condenser including two co-axial flanged conduits with the flanges thereof slightly spaced apart; two wire conductors, one passing through the bore of each conduit; two condenser plates between said flanges each having one of said wires individual thereto and having a tang thereon with which such wire is connected, the tangs extending away from each other and being received in notches that are formed in the adjacent faces of said conduits; a solid dielectric between said plates and maintaining them in spaced apart relation; and a band surrounding said flanges and having its edge portions bent into clamping engagement therewith whereby the condenser plates are held in fixed relative positions.

**1,567,410. DEVICE FOR OPERATING OIL GAUGES.** JOE W. BLACK, Chicago, Ill. Filed Jan. 19, 1924. Serial No. 687,379. 1 Claim. (Cl. 137—139.)



A device for operating two crank-case petcocks having aligned plugs pointing in the same direction, said device comprising a member adapted to engage said plugs, means extending to an accessible point for operating said member, and a spring for returning said member to a normally closed position, the plugs being inclined toward the operating means, so that said operating means tend to withdraw the tapered plugs as they are turned toward open position and to force said plugs into the petcocks as they are turned toward closed position.

**1,567,411. DEVICE FOR OPERATING OIL GAUGES.** JOE W. BLACK, Chicago, Ill. Filed Jan. 19, 1924. Serial No. 687,380. 1 Claim. (Cl. 137—139.)



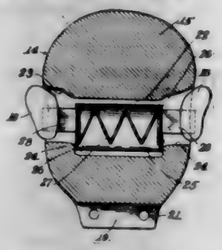
A device for operating two crank-case petcocks having substantially parallel rotatable plugs, said device comprising a rod, arms hingedly connected thereto, each arm being adapted to be secured to a rotatable plug of a petcock, a guide for the free end of said rod, and means for normally holding said plugs in closed position, said rod having two transverse sections at different levels for operating said arms.

**1,567,412. FUEL-RESERVE-MAINTAINING DEVICE.** JOE W. BLACK, Chicago, Ill. Filed May 12, 1924. Serial No. 712,573. 2 Claims. (Cl. 158—46.5.)

1. A fuel reserve maintaining device comprising a body having a vertical tubular portion restricted at its lower end, a passage connecting with said tubular portion on each side of said restricted end, a tube movable to close

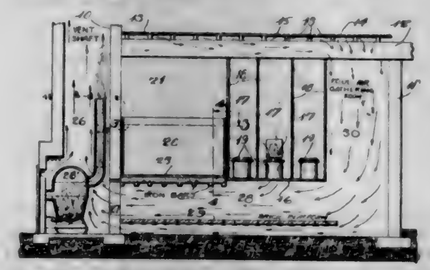
said restricted end, and a high level hole in said tube connecting said passages when the restricted end is thus closed by the tube.

**1,567,413. SOUND-PRODUCING TOY.** ERNEST BOCCHINO, Passaic, N. J. Filed Jan. 24, 1925. Serial No. 4,421. 5 Claims. (Cl. 46—40.)



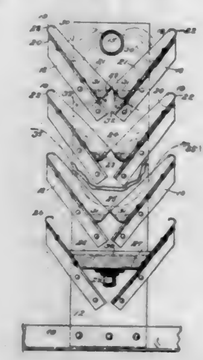
1. The combination with a toy representing a doll provided with a head containing a chamber having offset lateral openings, of a sound making device within the chamber, said device being operative upon the application of pressure, elements simulative of ears fixed on the ends of said device to extend oppositely outward through the mentioned openings to move relatively therein, and means for normally extending said elements equally outward.

**1,567,414. DRY CLOSET.** PETER B. BOGART, Atlanta, Ga. Filed Sept. 21, 1925. Serial No. 57,643. 2 Claims. (Cl. 4—133.)



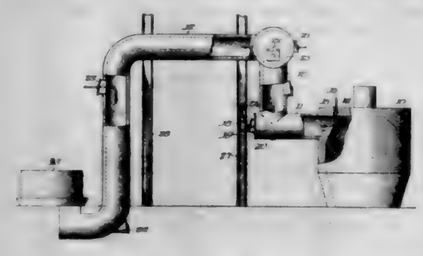
1. In a dry closet, a building structure having back and front walls and a pair of floors spaced to form a flue, the space above the upper floor forming a room, an upwardly extending foul air gathering chamber at one end of the flue and communicating at its upper end with the upper part of the room, an uptake vent leading from the opposite end of the flue and opening upwardly outside of the room, and a urinal in said room having a back wall and a floor spaced from the back wall to provide an opening communicating with the flue.

**1,567,415. COOLING TOWER.** EDWIN BURHORN, Hoboken, N. J. Filed Mar. 17, 1922. Serial No. 544,592. 3 Claims. (Cl. 261—114.)



2. A cooling tower as in claim 1 and wherein the tower comprises only two of such series of inclined members, the two series facing each other in close proximity, with each member inclined downwardly and inwardly, and its lower edge adjacent and opposite the lower edge of a member of the opposed series.

**1,567,416. METHOD OF AND APPARATUS FOR CLEANING SOOT OUT OF GAS MAINS.** WILLIAM F. CAGWIN, Chicago, Ill. Filed May 26, 1923. Serial No. 641,599. 2 Claims. (Cl. 110—49.)

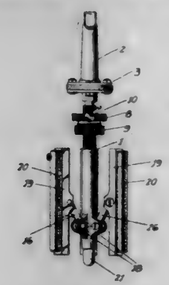


1. The method of removing soot from mains containing combustible gas and disposing of the soot which comprises progressively blowing the soot from the inlet end of the gas mains toward and out of the outlet end of the said gas main and into a furnace, and burning the soot removed from said gas main in the combustion chamber of the furnace.

**1,567,417. CYLINDER HONE.** ERNEST P. CAMPBELL, Stockton, Calif. Filed May 6, 1924. Serial No. 711,400. 5 Claims. (Cl. 51—206.)

1. A hone including a shank adapted to be rotated, arms projecting radially from the shank, hone carriers pivotally mounted on the outer ends of the arms and

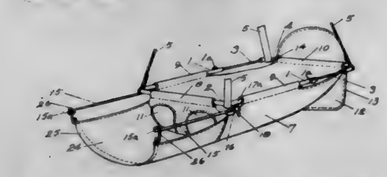
extending lengthwise of the shank, spring means acting to force the carriers away from the shank, means for positively altering the distance of the carriers from the



shank without altering the spring pressure, and independent means for altering the pressure of the spring means.

---

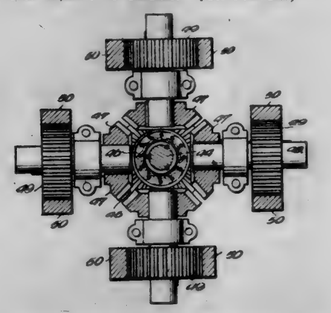
1,567,418. CRADLE. CHARLES W. CARNES, Erie, Pa. Filed Oct. 14, 1924. Serial No. 743,634. 6 Claims. (Cl. 155—68.)



2. In a cradle, the combination of a telescoping frame; a hammock secured to the frame and shortened or elongated by the telescoping action of the frame, said hammock having leg openings at its front; and an extension secured to the front of the frame and carrying leg supporting means below the openings.

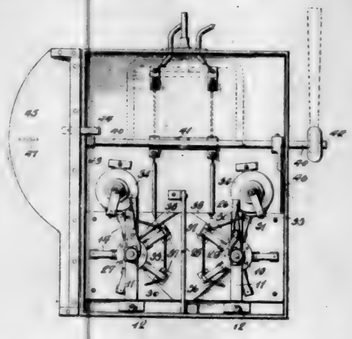
---

1,567,419. MECHANICAL MOVEMENT. MANUEL CARRASCO-SÁNCHEZ, Washington, D. C. Filed Apr. 3, 1925. Serial No. 20,531. 3 Claims. (Cl. 74—54.)



1. In motion transformation mechanism, the combination with a shaft to be driven, of gears journaled on the shaft, ratchet mechanisms for clutching the respective gears to the shaft and operating respectively to clutch one gear to the shaft when said gear is rotated in one direction and clutching the other gear to the shaft when said first gear is rotated in the other direction, an intermediate gear interposed between and in mesh with said gears, a driving gear fixed to one of said gears, and a plurality of oppositely reciprocatory driving racks operating on said driving gear.

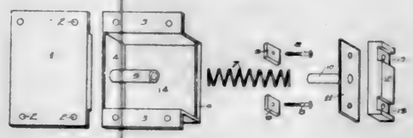
1,567,420. ELECTRIC FUSE. CLARENCE O. CARRIER, Cleveland, Ohio. Filed Apr. 30, 1924. Serial No. 710,044. 4 Claims. (Cl. 200—125.)



1. An electrical device including a rotatable fuse carrying member, radial arms carried by said member, each arm comprising a top finger, a depending jaw at the outer end of said finger, a depending bracket adjacent the inner end of said finger, a jaw pivoted to said bracket to co-act with the depending jaw, spring means for normally separating the jaws, a depending leg carried by the pivoted jaw, and means for elevating the pivoted jaw to co-act with the depending jaw to grip a fuse wire.

---

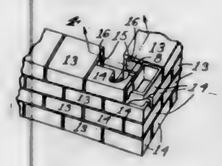
1,567,421. ANTIRATTLING DEVICE. GEORGE E. CLAYTON, Compton, Calif. Filed Jan. 12, 1925. Serial No. 1,798. 5 Claims. (Cl. 292—74.)



1. In an anti-rattling device for windows, doors nd the like, in combination, a casing, a plate adapted to be reciprocated in said casing, means associated with said plate and said casing for resisting the movement of said plate, means integral with said casing for preventing said plate from extending beyond said casing, and a buffer so associated with said plate that it may be moved thereby.

---

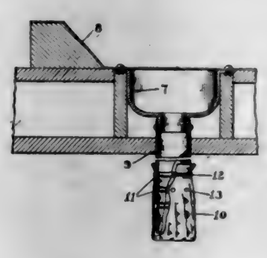
1,567,422. WALL CONSTRUCTION. CYRUS E. COFFEE, St. Louis, Mo. Filed May 7, 1924. Serial No. 711,729. 12 Claims. (Cl. 72—29.)



1. The combination, with a pair of juxtaposed walls having an intermediate space therebetween and being formed of superposed layers of blocks some of which are hollow and open-ended, the space-facing blocks of some layers being retracted from the said space to form recesses communicating therewith, and the space-facing blocks of other layers being hollow and presenting their open end faces to the said space; of a column of cementitious material in the said space and extending into the said recesses and into the open ends of the hollow blocks facing the said space.

---

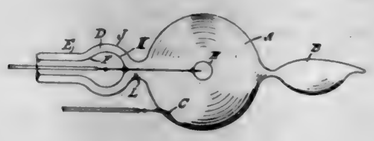
1,567,423. DRAIN SEAL FOR REFRIGERATOR CARS. GEORGE L. COMLOSSY, Toledo, Ohio. Filed Feb. 2, 1925. Serial No. 6,344. 8 Claims. (Cl. 182—8.)



1. In a refrigerator car, the combination with a drain duct leading from the interior thereof to the outside for permitting liquid to flow therethrough by gravity, of a flexible fabric structure enclosing the end of said duct, said device having apertures therein above the end of said duct to permit restricted liquid flow therethrough, and means for removably connecting the upper portion of said device to said duct.

---

1,567,424. PHOTO-ELECTRIC CELL. ARTHUR H. COMPTON, St. Louis, Mo., assignor to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed Mar. 1, 1921. Serial No. 448,944. 7 Claims. (Cl. 250—35.)

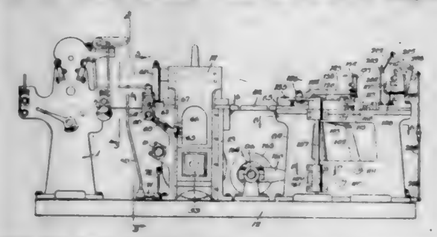


1. A photo-electric cell comprising an envelope consisting of a main chamber and an auxiliary chamber connected by a restricted neck, said auxiliary chamber having a curved passage forming a plurality of shadow zones, an electrode extending through the wall of the auxiliary chamber and the neck into the main chamber and another electrode extending through the wall of the main chamber, light-sensitive material deposited on the wall of the main chamber, connected with the second electrode and insulated from the first electrode by said shadow zones.

---

1,567,425. PAIL-MAKING MACHINE. EDWARD CRAIG, St. Joseph, Mich., assignor to Saranac Automatic Machine Corporation, Benton Harbor, Mich., a Corporation of Delaware. Filed Jan. 4, 1924. Serial No. 684,280. 54 Claims. (Cl. 93—36.)

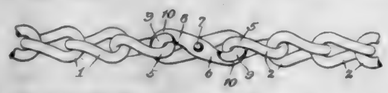
1. In a machine for making receptacles from sheet material, the combination of instrumentalities for applying a handle to a blank, while the blank is integral with the sheet material, means for feeding the blank and its handle forward, while the blank is integral



with the sheet material, and mechanism for thereafter folding the blank in a manner to position the handle for use in carrying the receptacle.

---

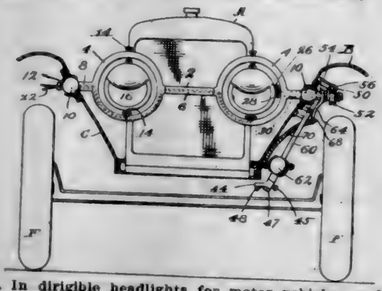
1,567,426. VEHICLE TIRE-CHAIN REPAIR-LINK CONSTRUCTION. JAMES M. DONOVAN, Chicago, Ill. Filed May 27, 1922. Serial No. 564,086. 2 Claims. (Cl. 152—14.)



1. A repair link for vehicle tire chains, comprising two link sections pivotally connected between their ends and formed at each side of the pivotal point with curved portions which overlap to provide eyes to receive other links of the chain, said repair link being so formed that the two eyes thereof are disposed in planes extending at an angle to each other, so that the two eyes are disposed in different planes and cross each other at an angle when the link is viewed endwise thereof with the axis of said pivotal point passing through the planes where they intersect each other, whereby said axis passes through each plane obliquely thereto, and said repair link is prevented from lying flatwise against the tread of the tire.

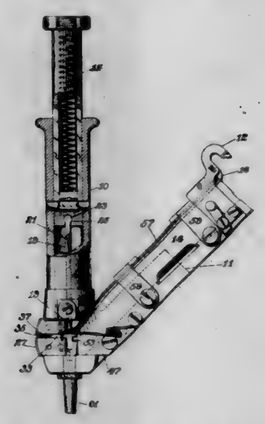
---

1,567,427. DIRIGIBLE HEADLIGHT. JOHN M. DORTON, Bonner Springs, Kans. Filed Sept. 2, 1924. Serial No. 735,242. 4 Claims. (Cl. 240—61.)



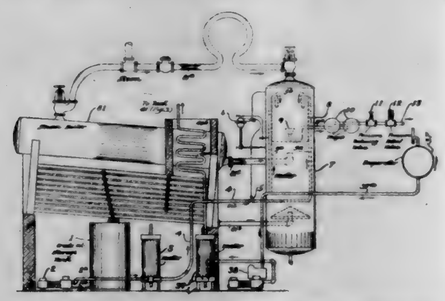
1. In dirigible headlights for motor vehicles, a frame in which a pair of headlights are mounted to turn to the right and left, means connecting said headlights to cause them to turn together, an inclined shaft mounted on the vehicle, a housing in which said shaft is mounted, self-adjusting means whereby said housing is connected to the vehicle, means connecting said shaft to the steering mechanism of the vehicle so that the latter may operate the former, a gear fixedly mounted upon said shaft, a rack actuated by said gear and axially adjustable to permit the gear and said shaft to be adjusted to different inclinations, and mechanism actuated by said rack for turning the headlights to the right or left.

1,567,428. FASTENING INSERTING MACHINE. RENÉ E. DUPLESSIS, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Oct. 8, 1921. Serial No. 506,399. 15 Claims. (Cl. 1—46.)



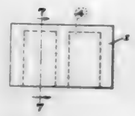
1. A tacker having, in combination, a throat-block, a separator formed with a surface co-operating with a surface on the throat-block to form a throat opening, said separator being mounted for swinging movement into and out of tne path of movement of tacks toward the throat to control the passage of the tacks to the throat, a driver, and means carried by he driver remote from its tack-engaging end to control the operation of the separator.

1,567,429. PROCESS FOR SERIES SEPARATION OF CRUDE PETROLEUM. ALFRED R. EARL and THOMAS W. REEVES, Toledo, Ohio. Filed Aug. 25, 1923. Serial No. 659,363. 2 Claims. (Cl. 196—72.)



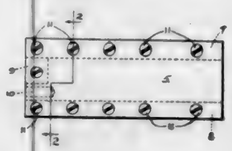
1. The method of continously distilling mineral oil which consists in heating the oil under pressure by means of steam, then releasing the pressure of the so-heated oil and passing the same into an expansion zone, where part of the oil vaporizes, conducting away the vapors so formed and fractionally condensing the same, withdrawing the unvaporized oil and further heating the same while not permitting vaporization of the oil, passing the said heated oil into an expansion zone maintained at a pressure below atmospheric and there permitting vaporization of the lighter products to take place, withdrawing and condensing the vapors so formed, withdrawing the unvaporized oil from said expansion zone and heating it by direct contact with superheated steam while maintaining the same under sufficient pressure to prevent vaporization of the oil, releasing the pressure of said oil and passing the heated oil into an expansion zone maintained at a pressure below atmospheric, thus permitting part of the oil to vaporize, withdrawing the vapors so formed and fractionally condensing the same, and withdrawing the unvaporized oil from said last named expansion zone.

1,567,430. BUILDING BLOCK. CHARLES M. EBERLING, Cleveland, Ohio. Filed Nov. 21, 1923. Serial No. 676,150. 5 Claims. (Cl. 72—41.)



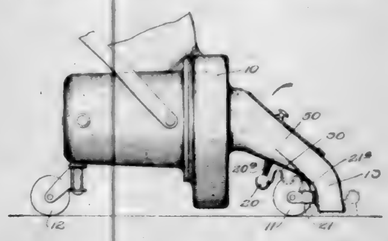
1. A building block having a substantially rectangular body formed in one side with a pair of slots having a width sufficient to admit a workman's hand and separated by a web of such depth as can be embraced by a workman's fingers, the slots being of sufficient length in a direction parallel to said web to admit a workman's hand.

1,567,431. BAR-CASTING DIE AND METHOD FOR SEASONING THE SAME. BENJAMIN S. ELROD, Omaha, Nebr., assignor to Elrod Slug Casting Machine Company, Omaha, Nebr., a Corporation of Nebraska. Filed Apr. 17, 1922. Serial No. 554,084. 10 Claims. (Cl. 207—1.)



3. An extrusion die, comprising body-portions of cast-iron having formed integrally therewith working surfaces of a black glossy composition consisting of the metal in combination with residues of heavy mineral oil volatilized in contact with the metal.

1,567,432. VACUUM CLEANER. FREDERICK A. ENGLISH, Chicago, Ill., assignor to Birtman Electric Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 7, 1922. Serial No. 592,988. 7 Claims. (Cl. 15—158.)



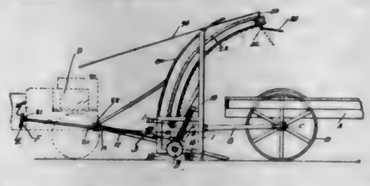
1. In combination with a vacuum cleaner having a suction nozzle, a plurality of spaced apart brushes disposed in the front and rear of the said nozzle when in operative relation thereto, a brush-carrying frame carried by the nozzle exteriorly thereof in either operative or

inoperative relation therewith, means carried by said frame and engaging the nozzle to prevent accidental swinging movement of said frame from operative position, and means carried by the frame to prevent its accidental swinging from inoperative position.

1,567,433. FASTENER FOR BARBERS' HAIR CLOTHS AND THE LIKE. JOSEPH FAVATA, Jr., Buffalo, N. Y. Filed Apr. 24, 1924. Serial No. 708,715. 5 Claims. (Cl. 24—81.)

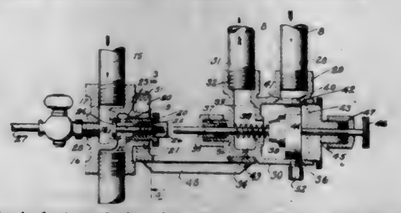
1. A fastener of the kind described, comprising an elongated body portion having open sleeves at one of its longitudinal marginal portions, said sleeves being oppositely arranged and separated by a space, a retainer clip at each side of said body portion having a sleeve at its end forming a hinge pivot and fitting into one of said open sleeves, each of said retainer slips having prongs on its inner face, and a spring for each of said clips to hold the same in closed position.

1,567,434. HAY LOADER. JOHN HENRY FLATLEY, Little York, Ill. Filed July 31, 1920. Serial No. 400,419. 3 Claims. (Cl. 56—27.)



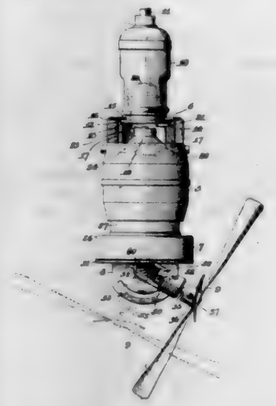
1. In an apparatus of the character described, in combination with a hay loading implement including elevating means and compressing means in the mouth of the elevating means, an attachment to connect the loader to a tractor to be pushed by the latter, and operating means to connect the elevating and compressing means of the loader with the tractor power.

1,567,435. FLUID-ACTUATED CONTROL DEVICE. FRANK A. GAUGER and ROY W. JOHNSON, Milwaukee, Wis., assignors, by mesne assignments, to Time-O-Stat Corporation, Milwaukee, Wis. Filed Feb. 14, 1921. Serial No. 444,944. 3 Claims. (Cl. 137—153.)



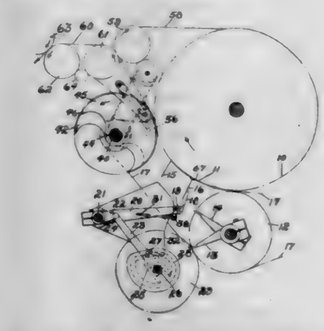
1. A device of the character described, comprising a casing having an inlet and an outlet, means connecting the inlet with a source of fluid, a plunger member mounted in the casing for movement to and from a position disconnecting the inlet and outlet, mechanical means normally urging the plunger member to a position with the inlet and outlet connected, and a plurality of ports interposed between the inlet and the interior of the casing, one of the ports communicating with the casing on the side of the plunger nearest the outlet and another of the ports communicating with the other side of the plunger, whereby an increase in the rate of flow of fluid beyond the capacity of the first port causes the excess fluid to exert a pressure against the other side of the plunger and move the same against the mechanical urging means to close the outlet.

1,567,436. ELECTRICAL FAN. CONRAD HAPP, Buffalo, N. Y. Filed Apr. 5, 1924. Serial No. 704,390. 18 Claims. (Cl. 230—1.)



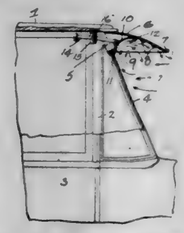
1. A device of the kind described having a nonrotatable motor, a connector on said motor for connection with a source of electrical energy, a fan adjustably connected with said motor, a support for said fan supported from the lower end of said motor, and means actuated by said motor for orbitally moving said fan.

1,567,437. BOTTOM CLOSURE FOR PAPER-BAG MACHINES. CARL H. HARTMAN, Toledo, Ohio, assignor to The Valve Bag Company of America, Toledo, Ohio, a Corporation of Ohio. Filed Jan. 23, 1924. Serial No. 687,990. 5 Claims. (Cl. 93—27.)



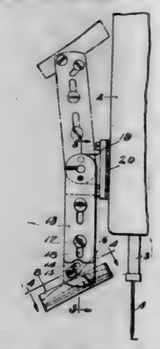
1. In a paper bag machine, bottom-closing means comprising separate members for folding the two flaps, a shaft upon which said members are mounted and driving connections for rotating said members about said shaft, said connections being arranged to rotate the rear valve-folding members more rapidly than the front valve-folding members.

1,567,438. VENTILATOR FOR MOVABLE CONVEYANCES. GUSTAVE O. HEINE, San Francisco, Calif. Filed Nov. 27, 1923. Serial No. 677,272. 3 Claims. (Cl. 296—94.)



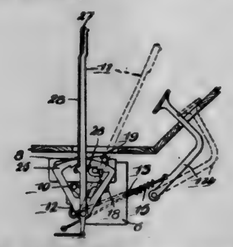
1. In apparatus of the class described a windshield having an opening therein; a visor projecting angularly from said windshield; and a plate, hingedly mounted along its bottom side in the opening in said windshield, and movable in cooperative relation to said visor.

1,567,439. ATTACHMENT FOR SEWING MACHINES. FRANK HEITZLER, Boston, Mass. Filed Sept. 20, 1924. Serial No. 738,835. 8 Claims. (Cl. 88—39.)



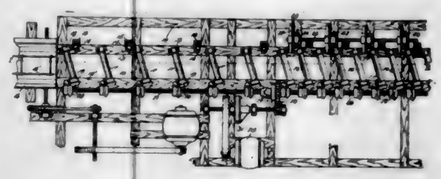
1. An attachment for sewing machines comprising an arm supporting a magnifying lens at one end, a pintle member projecting from the opposite end of the arm, and a bracket adapted to be secured to the machine frame having a bearing for the pintle, a spring tending to move the pintle axially of the bearing, the latter having spaced sockets in its end wall, and a pin projecting from the arm adjacent to the pintle and alternatively engageable with either of said sockets to hold the arm either in operative or inoperative position.

1,567,440. BRAKE-RELEASE MECHANISM FOR MOTOR VEHICLES. ARTHUR HIRSCHMAN, St. Paul, Minn. Filed Nov. 4, 1925. Serial No. 66,715. 6 Claims. (Cl. 74—39.)



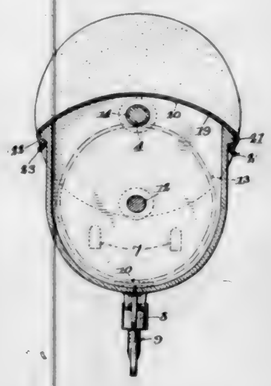
1. In a brake releasing device for a motor vehicle having transmission mechanism, a clutch lever and a brake normally in released position, said clutch lever being adapted to be moved to either operatively connect or disconnect the motor and transmission mechanism, means for maintaining said brake in applied position, and means for releasing said brake operable upon the movement of said clutch lever from disconnecting to connecting position.

1,567,441. DEBARKING MACHINE FOR LOGS. GUY C. HOWARD, Seattle, Wash. Filed Feb. 3, 1923. Serial No. 616,722. 3 Claims. (Cl. 144—208.)



1. A debarking machine for logs consisting in combination with supporting power actuated rolls arranged obliquely and in parallel to advance the log treated in oblique directions, each said roll being formed with a plurality of rossing edges, a plurality of guide disks mounted to rotate laterally of said rolls to engage and guide the log, and means on said disks to rotate the log.

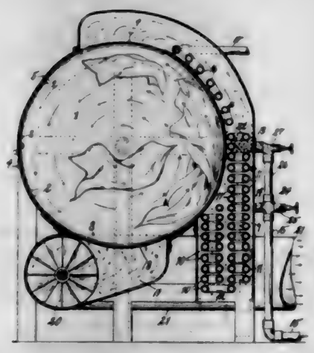
1,567,442. GRINDER. FRANK S. HYLAND, Milwaukee, Wis., assignor to Prairie du Chien Tool Co., Prairie du Chien, Wis., a Corporation of Wisconsin. Filed Mar. 24, 1920. Serial No. 368,225. 6 Claims. (Cl. 74—56.)



3. In a grinder, the combination of an integral gear casing having complete front and rear walls, and an open top, and a spring cap member for closing said open top.

1,567,443. ART OF AND MEANS FOR DEODORIZING FABRICS AND GARMENTS CLEANSED BY VOLATILE LIQUIDS. JOHN J. JENKINS, Los Angeles, Calif. Filed May 5, 1919. Serial No. 295,016. 3 Claims. (Cl. 34—5.)

2. In a deodorizing apparatus of the character set forth the combination with the heated air conduit, the heating coil therein, the live steam pipe for said coil, and a valve for controlling the flow of steam from the live steam pipe to the heating coil; of a pipe arranged in the conduit above the main portion of said heating coil and



provided with openings arranged to discharge steam across said conduit, and a valve connection between said steam pipe and the live steam pipe.

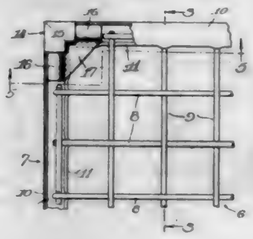
1,567,444. LIQUID-SOAP DISPENSER. HERMAN P. LEHMANN, Chicago, Ill., assignor to Antiseptol Liquid Soap Company, Chicago, Ill., a Corporation of Illinois. Filed May 5, 1919. Serial No. 294,849. 1 Claim. (Cl. 221—102.)

In a soap dispenser, in combination, a horizontally disposed barrel forming a receiving chamber and provided with an outlet passage extending laterally from the bore and terminating at the outer side of the barrel, an attaching element with which the barrel is associated and forming an inlet for the barrel, a plunger including a head arranged within the chamber in the barrel and a stem slidable in the bore for guiding the head and provided approximately medially of its ends with a reduced portion leaving spaced annular shoulders, the inner of which is normally arranged adjacent the inner edge of the passage, the inner portion of the stem of the plunger acting to normally close the bore and the passage, the head of the plunger upon inward movement being adapted to close the inlet to the chamber and to force liquid from the chamber about the reduced portion of its stem to its outermost annular shoulder and thence through the outlet passage, a compressible return spring arranged at the inner end of the chamber and coacting with the head of the plunger, the spring when fully compressed serving to limit the inward movement of the plunger and maintain the outermost shoulder adjacent the outer edge of the passage, and a finger piece on the outer end of the stem for facilitating the operation of the plunger.

1,567,445. REFRACTORY MATERIAL, ARTICLES MADE THEREFROM, AND METHOD OF MAKING THE SAME. SIMON J. LUBOWSKY, Jersey City, N. J., assignor to Metal & Thermit Corporation, Chrome, N. J., a Corporation of New Jersey. Filed Dec. 18, 1922. Serial No. 607,726. 8 Claims. (Cl. 25—156.)

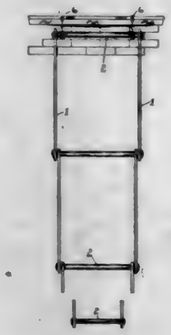
1. A material for use in making refractory, chemical resisting articles comprising calcined rutile with the particles in sintered union.

1,567,446. WIRE-MESH GUARD AND THE LIKE. EDWARD MCCLURE, Chicago, Ill. Filed Nov. 28, 1924. Serial No. 752,736. 2 Claims. (Cl. 189—70.)



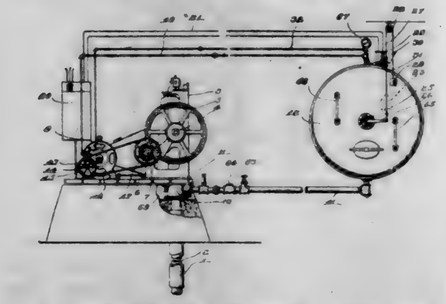
1. A wire mesh guard and the like, comprising a wire mesh fabric panel formed of kinked, interwoven wires, and a tubular border member therefor, in which the kinked end portions of the wires of the wire mesh panel are received, said tubular member having a lengthwise extending slit, the edges of which grip the wires and are held in intimate contact between the wires.

1,567,447. FOLDING LADDER. CHARLES C. MCCRACKEN, Bradner, Ohio. Filed Sept. 5, 1924. Serial No. 736,001. 1 Claim. (Cl. 228—38.)



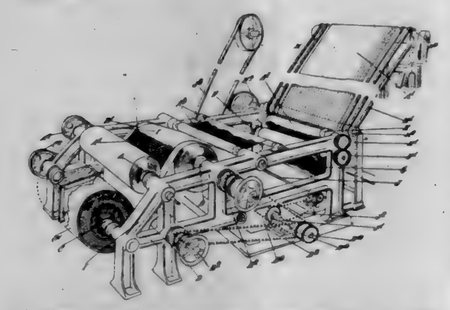
In a folding ladder, a plurality of pairs of links, each link having an opening at one end and each link except those of the lowermost pair having a slot extending substantially the length of the link, the ends of the rungs of the ladder secured in the said openings and extending through the said slots whereby the links of each pair are secured together by the rungs, the ends of the rungs slidably located in the slots, washers located on opposite sides of the links and bushings located in the slots for spacing the washers, whereby adjoining pairs of links are slidably connected together, a lug projecting from the end of each link other than the end in which the said opening is located whereby each rung is sustained a short distance from a plane extending through the ends of the lugs, means for connecting the pair of links at one end of the ladder to a part of the building, the said pair of links forming the upper end of the ladder, each pair of links having its upper ends disposed between the pair above whereby the thickness of the folded ladder will be the same as the width of the links and the ladder will be opened by its own weight, each pair of links sliding between the pair that is located above it when the ladder is opened.

**1,567,448. HYDROPNEUMATIC PUMPING SYSTEM.** WILLIAM A. MINOR, Rochester, N. Y., assignor to Luitweiler Pumping Engine Company, Rochester, N. Y., a Corporation of New York. Filed Feb. 14, 1925. Serial No. 9,113. 7 Claims. (Cl. 103—6.)



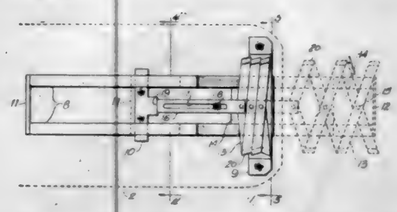
1. A pumping system comprising a closed tank, a water pump for supplying water to the tank, an air compressor for supplying air to the tank and normally open to the tank, automatic means for automatically cutting off the supply of air when a certain pressure is reached in the tank, a common power element for driving both the water pump and the air compressor, and automatic means controlled by the level of the liquid in the tank for controlling said power element.

**1,567,449. FEEDING APPARATUS FOR USE IN CONJUNCTION WITH CUTTING MACHINES.** WILLIAM BICCERSTAFFE MONK, Birmingham, England, assignor to The Dunlop Rubber Company, Limited, Regent's Park, London, England, a British Company. Filed Feb. 6, 1923. Serial No. 617,377. 11 Claims. (Cl. 242—58.)



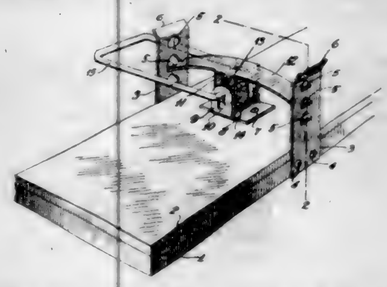
1. Apparatus for supplying sheet canvas or similar material to a cutting machine, comprising a single frame work for supporting a plurality of stock rolls and a plurality of lining rolls, one for each stock roll, means whereby each lining roll can be driven from its stock roll and also independently if desired, supporting means on which the rear end of the material unwound from one stock roll can be readily joined to the leading end of the material to be unwound from another stock roll, means whereby each stock roll when empty, together with its lining roll when full, can be removed and replaced by a full stock roll and an empty lining roll whilst the material is being drawn from the other stock roll and automatic means interposed between the stock rolls and a conveyor that supplies the material to the cutting machine, for controlling the unwinding of the stock material from either stock roll and ensuring a predetermined adequate supply of material at the position where it is taken up by the conveyor according to the requirements of the cutting machine.

**1,567,450. FLATIRON STAND.** ROBERT A. MORRISON, Portland, and FRANKLIN L. OSWALD, Gladstone, Oreg. Filed Aug. 5, 1925. Serial No. 48,318. 4 Claims. (Cl. 68—27.)



1. A flat iron stand comprising a support, lazy tongs having means at one end thereof for attachment to said support, the other end of said lazy tongs being adapted to be extended beyond said support to form a rest for a flat iron.

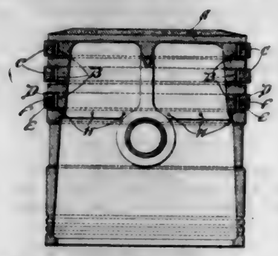
**1,567,451. TIE PRESS.** SOLOMON MOSSBACHER, New York, N. Y. Filed June 14, 1924. Serial No. 719,949. 1 Claim. (Cl. 100—57.)



A tie press embodying fixed and movable jaws, resilient anchor plates secured to the opposite edges of the fixed jaw and extending beyond the movable jaw and provided with shoulders, a clamping spring the opposite ends of which are adapted to engage with corresponding shoulders of the resilient anchor plates, a cam positioned between the clamping spring and the upper face of the movable jaw, and adapted to normally permit engagement of the spring with the shoulders of the anchor plates while said spring is free from tension, and a handle associated with the cam to rotate said cam and thereby place the spring under tension for the purpose of forcing the movable jaw in the direction of the fixed jaw, said anchor plates, by their inherent resiliency, serving to automatically compensate for the varying length of the spring when placed under tension and serving to thereby preclude inadvertent disengagement of the spring from the shoulders.

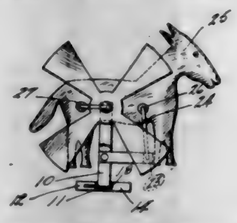
**1,567,452. PISTON AND PISTON RING.** ARDEN JOHN MUMMERT, University City, Mo., assignor to McQuay-Norris Manufacturing Company, St. Louis, Mo., a Corporation of Delaware. Filed July 23, 1925. Serial No. 45,628. 1 Claim. (Cl. 74—109.)

A piston ring comprising a resilient split band having a groove therein and also having one or more passages leading from the cylinder contacting face of said ring to the rear face thereof and positioned above said groove, the front wall of said groove meeting said cylinder contacting face to form a scraping edge adapted on the downward stroke of the piston with which said ring is used to scrape oil from the wall of the cylinder in which said piston reciprocates, said groove being constructed and arranged to collect the oil thus scraped from the cylinder wall on the downward stroke of said piston, and said passages being positioned and arranged to remove any accumulation of oil between said cylinder



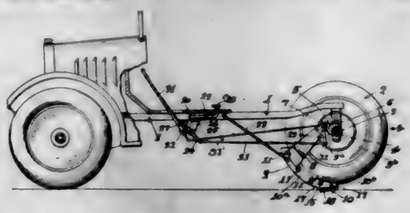
contacting face and said cylinder wall whereby said scraping edge will be maintained in operative position in engagement with said cylinder wall.

**1,567,453. OSCILLATING FIGURE FOR AUTOMOBILES.** LOUIE T. MURRAH, Dallas, Tex. Filed Dec. 30, 1922. Serial No. 610,033. 3 Claims. (Cl. 46—40.)



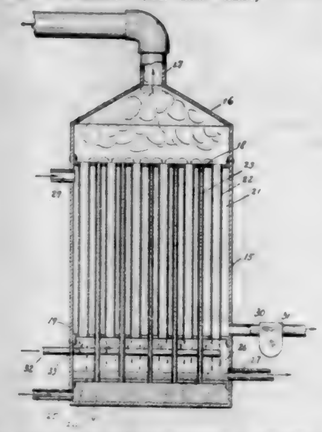
1. In an oscillating figure, a support comprising a vertical member having an arm support at one side thereof, a crank shaft pivoted upon the vertical member and provided with a wind wheel, a non-articulated figure at one side of said support having its body pivoted to the crank shaft to receive a rotary movement therefrom at one end, and a swinging arm upon the arm support spaced from said shaft and pivoted to the body of the figure for imparting an oscillating movement to the opposite end of the figure.

**1,567,454. ANTISKID BRAKE FOR VEHICLES.** CHARLES E. MURRAY, Los Angeles, Calif., assignor of one-half to John C. Nunnally, Los Angeles, Calif. Filed Dec. 27, 1923. Serial No. 683,023. 2 Claims. (Cl. 188—4.)



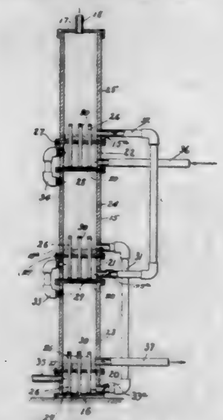
1. A drag-shoe for vehicles comprising in combination an axle, a wheel on the axle, a housing for the axle, an arm pivoted to the housing, a drag shoe rigidly attached to the arm, a rod connected to the arm, a lever to operate the rod and thereby swing the arm and shoe upward, a trip to engage the lever, means to disengage the trip and allow the shoe to drop by gravity to a position between the ground and the wheel, a projection on the lever and a brake lever engaging therewith to operate the lever.

**1,567,455. EVAPORATING STILL.** DANIEL L. NEWTON, Fullerton, Calif. Filed Aug. 7, 1922. Serial No. 580,269. 3 Claims. (Cl. 196—128.)



1. An evaporating still comprising a vertical casing, a lower, a middle and a top partition therein forming at the bottom an oil compartment, a residual oil compartment thereabove, a steam compartment above the residual oil compartment, and a vaporizing chamber at the top, a series of small bore pipes leading from the oil compartment to the vaporizing chamber, a series of large bore tubes leading from the vaporizing chamber to the residual oil compartment, a steam inlet to the residual oil compartment, means for feeding oil to the oil compartment, means for withdrawing the vapors at the top of the still, means for withdrawing the residual oil, and means for introducing a heating medium into the heating compartment.

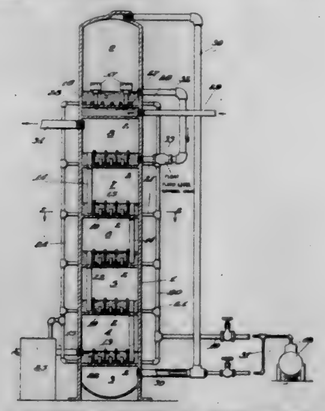
**1,567,456. ABSORPTION TOWER.** DANIEL L. NEWTON, Fullerton, Calif. Filed Aug 7, 1922. Serial No. 580,270. 2 Claims. (Cl. 261—21.)



1. An apparatus of the character described comprising a tank divided internally into a plurality of compartments, means for supplying a gas under pressure to one of the compartments, means for conducting the gas from said compartment successively through the other compartments, means for supplying an absorbing agent to one of the compartments and from the latter to the other compartments, and mixing units in said

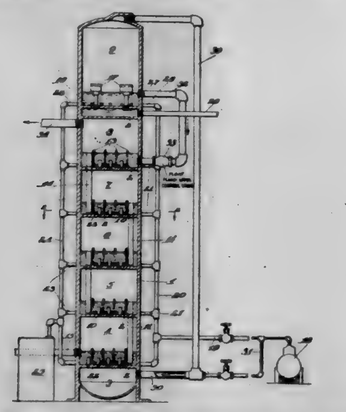
compartments, each mixing unit comprising a plurality of tubular members extending from one compartment to an adjacent compartment having ports arranged to utilize the pressure of the gas for moving the absorbing agent from the first compartment to the second compartment, and for intermixing the two.

1,567,457. PROCESS OF DISTILLING AND BLENDING HYDROCARBONS. DANIEL L. NEWTON, Fullerton, Calif. Filed July 19, 1924. Serial No. 726,985. 4 Claims. (Cl. 196—8.)



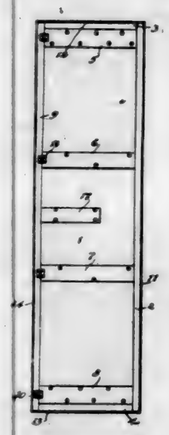
3. In a continuous process of distilling and blending hydrocarbons from an absorbing medium containing hydrocarbons from casing head gas in solution to produce a commercial stablized gasoline, the steps of partially distilling the medium, conducting the medium successively through a series of chambers in one direction, mixing steam with the distilled vapors and conducting the mixture under pressure through said chambers in the opposite direction, and causing a repeated intimate contact between the medium and the mixture whereby the hydrocarbons are distilled off and blended.

1,567,458. APPARATUS FOR DISTILLING AND BLENDING HYDROCARBONS. DANIEL L. NEWTON, Fullerton, Calif. Filed July 19, 1924. Serial No. 726,986. 7 Claims. (Cl. 196—8.)



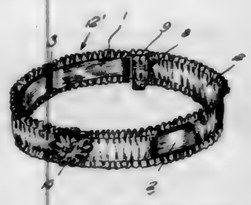
5. A distilling and blending apparatus for a continuous process to recover a stabilized gasoline from an absorbing medium containing considerable hydrocarbons suitable for motor fuel, comprising a heated distilling chamber provided with means for spraying the absorbing medium, a heated distilling and blending chamber having a perforated bottom, recirculation tubes over said perforations, said tubes being provided with spaced openings, means for conducting the absorbing medium from the distilling chamber to said distilling and blending chamber, means for conducting the hydrocarbon vapors from the distilling chamber to the bottom of said distilling and blending chamber, and means for introducing live steam to said vapor conducting means.

1,567,459. ADVERTISING FRAME. JOSEPH A. NUGENT, Winnipeg, Manitoba, Canada. Filed Apr. 28, 1925. Serial No. 26,534. 2 Claims. (Cl. 40—64.)



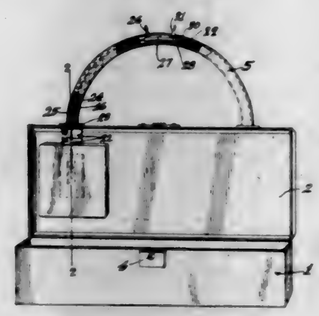
1. A display frame for pictures, advertising material, or such like, comprising a board, a side strip permanently secured to one side of the board and strips permanently secured to the ends of the board, a side strip pivotally attached to the other side of the board, a spring normally holding the latter strip closed, and moulding strips permanently secured to the side and end strips and having the inner edges overhanging the face of the board and with the inner corners thereof cut away to provide channels for receiving the edges of the picture or advertising material.

1,567,460. GARTER. HOWARD G. PARSONS, Washington, D. C. Filed Mar. 17, 1925. Serial No. 16,162. 1 Claim. (Cl. 24—6.)



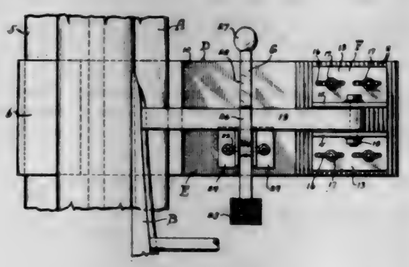
A garter comprising a leg encircling band adapted to surround and completely conceal the upper edge of a stocking, a pair of separate and independent stocking suspending devices attached at the inner face of said band to afford a positive connection between the band and the stocking, each device being of a length less than the width of the band, being attached to the latter in a manner to be completely concealed from view when connected with the stocking, and comprising a stud member and a seat member therefor, said stud member being directly outwardly toward the band.

1,567,461. LOCKED POCKETBOOK APPLIANCE. ALFRED W. PATTERSON, Los Angeles, Calif. Filed Sept. 14, 1923. Serial No. 662,643. 11 Claims. (Cl. 190—61.)



1. In a purse-retaining device, a catch secured within a receptacle and provided with releasing means operable from a distance, said releasing means comprising a flexible element extending through a flexible guide.

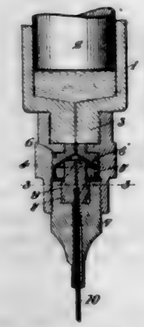
1,567,462. RAILROAD-SWITCH-POINT LOCK. JOSEPH F. PETERMAN, Superior, Wis., assignor of one-half to Raymond J. Heaney, Superior, Wis. Filed Apr. 28, 1925. Serial No. 25,404. 7 Claims. (Cl. 246—448.)



1. A switch point lock comprising a base plate, a locking bar pivotally carried by the base plate and adapted to have its free end movable into and out of abutting engagement with the inner face of the switch point, and a supplemental locking means associated with the locking bar for releasably retaining the bar in operative relation to the switch point.

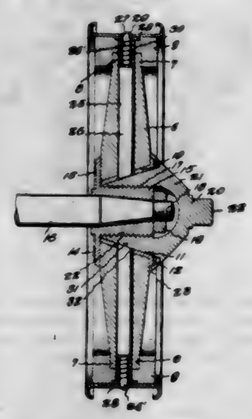
1,567,463. WASHERLESS REMOVABLE-TIP HYPODERMIC SYRINGE. FRANK L. PLATT, GEORGE N. HEIN, and ROBERT R. IMPEY, San Francisco, Calif. Filed Apr. 4, 1925. Serial No. 20,631. 5 Claims. (Cl. 128—221.)

1. A hypodermic syringe including a barrel provided with a discharge orifice formed at its end with a conical recessed seat; a needle having a base provided at its inner end with a portion of relatively soft metal having a transverse end face adapted for reception within said conical recessed seat; and means for connecting said



needle base and the barrel adapted for forcing the peripheral edge of said soft metal portion to a seat in the conical recessed end of the barrel.

1,567,464. WHEEL. FRANK RAIMER and MICHAEL ROMER, Adams, Mass. Filed Feb. 17, 1925. Serial No. 9,846. 2 Claims. (Cl. 301—28.)

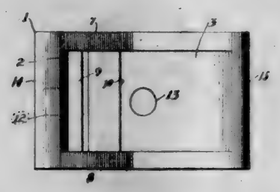


1. The combination with a vehicle wheel including a tapered hub sleeve, a plurality of radiating spokes associated with the hub sleeve, a felly carried by the spokes, and a rim detachably fitted upon the felly having sockets formed therein, of means for locking the rim upon the felly including a plurality of locking bars slidably associated with certain of the spokes and adapted to fit within the sockets formed in the rim, spring means engaging the locking bars normally urging the same out of engagement with the sockets, and means associated with the hub sleeve for synchronously adjusting the locking bars toward the rim against the tension of said spring means.

1,567,465. GROUSER. DOMINIC J. RIBISI, near San Jose, Calif. Filed Mar. 26, 1925. Serial No. 18,496. 1 Claim. (Cl. 301—44.)

A grouser comprising a casting having the following characteristics: base walls arranged at right angles to each other and curved to engage the perimeter of a wheel rim, side walls joining the base walls, the angle

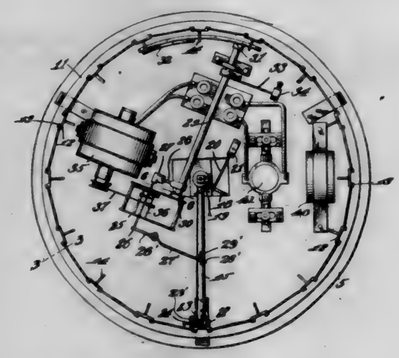
between the base walls and extending to both side walls being of increased thickness and forming shoulders extending transversely of said base walls, the said base



walls being provided with bolt holes adjacent to said shoulders whereby bolts placed therein will engage said shoulders and be held against rotation thereby.

---

1,567,466. CHANGEABLE EXHIBITOR. RAY D. ROBISON, ROLLAND J. CHRISTMAN, and GROVER E. SWIGART, Bryan, Ohio. Filed July 10, 1922. Serial No. 573,824. 1 Claim. (Cl. 88—27.)



A changeable exhibitor including a base, a rotatable plate supporting carriage mounted on the base, inwardly extended pins arranged adjacent to the lower edges of the plates supported by the carriage, an operating mechanism including a rotatable arm, an arm pivotally connected with the first mentioned arm and having a hook portion formed at one end thereof, a pivoted arm, said hook portion of the first mentioned pivoted arm adapted to embrace a portion of the last mentioned arm to move the last mentioned arm in one direction, means for returning the arm to its initial position, and a pivoted member at the outer end of the second mentioned pivoted arm for engaging the pins to move the rotatable plate supporting carriage.

---

1,567,467. STICK-DISPENSING DEVICE FOR SOAP AND THE LIKE. JACQUES ROCHEROLLES, Paris, France, assignor to La Societe Parfumerie Roger & Gallet Siege Social, Paris, France. Filed Mar. 30, 1925. Serial No. 19,386. 2 Claims. (Cl. 206—56.)

1. A stick-dispensing device, comprising a tubular case having an open end and formed adjacent such end with a circumferential recess which is disposed transverse to the axis of the case; a stick holder slidable axially within said case toward and from its open end; and a follower secured to the bottom of the holder and provided with a plurality of spring arms, the terminals of which frictionally engage the inner surface of the wall of the case and are normally flexed in one direction consequent upon such engagement to maintain the holder in place and prevent it from moving backward, but which are adapted to snap into said recess on reaching the same;

the recess and spring arms being so constructed that when the terminals of said arms are received in said recess, the said arms may be flexed in the reverse direction to enable the backward movement of the holder.

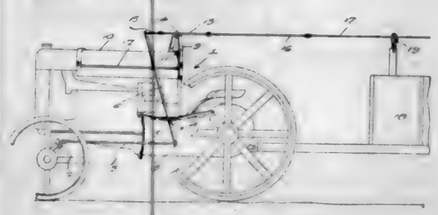
---

1,567,468. CLIP FOR RUBBER-HOSE JOINTS. ALBERT JACOB RUSSELL, Johannesburg, South Africa. Filed Feb. 21, 1924. Serial No. 694,395. 2 Claims. (Cl. 24—19.)

1. A hose clip formed from a single piece of sheet metal and having at one end a band portion of ribbon-like formation, an elongated head formed on one terminal of the band and provided at its central portion with a slot, tongues projecting laterally from the end of the head remote from the band, said head being doubled and bent to form spaced hinge barrels, said tongues being bent over the portion of the head adjacent the band to retain the extremity of the head in bent position, the slot affording space for admission of the end of the band between the sides of the head.

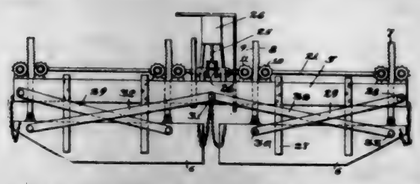
---

1,567,469. TRACTOR STEERING DEVICE. JOHN A. SCHMIDT, Enid, Okla. Filed July 2, 1925. Serial No. 41,129. 3 Claims. (Cl. 180—77.)



1. A tractor steering device, comprising in combination with the usual drag link of a tractor steering gear, a vertically disposed lever pivotally supported adjacent its lower end on the side of the tractor, the lower end of said lever being connected to the rear end of the drag link, a bracket straddling the rear portion of the fuel tank, a horizontally disposed cross bar pivotally supported intermediate its ends on said bracket, one end of said cross bar being connected to the upper end of the vertically disposed lever, and an actuating means associated with the opposite end of the cross bar, said actuating means extending rearwardly from the tractor and being controlled from a point remote thereof.

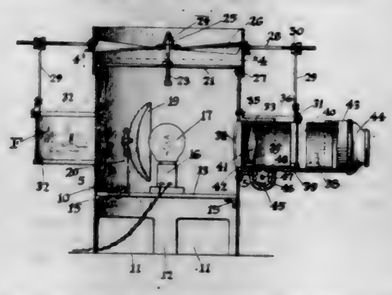
1,567,470. WAVE MOTOR. THOMAS H. SETTLE, San Fernando, Calif. Filed Jan. 30, 1922. Serial No. 532,882. 3 Claims. (Cl. 253—5.)



1. In a wave motor, a platform, a plurality of floats arranged end to end beneath said platform, crossed links connecting each float to the platform limiting longitudinal movement of the floats relative to the platform, toothed bars pivoted to the floats extending upwardly and adapted to reciprocate on vertical movement of the floats relative to the platform, and means for transmitting the movement of the bars.

---

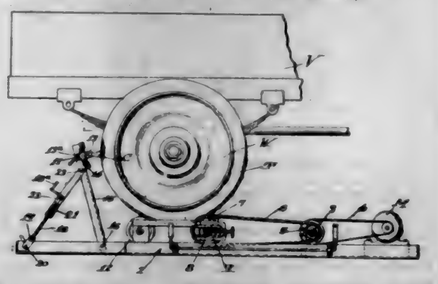
1,567,471. ADVERTISING DEVICE. WALTER L. SKEEN, Los Angeles, Calif. Filed Oct. 13, 1924. Serial No. 743,328. 5 Claims. (Cl. 88—27.)



1. An advertising device comprising a tubular support, a light mounted within said support, a reflector associated with said light, a pair of lenses adjustably mounted upon the side of said support through which said reflector is adapted to direct light, a fan pivoted upon said support adapted to be actuated by the ascending heated air within said support, and a circular film carried by said fan adapted to pass between said lenses.

---

1,567,472. SOLID-TIRE FACER AND GROOVER. BRUCE E. SKILES, Santa Ana, Calif. Filed Dec. 13, 1923. Serial No. 680,457. 1 Claim. (Cl. 82—4.)



A solid tire facer and groover comprising a bed frame, a motor mounted on one end of the bed frame, a cross shaft mounted on the bed frame substantially half way between the motor and the center of the frame, means for connecting the motor to the cross shaft, a counter-shaft mounted on the bed frame near its center, means for connecting the cross shaft to the counter-shaft, a roller on the counter-shaft, a second roller parallel with the first roller and spaced therefrom and mounted on the bed frame, said rollers being adapted to receive and rotatably support a tire to be operated upon, a pair of arms pivotally connected to the bed frame and extending upwardly, a slide mounted upon the upper ends of the arm and adapted to move transversely, a screw for operating the slide, a cutter carried by the slide and adapted to engage the rotating tire, and a jack screw connected to the bed frame and to the upper parts of the arms for swinging the arms to move the cutter to or from the tire.

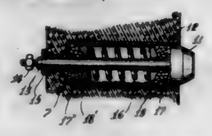
---

1,567,473. LOG UNLOADER. WYATT C. STARR, Lake Wales, Fla. Filed Aug. 22, 1925. Serial No. 51,781. 2 Claims. (Cl. 214—44.)

1. In a log unloading device, a skidway, skidding members movable longitudinally of the skidway, said skidding members including spaced arms arranged at the ends thereof, rollers mounted between the arms, pivoted log engaging members carried by the spaced arms, and means for moving the skidding members.

---

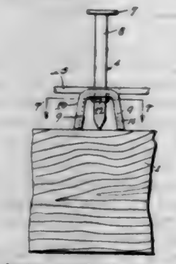
1,567,474. ELECTRIC COUPLER. CHARLES H. TOMLINSON, Mansfield, Ohio, assignor to The Tomlinson Coupler Company, Mansfield, Ohio, a Corporation of Ohio. Filed June 15, 1921. Serial No. 477,682. 9 Claims. (Cl. 173—332.)



1. An electrical contact comprising an insulating mounting having a recess, a single contact member mounted in the recess and extending through the insulating member mounting, packing means surrounding the contact member within the recess and resilient means within the recess and acting upon the packing means to urge it into engagement with the contact member.

---

1,567,475. WIRE FASTENER. GEORGE F. VOIGHT, Oakland, Calif. Filed Mar. 9, 1925. Serial No. 14,175. 7 Claims. (Cl. 72—118.)

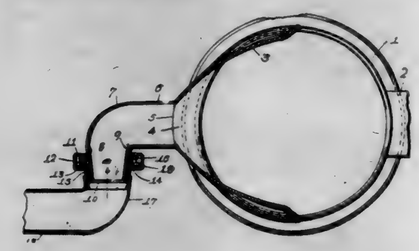


1. In a wire fastener of the character described, a furring element formed of a strip of flat metal and having its ends bent downwardly, thereby forming an intermediate body portion having at each end a downwardly projecting supporting leg, an upwardly struck marginal

flange on each side of said legs and body portion, said body portion provided with an opening, and a fastening element projecting through said opening and between said legs.

---

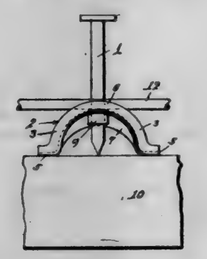
1,567,476. FILLING CAN. GEORGE F. VOIGHT, Oakland, Calif. Filed Mar. 23, 1925. Serial No. 17,639. 8 Claims. (Cl. 221—26.)



1. The combination with the drain funnel of a filling can of the class described, said drain funnel having a converging portion disposed above said can and projecting a distance beyond the front side thereof, of a discharge spout having one end rigidly secured to the apex of said converging portion, the opposite end of said spout being curved around to one side to form a side outlet portion therefor, said outlet portion tapering towards its free end, a delivery spout having one end curved around to one side to form a side intake portion, said intake portion diverging towards its free end, said intake portion rotatably mounted on said outlet portion, and a spring for holding said outlet and intake portions in relative rotatable engagement, said delivery spout operatively swingable along one side of said drain funnel.

---

1,567,477. WIRE FASTENER. GEORGE F. VOIGHT, Oakland, Calif. Filed June 22, 1925. Serial No. 38,817. 8 Claims. (Cl. 72—118.)

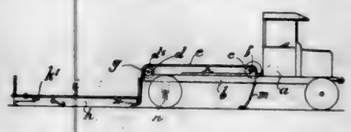


1. A wire fastener comprising, an oblong strip of sheet metal bent intermediate its ends to form an arch, a downwardly projecting flange on one side edge thereof, an upwardly extending flange on the opposite side edge, and a nail projecting vertically through said arch between said flanges.

---

1,567,478. LOADING DEVICE FOR VEHICLES. EUGENE VONNEZ and CHARLES JAQUEMOT, Geneva, Switzerland. Filed Mar. 11, 1921. Serial No. 451,430. 9 Claims. (Cl. 244—65.)

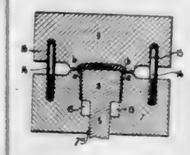
1. A loading device for vehicles, comprising a vehicle frame, a winch mounted on the frame, a guide roller mounted on the rear of the frame, an interchangeable loading bridge wholly independent of the vehicle, two cables cooperating with the bridge and actuated by the winch, one cable being operable to move the bridge from the ground to a position on the frame, and the other cable being operable to move the bridge from the frame to the ground, a guide pulley on the rear end of the frame, a single contact member on the center front of



the bridge, the single contact member and guide pulley contacting before any other portion of the bridge touches the vehicle frame, upon the bridge being brought onto the frame.

---

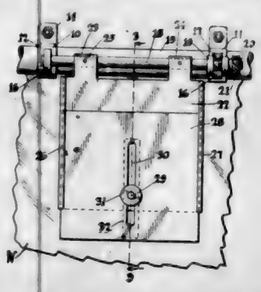
1,567,479. VULCANIZING MOLD FOR RUBBER FOOTWEAR. DIRK FRANS WILHELMI, Doorwerth, near Arnhem, Netherlands, assignor to Vereenigde Nederlandsche Rubberfabrieken, Heveadorp, Netherlands, a Dutch Company. Filed Aug. 13, 1924. Serial No. 731,860. 3 Claims. (Cl. 18—56.)



2. A method of manufacturing rubber footwear which consists in first vulcanizing the article under pressure in a mold comprising an upper-mold, a sole-mold and a last for supporting the article, the matrices of the mold sections being so formed that their walls, starting from the plane of junction of said sections, slope more or less inwardly, and thereafter subjecting the article to an after-cure on a last presenting the desired final form.

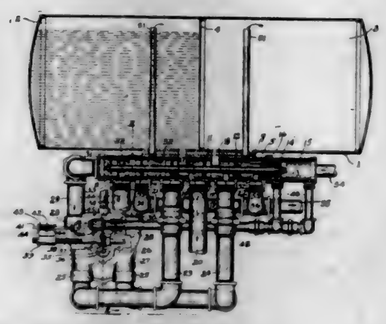
---

1,567,480. GLARESHIELD FOR MOTOR VEHICLES. IRA C. WOOD, South Pasadena, Calif., assignor of three-fourths to Wilson M. Hunt, Fullerton, Calif. Filed Aug. 28, 1924. Serial No. 734,620. 2 Claims. (Cl. 296—97.)



1. A glare shield comprising a section of opaque material, spindle means for pivotally securing said section to a windshield sash, whereby said section may be held parallel to said sash or held at right angles thereto by means of the spindle adjustment, a second section slidably mounted upon the first mentioned section, a bolt secured to said first section, a slot in the second section through which the bolt extends, a thumb nut adapted to be screwed upon said bolt thereby holding said second section in a given position with respect to the first section, and a strip of material secured upon the back of said second section adapted to cover said slot.

1,567,481. STEAM TRAP. LLEWELLYN S. WOODHULL, Detroit, Mich. Filed Nov. 26, 1923. Serial No. 676,916. 15 Claims. (Cl. 137—101.)

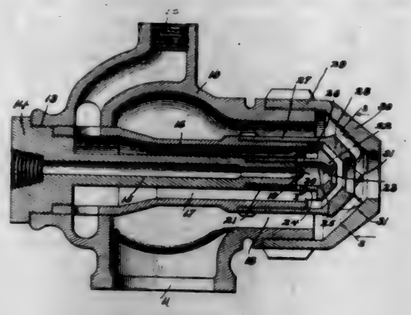


1. A steam trap comprising a chamber, means for delivering water of condensation to and for withdrawing it from said chamber, means for delivering steam to and for withdrawing it from said chamber, a piston valve directly controlling the water delivery and withdrawal, a piston valve directly controlling the steam delivery and withdrawal, a common cylindrical casing in which said valves are mounted, means connecting said valves for reciprocation in unison, and means exterior to said chamber controlling the travel of said valves.

13. A steam trap comprising a chamber, means for delivery water to and withdrawing it from said chamber, means for delivering steam to and withdrawing it from said chamber, means for applying steam to control the water and steam connections to said chamber in common, and hydraulic means arranged exteriorly to said chamber controlling such application of steam.

---

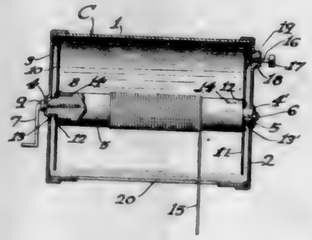
1,567,482. FUEL BURNER. ALFRED R. ANTHONY, Fort Pierce, Fla. Filed Dec. 10, 1919. Serial No. 343,701. Renewed Mar. 2, 1925. 14 Claims. (Cl. 158—76.)



14. In a fuel oil burner, in combination, an oil supply tube, means for atomizing the oil and discharging it in the form of a conical sheet, said means including a cap having an outer surface in the form of a frustrum of a cone coaxial with said conical sheet and having a central aperture in its end, a second cap having an inner conical surface coaxial with the outer conical surface of said first cap and spaced therefrom, thereby forming a conical passage between said caps, and vanes on the outer conical surface of said first cap inclined at a slight angle to the elements thereof, said vanes extending from one base to the other of the frustrum, and the tips of the vanes adjacent the aperture lying approximately in a conical surface.

---

1,567,483. CHALK-LINE REEL. FRANCIS R. BEAR, Redlands, Calif. Filed Nov. 30, 1923. Serial No. 677,800. 2 Claims. (Cl. 242—97.)



1. A reel comprising a cylindrical body, end plates having flanges engaging said cylindrical body, there being depressions formed in said ends plates, a spindle disposed within said body upon which a line may be wound, said spindle having reduced ends providing shoulders adjacent the ends of the spindle, the reduced ends being rotatable within said depressions, discs mounted upon the reduced ends and secured against said shoulders, a headed pin extending through one of the end plates into an end of the spindle, and a crank extending through the other end plate into the other end of the spindle, there being a slot formed longitudinally of said body through which the line may pass.

---

1,567,484. PORTABLE TOILET. HERBERT A. BEARD, Rochester, N. H. Filed Oct. 27, 1924. Serial No. 746,207. 4 Claims. (Cl. 155—51.)

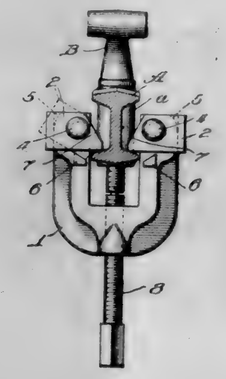
1. In a device of the character described, a seat member having a substantially central opening, said member being provided with a peripheral flange, said flange being extended inwardly at intervals to form spaced parallel members, legs arranged between said parallel members and pivotally connected thereto, and means for locking said legs in operative positon.

---

1,567,485. TOOL FOR REMOVING SPRING SUPPORTS ON AXLES. HERBERT A. BEEKMAN, Chicago, Ill., assignor to Zim Manufacturing Company, a Corporation of Illinois. Filed June 10, 1925. Serial No. 36,212. 2 Claims. (Cl. 29—85.)

1. A device of the character described, comprising a U-shaped yoke, a U-shaped dog embracing the free end of each arm of the dog with its open side directed inwardly, the dogs being pivoted to swing about axes at right angles to the plane of the yoke, stops to limit the downward movement of the inner ends of the dogs, the closed ends of the dogs cooperating with the arms on which they are mounted to limit the upward swinging move-

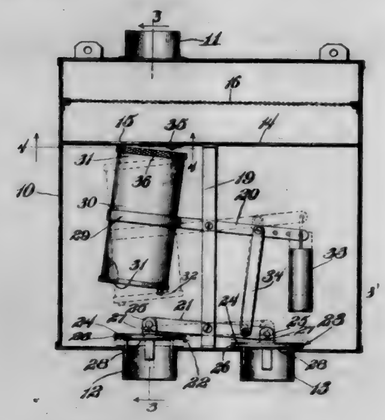
ments of the dogs to positions in which the dogs lie at right angles to said arms and project into the space between the arms, the inner ends of the dogs being shaped



to lie approximately in line with the inner faces of said arms when the dogs are engaged with said stops, and a screw extending through the closed end of the yoke between and parallel with the arms thereof.

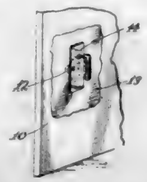
---

**1,567,486. SEPARATOR ATTACHMENT FOR CISTERNS.** SANFORD C. BRADY, Bartlesville, Okla. Filed Mar. 3, 1925. Serial No. 13,000. 8 Claims. (Cl. 137—9.)



1. In a separator attachment for cisterns, a casing having an inlet opening and a pair of outlets, valves controlling said outlets and connected for opposite operation whereby one of the valves opens as the other valve closes and operating mechanism for said valves including a counterbalanced container having a leak port whereby it is normally empty and of insufficient weight to overbalance its counterweight, said container when overbalanced by the counterweight only partially underlying said inlet opening to receive water passing therethrough and after overbalancing its counterweight receiving substantially all of the water passing trhough said opening.

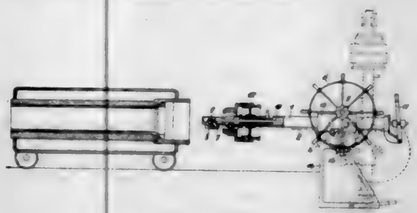
**1,567,487. METHOD OF APPLYING COLORS TO PLASTIC COMPOSITIONS.** GEORGE W. BROCKUS, Alhambra, Calif. Filed Aug. 24, 1925. Serial No. 52,151. 4 Claims. (Cl. 18—61.)



1. The method of applying colorings, designs and the like to plastic compositions, which consists of placing green or unset material to the surface of the composition before it is set, positioning a layer of foraminous material thereover, troweling over the layer, and removing the layer.

---

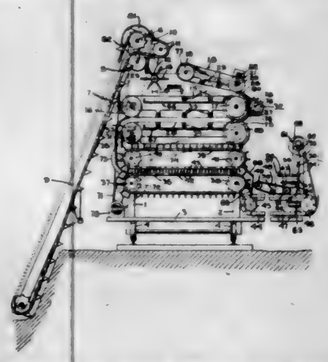
**1,567,488. CENTRIFUGAL CASTING MACHINE.** HEINRICH BURCHARTZ, Gelsenkirchen, Germany, assignor to Gelsenkirchener Bergwerks-Aktiengesellschaft, Gelsenkirchen, Germany. Filed Jan. 29, 1925. Serial No. 5,517. 5 Claims. (Cl. 22—65.)



1. The combination with a centrifugal casting machine, of means movable axially thereof for inserting cores into said machine, and removing them therefrom, said means being movable transversely to said axis for mounting said core on said inserting means and removing said core therefrom.

---

**1,567,489. PROCESS AND APPARATUS FOR PRODUCING COMPRESSED PEAT.** JOHN S. BURT, Walpole, Mass., assignor, by mesne assignments, to Field Security Company, Boston, Mass., a Corporation of Maine. Filed Oct. 18, 1923. Serial No. 669,256. 18 Claims. (Cl. 44—28.)

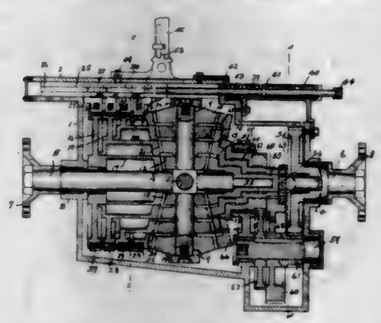


1. The process of condensing raw peat freshly taken from a bog which consists in continuously moving the peat directly when taken from the bog and without

substantially destroying its normal fibrous composition, and gradually expressing the water therefrom by progressively increasing pressure applied thereto to produce a partially dehydrated sheet.

---

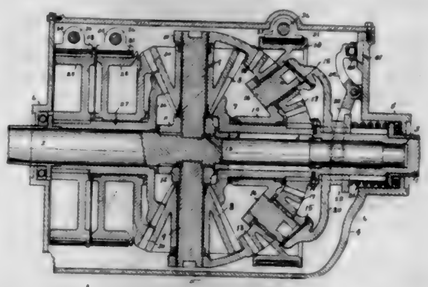
**1,567,490. TRANSMISSION MECHANISM.** NICK G. CEDILLO, Houston, Tex., assignor of one-fourth to E. E. Dowdell, Harris County, Tex. Filed Aug. 21, 1922. Serial No. 583,103. 3 Claims. (Cl. 74—34.)



1. A transmission mechanism including a driving member, a driven member, a gear frame fixed to one of said members and including radial bearing pins and a band secured to said pins, a plurality of trains of normally idle gears connected to one of said members, the gears of each train being constantly in mesh and one gear of each train being mounted on one of said pins and means through which a selected gear of each train may be alternatively held against rotation, relative to the other member, and driving connection thereby established between said members, said means including brake mechanisms, and a shiftable bar, under the control of the operator, for controlling said mechanisms.

---

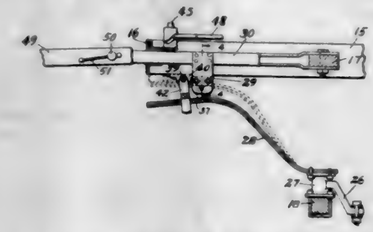
**1,567,491. TRANSMISSION MECHANISM.** NICK G. CEDILLO, Houston, Tex. Filed Jan. 17, 1924. Serial No. 686,701. 4 Claims. (Cl. 74—34.)



1. A transmission mechanism including a driving member, a driven member, an annular member fixed on the driven member, a pinion mounted to rotate on a radial axis, on said annular member, a plurality of bevel gears loosely mounted on said driven member, a bevel gear fixed on said driving member and in mesh with said pinion, brake mechanism associated with said respective loosely mounted bevel gears through which the same may be locked against rotation, and released, alternatively, a train of gears operatively connecting the driving member with said annular member, a loosely mounted carrier on the driving member on which one gear of said train is mounted to rotate, brake mechanism associated with said carrier through which the same may be locked against rotation and released, means for locking said carrier to rotate with the driving member, and means for releasing said locking means.

---

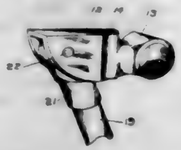
**1,567,492. DRAFT AND STEERING RIG FOR TRAILERS.** EARL R. CLAYTON and CORWIN R. WELCH, Los Angeles, Calif. Filed Aug. 11, 1922. Serial No. 581,145. 7 Claims. (Cl. 280—33.55.)



1. In combination, a vehicle including wheels capable of being steered, steering mechanism for the wheels including a yielding tongue, a draw bar pivoted on the vehicle, and manually operable means for rigidly connecting the resilient member to or disconnecting the same from said draw bar.

---

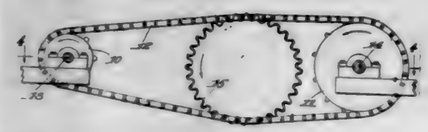
**1,567,493. COLLAPSIBLE AUTO AND PORCH BED.** WALLACE ROBB DOUGLAS, Crete, Nebr., assignor of one-half to William H. Douglas, Crete, Nebr. Filed Mar. 14, 1928. Serial No. 625,121. 2 Claims. (Cl. 5—112.)



1. A corner construction for collapsible beds including a casting which is adapted to be secured to an end rail of the bed at the extremity thereof, and a second casting secured to said first casting by a vertical pivot, said second casting being provided with a horizontal socket for receiving the extremity of a side rail, the socket being offset vertically whereby the reversal of said second casing on the two sides of the bed will position the side rails of the bed at different levels so as to afford clearance between the side rails when collapsing the bed.

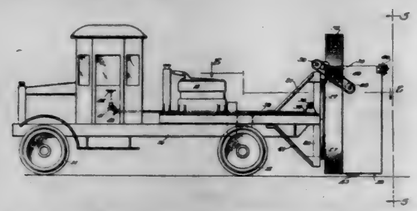
---

**1,567,494. CHAIN DRIVE.** EMERY H. FAHRNEY, Chicago, Ill. Filed July 21, 1922. Serial No. 576,588. 14 Claims. (Cl. 74—31.)



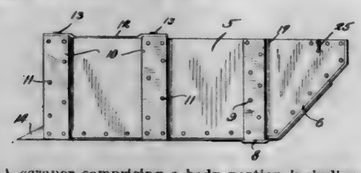
1. In combination, a flexible driving element, and a floating annular element having inherent resiliency, said floating element engaging with the driving element for maintaining the latter taut.

1,567,495. SNOWPLOW. EMERY H. FAHRNEY, Chicago, Ill. Filed Nov. 24, 1924. Serial No. 751,988. 16 Claims. (Cl. 37—43.)



1. A snow plow including a supporting structure, means for propelling the same, a casing having a snow inlet and a discharge outlet, a rotor in the casing, means mounting the casing for vertical and axial adjustments with respect to the said structure, and means for vertically adjusting the casing.

1,567,496. DRAG-LINE SCRAPER. JOHN J. FITZGERALD, Stapleton, N. Y. Filed Sept. 1, 1925. Serial No. 53,883. 5 Claims. (Cl. 37—147.)

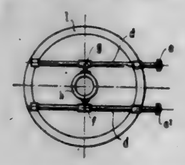


1. A scraper comprising a body portion including angle bars, side members secured to the angle bars, inverted U-shaped members secured to the side members, means for holding the inverted U-shaped members in spaced relation with each other, teeth secured to the forward ends of the angle bars, and a wall for closing the rear end of the body portion.

1,567,497. LIQUID WAX FOR THREADS. JOE FRY, Canton, Miss. Filed Jan. 27, 1925. Serial No. 5,144. 1 Claim. (Cl. 134—13.)

A liquid wax comprising the following: Shoemaker's prepared machinery wax, 70 parts; boiled linseed oil, 20 parts; banana oil 5 parts and oil of sassafras 5 parts.

1,567,498. SHOOTING GLASSES FOR MARKSMEN. EMIL GAUGLER, Bellach, Switzerland. Filed Mar. 30, 1925. Serial No. 19,512. 3 Claims. (Cl. 88—41.)



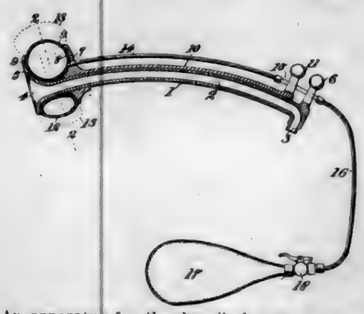
1. In shooting-glasses and in combination a frame with bows, two parallel screw spindles mounted rotatably to said frame, handles adapted to move said spindles independently from each other, slides fitted to said spindles and a tube containing the dioptrics hinged to said slides at points diametrically opposite each other and so as to hold the tube at two points set at a certain distance from each other for the purpose set forth.

1,567,499. STENOGRAPHIC MACHINE. MARC GRANDJEAN, Paris, France. Filed Jan. 6, 1923. Serial No. 611,093. 2 Claims. (Cl. 197—133.)

1. In a supporting device for the bobbin of a stenographic machine, the combination with a bobbin shaft, of two arms swingable about a common axis, each arm having a longitudinally extending notch to engage said

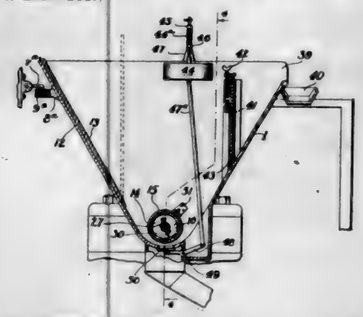
shaft, and a lever pivoted to each arm and having a transversely extending notch formed therein to engage the shaft while the latter occupies the notches of said arms.

1,567,500. APPLIANCE FOR USE BY ANÆSTHETISTS. GEORGE N. HEIN, San Francisco, Calif. Filed May 16, 1924. Serial No. 713,753. 4 Claims. (Cl. 128—208.)



1. An apparatus for the described purpose comprising an inflatable means for positioning through the oral cavity for engaging the walls thereof to interrupt communication between the oral and nasal cavities and the esophagus and the tracheal orifices, and means comprising opposing wall members between which said inflatable means is positioned for limiting the distortion of said means in opposite directions with its periphery free for distortion, and a tube extending laterally from said inflatable means and providing artificial breathing communication between the atmosphere and a point in rear of said means.

1,567,501. MIXER FOR OIL-FLOTATION APPARATUS AND THE LIKE. JOHN HERMAN, Los Angeles, Calif. Filed Apr. 12, 1923. Serial No. 631,529. 17 Claims. (Cl. 209—168.)



1. An apparatus for the treatment of ores by flotation comprising a basin, an apertured pipe adapted to be axially rotated within said basin means for admitting a fluid to said pipe so as to be discharged into the basin through the apertures therein, and a blade adapted to engage the exterior surface of said apertured pipe.

1,567,502. SHOCK ABSORBER. ROY L. HERNDON and ARTHUR W. HERNDON, Pocahontas, Va. Filed Nov. 4, 1924. Serial No. 747,789. 3 Claims. (Cl. 188—88.)

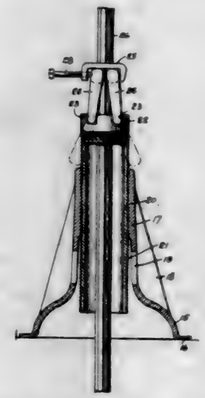
1. A shock absorber for automobiles comprising a fluid containing cylinder, means associated with the lower end of the cylinder for attaching the same to the axle of the automobile, a piston operable in the cylinder, the bottom thereof being provided with by-passes, a piston rod extending through the top of the cylinder and secured at its lower end to said piston, the upper end of the piston rod being secured to the frame of the automobile, a normally closed valve in the bottom of the piston, said valve comprising a ring threaded into a central opening provided in the bottom of the piston, a valve stem extending centrally through the ring, a valve carried by the upper end of the valve stem, the upper edge of the ring providing a valve seat for cooperation with the valve, and means associated with the valve stem at its lower end for normally holding the valve in engagement with the valve seat.

1,567,503. POWDER PUFF. GEORGE S. HERSHEY, Los Angeles, Calif. Filed Aug. 28, 1924. Serial No. 734,633. 9 Claims. (Cl. 132—78.5.)

1. A powder puff having an opening formed therein, said powder puff having two pieces of material extending through said opening into the interior of the puff providing a self-closing means permitting the powder to be inserted into the puff and normally keeping the opening closed.

1,567,504. DRILL PULLER. GRANT HINMAN, Clarkdale, Ariz. Filed Nov. 22, 1924. Serial No. 751,649. 6 Claims. (Cl. 254—29.)

1. A drill puller comprising a stationary element, a rotatable element, coacting means connecting the elements to cause vertical movement of the rotatable element when the latter is rotated on the stationary element, and means for securing a drill rod to the rotatable element so that when the drill rod is rotated, rotation of the rotatable element is effected, said means comprising identical



gripping members pivoted on the rotatable element, and means removable from said members and adapted to force same into clamping engagement with said drill rod.

1,567,505. METHOD OF MAKING CHAINS. MORRIS P. HOLMES, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Dec. 15, 1919. Serial No. 344,947. 7 Claims. (Cl. 59—84.)

1. The method of making body sections for sectional chain links which consists in milling longitudinally and transversely one side of a solid body section to form longitudinally disposed oppositely extending tongues.

1,567,506. METHOD OF UNIFORMLY AND INTIMATELY MIXING MATERIALS WITH RUBBER LATEX. ERNEST HOPKINSON, New York, N. Y. Filed Oct. 16, 1922. Serial No. 594,086. 3 Claims. (Cl. 106—23.)

1. A method of mixing rubber with materials insoluble in water but soluble in organic solvents, comprising dissolving such materials in an organic solvent, forming a water emulsion of such solution, mixing the same with rubber latex, and then depriving such mixture of substantially all its liquid content.

3. A method of mixing rubber with other materials which consists in forming a water emulsion of liquid material non-miscible with water, dissolving other materials in an organic solvent and forming an emulsion thereof, making a water suspension of finely divided solid particles, mixing said emulsions and suspension with rubber latex, and depriving such mixture of substantially all its water content.

1,567,507. TOOTHBRUSH. ANDREW ANTHONY HOWARD, Chicago, Ill. Filed Jan. 12, 1925. Serial No. 1,986. 1 Claim. (Cl. 15—176.)

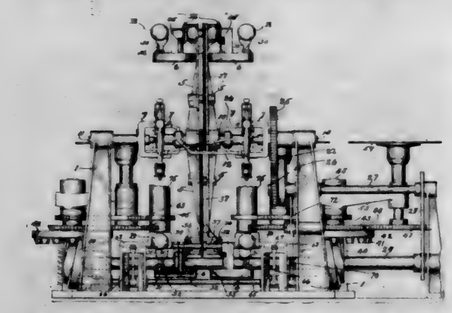
A tooth brush of the character described comprising a handle member and a head portion, said handle member being formed with a neck portion intermediate the

head and the body of the handle, a replaceable bristle bearing member of resilient material having a rearwardly extending relatively thin flexible portion, said head member having a dovetailed recess therein terminating at its lowermost end in a neck portion, said neck portion beyond the termination of the dovetailed recess being recessed throughout its width providing a shoulder,

whereby said bristle bearing member may be projected longitudinally into said dovetailed recess and said flexible longitudinally extending portion may engage with said shoulder to lock said bristle bearing member in said dovetailed recess, and whereby the bristle bearing member may be removed by bending said flexible portion out of engagment with the shoulder.

---

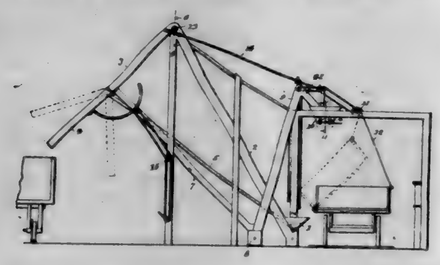
1,567,508. MACHINE FOR COATING ARTICLES. HIRAM N. HYDE, Providence, R. I., assignor to St. Mungo Manufacturing Company of America, Newark, N. J., a Corporation of New Jersey. Filed Apr. 24, 1923. Serial No. 634,244. 16 Claims. (91—45.)



1. In a coating machine, means for holding an article to be coated, a coating device and means for moving the article and the coating device in the same plane in arcuate parallel paths.

---

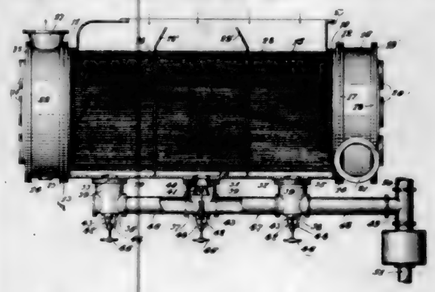
1,567,509. BEET-LOADING MACHINE. HARVEY E. JACKSON, Idaho Falls, Idaho. Filed Sept. 20, 1922. Serial No. 589,459. 2 Claims. (Cl. 209—241.)



1. In a machine of the class described, the combination with a source of supply; of a hopper, an upwardly inclined conveyor leading therefrom, a screen supported in the frame of said conveyor immediately below the latter, a chute leading downwardly from the upper end of said conveyor, a portion of said chute being screened, a second chute disposed below said conveyor and the first mentioned chute to receive the contents screened therefrom, and means for conveying the contents of the last mentioned chute to the source of supply.

---

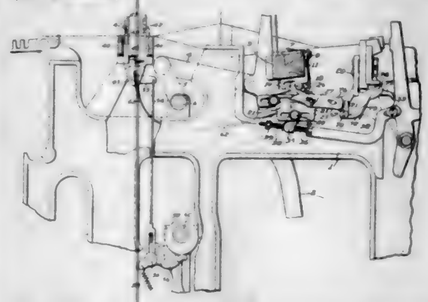
1,567,510. CONDENSER. EINAR A. JOHNSEN, Mountain Lakes, N. J. Filed Jan. 11, 1924. Serial No. 685,526. 13 Claims. (Cl. 257—43.)



1. In a surface condenser a shell, tubes extending within the shell, partition walls extending upwardly from the bottom of the condenser to points adjacent the top thereof, and dividing the condenser shell into separate and distinct compartments, and means at the upper ends of the partition walls for directing exhaust steam into the several compartments within the condenser shell.

---

1,567,511. LOOM STOP MECHANISM. ARTHUR S. JOHNSON, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed July 28, 1925. Serial No. 46,564. 9 Claims. (Cl. 139—367.)



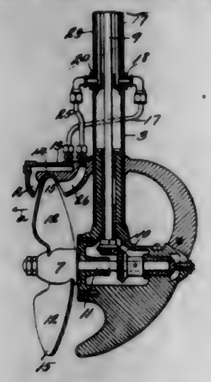
In a loom, the combination of a warp stop mechanism and a center fork weft stop mechanism including a dagger, a single dog adapted to be actuated by the dagger on the occurrence of a weft fault, a dog controller connected to the warp stop mechanism to position the dog in the path of the dagger on the occurrence of a warp fault, loom stopping mechanism and connections between the dog and loom stopping mechanism to effect loom stoppage on frontward movement of the lay on the occurrence of either a warp or weft fault.

---

1,567,512. WATER-COOLING SYSTEM FOR OUTBOARD MOTORS. LOUIS J. JOHNSON, Mishawaka, Ind., assignor to Johnson Bros. Engineering Corporation, South Bend, Ind. Filed Feb. 9, 1924. Serial No. 691,601. 9 Claims. (Cl. 115—18.)

1. The combination with an outboard motor pivotally movable in a substantially horizontal plane and having

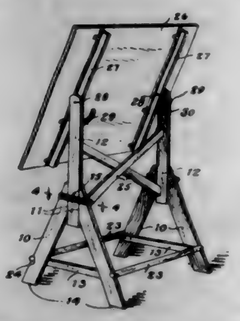
a water jacket, a propeller, of means whereby water forced rearwardly by said propeller will be forced through



the water jacket, said last named means being constant in relation to the propeller during the pivotal movement of the propeller.

---

1,567,513. DRAWING TABLE. WILLIE L. E. KEUFFEL, Weehawken, N. J., assignor to Keuffel and Esser Company, Hoboken, N. J., a Corporation of New Jersey. Filed Apr. 7, 1923. Serial No. 630,489. 2 Claims. (Cl. 45—109.)

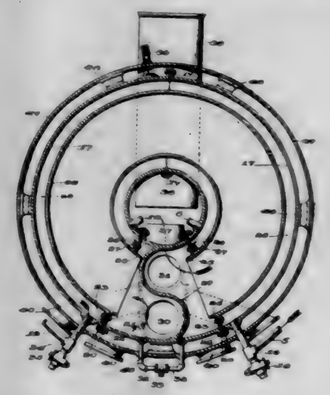


1. In a support for a drawing board the combination of a base comprising two spaced A frame members, means holding the legs of the frame members in spaced relation at their lower extremities but without substantial bracing, and a super-structure for bracing the frames and supporting the board comprising vertical members inserted between the converging ends of the legs of the A frames, bracing means between the two vertical members, and means for rigidly clamping the vertical members between the legs of the frames comprising a clamp extending between opposite legs of each frame, the clamps being located on opposite sides of the vertical members from the bracing means whereby the superstructure may be removed from the base without removing any part of the clamping or bracing structure.

---

1,567,514. FEED-WATER HEATER FOR LOCOMOTIVES. JAMES H. KIDWELL, Staunton, Va. Filed Aug. 26, 1924. Serial No. 734,344. 3 Claims. (Cl. 122—425.)

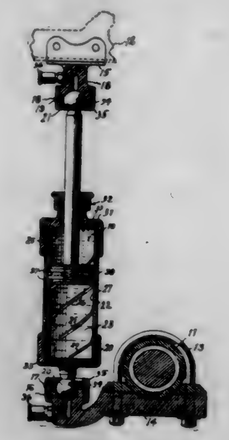
1. A feed water heater comprising a relatively large substantially circular tubular casing open at confronting ends for the entrance and exit of exhaust steam, a concentric water shell containing said casing in closely spaced relationship, said shell being composed of sections permitting assembly around said casing, plates secured to the shell upon which the casing has sole



mounting in the shell, said plates constituting walls defining a water space in said shell, and water inlet and outlet openings in said shell.

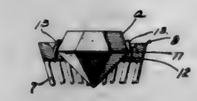
---

1,567,515. AUTOMOBILE SHOCK ABSORBER. KENJI KIJIMA and MASANAO ITO, Los Angeles, Calif. Filed Aug. 14, 1924. Serial No. 732,048. 2 Claims. (Cl. 188—88.)



1. In an automobile shock absorber, the combination with a cylinder connected for reciprocating movement relative to the automobile axle, and a piston working within the cylinder and connected for a reciprocating movement relative to the automobile frame, said cylinder having a series of spiral by-pass grooves in its inner wall and connecting the variable clearance chambers formed by the piston, of an hydraulic resistance medium within the cylinder capable of transmission through said by-pass grooves to equalize the pressure in said clearance chambers, the said grooves terminating in different planes to increase the corresponding chamber pressure as the piston approaches the limit of its reciprocating movement.

1,567,516. GEM SETTING. ERNST A. KIRCHNER, Minneapolis, Minn. Filed Mar. 5, 1924. Serial No. 697,092. 1 Claim. (Cl. 63—31.)

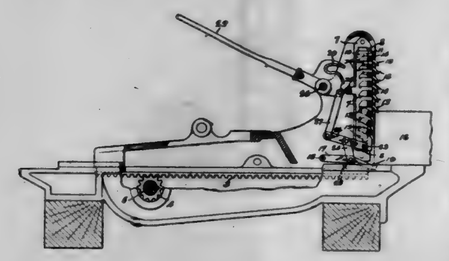


A gem setting comprising a top plate with a gem seat, a plurality of laterally spaced holes in the top plate located inward of the perimeter thereof, and pins secured in said holes and adapted to be bent inwardly over the gem seat to hold a gem mounted thereon inward of said pins.

1,567,517. SHOCK ABSORBER. ROY D. KISBEY, Sacramento, Calif. Filed Oct. 20, 1924. Serial No. 744,661. 3 Claims. (Cl. 188—88.)

1. A shock absorber for attachment to a leaf spring of a vehicle, said spring having at one end a shackle attached thereto and to the frame of the vehicle for swinging movement with the flexing of the spring; comprising a pair of telescoping members mounted together with shock absorbing means therebetween and arranged to extend longitudinally of the spring, means whereby the outer end of one member may be pivotally attached to the bolt of the shackle at the spring end thereof, and means for pivotally attaching the other member adjacent its end farthest from the shackle, onto the frame of the car.

1,567,518. SAWMILL DOG. STANLEY B. LANGILL, Menominee, Mich., assignor to The Prescott Company, Menominee, Mich., a Corporation of Michigan. Filed Sept. 7, 1922. Serial No. 586,658. 13 Claims. (Cl. 143—127.)

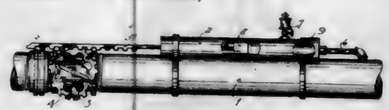


1. In a sawmill dog, in combination, a knee, a tooth frame fitted to said knee for vertical and horizontal movements with respect thereto, one of said parts being provided with a projection, the other of said parts being provided with a substantially L-shape opening to receive said projection to permit vertical and horizontal movements of said tooth frame with respect to said knee, and means cooperating with said knee and said tooth frame to effect movement of said tooth frame with respect to said knee.

1,567,519. MOP WRINGER. EMILE LECLERC and JOSEPH BIBAUD, St. Hyacinthe, Quebec, Canada. Filed Jan. 22, 1925. Serial No. 4,063. 1 Claim. (Cl. 15—120.)

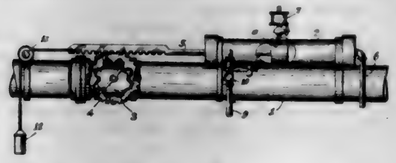
A mop wringer comprising in combination with a mop handle and a two-lap fibrous portion carried at one end thereof, a frame slidably mounted on the handle and having a portion thereof disposed between the laps of the fibrous portion, a ratchet wheel rotatably surrounding the handle and secured to said frame, a lever rotatably surrounding the handle, and a pawl carried by the lever and adapted to engage said ratchet wheel.

1,567,520. VACUUM AND PRESSURE GOVERNOR, REGULATOR, OR CONTROL. DON A. LEIGH, Fellows, Calif. Filed Oct. 9, 1922. Serial No. 593,471. 2 Claims. (Cl. 137—153.)



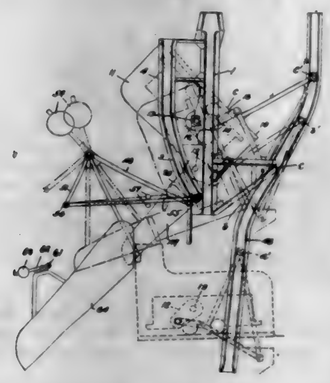
1. In a pipe-line, or other tubular device for the conveyance of gas, or other lighter than air substances, where the contents thereof are at times under greater than atmospheric pressure, and at other times under the same or less than such pressure, a valve of suitable type affixed within such pipe-line or device, by a transverse shaft, one end of which extends through such pipe, to which there is externally affixed a cogged wheel; a toothed rod engaging such cogged wheel, and which rod at its opposite end is attached to a piston, operating within a cylinder, one end whereof is open to the atmosphere, and the opposite end thereof is connected beyond the point of movement of said piston, by a pipe connected with the said pipe line, freely admitting the contents of such pipe-line when in pressure, or having such piston chamber exhausted of such contents when said pipe-line is at less than atmospheric pressure, whereby said piston is driven forward when such pressure is exerted, or drawn in the opposite direction when in vacuo, thereby controlling the action of said valve; within which cylinder and forming an integral part thereof, there is affixed a shoulder or flanged rim against which the gland of the piston plunger accurately rests, when such piston plunger is drawn inward by the suction of the vacuum in said piston chamber and pipe line; and together with a tapped entrance or duct on said cylinder to receive the stem of an oil cup for the purpose of lubricating the same when the plunger therein is in action.

1,567,521. VACUUM AND PRESSURE STABILIZER. DON A. LEIGH, Fellows, Calif. Filed Oct. 9, 1922. Serial No. 593,472. 2 Claims. (Cl. 137—153.)



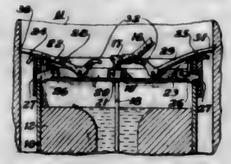
1. In a by-pass pipe around an air or gas pump connecting the suction line with the discharge line of the pipe-line upon which said pump is used, the introduction within such by-pass pipe of a valve of suitable type, affixed therein by a transverse shaft, one end of which extends through the wall of such by-pass pipe, to which end there is externally affixed a cogged wheel; a toothed rod engaging such cogged wheel, and which rod at its one end is attached to a plunger or piston, operating within an enclosed cylinder, and its opposite end is attached to a pliable rope running over a pulley and weighted at its free end with a dependent receptacle for the accommodation of variable weights; said cylinder being connected at one end, beyond the point of movement of said plunger therein, by a pipe of small diameter, with the pipe-line on the suction side of said pump, and at the opposite end of said cylinder, beyond the point of movement of said plunger therein, by a like pipe of small diameter, with the pipe-line on the discharge side of said pump; said cylinder being fitted with a pop-valve with an arm upon which slides a weight determining the pressure that will discharge said valve, the tap for which valve connection is into the compression side of the piston chamber; and together with a tapped entrance or duct on said cylinder to receive the stem of an oil cup for the purpose lubricating the same when the plunger therein is in action.

1,567,522. OVERTURNING CAGE. DANIEL F. LEPLEY, Connellsville, Pa. Filed Nov. 2, 1923. Serial No. 672,389. 12 Claims. (Cl. 214—122.)



1. The combination with a bail, a cage tiltably mounted therein and means for tilting the cage, said cage having an integral delivery spout normally extending upwardly therefrom, of a chute supported normally outside of the path of the cage, and means operated by the upward movement of the bail during the tilting of the cage for moving said chute at a speed gradually increasing in proportion to the upward speed of the cage into position to receive material delivered from the spout.

1,567,523. CAN BRACKET AND HANGER. ROBERT F. LINDSAY, Sr., Greenville, S. C. Filed July 3, 1924. Serial No. 724,071. 18 Claims. (Cl. 62—139.)

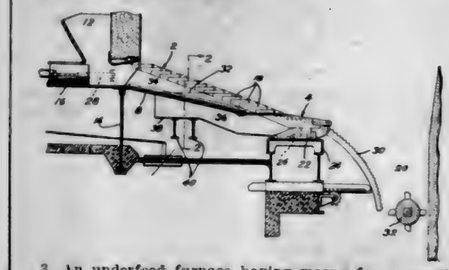


1. An air agitating attachment for ice cans, comprising a tube and a support therefor, means for detachably securing said support to an ice can, and means for swingingly connecting the tube to the support and means for causing lateral swinging movement slightly out of a single vertical plane so that the tube traverses a double elliptical area which causes the tube to strike different parts of the ice walls, said connecting means also allowing the tube to rise automatically away from the support.

1,567,524. TAG FASTENER. SIMON E. LOHN, Georgeville, Minn. Filed May 22, 1925. Serial No. 32,105. 1 Claim. (Cl. 40—25.)

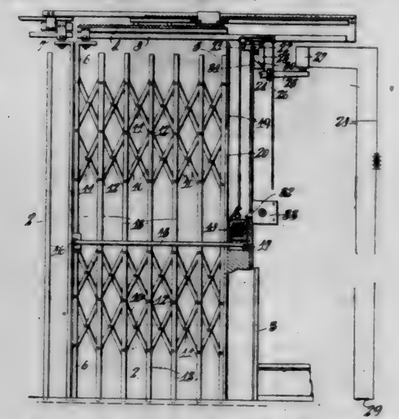
A tag fastener formed from a single piece of flat metal having a body portion adapted to lie flat against one face of a tag, a tang formed on the inner end of the body portion and adapted to penetrate the tag, the outer end of the body portion having parallel incisions formed therein adjacent the side edges to provide a pair of additional tangs, the portion intermediate the incisions forming an article engaging spur, said additional pair of tangs and said spur being bent over the outer edge of the tag, the free ends of the additional pair of tangs and the free end of the first mentioned tang being adapted to be bent back upon the body portion and in engagement with the opposite face of the tag, the article engaging spur depending downwardly from the edge of the tag.

1,567,525. AUTOMATIC STOKER. EDWIN LUNDGREN, Frederick, Md., assignor to Combustion Engineering Corporation, New York, N. Y., a Corporation of New York. Filed July 27, 1922. Serial No. 577,825. 3 Claims. (Cl. 110—44.)



3. An underfeed furnace having means for supporting and feeding fuel while in the course of combustion comprising a downwardly inclined retort having each of its side walls divided transversely into two sections, one section of each wall being movable longitudinally with relation to the other, tuyère structures mounted on each of the side walls, and means for imparting a back and forth movement to said movable section with relation to the other.

1,567,526. GATE SECURING AND CLOSING MEANS. FREDERICK J. LYNCH, New Westminster, British Columbia, Canada. Filed May 14, 1925. Serial No. 30,344. 2 Claims. (Cl. 39—50.)



1. Means for shutting and securing a sliding gate to close a doorway, said means comprising the combination with the gate, of a weight vertically movable within a casing on one side of the doorway, a bar pivotally connected at one end to the weight and at the other end to the outer style of the gate, a latch sustaining the weight at the upper limit of its movement and the gate open, and means for withdrawing the latch and permitting the weight to fall whereby the gate is extended across the opening.

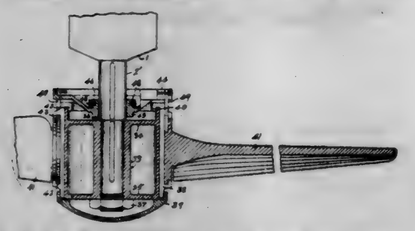
---

1,567,527. FOUNTAIN PEN. JOHN P. LYNN and HUGO A. FUNK, Chicago, Ill. Filed Mar. 13, 1924. Serial No. 698,954. 9 Claims. (Cl. 120—46.)

1. In a fountain pen, the combination with the barrel and nib, of a piston and a tubular piston rod, a passage being provided between the hollow interior of the rod and the space in the barrel below the piston, a pen holder removably fixed to the free end of the piston rod and located outside of the lower end of the barrel, whereby it may be grasped to withdraw the piston to its lower limit of travel in the barrel and means providing for delivery of ink from the reservoir to the nib.

---

1,567,528. PROPELLER. WILLIAM R. MCDONALD, South Houston, Tex. Filed July 27, 1923. Serial No. 654,113. 2 Claims. (Cl. 170—163.)



1. A propeller including a hub having end spiders, a cylindrical shell formed of sections to conform to and fit around the hub, said shell having circular raceways, a hub cap screwed onto one end of the shell and securing said sections together, inwardly turned flanges at the other ends of said sections which engage the corresponding end of the hub, propeller blades having circular flanges which run in said raceways.

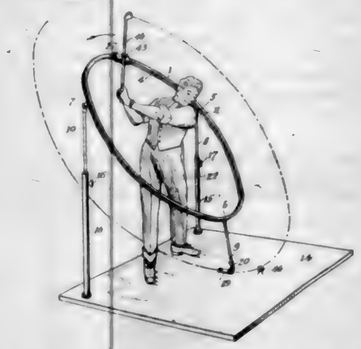
---

1,567,529. FUSE PLUG. HARRY W. MCQUAID, Canton, Ohio, assignor of fifty-two hundredths to Aaron L. Lewis and twenty-four hundredths to Charles E. Runyon, both of Canton, Ohio. Filed Apr. 17, 1922. Serial No. 553,817. 4 Claims. (Cl. 200—121.)

1. In a fuse plug including a chamber, a fusible link located therein and a transparent cover for the chamber, a spring arm mounted within the chamber and not forming a part of the circuit through the fuse plug, a hook upon the arm for engagement with the fusible link and a target upon the arm arranged to be projected against the transparent cover when the fusible link is parted.

---

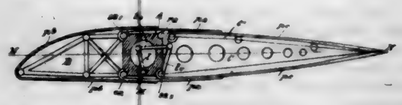
1,567,530. GOLF SWING DEVICE. RONALD G. MACNAUGHTON and MORTON R. WALKER, Los Angeles, Calif. Filed Apr. 2, 1924. Serial No. 703,647. 12 Claims. (Cl. 273—35.)



5. A golf swing device comprising a T rail circular track, a platform, an adjustable swinging connection between the forward lower part of the track and the platform and vertically adjustable pivoted connections between the rear part of the track and the rear of the platform, a slide mounted upon the track, a ring swiveled to the slide and adapted to receive the shank of the golf stick.

---

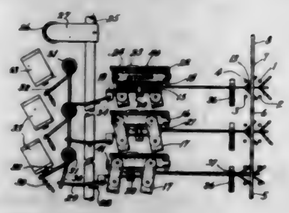
1,567,531. VARIABLE FLUIDO-DYNAMIC WINGS SUCH AS FOR AEROPLANES. PIERO MAGNI, Genoa, Italy. Filed Mar. 24, 1923. Serial No. 627,462. 2 Claims. (Cl. 244—12.)



1. An aeroplane wing including upper and lower overlapping plates forming the entire dorsal and ventral surfaces of the wing and capable of sliding upon each other for shortening or lengthening the dorsal or ventral surfaces to vary the camber of the latter without interrupting their smooth continuous outline, means associated with said plates for varying the profile of said surfaces at all points from edge to edge of the wing, a tail section movable independently of the remainder of the wing and provided with a supporting plate, and separate levers for controlling the supporting plate to permit the tail section to be moved into a position at right angles to the fluid current so as to brake the wing, said tail section being so mounted as to move away from the body of the wing to form a fluid passageway increasing in area as the inclination of the tail section varies relatively to the body of the wing.

---

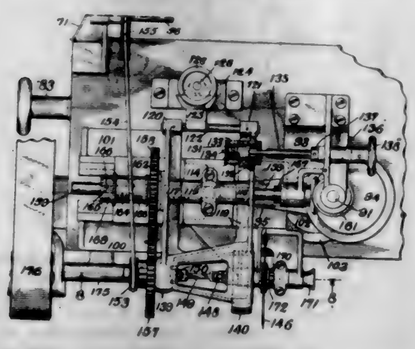
1,567,532. TELEPHONE SWITCH. HANS MARBURG, Halensee, Germany, assignor to Siemens & Halske Aktiengesellschaft, a German Company, Siemensstadt, near Berlin, Germany. Filed July 3, 1924. Serial No. 723,882. 8 Claims. (Cl. 179—225.)



1. In a selective switch, a plurality of sets of conductors arranged in intersecting relation, wire coupling members having their free ends projecting into proximity to the conductors of said sets, and cooperating bars for drawing said coupling members longitudinally to engage each a conductor in each of said sets to establish an electrical connection therebetween.

---

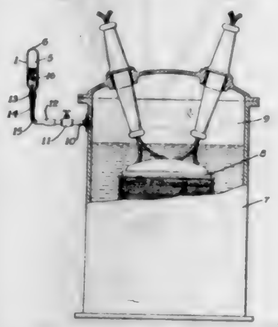
1,567,533. CIGARETTE MACHINE. HARRY S. MARSH, Brooklyn, N. Y. Filed Mar. 15, 1920. Serial No. 365,957. 27 Claims. (Cl. 131—37.)



17. In a machine provided with mechanism for forming material into a rod-like shape and advancing it, the combination of a reciprocating carriage, a reciprocating counterweight connected to said carriage, resilient means interposed between said carriage and counterweight for cushioning the movements of said carriage and counterweight and for imparting an initial return impulse to the parts, a rotary member on said carriage and a rotary knife having an eccentric bearing in said rotary member.

---

1,567,534. METHOD OF AND DEVICE FOR DETECTING OXYGEN. AYLMER H. MAUDE, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 2, 1924. Serial No. 684,094. 13 Claims. (Cl. 23—254.)



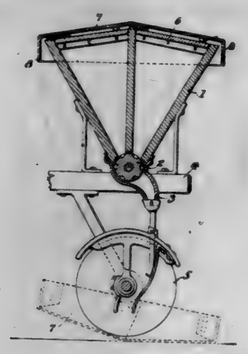
9. A device for detecting gases comprising a sealed evacuated container, and a reagent therein, said container having a capillary portion adapted to be broken to allow gases to enter the same.

---

1,567,535. FULL-FASHIONED STOCKING AND ART OR METHOD OF MAKING THE SAME. GEORGE H. MILLER, Philadelphia, Pa., assignor to Arcadia Full Fashioned Hosiery Corporation, Philadelphia, Pa., a Corporation of Delaware. Filed May 13, 1925. Serial No. 29,986. 17 Claims. (Cl. 66—4.)

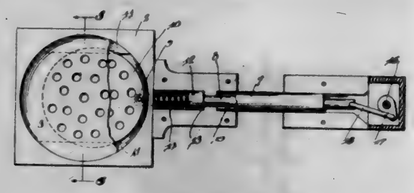
1. A full fashioned stocking having below its beginning edge a ridge consisting of all the loops of a plurality of courses formed in the fabric of the leg, each needle wale above the said ridge, being knitted, through the fabric of the said ridge to one needle wale of the leg below the ridge, and also knitted by lateral transfer into another and different needle wale of the portion of the leg below the ridge, so that each needle wale below the ridge is knitted into its own needle wale and also into another needle wale of the fabric above the ridge, and each needle wale of the fabric above the ridge is knitted into its own needle wale and also by lateral transfer into another needle wale of the fabric below the ridge.

1,567,536. ATTACHMENT FOR SEEDING MACHINES. NELSON W. MILLER, Tiffin, Ohio. Filed June 2, 1924. Serial No. 717,422. 1 Claim. (Cl. 275—1.)



An auxiliary cover for seed drill hoppers comprising a sheet metal blank bent on a central longitudinal line to provide oppositely inclined roof panels, each of said roof panels being provided with a longitudinal side flange and end flanges, the adjacent ends of said end flanges at each end of said cover being overlapped and secured in fixed relation and means for connecting the end flanges with said longitudinal flanges.

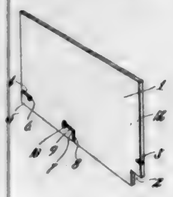
1,567,537. DRAINAGE VALVE. HERMAN MOCKUS, Chicago, Ill. Filed Mar. 18, 1925. Serial No. 16,496. 2 Claims. (Cl. 251—52.)



2. The combination with a drain opening having a perforated plate against the same, of a movable valve plate disposed beneath the first plate and having openings therethru, a longitudinally movable shaft having one end connected to the valve plate, manually operated means connected to the other end of the shaft, a head portion on the shaft, a spring normally bearing against the head for moving the shaft in one direction, a stop shoulder adapted to be engaged by the head to limit the movement of the shaft, a pin carried by the shaft in spaced relation with the head for engaging the stop shoulder upon the opposite side to limit the movement of the shaft in the opposite direction whereby the openings in the valve plate may be aligned with the perforations in the drain plate against the tension of the of the spring thru the manually operated means and the tension of said spring reciprocating the shaft in the opposite direction to move the openings in the valve plate out of alignment with the openings in the drain plate.

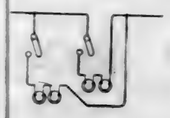
1,567,538. ROOFING. HENRY M. MORGAN, Jr., Norwood, Mass. Filed Feb. 21, 1924. Serial No. 694,188. 12 Claims. (Cl. 108—8.)

1. A roof comprising roofing elements substantially flat from edge to edge laid in overlapping courses, each element having portions of its edges overlapping and underlapping the adjacent edge of an element of the same course



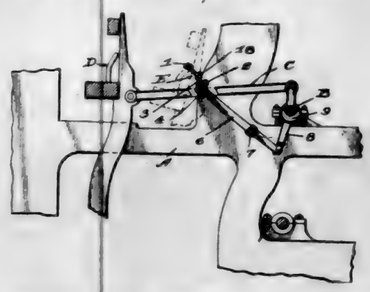
and a portion formed to underlap an element of the next adjacent underlying course.

1,567,539. AUTOMOBILE TRAFFIC SIGNAL. YASABURO MORIMOTO, Hollywood, Los Angeles, Calif. Filed Apr. 16, 1924. Serial No. 706,895. 2 Claims. (Cl. 116—40.)



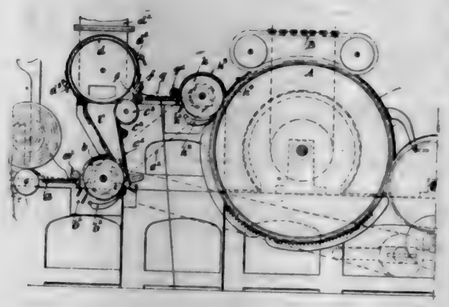
1. The combination with a housing having a series of compartments, of a collapsible signal semaphore mounted in each compartment, means for extending each collapsible semaphore from its corresponding compartment, a fabric signal element associated with each collapsible semaphore, and connected to the outer extremity thereof, and a spring-actuated roller for each fabric signal element.

1,567,540. LOOM-CLEANING DEVICE. WILLIAM L. NOBLITT, Shelby, N. C., assignor of one-half to William N. Dorsey, Shelby, N. C. Filed Oct. 3, 1922. Serial No. 592,061. 1 Claim. (Cl. 139—379.)



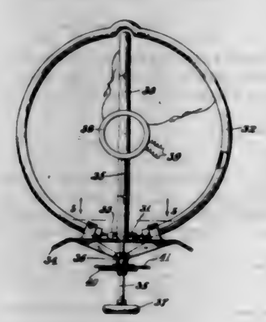
In combination with a weaving loom having a driving shaft, a filling fork grate mounted for movement in an arc disposed transversely of the axis of the shaft, means operatively connecting the fork grate with the shaft, a fork grate cleaning device comprising a level fulcrumed to the frame of the loom, means connecting the lever with the shaft and adapted to impart oscillatory movement to the lever, a bracket carried at the free end of the lever, a brush, a flat link connected at its inner end with one arm of the bracket and a slot and bolt connection between the outer end of the link and the brush whereby the latter may be advanced toward the filling fork grate, the parts being so arranged and timed that the brush moves in an arc along the tines of the fork when the fork grate arrives at the outer end of the arc of its path of movement.

1,567,541. REVOLVING-FLAT CARDING ENGINE. ARTHUR ERNEST OXLEY, Manchester, England, assignor, by direct and mesne assignments, of one-half to The British Cotton Industry Research Association, Manchester, England, and one-half to Platt Brothers and Company, Limited, Oldham, England. Filed Apr. 14, 1925. Serial No. 22,957. 7 Claims. (Cl. 19—99.)



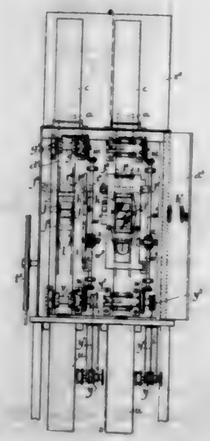
1. In revolving flat carding engines the combination with a main cylinder having a comparatively small number of flats, of two preliminary combing mechanisms one located above the horizontal centre line of the main cylinder, and a comparatively narrow back plate.

1,567,542. CLOSED TUNED COIL OR LOOP AERIAL. GREENLEAF WHITTIER PICKARD, Newton Center, Mass., assignor to Wireless Specialty Apparatus Company, Boston, Mass., a Corporation of New York. Original application filed June 30, 1921, Serial No. 481,498. Divided and this application filed Oct. 17, 1923. Serial No. 669,011. 3 Claims. (Cl. 250—11.)



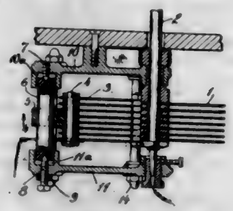
1. Radio directional-loop aerial receiving apparatus comprising two loop aerials operatively and permissively fixed in vertical planes at substantially right angles to and intersecting one another, said aerials thereby permitting production by transmitted waves, of a magnetic field the direction of which coincides with that of such waves; and a rotatable pick-up coil located in said magnetic field, acting as a secondary to said loop aerials as a whole as a primary, and affected by said field save when in a position at right angles to the source of such waves, whereby the position of the pick-up coil determines the direction of said source of waves.

1,567,543. MACHINE OR APPARATUS FOR THE PRINTING OF PHOTOGRAPHIC FILMS. GEORGE FRITZ PORTEN, London, England, assignor of one-half to Ralph Davis, London, England. Filed Apr. 9, 1924. Serial No. 705,348. 2 Claims. (Cl. 95—75.)



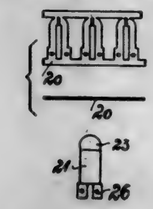
1. Apparatus of the kind heretofore referred to for printing photographic films, comprising a casing, a plurality of exposure windows in said casing, said windows being of a dimension equal to the length of a plurality of consecutive pictures, a common means for intermittently moving films, arranged in contact with master films, past each of said windows, each intermittent movement feeding the films the length of one picture, said means including a common shaft having a beveled gear thereon adapted to engage a beveled gear on a rotatable disc to actuate said disc, and means on said disc for intermittently rotating a plurality of shafts on each of which is mounted a cam for controlling the movement of said films past the windows.

1,567,544. INSULATOR STRUCTURE FOR ELECTROSTATIC CONDENSERS AND THE LIKE. ISAAC P. RODMAN, Newark, N. J., assignor to Garod Corporation, Newark, N. J., a Corporation of New Jersey. Filed Mar. 8, 1924. Serial No. 697,725. 5 Claims. (Cl. 250—41.)



1. An electrostatic condenser comprising a plurality of sets of plates disposed in spaced relation one to another, at least one of said sets of plates being supported on a support of dielectric material, and supporting elements in contact with two ends of said support, the contact areas between said supports and said supporting elements being very small.

1,567,545. ELECTRIC MINE FUSE. NIKOLAUS SCHMITT, Niederlossnitz, near Dresden, and OTTO SCHMITT, Kuppersteg, near Cologne, Germany. Filed June 23, 1924. Serial No. 721,940½. 11 Claims. (Cl. 102—10.)



1. A fuse head for electric mine fuses the poles of which are stamped out of sheet metal and partly embedded under pressure in a material becoming plastic under the influence of heat.

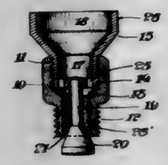
---

1,567,546. DOOR. EZRA B. SMITH, Ravenswood, Ill., assignor to John Edward Ogden, Mountainville, N. Y. Filed Dec. 11, 1922. Serial No. 606,275. 16 Claims. (Cl. 189—46.)

1. A door comprising a rigid frame, corrugated metallic sheets secured thereto and a plurality of independent reinforcing members disposed between said sheets and secured to said frame.

---

1,567,547. PRIMING CUP. OSCAR AUGUST SMITH, East Cleveland, Ohio; The Cleveland Trust Company administrator of said Oscar A. Smith, deceased. Filed July 17, 1924. Serial No. 726,475. 5 Claims. (Cl. 123—187.5.)

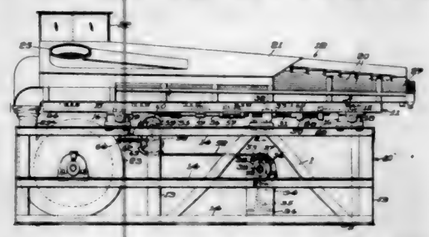


5. A priming device comprising a body member having an exteriorly threaded hollow stem provided with a valve seat, and an enlarged interiorly threaded chamber of materially greater interior diameter than the interior diameter of said hollow stem, a shiftable fluid-receiving chamber having an extended chamber portion exteriorly threaded into the chamber of the body and having an interior diameter as great as the interior diameter of the hollow stem, thereby materially increasing the capacity of the fluid-receiving chamber and provided with a perforated bottom wall, and a depending valve stem connected with said bottom wall and having a valve cooperating with said valve seat, said valve opening in the direction of the flow of the fluid.

---

1,567,548. TABLE CONCENTRATOR. ALBERT H. STEBBINS, Los Angeles, Calif. Filed Mar. 13, 1924. Serial No. 698,877. 12 Claims. (Cl. 74—14.)

1. Operating mechanism for imparting a vibratory movement to concentrator decks and other frames supported for reciprocatory movement, comprising in combination, a rotating shaft having an eccentric that is rotated at a uniform speed, a lever pivotally mounted for rocking movement and having a surface against which the eccentric acts and the greater active portion of which surface is located from the lever pivot at the



far side of the axis of rotation of the eccentric to thereby effect a rocking movement of the lever which is more rapid in one direction than the other, and a connection between the lever and frame to actuate the latter.

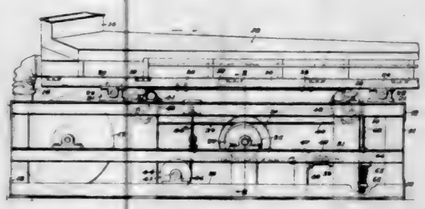
---

1,567,549. OPERATING MEANS. ALBERT H. STEBBINS, Los Angeles, Calif. Filed Oct. 8, 1924. Serial No. 742,386. 13 Claims. (Cl. 74—14.)

1. In a device of the class described, the combination of a supporting base, a frame supported by the base for vibratory movement, means for moving the frame in one direction, means for moving the frame in the opposite direction, including levers pivotally secured to the base at each side thereof, cables operatively connecting each lever to a side of the frame, and a pair of angularly disposed eccentrics for rocking one lever and a second pair of angularly disposed eccentrics for rocking the other lever.

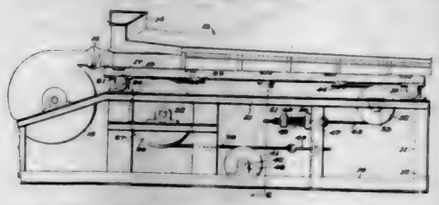
---

1,567,550. OPERATING MEANS. ALBERT H. STEBBINS, Los Angeles, Calif. Filed Oct. 8, 1924. Serial No. 742,387. 25 Claims. (Cl. 74—14.)



1. A device of the class described comprising, in combination, a supporting casing, a frame provided with a material supporting surface and mounted upon the casing for movement back and forth in the direction of its length, means for moving the frame in one direction, a pair of cables for moving the frame in the opposite direction and for controlling the movement of the frame under the action of said means, and a pair of eccentrics for operating the respective cables, said eccentrics being angularly disposed so that one controls the movement of the frame thru one cable during part of a complete revolution and the other eccentric controls the movement of the frame thru the second cable during a different portion of said complete revolution.

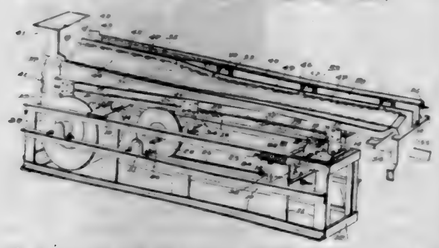
1,567,551. OPERATING MEANS. ALBERT H. STEBBINS, Los Angeles, Calif. Filed Oct. 8, 1924. Serial No. 742,388. 7 Claims. (Cl. 74—14.)



1. A device of the class described, comprising, in combination, a supporting casing, a frame supported by the casing for back and forth movement and having a material supporting surface, means for moving the frame in one direction, a pair of cables for moving the frame in the opposite direction and for controlling its movement under the action of said means, means for securing one end of each cable to the supporting casing and the other end to the frame, and a pair of eccentrics acting against an intermediate portion of the respective cables to actuate the frame by pulling the cables and slacking them off.

---

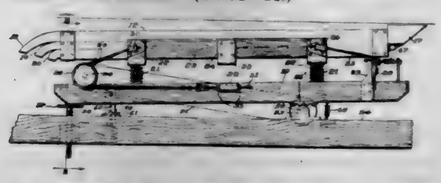
1,567,552. TABLE CONCENTRATOR. ALBERT H. STEBBINS, Los Angeles, Calif. Filed Nov. 5, 1924. Serial No. 747,903. 6 Claims. (Cl. 209—467.)



1. A double deck for a table concentrator, comprising in combination, a pair of deck surfaces extending side by side and each inclined transversely at the same inclination thruout its length and in a direction so that the surfaces slope upwardly toward their adjacent edges, a concentrate wall common to the two deck surfaces and extending part way along the crest formed by the meeting deck surfaces, a pair of spaced parallel concentrate walls extending along the deck surfaces for another portion of the length of the deck and forming a material receiving passage between them, riffles extending in a diagonal direction upon each deck surface and terminating along the concentrate walls, buffer blocks along said walls against which the concentrates pile up, and gates along the spaced concentrate walls for drawing off the concentrates.

---

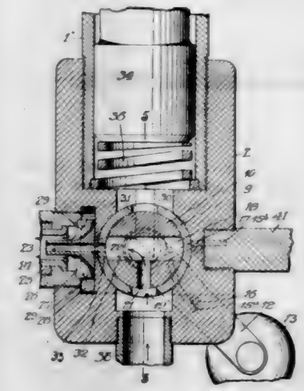
1,567,553. OPERATING MEANS. ALBERT H. STEBBINS, Los Angeles, Calif. Filed Nov. 5, 1924. Serial No. 747,933. 10 Claims. (Cl. 74—14.)



7. A separator for treating materials comprising, in combination, a supporting base, a frame yieldingly supported upon the base for vibratory movement toward and from the base, eccentrics disposed at the opposite sides of the base, and means operated by said eccentrics to pull the frame toward said base and then release it to move away from the base under the action of its yielding support.

---

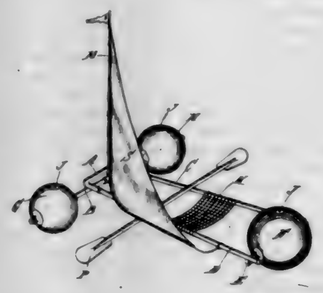
1,567,554. FLUID-PRESSURE HAMMER. EDWARD W. STEVENS and JAMES A. MOORE, Detroit, Mich., assignors to Chicago Pneumatic Tool Company, New York, N. Y., a Corporation of New Jersey. Filed Aug. 25, 1920 Serial No. 405,863. 3 Claims. (Cl. 121—21.)



1. In a fluid pressure hammer, the combination of a cylinder having a piston chamber, a piston reciprocable therein, a valve casing at the rear end of the cylinder and having a passage direct from a source of fluid pressure to the rear end of the piston chamber, a valve mounted to oscillate in the casing and having a port to control said passage, a second port to control the exhaust from the rear end of the piston chamber, and a third port communicating with the first port and an ejector device cooperating with said second port and with said third port for creating a vacuum in the rear end of the piston chamber.

---

1,567,555. FLOAT OR RAFT FOR SWIMMING PURPOSES AND THE LIKE. NICHOLAS STRAUSSLER, London, England. Filed Dec. 17, 1924. Serial No. 756,439. 11 Claims. (Cl. 9—21.)



3. In a device of the kind set forth, an open frame comprising floats carried on cross members, said floats being in the form of inflatable rubber balls having tubu-

lar diametrical passages through which said cross members can be passed before inflation, said balls when inflated being adapted to grip said cross members in said passages by the internal pressure in said balls after inflation.

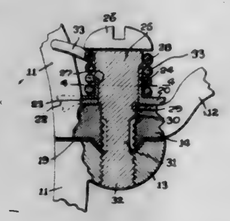
---

1,567,556. BALLOON-ENVELOPE MATERIAL AND PROCESS OF MANUFACTURING THE SAME. ERICH TRENCKMANN and BRUNO TRENCKMANN, Berlin-Tempelhof, Germany, assignors to B. G. Textilwerke G. m. b. H., Berlin-Tempelhof, Germany. Filed Aug. 27, 1921. Serial No. 495,934. 7 Claims. (Cl. 154—2.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. The process for making balloon envelop material which consists in moistening a sheet of one or more layers of animal provenience, stretching same, applying a mixture of a substance having the principal characteristics of glue and a substance adapted to render glue elastic, placing a sheet of fabric thereon and applying pressure.

---

1,567,557. EYEGLASS CONSTRUCTION. ALFRED VEILLETTE, Attleboro, Mass., assignor to Bay State Optical Company, Attleboro, Mass., a Corporation of Maine. Filed Jan. 27, 1921. Serial No. 440,263. 8 Claims. (Cl. 88—50.)

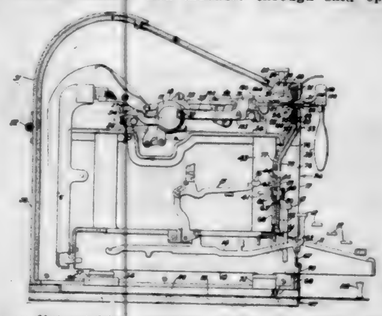


1. In eyeglass construction, in combination, an eyeglass frame member having a pair of substantially registering end members, one of said end members having a projecting part and an opening passing through said projecting part, said opening having a threaded portion and an unthreaded portion, the other of said end members having a recess with which said projecting part mates and having a threaded opening at said recessed portion registering with said first opening and forming therewith a continuous threaded passage, and a threaded connecting device coacting with said openings, having a portion adapted to mate with said unthreaded portion of said first passage and shaped to be brought into threaded engagement with either of said end members exclusively of the other.

---

1,567,558. TYPEWRITING MACHINE. JOHN WALDHEIM, Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Jan. 12, 1922. Serial No. 528,703. 25 Claims. (Cl. 197—186.)

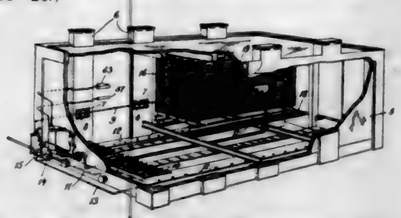
1. The combination with a typewriting machine, of a sound-deadening casing therefor, having an opening in the lower portion of one of its walls just above the floor of the casing, a closure member movable into position to seal said opening and prevent the emission of sound from the casing, and a dirt-catcher mounted on the closure member and movable through said opening



into a dirt-catching position within the casing and beneath the machine, when the closure member is moved to position to close the opening.

---

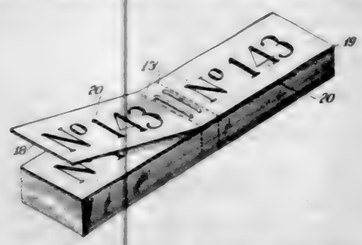
1,567,559. DRYING WOOD, LUMBER, AND THE LIKE. JOHN BERCHMANS WELCH, New Orleans, La. Filed May 24, 1924. Serial No. 715,516. 34 Claims. (Cl. 34—24.)



9. The improvement in the kiln drying of materials which require different conditions of temperature and humidity during the drying operation, which comprises predetermining the desired different conditions of temperature and humidity for the material to be dried, producing within the kiln a continuing action indicative of changes in a varying characteristic of a representative sample of the material being dried as the drying operation progresses, and employing said action to establish the predetermined different conditions of temperature and humidity within the kiln as the drying operation progresses.

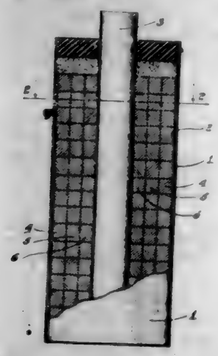
---

1,567,560. APPARATUS FOR PLAYING PARLOR GAMES. SAMUEL WORTH, Chicago, Ill. Filed May 18, 1925. Serial No. 31,043. 10 Claims. (Cl. 273—139.)



1. In a tablet, a plurality of strips having perforations at each side of the transverse center dividing it into two tickets, both tickets of each pair having the same identification on their upper sides, a sealing strip covering the opposite side of each ticket, penalties printed on each ticket under the sealing strip, and means between the perforations holding the strips together.

1,567,561. DRY CELL. VICTOR YNGVE, South Orange, N. J., assignor to Manhattan Electrical Supply Company, Inc., New York, N. Y., a Corporation of Massachusetts. Filed Nov. 14, 1923. Serial No. 674,611. 7 Claims. (Cl. 136—136.)



1. In a dry cell, a depolarizing mix composed of a plurality of compacted washers, each washer composed of a plurality of separate sections of varying consistency.

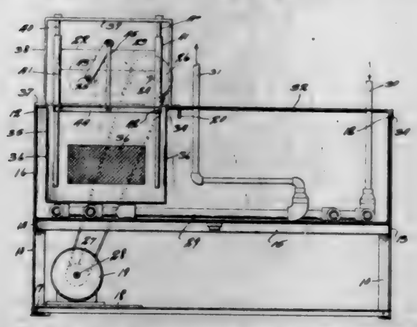
---

1,567,562. SUPPORT FOR ELECTRICAL APPARATUS. HAROLD H. YOUNG and EARLE A. RYDER, Keyport, N. J. Filed Mar. 26, 1924. Serial No. 702,033. 13 Claims. (Cl. 250—14.)

1. In a radio signalling apparatus, the combination of a pair of flat elongated wall portions and a plurality of tie members therefor so spaced respectively as to permit of the introduction of vacuum tubes therebetween in a manner so that said wall portions and tie members will provide a lateral support for the same.

---

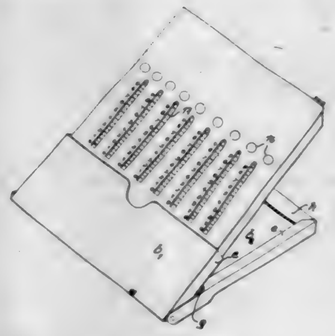
1,567,563. EGG-DIPPING MACHINE. ELMER E. ANDERSON, La Grande, Oreg. Filed Oct. 8, 1925. Serial No. 61,288. 10 Claims. (Cl. 99—2.)



1. In a machine for applying preservative fluids to eggs, a tank to contain the fluid, a second tank removably supported from the first named tank and projecting thereinto and having perforated side walls, a support extending over the last named tank and supported from the first named tank, guides projecting downwardly from the support and into the last named tank, members vertically slidable upon said guides, a platform carried by the members and means for vertically reciprocating the platform.

---

1,567,564. CALCULATING DEVICE. JEAN BERGMANN, Wannsee-Berlin, Germany. Filed Oct. 20, 1923. Serial No. 669,701. 3 Claims. (Cl. 235—69.)



1. In a calculating device of the kind as described, a plate provided with adjacent slots, graduated slides reciprocable in said slots, racks on said slides, multi-tooth pinions in engagement with said racks, and a star wheel in fixed relation to each of said pinions, whereby, said star wheels being rotated during a computing process, their correlated slides are advanced through a graduated degree.

---

1,567,565. RECEIVING SYSTEM. QUINCY A. BRACKETT, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 30, 1921. Serial No. 456,854. 3 Claims. (Cl. 250—8.)

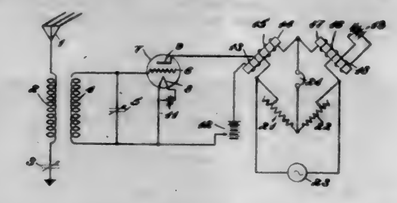
1. A signal-current amplifying device comprising an electron tube having two plates and a cathode, means for selectively modulating the internal impedance of one of the plate circuits to a greater extent than the other, means for impressing said modulating means with currents varying in accordance with a received signal, balanced impedance devices serially connected across said plates, a circuit including a source of electrical energy connected between said cathode and the common junction of said impedance devices, a signal translating device, and means for operatively associating said translating device with a portion or all of said impedance devices whereby disturbances in the balancing are detected.

---

1,567,566. RECEIVING SYSTEM. QUINCY A. BRACKETT, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 12, 1921. Serial No. 460,615. 1 Claim. (Cl. 250—8.)

In a signal receiving device, a Wheatstone bridge, equal inductors, one in each of two arms of said bridge,

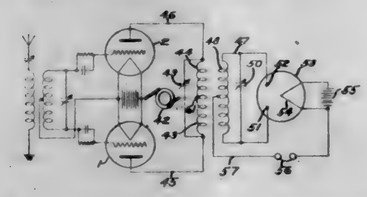
iron cores, one for each of said inductors, means for supplying flux for maintaining said cores at equal de-



grees of permeability, said means including distinct sources of direct current, one for each core, and means for superposing a signal current on one of said direct currents.

---

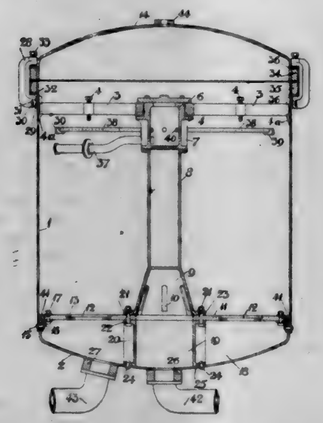
1,567,567. WIRELESS RECEIVING SYSTEM. QUINCY A. BRACKETT, Springfield, Mass., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 18, 1922. Serial No. 555,279. 5 Claims. (Cl. 250—8.)



1. In a radio receiving system, a Wheatstone bridge having signal-controlled impedances in two arms, a source of audio-frequency current in one diagonal and a detector and translating device in the other diagonal.

---

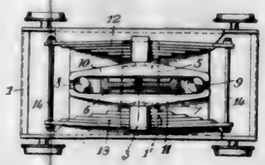
1,567,568. KIER FOR THE BLEACHING, DYEING, OR ANALOGOUS TREATMENT OF WOUND YARNS. JOHN BRANDWOOD, THOMAS BRANDWOOD, and JOSEPH BRANDWOOD, Elton, Bury, England. Filed July 5, 1923. Serial No. 649,675. 2 Claims. (Cl. 8—18.)



1. In a kier for the bleaching, dyeing and analogous treatment by fluid under pressure of yarns wound upon a perforated beam, a cylindrical shell forming the main portion of the kier, a dished lower end therefor, a diaphragm dividing the interior of the shell from that of the dished end to form an upper and a lower chamber within the kier, orifices in the diaphragm around which orifices are formed seatings for perforated beams, a central pillar within the kier to carry the means for holding the yarn beams upon their seats, ports in such central pillar, a conduit traversing the lower kier chamber to put said ports in communication with a circulating pump, and an opening in the lower chamber to give communication between the interior of such chamber and the said pump.

---

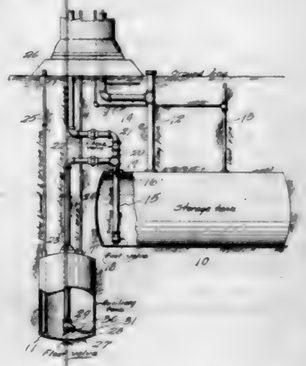
1,567,569. BOGIE OF VEHICLES RUNNING ON RAILS. JAKOB BUCHLI, Winterthur, Switzerland, assignor to the Firm Swiss Locomotive and Machine Works, Winterthur, Switzerland. Filed Aug. 29, 1924. Serial No. 734,916. 4 Claims. (Cl. 105—199.)



1. In a vehicle running on rails and particularly at high speeds, a vehicle frame, a bogie having a frame, and means adapted to operatively connect the frame of said bogie to the frame of said vehicle and including a pivot connection permitting of a lateral movement of the bogie relatively to the frame, projecting parts provided on at least one of said frames and arranged in pairs whereby one projection of a pair is in front of and the other behind the pivot, and resilient means adapted to cooperate with said projections, so that a turning moment is generated by said resilient means causing a return of the bogie into its mid-position when the latter has carried out a turning movement and that the turning moment disappears when the bogie has been shifted transversely besides carrying out a turning movement.

---

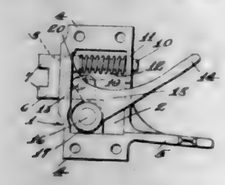
1,567,570. LIQUID-DISPENSING SYSTEM. JOHN J. CATRON, Bonham, Tex., assignor to Catron Manufacturing Company, Bonham, Tex., a Corporation of Texas. Filed Aug. 8, 1924. Serial No. 730,977. 3 Claims. (Cl. 221—74.)



1. In a liquid dispensing system, the combination of a liquid storage tank, a pressure tank at a level below the storage tank, a siphon line extending from the storage tank to the pressure tank, a portion of the siphon line serving as a pressure discharge line for the pressure tank for conveying liquid therefrom, and means at the lower end of the siphon line in the pressure tank controlled by the level of the liquid in the pressure tank for closing the lower end of the siphon line when the liquid reaches a predetermined low level in the pressure tank and thus maintaining a siphon in the line.

---

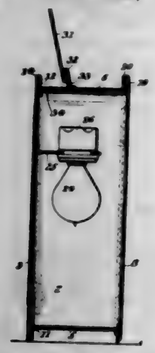
1,567,571. SASH LOCK FOR RAILWAY-CAR WINDOWS. EDWARD F. CHAFFEE, Syracuse, N. Y., assignor to The O. M. Edwards Company, Inc., Syracuse, N. Y., a Corporation of New York. Filed Oct. 9, 1923. Serial No. 667,496. 1 Claim. (Cl. 292—173.)



A sash lock, comprising a casing formed with a recess opening through its rear face, a bolt movable transversely of the recess through a lateral wall of the recess, a spring acting on the bolt, and normally tending to press it outwardly into locking position, an operating lever mounted in the recess and removable and replaceable by an axial movement of the lever, the lever having an arm detachably engaged with the bolt by a pin and slot connection, said arm having a projection interlocking with the bolt at one end of the slot, to normally prevent axial displacement of the lever, said arm being arranged so that upon movement of the bolt against action of the spring relative to the operating lever, the bolt moves out of locking engagement with said arm to permit axial displacement of the lever.

---

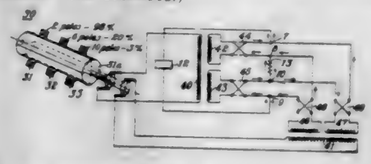
1,567,572. ILLUMINATED SIGN. NORMAN N. CHERRY, Springfield, Ohio. Filed Nov. 19, 1924. Serial No. 750,838. 1 Claim. (Cl. 40—133.)



An illuminated sign of the class described, comprising a rectangular box-like casing having side, bottom and top panels provided at their forward edges with flanges, over which are bent the edges of a front panel, said front panel having perforations arranged close to one another and formed to represent some letter of the alphabet, a rear removable panel provided with top and side edges adapted to cooperate and serve as guides with the edges of the said side panels, a bracket mounted on the inner face of said front panel, a lamp mounted within said casing and supported on said bracket, an upwardly and forwardly inclined sign panel supported upon said top panel in parallel relation with the forward edge thereof, said top panel being further provided with an elongated slot parallel with, but forward of said inclined sign panel for the purpose of illuminating said sign panel, the rays of light from the aforesaid lamp penetrating the aforesaid perforations in the front panel, tending to show the said perforations converged, substantially as described.

---

1,567,573. RECTIFIER. LEWIS WARRINGTON CHUBB, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 2, 1920. Serial No. 427,762. 13 Claims. (Cl. 175—363.)



7. In a rectifying system, the combination with rectifying means, of a polyphase supply circuit having a waveform such as to produce a rectified wave of substantially sine shape.

---

1,567,574. SPECIAL FABRIC PROPELLER. NOBLE S. CLAY, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 20, 1923. Serial No. 663,739. 15 Claims. (Cl. 170—159.)

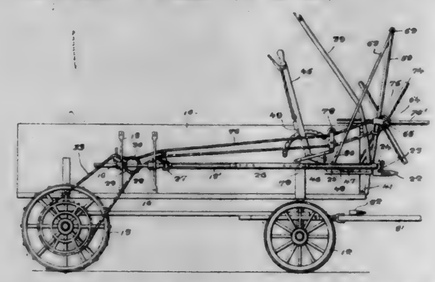
1. A propeller comprising a fabric the strength of which is greater in one direction than in another and a phenolic condensation product as a binder.

---

1,567,575. SHAFT-HANDLE-RETAINING MEANS. JOSEPH CUNNINGHAM, Glen Carbon, Ill. Filed Feb. 29, 1924. Serial No. 696,095. 1 Claim. (Cl. 287—53.)

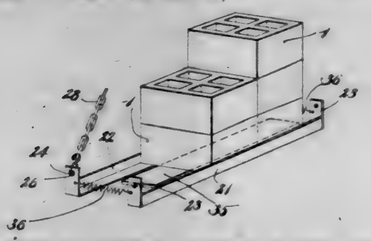
A device of the class described comprising a shaft tapered at its free end, said tapered portion being polygonal in cross section and being formed in one flat face with a recess providing a pocket, the outer end of the recess being closed and disposed inwardly of the corresponding end of the shaft, said pocket being open only upon its top, there being a notch formed at the opposite end of the recess, a latch of a length substantially equal to the length of said pocket, a shaft extending crosswise of said pocket, said latch being pivoted at its inner end upon said shaft, said latch being formed at its outer end with an angular extension providing a shoulder and having an extension at its inner end projecting into a notch provided at the adjacent end of said pocket, and a spring arranged in said pocket between the bottom of the same and said latch.

1,567,576. HARVESTING MACHINE. WESLEY H. DEAN, Roger Mills County, Okla. Filed Dec. 6, 1923. Serial No. 678,906. 4 Claims. (Cl. 56—58.)



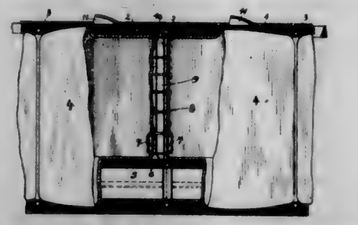
1. In combination, a body, a pair of rods pivoted to the body, guide loops on the rods, a crank rockably mounted on the body and having an extension in the loop, a sickle on the rods, a frame pivoted to the sickle, bearings slidable on the frame, a beater journaled in the bearings, means for holding the bearings in different adjusted positions, a brace pivoted to the frame, and adjustable connecting means between the brace and the rods.

1,567,577. APPARATUS FOR PILING, HANDLING, AND UNLOADING ARTICLES. SEIRAK DERDERIAN, Watertown, Mass. Filed May 26, 1925. Serial No. 33,008. 1 Claim. (Cl. 214—6.)



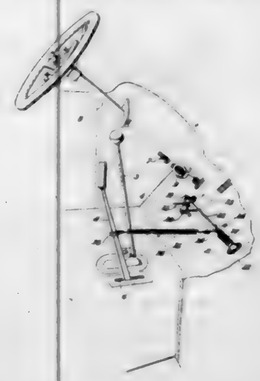
Apparatus for handling a plurality of heavy articles in stacked units, comprising a pallet adapted to support and carry a bottom row of said articles, said pallet being of substantially less width than the width of said bottom row and of substantial thickness to permit the insertion under said articles of a pair of cooperating angle irons having horizontally disposed flanges of equal or less thickness than the thickness of the pallet, and hoisting means for said angle irons.

1,567,578. GAS DISCHARGE FROM AIRSHIPS. WILHELM ERNST DÖRR, Ueberlingen, Germany, assignor to Luftschiffbau Zeppelin G. m. b. H., Friedrichshafen, Germany. Filed Mar. 1, 1923. Serial No. 622,096. 3 Claims. (Cl. 244—3.)



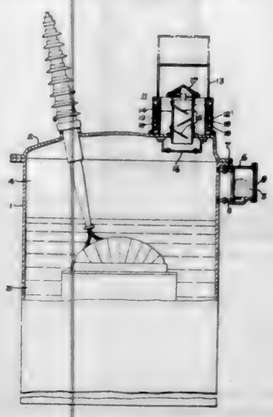
1. A rigid airship comprising a hull consisting of longitudinal and of cross members, a cover on said hull, gas cells within said hull, valves in the walls of said gas cells, gas passages between said gas cells in the planes of said cross members and offset bends at the upper ends of said passages having outlets remote from the intersection of cross members and longitudinal members.

1,567,579. GUARD FOR MOTOR VEHICLES. GEORGE M. EAMES, Bridgeport, Conn. Filed Mar. 3, 1924. Serial No. 696,568. 2 Claims. (Cl. 74—81.)



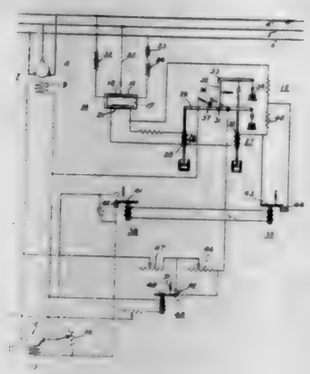
1. In a motor-vehicle, the combination with an emergency-brake lever, a foot-board and a foot-actuated throttle-member projecting above said foot-board, of a guard shiftable from an inoperative position into a position overlying said throttle-member whereby said guard is interposed between an operator's foot and the throttle-member to prevent a normal actuation of said throttle-member, and an operative connection between said guard and emergency-brake lever for shifting the guard from an inoperative to its operative position.

1,567,580. ELECTRICAL APPARATUS. OTTO H. ESCHHOLZ, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 26, 1923. Serial No. 641,620. 8 Claims. (Cl. 220—85.)



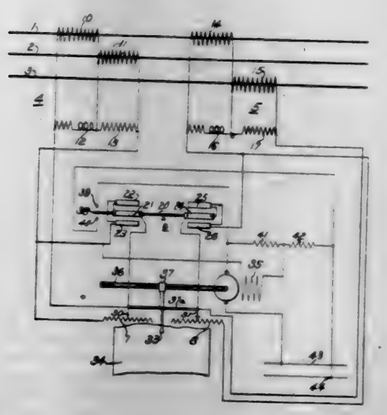
1. The combination with a casing, of pressure-relieving means therefor comprising a gasometer communicating with said casing, and baffles interposed between said casing and said gasometer.

1,567,581. REGULATOR SYSTEM. ROBERT D. EVANS, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 12, 1921. Serial No. 460,782. 30 Claims. (Cl. 171—119.)



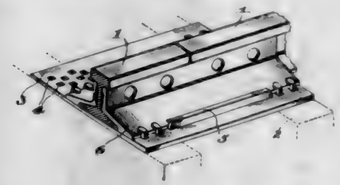
1. In a regulator system for maintaining a substantially constant voltage upon a polyphase supply circuit, the combination with a regulator, of means connected between the regulator and the circuit whereby the regulator is energized in accordance with one symmetrical component of a polyphase electrical quantity of said circuit.

1,567,582. UNBALANCED FACTOR METER. ROBERT D. EVANS, Pittsburgh, and RAYMOND T. PIERCE, Wilkinsburg, Pa., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 16, 1921. Serial No. 501,078. 11 Claims. (Cl. 172—245.)



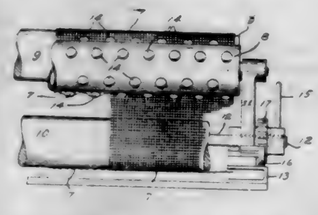
1. A measuring device for a polyphase circuit comprising means for producing different symmetrical components of an unbalanced quantity, a balancing relay and means for applying said components to different elements of said relay.

1,567,583. RAIL-JOINT PLATE. OLIVER C. FANSLER, Gassaway, W. Va. Filed Aug 12, 1925. Serial No. 49,800. 4 Claims. (Cl. 238—289.)



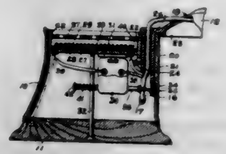
1. A support for rails including a base plate, said base plate adapted to span the ties, the portion of the base plate resting on the ties being beveled to give an inclined surface to said plate, and the portion of the base plate between the ties functioning as a spacer member.

1,567,584. FELT CONDITIONER FOR PAPER MACHINES. WILLIAM P. FERNEY, Cheboygan, Mich. Filed Dec. 17, 1924. Serial No. 756,380. 3 Claims. (Cl. 92—50.)



1. A felt reconditioner comprising means for separating the strands of the felt embodying knob-like members adapted to be pressed upon the felt.

1,567,585. COMBINED ELECTRIC LAMP AND GRILL. JOSEPH C. FELDMAN, New York, N. Y., assignor to Tillie K. Feldman, New York, N. Y. Filed Oct. 2, 1924. Serial No. 741,217. Renewed Oct. 22, 1925. 6 Claims. (Cl. 219—19.)

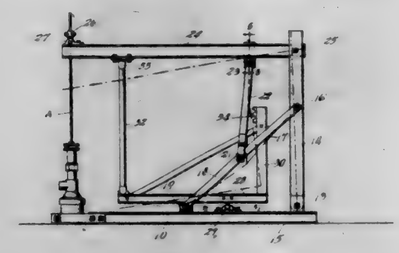


1. The herein described combination electric lamp and grill comprising a circuit, a lamp and a grill in said circuit, a switch for throwing said grill out of said circuit, and a support for said lamp which is movable relatively to said grill, said support being arranged to operate said switch according to the predetermined position of said support.

1,567,586. PUMP JACK. FRANK GARDNER, Dallas, Tex. Filed Oct. 9, 1924. Serial No. 742,557. 10 Claims. (Cl. 74—5.)

1. In a pump jack, a base, a Samson post pivoted to the base, a beam pivoted at one end to the post, bracing members pivotally connected at their outer ends to the base and post respectively and at their inner ends to each other, a link pivotally connected at one end to the

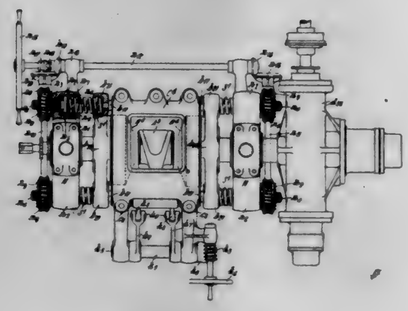
pivotally connected ends of the bracing members and at its other end to the beam at a point adjacent to the pivoted end of the latter, a rocker, and a pitman con-



nected to the rocker and to the beam, the point of connection of the pitman to the beam being between the free end of the beam and the point of connection of the link therewith.

---

1,567,587. APPARATUS FOR TREATING RUBBER AND THE LIKE. FRANK GARNER, Chapel-en-le-Frith, and ALFRED HALL, Ansdell, England. Filed Mar. 6, 1924. Serial No. 697,329. 24 Claims. (Cl. 18—2.)

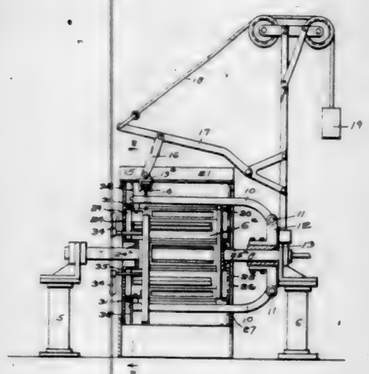


1. In a machine for grinding, mixing or masticating rubber and the like in combination;—a fixed casing; a rotating member mounted within the said casing, one side of the rotating member having surfaces inclined to the plane of rotation; means for revolving the rotating member within the casing; a charging opening in the periphery of the casing through which the material to be treated may be fed into the space between the said side of the rotating member and the adjacent end of the casing, the rotating member and the casing being so mounted as to permit of limited axial movement between them in opposition to a yielding force.

---

1,567,588. ICE-CREAM-CONE-BAKING MACHINE. GIUSEPPE GERACE, Lebanon, Pa. Filed Nov. 1, 1924. Serial No. 747,210. 4 Claims. (Cl. 107—58.)

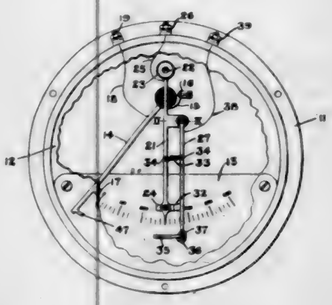
4. In combination with a cone baking machine comprising a plurality of radially swinging arms of a drum enclosing said machine, said drum having an opening at its top through which the uppermost of said arms may swing radially outward, front and rear walls for said drum secured to the machine and rotating therewith, the front wall having an inturned flange upon its inner face and the flange having as many sides as there are radially swinging arms, and plates carried by said arms



having their inner edges shaped to co-act with said flange and having their outer edges curved to conform to the internal diameter of the drum.

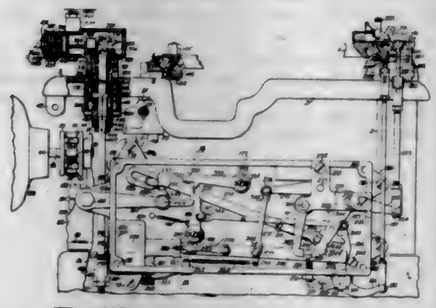
---

1,567,589. THERMOSTAT. LEWIS J. GREENAWALT, Mansfield, Ohio, assignor to Westinghouse Electric Products Company, a Corporation of Michigan. Filed Apr. 29, 1922. Serial No. 557,263. 6 Claims. (Cl. 200—138.)



1. A combined temperature-indicating, limiting and controlling device, comprising a manually adjustable member having a plurality of contact members thereon, an auxiliary arm insulated from and carried by said adjustable member and having a contact member normally resiliently engaging one of the contact members on said adjustable member, an indicating member having a contact member thereon and thermally responsive means for controlling the position of said indicating member and effective to cause the contact member thereon to engage the other of said contact members on said adjustable arm at a predetermined temperature.

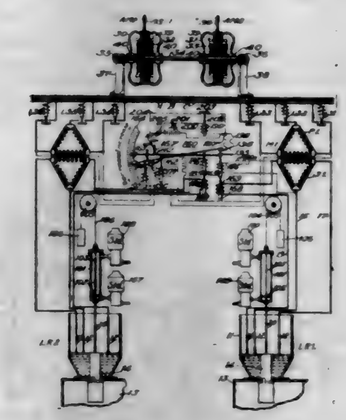
1,567,590. TYPEWRITING AND LIKE MACHINE. FREDERICK A. HART, New Britain, Conn., assignor to Remington Typewriter Company, Ilion, N. Y., a Corporation of New York. Filed Feb. 6, 1925. Serial No. 7,218. 70 Claims. (Cl. 197—65.)



1. In a typewriting machine, the attachable and detachable frame for the driving train of a power carriage return mechanism, inserted at its upper end in a hole in the top plate of the machine and secured at its lower part to the base of the typewriter.

---

1,567,591. SYSTEM OF CONTROL. RUDOLF E. HELLMUND, Swissvale, Pa. Filed Mar. 13, 1920. Serial No. 365,398. 9 Claims. (Cl. 177—311.)

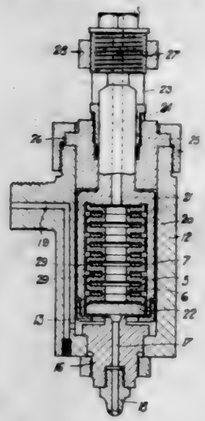


2. The combination with a plurality of asynchronous motors, of a plurality of speed-indicating members, one for each motor, means for actuating said members said actuating means including a voltage coil and a current coil energized by the respective motor secondary voltages and means dependent upon the relative movement of the indicating members caused by differences in speed of the motors to produce a signal.

---

1,567,592. MEANS FOR CONTROLLING VALVES AND THE LIKE BY FLUID PRESSURE. KNUT JONAS ELIAS HESSELMAN, Saltsjo-Storangen, near Stockholm, Sweden. Filed Oct. 1, 1925. Serial No. 59,989. 4 Claims. (Cl. 137—156.)

1. In a fluid pressure operated device for controlling valves, a casing adapted to be internally subjected to the fluid pressure, a set of annular flexible disks adapted to be inserted in said casing so as to loosely engage each other to form a longitudinally flexible, hollow column, an imperforate end piece at one end of said column, an



apertured end piece at the opposite end of said column, and means individual to each of said disks to prevent said disks from lateral displacement relatively to each other.

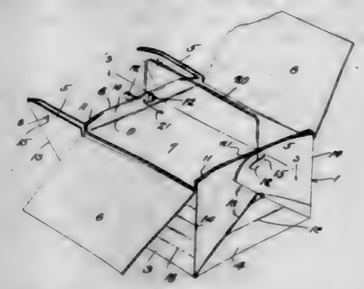
---

1,567,593. SUPPORT FOR TYPEWRITING MACHINES. EUGEN HIRSCH, Berlin, Germany. Filed Apr. 20, 1925. Serial No. 24,664. 1 Claim. (Cl. 45—137.)

A support for typewriting machine comprising a wire member having horizontal loops provided with upturned ends, a sound deadening base secured to said loops, a tie member connecting said upturned ends and a receptacle secured on the tie member to form a socket for a typewriter foot.

---

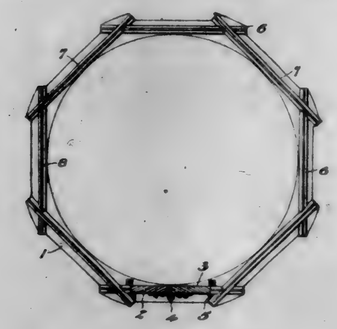
1,567,594. ICE-CREAM CONTAINER. ALBERT HITZERT, Saginaw, Mich. Filed May 20, 1925. Serial No. 31,050. 1 Claim. (Cl. 229—24.)



A collapsible paper container formed from a single sheet of material cut in the form of a Greek cross with foldable wings connecting the arms thereof at their points of intersection, said arms being bendable transversely at their junction with each other whereby a rectangular bottom with upstanding side walls is formed on the setting up of the container, the free ends of said arms

being bendable transversely to form overlying top flaps, said foldable wings overlying the ends of the container, and means connecting said wings with said sides, the side walls of said container being provided with transversely extending vertically spaced grooves which perform the double function of markers for the material in the container and as spacers to provide air chambers.

1,567,595. SILO. CLARENCE HOARD, Victoria, British Columbia, Canada. Filed Mar. 15, 1924, Serial No. 699,564. Renewed June 15, 1925. 2 Claims. (Cl. 20—1.4.)

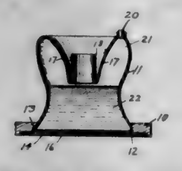


1. In a silo, a series of intersecting timbers forming a horizontal course, each of said timbers having a pair of spaced vertical grooves at its inner side having their walls disposed on converging lines and transversely extending notches at one edge of said timber merging with said grooves to form tenons.

1,567,596. PEN AND PENCIL CASE. CHARLES EDWARD ITSKIN, Louisville, Ky. Filed July 28, 1924. Serial No. 728,703. 3 Claims. (Cl. 120—9.)

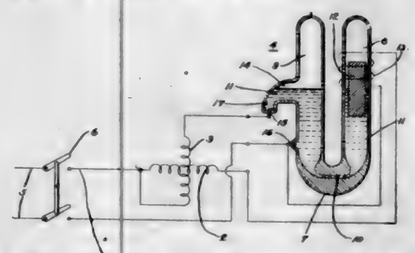
1. A pencil holder of the class described including a cylindrical body adapted to hold a pencil at one end, and having its other end hollow and formed in a pair of hinged sections, and a cap receivable over said sections to hold them together.

1,567,597. INKWELL. ANTHONY JANUSZ, Turners Falls, Mass. Filed July 27, 1922. Serial No. 577,928. 1 Claim. (Cl. 120—73.)



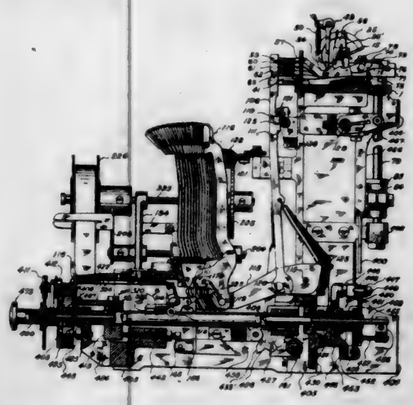
An ink well, comprising a structurally integral hollow body having a base wall and a side wall rising from the base wall at an upward inward inclination thereto, said wall above the lower portion curving inwardly and then outwardly, the upper end of said wall being rounded and extended as an inverted conical section within said wall, the bottom of the conical section terminating approximately in the transverse plane of the upper end of the inwardly curved portion of the side wall, and an entrance member of cylindrical form integral with the reduced end of the conical portion and extending upwardly within said conical portion and terminating on a plane materially below the upper end of the side wall.

1,567,598. MOTOR-STARTING SWITCH. OLIVER S. JENNINGS, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 20, 1923. Serial No. 652,673. 2 Claims. (Cl. 172—279.)



1. The combination with an electric device having a running winding and a starting winding normally connected in parallel, of a fluid switch normally closing the circuit through the starting winding and an electromagnet connected in the circuit for actuating the fluid to open the circuit through the starting winding, and means for regulating the movement of the fluid.

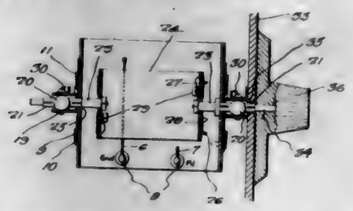
1,567,599. TELEGRAPH TYPEWRITER. EDWARD E. KLEINSCHMIDT, Long Island City, N. Y., assignor, by mesne assignments, to Morkrum-Kleinschmidt Corporation, Chicago, Ill., a Corporation of Delaware. Filed Aug. 11, 1923. Serial No. 656,857. 32 Claims. (Cl. 178—21.)



1. In a printing telegraph machine, a subcombination comprising a selecting mechanism embodying a plurality of notched selector members; a plurality of actuating bars controlled by said selector members; a plurality of type bars connected to said actuating bars; operating means for said actuating bars, and a restoring spring individual to each of said actuating bars and the type-bar connected thereto; said subcombination being so proportioned, balanced and constructed that a printing impression of a selected character may be effected in widely different planes, whereby said subcombination

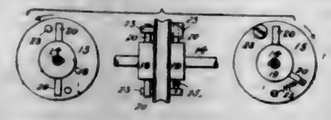
may coact with a page printing platen with an upward printing stroke of said type bars, and may coact with a tape printing platen in a tape printing machine to effect a downward printing stroke of said type bars.

1,567,600. INDUCTANCE COIL. PATRICK J. KELLY, Philadelphia, Pa. Filed Mar. 22, 1924. Serial No. 701,194. 5 Claims. (Cl. 171—242.)



4. A three circuit inductance coil comprising a pair of stator coils, one of said stator coils being formed of a pair of separated sections of continuously wound wire, the sections being joined by substantially a half turn of said wire, the other stator coil being formed in a pair of sections directly wound on the first mentioned stator section, the last mentioned stator coil being formed of a continuous winding having the sections joined by a half turn of the winding substantially overlying the half turn of the first mentioned stator winding, and a rotor coil movable on an axis extending between the stator coil sections.

1,567,601. ELECTRIC WELDING. OTIS ALLEN KENYON, New York, N. Y., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 28, 1917. Serial No. 209,343. 3 Claims. (Cl. 219—8.)

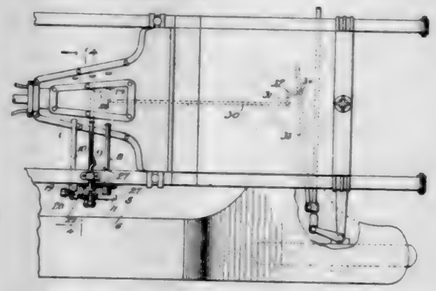


1. An electric arc welding mechanism comprising a movable electrode, a feed roller frictionally engaging said electrode, a movable mounting for said feed roller permitting the latter to be rotated to advance said electrode into contact with the work, a spring member for rotating said feed roller in the reverse direction to strike the arc, and stop means on said feed roller for predetermining the arc length.

1,567,602. TAPELINE MEASURE. ADOLF W. KEUFFEL, Montclair, N. J., assignor to Keuffel and Esser Company, Hoboken, N. J., a Corporation of New Jersey. Filed Nov. 29, 1924. Serial No. 752,866. 5 Claims. (Cl. 33—137.)

1. In combination with a tape line, a member fixed to the end thereof and a bar pivoted upon said member to turn about an axis extending in a direction lengthwise of the tape line and adapted to lie in an inoperative position coincident with the plane of the tape line and in an operative position transverse to said plane of the tape line.

1,567,603. CONTROL AND STEERING MECHANISM FOR AUTOMOBILES. BERTELL W. KING, New York, N. Y. Filed Aug. 6, 1920. Serial No. 401,807. 4 Claims. (Cl. 180—77.)

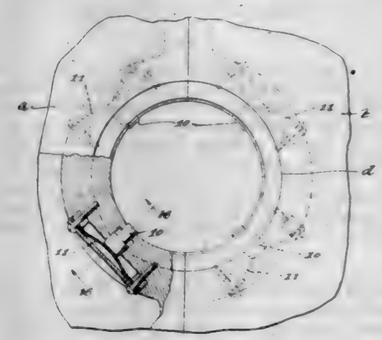


1. In an auto-vehicle, the combination of an auxiliary control and steering mechanism comprising side extension devices and means attached to said devices, said means comprising brake-links, steering links and rocker wheels, a rocker yoke mounted on one of said wheels and an operating lever mounted pivotally on said yoke to rock at right angles to the movement of the yoke for controlling and for guiding the vehicle.

1,567,604. RECTUM TUBE. RICHARD KIRCHHOFF, Stuttgart, Germany. Filed June 29, 1920. Serial No. 392,841. 2 Claims. (Cl. 128—261.)

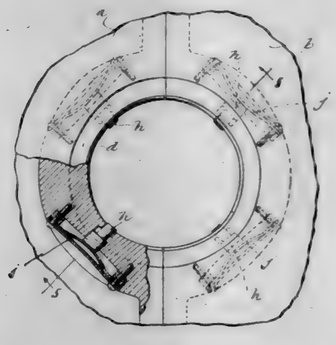
1. A rectum tube comprising in combination, a tubular middle portion, a tube adjoining one end of and communicating with said middle portion, said tube being inclined at an angle relatively to said middle portion and increasing in diameter outwardly and a bulb at the other end of said middle portion having a lateral opening.

1,567,605. THERMOSTATIC CORE CENTRALIZER. HARRY S. LEE, Plymouth, Mich. Filed Jan. 8, 1925. Serial No. 1,166. 6 Claims. (Cl. 22—152.)



1. In a permanent mould, the combination of a plurality of mould sections of expansible material, a core supported therein by contact with the mould sections, and a thermally controlled means for taking up the clearance between the core and the mould sections due to the expansion of the mould.

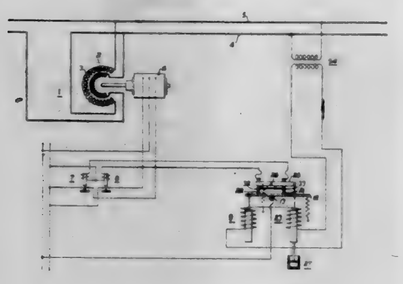
**1,567,606. AUTOMATIC CORE CENTRALIZER.** HARRY S. LEE, Plymouth, Mich. Filed Jan. 8, 1925. Serial No. 1,167. 6 Claims. (Cl. 22—184.)



1. In a permanent mould, the combination of a plurality of expansible mould sections, a core supported in the mould sections by contact with the same, and an automatic means for centralizing the core notwithstanding change of conditions due to the expansion of the mould sections.

---

**1,567,607. REGULATOR SYSTEM.** EDWIN E. LEHR, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 16, 1922, Serial No. 568,730. Renewed June 23, 1925. 14 Claims. (Cl. 171—119.)

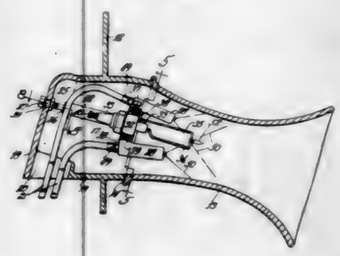


2. In a regulator system, the combination with a power circuit and an induction regulator connected thereto, of control means therefor comprising an electromagnet, a relatively short arm controlled thereby carrying a plurality of contact members, a second electromagnet, a relatively long arm controlled thereby carrying a plurality of co-operating contact members, said contact mechanism being controlled by the operations of said electromagnets to govern the operation of the induction regulator in the one direction or in the other direction.

---

**1,567,608. OIL BURNER.** NORMAN W. LYON, Springfield, Mass., assignor to Edward O. Sutton, Springfield, Mass. Filed Dec. 10, 1924. Serial No. 755,030. 7 Claims. (Cl. 158—73.)

6. In an oil burner, provided with an air passage, an annular nozzle support mounted within said casing so that air can flow through and around it, a circular series of nozzles projecting forwardly from the periphery of said support and approximately longitudinally of said casing, a spark plug within the opening in said support and having its axis disposed longitudinally thereof and of said casing with its electrodes extending forwardly beyond said nozzles, spaced projections extending inwardly from the interior wall of said annular support



for engaging the periphery of the shell of the spark plug, and means for holding said shell against said projections, whereby air passages are left between the spark plug shell and said interior wall.

---

**1,567,609. PROCESS OF MARING THIN BOILING STARCH.** JOHN R. MACMILLAN, La Salle, N. Y., assignor to Niagara Alkali Company, Niagara Falls, N. Y., a Corporation of New York. Filed Dec. 11, 1922. Serial No. 606,315. 4 Claims. (Cl. 127—23.)

1. The process of making thin boiling starch which comprises exposing dry starch to a minutary contact with gaseous chlorin.

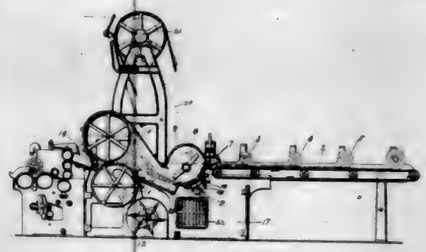
---

**1,567,610. PROCESS OF MAKING ALUMINUM SULPHATE FROM ALUMINOUS MATERIALS.** RICHARD MOLDENKE, Watchung, N. J., and WILHELM SCHUMACHER, Berlin, Germany; said Schumacher assignor to said Moldenke. Filed Jan. 10, 1923. Serial No. 611,844. 6 Claims. (Cl. 23—141.)

1. The process which consists in subjecting heated aluminous material to the action of sulphuric acid vapors, to produce aluminum sulphate, and introducing air to oxidize the iron contained in such material so that it will not be appreciably acted upon by the sulphuric acid.

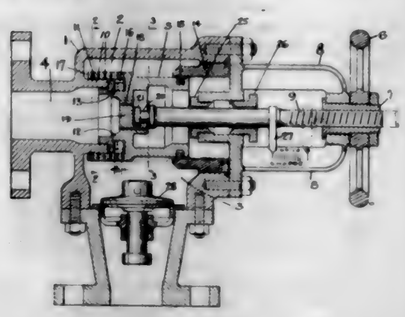
---

**1,567,611. COTTON-WORKING MACHINE.** HERBERT W. OWEN, Lowell, Mass., assignor to Saco-Lowell Shops, Boston, Mass., a Corporation of Massachusetts. Filed Jan. 19, 1924. Serial No. 687,389. 4 Claims. (Cl. 19—86.)



4. In a cotton working machine, the combination of a beater, a grid against which the cotton is thrown by the beater, whereby dirt in the cotton is projected through said grid, and a rotary clearer mounted immediately below said grid and close to the lower surface thereof.

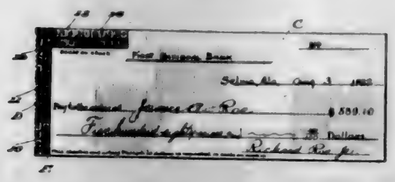
**1,567,612. STEAM VALVE.** PASQUALE PASCALE, New York, N. Y., assignor to Restucci Steam Valve Corporation, Manhattan, N. Y., a Corporation of Delaware. Filed Mar. 22, 1922. Serial No. 545,638. 2 Claims. (Cl. 122—450.)



1. In a steam valve the combination comprising a casing, a longitudinally movable sleeve valve having means, comprising a plurality of perforations therethrough, for drying the steam, a coacting portion of said casing with which said sleeve valve is in sliding contact, means to move said sleeve valve relatively to said coacting portion so as to control the number of perforations which are open for the passage of steam, a stop valve associated with said sleeve valve to positively cut off the supply of steam, and means for bypassing the steam around said perforations while maintaining said sleeve valve in sliding engagement with said coacting portion on said casing.

---

**1,567,613. BANK CHECK.** JOHN PATTON, Jr., Charleston, W. Va. Filed Mar. 15, 1922. Serial No. 543,881. 2 Claims. (Cl. 283—9.)



1. The method for protecting checks or the like which consists in arranging upon the check divisions of numerals, each division consisting in two columns and said numerals of each division representing the ten digits, all odd numerals of each division occuring in one column and arranged in successive order, and all even numerals occurring in the other column and arranged in the same order and then obliterating the numerals in the divisions which are opposite to those intended to be read for indicating the amount of the check.

---

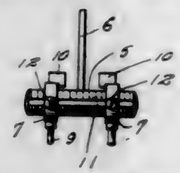
**1,567,614. ELECTROPNEUMATIC BRAKE.** HENRI PIEPER, Liege, Belgium, assignor to Compagnie Internationale des Freins Automatiques, Société Anonyme, in Liege, Belgium. Filed July 1, 1922. Serial No. 572,219. 19 Claims. (Cl. 303—20.)

1. In an electro-pneumatic brake system applied to a train, and in which the brake mechanism of each car comprises a cylinder with brake piston, an air pressure reservoir, an electrically operated device comprising solenoids acting against the air pressure, the combination of all the solenoids for releasing the brakes and controlling the valves connected in series or series parallel in one and the same circuit supplied with current by a source independent from the resistance of said circuit,

this current being supplied by a series dynamo, whereby the different movements of the brakes are operated by the variations of the intensity of the current.

---

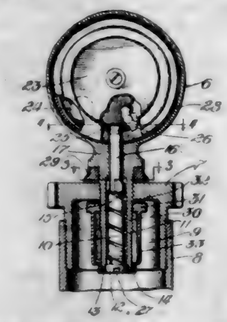
**1,567,615. VALVE-GRINDING TIP.** THEODORE PLANTS, Little Rock, Ark., assignor of one-half to Ralph Klyde Sadler, Little Rock, Ark. Filed Oct. 3, 1922. Serial No. 592,078. Renewed Nov. 23, 1925. 3 Claims. (Cl. 51—29.)



1. A device of the character described comprising a threaded element, collars threaded thereon and adjustable toward and away from each other, and pairs of valve engaging elements carried by the collars any pair of which capable of being arranged in operative position, and a handle carried by the threaded member.

---

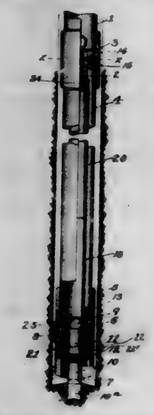
**1,567,616. HIGH-TEMPERATURE ALARM FOR INTERNAL-COMBUSTION ENGINES.** OTTO RABE, Wilmette, Ill. Filed Apr. 16, 1923. Serial No. 632,560. 1 Claim. (Cl. 116—10.2.)



In a device of the class described, the combination of a casing adapted to be mounted on the filler cap of a radiator or the like, a clock work bell alarm within the casing including a striker normally operated by the clock work, a downwardly depending exteriorly threaded hollow neck on the casing adapted to reach through the filler cap,

there being an internal circular recess in the lower portion of said neck, a spiral thermal element within the neck, a plug rotatably seated within the circular recess aforesaid, a rigid connection between the lower end of said thermal element and said plug, a rotatable shaft secured to the upper end of the thermal element and reaching upwards into the casing aforesaid, there being a transverse notch in the upper end of said shaft receiving the striker, the thermal element normally turning the shaft to thereby grip the striker and restrain the same from operation, and means for clamping the lower end of the neck for the purpose of clamping the plug against rotation therein, to thereby hold the plug in an adjusted position substantially as described.

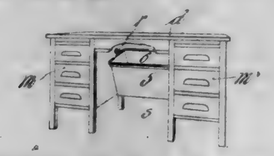
1,567,617. ROTARY CORE DRILL. CLARENCE E. REED, Houston, Tex., assignor to Reed Roller Bit Company, Houston, Tex., a Corporation of Texas. Filed Dec. 18, 1922. Serial No. 607,720. 2 Claims. (Cl. 255—72.)



1. In apparatus of the class described, the combination of a drill stem, a core tube therein, a drill head having cutters, members for locking the core in the core tube, and pins to which said members are pivoted held in radial sockets or openings of the drill head, substantially as described.

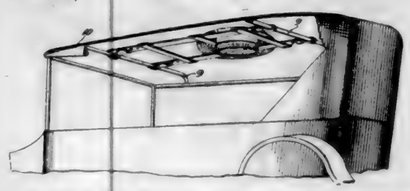
2. In combination a drill head, a drill stem in sections, a coupling between the sections, a plug having a central bore and a cross bore, hollow screws for holding the plug to the coupling, and in connection with the cross bore venting the interior of the plug, and a core tube connected with the plug and with its bore communicating with the bore of the plug substantially as described.

1,567,618. RECEPTACLE. ARCHIE D. ROBINSON, Westfield, Mass. Filed Dec. 29, 1922. Serial No. 609,634. 1 Claim. (Cl. 45—90.)



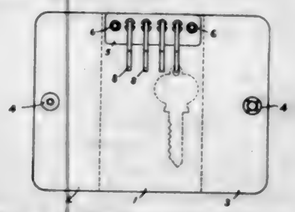
The combination with the spaced upright portions of a desk or the like, of a cross bar spanning the space between said portions, a relatively deep flat bottomed receptacle of substantially rectangular cross section having symmetrical upright walls of equal height, and open at its upper end, and a continuous flange provided along one edge of the receptacle adjacent said open end, said flange being bent outwardly and downwardly from said edge and being engaged in a hook-like fashion at all points throughout its length with said cross bar and free to turn thereon, whereby the receptacle is supported from one side for free swinging movement at all times and normally hangs so that said edge is higher than the opposite edge of said receptacle.

1,567,619. ADJUSTABLE AUTOMOBILE HATRACK. MICHAEL S. RODSTEIN, Manhattan Beach, N. Y. Filed Mar. 19, 1923. Serial No. 626,202. 2 Claims. (Cl. 211—13.)



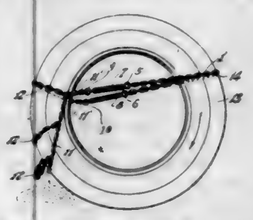
1. A hat holding device having means for securing it to the bows of a vehicle top or similar rigid object, comprising in combination a plurality of side straps formed of non-elastic webbing, attaching hooks connected to the ends of the side straps, a plurality of eyelets near each end of the side straps, and a plurality of cross straps formed of non-elastic webbing, each cross strap having its ends loosely looped around the side straps and slidable thereon, and said side straps being secured to the vehicle bows by looping the ends of the straps around said bows and maintaining them in position by said hooks and eyelets.

1,567,620. KEY CASE. HARRY RUVIN, Schenectady, N. Y., assignor, by mesne assignments, to Buxton Incorporated, Springfield, Mass., a Corporation of Massachusetts. Filed Dec. 16, 1920. Serial No. 431,137. 3 Claims. (Cl. 150—40.)



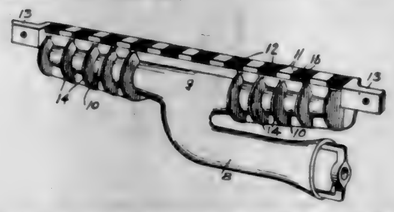
1. A key case holder comprising a sheet-metal plate having spaced slots therein adjacent one edge of the sheet, and a plurality of straps disposed across the slots to support key holders.

1,567,621. DEVICE FOR APPLYING NONSKID CHAINS TO TIRES. HARRY A. SALSBURG, Pittsfield, Mass. Filed June 5, 1925. Serial No. 35,078. 1 Claim. (Cl. 152—14.)



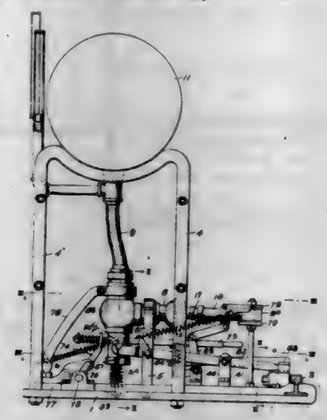
A device for the purpose described comprising a flexible member, each of the ends of which is fixedly connected to a separate tension device, said tension devices being each provided with a hook at its outer end, whereby the device may be applied to the wheel of a motor vehicle by looping the flexible member over the tread of the wheel, and the hooks are attached to two of the free ends of the side chains, the construction and arrangements being such that each of the spring devices is placed under tension when in use.

1,567,622. GAS BURNER. ALEXANDER B. SHARP, Steubenville, Ohio, assignor to The Ohio Foundry & Manufacturing Co., Steubenville, Ohio, a Corporation of Ohio. Filed Feb. 24, 1925. Serial No. 11,103. 6 Claims. (Cl. 158—99.)



1. A gas burner comprising an elongated chamber provided with a fuel inlet and with a plurality of openings, and burner grids adapted to be mounted in said openings, each of said grids comprising a unit composed of bars and holding strips that are of accordion or plaited form, the bars being disposed between the folds of said strips.

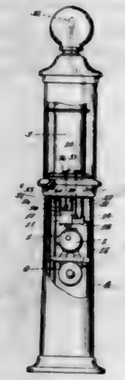
1,567,623. CAR-WHEEL LUBRICATOR. BERTRUM F. SMITH, Natrona, Pa. Filed Jan. 14, 1925. Serial No. 2,392. 5 Claims. (Cl. 184—2.)



5. In a car-wheel lubricator, the combination of a car-track, a lubricator gun mounted adjacent said track and including a horizontally disposed cylindrical body and an extensible nozzle pivoted to said body member in a ball-and-socket joint, a pair of horizontally extending guide plates forming a passageway for the horizontal swing of the nozzle, the said nozzle adapted when extended to engage the hub of a car-wheel advancing on said track and adapted to be swung along the said passageway by engagement with the hub-cap of an advancing car.

1,567,624. CONDUIT OUTLET BOX. FLOYD C. SMITH and EDWIN A. OLLEY, Syracuse, N. Y., assignors to Crouse-Hinds Company, Syracuse, N. Y., a Corporation of New York. Filed Mar. 29, 1921. Serial No. 456,309. 3 Claims. (Cl. 200—52.)

1. The combination of a conduit outlet box, comprising a body open at one end and formed with a laterally extending portion opening into the body and closed at its top, bottom, outer end, and front and rear sides, and being accessible through the open end of the body, the lateral extension being formed with means for connection

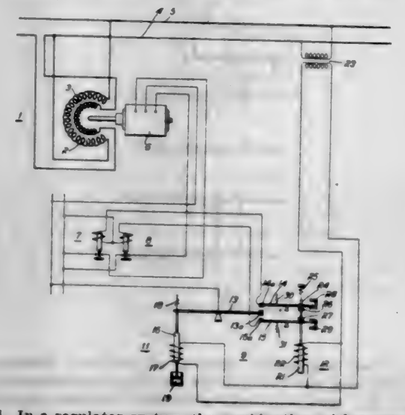


to a conduit enclosing the service wires, a switch located within the lateral extension, and a switch located within the body, and operating means for the switches respectively, extending above the tops of the lateral extension and the body.

1,567,625. PLATED ARTICLE AND ITS MANUFACTURE. JOSEPH A. SMITH, Attleboro, Mass. Filed Jan. 23, 1925. Serial No. 4,271. 11 Claims. (Cl. 204—13.)

1. The process of coating metal articles, which comprises coating the article with an intermediate layer of a metal of a substantially low melting point, in coating the intermediate layer with a layer of a metal of substantially higher melting point and then subjecting the coated article to heat under conditions causing an alloying of the intermediate layer and the metal of the article without any substantial inter-alloying with the outer layer.

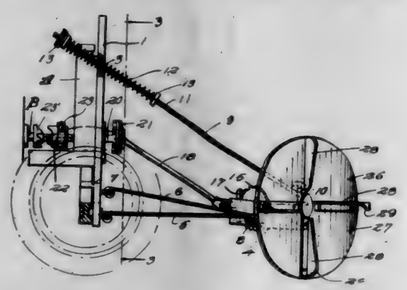
1,567,626. REGULATOR SYSTEM. SEVERN D. SPRONG, New York, N. Y., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 20, 1922. Serial No. 537,859. 21 Claims. (Cl. 171—119.)



4. In a regulator system, the combination with a supply circuit and a regulator connected thereto, of control means therefor comprising a damped electromagnet, a main contact member controlled thereby, a pair of mov-

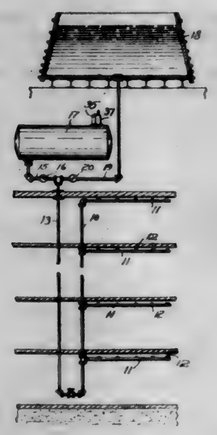
ably-mounted contact members co-operating with said main contact member, and an undamped electromagnet adapted to control the operation of the pair of contact members.

1,567,627. SNOWPLOW FOR MOTOR VEHICLES. THOMAS K. STANTON, Brusett, Mont. Filed Nov. 15, 1924. Serial No. 750,084. 3 Claims. (Cl. 37—43.)



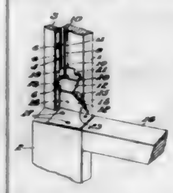
1. The combination with a motor vehicle; of a snow plow comprising a pair of vertical standards supported on the forward end of said vehicle, a frame pivotally carried on said standards, rotary fans carried on the outer ends of said frame, means for rotating said fans, rods connecting the outer end of said frame with the upper ends of said standards, and means in connection with said standards and the upper ends of said rods for yieldingly and adjustably securing the same in position whereby to support the frame in various adjusted positions.

1,567,628. RELIEF-VALVE-OPERATING DEVICE FOR PRESSURE TANKS. LANCE W. STAUGHTON, New Dorp, N. Y., assignor to Rockwood Sprinkler Company of Massachusetts, a Corporation of Massachusetts. Filed Mar. 29, 1922. Serial No. 547,821. 7 Claims. (Cl. 169—5.)



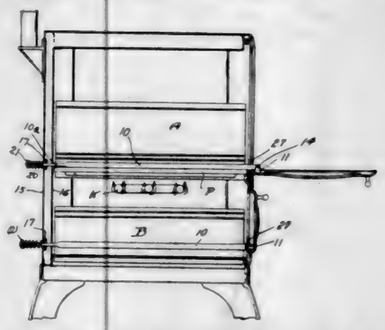
1. The combination with a supply main extending downwardly, and two branches extending therefrom at the top, of a tank containing water and air under pressure connected with one branch, a gravity supply tank connected with the other branch, check valves in both of said branches for preventing backward flow towards the tanks, a port at the top of the pressure tank, a valve for closing said port, a shallow pan near the bottom of said tank, and a rod connecting said pan with the valve and supporting it therefrom for opening said valve when the level of water therein approaches the bottom of said tank.

1,567,629. WINDOW-SASH LOCK. CARL A. STROM, Floral Park, N. Y. Filed Sept. 25, 1922, Serial No. 590,353. Renewed May 25, 1925. 8 Claims. (Cl. 292—120.)



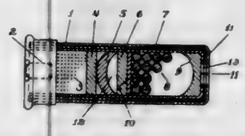
1. A window sash lock having a catch pivoted to swing thereon, the free end of said catch having two integral locking members extending in the same direction and offset laterally one from the other to simultaneously fasten both the lower and upper sashes of a window in adjusted positions.

1,567,630. OVEN-DOOR HINGE. ALBERT H. TINNERMAN, Cleveland, Ohio. Filed July 5, 1924. Serial No. 724,327. 20 Claims. (Cl. 126—191.)



1. A compartment closure means comprising a door, shiftable door supporting means extending through an opening of the compartment including a pivotal connection between the door and said means which is shifted through said opening and resilient means for shifting the door supporting means when the door is swung to a compartment closing position.

1,567,631. FLEXIBLE-END-SEAL CARTRIDGE AND AMMUNITION. ROBERT L. WHEELER, Plentywood, Mont. Filed Nov. 25, 1924. Serial No. 752,224. 3 Claims. (Cl. 102—16.)

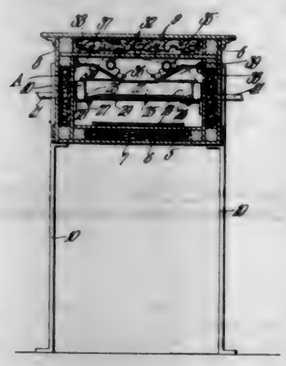


1. A cartridge shell having a wall comprising a plurality of layers, one of which layers in that portion of the shell corresponding to the shot chamber is of soft and flexible metal which extends along the length of said shot chamber, a shot seal in the front end of said cartridge shell and the front portion of the wall of said cartridge shell comprising inwardly bent sectors which bear against said shot seal.

1,567,632. COMPOSITION OF MATTER FOR SELECTIVE CASE HARDENING. CHARLES G. WHINFREY, Shaker Heights Village, Ohio. Filed Aug. 23, 1922. Serial No. 583,928. 11 Claims. (Cl. 148—19.)

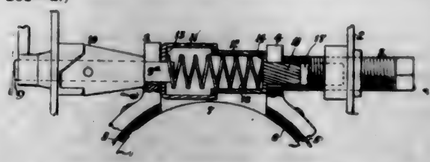
4. An improved composition of matter for use in selective case-hardening, including fire-clay, sodium silicate, and a thinner for the latter capable of removing grease and oil from the article treated.

1,567,633. CONFECTION-COOLING APPARATUS. ALONZO LINTON BAUSMAN, Springfield, Mass., assignor to National Equipment Company, Springfield, Mass., a Corporation of Massachusetts. Filed May 17, 1923. Serial No. 639,629. 5 Claims. (Cl. 62—31.)



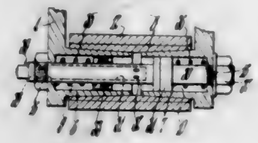
1. In combination, a casing, a confection carrying conveyer extending longitudinally therethrough, laterally spaced conduits extending longitudinally of the casing and above the conveyer and adapted for the circulation of a cooling medium therein, a pair of laterally-spaced baffle plates extending longitudinally of the casing in underlying relation with said conduits and in overlying relation with said conveyer, the adjacent side edges of said plates being disposed at a lower level than the non-adjacent edges and affording a channel between them which overlies the central portion of the conveyer and through which air cooled by said conduits passes downwardly and is first applied to cool the confections carried near the central portion of said conveyer thereafter dividing into two streams which pass in opposite directions crosswise of the conveyer toward its side edges and eventually returning past the higher edges of said baffle plate to said cooling conduit.

1,567,634. AUTOMOBILE BRAKE-BAND ATTACHMENT. DAVID BLUMBERG, Bridgeport, Conn. Filed Dec. 31, 1924. Serial No. 759,090. 2 Claims. (Cl. 188—2.)



1. In combination with a brake band having opposed ears and a pedal shaft projecting through one of said ears, an adjusting screw in alignment with said shaft having an opening in its inner end, telescopic cup shells interposed between the ears, one of said shells freely engaging the inner end of the shaft, the other shell having a pintle projecting through the opposed ear and into the opening of the adjusting screw, and a spring located within the shells and abutting their end walls and functioning to always keep said walls in contact with said ears and to normally release the brake band.

1,567,635. SPRING SHACKLE AND LUBRICATING MEANS THEREFOR. WESTON F. BRIGHT, Longmeadow, Mass. Filed Nov. 12, 1920. Serial No. 423,605. 7 Claims. (Cl. 308—120.)



1. A spring shackle, comprising a pair of separate and oppositely positioned side members having integral therewith aligned inwardly projecting hubs having their outer surfaces tapering inwardly, a sleeve having a surface for fitting over said hubs, and means connecting said side members adapted to be adjusted to move said members toward one another to take up wear between the hubs thereof and the sleeve and to prevent an axial movement of the bushing with respect to the side members.

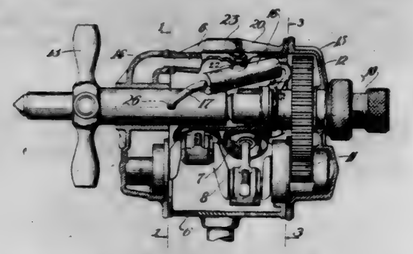
1,567,636. RETAINING CLIP FOR KEY CASES AND THE LIKE. WARNER R. BUXTON, Longmeadow, Mass., assignor to Buxton, Incorporated, Springfield, Mass., a Corporation of Massachusetts. Filed Apr. 5, 1924. Serial No. 704,520. 5 Claims. (Cl. 24—3.)

1. In combination, a spring retaining clip having one part bent backwardly upon another part and yieldingly urged toward the latter, a member to which the clip is to be secured adapted to be inserted between said parts, and interengageable devices provided on said first named part and one face of said member and yieldingly held in engagement by the pressure of the second named part against the opposite face of said member.

1,567,637. VENTING MEANS FOR MOTORS. ANTHONY H. COLLINS, Cleveland, Ohio, assignor to Chicago Pneumatic Tool Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 19, 1921. Serial No. 523,543. 40 Claims. (Cl. 121—38.)

1. In a device of the class described, the combination of a crank shaft casing, a crank shaft therein, lubricant in the casing, and means permitting the escape of air

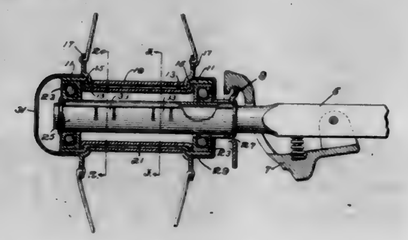
from the casing but preventing lubricant from escaping comprising a member within said casing having vents opening at different points in the latter, said vents being



so arranged that in any position of the crank casing at least one of the vents will be disposed above the level of the lubricant.

---

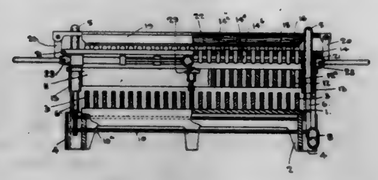
1,567,638. HUB. WILLIAM A. DEAN, Worcester, Mass., assignor to F. A. Whitney Carriage Company, Leominster, Mass., a Corporation of Massachusetts. Filed Feb. 12, 1925. Serial No. 8,732. 3 Claims. (Cl. 301—105.)



2. A hub comprising outer and inner sleeves, bearings interposed between them and yielding means carried by the inner sleeve adapted to bind on the axle when inserted in the sleeve whereby the latter will be non-rotatably held to the former.

---

1,567,639. CAPSULE-FILLING MACHINE. LOUIS RALPH EASTMAN, Highland Park, Mich. Filed July 10, 1922. Serial No. 573,986. 15 Claims. (Cl. 226—41.)



1. In an apparatus of the character described, a member for clamping capsules comprising a pair of bars having cooperating recesses in their adjacent edges adapted in one position to receive the capsules, said bars being relatively longitudinally movable in the same plane to grip the capsules.

4. In an apparatus of the character described, the combination of a trough comprising a block having a series of rows of apertures therein for receiving capsule bodies, and a frame hingedly connected to said block to form the sides of the trough, means for limiting the movement of the capsule bodies in one direction relative to said block, said means permitting the open ends of the capsule bodies to be below the upper surface of said block, and means for moving said block relative to said limiting means.

10. In an apparatus of the character described, the combination with a cap plate having apertures therein for receiving capsules vertically, of an aligning plate having apertures for receiving capsules horizontally, and a loading plate provided with shoulders for engaging the caps to prevent the same from passing therethrough horizontally provided also with apertures permitting the capsules to pass through vertically.

15. In an apparatus of the character described, the combination of an aligning plate having a plurality of apertures therein, each adapted to receive a horizontally disposed capsule, a cap plate having a plurality of apertures adapted to receive vertically disposed capsules, and a loading device between said plates adapted to tilt said capsules from horizontal to vertical position with the cap end upwards.

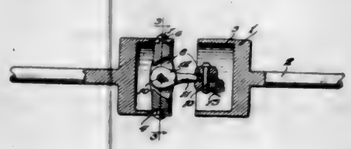
---

1,567,640. EXPANSIBLE CHAIN. GASTON A. GUYOT, Attleboro, Mass., assignor to Guyot Brothers, Attleboro, Mass. Filed Mar. 23, 1925. Serial No. 17,663. 8 Claims. (Cl. 59—79.)

1. In an expansible chain, main members having integral inwardly extending stems at one end thereof, the extremities of which are doubled upon themselves to form abutments, connector members having slots at one end through which the stems extend to hingedly connect same to the main members, stops on the opposite ends of the connector members engageable with the abutments to limit outward movement of the adjacent main members, the sides of each of the members being extended inwardly to form hollow ribs, the ribs of adjacent members being telescoped, and springs extending through the respective alined ribs to tension all the members.

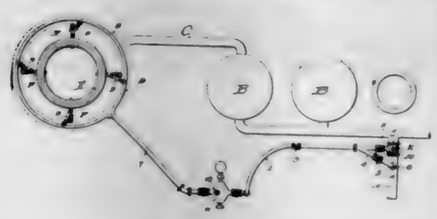
---

1,567,641. UNIVERSAL JOINT. CHARLES WALTER HARRIS, Salem, Conn. Filed Dec. 19, 1923. Serial No. 681,587. 1 Claim. (Cl. 64—91.)



A universal coupling comprising recessed heads, the circumscribing wall of each head having longitudinal slots formed therein at diametrically opposite points, a knuckle in the recess of each head and having terminal studs pivotally and slidably engaging the slots in the walls thereof and provided intermediate its ends with a longitudinal slot, a link having its end flattened, the flattened ends being disposed at a right angle to each other and engaging the slots of the respective knuckles, and means pivotally connecting the flattened ends of the link to the respective knuckles.

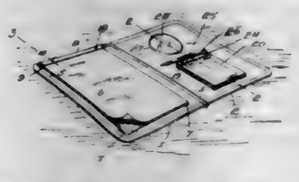
1,567,642. CHARGING SYSTEM FOR BLAST FURNACES. WILLIAM E. HARRISON and KENNETH D. STEWART, Youngstown, Ohio. Filed Feb. 24, 1921. Serial No. 447,497. 9 Claims. (Cl. 266—28.)



1. A charging system for blast furnaces including a cold air blast pipe for the furnace, a delivery pipe having communication with the furnace interior at the plane of or adjacent the hot blast, a receiver for the charge in communication with said delivery pipe, and an air pressure supply pipe having valved communication with the cold air blast pipe for the furnace.

---

1,567,643. COMBINATION MENU AND ORDER-SLIP HOLDER. ALVA O. HEARNE, Washington, D. C. Filed Nov. 18, 1922. Serial No. 601,873. 2 Claims. (Cl. 129—1.)



1. A holder for the purpose set forth comprising a body portion formed of a pair of folds, a pair of spaced apertured brackets secured to the upper end of the inner face of one of said folds, a pair of clamping plates normally arranged in superposed relation and having their outer sides provided with aligning barrels, a pair of pintles mounted in said barrels, each of said pintles mounted in one of said brackets, one of said plates provided with openings, the other of said plates provided with a pair of lugs for connecting an article therewith, a pair of springs carried by said pintles and bearing against said plates for maintaining them in superposed relation and with the lugs of one plate extending through the openings of the other plate.

---

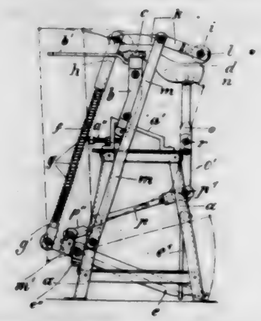
1,567,644. TANNING OF SKINS AND HIDES. JOHANNES HELL, Esslingen, Germany. Filed Aug. 29, 1921. Serial No. 496,597. 11 Claims. (Cl. 149—4.)

11. In the manufacture of leather from hides or skins, the step of preparing the hide or skin for a final tanning action, which preparatory step includes the treating of the hide or skin with substances reacting to form a substantially insoluble magnesium salt within the structure of the hide or skin.

---

1,567,645. APPARATUS FOR LEVELING SOLES OF SHOES. FRIEDRICH HOFMANN, Schmoelln, Germany. Filed Mar. 14, 1924. Serial No. 699,206. 2 Claims. (Cl. 12—34.)

1. In an apparatus for leveling the soles of shoes having a hand-operated leveling roller, a foot lever for yieldingly pressing said leveling roller against the sole, a last, a two-armed lever supporting said last, a toe abutment for the shoe held on said last, and a means for simulta-



neously pressing said last and the shoe thereon against said toe abutment, and said leveling roller against the sole upon the operation of said foot lever.

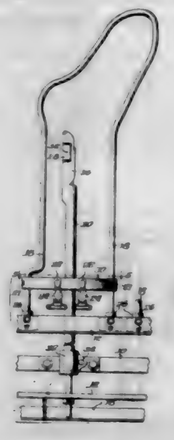
---

1,567,646. PROCESS FOR THE PRODUCTION OF COMBINATIONS OF RUBBER AND PAPER AND PRODUCTS OBTAINED THEREBY. ERNEST HOPKINSON, New York, and REED P. ROSE, Jackson Heights, N. Y., assignors to General Rubber Company, New York, N. Y., a Corporation of New Jersey. Filed Oct. 22, 1925. Serial No. 64,242. 9 Claims. (Cl. 92—21.)

1. In a process for the manufacture of rubber and paper and similar combinations the steps of combining with pulp a quantity of rubber latex, agglomerating the rubber, subjecting the mass to further mixing, and then coagulating the rubber.

---

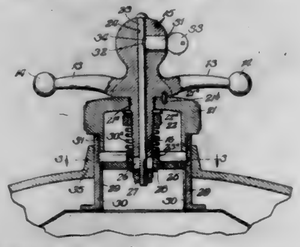
1,567,647. EMBROIDERING MACHINE. RUDOLPH F. HOUSER, Milwaukee, Wis., assignor to Phoenix Hosiery Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed Mar. 10, 1924. Serial No. 698,097. 2 Claims. (Cl. 112—103.)



1. In a multiple embroidering machine, the combination of a frame mounted on the pattern bar having a contour similar to that of the article to be embroidered, an end piece slidable on said frame, a plurality of studs spaced

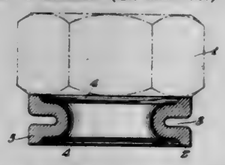
relatively to each other on said end piece, and clips cooperating with said studs to securely hold the edges of the article to be embroidered without injury thereto.

1,567,648. RADIATOR-CAP ATTACHMENT. BURTT J. HUBBARD, Kokomo, Ind. Filed June 27, 1921. Serial No. 480,517. 3 Claims. (Cl. 220—24.)



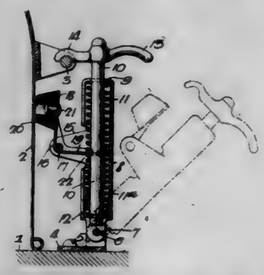
2. The combination of a spout with a rotatable cap, a handle secured thereto and having a depending stem extending therethrough, a vertical recess within said spout, and means engageable by said recess for preventing rotation of said cap.

1,567,649. NUT LOCK. AXEL GUSTAF EMANUEL HULTGREN and JOSEF HENRIK EMANUEL THORÉN, Gottenborg, Sweden, assignors to Aktiebolaget Svenska Kullager-Fabriken, a Corporation of Sweden. Original application filed June 7, 1922, Serial No. 566,534. Divided and this application filed Feb. 2, 1924. Serial No. 690,193. 3 Claims. (Cl. 151—38.)



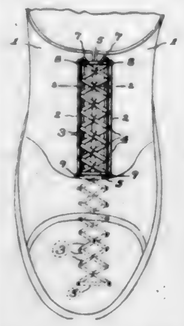
1. A nut-lock comprising a resilient annular washer of U-shape in cross section, having near its circumference two annular surfaces for engaging the nut and the part to be fastened respectively, and formed with an open annular channel the depth of which is greater than the radial width of said annular surfaces, thereby giving the structure resiliency.

1,567,650. AUTOMOBILE HOOD CATCH. ARTHUR C. JACKSON, Philadelphia, Pa., assignor, by mesne assignments, to The Yale & Towne Manufacturing Company, Stamford, Conn., a Corporation of Connecticut. Filed June 16, 1923. Serial No. 645,809. 3 Claims. (Cl. 292—114.)



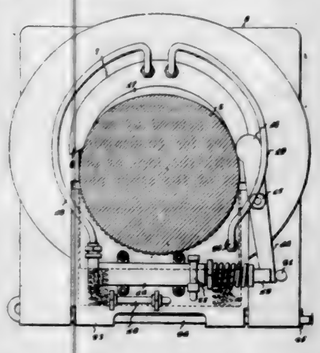
1. The combination in a hood catch, of a bearing attached to the rail of an automobile; a casing mounted on the bearing; a rod extending through the casing, said rod having a handled arm arranged to engage the hood of an automobile; a spring located within the casing, the head of the rod forming a bearing for the spring; and an anti-rattling device pivoted to the casing and actuated by the spring.

1,567,651. SHOE-LACING DEVICE. JOHN ARTHUR KAYE, Sault Ste. Marie, Ontario, Canada. Filed Aug. 22, 1925. Serial No. 51,799. 5 Claims. (Cl. 24—207.)



1. A shoe fastening device comprising longitudinal guide strips adapted to be secured to the shoe uppers on opposite sides of the opening, a slide formed of oppositely inclined intersecting bars rigidly connected to each other and simulating the appearance of shoe lacing, studs connecting the ends of the bars at the edges of the slide and slidably engaging the guide strips to admit of the slide being moved longitudinally thereof into and out of operative position, the slide spanning the opening between the uppers when it is in operative position, and means for holding the slide in operative position.

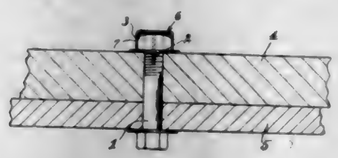
1,567,652. DRIVING AND ENGINE-TRUCK BOX LUBRICATOR. GEORGE WILLIAM KELLER, Portsmouth, Ohio. Filed July 19, 1924. Serial No. 727,053. 1 Claim. (Cl. 308—84.)



In a lubricating device for shafts, a liner positioned above the shaft, said liner constituting an upper reservoir, a lower reservoir arranged under the shaft, a pipe establishing communication between the reservoirs, a pump communicating with the pipe for forcing liquid from the lower reservoir and into the upper reservoir, a piston forming a part of the pump and having a notched end portion, an arm pivotally supported adjacent to the shaft and having its lower end fitted within the notched end portion and carrying a head at the upper

end thereof, a cam on the shaft for engaging the head to move the lower end of the arm inwardly to operate the pump piston, and an overflow pipe establishing communication between the reservoirs.

1,567,653. NUT LOCK. HERMAN KOHN, Oakland, Calif. Filed Aug. 27, 1923. Serial No. 659,521. 2 Claims. (Cl. 151—31.)

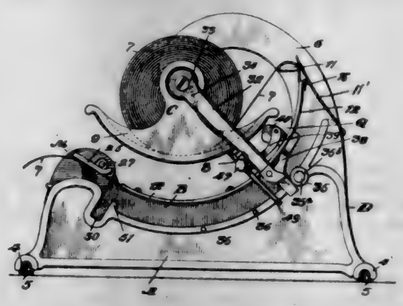


1. A nut lock assembly comprising in combination a bolt, a longitudinal slot in the bolt extending completely across from one side to the other, a nut on the bolt, a channel shaped nut lock having a web of such length to cover the bolt and nut, sides depending straight from the web with plane inner surfaces and a tapered central tongue flat on both sides driven in the slot in the bolt the said depending sides engaging the sides of the nut.

1,567,654. PORCELAIN CRUCIBLE. ALFRED KÖNIG, Charlottenburg, Germany, assignor to the Firm: Staatliche Porzellan-Manufactur, Berlin, Germany. Filed Aug. 5, 1924. Serial No. 730,246. 1 Claim. (Cl. 263—48.)

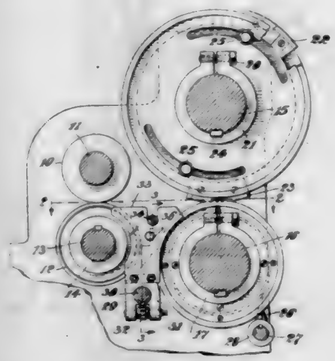
As a new article of manufacture porcelain crucible having a bottom of finely porous material melted together with the porcelain.

1,567,655. TAPE-SERVING DEVICE. THEODORE H. KRUEGER, New York, N. Y. Filed July 19, 1921. Serial No. 485,868. 37 Claims. (Cl. 91—14.5.)



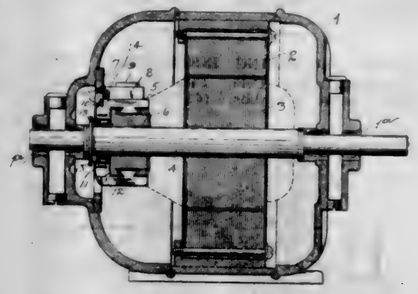
1. In a tape feeding device, a pivoted arm, an operating handle fixed thereon, and a tape gripping mechanism mounted on said arm, said mechanism comprising a pivoted gripping member having an eccentric gripping surface.

1,567,656. SHEET SCORING AND SLOTTING MECHANISM. SAMUEL M. LANGSTON, Wenonah, N. J. Filed Jan. 19, 1924. Serial No. 687,215. 16 Claims. (Cl. 93—58.)



1. In combination a slotting member, a scoring member, a member engaging with both of said first mentioned members, and means for moving said last mentioned member to effect axial adjustment of the two first mentioned members.

1,567,657. SHORT-CIRCUITING DEVICE FOR COMMUTATORS. EVERETT P. LARSH, Dayton, Ohio. Filed Dec. 6, 1921. Serial No. 520,342. 18 Claims. (Cl. 172—279.)

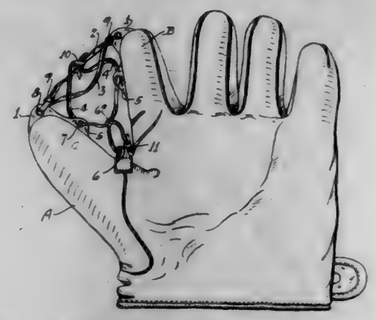


1. In a short circuiting device for motors, a plurality of contrifugally actuated weights arranged circumferentially of the armature shaft of the motor and operable radially to effect the electrical interconnection of the commutator bars of the motor, and a flat involute spring resisting the radial movement of the weights and against the yielding resistance of which the weights move under centrifugal influence to effect the short circuiting of the motor.

1,567,658. BASEBALL GLOVE OR MITT. HARRY B. LATINA, East St. Louis, Ill., assignor to Rawlings Manufacturing Company, St. Louis, Mo., a Corporation of Missouri. Filed July 12, 1924. Serial No. 725,582. 6 Claims. (Cl. 2—19.)

1. A baseball glove or mitt provided with a thumb, an index finger portion, and a skeleton-like pocket or back stop combined with said parts and comprising an

intermediate portion against which the rear side of a caught ball strikes and a top portion secured to said



thumb and index finger portion beyond the tip ends of same and arranged so as to prevent the ball from jumping upwardly out of the pocket.

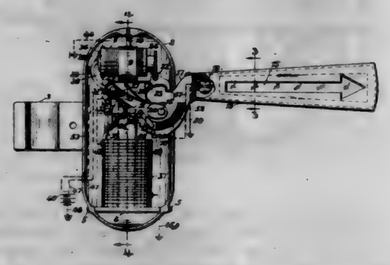
---

1,567,659. HAND WEAPON. RUBEN B. LAWRENCE, Bellevue, Pa., assignor to Federal Laboratories, Incorporated, Pittsburgh, Pa., a Corporation of Delaware. Filed Dec. 1, 1922. Serial No. 604,450. 15 Claims. (Cl. 42—1.)

2. The combination with a weapon for emitting a stream of incapacitating gas, of an auxiliary weapon, substantially as described.

---

1,567,660. SIGNALING INSTRUMENT. ARTHUR L. LEGGETT, Denver, Colo. Filed Mar. 7, 1923. Serial No. 623,434. 7 Claims. (Cl. 177—327.)



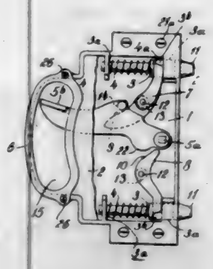
1. In an electro-mechanical movement, the combination with an element adapted to move alternately from one to another of two determinate positions, of an electromagnetic device to move the element to one of said positions, a latch to hold the element in said position, an electro-magnetic device acting upon the latch, to cause the element to return to the other position, a circuit for said devices, a switch in said circuit, and an automatic switch adapted to connect said devices alternately in the circuit by movement of said element, and including means controlled by the current flow through said devices to hold the automatic switch from operating until after the circuit has been reopened in the first mentioned switch.

1,567,661. DOLL-DRESS STRUCTURE. JOHN LEVAGGI and WILLIAM J. DOHERTY, Los Angeles, Calif. Filed Oct. 25, 1923. Serial No. 670,711. 8 Claims. (Cl. 46—40.)

1. A doll-dress of the nature disclosed comprising a supporting member adapted to be laterally engaged upon a doll or other figure of like character, said member having a single opening defining upper and lower marginal edges to engage the front surface of the figure and intermediate means adapted to engage the rear surface of the figure, and elements of ornamentation secured to said member and constituting component parts of the dress.

---

1,567,662. VEHICLE LATCH. CARL MACK, New York, N. Y., assignor, by mesne assignments, to Mack Lock Co. Inc., Long Island City, N. Y., a Corporation of New York. Filed Sept. 21, 1921. Serial No. 502,132. 13 Claims. (Cl. 292—34.)



1. In a latch, a set of bolts, corresponding actuators for each of said bolts, an operating member common to said bolt-actuators, and means for causing one of said bolts to move in advance of the other when operated.

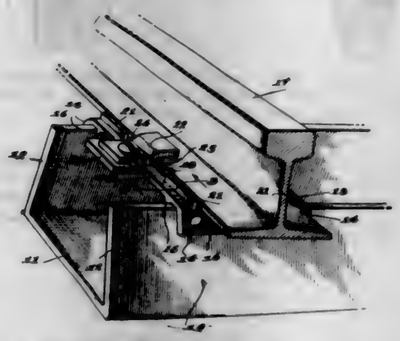
---

1,567,663. CONSTRUCTION MATERIAL AND PROCESS FOR MANUFACTURING SAME. PAOLO MARPILLERO, LORENZO LORENZETTI, and IVO MARZOLA, Milan, Italy. Filed Mar. 24, 1924. Serial No. 701,574. 2 Claims. (Cl. 18—475.)

1. A process of manufacturing light, insulating and porous construction elements, comprising the steps of subjecting a fibrous vegetable substance to the action of a fireproofing solution; intimately mixing the fibrous substance so treated, while still damp, with magnesium oxide and cementitious material to form a damp non-coherent mass; filling moulds with the damp mass and then allowing said mass to set at least partially and in an uncompressed state in the moulds.

---

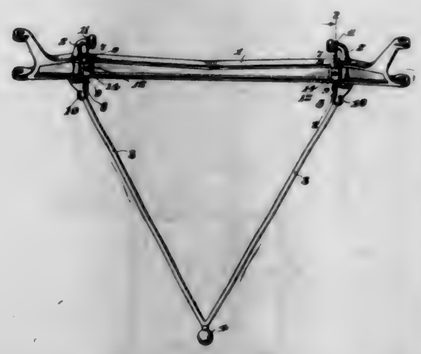
1,567,664. RAIL-SECURING DEVICE. JOSEPH D. MARTIN, Summerside, Prince Edward Island, Canada. Filed Nov. 19, 1924. Serial No. 750,829. 3 Claims. (Cl. 238—64.)



1. A device of the character described, comprising a substantially U-shaped crosstie, the side walls of said U-shaped crosstie converging as they extend upwardly, a base plate arranged upon the upper edges of the side walls of said U-shaped crosstie, said base plate having its opposite ends diverging from each other as they extend downwardly for engaging the outer sides of said converging side walls of said U-shaped crosstie, means for securing said diverging ends of said base plate to said converging side walls of said crosstie, and a rail carried by said base plate.

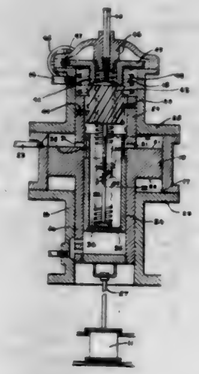
---

1,567,665. RADIUS-ROD SUPPORT. SHELLMAN R. MARTIN, Wrightsville, Ga. Filed Mar. 16, 1925. Serial No. 15,814. 2 Claims. (Cl. 267—66.)



1. A radius rod support of the character set forth, comprising a two part coupling rod having means for engaging one end of one part under a radius rod and one end of the other part over a spring perch, and means connecting the said two parts and adapted to draw the same together.

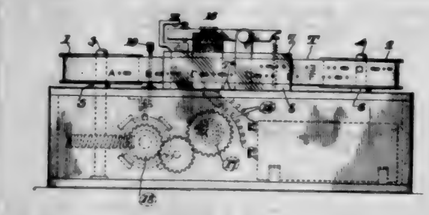
1,567,666. GOVERNOR. HENRY LEA MASON, Philadelphia, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 14, 1925. Serial No. 9,103. 8 Claims. (Cl. 264—14.)



1. In a fluid pressure operated governing apparatus, means for effecting governing movements comprising a cylinder, a hollow piston within the cylinder and adapted to reciprocate therein, said piston having a port inclined to the longitudinal axis of the cylinder and permitting the passage of motive fluid to and from one side of the piston, a pilot valve within the piston and having a similarly inclined port adapted when in registry with the port in the piston to admit motive fluid thereto and effect a movement thereof longitudinally of the cylinder, and means effecting a relative rotational movement of the piston to the pilot valve in the direction of inclination of the ports during longitudinal movement of the piston, whereby a port opening in the piston, longer than the longitudinal movement of the pilot valve, is effected.

---

1,567,667. INSTRUMENT FOR TEACHING TELEGRAPHY. RAY G. MILLER, West Englewood, N. J. Filed Feb. 27, 1922. Serial No. 539,543. 9 Claims. (Cl. 178—115.)

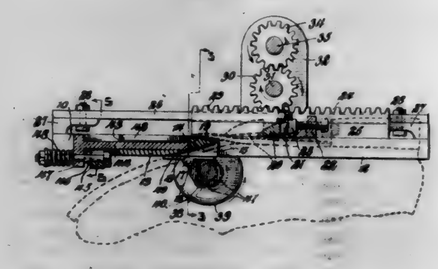


1. A device for teaching telegraphy comprising, in combination, a tape bearing impressions corresponding to characters of a telegraphic code, means for advancing the tape, a window past which the tape is movable and through which the impressions on the tape are visible, a reproducer, and a stylus cooperative with the portion of the tape opposite to the window and controlled by the code impressions therein for causing operation of the reproducer in accordance with the code impressions in the tape, said window providing a platen against which the stylus presses the tape and through which that portion of the tape engaged by the stylus is visible.

**1,567,668. PROCESS FOR RECOVERING THE LYE FROM DISINTEGRATED CELLULOSES.** GUSTAV MOSEBACH, Nordhausen, Germany. Original application filed July 5, 1924, Serial No. 724,454. Divided and this application filed May 5, 1925. Serial No. 28,254. 1 Claim. (Cl. 92—2.)

A method for the recuperation of the lye from dissolved straw cellular substance and the like consisting in heating the straw cellular substance together with undiluted lye to approximately 70° C., in stirring the mixture continuously during the heating, in compressing the material to squeeze out the lye, in treating the compressed material with hot water at approximately 70° C., in stirring this mass, in squeezing out the hot water containing approximately 10% of lye and in re-using the squeezed out lye in the preparation of fresh lye.

**1,567,669. SHANK SKIVER.** JOE MUSACCHIA, Sacramento, Calif. Filed July 23, 1924. Serial No. 727,741. 9 Claims. (Cl. 12—17.)



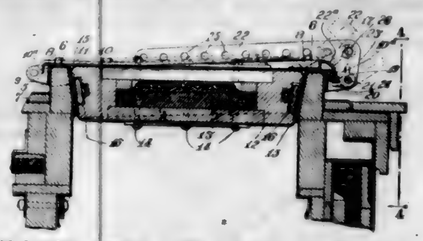
1. A skiver for use in repairing shoes, comprising, in combination, a gage block adapted to be interposed between the insole and the front end of the shank, said block being wedge shaped with sufficient open space beneath the same to accommodate the upper and insole of a shoe while the front end of the shank rests upon the upper surface of the block, a carriage, a knife supported by the carriage, and means to advance the carriage in a direction to cause said knife to skive the front end of the shank when the latter is supported by the block.

**1,567,670. FLYING MACHINE.** GEORGE FRANCIS MYERS, New York, N. Y. Filed Dec. 1, 1916, Serial No. 134,547. Renewed May 4, 1922. Serial No. 558,427. 14 Claims. (Cl. 244—30.)

1. In combination with a flying machine, of a gas holder, and a car mounted in the center of the said gas holder, the said car having two complete and separate sections of the said gas holder arranged fore and aft of the said car and having the same cross section as the said gas holder.

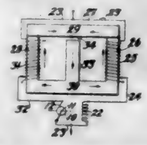
**1,567,671. REFRIGERATOR-CAR HATCH CLOSURE.** KARL F. NYSTROM, Chicago, Ill. Filed Apr. 6, 1923. Serial No. 630,199. 16 Claims. (Cl. 98—22.)

1. In a railway refrigerator car provided with a hatch opening, a metallic frame for said opening provided with hinge-butts on one side thereof and with a lever-supporting bracket on the other side thereof, a combined cover and plug hingedly secured at one end to said hinge-butts while the opposite end is provided with a depending projection, and a lever pivotally secured to



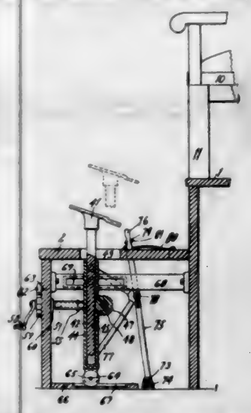
said bracket, with a portion of said lever adapted to engage with said depending projection when said lever is swung into cover opening position.

**1,567,672. ELECTRIC MOTOR.** ALFRED E. OSWALD, Bogota, N. J., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Jan. 15, 1921. Serial No. 437,397. 7 Claims. (Cl. 172—276.)



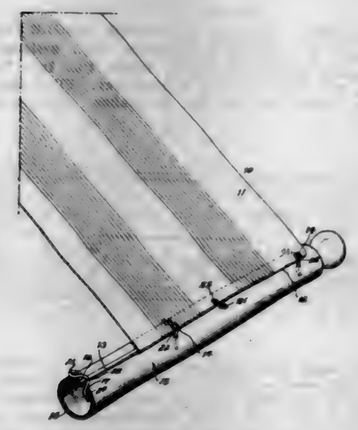
1. An alternating current motor comprising an armature coil, a field coil in shunt around the armature, and regulating coils; one regulating coil in series with the armature, and the other in series with the field; said regulating coils connected in parallel circuits to oppose each other and co-operative to control the speed of the motor, and a core upon which said regulating coils are placed, said core having a magnetic return common to the coils.

**1,567,673. SHOE-SHINING STAND.** PASQUALE PALOMBELLA, Springfield, Mass. Filed June 14, 1923. Serial No. 645,268. 10 Claims. (Cl. 15—265.)



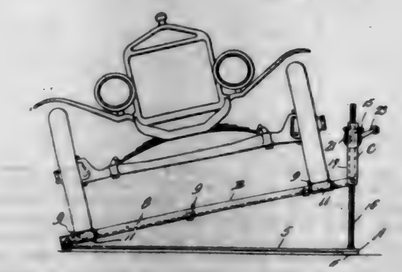
1. The combination, in a shoe-shining stand, with supporting means, and approximately vertical hollow holders arranged to move horizontally on said supporting means, of rods in said holders, foot-rests mounted on said rods, means to raise and lower said rods in said holders, and means to move said holders on said supporting means.

**1,567,674. SLIP FOR AWNING-FRONT RODS.** ORVILLE E. PEARS, Baldwin, New York, and NORBERT G. JOSEPH, Teaneck, New Jersey, assignors to F. J. Kloes, Inc., a Corporation of New York. Filed Oct. 1, 1924. Serial No. 740,960. 7 Claims. (Cl. 156—25.)



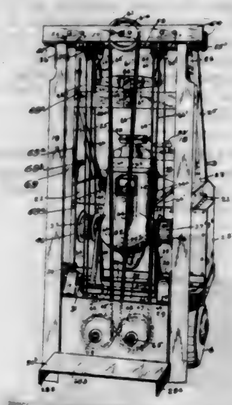
1. In an awning, the combination, of a tubular front rod provided with a pair of circumferentially spaced apertures, an awning cloth provided with an edge rod extending parallel to the front rod, a securing clip disposed in a plane perpendicular to the lengths of said rods, said clip lapping the edge rod to secure the awning cloth to the front rod, one end of said clip intruded into one of the apertures, the other end of the clip bent back upon itself to form an eye and a screw extending through said eye and threaded into the other aperture.

**1,567,675. AUTOMOBILE JACK.** GUY L. PITT and WALTER G. HARPER, Rocky Mount, N. C. Filed Feb. 18, 1925. Serial No. 10,008. 1 Claim. (Cl. 214—1.)



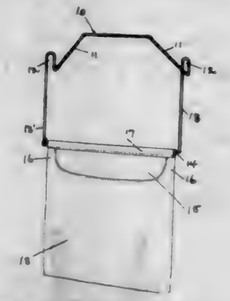
In a device of the class described, a stationary base, a member having one end hinged to one end of the base, a screw rising from the other end of the base, an inverted U-shaped frame having its intermediate portion provided with an opening through which the screw extends, a gear journaled in the opening and threaded on the screw, a bracket strip mounted in one corner of the frame, a crank shaft journaled through the bracket strip and the adjacent side of the same, and a gear fixed to the shaft and meshing with the first mentioned gear, the terminals of the inverted U-shaped frame being pivotally engaged with the other end of the member.

**1,567,676. INDUSTRIAL TRUCK.** EDWARD H. REMDE, Cleveland, Ohio, assignor to The Baker R. & L. Company, Cleveland, Ohio, a Corporation of Ohio. Filed Oct. 3, 1922. Serial No. 592,138. 12 Claims. (Cl. 187—11.)



5. In a truck, the combination with a frame and wheels therefor, of a vertical frame constituting guides, mounted on said first mentioned frame, an elevating device slidably mounted in said guides, a plurality of pairs of sheaves carried by said vertical frame and said device, one pair of said sheaves being mounted on said guide frame on an axis disposed midway between the guides, a pair of drums carried by said first mentioned frame and disposed at opposite sides of and equal distances from the axis of the pair of sheaves on said guide frame, means for rotating said drums, an equalizing element secured to said guide frame, flexible hoisting members, each arranged to wind on and off one of said drums and engage one sheave of each pair thereof, and means for securing the free ends of said hoisting members to the ends of said equalizing element.

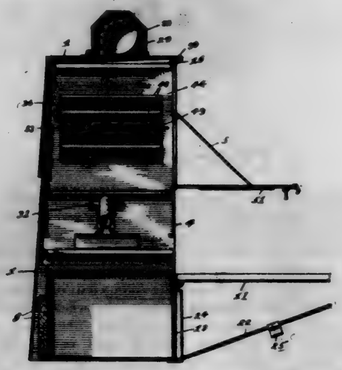
**1,567,677. CLOTHESPIN BAG.** ZAIDA M. RICKETTS, Normal, Nebr. Filed June 1, 1925. Serial No. 34,099. 1 Claim. (Cl. 68—11.)



A clothes pin bag and a support therefor, said clothes pin bag having substantially the width of said support, the front portion of said clothes pin bag having upwardly projecting tongues at its lateral edges, a lap on the upper edge of the rear portion of said bag, said lap being folded down over the upper extremities of said tongues and stitched thereto to form a looped portion, said support being formed of resilient material and having a lower horizontal portion for engaging the looped portion of said clothes pin bag and having also a pair of vertical portions at its sides, one of said ver-

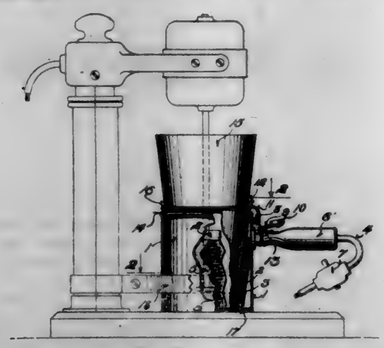
tical portions having a detachable connection with said horizontal portion at one of the lower corners of said support whereby the clothes pin bag may be detached from its support, an inverted U-shaped loop at the upper extremity of each of said vertical portions of said support, upwardly and inwardly inclined portions projecting from said inverted U-shaped loops, and a horizontal transverse portion between the upper extremities of said upwardly and inwardly inclined portions, said inverted U-shaped loops being adapted to engage a clothes line and said upper horizontal transverse portion being adapted to serve as a handle.

1,567,678. PORTABLE COOKING KIT. GEORGE E. RIDDLE, San Mateo, and WILLIAM QUERIOLO, San Francisco, Calif. Filed Jan. 17, 1925. Serial No. 3,097. 21 Claims. (Cl. 126—38.)



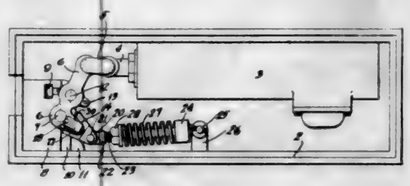
1. A portable cooking kit comprising a cabinet divided into a plurality of compartments adapted to receive cooking equipment and supplies; a door pivotally mounted upon the front of the cabinet; braces pivotally connected to the top of the door and slidably connected to the front of the cabinet adjacent opposite ends thereof, said braces normally being disposed along the ends of the door when in closed position and inclined from the bottom of the cabinet to the outer edge of the door when in open position to support said door in horizontal position at right angles to the front of the cabinet.

1,567,679. DRINK HEATER. JOHN WM. RITTMAN, JOHN ROOD, and WILLIAM DRIVER, Racine, Wis. Filed July 28, 1923. Serial No. 654,371. 1 Claim. (Cl. 219—43.)



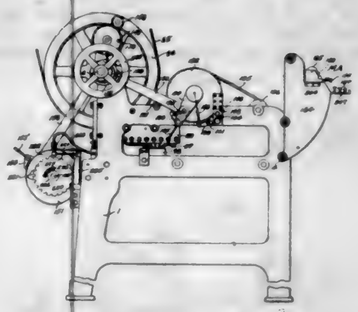
A drink heater comprising a body portion having an open end, said body portion having an inner wall for the reception of a cup and an outer wall, an electric heating element located between said walls, an outwardly projecting handle carried by said body portion, and a spring pressed bell crank shaped detent pivoted to said body portion and having one arm adapted to engage a cup and having a thumb piece positioned above the inner end of said handle.

1,567,680. GROUND BOX WITH TOGGLE JOINT. ROBERT M. ROBINSON, Louisville, Ky., assignor to Cheatham Electric Switching Device Co., Inc., Louisville, Ky., a Corporation of Kentucky. Filed Dec. 22, 1923. Serial No. 682,235. 5 Claims. (Cl. 74—14.)



1. A toggle joint provided with a lever, a projection from said lever, a link pivotally connected to said projection, a pivotally mounted and spring pressed bolt pivoted at its outer end to a stationary member and a pivot connecting said link and bolt, whereby the lever and bolt are connected through two articulations.

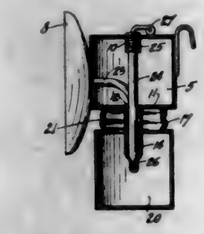
1,567,681. PERFORATING MACHINE. ANTHONY C. P. RUSSEN, Edgewood, R. I. Filed Nov. 17, 1923. Serial No. 675,267. 54 Claims. (Cl. 164—112.)



1. In combination, a plurality of punches, pneumatic actions for operating said punches, manually operable means to control the said pneumatic actions to punch holes in a strip of flexible material to produce a master, and a tracker bar having openings therein connected with said pneumatic actions and, adapted to coact with said master to control the punches to punch corresponding openings in one or more strips of flexible material.

1,567,682. MINER'S LAMP. SAMUEL T. SCOBY, Frankfort Heights, Ill., assignor of one-half to Coleman L. Jones, Frankfort Heights, Ill. Filed Aug. 12, 1922. Serial No. 581,418. 1 Claim. (Cl. 48—4.)

In an acetylene lamp including a carbide container and a water container located thereabove, water feed means comprising an elongated tube depending from the bottom of the water container and having its lower end formed with a constricted extension provided with perforations, and a rod threaded through the top of the water container and extending within said tube, the diameter of said rod being considerably less than that of the tube to define an annular space about the rod, and

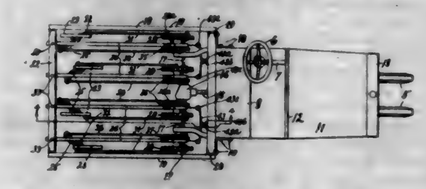


said rod being formed with a reduced extension fitting within the constricted end of the tube for controlling the degree of opening of the perforations.

1,567,683. SOUND-TRANSMISSION APPARATUS. HARALD SMITH, Copenhagen, Denmark. Filed June 8, 1918, Serial No. 238,874. Renewed May 27, 1925. 4 Claims. (Cl. 179—6.)

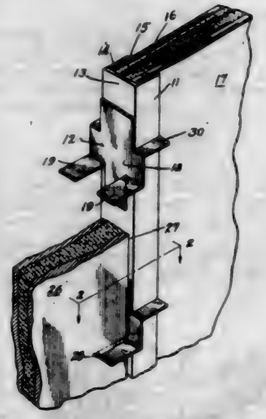
1. The combination with a telephone set comprising a receiver and a transmitter, of a casing constructed to be attached externally to the telephone receiver, said casing being provided with an opening for the transmission of the sounds emitted by the diphragm of said telephone receiver, microphone means disposed within said casing, an outer wall of said casing being provided with an opening constructed to be positioned against the ear of the operator and communication being afforded through the casing from said first-named opening to said second-named opening, sound recording means and electrical circuit means connecting said sound recording means with said microphone means.

1,567,684. WALKING VEHICLE. JOSEPH SRAKULA, South St. Paul, Minn. Filed Oct. 18, 1924. Serial No. 744,400. 4 Claims. (Cl. 180—8.)



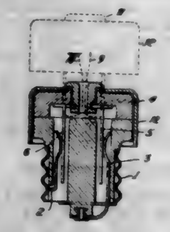
1. In a motor driven vehicle of the class described a main frame comprising a forward section supported by steering means and carrying the motor, and a rear section comprising a box-like skeleton frame, a series of upright frame supporting legs pivotally mounted within the later frame section and oscillable in longitudinal direction of the vehicle, ground contacting members on said legs, means operated by the motor and intermediate the motor and said legs for oscillating the latter in ground contacting position when moving in one direction and in non-ground-contacting position while moving in the opposite direction, said pivot of each leg comprising the extremity of one arm of a bell crank lever, the latter lever pivotally mounted in the long arm of a longitudinally arranged L-shaped rocking beam, said beam being pivotally mounted on a transverse shaft operatively connected with the motor, a pinion on said shaft and adjacent each rocking beam, a gear rotatably mounted on the short arm of each rocking beam and meshing with its adjacent pinion, a crank disk rotatable with said gear; means connecting said gear and its disc respectively with the upper end of each leg and the extremity of the bell crank lever opposite the leg fulcrum for oscillating the leg in a vertical plane.

1,567,685. CLIP AND CHANNEL WALL-BOARD-RETAINING CONSTRUCTION. JOSEPH STRAND, Los Angeles, Calif., assignor to Klinch Lath Corporation, Los Angeles, Calif., a Corporation of California. Filed June 1, 1925. Serial No. 34,097. 3 Claims. (Cl. 72—118.)



1. A wall board retainer comprising: a channel bar adapted to receive an edge of a wall board; and a clip comprising a back adapted to engage the web of said channel bar and an edge of an adjacent wall board, ears extending from said back being capable of extension to either side of said channel bar, and means extending in the opposed direction from said back and embedded in opposite sides of said adjacent wall board for securing said clip to said adjacent wall board.

1,567,686. SEPARABLE PLUG. SWEN R. SWENSON, South Orange, N. J., assignor to Multiple Electric Products Company, Inc., New York, N. Y., a Corporation of New York. Original application filed Feb. 20, 1922, Serial No. 537,770. Divided and this application filed July 9, 1923. Serial No. 650,333. 3 Claims. (Cl. 173—343.)



1. A separable socket plug comprising a socket engaging member and lead wire carrying member, and means comprising a pivotally mounted enclosing member in

operative relation to said plug members for preventing the entry into or withdrawal of the assembled plug from a socket.

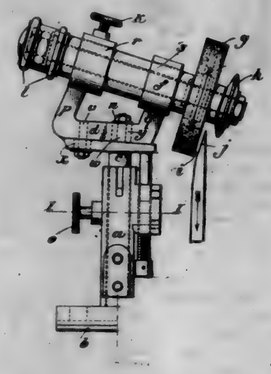
---

1,567,687. EXPANSION SHIELD. CHARLES C. TOMKINSON, Plainfield, N. J., assignor to J. Edward Ogden, Mountainville, N. Y. Original application filed Aug. 25, 1921, Serial No. 495,315. Divided and this application filed Oct. 1, 1924. Serial No. 740,901. 16 Claims. (Cl. 85—2.4.)

10. A one piece sheet metal expansion shield formed of material of uniform thickness and having a central portion forming a closed bottom, and end portions having laterally expansible parallel sides bent from said central portion to form a closed cylindrical shell.

---

1,567,688. APPARATUS FOR SHARPENING CIRCULAR KNIVES. VICTOR VAN DAMME, Antwerp, Belgium, assignor to The New Elswick Trading Company Limited, Deventer, Netherlands, a Company of The Netherlands. Filed Feb. 9, 1921. Serial No. 443,675. 2 Claims. (Cl. 51—248.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

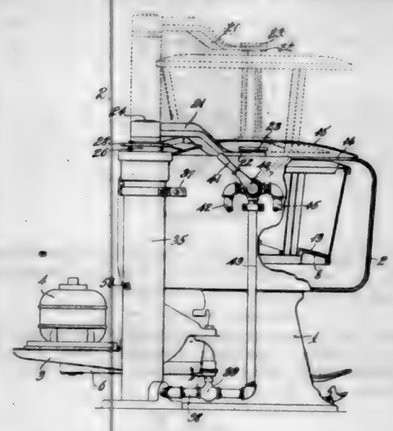


1. In a knife grinding machine, a shaft, means for mounting said shaft in an inclined position, said means being adapted to permit free longitudinal and rotary movement of said shaft, a grinding wheel mounted adjacent the lower end of said shaft adapted to contact with a rotating circular knife whereby the grinding pressure is produced solely by the weight of the wheel and the associated parts and the rotation of the grinding wheel is effected by the friction between the knife and wheel.

---

1,567,689. UNLOADING DEVICE FOR UNDERDRIVEN CENTRIFUGAL EXTRACTORS. FRANK M. WATKINS, Cincinnati, Ohio. Filed Jan. 5, 1922. Serial No. 527,181. 7 Claims. (Cl. 210—63.)

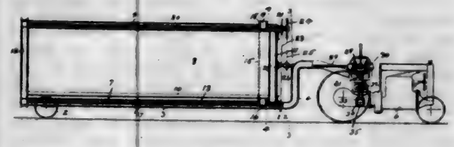
1. An extractor, comprising a curb, a load-carrying member rotatably and vertically movable in said curb, means for rotating said member, fluid actuated means for elevating said member, and means whereby operation of



said rotating means prevents the supply of fluid to said fluid actuated means.

---

1,567,690. SNOW CARRIER. FREDERICK H. WEAVER, New York, N. Y. Filed Dec. 5, 1923. Serial No. 678,717. 1 Claim. (Cl. 214—82.)



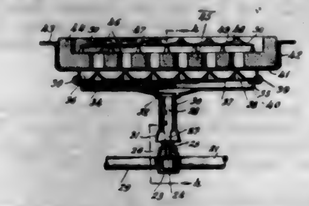
A carrier comprising a body having an opening extending along the lower edges on opposite sides thereof, wheels upon which said body is mounted, four screw threaded rods mounted at the sides of said body, a sprocket wheel mounted on the front end of each of said threaded rods, a chain connecting all of said sprocket wheels to cause the threaded rods to revolve in unison, a large sprocket wheel secured on the end of one of said threaded rods, a main shaft having one end mounted in the front end of the body, a sprocket wheel on said main shaft, a chain connecting the sprocket wheel on the main shaft with the large sprocket wheel on the end of one of said threaded rods, an unloading plate mounted in said body and having threaded lugs on its upper edge projecting over the body and co-operating with the upper threaded rods and threaded lugs on the lower edge of said unloading plate projecting through the openings at the lower edge of the body and co-operating with the threaded rods at the lower edge of the body, and means for revolving the main shaft to cause the unloading plate to move from end to end in said body.

---

1,567,691. HEATER. OSCAR WIEDERHOLD, Philadelphia, Pa. Filed Jan. 16, 1923. Serial No. 612,877. 10 Claims. (Cl. 126—92.)

1. A heater comprising a burner having nozzles arranged in rows, and a refractory body provided, on the side adjacent the burner, with openings or slits in registry with the respective rows of burner nozzles, and with cross bars between said slits, while on the side

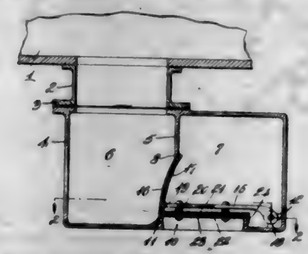
distant from the burner the said body is provided with cross bars spaced from each other and from the first-named cross bars and registering with said slits, the



last-named cross bars being wedge-shaped with the thin edges of the wedges facing away from the first-named cross bars.

---

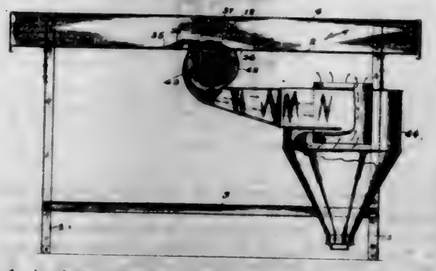
1,567,692. WASHING-MACHINE VALVE. JAMES D. ALEXANDER, Norfolk, Va., assignor to The American Laundry Machinery Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Nov. 1, 1920. Serial No. 421,073. 8 Claims. (Cl. 251—10.)



7. A valve structure, comprising a valve casing adapted for communication with a container and having an opening in its wall, a valve seat surrounding said opening, a valve member operatively monuted within said casing, a valve body for cooperation with said valve seat to open and close said casing opening, locking means between said valve member and said valve body and adapted to permit the release of the valve body from the valve member upon relative movement thereof, and a flange on said valve body for normally engaging said valve seat and preventing such relative movement.

---

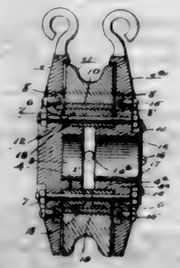
1,567,693. CLEANING MACHINE. GEORGE L. ALLEN and RICHARD C. THOMPSON, Savannah, Ga., assignors to The Allen Engineering and Manufacturing Company, a Partnership composed of George L. Allen, Warren Butler, and J. J. Weigland, Savannah, Ga. Original application filed May 29, 1922, Serial No. 564,323. Divided and this application filed Oct. 2, 1923. Serial No. 666,089. 3 Claims. (Cl. 15—7.)



1. A cloth cleaning machine comprising a table, a brush rotatably mounted beneath the top of the table and a portion of the same extending above the table, means for rotating said brush, a casing for the brush enclosing that part of the brush that is beneath the surface of the table, the axis of said brush being disposed concentrically with one portion of the casing and eccentrically to another portion therof, the shape of the casing and the disposition of the brush being such that the rotation of said brush forms a vacuum in said casing to thereby direct the dust through the casing.

---

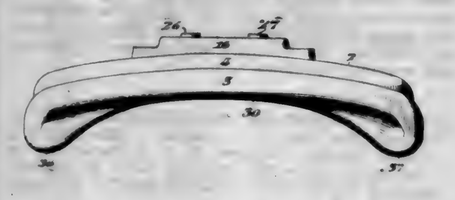
1,567,694. TACKLE BLOCK. BEN A. AMBIN, Bucoda, Wash. Filed Jan. 19, 1925. Serial No. 3,439. 3 Claims. (Cl. 254—192.)



1. A tackle-block comprising a shell in two parts each containing a threaded hub, a means for connecting said hubs, a radial bearing threaded upon said hubs, and a sheave encircling said radial bearing.

---

1,567,695. BACKREST. ROBERT C. ANGELL, Prince Bay, N. Y., assignor to The S. S. White Dental Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 21, 1923. Serial No. 668,067. 10 Claims. (Cl. 155—178.)



1. A back-rest for a dental chair having its longitudinal axis of symmetry disposed in a plane, and its anterior surface variably curved outwardly therefrom and extended laterally forward to form curved protuberances projecting forwardly from said plane approximately one-seventh of the width of said back-rest and arranged to closely embrace the waist of a human form.

---

1,567,696. CHAIR SEAT. ROBERT C. ANGELL, Prince Bay, N. Y., assignor to The S. S. White Dental Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 29, 1924. Serial No. 695,904. 6 Claims. (Cl. 155—178.)

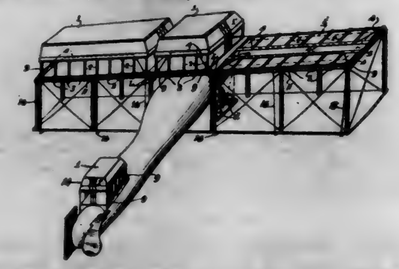
1. A chair-seat formed of a unitary piece of sheet material, and comprising a shell having a rearwardly disposed hollow bowl, and a forwardly disposed hump cooperative with said bowl to afford a sharply inclined abutment extending across the medial region of said seat-shell, and a deeply depending perimetral flange extending substantially below said bowl and providing a perimetral ridge crest which cooperates with said hump

to form spaced shallow channels merging rearwardly into said bowl, said hump and crests rising approximately fifteen-hundredths of the length of said shell above a

horizontal plane tangent to said bowl surface, and the trough of said channels at their maximum height approaching said plane to within thirteen-hundredths of said length.

---

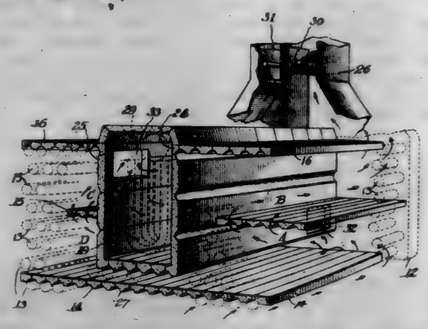
1,567,697. **DEVICE TO PREVENT AN AIRPLANE FROM A TAIL-SPIN FALL.** JACOBUS BAKKER, Missoula, Mont. Filed Sept. 23, 1925. Serial No. 58,210. 5 Claims. (Cl. 244—21.)



1. The combination with an aeroplane of a collapsible, controllable parachute mounted on the top of the supporting surface, said parachute comprising a horizontal frame with a fabric cover, having depending side walls, pivoted arms secured to the lower edges of the side walls, and means for elevating and lowering the arms whereby the parachute can be raised and lowered to operative and inoperative positions.

---

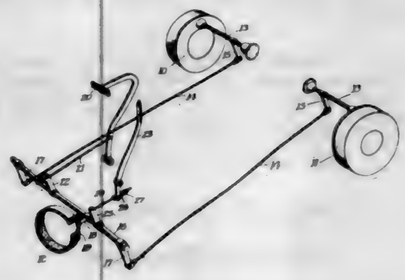
1,567,698. **CROSSFLOW SUPERHEATER.** PAUL A. BANCEL, New York, N. Y., assignor to The Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Filed May 23, 1913, Serial No. 769,535. Renewed Nov. 27, 1917. Serial No. 204,277. 13 Claims. (Cl. 122—471.)



12. An apparatus for absorbing heat from hot gases comprising a horizontal water tube boiler provided with a plurality of horizontal baffles which divide the said boiler into a main and subsidiary paths for the passage of the furnace gases therethrough, a connection between two of said paths in which a flow is obtained dependent upon both the total flow and the separate flows in the subsidiary paths, and a heat absorbing means in said connection over which the gases flowing therethrough are adapted to pass.

---

1,567,699. **BRAKING SYSTEM.** VINCENT BENDIX, Chicago, Ill., assignor to Bendix Brake Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 25, 1924. Serial No. 733,895. 6 Claims. (Cl. 188—106.)



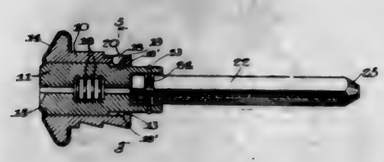
6. A braking system for four-wheel motor vehicles, consisting of a brake on each front wheel, a brake on the transmission, a control, connections between said control and the brakes, and foot and hand levers operable separately and independently through said control to apply the brakes.

---

1,567,700. **FORCED-FEED SYSTEM FOR INTERNAL-COMBUSTION ENGINES DRIVING SCREW PROPELLERS.** LUCA BONGIOVANNI, Turin, Italy. Filed Jan. 16, 1925. Serial No. 2,855. 9 Claims. (Cl. 244—25.)

1. A forced feed device for aeroplane engines comprising a collector in communication with the engine; and a propeller having passages in the blades associated at the outer ends with the collector and the inner ends with a central opening whereby upon rotation of the propeller air will be sucked into the passages through the central opening and will be forced by centrifugal force through the passages into the collector.

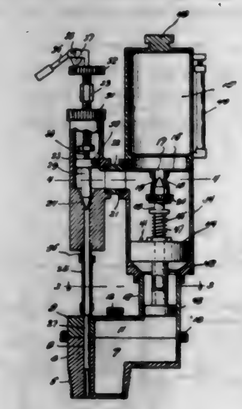
1,567,701. **PILLAR LOCK.** STEPHEN F. BRIGGS and EDWARD N. JACOBI, Milwaukee, Wis., assignors, by mesne assignments, to Briggs & Stratton Corporation, Milwaukee, Wis., a Corporation of Delaware. Filed Apr. 16, 1924. Serial No. 706,898. 6 Claims. (Cl. 70—46.)



1. In a lock, a bushing having a flange, a lock barrel rotatably mounted in the bushing and fitting against the flange, and a finished metal shell extending over the end of the bushing and confining the lock barrel in place, the finish of said shell serving as the finish for the end of the bushing.

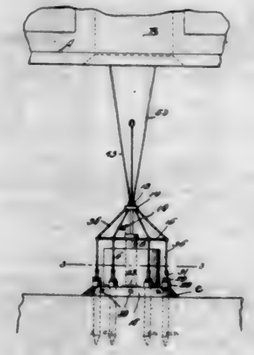
---

1,567,702. **OIL CUP.** PERRY O. BROWN, St. Vincent, Minn., assignor of one-half to G. V. Backstrom, St. Vincent, Minn. Filed May 14, 1925. Serial No. 30,319. 2 Claims. (Cl. 184—68.)



1. A lubricating device of the class described including a cylinder, a reservoir below the cylinder, a receptacle above the cylinder, a valve seat disposed between the receptacle and the cylinder, a valve associated with the seat, a plunger including a head slidable in the cylinder and a head slidable in the reservoir, a thermally expansible fluid in the reservoir, said cylinder provided with an oil outlet, a resilient connection between the plunger in the cylinder and the valve, whereby when the material in the reservoir is expanded, the plunger will be moved, so as to move the head in the cylinder, so as to close the valve through the resilient connection, and force the oil from the cylinder, without interfering with the oil in the receptacle.

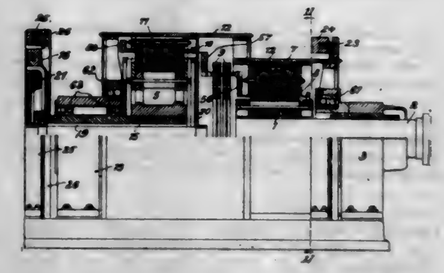
1,567,703. **ANCHORAGE ASSEMBLY FOR AIRSHIPS.** JOHN ENLOE BROYLES, Entiat, Wash., assignor of one-half to H. E. Robertson and T. H. Weller, both of Russellville, Mo. Filed Jan. 31, 1925. Serial No. 6,065. 4 Claims. (Cl. 244—2.)



1. An anchor for an apparatus of the class described including a ring, a core in the ring, stakes in the ring, ground engaging locking means associated with the stakes, and a releasing mechanism associated with said locking means.

---

1,567,704. **ELECTRIC POWER-TRANSMISSION GEAR.** FRANZ BRÜGGEMANN, Charlottenburg, Germany. Filed July 5, 1924. Serial No. 724,476. 4 Claims. (Cl. 172—239.)



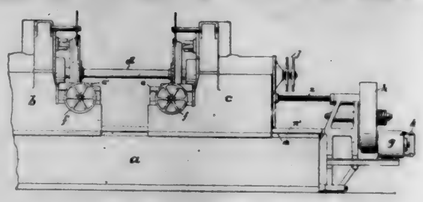
1. An electric speed reduction mechanism for power transmission comprising a generator and an induction motor both of the polyphase alternating current type, the stators of said generator and motor being fixed to each other and mounted for rotation as a unit, a polyphase ring system comprising a plurality of annular conductors non-inductively associated and adapted for connecting the conductor bars of the induced generator member with the conductor bars of like phase of the induced member of the motor, said induced members being independently rotatable.

---

1,567,705. **LATHE.** JOHN BURT, Narberth, Pa., assignor to William Sellers & Company, Incorporated, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 13, 1924. Serial No. 712,924. 12 Claims. (Cl. 82—8.)

1. A car wheel lathe having a bed, a head arranged to be moved longitudinally of the bed relative to the car wheels to be turned, and a longitudinally extending guide and groove connection between the head and bed,

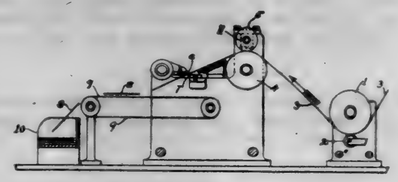
below the top of the bed and protected thereby, the guide and groove being so arranged that the top of the guide at one end is forced into engagement with the upper face



of the groove while the bottom of the guide at the other end is forced into engagement with the lower face by the movement of the head into engagement with a car wheel which tends to overturn the head.

---

1,567,706. MECHANISM FOR CONVERTING A WEB OF FLEXIBLE MATERIAL INTO SHEETS. JAMES A. CAMERON, Brooklyn, N. Y., and ROBERT McC. JOHNSTONE, Roselle Park, N. J., assignors to Cameron Machine Company, Brooklyn, N. Y., a Corporation of New York. Filed Nov. 21, 1924. Serial No. 751,410. 7 Claims. (Cl. 164—61.)



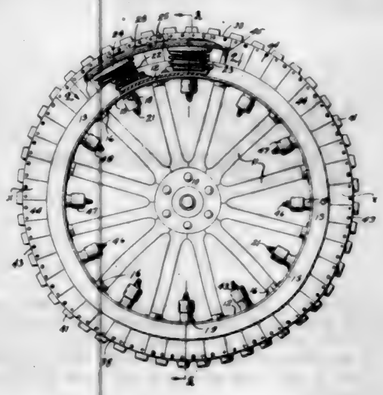
1. Mechanism for converting a web of flexible material into sheets including: score-cut slitting means to cut a web throughout into longitudinally independent sections without distorting the sections out of parallelism, a feeding device engaging the sections to exert an equal pull on all the sections to thereby advance them in parallelism, and severing devices to cut the sections, simultaneously into a plurality of sheets substantially at right angles to their longitudinal advance.

---

1,567,707. SAFE. CLIFFORD G. CARLSON, Jamestown, N. Y., assignor to Art Metal Construction Company, Jamestown, N. Y., a Corporation of Massachusetts. Filed August 19, 1920. Serial No. 404,528. 10 Claims. (Cl. 109—2.)

1. A joint for the hinged parts of safe structures embodying flared grooves and complementary tapered tongues extending lengthwise of and crossing the joint at an angle of substantially 45° to the plane of each of said hinged parts, said tongues and grooves having parallel flat opposed faces arranged to contact face to face and prevent relative rectilinear movement of said hinged parts in any direction perpendicular to the hinge axis while permitting free pivotal movement of said parts about said hinge axis.

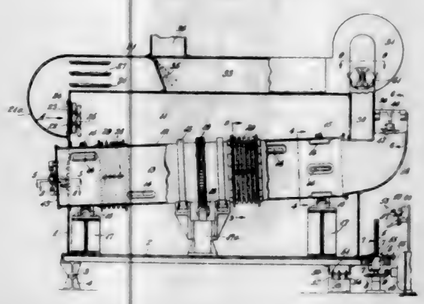
1,567,708. RESILIENT RIM. ENO W. CARLSON, Osceola, Iowa. Filed Apr. 27, 1925. Serial No. 26,058. 4 Claims. (Cl. 152—29.)



1. In a resilient rim, a felloe, a series of posts slidably mounted therein in circumferentially spaced relation, a laminated rim structure mounted on the outer ends of said posts comprising a plurality of layers of plates so arranged as to break joints between the successive layers, each plate being mounted on one post, the plates of each layer being arranged to permit play, springs interposed between the felloe and the laminated rim structure, and a flexible chain mounted on said rim.

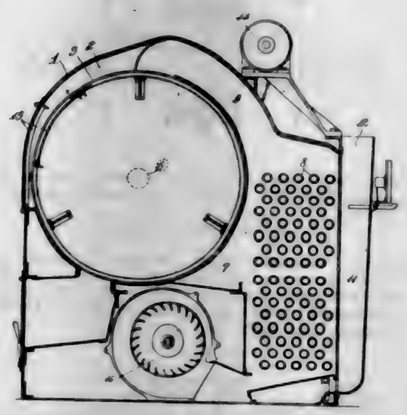
---

1,567,709. DRIER. EMIL J. CARROLL, Cincinnati, Ohio, assignor to The American Laundry Machinery Company, Cincinnati, Ohio, a Corporation of Ohio. Filed June 14, 1922. Serial No. 568,257. 15 Claims. (Cl. 34—6.)



7. Drying apparatus, comprising a drum rotatable about its own axis and adapted to contain material to be dried, said drum being mounted to turn about a transverse axis to produce increasing inclination of its own axis to the horizontal for causing material therein to slide to an outlet, means for producing flow of air through said drum to absorb moisture from the material therein, and means sensitive to the humidity of the moisture laden air for increasing the speed of rotation of said drum and for also tilting the drum about said transverse axis to produce increasing inclination of the drum axis to the horizontal.

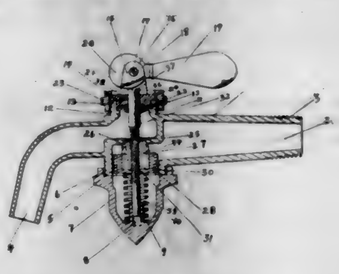
1,567,710. CONTROL SYSTEM FOR DRYING APPARATUS. EMIL J. CARROLL, Cincinnati, Ohio, assignor to The American Laundry Machinery Company, Cincinnati, Ohio, a Corporation of Ohio. Filed June 30, 1922. Serial No. 571,865. 7 Claims. (Cl. 34—5.)



7. Drying apparatus, comprising a drying tumbler including a rotating drum in which the material to be dried is placed, an electric motor for rotating said drum, means for conducting a current of air through said drum, an electric motor for operating said air conducting means, means for maintaining the two motor circuits in running condition, and means sensitive to the humidity of the air in said machine for controlling said maintaining means and arranged to open said motor circuits when the material is dried to a predetermined degree.

---

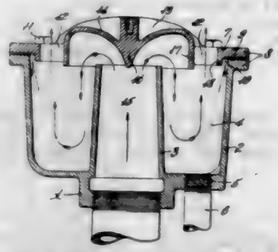
1,567,711. ADJUSTABLE FAUCET. FRANKLIN D. CHASE, Berkeley, Calif. Filed Nov. 28, 1924. Serial No. 752,570. 5 Claims. (Cl. 251—132.)



1. A faucet comprising in combination inlet and outlet passages, and a valve seat there-between, a plug secured to the top of the valve, a stem slidably mounted through the plug and extending through the valve seat, a valve adjustably mounted on the stem, a cap having a screw threaded engagement with the lower part of the faucet and opposite the plug, and means to reciprocate the stem, a spring in the cap normally tensioned to press the valve against the seat and means on the stem outside of the plug to adjust the valve on the said stem.

3. In a faucet, a stem having an upper cylindrical part, a notch in the head of the stem, a screw threaded portion, an upwardly faced valve cup screw-threaded thereon, a valve retained in the cup and a lower cylindrical part on the stem below the valve cup.

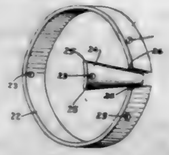
1,567,712. EXHAUST HEAD. THOMAS J. COOKSON, Cleveland, Ohio, assignor to The Fulton Foundry and Machine Company, Cleveland, Ohio, a Corporation of Ohio. Filed Mar. 10, 1923. Serial No. 625,603. 2 Claims. (Cl. 183—95.)



1. A head for exhaust pipes, comprising a hollow shell adapted for connection to said pipe and having a hollow central core portion, a cap or cover for said shell provided with an arched under surface terminating in an inner annular skirt over said chamber, a series of outlet ports in said cap or cover located outwardly beyond the annular skirt thereof, and an outer annular skirt on said cap or cover located outwardly beyond said exhaust ports and extending downwardly toward said annular chamber.

---

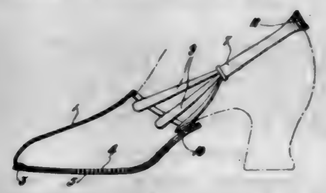
1,567,713. APPARATUS FOR RELINING MOTOR-VEHICLE BRAKE BANDS. JOHN CORSER and PETER C. OLSON, Minneapolis, Minn.; said Olson assignor to said Corser. Filed July 10, 1922. Serial No. 574,006. 2 Claims. (Cl. 218—19.)



1. An apparatus for relining motor vehicle brake-bands comprising a substantially annular split anvil, the anvil having a portion of greater width than the brake band to be relined whereby a portion of the anvil may project beyond the brake band when the anvil is in operative position, and a wedge adapted to be positioned in the split anvil to expand it, said projecting anvil portion and said wedge each formed to receive means to facilitate handling the anvil and withdrawal of the wedge.

---

1,567,714. GOLOSH OR OVERSHOE. MORLAND MICHOLL DESSAU, London, England. Filed Nov. 8, 1924. Serial No. 748,704. 3 Claims. (Cl. 36—6.)



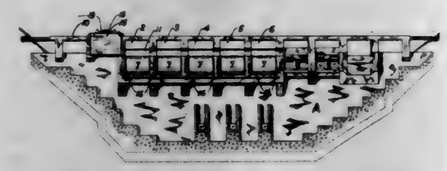
1. A golosh or overshoe comprising an upper formed in one piece from a blank of plantation rubber crêpe, an inturned edge to said upper, an insole formed from a blank of plantation rubber crêpe secured to the inner surface of said inturned edge, an outsole formed from

a blank of plantation rubber crêpe secured to the outer surface of said inturned edge and to said insole, and an opening at the rear of the overshoe out of which the rear part of the ordinary shoe can extend, said upper having free edges all of which are formed with a reinforcing bead by doubling the edges.

2. A golosh or overshoe according to claim 1, including a rubber air cushion secured to the upper surface of the overshoe sole and near the rear edges thereof.

---

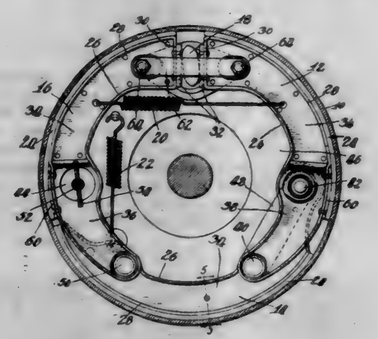
1,567,715. EMERGENCY GATE FOR SPILLWAYS AND OVERFLOW DAMS. CLINTON DE WITT, Berkeley, Calif. Filed Mar. 17, 1924. Serial No. 699,644. 5 Claims. (Cl. 61—30.)



1. In a dam of the character described, a crest portion having a number of spillways formed therein, an emergency gate adapted to cooperate with any one of the spillways, means in each spillway for guiding and receiving the gate, and means for moving the gate longitudinally of the dam and for raising and lowering the gate with relation to any spillway.

---

1,567,716. BRAKE SHOE. ADIEL Y. DODGE, South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 20, 1925. Serial No. 24,426. 19 Claims. (Cl. 188—250.)

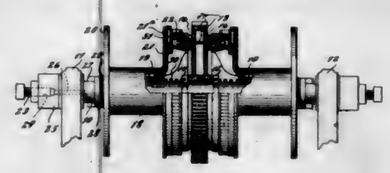


9. A pressed metal brake shoe comprising two parts having radial flanges secured together, and having oppositely-projecting circumferential flanges cooperating to form a support for the brake lining, the radial flanges being extended to form parallel spaced arms at one end of the shoe.

---

1,567,717. FRICTION DEVICE. PAUL DUBOSCLARD, Brooklyn, N. Y., assignor to Lidgerwood Manufacturing Company, New York, N. Y., a Corporation of New York. Filed Jan. 3, 1924. Serial No. 684,110. 3 Claims. (Cl. 192—107.)

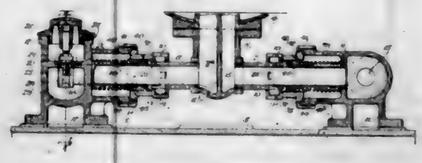
1. In combination, a driving member and a driven member provided with respective friction elements engageable with each other, one of said friction elements being formed of removable sections, the other friction element comprising a continuous annular portion at least



partially surrounding the first friction element, and means for removably securing said annular portion to its member.

---

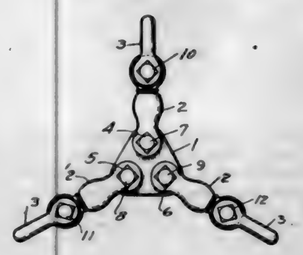
1,567,718. TILTING TRAP. NORMAN C. ELLIS and HUBERT C. ELLIS, Evanston, Ill., assignor to Ellis Drier & Elevator Company, Chicago, Ill., a Corporation of Wisconsin. Filed Aug. 4, 1922. Serial No. 579,657. 3 Claims. (Cl. 137—101.)



3. In a tilting trap, the combination of a tiltable drum, a fitting, a trunnion pipe rotatable in the fitting and with the drum and having a fluid passage therein communicating with said drum, said pipe being formed of a pair of sections adapted to rotate together and removably connected, a connection between the fitting and the pipe comprising a pair of rings having fluid-tight contact, one of said rings being secured to one of the pipe sections, a diaphragm fixed to the other ring and to the fitting, and a bearing in the fitting for rotatably supporting the pipe independently of the diaphragm, a valve for controlling the fluid, and an arm on the other of said pipe sections for shifting said valve.

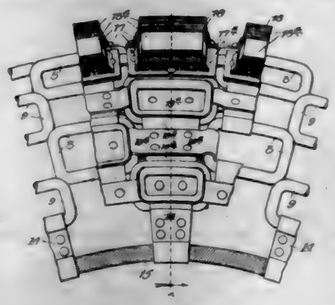
---

1,567,719. BUTT-LINE-RIGGING PLATE. JORGEN N. ERLANDSEN, Everett, Wash. Filed May 5, 1924. Serial No. 711,084. 7 Claims. (Cl. 254—135.)



4. In a butt-line rigging plate, a plurality of swivel shackles, other shackles pivotally attached to the outer ends of the shackles, and a means for pivotally holding the shackles to a common member in such a manner that the centers of their pivots will be in the vertexes of an equilateral polygon.

1,567,720. TIRE ARMOR. JOSEPH FERRO, Springfield, Ill. Filed Nov. 5, 1924. Serial No. 747,909. 1 Claim. (Cl. 152—16.)



Tread-cushioning means for tire armor, comprising a frame havign an endless outwardly tapering wall, a cushion protruding through said frame, said cushion having a tapering portion corresponding to and intimately fitting the inner surface of said wall, said frame having an outwardly extending base flange completely surrounding said wall, an outwardly extending base flange completely surrounding said cushion and disposed under the first-mentioned base flange, and a plurality of elements independent of each other to secure said frame and cushion together and to tire armor, said elements passing through said tapering portion.

---

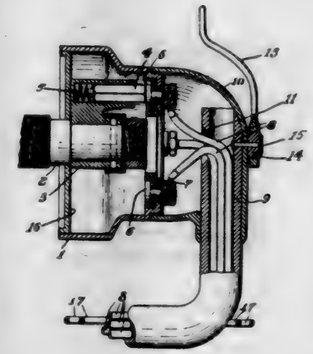
1,567,721. TESTING STAY BOLTS HAVING TELL-TALE HOLES. JOHN ROGERS FLANNERY, Pittsburgh, Pa., and WILLIAM MCCLINE WILSON, Chicago, Ill., assignors to Flannery Bolt Company, Pittsburgh, Pa. Filed Mar. 18, 1921. Serial No. 453,220. 3 Claims. (Cl. 85—1.5.)

1. A staybolt having a tell-tale hole extending from one end of the bolt axially thereof and closed at its other end, and indicating means at said closed end only of said hole for cooperation with a testing implement, substantially as described.

---

1,567,722. TIMER FOR INTERNAL-COMBUSTION ENGINES. EDMOND EDWARD FOURNIER, Fall River, Mass., assignor of forty-four one-hundredths to Merton I. Vestal, Fall River, Mass., and fifty-six one-hundredths to said Edmond E. Fournier. Filed Apr. 1, 1920. Serial No. 370,619. 3 Claims. (Cl. 200—24.)

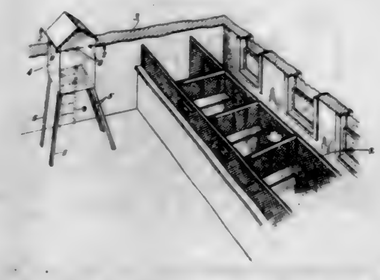
1. A timer comprising a relatively rotatable casing and a relatively stationary wire cover mounted in contiguous relation to each other, a rotor and contacts mounted in said casing, a lug on said wire cover, a loom entering said wire cover, lead wires to said contacts extending through said loom axially into the casing, a fas-



tening set through said lug of the wire cover and securing said loom thereto, and an arm engaging said lug and holding said wire cover against movement upon rotation of the casing.

---

1,567,723. BURGLAR PROTECTION. HARRY FRANK, Brooklyn, N. Y. Filed July 17, 1925. Serial No. 44,175. 1 Claim. (Cl. 89—36.)



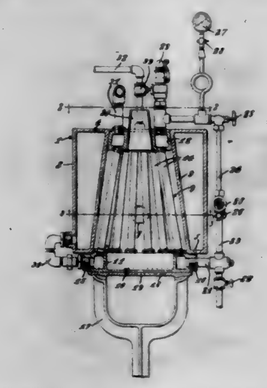
In a business establishment having a cage or counter at which valuables are dealt in and a space before the counter for patrons, a tower positioned in removed relation with respect to the cage or counter and inaccessible therefrom, said tower embodying a bullet proof guard enclosure mounted on suitable leg supports at a sufficiently high elevation to provide an open space beneath the tower and to command thorough view of the counter and patrons and to be inaccessible without the employment of extraneous means, said enclosure having loop holes through which the guard can see and shoot, means to permit the guard to gain access to the enclosure, which means is normally out of cooperation with the tower, whereby the guard is safe from attack and can exercise full surveillance over the activities of patrons and intruders, and alarm means controllable from within the enclosure.

---

1,567,724. STEAM BOILER. LESTER C. FRASER, Los Angeles, Calif. Filed Sept. 14, 1921. Serial No. 500,516. 3 Claims. (Cl. 122—172.)

1. In a boiler, a shell comprising an outer cylindrical wall, an inner conical wall, a top joining the upper ends of the walls and a bottom joining the lower ends of the walls; an upper ring header seated in the upper end of

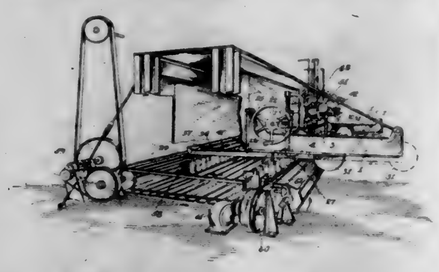
the inner wall, a lower ring header located at the lower end of the inner wall supporting the shell, and tubes connecting the headers and located within the inner wall.



an inlet for the lower header, a connection between the upper header and the shell, a connection between the lower header and the shell, and an outlet for the shell.

---

1,567,725. LEER-FEEDING APPARATUS. IRA H. FREESE, Clarksburg, W. Va., assignor to Hazel-Atlas Glass Co., Wheeling, W. Va., a Corporation of West Virginia. Filed Nov. 17, 1923. Serial No. 675,273. 32 Claims. (Cl. 198—30.)



1. A leer feeder including means for lifting a row of glass ware, said means being operative irrespective of the number of articles or their lineal position in the row, and means for depositing the glass ware in the leer.

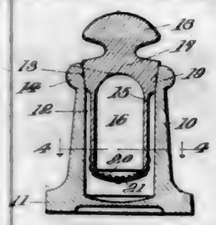
15. A leer feeder including a carriage movable bodily toward and from a leer, arms pivotally mounted on the carriage, gripping jaws carried by the arms, a fluid pressure cylinder operatively connected with the gripping jaws, and means for varying the limit of stroke of the piston in said cylinder to vary the extent of closing of the gripping jaws.

25. A leer feeder including a carriage movable bodily toward and from the leer, arms carried by the carriage, means carried by the arms for picking up glassware, and means carried by the arms for pushing glassware.

---

1,567,726. MOISTUREPROOF CONDIMENT HOLDER. DAVID ELMORE FRIERSON, Charleston, W. Va. Filed July 21, 1922. Serial No. 576,408. 3 Claims. (Cl. 65—45.)

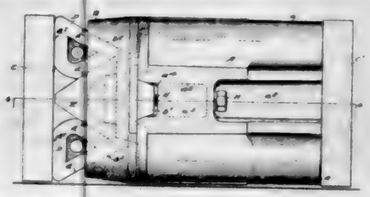
1. A condiment holder of the character described comprising a hollow support member having an open top and an enlarged base portion, said open end having an internal tapered portion, and a condiment container member open at one end and having a solid enlargement at the other end, said enlargement having an external taper complemental to the tapered portion of the open end of said support member, so that an air and moisture tight



joint is formed when the container member is inserted into the support member, and a perforated closure for the open end of the container member.

---

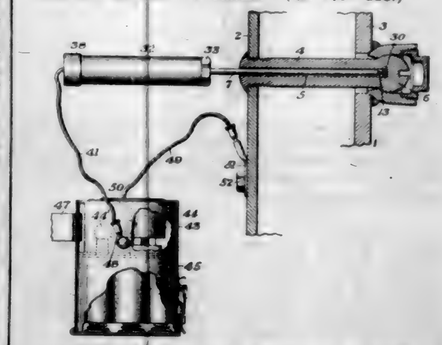
1,567,727. RAILWAY DRAFT GEAR. RICHARD D. GALLAGHER, Jr., Freeport, N. Y., assignor to Lillian K. Gallagher, Freeport, N. Y. Filed Aug. 15, 1924. Serial No. 732,204. 22 Claims. (Cl. 213—26.)



1. In a draft gear the combination of a pressure transmitting means including a friction box, said box having a wedge reciving opening with friction surfaces at its opposite ends, a spring, a center wedge of friction block held advanced by said spring to position it in the box between the opposed friction surfaces of said box, a side wedge between said center wedge and each of the friction surfaces of the box and having one face only adapted to engage said surface, and means for preventing insertion of the side wedges in the wedge opening between the center wedge and box when the box engaging faces of said side wedges have been moved about a transverse axis while permitting the respective wedges to be reversed endwise in the opening.

---

1,567,728. MEANS FOR TESTING BOILER STAY BOLTS. GROVER R. GREENSLADE, Pittsburgh, Pa., assignor to Flannery Bolt Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Dec. 21, 1923. Serial No. 681,955. 9 Claims. (Cl. 175—183.)



1. Means for testing the condition of the telltale hole of a staybolt when such hole is closed at one end and regardless of whether the length of said hole is known

or unknown, comprising a testing implement adapted for insertion into said telltale hole, and means associated with said implement and adapted to indicate whether said implement has reached the original closed end of said telltale hole, substantially as described.

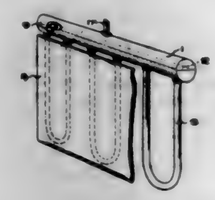
---

1,567,729. RAILWAY CAR. BENJAMIN B. GREER, Chicago, Ill. Filed Apr. 7, 1924. Serial No. 704,587. 9 Claims. (Cl. 105—406.)

1. A car construction, the side and end walls whereof consist of superposed, edge to edge, planks, mounted on the end and side sills of the car underframe, the longitudinal upper edge of the top planks being provided with metallic angle plates bolted thereto, an inverted tripodal brace on the end walls, side posts and diagonal bracing secured to the side sills and said angle plates, and gusset members extending upwardly from the side sills along the inner side walls and secured thereto.

---

1,567,730. REFRIGERATOR-COOLING MEANS. MELVIN SOLOMON GROH, Toronto, Ontario, Canada, assignor to Joseph Mercadante, New York, N. Y. Filed Feb. 4, 1924. Serial No. 690,622. 3 Claims. (Cl. 62—95.)



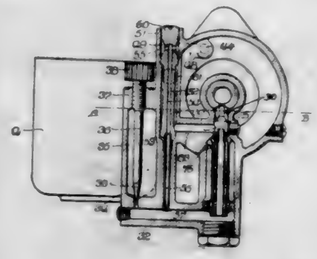
2. In refrigerating cooling means, a container, adapted to contain liquid refrigerant with acid forming properties, and a baffle disposed horizontally in the container and filling substantially the entire length of said container, said baffle having both of its sides out of contact with the inner surface of the container, said baffle being constructed of material adapted to neutralize the acid formed from said liquid refrigerant.

---

1,567,731. VALUABLE COMPOUND FOR DYEING. FRITZ GÜNTHER, Ludwigshafen-on-the-Rhine, Germany, assignor to Badische Anilin- & Soda-Fabrik, Ludwigshafen-on-the-Rhine, Germany, a Corporation of Germany. Filed June 8, 1925. Serial No. 35,790. 6 Claims. (Cl. 260—48.)

1. A process of manufacturing valuable products for dyeing which consists in acting with a carbonic acid halogenid on an aromatic ortho-amino-carboxylic acid other than an uncolored anthranilic acid body.

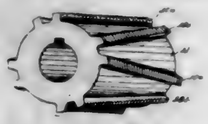
1,567,732. CARBURETOR. CHARLES J. GUSTAFSON, Chicago, Ill., assignor to Stromberg Motor Devices Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 11, 1918. Serial No. 216,430. 2 Claims. (Cl. 261—41.)



1. In a carburetor having an air inlet, a mixture outlet and a throttle controlling said outlet, a main nozzle, an accelerating well, a connection from said accelerating well to said main nozzle, venting means for admitting air to the upper part of said accelerating well, air venting means for said main nozzle, and means for decreasing the venting of said main nozzle as the throttle opens.

---

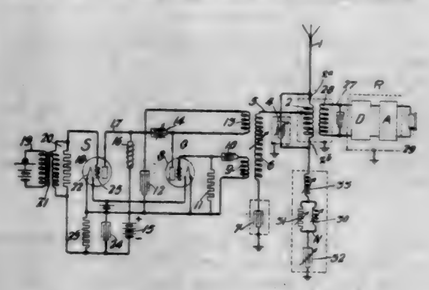
1,567,733. THREAD-FORMING TOOL. BENGT M. W. HANSON, Hartford, Conn.: Einar A. Hanson and Clarence E. Whitney executors of said Bengt M. W. Hanson, deceased. Filed June 23, 1920. Serial No. 391,012. 6 Claims. (Cl. 10—141.)



3. A thread forming tool comprising a plurality of rows of teeth, some of said rows being inclined in one direction to a line at right angles to the direction of movement of the teeth and others in the opposite direction, and the obtuse angled edge of each tooth being cut back.

---

1,567,734. RADIO TRANSMISSION SYSTEM. RAYMOND A. HEISING, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 1, 1919. Serial No. 327,744. 9 Claims. (Cl. 250—9.)

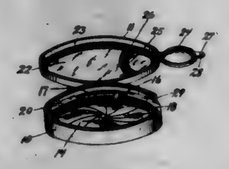


4. A duplex radio system comprising an aerial, separate and independent tuning means for transmission and reception, and a network comprising impedance elements simulating the impedance of said aerial over a wide

range of frequencies whereby, with a fixed and invariable adjustment of said elements, either the transmitting or receiving frequencies may be varied over a considerable frequency range by means of one of said tuning means, with a minimum of interference with the frequency established by the other tuning means.

---

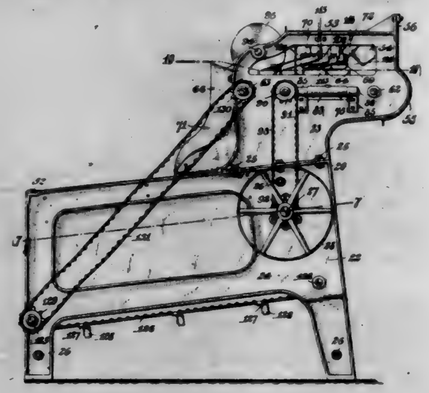
1,567,735. TOILET CASE. HELEN HIRSHBEIN, New York, N. Y. Filed May 10, 1924. Serial No. 712,257. 5 Claims. (Cl. 132—83.)



2. In a toilet case, the body portion providing a powder compartment and having a hinged lid, a closure member of the iris diaphragm type for the powder compartment and means for operating said closure member.

---

1,567,736. CORN-HUSKING MACHINE. CHARLES T. HOWSON, Silver Creek, N. Y. Filed Apr. 17, 1920. Serial No. 374,682. 19 Claims. (Cl. 130—5.)

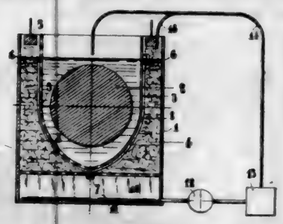


1. A corn husking machine comprising feeding mechanism by means of which ears of corn are transversely fed, husking mechanism beneath said feeding mechanism and in the path of the corn passing through said machine, and a chute at corresponding ends of said feeding and husking mechanisms receiving the ears of corn from said feeding mechanism while transversely fed and giving said ears a quarter turn to deliver the same longitudinally to said husking mechanism.

---

1,567,737. MAKING OF SHEET COPPER ELECTROLYTICALLY. MARCEL ANDRÉ JULLIEN, Paris, France. Filed Nov. 4, 1924. Serial No. 747,811. 1 Claim. (Cl. 204—11.)

Apparatus for use in the electrolytic manufacture of copper sheets of substantial size, comprising a container for the electrolyte a revolving cathode mounted in the container, and an anode serving as a container for copper waste or granulated black copper and comprising permeable walls and reinforcing members mounted on said walls in a slantwise direction to prevent deformation



of the said walls without impairing the evenness of the electrolytic deposit on the surface of the revolving cathode.

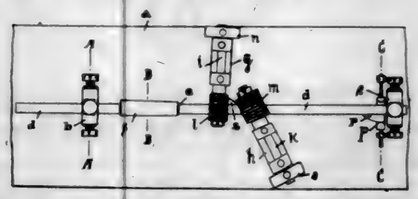
---

1,567,738. PENCIL. LEE G. KNIGHT, Omaha, Nebr. Filed June 17, 1924. Serial No. 720,607. 2 Claims. (Cl. 120—19.)

1. A pencil comprising a casing having a chamber therein, a plurality of longitudinally disposed grooves in the wall of the chamber of the casing, a sleeve rotatably mounted within the chamber of the casing and having an opening in the sides thereof adapted to register with any of the grooves in the wall of the casing chamber, a rotatable member mounted on the casing and to which the sleeve is secured, a push rod slidably mounted within the sleeve, said push rod being provided with a finger engaging member extending through the slot of the rotatable member and adapted to be received in a longitudinally disposed slot in the casing during a lead discharging operation, said finger engaging member extending through a longitudinally disposed slot in the sleeve.

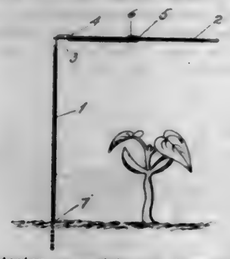
---

1,567,739. APPARATUS FOR MAKING ARTIFICIAL HARTSHORN SCALES FOR POCKETKNIVES. ERNST KÜHN, Jr., Solingen, Germany, assignor to the Firm of: Anton Benz, Solingen, Germany. Filed Dec. 30, 1924. Serial No. 758,949. 1 Claim. (Cl. 29—95.)



In an apparatus for making artificial hartshorn scales of bone for hilts of pocketknives or the like; the combination of a reciprocating slide for the reception of the scale to be worked, rotary cutters arranged above said slide and obliquely to the longitudinal direction of the same, fixed guides for said slide, a laterally movable support for said slide beside one of said guides, a raised plane on said support, and wedgelike lateral projections fitted to both lateral faces of said slide and adapted to eventually move said support in lateral directions whereby said slide is made to bear either upon the support or upon the raised plane of the latter respectively, substantially as and for the purpose set forth.

1,567,740. PLANT PROTECTOR. JOSEPH T. L. LAVAGETTO, Portland, Oreg. Filed Apr. 30, 1923. Serial No. 635,783. 1 Claim. (Cl. 47—28.)



A plant protector, comprising an imperforate top having one aperture near the periphery and a second aperture at the center, with a standard therefor comprising a vertical portion pointed at the bottom and adapted to be pressed into the ground, and a horizontal portion extending toward one side from the top of the vertical portion, said horizontal portion beginning at the edge of the imperforate top nearest to the first-named aperture and proceeding in contact with the upper surface of said imperforate top toward said first-named aperture, thence proceeding downwardly through said first-named aperture and in contact with the lower surface of said imperforate top toward the second-named aperture, then proceeding upwardly through said second-named aperture, and bending back in clamping contact with the upper surface of the imperforate top for a short distance toward the starting point, substantially as and for the purpose set forth.

---

1,567,741. ELECTROTHERAPEUTIC APPLIANCE. ALFRED LLOYD, London, England. Filed Sept. 30, 1924. Serial No. 740,698. 5 Claims. (Cl. 174—89.)

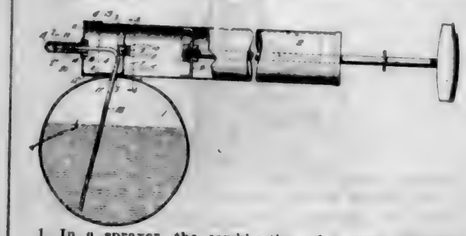
1. An electro-therapeutic appliance comprising a frame, a plurality of elongate electrodes of axially undulating contour and of opposite polarity mounted to rotate in said frame by frictional contact with the flesh of the patient, means to supply electric current to said electrodes, and a make and break device in the circuit actuated automatically by the rotation of the electrodes, the current flow being from one electrode to another through the flesh of the patient.

---

1,567,742. SOUVENIR LAMP SHADE. JOSÉ M. LOZANO, New York, N. Y. Filed Aug. 4, 1925. Serial No. 48,031. 1 Claim. (Cl. 41—21.)

As a new article of manufacture for retail sale, a flexible transparent unformed lamp-shade blank, bearing a pictorial illustration and having an unadorned space to receive autographs or the like intended to be sold before forming into a complete lamp shade to enable the purchaser to secure autographs thereon.

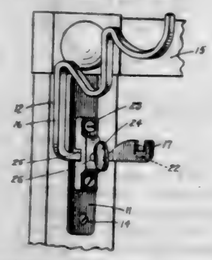
1,567,743. LIQUID SPRAYER. DON E. MACDONALD and LAFAYETTE VAN ALST, Batavia, New York, assignors to R. E. Chapin Mfg. Works, Batavia, N. Y. Filed Apr. 26, 1922. Serial No. 556,672. 6 Claims. (Cl. 299—89.)



1. In a sprayer, the combination of a pump cylinder, a cup-shaped closure member fitting within the end of said cylinder and forming an air pressure chamber, said member projecting out of the pump cylinder beyond the end thereof, a check valve carried by said closure member, a cover for said closure member having a flange fitting externally on the end of said cup member and lying adjacent to the end of the cylinder to permit the securing of the closure member in position in said cylinder and the cover on said member by a single solder joint, a liquid receptacle communicating with said pressure chamber, a nozzle mounted on said cap, and a liquid tube leading from the lower part of said receptacle into said nozzle.

---

1,567,744. COMBINATION BRACKET. ALFRED MATHIS, North Bergen, N. J., assignor to M. M. Combination Shades and Curtains Hanger Manufacturing Company, North Bergen Township, N. J., a Company composed of said Alfred Mathis. Filed July 12, 1922. Serial No. 574,431. 1 Claim. (Cl. 156—24.)



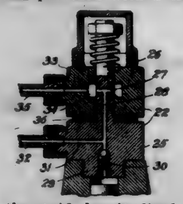
A bracket comprising an attaching member, a bracket member formed of a single piece of material and bent to provide spaced supporting parts connected by an intermediate part, one of said supporting parts being bent upwardly, downwardly and forwardly, thence upwardly to form the notch for the reception of a drapery rod, and thence forwardly to form a semi-circular portion for the reception of a curtain pole, the other supporting part being bent outwardly and provided with a slot for the reception of a shade roller, and means carried by the attaching plate for adjustably supporting the bracket member between the supporting parts, said means including a plate removably mounted on said attaching member and having a passage therein for slidably receiving said intermediate part, and a set screw carried by said plate for clamping engagement with said intermediate part.

---

1,567,745. LUBRICATING DEVICE. RUDOLPH F. MAU, Chicago, Ill., assignor to Mau Manufacturing Company, a Corporation of Illinois. Filed Nov. 3, 1921. Serial No. 512,506. 5 Claims. (Cl. 148—7.)

1. In a lubricating system, a connection comprising a body member having securing means at one end thereof

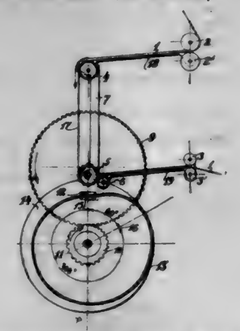
and provided with a longitudinally extending aperture, a longitudinally extending stem projecting from the opposite end thereof and provided with a transverse aperture



connected with the said longitudinal aperture, and a hollow member pivoted on said stem and provided with means for connecting thereto a pipe for the flow of lubricant.

---

1,567,746. **DEVICE ADAPTED TO MAINTAIN FOR A PREDETERMINED PERIOD OF TIME A CONTINUOUSLY-MOVING BAND, FILM, OR THE LIKE OPPOSITE A STATIONARY BODY.** ALESSANDRO MICHETTI, Rome, Italy. Filed Mar. 1, 1924. Serial No. 696,371. 2 Claims. (Cl. 88—18.)



1. A cinematographic film feed device, comprising, oscillable parallel film guide arms, a reciprocable frame pivotally mounted on the guide arms, means for reciprocating the frame, and a sprocket film drive roller carried by the said frame, said means for reciprocating the frame including, a rotatable disk, a cam on the disk and projecting at substantially right angles to the face of the disk, and a forked shape arm connected to the frame, the forked shape arm engaging the cam on either side thereof.

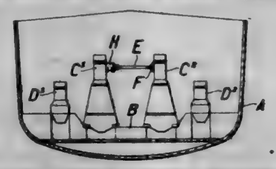
---

1,567,747. **STORAGE-BATTERY SEPARATOR.** PAUL E. NORRIS, Wilkinsburg, Pa., assignor to Westinghouse Union Battery Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Nov. 1, 1923. Serial No. 672,158. 4 Claims. (Cl. 136—146.)

1. A storage battery separator comprising rubber latex.

---

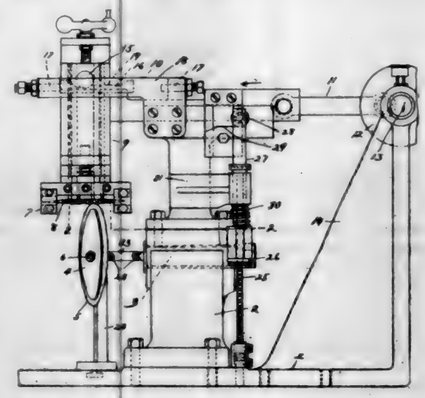
1,567,748. **DEVICE FOR RELATIVELY PROPPING PISTON ENGINES ON SHIPS.** ERNST OEHLER, Kiel, Germany, assignor to Fried. Krupp Germaniawerft Aktiengesellschaft, Kiel-Gaarden, Germany. Filed Mar. 30, 1925. Serial No. 19,507. 3 Claims. (Cl. 114—0.5.)



1. A device for relatively propping parallelly arranged piston engines on ships, consisting of a prop connecting the engines with each other and including means for rendering the prop rigid against rapid movements and yieldable with respect to slow movements.

---

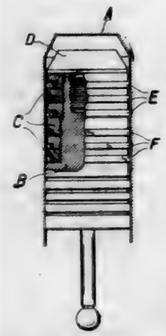
1,567,749. **SAW-FILING MACHINE.** WILLIAM S. PRITCHARD, Detroit, Mich. Filed Aug 27, 1920. Serial No. 406,297. 5 Claims. (Cl. 76—31.)



1. The combination with reciprocating abrasive means, of means for holding a circular saw extending transversely of the path of travel of said abrasive means, said holding means being adjustable to vary the angle between said saw and path of travel of said abrasive means, and means for rotatably indexing said saw including a universal drive connection.

---

1,567,750. **PISTON FOR HIGH-PRESSURE COMPRESSORS AND THE LIKE.** WILHELM PROFITLICH, Kiel, Germany, assignor to Fried. Krupp Germaniawerft Aktiengesellschaft, Kiel-Gaarden, Germany. Filed Aug. 22, 1924. Serial No. 733,633. 2 Claims. (Cl. 74—108.)



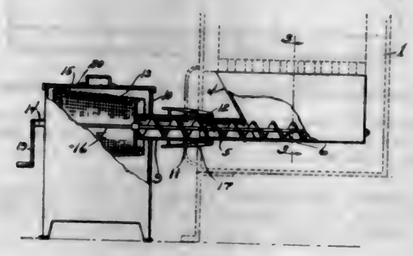
1. In a piston for high-pressure compressors or the like, a divided elastic piston ring, and a plurality of spaced, undivided piston rings in advance of said divided ring and forming a labyrinthine packing for protecting the latter.

---

1,567,751. **PAN CLEANER.** STEPHEN J. QUALLS, Casper, Wyo. Filed Apr. 4, 1925. Serial No. 20,797. 1 Claim. (Cl. 126—244.)

A furnace having a pan below the grate thereof, said pan having a pipe extension at the bottom thereof, a spiral screw conveyor having its shaft journaled in the said bottom and in the pipe extension of the pan, a normally closed casing, a reticulated drum therein, a

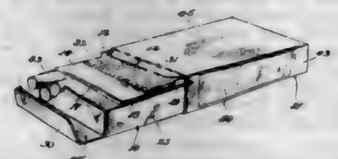
pipe extension on one side of the casing entering the drum and projecting outwardly from said casing, said pipe extension designed to receive therein the end of the first mentioned pipe, means latching the pipe sections so connected, a shaft passing centrally through the drum and through the pipe extension associated there-



with, supporting means on the shaft for the drum, a spiral worm conveyor on the last mentioned shaft at the portion thereof received in the pipe extension, intergaging means between the ends of both of the mentioned shafts, and an operating handle removably secured to the outer end of the last mentioned shaft.

---

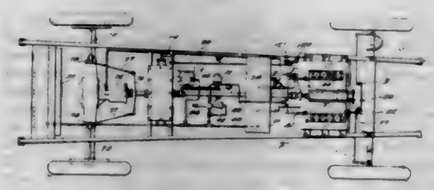
1,567,752. **CONTAINER FOR CIGARETTES AND MATCHES.** LAURENCE J. ROSAR, Scranton, Pa. Filed Nov. 10, 1924. Serial No. 748,961. 6 Claims. (Cl. 206—48.)



6. A container of the class described comprising a casing having side walls and top and bottom walls, a partition extending longitudinally in the casing between the side walls thereof and dividing the casing into upper and lower compartments, a main receptacle slidably fitting within the lower compartment, and an auxiliary receptacle slidably fitting within said upper compartment and connected with the main receptacle and moving into and out of the casing with the main receptacle.

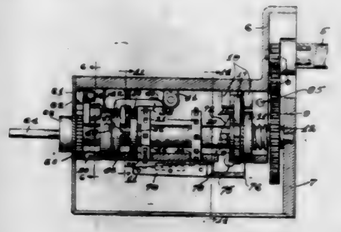
---

1,567,753. **POWER MECHANISM.** JOSEPH A. RIVORD, Pekin, Ill. Filed Apr. 25, 1925. Serial No. 25,821. 10 Claims. (Cl. 303—10.)



1. In a power mechanism, a storage tank, compressors for supplying air to the tank, an air engine, means for supplying air from the tank to the engine and means for utilizing the exhaust from the engine for cooling the cylinders of the compressors.

1,567,754. **MACHINE FOR MEASURING AND VENDING LIQUIDS.** CLARENCE A. ROSS, Joliet, Ill., assignor of one-half to William F. Horsting, Chicago, Ill. Filed Sept. 10, 1921. Serial No. 499,598. 20 Claims. (Cl. 234—84.)



28. In combination, an operating member movable back and forth and having a variable stroke, strip marking means, a record strip having its leading end substantially in line with said means, primary and secondary strip feeding mechanism operable alternately and together effective to move the strip a constant distance on each cycle of operation of said member, said primary mechanism effective on one stroke only of said member and moving the strip a distance proportionate to the stroke of said member, said secondary mechanism moving the strip the balance of said constant distance, and means operable between the operations of the primary and secondary mechanisms to actuate said marking means.

---

1,567,755. **PROCESS FOR OBTAINING ALKALI-METAL THIOSULPHATE FROM SOLUTIONS CONTAINING ALKALI-METAL SULPHIDE.** FRIEDRICH RÜSBERG, Mannheim, Germany, assignor to the Firm Rhenania Verein Chemischer Fabriken A. G., Cologne, Germany. Filed May 26, 1925. Serial No. 33,492. 1 Claim. (Cl. 23—105.)

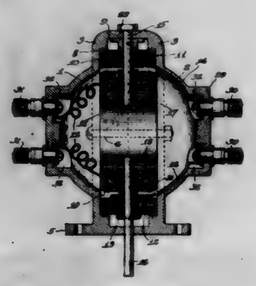
The process of obtaining sodium thiosulphate from solutions containing sodium sulphide, which consists in treating said solutions, in the presence of sodium sulphite, with a gas containing thirty-two percent by volume of sulphur dioxide.

---

1,567,756. **METHOD AND APPARATUS FOR FLATTENING AND ANNEALING SHEET GLASS.** LOUIS R. SCHMERTZ, Jeannette, Pa., assignor to Window Glass Machine Company, Pittsburgh, Pa., a Corporation of New Jersey. Filed Aug. 5, 1924. Serial No. 730,204. 5 Claims. (Cl. 49—4.)

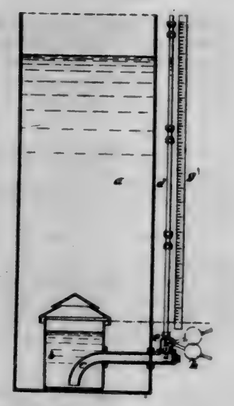
1. In the method of making flat sheet glass, the steps consisting in supplying unflattened glass to a flattening oven, flattening the glass therein, passing it from the oven through a leer to anneal and cool the glass, supplying heating gases to the flattening oven, passing heating gases from the flattening oven through the leer in streams above and below the glass, so regulating the relative rate of flow of the gases above and below the glass as to equalize the rate of cooling from the two faces of the glass therein, and preheating the unflattened glass supplied to the flattening oven to compensate for the increased temperature of the surfaces contacting with the glass in the flattening oven induced by the regulation of the gaseous flow from the flattening oven through the leer.

1,567,757. RADIOTRANSFORMER. KENNETH JAMES SCHNEIDERMAN, Kokomo, Ind., assignor to Kokomo Electric Co., Kokomo, Ind., a Corporation of Indiana. Filed Mar. 23, 1923. Serial No. 627,122. 3 Claims. (Cl. 171—119.)



2. A transformer for radio frequency amplification, as called for in claim 1 wherein said case has opposed flat walls supporting binding posts for said transformer.

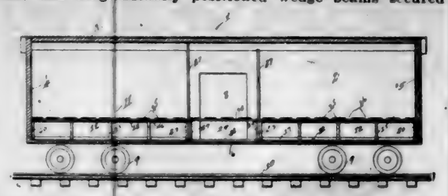
1,567,758. OIL-LEVEL INDICATOR FOR SHIPS' BUNKERS, OIL CONTAINERS, AND THE LIKE. LÜDER SCHRIEVER, Dansig-Langfuhr, Free State Dansig. Filed June 17, 1924. Serial No. 720,642. 6 Claims. (Cl. 73—54.)



1. Means for showing the level of the oil in oil containers, the said means comprising a receptacle containing water and in communication with the bottom of the said container and exposed to the pressure due to the level of the oil therein, an indicating gauge glass placed outside said container, means for connecting the interior of said receptacle and said gauge glass means for automatically closing said connection and means for manually opening said connection, when said level is to be read.

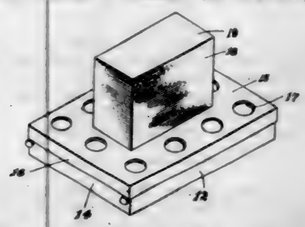
1,567,759. CAR DECK. FRANK W. SHIELDS, Walla Walla, Wash., assignor to Valley Fruit Company, Walla Walla, Wash., a Corporation. Filed Mar. 17, 1925. Serial No. 16,111. 7 Claims. (Cl. 105—373.)

1. In a car deck, a plurality of panels positioned vertically in a car, means to maintain said panels vertically, said panels forming a support for a platform, vertically positioned wedge posts rigidly attached to said panels and secured between the floor and roof of said car, and longitudinally positioned wedge beams secured



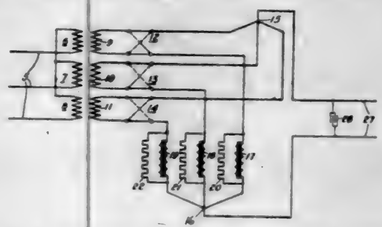
between the panels to force said panels against the ends of the car, said beams forming a support for an additional platform.

1,567,760. WATERING FOUNTAIN FOR CHICKS. MINNIE SITTIG, Danvers, Ill. Filed Apr. 15, 1925. Serial No. 23,226. 4 Claims. (Cl. 119—77.)



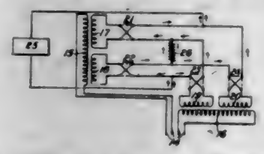
1. A device of the class described comprising a pan having end and side walls, a plate pierced with openings forming the cover on said pan, downwardly extending walls on said plate, a housing integral with said plate and projecting above the plate and below the plate into the pan, said housing below the plate having openings therein within the pan, pins on the walls of said plate, and means cooperating with the pins for locking the plate in place on the pan.

1,567,761. RECTIFYING SYSTEM. JOSEPH SLEPIAN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 23, 1919. Serial No. 299,243. 17 Claims. (Cl. 175—363.)



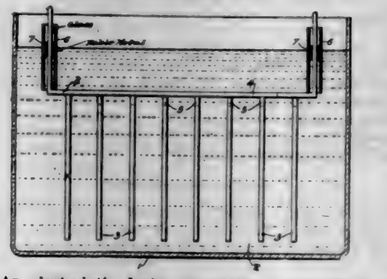
1. In a rectifying system, the combination with a source of polyphase electromotive forces, of means for completely rectifying each of said electromotive forces, whereby a plurality of unidirectional current impulses of mutually displaced phase relation are produced, means connecting corresponding poles of said rectifying devices to one neutral point, similar means connecting the remaining poles of said rectifying devices to an additional neutral point, an inductive reactor inserted in each lead between one of said neutral points and one of said rectifying devices of sufficient magnitude to substantially suppress the flow of upper even harmonics, a substantially non-inductive resistance shunting each of said reactors, a load circuit connected between said neutral points, and a condensive reactor connected across said load circuit.

1,567,762. HIGH-VOLTAGE-PRODUCING MEANS. JOSEPH SLEPIAN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 8, 1919. Serial No. 316,170. 22 Claims. (Cl. 175—363.)



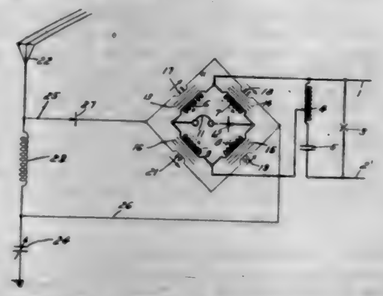
2. In a rectifying system, the combination with a polyphase supply, of rectifying means for each phase of the supply, whereby differing systems of unidirectional current impulses are provided, and means for cumulatively combining said impulses in one portion of an electric circuit and for differentially combining said impulses in another portion of said circuit.

1,567,763. ELECTROLYTIC CONDENSER TERMINAL. JOSEPH SLEPIAN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 10, 1919. Serial No. 343,891. 5 Claims. (Cl. 175—315.)



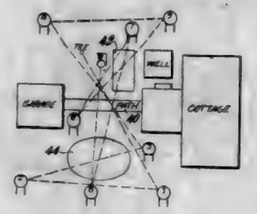
1. An electrolytic device comprising a containing vessel, an electrolyte therein, electrodes in said electrolyte, at least one of said electrodes being of a material acted upon by said electrolyte, a corrodible terminal for said active electrode, said terminal extending from within the electrolyte to outside of the surface thereof, and a noble-metal coating applied to said terminal adjacent the point where it passes through the surface of said electrolyte.

1,567,764. RADIORECEPTION. JOSEPH SLEPIAN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 21, 1921. Serial No. 463,205. 26 Claims. (Cl. 250—20.)



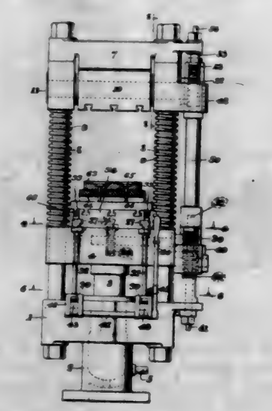
1. A magnetic amplifier of modulated high-frequency currents and oscillations comprising a Wheatstone bridge, one arm of said bridge including a coil with an iron core, said bridge being normally balanced, and means associated with said core for producing saturation effects varying in accordance with said high-frequency currents, whereby said bridge is rendered unbalanced.

1,567,765. GAME AND GAME APPARATUS. CHARLES S. SPAULDING, Newburyport, Mass. Filed Mar. 17, 1925. Serial No. 16,094. 10 Claims. (Cl. 273—87.)



1. A game comprising a series of stations adapted to be placed about a playing surface, each station consisting of a wicket having a lower opening directly above the playing surface and an upper opening at a distance above the playing surface, a projectile, and a club for driving the projectile through the several stations having provision for rolling the projectile through the lower opening or for imparting an initial elevation to the projectile to direct it through the upper opening of any of the wickets.

1,567,766. PLASTIC-MOLDING PRESS. THOMAS F. STACY, Mount Gilead, Ohio, assignor to The Hydraulic Press Manufacturing Company, Mount Gilead, Ohio. Filed Apr. 15, 1925. Serial No. 23,263. 6 Claims. (Cl. 18—16.)

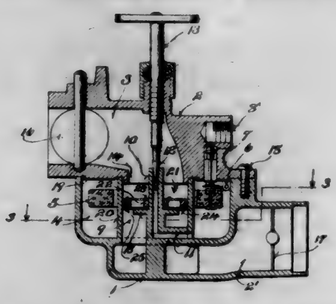


1. A molding press comprising an upper stationary member, a tilting head carried by a shaft mounted in said member, a pinion on said shaft, a rack engaging said pinion, a movable cylinder carrying said rack and hydraulic means for moving said cylinder.

1,567,767. CARBURETOR. GEORGE W. STORCH, Appleton, Wis. Filed May 17, 1924. Serial No. 714,009. 2 Claims. (Cl. 261—64.)

1. In a carburetor the combination of an air passage, a nozzle therein, a ledge formed upon said nozzle, an apertured disk slidably carried by said nozzle and cooperating with said ledge to partially close the apertures in said disk when said disk is close to said ledge, the

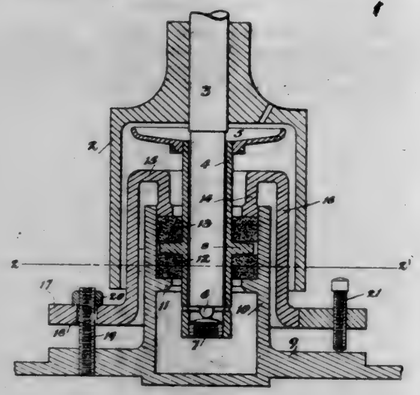
marginal edge of said disk being in close proximity to, and out of contact with, the walls of said passage, said disk having a small boss adapted to contact with said



ledge when said disk is in its lowest position, said passage having an inwardly projecting shoulder, and pins carried by said disk and adapted to contact with said shoulder when said disk is in its uppermost position.

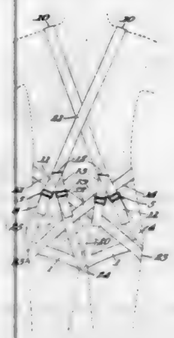
---

1,567,768. BEARING FOR CENTRIFUGAL EXTRACTORS. WILLIAM HENRY SUMBLING, Toronto, Ontario, Canada. Filed Jan. 15, 1925. Serial No. 2,685. 2 Claims. (Cl. 308—146.)



1. In a centrifugal extractor, in combination a basket spindle; a pulley attached thereto through which the lower end of said spindle passes; a bearing bushing for the lower end of said spindle; a conventional form of flange forming part of said bushing and radially disposed in respect thereto; an elastic cushion located above and below said flange and in contact therewith; a base; a tubular vertical portion housing both of said cushions, and carried by said base, and in which said bearing bushing is located, a horizontal flange forming part of said tubular vertical portion and extending inwardly thereof and against which the lowermost of said elastic cushions rests, said flange having clearance with said bearing bushing, a pressure-controlling device having a horizontal flange located below said pulley, and passing up therefrom and into the upper end of said tubular vertical portion and resting in contact with the upper of said elastic cushions, and means associated with said horizontal flange and said base located to be easily gotten at to permit said pressure device to be manipulated to regulate the pressure against said elastic cushions.

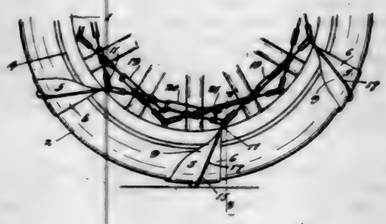
1,567,769. HERNIA TRUSS. GEORGE SWALLOW, Salt Lake City, Utah. Filed Mar. 30, 1925. Serial No. 19,323. 3 Claims. (Cl. 128—96.)



1. In a hernia truss, supporting members having preformed loops embracing the legs of the wearer at the crotch, and extending from said loops diagonally up the back and over the shoulders of the wearer and terminating in free ends, and truss members affixed to the supporting members at the back and passing around the body of the wearer in opposite directions from back to front and over the abdomen and thighs and between the legs from back to front and connected with the free ends of the supporting members.

---

1,567,770. MUD WING. JACOB W. THOMANN, Carlyle, Saskatchewan, Canada. Filed Mar. 12, 1925. Serial No. 15,133. 2 Claims. (Cl. 152—14.)

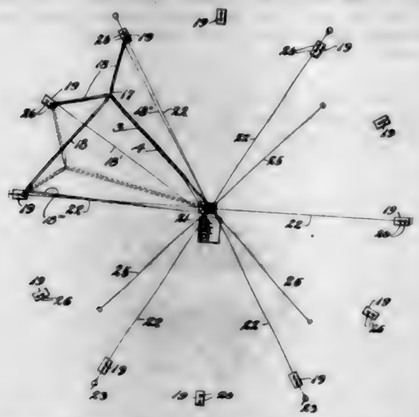


1. The combination with an automobile wheel, of a mud wing comprising a substantially U-shaped plate straddling the wheel tire and having the tread part thereof comparatively wide and the ends thereof tapered and terminating in hooks positioned adjacent the wheel felloe, the said plate being bent so that it spirals from end to end, means for holding the plate in working position on the tire and a web formed on the tread face of the plate and passing centrally thereof from end to end, the web being comparatively narrow at the tread side of the plate and comparatively wide elsewhere.

---

1,567,771. CONCRETE-DISTRIBUTING SYSTEM. CHARLES H. TOMPKINS, Washington, D. C. Filed July 29, 1925. Serial No. 46,852. 16 Claims. (Cl. 214—95.)

1. In a concrete distributing system, the combination of an elevator tower, a rotatable head thereon, a catenary support connected at one end to said head, means connecting the other end to fixed ground supports and



adjustable to shift the catenary support about said tower, and concrete conveying means carried by said catenary support.

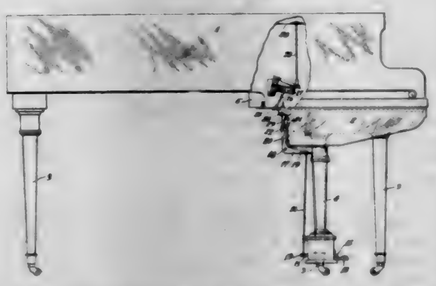
---

1,567,772. ANTISLIP SURFACE AND METHOD OF MAKING THE SAME. FRANK J. TONE and MINER L. HARTMANN, Niagara Falls, N. Y., assignors to The Carborundum Company, Niagara Falls, N. Y., a Corporation of Pennsylvania. Filed May 23, 1922. Serial No. 563,119. 5 Claims. (Cl. 94—5.)

1. An antislip floor or tread surface having embedded therein abrasive grains, whose surfaces have been provided with a roughening coating before embedding.

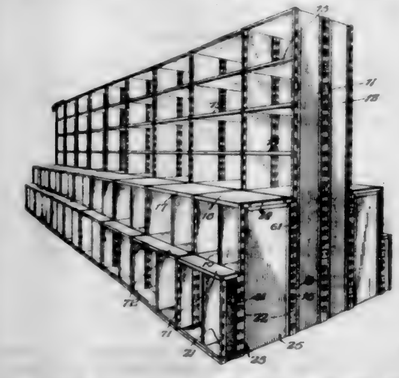
---

1,567,773. LYRE AND PEDAL MECHANISM FOR GRAND PIANOS. WILLIAM B. TUNSTALL, Worcester, Mass., assignor to Simplex Player Action Company, Worcester, Mass., a Corporation of Massachusetts. Filed Jan. 24, 1923. Serial No. 614,600. 6 Claims. (Cl. 84—225.)



5. In a pedal unit for grand pianos, a pair of offset brackets supporting a lyre, a connecting rod joining said brackets, bent levers fulcrumed on said rod, said levers operatively connecting the pedals and the piano devices.

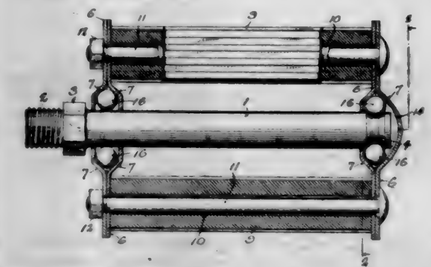
1,567,774. RACK EXTENSION. WALTER N. VANCE, Chicago Heights, Ill., assignor to Durand Steel Locker Company, Chicago, Ill., a Corporation of Illinois. Filed June 5, 1919. Serial No. 301,986. 18 Claims. (Cl. 211—27.)



1. A rack, comprising a main shelf structure including supporting uprights of substantial height, and a lower counter and auxiliary shelf section arrangeable in front of said main structure and bound thereto, said section being a complete separate unit and forming a counter-extension of said main structure.

---

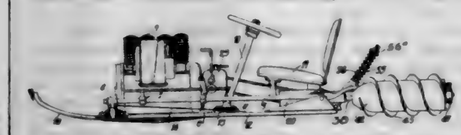
1,567,775. PEDAL. EDWARD R. WAGNER, Milwaukee, Wis., assignor to E. R. Wagner Manufacturing Company, North Milwaukee, Wis., a Corporation of Wisconsin. Filed Apr. 9, 1923. Serial No. 630,741. 9 Claims. (Cl. 208—70.)



1. A pedal comprising end members each composed of two plates assembled face to face and forming an annular ball race, treads arranged parallel with and on opposite sides of the pedal axis between the end members, and tie rods passing through the end members and treads and binding the parts of the pedal together.

---

1,567,776. AUTOTOBOGGAN. GEORGE ALEXANDER WALKER, Arlington, N. J. Filed Aug. 13, 1923. Serial No. 657,082. 3 Claims. (Cl. 180—3.)



1. In a motor driven sleigh, a pair of runners, a chassis mounted on said runners, a motor, gearing operable from the motor, a gear casing, a driven shaft, gear-

ing on the driven shaft, a pair of longitudinal shafts and propellers mounted thereon, gearing on the longitudinal shaft meshing with the gearing on the driven shaft, a transverse connecting spindle between the ends of the parallel shafts and a longitudinal, flexible element between the propellers connecting the gear casing with the said spindle.

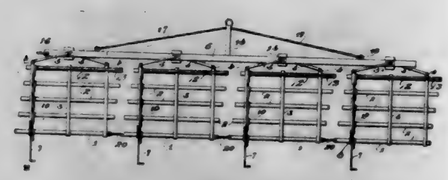
---

1,567,777. MUD GUARD FOR MOTOR VEHICLES. JOSEPH JOHN WAMPACH, Berlin-Charlottenburg, Germany. Filed Feb. 27, 1925. Serial No. 12,007. 1 Claim. (Cl. 280—153.)

Mud guard for motor vehicles comprising a vertical flange on the guard, a crescent shaped attachment adapted to be secured to said flange, headed bolts extending through elongated registering slots in said attachment and said flange, coiled springs encircling said bolts so as to hold said attachment applied against said flange, a hinge bolt mounted on said attachment, spring-controlled flaps hinged to said bolt and a roller on the inside of each flap and adapted to be engaged by said wheel.

---

1,567,778. HARROW. CHARLES E. WEBBER, Pontiac, Ill. Filed July 1, 1925. Serial No. 40,901. 8 Claims. (Cl. 55—84.)



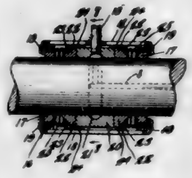
1. A harrow comprising a plurality of toothed sections, a draft bar, said sections being pivotally connected to said draft bar at intervals throughout its length, and draft connections on said bar, one at its intermediate portion and at substantially right angles to the same, and the other at one end thereof.

3. A harrow comprising a plurality of toothed sections, a draft bar, said sections being pivotally connected to such draft bar at intervals throughout its length, draft connections on said bar, one at its intermediate portion and at substantially right angles to the same, and the other at one end thereof and in substantial longitudinal alignment therewith, and means for detachably interconnecting the rearward portions of said sections, at times.

6. A harrow comprising a plurality of sections, each of said sections consisting of a plurality of transversely disposed adjustable and inter-connected tooth carrying bars, longitudinally disposed bars interconnecting said transverse tooth carrying bars, bearings on certain of the ends of said longitudinal bars, connecting bars pivotally received within said bearings having their adjacent ends pivotally connected to the upper and lower sides respectively of said draft bar, a longitudinally disposed bearing strip carried upon certain of the tooth carrying bars of each of said sections having one end thereof curved downwardly and adapted to pass under the lower side of said draft bar, at times, and draft connections on said bar, one at its intermediate portion and at substantially right angles to the same, and the other at one end thereof.

---

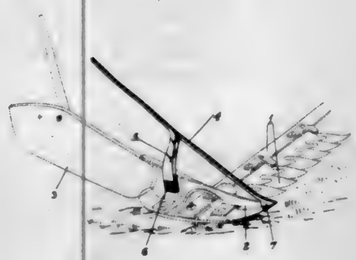
1,567,779. AIR SYSTEM FOR TIRES. ISAAC SIDNEY WELLS, Laurel, Miss. Filed Apr. 25, 1923. Serial No. 634,639. 1 Claim. (Cl. 286—1.)



In a device of the character described, an axle having a bore, one end of the bore extending laterally and terminating at the surface of the axle, a collar having a groove, said groove being disposed adjacent to the lateral extension of the bore to admit fluid therefrom, a pipe extending through the collar and communicating with the groove to admit fluid therefrom, a frame including bars having right angled extremities, end plates to which the right angled extremities are secured, rings having inclined outer surfaces and engaging the collar, rings having inclined edges engaging the first mentioned rings, and resilient members arranged between the end plates and last mentioned rings to urge the ring members towards the collar.

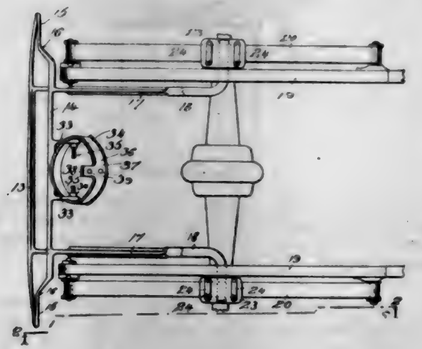
---

1,567,780. MOWER-SICKLE-BAR ATTACHMENT. EDWARD J. ALLEN and GEORGE A. ALLEN, Merced, Calif. Filed Jan. 22, 1923. Serial No. 614,103. 1 Claim. (Cl. 56—318.)



A one-piece auxiliary divider attachment for mowers of that type having a pointed dividing shoe comprising a rounded and smooth surfaced socket adapted to snugly fit over the shoe point, a rod projecting rearwardly and upwardly therefrom and making a smooth junction with the socket, and a bar projecting downwardly from the under side of the rod and making a smooth junction therewith, the lower end of said bar being adapted to contact against the outer face of the shoe and to be rigidly secured thereto.

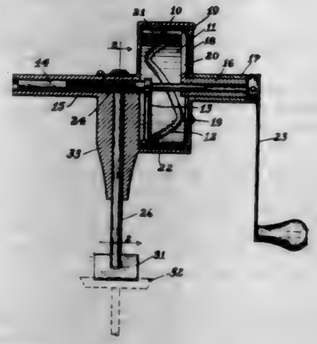
1,567,781. COMBINED TIRE CARRIER, BUFFER, AND SHOCK ABSORBER. WILLIAM BARBER, New York, N. Y. Filed Mar. 22, 1921. Serial No. 454,397. 88 Claims. (Cl. 293—55.)



1. A combined bumper and shock absorbing attachment for automobiles, which includes a flexible framework having means to attach the same respectively to the car axle and to the supporting frame.

---

1,567,782. VALVE GRINDER. HARRY A. BERN, Chicago, Ill. Filed Apr. 19, 1921. Serial No. 462,512. 7 Claims. (Cl. 74—14.)

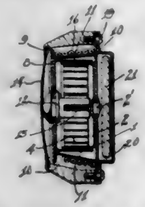


1. In a mechanical movement, the combination of a reciprocating shaft, a driven spindle, a driving sleeve, a first arm projecting from said sleeve, a second arm projecting from said shaft and engaged by said first arm, a cam engaging said second arm to reciprocate said shaft upon rotation thereof, and continuous mesh gearing connecting said shaft and spindle whereby rotation of said shaft produces continuous motion of said spindle relatively to said shaft.

---

1,567,783. KEY-CHAIN REEL. WILLIAM BEST, Chicago, Ill. Filed Apr. 3, 1925. Serial No. 20,508. 3 Claims. (Cl. 242—98.)

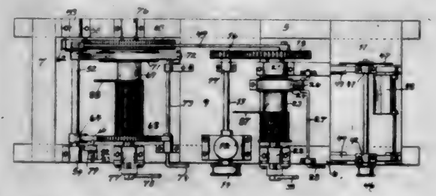
1. A key chain reel comprising a cylindrical bearing member, a spiral spring disposed within said bearing member, a barrel mounted for revolution on said bearing member, said barrel having a certain stub shaft slotted to receive one end of said spring, a chain wound



around said barrel, and a casing enclosing said barrel and having an opening for permitting the movement of the chain.

---

1,567,784. LAND-CLEARING MACHINE. CHARLES M. BONNEY, Hoquiam, Wash. Filed Oct. 2, 1922, Serial No. 591,886. Renewed June 2, 1925. 4 Claims. (Cl. 254—185.)



1. In a device of the character described, the combination with a suitable support, of a motor mounted on said support, a gear adapted to be rotated by said motor, a drum mounted adjacent said motor, a gear mounted in axial alignment with said drum and adapted to mesh with said first mentioned gear, a clutch formed between said second mentioned gear and said drum, a low speed power drum remotely located from said motor, a ratchet formed on one end of said drum, a ratchet formed at the opposite end of said drum and adapted to be connected thereto through the medium of a clutch, and reciprocating means operated by said motor and connected to the ratchets for the purpose of rotating said low speed power drum.

---

1,567,785. PROCESS FOR THE ACETYLENATION OF FATTY AND OTHER SUBSTANCES. LOUIS G. BOURGOIN, Montreal, Quebec, Canada. Filed Oct. 23, 1924. Serial No. 745,494. 11 Claims. (Cl. 260—2.)

1. The process for the acetylenation of organic substances, which consists in the treatment of substances, susceptible of combination with acetylene, together with calcium carbide, in such a way that the carbide will be decomposed by water or steam and generate acetylene which will combine with the substances to form a new product.

---

1,567,786. FOLDING COT. EDWIN G. BRANDT, Springfield, Mo. Filed Jan. 4, 1923. Serial No. 610,667. 9 Claims. (Cl. 5—112.)

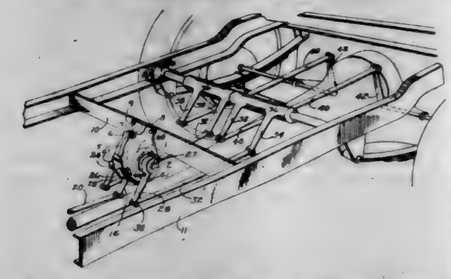
3. In a folding cot, a brace rail for the legs of the cot including independent sections, and a joint for detachably connecting the inner ends of the sections together including an elongated body substantially U-shaped in cross section for embracing one end of one section and for extending over the adjacent end of the other section, means connecting the body to the first mentioned section, ears carried by the body at a point intermediate its end, a pivot pin carried by said ears, an open hinge barrel carried by the other section for detachably engag-

ing the pivot pin, and a locking pin detachably carried by an end of the body for engaging under the last mentioned section.

8. In a bed including a body and legs carried by the body, each leg including a stationary section and a hinged section, and means for holding the hinged section in parallel relation to the stationary section or at right angles thereto and laterally of the sides of the body of the bed for engaging the sides of an automobile, whereby the bed can be readily associated with the automobile for sleeping purposes.

---

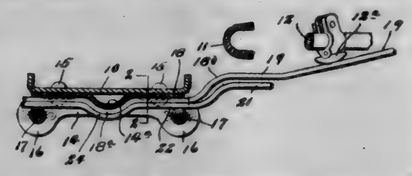
1,567,787. BRAKE EQUALIZER. FRED C. BROWN, Evergreen Park, Ill. Filed Nov. 14, 1924. Serial No. 749,994. 2 Claims. (Cl. 188—204.)



2. A brake equalizer comprising a housing consisting of a pair of sections having transversely curved outer walls and bearings, gears arranged in said housing and contacting with said transversely curved outer walls, said gears being provided with spindles extending through said bearings, a single pair of pinions in said housing and engaged with said curved walls, a single arm connected to said pair of pinions said housing being provided with an elongated slot receiving said arm, a longitudinally curved plate carried by said arm and extending over said bolt, and a leaf spring carried by said arm and having its terminal portion engaged with said longitudinal curved plate to hold the same lightly in contact with the adjacent portion of said housing.

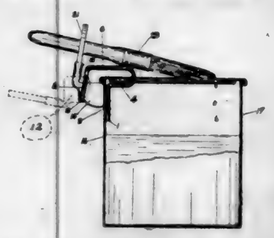
---

1,567,788. SAFETY SUPPORT. FREDERIC T. DE LONG, Chicago, Ill., assignor to Chicago Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed July 19, 1924. Serial No. 726,976. 10 Claims. (Cl. 188—213.)



1. A safety support for brake beams comprising a resilient track member, and an auxiliary member adapted to cooperate with and reinforce said resilient member.

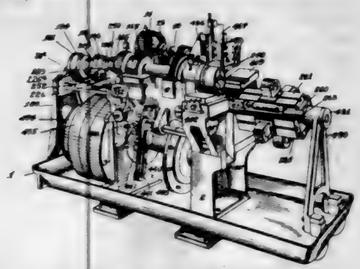
1,567,789. BRUSH SUPPORT. FREDERICH G. DIMER, Johnson City, N. Y. Filed July 14, 1925. Serial No. 43,545. 13 Claims. (Cl. 24—81.)



1. A brush holder comprising a supporting element, means pivoted to said support for clamping the same to a vessel, said clamping means carrying removable brush gripping means.

---

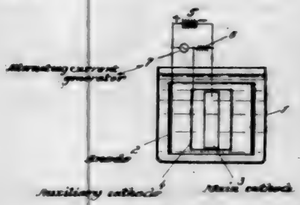
1,567,790. AUTOMATIC SINGLE-SPINDLE OR TURRET-LATHE MACHINE. ALFRED E. DRISSNER, Cleveland, Ohio, assignor to The National Acme Company, Cleveland, Ohio, a Corporation of Ohio. Filed Dec. 6, 1921. Serial No. 520,287. 69 Claims. (Cl. 29—41.)



1. In a metal working machine, the combination of a drive shaft, a rotatable work holder, a tool carrier, means for rotating the work holder at different speeds and comprising a pair of shafts, one thereof rotatable and the other fixed against rotation, sets of variable speed gears arried by said pair of shafts and means for connecting the drive shaft with any of said sets of gears, and including a rotatable gear located between said drive shaft and said sets of gears and shiftable on an axis parallel with said fixed shaft into mesh with the gears thereon.

---

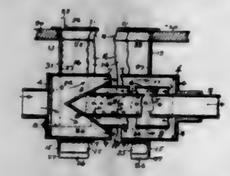
1,567,791. ELECTROLYTIC PRODUCTION OF METALS. EMIL DUHME, Berlin-Charlottenburg, Germany, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, a Corporation of Germany. Filed Nov. 1, 1924. Serial No. 747,366. 4 Claims. (Cl. 204—1.)



1. A process for electrolytically depositing metals substantially free from impurities on a cathode, consisting in maintaining an auxiliary cathode nearer the anode than the main cathode on which latter the desired pure metal is to be deposited and in supplying a suitable current to said auxiliary cathode and said anode, causing a comparatively small but desired metal deposit on the auxiliary cathode, whereby, due to larger concentration of the impurities near the anode, they are deposited on the auxiliary cathode to a greater extent than on the more remote main cathode.

---

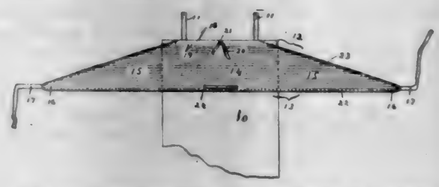
1,567,792. COMBINED HEATER AND MUFFLER. GEORGE H. EARLE, Valparaiso, Ind. Filed Feb. 1, 1921. Serial No. 441,704. 5 Claims. (Cl. 257—16.)



2. In heaters, a suitable casing, a muffling element within the casing, a heat radiating surface forming the exterior of the muffler, means for variably directing air through the casing to engage the exterior of the heating surface, and means for selectively delivering the heated air as desired, whereby a heat producing stream of exhaust gases is brought into contact with the interior of the heating surface and the muffler.

---

1,567,793. LADY'S UNDERGARMENT. ELIZABETH B. FERRIS, Utica, N. Y. Filed Dec. 13, 1922. Serial No. 606,747. 1 Claim. (Cl. 2—112.)



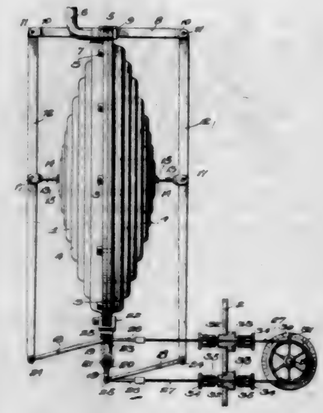
In a lady's undergarment the combination of a knitted vest or union suit and a long binder formed of a single flat strip of material, appreciably and uniformly elastic lengthwise, and of greater elasticity laterally, said strip having its upper edge intermediate its ends attached to the front of the vest or union suit above the bust and being there formed with parallel top and bottom edges and of sufficient width to reach below the bust, the ends of said strip decreasing in width and adapted to reach about the body and having the extremities of said strip adjustably connected at the front, said flat binder being sufficiently non-elastic to support the body but being sufficiently elastic to shape itself somewhat to the body.

---

1,567,794. HYDROGEN-GAS-PRESSURE GAUGE. THOMAS M. FINLEY, St. Louis, Mo. Filed Mar. 22, 1919. Serial No. 284,354. 14 Claims. (Cl. 73—10.)

1. The combination with a flying machine gas bag, of a hollow pressure responsive member located within the gas bag and subjected exteriorly to the pressure of the gas within said bag, means for transmitting to the interior of the pressure responsive member the pressure of the atmosphere on the exterior of the gas bag, said responsive member being movable under variations in the atmospheric pressure due to change in elevation of the gas bag, and means for transmitting motion from the said pressure responsive member to a point exterior of the gas bag.

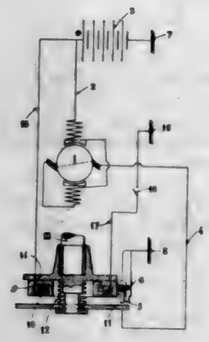
6. A gas pressure gauge including a hollow compressible body comprising substantially concavo-convex discs or members, levers fulcrumed at opposite sides of the body at points fixed with repsect to said body and



connected centrally with the discs or members and actuated by the same, a pressure indicating device, and means for transmitting motion from the said levers to the said device for operating the latter.

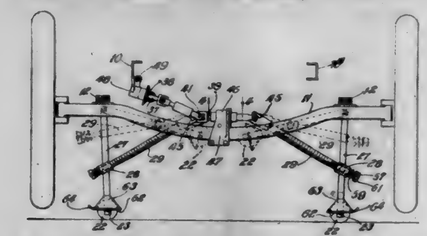
---

1,567,795. MOTOR-CONTROLLING SYSTEM. GUIDO FORNACA, Turin, Italy. Filed Aug. 8, 1922. Serial No. 580,403. 3 Claims. (Cl. 172—239.)



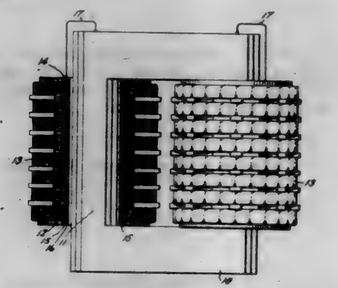
1. In a starting system for automobiles, a motor having a shaft, commutator and brushes and a bearing for said shaft, said bearing being formed with an outwardly projecting member in alignment with said shaft, an electromagnet mounted on said bearing and surrounding said projecting member, an armature for said electromagnet consisting of a circular metal disc loosely mounted on said projecting member, a spring interposed between said bearing and disc, a source of power having one side grounded and the other side connected to one of said brushes and a flexible conductor connecting another of said brushes with said disc, and a yielding grounded contact adapted to be engaged by said disc when the same is attracted by said electromagnet.

1,567,796. AUTOMOBILE JACK. LAWRENCE R. FOSTER, Rock Island, Ill. Filed July 20, 1922. Serial No. 576,237. 6 Claims. (Cl. 254—86.)



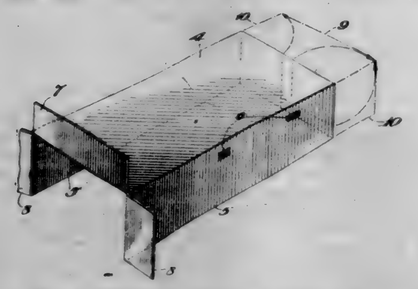
1. In a motor vehicle, the combination of a chassis, jacks pivotally connected to the chassis at points adjacent to each side thereof, each jack including a toggle arm mounted to swing transversely to the chassis, and adapted to be driven by the motor of the vehicle for swinging said arms to raise and lower said chassis.

1,567,797. ELECTRICAL INDUCTION APPARATUS. JOHN J. FRANK, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Apr. 5, 1922. Serial No. 549,940. 3 Claims. (Cl. 175—356.)



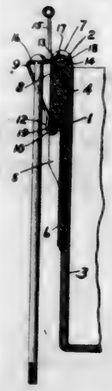
1. In electrical induction apparatus, a core formed with projecting portions, windings surrounding the core, insulation interposed between the innermost turns of said windings and the core, and a conducting member between the insulation and the projecting portions of the core, said conducting member being separated from said projecting corners.

1,567,798. DRAFT-INDUCING CONDUIT FOR FURNACES. ROBERT M. FRY, Pennfield, Pa. Filed Apr. 29, 1924. Serial No. 709,740. 4 Claims. (Cl. 110—71.)



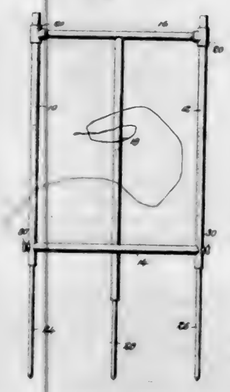
1. In combination a furnace including its complemental ash pit, of a draft inducing conduit of sheet metal inserted through the door opening of said ash pit and extended beneath the furnace fire box, the conduit being provided with air vents in its side walls and having wall extensions at its rear capable of being bent to form a partial closure or a continuation of the conduit as described.

1,567,799. HANDLE FOR STORAGE BATTERIES. CHARLES D. GALLOWAY, Philadelphia, Pa. Filed June 14, 1923, Serial No. 645,254. Renewed Oct. 22, 1925. 6 Claims. (Cl. 16—114.)



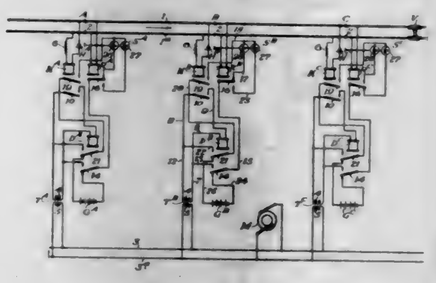
4. In a storage battery container the combination of two cleats whereof one is provided at the top of the container wall and whereof the other is formed by a recess provided in the face of the container wall, and a metallic spring knee having a clip for engagement with one of said cleats, and a claw adapted to engage the other of said cleats and forked to provide a recess for a hold-down clamp, substantially as described.

1,567,800. ADJUSTABLE SUPPORT. HERBERT C. GETMAN, Oneonta, N. Y. Filed July 10, 1925. Serial No. 42,783. 1 Claim. (Cl. 304—6.)



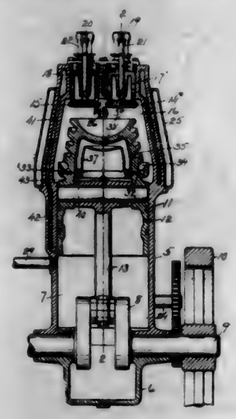
In an adjustable support, a pair of spaced side members each including a T-fitting near its upper end, a cross member rigidly connecting said side members near their lower ends, a second cross member having threaded engagement at its ends with said T-fittings respectively whereby it may be rotated, and a leg rigidly affixed to said second cross member.

1,567,801. RAILWAY SIGNALING APPARATUS. ROBERT M. GILSON, Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed June 29, 1925. Serial No. 40,255. 7 Claims. (Cl. 246—41.)



4. In combination, a stretch of railway track, a signal for said stretch, a main source of current, an auxiliary source of current, and means responsive to current from said main source and effective only when a train is approaching said signal for selectively connecting said signal with said main source or with said auxiliary source.

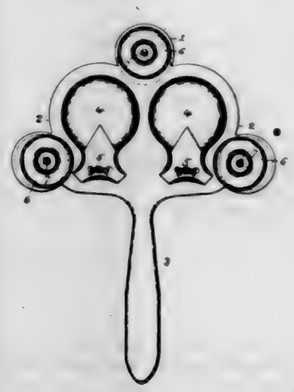
1,567,802. INTERNAL-COMBUSTION ENGINE. GEORGE WILLIAM GREENLAND, Hartford, Conn. Filed Aug. 8, 1921. Serial No. 490,480. 12 Claims. (Cl. 123—25.)



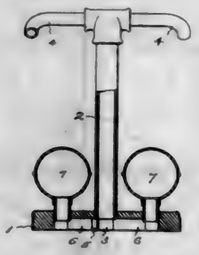
1. An internal combustion engine comprising a cylinder, means for supplying a combustible charge thereto, means for igniting said charge, a piston located within the cylinder and operatively connected with a driven member, and means for collecting water to close an air inlet port and for thereby introducing said water in the form of a spray within the combustion chamber of the cylinder during operation of said piston.

1,567,803. COMBINED MUSICAL CASTANET AND JINGLE. WILLIAM F. LUDWIG, Chicago, Ill., assignor to Ludwig & Ludwig, Inc., Chicago, Ill., a Corporation of Illinois. Filed Mar. 27, 1924. Serial No. 702,288. 3 Claims. (Cl. 46—46.)

1. In a musical instrument, the combination of a handled base having a cruciform shape, clappers or castanet members secured to the central portion of said base and at opposite sides of the same, and jingle members secured to the outer or side portions of said base and at opposite sides thereof.



1,567,804. WASHING MACHINE. JOHN H. MCCLELLAND, Forestville, Conn. Filed Apr. 17, 1924. Serial No. 707,272. 1 Claim. (Cl. 68—30.)

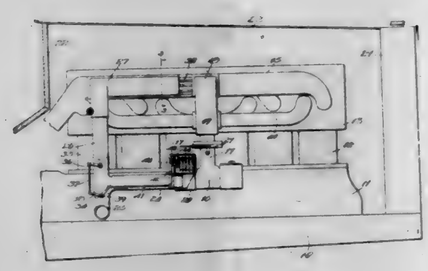


A washing machine comprising a heavy base having in its lower face a central circular recess, uniformly tapering intake channels in the bottom face of said base, said channels curving from the periphery to the central recess with which they communicate with restricted orifices, and channels in the bottom face of the base leading transversely outward from the central recess, equalising chambers above the base and communicating with the outer ends of the latter channels, an upright tube communicating with the channel recess, and nozzles extending oppositely outward and curved downward from the top of said tube.

1,567,805. AIR-TEMPERATURE CONTROL FOR CARBURETORS. FRANK C. MOCK, Chicago, Ill., assignor to Stromberg Motor Devices Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 5, 1920. Serial No. 371,436. 2 Claims. (Cl. 123—122.)

1. In combination with an exhaust manifold, an air heater comprising a conduit having connection with the exhaust manifold, a wall between said conduit and the

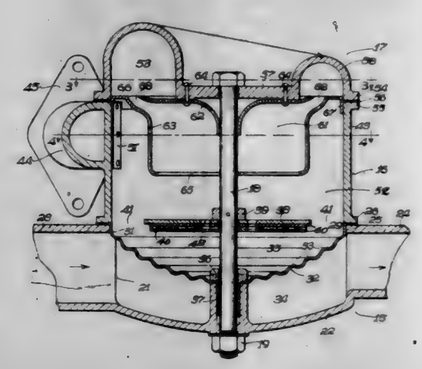
manifold, said wall having corrugations projecting into the exhaust manifold and an extension on said con-



duit terminating short of one end of said wall to permit the entrance of air into said conduit in contact with said wall.

---

1,567,806. FUEL SEPARATOR AND VAPORIZER. FRANK C. MOCK, Chicago, Ill., assignor to Stromberg Motor Devices Company, Chicago, Ill., a Corporation of Illinois. Filed June 20, 1921. Serial No. 478,929. 15 Claims. (Cl. 48—180.)

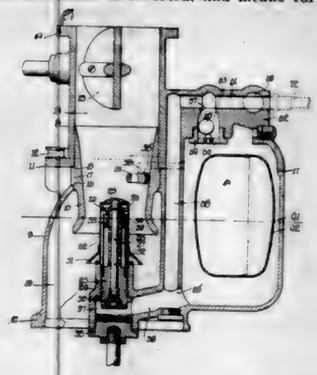


1. In combination, a circular separating chamber adapted to circulate a gas for an internal combustion engine, a substantially tangential inlet passageway entering said chamber, a substantially tangential outlet passageway leading from said chamber, said passageways producing a whirling vortex of the gas in said chamber to effect the separating function, and means for preventing the discharge through said outlet passageway of the constituents separated from said gas.

---

1,567,807. CARBURETOR. FRANK C. MOCK, Chicago, Ill., assignor to Stromberg Motor Devices Company, Chicago, Ill., a Corporation of Illinois. Filed Aug 15, 1921. Serial No. 492,263. 10 Claims. (Cl 261—70.)

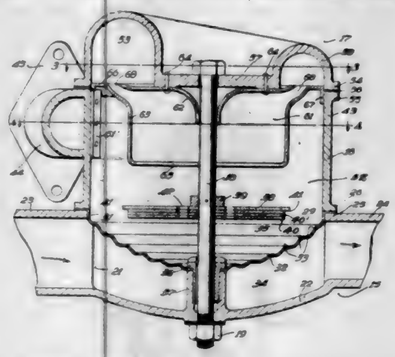
1. In a carburetor, the combination of a carbureting chamber, a float chamber, means for discharging fuel from said float chamber into said carbureting chamber when said carburetor is inverted, and means for venting



air into said float chamber when the latter is upright or inverted.

---

1,567,808. FUEL SEPARATOR AND VAPORIZER. FRANK C. MOCK and MILTON E. CHANDLER, Chicago, Ill., assignors to Stromberg Motor Devices Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 24, 1921. Serial No. 509,809. 8 Claims. (Cl. 48—180.)



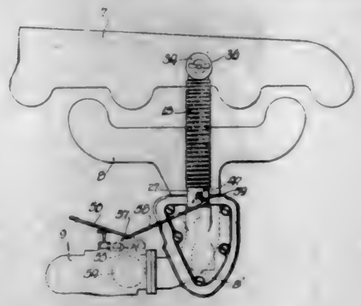
1. A fuel separator and vaporizer comprising a chamber, a substantially tangentially inlet passageway opening into said chamber and imparting a whirling motion to the mixture therein, an outlet passageway leading from said chamber above said inlet passageway, a fuel vaporizing surface in the end of said chamber below said inlet passageway, means for heating said surface, and a baffle member comprising heat insulating material interposed between the whirling volume of mixture and said vaporizing surface, said baffle permitting the precipitation of fuel particles to said vaporizing surface along the walls of said chamber, the separated fuel collecting on said vaporizing surface being trapped against return to the mixture stream except by vaporization.

---

1,567,809. HEATING ATTACHMENT FOR INTAKE MANIFOLDS. FRANK C. MOCK and MILTON E CHANDLER, Chicago, Ill., assignors to Stromberg Motor Devices Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 27, 1921. Serial No. 524,945. 1 Claim. (Cl. 257—241.)

In combination, an intake manifold having an approximately right angled bend therein and being tapered at one side of said bend, a frame enclosing said bend, said

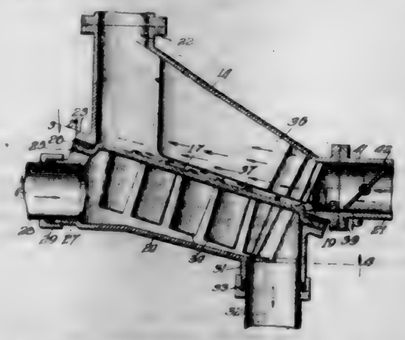
frame having an opening at one end receiving said tapered end of the manifold and having an opening at its other end fitting the manifold adjacent to the other end of said bend, said frame between said openings being spaced from said manifold whereby to engage said mani-



fold only at said openings and whereby it may be slid along the manifold to securely and intimately fit at the said tapered end, said frame forming the outer wall of a heating chamber around said manifold, and an exhaust inlet and outlet for said chamber.

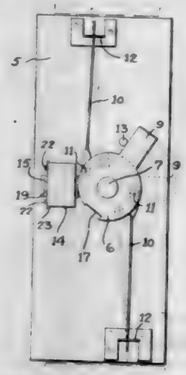
---

1,567,810. FUEL VAPORIZER. FRANK C. MOCK, Chicago, Ill., assignor to Stromberg Motor Devices Co., a Corporation of Illinois. Filed Oct. 21, 1922. Serial No. 595,899. 10 Claims. (Cl. 123—122.)



1. In combination, a fuel vaporizing chamber, an inlet mixture conduit entering said chamber, said chamber being enlarged laterally to each side of the point of entrance of said conduit, a baffle encountered by the mixture stream entering through said conduit and operable to divide the mixture stream and spread the same laterally to each side from said inlet conduit, thereby changing the direction of flow of said mixture stream and reducing its velocity in the expanded area of said vaporizing chamber, a vaporizing plate positioned to receive the fuel particles precipitated by said reduction in velocity and change of direction, an outlet removed in velocity and change of direction, an outlet removed from said vaporizing plate and adapted to be connected with the intake manifold, a shoulder interposed between said mixture outlet and said vaporizing surface at an angle to the latter for preventing fuel particles from being swept out through said outlet, an exhaust casing enclosing the reverse side of said vaporizing plate, heat absorbing ribs projecting from said vaporizing plate into said exhaust casing, and conduit means for circulating exhaust gases through said exhaust casing.

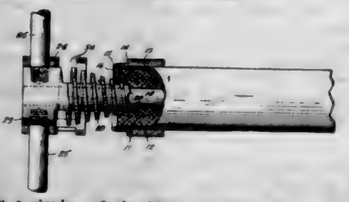
1,567,811. DOORLOCK. THOMAS F. MURPHY, New York, N. Y. Filed Dec. 13, 1923. Serial No. 680,348. 5 Claims. (Cl. 70—74.)



1. In combination with a door, locking means therefor including a rotatable part and a manually operable handle therefor at the outer side of the door, a spring projected bolt mounted upon the door in the plane of said rotatable part, said part having a notch in its periphery to receive one end of said bolt, key operated means on the door for retracting said bolt to disengage the same from said notch, and manually releasable means adapted to coact with the bolt and hold the same when it has been retracted by said key operated means.

---

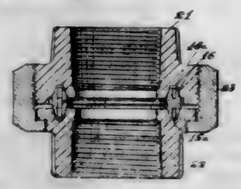
1,567,812. CUTTER FOR REMOVING CABLE INSULATIONS. DEAN C. OBER and ALBERT R. ASKUE, East Cleveland, Ohio. Filed Nov. 3, 1923. Serial No. 672,683. 5 Claims. (Cl. 77—72.)



1. In a device of the kind described the combination with a shouldered guide sleeve adapted to engage the exterior surface of a cable, of a centrally bored spiral cutter and a cage in which said cutter is arranged and provided with rotative means, said cage being adapted to fit upon the guide sleeve thereby to locate said cutter centrally with respect to the exterior surface of said cable.

---

1,567,813. PIPE FITTING. OLAF E. OLESON, Chicago, Ill. Filed Aug. 30, 1920. Serial No. 406,884. 4 Claims. (Cl. 285—120.)



4. As a means for packing a joint between pipe connections having tapered end grooves and devices for drawing the connections together, a packing ring having

tapered ends, each of the same angle as the angle of the tapered groove to be engaged thereby, said packing ring having grooves in its ends and axial holes connecting the grooves with the inner surface of the ring.

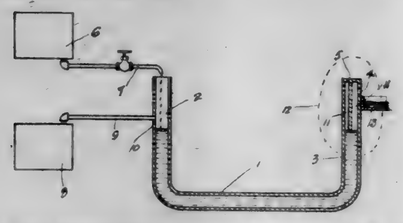
---

1,567,814. HEAT EXCHANGER. DAVID D. PEEBLES, Eureka, Calif., assignor of one-half to George T. Tooby, Eureka, Calif. Filed June 8, 1921. Serial No. 475,933. 4 Claims. (Cl. 257—224.)

2. In a heater, a shell composed of two sections, the inner end of one section being contracted and the inner end of the other section being flared whereby the inner ends of the sections may have telescoping connection to provide a slip joint to permit of expansion and contraction, a head secured to the outer end of each shell section, an exterior shell having connection with the aforesaid shell sections, means for introducing and circulating a heating medium through the inner shell sections, a plurality of chambers formed in the respective heads and a plurality of tubes rigidly secured at their ends in said heads and forming a communication between the chambers in the respective heads.

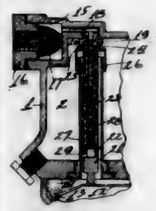
---

1,567,815. SAFETY FEED FOR OIL BURNERS. WILFRED FRANCIS RAVENOR, Vancouver, British Columbia, Canada. Filed June 5, 1924. Serial No. 717,991. 5 Claims. (Cl. 158—36.)



1. The combination with an oil burner, of a feed pipe having its delivery end terminating in a straight vertical portion exterior of the burner proper closed at its upper end and provided with an orifice adjacent the closed end, said pipe being adapted to contain oil a portion of which extends as a vertical column into said delivery end the head of the column being normally below and spaced from the said orifice and forming with the walls and closed end of the said delivery end a chamber exterior of the burner wherein the column expands under a heat zone influence to spill over at the orifice into the burner proper.

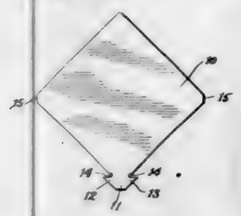
1,567,816. FLEXIBLE FUEL-SUPPLY VALVE FOR CARBURETORS. CHARLES L. RAYFIELD, Chicago, Ill., assignor to Beneke Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 29, 1920. Serial No. 377,514. 9 Claims. (Cl. 251—150.)



5. A valve of the class described comprising a sleeve, a recessed member loosely mounted therein, a passage leading from the recess in the member to the interior of the sleeve, a coiled spring in the recess in the member, a needle valve secured on the outer end of the spring, and a shield secured to the needle valve and loosely engaged over the end of the sleeve.

---

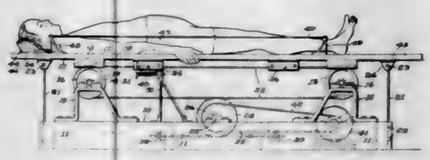
1,567,817. SHINGLE. JOHN A. SCHARWATH, Elizabeth, N. J. Filed Feb. 8, 1924. Serial No. 691,369. 2 Claims. (Cl. 108—8.)



1. A substantially flat rectangular flexible shingle formed with an integral extension at one corner thereof, said extension having lateral projections extending angularly from the adjacent shingle edges, adapted to interlock with edges of adjacent shingles, and curved marginal recesses cut at the peak of the angle for receiving the edges of said adjacent shingles.

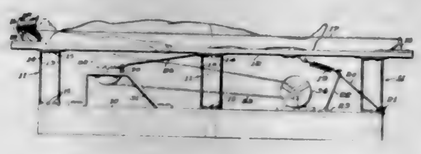
---

1,567,818. VIBRATING EXERCISE TABLE. ALBERT H. STEBBINS, Los Angeles, Calif. Filed July 23, 1924. Serial No. 727,712. 14 Claims. (Cl. 128—33.)



1. A vibratory exercise machine, comprising in combination, a table mounted for movement back and forth in the direction of its length and constructed to support a person in a lying position, transversely extending shafts rotatably supported below the table, wheels mounted upon and rigidly secured to the shafts and adapted to support the table, wheel-engaging plates rigidly secured to the table to rest upon the wheels, and means for rocking the shafts and wheels through a slight angle to cause the engagement of the wheels with said plates to move the table back and forth with vibratory effect.

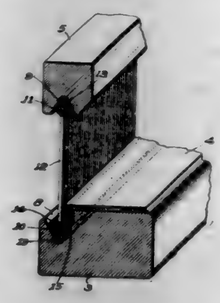
1,567,819. VIBRATORY EXERCISE TABLE. ALBERT H. STEBBINS, Los Angeles, Calif. Filed July 23, 1924. Serial No. 727,713. 3 Claims. (Cl. 128—33.)



3. A vibratory exercise machine, comprising in combination, a supporting frame having upwardly extending semi-rigid posts, a table constructed to support a person in a lying position and secured to the upper ends of said posts and supported thereby for a limited back and forth vibratory movement, means for vibrating the table more energetically in one direction than the other to stimulate the flow of blood lengthwise of the person being treated, including a flexible connection for pulling the table in one direction and adapted to bend or bow under lengthwise pressure, an eccentric for actuating the flexible connection to alternately pull the table in the direction of its length and then release it, and a spring for pulling the table in the opposite direction.

---

1,567,820. REED HOLDER FOR LOOMS. WALLACE I. STIMPSON, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed June 21, 1924. Serial No. 721,407. 1 Claim. (Cl. 139—188.)

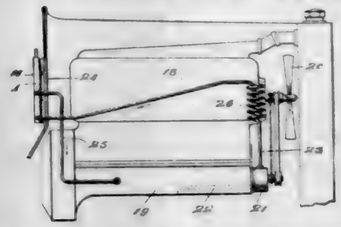


In a loom, the combination of the lay beam provided with a reed retaining groove formed in the wood of the lay and having a V-shaped configuration in cross section to receive the lower reed bar with a wedging action, a metallic liner comprising a strip of metal bent about its longitudinal axis to form a V-shaped trough adapted to fit the V-shaped groove to protect its sloping walls from the chafing action of the reed bar within the groove, and securing means extending thru the inclined side walls of the metal strip into the lay to secure the side walls of the protecting strip firmly against the inclined walls of the groove.

---

1,567,821. LIQUID-GRAVITY INDICATOR. ERNEST J. SWEETLAND, Montclair, N. J. Filed Nov. 19, 1920. Serial No. 425,041. 6 Claims. (Cl. 1—5.)

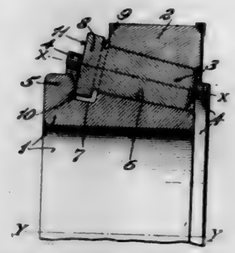
6. An instrument for determining the specific gravity of a liquid including a casing having a window in its upper portion and adapted to receive the liquid in its lower portion, a combined hydrometer and thermometer within said casing having a temperature scale and an indicating mark observable through said opening, a correction temperature scale, a movable member having an indicating mark cooperating with said correction temperature scale and a specific gravity indicating scale, and



a movable member cooperating with the indicating mark on said combined hydrometer and thermometer and with the specific gravity indicating scale on said first-named movable member.

---

1,567,822. ROLLER BEARING. HENRY H. TIMKEN, Canton, Ohio, assignor to The Timken Roller Bearing Company, Canton, Ohio, a Corporation of Ohio. Filed May 31, 1924. Serial No. 717,004. 5 Claims. (Cl. 308—214.)



1. A roller bearing comprising inner and outer bearing members and headed rollers between them the inner member having an annular rib and the heads of the rollers contacting with said rib at two widely separated points, each of which is in a continuation of the bearing surface of said inner member.

---

1,567,823. FOUNTAIN PEN. JOHN C. WAHL, Chicago, Ill., assignor to The Wahl Company, Chicago, Ill., a Corporation of Delaware. Filed Dec. 5, 1921, Serial No. 519,841. Renewed Jan. 31, 1923. 6 Claims. (Cl. 120—42.)

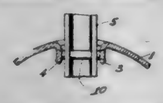
1. The method of forming a pen section for fountain pens comprising a metal shell, molten rubber poured into said shell, and a longitudinal bore formed in said rubber.

---

1,567,824. FOUNTAIN PEN. JOHN C. WAHL, Chicago, Ill., assignor to The Wahl Company, Wilmington, Del., a Corporation of Delaware. Filed May 26, 1922. Serial No. 563,794. 8 Claims. (Cl. 120—46.)

1. In a fountain pen in combination, a casing provided with a slot therein, resilient perforated lug members thereon, depending from the marginal edge thereof

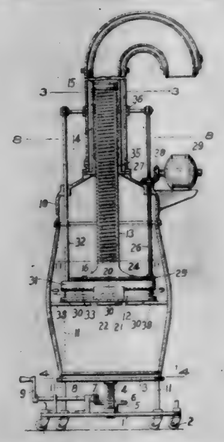
and fashioned with out-turned portions at their low ends, a lever, a pin, fixed transversely of the lever with its ends projecting laterally therefrom, whereby relative



seating of the lever pin in the perforations in the resilient lug members directly into the barrel of the pen may be accomplished by force applied through the pin to flex the lug members until seating position is attained.

---

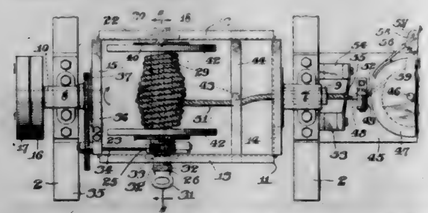
1,567,825. DISPENSING APPARATUS. HARRY W. WILLIAMS, Dayton, Ohio, assignor to Charles F. Gardner, Dayton, Ohio. Filed July 23, 1921. Serial No. 487,123. 25 Claims. (Cl. 221—102.)



1. In an apparatus of the character described, a support for a container, a superstructure carried by said support and spaced above the same, a discharge device mounted on said superstructure and adapted to extend into a container on said support and to separate material from the mass of material therein, means to convey the separated material from said container, and means for rotating said discharge device about an axis extending lengthwise of said container.

---

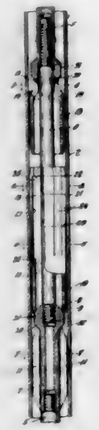
1,567,826. HAIR-CURLING MACHINE. PETER WOLL, Jr., Melrose, Pa., assignor to Peter Woll Manufacturing Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 6, 1925. Serial No. 13,444. 10 Claims. (Cl. 118—36.)



1. The combination of a frame, a rotatable member provided with a receiving device constructed to receive and take up a strand of twisted hairs when the device is actuated, means for rotating the member, a spiral forming element adapted to receive a strand of twisted hairs and to deliver it to said receiving device, said member and said element co-operating to spiralize said strand during the rotation of the member, and means influenced by varying thicknesses of said strand to actuate said receiving device at varying speeds in accordance with said varying thicknesses and thereby cause the spirallization of all parts of the strand in closely formed helices.

---

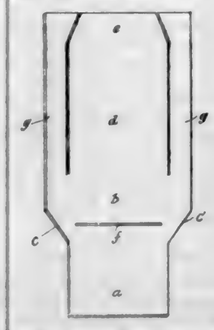
1,567,827. DEEP-WELL PUMP. JOHN A. ZUBLIN, Los Angeles, Calif. Filed Oct. 12, 1922. Serial No. 594,194. 14 Claims. (Cl. 103—225.)



1. A pumping unit for wells, including an interior section of pump rod independently guided for axial reciprocation in a well tubing, and a tubular piston free of and surrounding the rod to form an annular fluid passage, the piston being full floating with respect to the rod to permit it to independently center in the tubing having the upper portion expansible under pressure of the liquid carried thereby, the rod and piston cooperating to control the fluid passage and translate the piston.

---

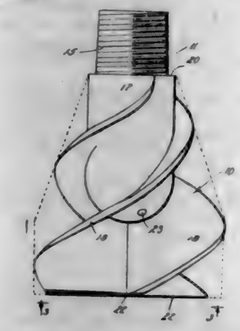
1,567,828. STENCIL HOLDER OR CARRIER FOR USE WITH TYPEWRITING MACHINES. LOUIS MAURICE BARMAN, London, England, assignor to Roneo Limited, London, England, a British Company. Filed Aug. 27, 1924. Serial No. 734,411. 4 Claims. (Cl. 197—136.)



1. A stencil holder or carrier adapted to be introduced between the platen roller and the feed rollers of a typewriting machine comprising a head and body portion, a slot formed between the head and body portion, a flap and tongue formed in the body portion, the tongue entering the slot to secure the carrier over the platen roller during successive cutting of stencils and marginal elements or guides formed in the body portion for introducing the stencil and its card or frame between the platen roller and the feed roller, the said marginal elements shaping the stencil to the platen roller and maintaining the shape during the complete cutting of the stencil.

---

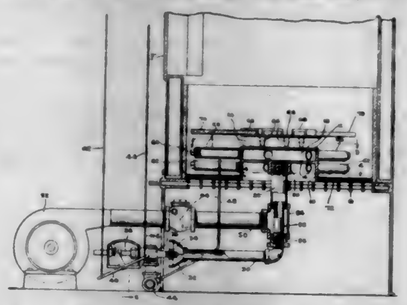
1,567,829. BIT. WILLIAM I. BETTIS, Los Angeles, Calif. Filed Jan. 28, 1924. Serial No. 688,948. 3 Claims. (Cl. 255—61.)



1. A bit of the character described including, a unitary structure comprising a shank of machinable metal, and a cutter of hard metal on one end of the shank, the cutter including a body engaging the shank and a helical blade integral with the body and extending from a point beyond the lower end of the body to the upper end of the body.

---

1,567,830. GAS BURNER FOR HEATING PLANTS. THOMAS R. BLANCHARD, Minneapolis, Minn., assignor to Oxigas Burner Company, Minneapolis, Minn., a Corporation of South Dakota. Filed Nov. 12, 1924. Serial No. 749,426. 3 Claims. (Cl. 158—99.)

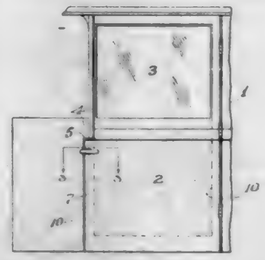


1. A gas burner for heating plants comprising a casing, a horizontal partition dividing said casing into upper and lower portions, a pipe leading from below said casing thru said partition for supplying gas to the upper portion of said casing, a plurality of perforated tubes leading out radially from the upper portion of said casing, and a plurality of perforated tubes leading out radially from the lower portion of said casing and located so as to deliver air directly below said first mentioned perforated tubes.

---

1,567,831. AUTOMOBILE DOOR. WILLIAM BREWSTER, New York, N. Y. Filed July 14, 1925. Serial No. 43,439. 1 Claim. (Cl. 296—44.)

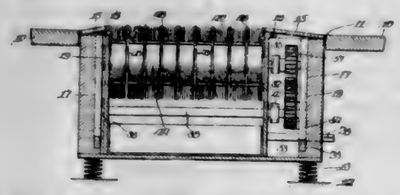
In an automobile front door construction in which the upper portion is provided with a drop glass pane, while the lower portion contains a pocket within which said pane may be dropped, the combination of a scarf-joint member extending from one edge of the lower half of the door, with a similar scarf-joint member formed in



the adjacent edge of that part of the automobile body which forms one side of the door casing, the fixtures of the door, as the lock or hinges, being wholly contained within said scarf-joint members, whereby the movements of said pane within said pocket are unimpeded.

---

1,567,832. AUTOMATIC BOOT CLEANER. RICHARD S. BROOM, Chicago, Ill. Filed Apr. 3, 1925. Serial No. 20,370. 10 Claims. (Cl. 15—36.)



2. In an automatic boot cleaner, the combination with a main frame mounted for vertical movement, of an electric motor, a switch for making and breaking an electric circuit to said motor upon the depression and elevation respectively of the main frame, a plurality of spaced tread members horizontally and depressibly mounted in the upper portion of the main frame, elongated shoe cleaning elements mounted for longitudinal movement between pairs of said members, and means operable by said motor for driving said elements.

---

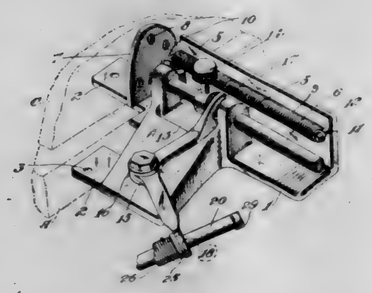
1,567,833. GRID-SHAPED SCREEN FOR X-RAY APPARATUS. GUSTAV BUCKY, New York, N. Y. Filed Oct. 22, 1923. Serial No. 669,014. 10 Claims. (Cl. 250—34.)

10. Apparatus of the class described, comprising a stationary frame, two chain-wheels mounted on each side within said frame, two endless chains on each pair of said chain-wheels, strips of band-steel mounted on the hinge pins of and between said chains, reinforcing mountings upon the ends of said strips, laterally projecting pins at the reinforced corners of said strips, an outer and an inner guide rail upon the inner side of said stationary frame adapted to cooperate with those of said pins upon which said guide rail exerts a drag-

ging action in the direction of motion and adjusts said strips in such a manner that they always point to the focus of the X-ray tube and a motor for slowly propelling said chains through a reduction gear.

---

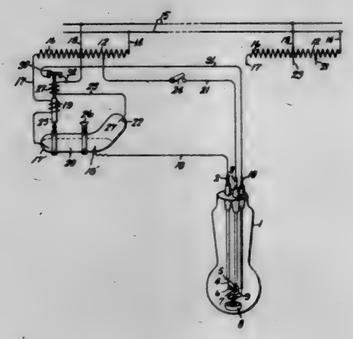
1,567,834. PAPER JOGGER. JAMES A. CARLTON, Newark, N. J. Filed Jan. 16, 1925. Serial No. 2,766. 9 Claims. (Cl. 271—89.)



3. A device of the character described including a body portion to be secured to a paper stacking table, a member reciprocable on said body portion to be connected to a sideboard of said paper stacking table, motion translating and power transmitting means to be connected to a source of power for reciprocating said member, and means for adjustably connecting said motion translating and power transmitting means to said member to permit adjustment of said member in the direction of its movement independently of said motion translating and power transmitting means.

---

1,567,835. ELECTRIC-ARC DEVICE. RALPH T. CHEESEMAN, Lynn, Mass., assignor to General Electric Company, a Corporation of New York. Filed Mar. 24, 1921. Serial No. 455,257. 11 Claims. (Cl. 176—46.)



2. An electric arc apparatus comprising an arc device containing electrodes adapted to operate at incandescence, separate means therein for furnishing ionized vapor to the space between said electrodes, a source of current having both low potential and high potential windings, connections to said electrodes from the high potential winding, a connection between the low potential winding and said ionizing means, and electro-magnetic means responsive to current flow between said electrodes for disconnecting said ionizing means and shifting connections to said electrodes from the high potential to the low potential winding.

1,567,836. REENFORCED ELASTIC WEBBING. GEORGE E. CLAUSS, Ansonia, Conn., assignor to The Ansonia O & C Co., Ansonia, Conn., a Corporation. Filed Mar. 3, 1925. Serial No. 12,903. 3 Claims. (Cl. 139—423.)

1. A broad elastic webbing for use in the manufacture of corsets and kindred articles of personal wear, having a body-portion comprising a plurality of rubber strands placed side by side, and a reenforced border portion also having a plurality of rubber strands placed side by side, the said body portion having a single range of rubber strands and the said border portion having a double range of superimposed strands, whereby the tensional resistance of the border portion is substantially greater than the tensional resistance of the body portion per unit of width of webbing.

---

1,567,837. BEET-UNLOADING MEANS. JOHN COMER, Ogden, Utah. Filed July 28, 1925. Serial No. 46,594. 6 Claims. (Cl. 214—44.)

1. In beet unloading stations at the factory, embodying trackage for railroad beet transportation cars and a water flume extending from said trackage to the factory, the combination of an endless conveyer disposed in association with said trackage, for the reception of the beet contents from a car on said trackage, and discharging to said flume, and means for driving said endless conveyer.

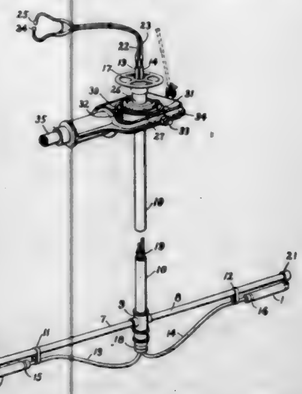
---

1,567,838. VOLTAIC CELL. MILLER EUGENE CONRAD, Atlantic, Iowa, assignor to C. B. Schoenmehl Incorporated, Waterbury, Conn., a Corporation of Connecticut. Filed February 9, 1921. Serial No. 443,616. 2 Claims. (Cl. 136—116.)

1. A negative electrode for use in a voltaic cell comprising a body of a depolarizing oxid impregnated with the fumes of sulfur.

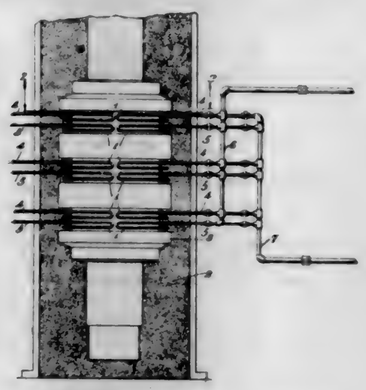
---

1,567,839. DIRECTIONAL SOUND-DETECTING DEVICE. WILLIAM D. COOLIDGE, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Oct. 8, 1918. Serial No. 257,361. 17 Claims. (Cl. 181—26.)



1. In a sound detecting device for subaqueous use, an unstretched and unstrained diaphragm of soft rubber.

1,567,840. METHOD AND MEANS FOR CONTROLLING THE CONDENSING ACTION IN THE CASTING OF IRON ROLLS. ALFRED CROOK, Philadelphia, Pa., assignor to Philadelphia Roll & Machine Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 27, 1924. Serial No. 702,340. 7 Claims. (Cl. 22—213.)



1. Means for effecting desirable alterations of grain structure in preselected areas of roll castings, comprising, in combination, a sand mold organized to dissipate the heat of the casting in the preselected areas through the medium of the sand, and means conformable to varying types of rolls for discharging the heat abstracted by the sand and including relatively adjustable fluid circulating units and their service connections.

---

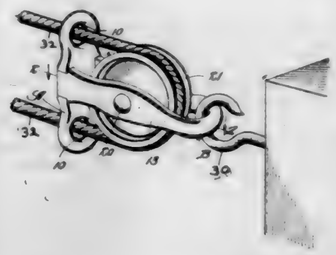
1,567,841. METHOD AND APPARATUS FOR CARDING FIBROUS MATERIAL. JAMES A. CURTIN, Medford, Mass. Filed Jan. 13, 1925. Serial No. 2,135. 6 Claims. (Cl. 19—100.)

1. A carding machine comprising a cylinder, a plurality of rolls arranged in groups and in carding contact with said cylinder, certain of the rolls of each group being of such arrangement, as to each card the material of the adjacent roll.

---

1,567,842. PULLEY. FRANK J. HALLER and EDWARD MENSENKAMP, Freeport, Ill., assignors to Stover Manufacturing & Engine Co., Freeport, Ill., a Corporation of Illinois. Filed Aug. 4, 1924. Serial No. 730,042. 1 Claim. (Cl. 254—197.)

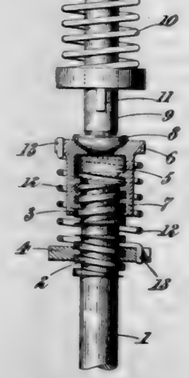
A pulley supporting structure comprising a rope guide, a U-shaped member, and formations on the rope guide and arms of the member maintained in inter-engagement by the inherent resiliency of the arms to secure the rope guide and member in assembly, said formations embodying reduced free ends on the arms of the member engageable, respectively, in corresponding recesses in opposite sides of the rope guide, and providing shoulders on the arms for abutment against the face of the rope guide which is positioned adjacent the member,



said recesses each having one portion of greater depth than the remaining portion to provide a shoulder, and inwardly directed flanges on the reduced free ends of the arms engageable behind respective shoulders within the recesses of the rope guide.

---

1,567,843. AUTOMATIC LENGTH-ADJUSTING DEVICE APPLICABLE TO RECIPROCATING PARTS OF MACHINERY AND THE LIKE. WILLIAM HAMILTON, Crowborough, England. Filed Mar. 6, 1923. Serial No. 623,152. 6 Claims. (Cl. 123—90.)



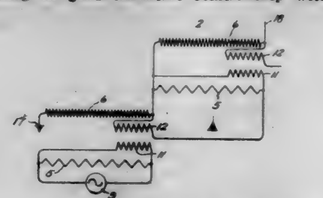
5. An adjustable element comprising a threaded part, and two members engaging respectively threaded portions of said part and adapted to move relatively toward and away from each other axially of said part, in combination with means for causing the simultaneous rotation of said members and their relative movement in opposite directions axially of said part.

---

1,567,844. TRANSFORMER. ALLAN B. HENDRICKS, Jr., Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Nov. 10, 1921. Serial No. 514,328. 9 Claims. (Cl. 171—97.)

1. In a transformer, a magnetic core, main primary and secondary windings surrounding the core, a second sec-

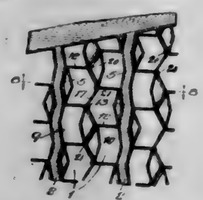
ondary winding surrounding the core, and a second primary winding in good inductive relationship with the



second secondary winding, the turns of the second secondary end of the second primary windings being concentrated near one end of the main secondary winding.

---

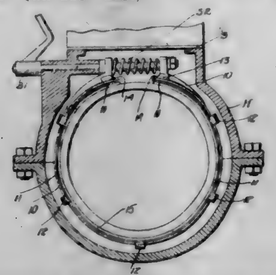
1,567,845. RADIATOR. HARRY JAFFE, Chicago, Ill., assignor, by mesne assignments, to McCord Radiator & Mfg Co., Detroit, Mich., a Corporation of Maine. Filed Dec. 31, 1920. Serial No. 434,235. 1 Claim. (Cl. 251—130.)



In a radiator of the kind described, thin walled vertical corrugated water passages, the water passages spaced apart by two substantially similar spaced strips and an intermediate divisional strip, the spacer strips formed to provide horizontal top and bottom walls for hexagonal air passages, the alternate vertical connecting walls deflected to nest with the water walls and the other connecting walls deflected to nest with the divisional strip, the opposed apexes of the two spacer strips spaced apart vertically midway of each other, the divisional strip formed to cooperate with the spacer strips to complete two vertical lines of hexagonal air passages between each two water passages and arranged to extend diagonally from the apexes of one spacer strip to the apexes of the opposed spacer strip, the apexes of the divisional strip being grooved to receive the edges of the apexes of the spacer strips to retain said parts in their relative positions.

---

1,567,846. COMBINATION TRANSMISSION OR BRAKE-LINING MEMBER. LOUIS D. JOSEPH, New York, N. Y. Filed May 15, 1925. Serial No. 30,421. 2 Claims. (Cl. 188—249.)



1. In a brake, an outer curved brake band having castings connected to the ends thereof, the said castings having their outer ends adjacent to and spaced from the ends of said outer brake band, and an inner brake lining member comprising an inner curved resilient band having brake lining connected to the inner face thereof, the inner bands having hooks at the ends thereof adapted to slidably engage the ends of the outer band, the curvature of the end portions of said inner band being less than the curvature of the corresponding end portions of the outer band, so that the said end portions of the respective bands are spaced from each other when the brake is inoperative.

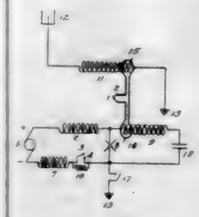
---

1,567,847. INJECTION FOR HEMORRHOIDS. JINSHICHI KATO, Kyoto, Japan. Filed Oct. 4, 1920. Serial No. 414,640. 3 Claims. (Cl. 167—7.)

2. An injection for hemorrhoids prepared from electric colloid of metallic magnesium mixed with an oily liquid harmless to the human body and without substantial chemical action on said metallic magnesium.

---

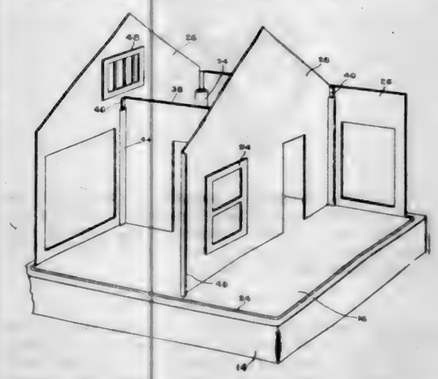
1,567,848. RADIOFREQUENCY TRANSMISSION SYSTEM. LORENZ LEI KUMEILIKE, Napa, Calif. Filed Mar. 9, 1922. Serial No. 542,434. 6 Claims. (Cl. 250—17.)



1. In a radio frequency transmission system, a local oscillatory circuit, an antenna circuit, an intermediate untuned loop circuit coupled to the oscillatory and antenna circuits and provided with a signalling key, and power balance means cooperating with said oscillatory circuit.

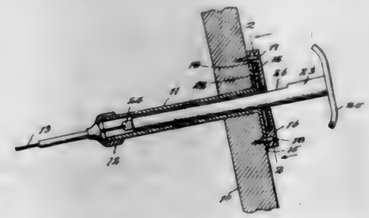
---

1,567,849. COLLAPSIBLE TOY BUILDING. EMIL S. KLINER, Burlington, Iowa. Filed Jan. 31, 1925. Serial No. 5,967. 4 Claims. (Cl. 46—37.)



1. A collapsible toy building comprising a hollow base of sheet material having a marginal groove extending around one surface thereof, wall members whose lower ends are adapted to be received in said groove and a sliding cover for the side of said base opposite said grooved surface whereby a receptacle is provided for receiving the wall members of the building.

1,567,850. ROD-LOCKING DEVICE. GEORGE F. LONG, Elmhurst, N. Y. Filed Jan. 30, 1925. Serial No. 5,718. 7 Claims. (Cl. 74—39.)



1. In a device of the class described, the combination of a casing including a bottom and a cover coacting to form within the casing an external circular bearing, a locking disk mounted for rotary movement in said bearing, said disk provided with a slot extending eccentrically of the axis of rotation of the locking disk, a pin secured to the casing and extending into said slot and providing means for locking the disk against rotary movement relative to the casing, a stem non-circular in cross section extending axially through the casing and disk, and said stem having its non-circular portion fitting within a similar shaped aperture in the center of the locking disk whereby rotary movement of the stem will cause a similar movement of the disk.

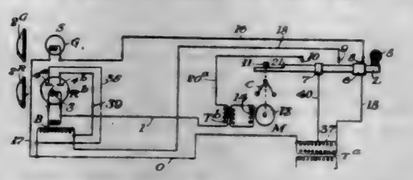
---

1,567,851. KEY CASE. CHARLES LORBER, Louisville, Ky. Filed Feb. 28, 1925. Serial No. 12,362. 2 Claims. (Cl. 24—237.)

1. A key hook for key cases consisting of a single length of wire bent intermediate its ends to form an eye and having side portions, each turned up at its extremity to form a hook bill fitting closely against the other side portion, one of said bills fitting within the other, the external bill being crimped adjacent its point and the opposed side being correspondingly crimped to receive the crimped point portion.

---

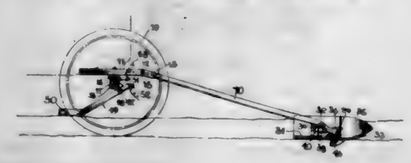
1,567,852. ELECTRIC LAMP. SAMUEL M. LUCAS, Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Original application filed Aug. 24, 1921, Serial No. 494,823. Patent No. 1,506,071, dated Aug. 26, 1924. Divided and this application filed July 26, 1924. Serial No. 728,487. 11 Claims. (Cl. 246—138.)



1. In combination, a railway signal comprising a rectifier having a filament and two anodes, a lever, means controlled by said lever for supplying operating current to said filament, an indication circuit including a source of alternating current and having two branches one of which includes said filament and one anode, and the other of which includes said filament and the other anode, and locking means for said lever controlled by the current flowing in said indication circuit.

---

1,567,853. TRACTOR GUIDE ATTACHMENT. JULE B. MCKEE, Covington, La., assignor of twelve per cent to M. P. Plauche, twelve per cent to E. J. Frederick, and twenty-four per cent to F. J. Heints, all of Covington, La. Filed Sept. 6, 1923, Serial No. 661,314. Renewed May 27, 1925. 7 Claims. (Cl. 97—49.)

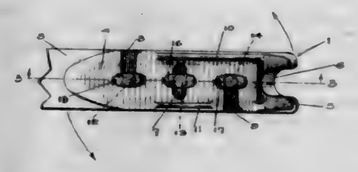


1. The combination with a tractor including the forward axle and steering wheels, and the steering elements, of a guide shoe supported from said axle and adapted to travel in a furrow, an arm swinging from said axle and terminating in a bearing shoe adapted to normally travel on the land adjacent the furrow, and electric contacts adapted to be closed to short circuit the electric control when the bearing shoe drops into the furrow.

5. An attachment for a motor driven vehicle comprising an arm adapted to be swingingly coupled to the forward axle of the vehicle and extending forwardly thereof and carrying a guide shoe adapted to run in a furrow, means adapted to couple said forwardly directed arm to the steering gear of the vehicle, an arm adapted to be coupled to swing upon said axle and extending rearwardly of the same and carrying a bearing shoe adapted to travel on the land adjacent the furrow, a stationary contact adapted to be supported from the axle, and a contact attached to the rearwardly extending arm and engageable with the stationary contact when the axle is turned from a direct course, to permit the bearing shoe to drop into the furrow to short circuit the electric control.

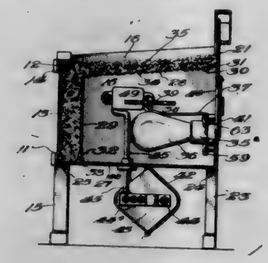
---

1,567,854. DEMOUNTABLE CLIP FOR BRAKE BANDS. RICHMOND W. MCCLELLAND, San Francisco, Calif. Filed Apr. 20, 1925. Serial No. 24,344. 1 Claim. (Cl. 188—249.)



In a device of the character described, the combination with a brake-band provided with a plurality of equally spaced and aligned retaining members bearing T-shaped heads, of demountable clips bearing, respectively, an elongated transverse opening having upon either side equally spaced open slots extending from the longitudinal centers of the clips to their outer edges and oppositely disposed relative to each other, the said retaining member heads being so positioned as to be nonregistrable with said slots when said clips are positioned properly upon the band, and to register therewith when said clips are turned at right angles to said band.

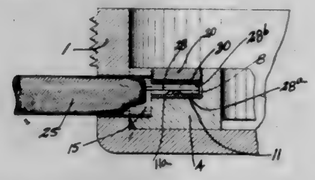
1,567,855. ELECTRIC FIREPLACE. DANIEL N. MEANY and EDWARD N. ELLSWORTH, Chicago, Ill., assignors to Electric Fireplace Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 24, 1924. Serial No. 751,773. 6 Claims. (Cl. 240—2.)



1. In an electric fireplace, the combination of a grate structure consisting of a back, end walls, and a grated front, an electric bulb secured to and projecting forwardly from the back, a mesh partition of angled formation extending forwardly from the back and down turned behind the grated front to afford a front space for the reception of artificial fuel, the rear and bottom edges of the mesh partition being backwardly turned to provide hooks, upper and lower rods entered through the end walls and extending through said hooks, and a layer of artificial fuel on top of and in front of said mesh partition, substantially as described.

---

1,567,856. TERMINAL BLOCK AND CONNECTIONS FOR TELEPHONE RECEIVERS. DAVID H. MOSS, Newark, N. J., NICHOLAS J. CELENZA, Brooklyn, N. Y., and WILLIAM H. GERNS, East Orange, N. J., assignors, by mesne assignments, to Brandes Laboratories, Inc., Newark, N. J., a Corporation of New Jersey. Filed Mar. 20, 1925. Serial No. 17,051. 8 Claims. (Cl. 179—186.)



1. Connections for electromagnetic sound reproducers comprising in combination a casing, an electromagnetic operating mechanism arranged therein, a terminal block including a rectangular recess, a plurality of flat outstruck contact projections within said recess, and a plurality of flat terminal members formed on the extremities of flexible conductors projecting into said terminal block, each of said flat terminal members having outstruck and instruck portions adapted to be locked over the outstruck projections of said flat terminals, and means for clamping said flat terminal members in substantially locked position.

---

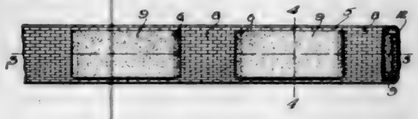
1,567,857. TYPOGRAPHICAL MACHINE. JOHN P. MURRAY, Washington, D. C. Filed July 17, 1923. Serial No. 652,168. 7 Claims. (Cl. 199—55.) (Granted under the act of Mar. 3, 1883, 22 Stat. L. 625.)

1. In a type machine comprising casting mechanism and manually-controlled matrices, means to cast a line of type provided with spacing elements integral therewith to print lines of subject-matter in spaced relation to each other without the interposition of separate spacing type leads, such means comprising a mold cap provided with a plurality of rib-forming recesses, and an elevator

jaw having type-mold controlling means for withholding the flow of type-metal to a part of the matrices presented to the mold.

---

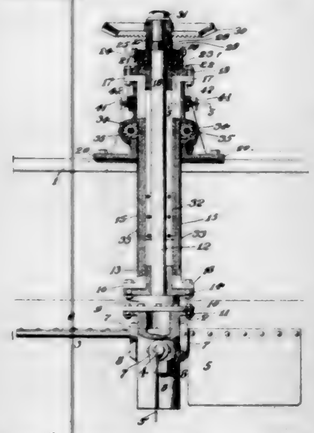
1,567,858. FRICTION MATERIAL. NILS WILLIAM NILSON, Walpole, Mass., assignor to Advance Automobile Accessories Corp., Chicago, Ill., a Corporation of Delaware. Filed Dec. 20, 1919. Serial No. 346,329. 11 Claims. (Cl. 188—259.)



1. A friction material comprising a fabric having a series of slits removed from the edges and a flexible frictional strip woven in and out of the slits.

---

1,567,859. MEANS FOR UTILIZING POWER FROM STREAMS. JOHN VERNER ORNELL, Philadelphia, Pa. Filed Nov. 14, 1924. Serial No. 749,832. 1 Claim. (Cl. 170—121.)



Means for converting power derived from the flow of a stream into rotary motion including a rotatable and vertically movable hub; rock shafts mounted in the hub and extending therefrom in both directions; a blade fixed to each extending part of the rock shafts, the blade on one extending part being disposed in a plane at right angles to the blade on the other part; a collar fixed to the hub; a shaft fixed to the collar; a second collar resting upon the first named collar serving as a bearing for the shaft; standards fixed to the second collar; a collar fixed to the standards serving as a second bearing for the shaft, the standards having racks arranged longitudinally thereon; columns supporting the standards; gearing carried by the columns meshing with the racks, means for actuating the gearing; and releasable locking dogs arranged to engage the teeth of said racks.

---

1,567,860. MARKING PATTERNS AND THE LIKE. ALLEN S. PEARL, Chicago, Ill. Filed Feb. 2, 1925. Serial No. 6,227. 2 Claims. (Cl. 22—158.)

1. The combination with a molder's pattern, of means for marking the same comprising a continuous integral type metal casting having a relatively thin body of uniform thickness, and integral characters raised from or recessed into its exposed surface in the same order as the desired order of characters on the finished pattern, together with a recess in the face of the pattern of the same depth as the thickness of the body portion aforesaid, and means for securing said body portion within said recess comprising brads or the like, substantially as described.

---

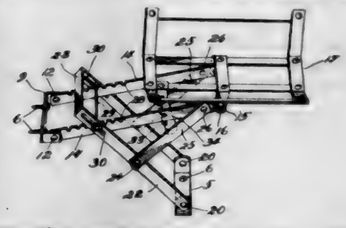
1,567,861. UMBRELLA. BENJAMIN ROTHSCHILD, Baltimore, Md. Filed Feb. 24, 1922. Serial No. 538,864. 1 Claim. (Cl. 135—29.)

An umbrella rib composed of sections, shoulder members applied to the ends of the sections and having intermediate stop portions projecting beyond the ends of the sections, a link plate pivoted to the shoulder members at points beyond the end edges of the stop portions thereof, said plate being broader transversely than the transverse breadth of the sections and provided at its ends and at one side edge with recesses adjusted to receive the stop portions and whereby the intervening edge portion of the plate may aline with the outer surfaces of the stop portions when the rib sections are alined with each other, and springs connected at one end with the plate at points beyond the end edges of the intermediate stop portions of the shoulder members and connected at their other ends with the rib sections at points spaced from the ends thereof.

---

1,567,862. PILLOW REST FOR CASKETS. JOHN C. RUMSEY, Lawrence, Kans. Filed Jan. 26, 1925. Serial No. 4,758. 7 Claims. (Cl. 27—13.)

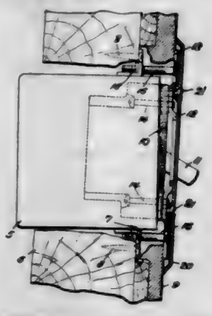
1. A device of the character described comprising a pair of fixed bracket elements, supporting members having separate pivotal connections with said bracket elements, a pillow rest member entirely supported by one of said supporting members, and connections between



said supporting members adapted to secure said supporting members in different positions of adjustment for varying the elevation of said pillow rest member.

---

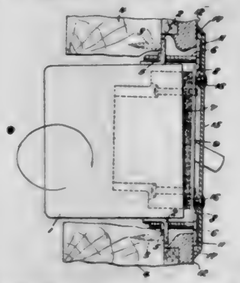
1,567,863. HOUSE-WIRING STRUCTURE. HOWARD R. SARGENT and FRANK C. DE REAMER, Bridgeport, Conn., assignors to General Electric Company, a Corporation of New York. Filed Jan. 3, 1923. Serial No. 610,496. 9 Claims. (Cl. 247—20.)



6. In combination, an electrical wiring device, supporting means projecting beyond its ends and provided with openings to receive fastening means for mounting it in an outlet box, and ears formed integral with said supporting means and adapted to engage the surface of a wall when the device is mounted in an outlet box in the wall.

---

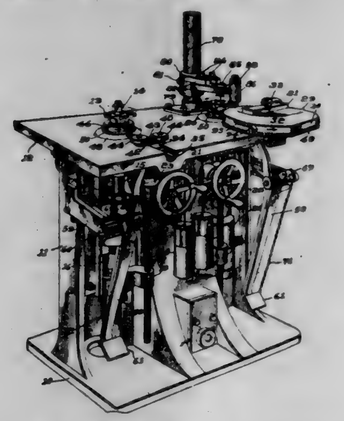
1,567,864. WALL-ATTACHMENT MEANS FOR ELECTRICAL DEVICES. HOWARD R. SARGENT, Bridgeport, Conn., assignor to General Electric Company, a Corporation of New York. Filed Feb. 18, 1924. Serial No. 692,606. 8 Claims. (Cl. 247—19.)



1. The combination with an electrical device having supporting lugs projecting beyond its ends for use in mounting it in an outlet box, of integral extensions on said lugs adapted to engage the surface of a wall when

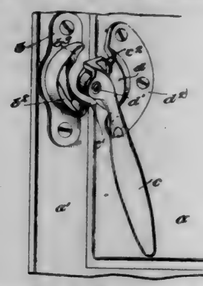
the device is mounted in an outlet box in the wall, the line of connection between the lugs and extensions being weakened whereby the extensions may be severed readily from the lugs.

1,567,865. WOODWORKING MACHINE. WILLARD N. SAWYER, Winchendon, Mass., assignor to Baxter D. Whitney & Son, Inc., Winchendon, Mass., a Corporation of Massachusetts. Filed Aug. 8, 1924. Serial No. 730,803. 22 Claims. (Cl. 144—145.)



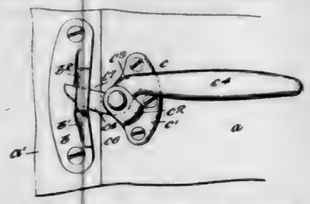
1. In a wood working machine, in combination, a vertical shaft for supporting and rotating a cutter, a pattern to which the work is secured, a pattern guide adjacent the cutter, a slide supported for movement toward and from the cutter, yielding means for urging the slide toward the cutter, a projection between the slide and pattern for holding the work against the cutter, treadle operated means for moving the slide away from the cutter, and means under the control of the treadle means and moving automatically into position to secure the slide in its retracted position.

1,567,866. LEVER LOCK FOR REFRIGERATOR DOORS. THOMAS O. SCHRADER, Allentown, Pa., assignor to Dent Hardware Co., Fullerton, Pa., a Corporation of Pennsylvania. Filed July 23, 1925. Serial No. 45,538. 1 Claim. (Cl. 292—241.)



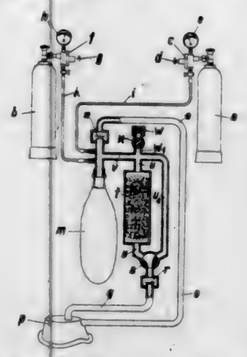
A construction of the character stated comprising a housing, a door, a keeper having a flat rear plate secured to said housing and projected forwardly from which is a semi-circular member, the forward upper edge of said member being provided with an inclined cam-like surface and the lower forward edge of said member having extended forwardly therefrom a relatively cone-like formation provided with an inner, overhanging ledge, the outer curved surface of said semi-circular member being continuous and uninterrupted, a lever arm having a bifurcated portion one extension of which is provided with a front tongue and a rear cam-like projection formed integral with said bifurcated portion, a flat plate secured to said door and provided with a segmental portion which segmental portion is accommodated by said bifurcated portion, a horizontally arranged pivot for connecting said lever and said segmental portion whereby said tongue and rear cam-like projection are respectively arranged to automatically engage the keeper ledge, to lock the door, and to manually permit by riding of said cam-like surface the release of the door from a locked condition.

1,567,867. LEVER LOCK FOR REFRIGERATOR DOORS. THOMAS O. SCHRADER, Allentown, Pa., assignor to Dent Hardware Co., Fullerton, Pa., a Corporation of Pennsylvania. Filed July 25, 1925. Serial No. 45,984. 1 Claim. (Cl. 292—241.)



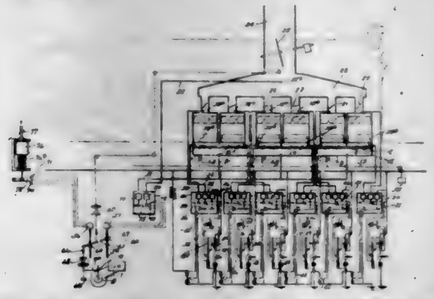
A device of the character stated comprising a housing, a door therefor, a keeper for said housing comprising a plate secured thereto projected from which plate is a member provided with an inclined surface $b^1$ and a recessed tongue $b^2$ of cone-shape in longitudinal section, a lever-lock comprising a base plate secured to said door and having a bifurcated bearing portion, a lever pivoted between the forks of said bearing, the said lever terminating at one end in a handle curved from its pivot point upwardly as at $c^3$ and terminating at its opposite end in a contracted or narrow formation the under face of which is convexly curved at $c^6$ and the upper face of which is flat as at $c^7$,

1,567,868. APPARATUS FOR ADMINISTERING ANÆSTHETIC GASES. HANS WILHELM CHRISTIAN SCHRÖDER, Lubeck, Germany, assignor to Dr. Ing. H. C. Alexander Bernhard Drüger, Finkenberg, Lubeck, Germany. Filed Aug. 14, 1925. Serial No. 50,811. 8 Claims. (Cl. 28—191.)



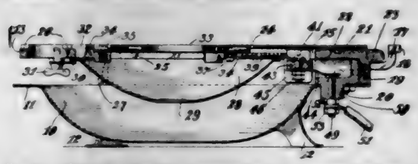
1. In an apparatus for administering anæsthetic gases by inhalation, the combination of a mixing chamber for containing a mixture of said gases, an inhalation pipe, a bifurcated exhalation pipe having two branches leading to said mixing chamber, a carbonic acid absorption device in one of said branches, and a three-way cock in said exhalation pipe whereby exhaled air is conveyed back to the mixing chamber at will through one or the other of said branches or through both branches simultaneously.

1,567,869. COMBUSTION-REGULATING SYSTEM FOR BOILERS. EDWARD H. SCHOFIELD, Minneapolis, Minn. Filed Feb. 15, 1922. Serial No. 536,697. 17 Claims. (Cl. 236—14.)



1. The combination with a boiler installation or unit having an automatic fuel feed mechanism, of a fuel feed regulator operative by disturbances of relative pressures above and below the point of initial combustion, and automatic means for maintaining in said combustion chamber a pressure closely approaching but below that of the external pressure.

1,567,870. ELECTRIC HEATER. LEMUEL W. SEFFELL, New York, N. Y. Filed July 25, 1925. Serial No. 45,982. 12 Claims. (Cl. 219—37.)

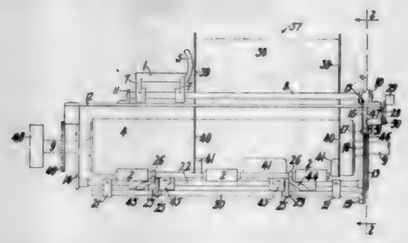


9. An electric heater comprising a grate having an opening and spaced radial ribs, connecting members between said ribs, the upper surfaces of which are spaced a predetermined distance below the upper surfaces of said ribs leaving open passageways between the ribs for the free outward spread of heated air, a hinged support for the grate with which it is detachably connected, a protected heating element within said opening in the grate, and a concave reflector detachably secured to the grate below the heating element.

1,567,871. TRAFFIC-SIGNALING SYSTEM. CLARA B. SITE, Washington, D. C. Filed Jan. 23, 1923. Serial No. 614,457. 2 Claims. (Cl. 177—329.)

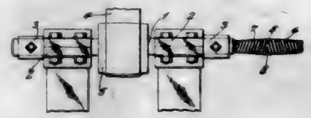
1. In a traffic signal, a casing having a plurality of sides, a plurality of compartments, one at each corner of the casing, each including a portion of two of said sides and containing "Stop" indica on one of said sides and "Go" indica on the other of said sides and a lamp for rendering said indica visible.

1,567,872. TYPEWRITING MACHINE. JESSE A. B. SMITH, Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Oct. 7, 1922. Serial No. 592,929. 16 Claims. (Cl. 197—138.)



1. In a typewriting machine, the combination with a platen, a carriage therefor movable in letter-feed and return directions, and a pressure device for holding worksheets to the platen, of a carriage-returning handle located above the platen for convenient operation by the left hand, controlling connections from said handle to the pressure device, and a horizontally disposed fingerpiece on the handle positioned to be engaged and depressed by fingers of the left hand to release said pressure device at the time when the same fingers are moving the handle to the right to return the carriage.

1,567,873. SMOOTHING, STRETCHING, AND SHAPING MACHINE. CHARLES B. SPALSBURY, St. Louis, Mo., assignor to Johnson, Stevens and Shinkle Shoe Company, St. Louis, Mo., a Corporation of Missouri. Filed Jan. 9, 1924. Serial No. 685,116. 2 Claims. (Cl. 12—42.)

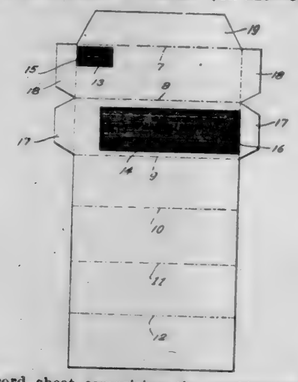


1. A device of the character described comprising two series of oppositely formed spiral convolutions of equal and uniform pitch throughout their length and having their adjacent ends merging into a proximately V-shaped terminals and each series tapering away from the adjacent end of the other series.

1,567,874. GUIDE ROD FOR FILE DRAWERS. FREDERICK L. G. STRAUBEL, Green Bay, Wis. Filed Dec. 6, 1924. Serial No. 754,323. 8 Claims. (Cl. 129—16.)

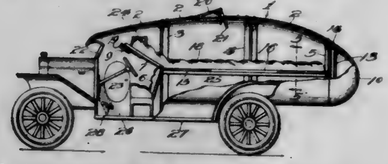
1. A vertical filing drawer having a tiltable front, a guide rod extending through the said front longitudinally of the drawer, and a ball-and-socket joint interposed in the said rod adjacent to the drawer front.

1,567,875. RECORD MAILING SHEET. WILLIAM E. SWANSON, Weehawken, N. J. Filed Jan. 30, 1923. Serial No. 615,809. 1 Claim. (Cl. 229—92.1.)



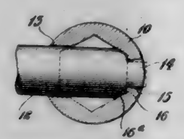
A record sheet comprising the combination of an envelope blank formed for folding and sealing with a carbon transfer slip substantially rectangular in form and secured at one side thereof to a portion of one edge of the front portion of said blank when folded, and a substantially rectangular relatively large carbon transfer slip secured along one side thereof in opposite disposition to the secured side of said first named slip to a portion of the side edge of the back portion of said blank when folded, said slips being foldable upon themselves to clear the line of writing spaces formed on the record portion of said blank, and for disposition within said blank with their free ends in overlapped relation when said blank is folded and sealed.

1,567,876. MOTOR-VEHICLE BODY. CHARLES P. TURNER, East St. Louis, Ill. Filed July 3, 1924. Serial No. 723,853. 5 Claims. (Cl. 296—23.)



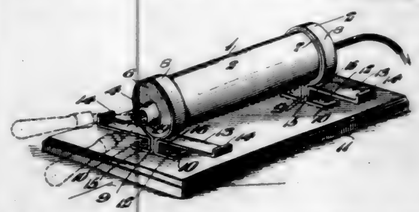
1. An automobile body divided transversely into a front compartment containing a seat and a rear compartment containing a cot-frame, a hinged door between the front and rear compartments, and swingable into the front one, a pad or mattress carried by the cot-frame and having a portion on said door, and a closure for the rear end of the body.

1,567,877. TOOL CONSTRUCTION. WALTER I. TUTTLE, Providence, R. I., assignor to Frank Mossberg Company, Attleboro, Mass., a Corporation of Rhode Island. Filed July 31, 1922. Serial No. 578,838. 2 Claims. (Cl. 81—121.)



1. In tool construction, in combination, a member adapted to engage and turn a nut, said member having a hollow part; and a cylindrical handle member passing freely through an opening in one side of said hollow part and having a flattened end riveted into an opening in the side of said hollow part opposite said first opening, and having a shoulder abutting the interior surface of said hollow part about said last opening to limit the movement of said handle thereinto.

1,567,878. ELECTRIC HEATER FOR CURLING IRONS. DAVID W. VAN TINE, Philadelphia, Pa. Filed June 3, 1925. Serial No. 34,507. 3 Claims. (Cl. 219—23.)

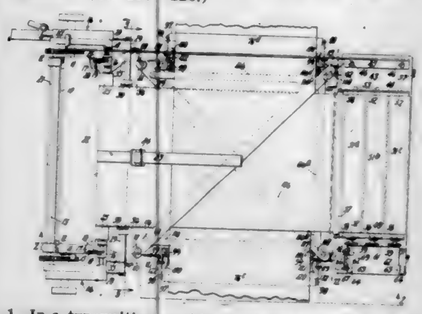


1. A device of the character stated comprising a casing member, flanged caps for closing both ends thereof said caps fitting over said casing member, a tubular member arranged within said casing member and projected through one end thereof to receive an article to be heated, a heating coil surrounding said tubular member, a base, means carried by said base to support the caps of said casing member and laterally disposed rests at each end and upon both sides of the device and rigidly clamped directly to said base for supporting articles to be heated.

1,567,879. LOOM. BASTIAAN CAREL AUGUST VORSTER, Amsterdam, Netherlands, assignor to Syndicate Soltman C. S., Amsterdam, Netherlands, constituted by myself; Gerhard Soltman, Lonneker; Huibert Soer, Anton Joseph Koenraad Grond, and Carl Adolf Elias, Amsterdam, Netherlands. Filed Apr. 10, 1924. Serial No. 705,681. 5 Claims. (Cl. 139—125.)

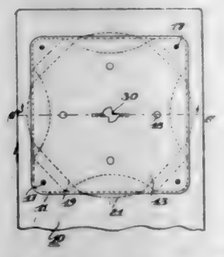
1. In a continuous weft loom, a shuttle of the character described, characterized by the fact that it is provided with a slot extending through the total height of the body of the shuttle and substantially over the total length thereof.

1,567,880. TYPEWRITING MACHINE. JOHN WALDHEIM, Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Mar. 2, 1923. Serial No. 622,285. 45 Claims. (Cl. 197—126.)



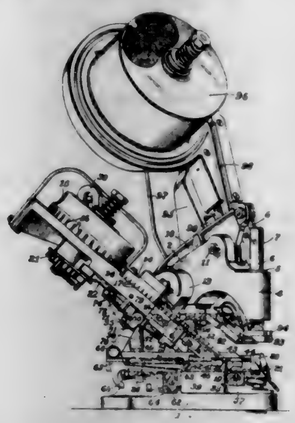
1. In a typewriting machine having a letter-feeding carriage and a platen thereon, said carriage having a rearward extension, stationary spools of work-web disposed at opposite sides of said rearward extension and below the carriage, delivering work-webs upwardly and in opposite directions to said extension, oblique devices crosswise of each other and stationary on said extension for directing said workwebs forwardly to said platen, carbon-sheets interleaved with the work-webs, and reciprocable means for stripping the carbon-sheets from the work-webs.

1,567,881. LOCK. EUGENE R. WEBER, Rochester, N. Y., assignor to Sargeant & Greenleaf Inc., Rochester, N. Y., a Corporation of New York. Filed June 16, 1922. Serial No. 568,833. 9 Claims. (Cl. 70—74.)



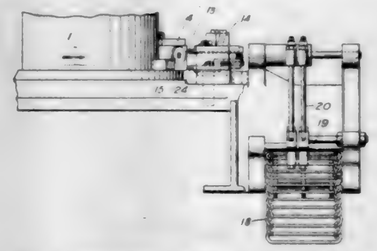
1. In a device of the class described, the combination with a closure for an opening, of a member movably carried thereby having a plurality of peripherally spaced bolting portions adapted by the movement of the member to be projected beyond and withdrawn within the outline of the opening to be closed, devices for holding said member with said portions in projected bolting position, and means for releasing the member from said devices and moving the same to withdraw said portions to unbolting position.

1,567,882. BUTTON-ATTACHING MACHINE. FRANKLIN R. WHITE, Waterbury, Conn., assignor to The Patent Button Company, Waterbury, Conn., a Corporation of Connecticut. Filed Feb. 26, 1925. Serial No. 11,664. 49 Claims. (Cl. 218—6.)



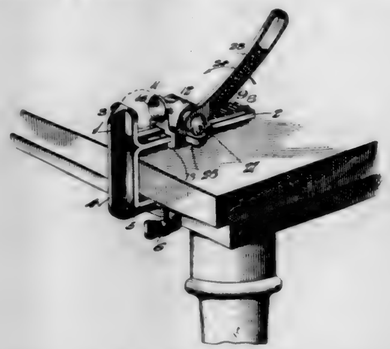
1. In a button attaching machine, a plunger, means for operating the same, means for feeding the buttons to the plunger, tack-receiving jaws located beneath the plunger, a rotatable hopper for the tacks, means for automatically rotating the hopper and feeding the tacks to said tack receiving jaws normally controlled by said plunger actuating means, and means independent of said plunger actuating means for manually operating said automatic tack feeding means and rotating said tack hopper to thereby feed a tack to the tack receiving jaws.

1,567,883. STRIPING MEANS FOR KNITTING MACHINES. EDWIN WILDT, Leicester, England, assignor to Wildt & Co. Limited, Leicester, England, a British Company. Filed Feb. 16, 1922. Serial No. 536,919. 4 Claims. (Cl. 66—21.)



1. In a circular knitting machine, striping means comprising striping needles having butts of different length thereon, and a cam movable both horizontally and vertically, the latter movement being used to bring the cam into and out of action, and the horizontal movement being used to bring the cam into different positions for acting on butts of different length on the striping needles.

1,567,884. NUTCRACKER. ALEX WOLDERT, Tyler, Tex., assignor to Alex Woldert Company, Tyler, Tex., a Corporation of Texas. Filed Nov. 20, 1924. Serial No. 750,964. 2 Claims. (Cl. 146—16.)

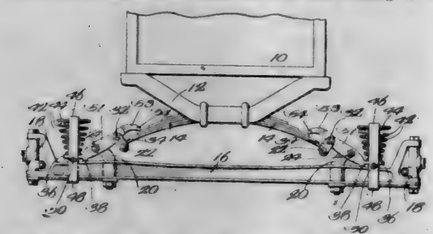


1. In a device of the character described, a guideway, a stationary jaw at a right angle to said guideway and integral therewith, a housing slidable on said guideway, a movable jaw carried by said housing a bearing opening through one side of the movable jaw housing, a corresponding bearing recess in the inner face of the other side of said movable jaw housing, a cam shaft rotatably mounted within said bearing opening, a corresponding cam disk rotatably mounted within said bearing recess, an eccentric pin fixedly carried by said cam shaft and extending into said cam disk, and a driving pawl pivotally mounted on said eccentric pin.

1,567,885. VEHICLE SPRING SUSPENSION. GOTTLIEB F. ZUCKER, Chicago, Ill. Filed July 24, 1924. Serial No. 728,054. 9 Claims. (Cl. 267—17.)

1. In combination with a vehicle body and its axle, a leaf spring secured to the body, a support rising from the

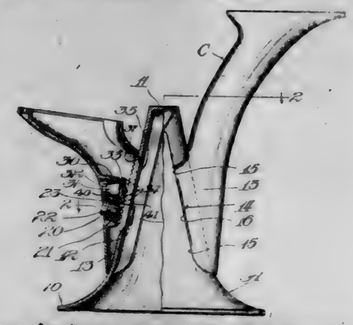
axle, a lever pivoted between its ends to said support, a link connection between the leaf spring and one end of said lever, and a vertically arranged coil spring connected at its upper end with the axle and resting at its



lower end on the other end of said lever above the axle, whereby it normally sustains the weight of the body and permits movements of the latter towards the axle irrespective of flexure of said leaf spring.

---

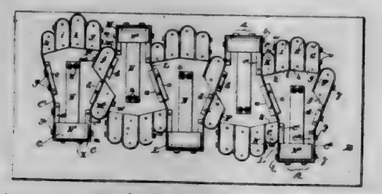
1,567,886. FURNITURE. GEORGE H. ABBOTT, Elgin, Ill., assignor to Woodruff & Edwards Co., Elgin, Ill., a Corporation of Illinois. Filed Jan. 7, 1924. Serial No. 684,707. 4 Claims. (Cl. 155—82.)



1. In a furniture article of the kind described, the combination of a standard having a vertically slotted wall, a bracket formed to rest against said wall, an apertured nut having a head adapted to engage the rear side of said wall, a bolt connecting the bracket with the nut, a rack mounted on the standard and extending through the nut aperture, and a worm device rotably mounted on the bracket adapted to engage with the rack in a manner to move the bracket vertically, substantially as described.

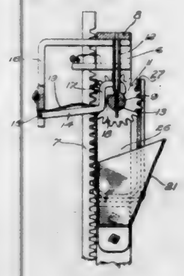
---

1,567,887. DIE FOR MAKING GLOVE BLANKS. ALBERT C. ACKERMAN, Ballston Spa, N. Y. Filed Oct. 7, 1924. Serial No. 742,167. 7 Claims. (Cl. 164—29.)



1. A gang of dies for cutting glove blanks comprising a support, a plurality of dies arranged thereon in reverse order for cutting identical blanks each suitable for front or back of the glove, a plurality of blocks on the support for each die, and a plurality of individual cutting elements for each die, each element being attached to a block, and the adjacent thumb sides of two blanks being cut by a single die element.

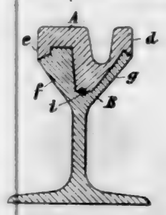
1,567,888. LIQUID-VENDING MACHINE. WARREN DELAWARE AMBROSE, Nacogdoches, Tex. Filed Dec. 13, 1923. Serial No. 680,555. 1 Claim. (Cl. 194—66.)



In a coin controlled mechanism, a reciprocating element, a shaft having a slot for holding a coin partly projecting therethrough and notch adjacent the slot, means for operating the element from the shaft, means for feeding a coin into the slot of the shaft, and a pivoted and spring pressed member having at its free end a hook extending over the shaft and having its extremity engaging the notch of the shaft to prevent it from turning in one direction but permitting it to turn in the other direction, the said member engaging the portion of the coin projecting through said slot, upon the rotation of the shaft to first disengage its hook from the notch of the shaft and then to be expelled thereby from the slot.

---

1,567,889. TRAMWAY RAIL. CARL ANDERSEN, LORIS CHRISTIANSEN, LUDVIG FLODIN, and ALBERT FLODIN, Copenhagen, Denmark. Filed Sept. 16, 1924. Serial No. 738,103. 2 Claims. (Cl. 238—148.)



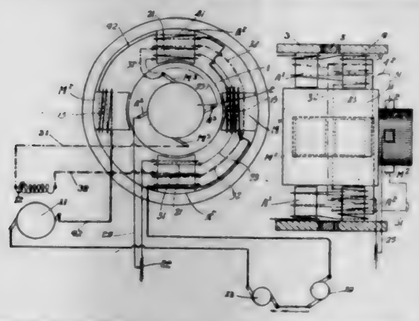
1. In a railway rail, a member having a base, a shank and a head, said head having a longitudinal recess in its upper side, the sides of which recess converge downwardly, and also having oppositely downwardly and outwardly inclined upper side edges, and an upstanding flange between one of said inclined upper side edges and one of said sides of said recess; and a member having a head presenting a downwardly extending portion corresponding in cross section with said recess and entering the same, said last named member also having side portions complementary in cross section to the side portions of the first named member.

---

1,567,890. ELECTRIC GENERATING PLANT FOR CONSTANT-CURRENT SYSTEMS. GILBERT AUSTIN, JAMES COLQUHOUN MACFARLANE, and WILLIAM ALLAN MACFARLANE, Glasgow, Scotland. Filed Oct. 13, 1924. Serial No. 743,469. 7 Claims. (Cl. 171—228.)

1. An exciter for use with electric generating plant for constant current systems comprising a single armature; main poles; auxiliary poles; main brushes and auxiliary brushes; a field winding on the main poles adapted to be

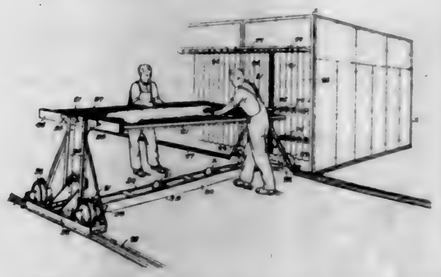
connected in series with the main line circuit of the generating plant; an "exciting" winding on the auxiliary poles connected to said auxiliary brushes; and a "com-



pensating" winding on the auxiliary poles connected in series with the main brushes of the exciter and arranged to assist the "exciting" winding.

---

1,567,891. DRIER. ELWOOD B. ATHEN, Melrose Park, and ALPHEUS O. HURXTHAL, Philadelphia, Pa., assignors to Proctor & Schwartz, Incorporated, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 8, 1925. Serial No. 1,248. 13 Claims. (Cl. 34—40.)



7. The combination of a truck having a pair of socket plates at each end thereof; and a frame of a drier having two pins at each end, one of the pins at each end being a pivot pin and arranged off center, the other pin at each end being located some distance from the pivot pins and forming stops to limit the movement of the frame when it is tilted from a vertical position to a horizontal position.

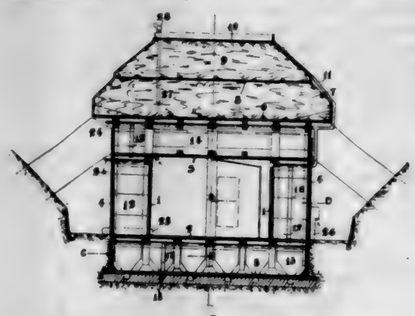
---

1,567,892. TOOL FOR REMOVING FROM OR APPLYING DIFFERENTIAL GEARS TO THEIR AXLES. WILLIAM C. BAKELS, Midland Park, N. J. Filed Sept. 20, 1924. Serial No. 738,856. 5 Claims. (Cl. 29—85.)

1. A tool for effecting the connection and disconnection of a differential gear and axle section comprising a frame including means for supporting the axle section for axial movement, means at one end of the frame engageable with the gear for limiting the axial movement thereof in opposite directions, means movable through the opposite end of the frame and engageable with one extremity of the axle section for effecting relative axial movement of the same with respect to the gear in one direction whereby to permit of the disengagement and removal of the gear retaining means, and means movable through the first mentioned end of the frame and engageable with the opposite extremity of the axle section for effecting relative axial shifting movement of said axle section through the gear and the removal of the same therefrom, the said frame consisting of relatively longitudinally adjustable sections whereby to permit of use of the tool in connection with axles of various lengths.

---

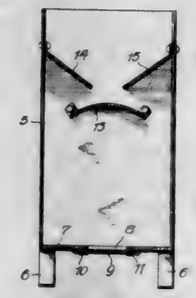
1,567,893. SAFETY MAGAZINE FOR EXPLOSIVES AND AMMUNITIONS. FAUSTO BARATTA, Spezia, Italy. Filed Mar. 13, 1923. Serial No. 624,876. 3 Claims. (Cl. 189—1.)



1. A safety magazine for explosives and ammunitions, comprising a double walled chamber, an outer blindage supported by the upper outer wall of the chamber, a water basin formed in the aforesaid blindage, designed to collect the rain water, and means allowing the communication of said water basin with the intermediate space comprised between the double walls of the chamber.

---

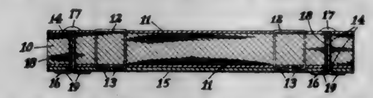
1,567,894. RECEPTACLE FOR CARBON BUTTS. JOSEPH ANTHONY BARCELONA, Baton Rouge, La. Filed July 5, 1923. Serial No. 649,651. 1 Claim. (Cl. 220—1.)



A receptacle for carbon butts comprising a container substantially rectangular in horizontal section and open at its top to receive the butts, a pair of opposed plates secured to and converging downwardly from the inner opposite walls of the container and extending entirely across said walls, said plates being spaced apart at their lower ends to provide a central slot therebetween extending transversely of the container, a cylindrically curved baffle plate mounted in the container with its intermediate high portion directly beneath said central slot and with its opposite ends curved downwardly beneath and spaced from the lower ends of the opposed plates, the opposite lower ends of the baffle plate spaced

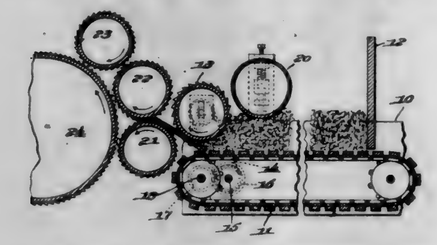
from the adjacent opposite walls to provide slots beneath the opposed plates parallel with the central slot, a bottom for the container having a lower central slot parallel with said before mentioned slots, and a cover carried by the bottom for the lower slot.

1,567,895. REVERSIBLE WRITING PAD. JEAN A. H. BARKELL, Hollywood, Calif. Filed Aug. 13, 1924. Serial No. 731,693. 3 Claims. (Cl. 281—19.)



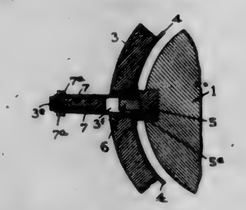
1. A reversible writing pad, comprising a permanent assemblage of sheets of material adapted for writing thereon to form a pad, permanent binding strips on both sides of said pad, clamping one end thereof, and a backboard having one of its ends detachably fixed to said binding strips and pad, so that said back-board may be removed from either side of said pad and may be reattached to the other side thereof.

1,567,896. MACHINE FOR FEEDING FIBROUS MATERIAL. EDDO V. BATES, Lowell, Mass. Filed Dec. 15, 1924. Serial No. 755,883. 4 Claims. (Cl. 19—78.)



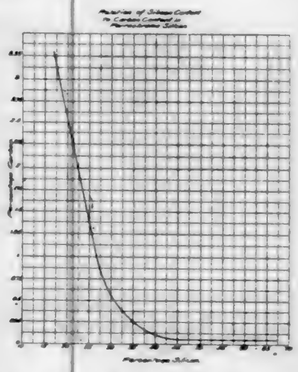
1. A machine for feeding fibrous material comprising a stock conveyor arranged to carry stock toward the machine to be fed; feed rolls arranged to receive stock from said conveyor; means coacting with said conveyor to advance stock towards said feed rolls, said means being arranged to retard the passage of stock between said feed rolls whereby matted and tangled stock is straightened prior to leaving said feed rolls; stock hold down means arranged in advance of said conveyor coacting means, and means to force stock carried by said conveyor towards said first means and said hold down means.

1,567,897. STEREOTYPE PLATE CASTING BOX. HENRY F. BECHMAN, Battle Creek, Mich., assignor to Duplex Printing Press Company, Battle Creek, Mich., a Corporation of Michigan. Filed June 10, 1922, Serial No. 567,343. Renewed Sept. 28, 1925. 17 Claims. (Cl. 22—2.)



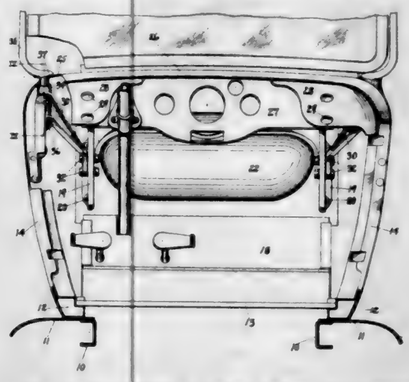
1. A stereotype casting box having a drag, a cope, and a core, the core having its upper end reduced in diameter beyond the plate forming portion, substantially as described.

1,567,898. PROCESS OF MAKING RUSTLESS IRON AND SIMILAR ALLOYS. FREDERICK M. BECKET, New York, N. Y. Filed Feb. 21, 1925. Serial No. 10,852. 6 Claims. (Cl. 75—1.)



1. Process of making corrosion-resisting chromium alloys which comprises producing under electric furnace conditions a low-carbon metallic product containing chromium in excess of 5% and more than 40% silicon, and then reacting on said product with a metal oxid to oxidize the silicon.

1,567,899. MOTOR VEHICLE. EDWARD H. BELDEN, Toledo, Ohio, assignor to The Willys-Overland Company, Toledo, Ohio, a Corporation of Ohio. Filed Aug. 26, 1920. Serial No. 406,187. 20 Claims. (Cl. 296—28.)

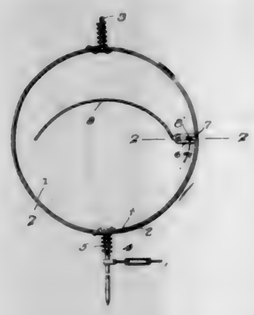


1. In a motor vehicle, a frame having side members, standards rigidly mounted on said side members, a rearwardly extending arm secured to each of said standards, a vehicle body mounted upon said frame in the rear of said standards, an instrument board supported upon said arms, and a pair of windshield brackets having feet attached to said arms and body respectively.

1,567,900. TRAP. MERLE E. BIGELOW, Milford Center, Ohio. Filed June 3, 1924. Serial No. 717,650. 1 Claim. (Cl. 43—90.)

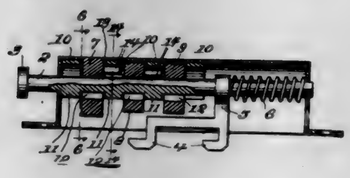
A trap of the character described comprising a pair of ring-shaped members placed one within the other, diametrically oppositely disposed pins carried by the inner member and passing through the outer member, a coil spring surrounding one of said pins and having its end convolutions thereof fixed to the pin and the outer

member respectively, the other of said pins being adapted to support the trap in an upright position, a bracket carried by the inner member and disposed at right angles with respect to the pin, a latch member on the bracket and being provided with a right angled extension for



engaging the members for holding them together with the spring under tension, a trigger member pivoted to the bracket for holding the latch member in set position, a ratchet means for preventing an animal caught in the trap from opening the same and a chain secured to the other of said pins.

1,567,901. LOCK. GUSTAVE BLAIR, Albert Lea, Minn. Filed June 8, 1923. Serial No. 644,204. 1 Claim. (Cl. 70—53.)



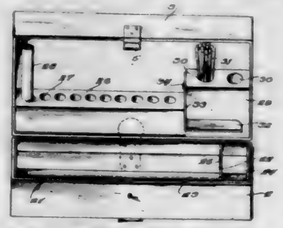
A lock of the class described comprising a casing, spaced projections therein, said casing being formed with a slot, a bolt slidably mounted in the casing, locking dogs carried by the bolt, a spring on the bolt for holding the dogs in locking position, spaced keys on the bolt, a series of disks rotatably and removably mounted on the bolt and having portions engaging between the projections, one of the disks being of larger diameter than the other disks so that it will engage the slot, said disks having keyways therein for receiving the keys on the bolt and projections on the disks engaging each other so that the adjustment of the large disks through the slot will adjust the other disks.

1,567,902. DETERGENT COMPOUND. BERTHOLD L. BLATT, Freedom, Pa., assignor of one-third to James H. Johnston, Wampum, Pa., and one-third to Willis C. Jack, Freedom, Pa. Filed Jan. 8, 1925. Serial No. 436. 4 Claims. (Cl. 87—5.)

1. A composition of matter for cleaning and renovating painted or varnished surfaces, consisting of sodium phosphate, sodium borate, and glue.

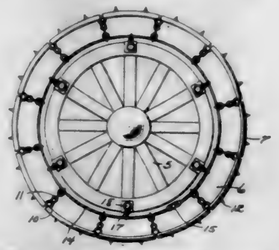
1,567,903. SMOKER'S KIT FOR AUTOMOBILES. THOMAS T. BOOKMAN, Blaney, S. C. Filed Nov. 11, 1924. Serial No. 749,239. 2 Claims. (Cl. 206—20.)

1. A device for the purpose set forth comprising a container consisting of a body and a lid hinged to the body, means for securing the container upon the steering column of a motor vehicle, a match holder secured in



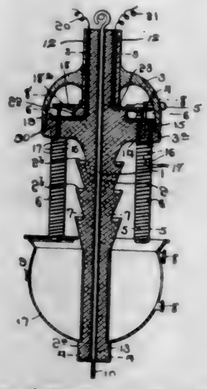
the cover, and a guard pivoted upon the side of said match holder and adapted to extend across the ends of matches therein to retain them normally in the holder.

1,567,904. ANTISKID DEVICE. ARTHUR BOOMHOVER, St. Albans, Vt. Filed June 11, 1924. Serial No. 719,419. 2 Claims. (Cl. 152—16.)



1. An anti-skid device comprising a flexible band adapted to be arranged upon the inner face of a vehicle wheel rim and formed with circumferential housings at its edges, the band being provided with slits at its edges which are arranged in staggered relation and adapted to receive the spokes of a wheel, rings carried by the housings and short chains depending from the rings, and anti-skid means adapted to embrace the tire and carried by the chains, and means for securing the flexible band to a pneumatic tire and the wheel rim.

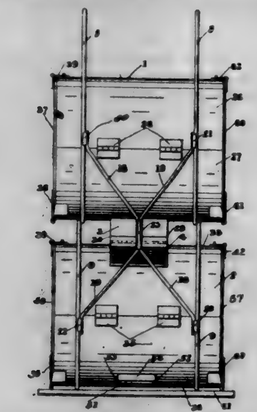
1,567,905. INSECT CATCHER. JULIO BOVET, VENANZIO LALE DEMOZ, and ARTURO LALE DEMOZ, Buenos Aires, Argentina. Filed June 14, 1923. Serial No. 645,460. 3 Claims. (Cl. 43—112.)



1. An apparatus of the class described including a rod like insulated support provided with an outwardly extending flange, insulated pins carried by said flange, wires

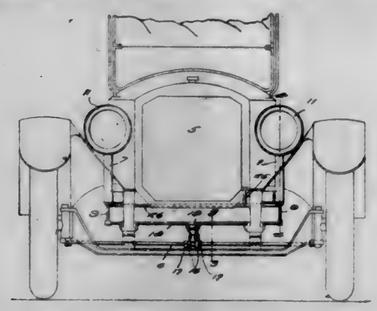
wound about the pins in spaced relation and adapted to be arranged in a circuit which is completed by an insect bridging the space between the wires, a switch for controlling the passage of current to the portions of the wire arranged on the pins, a bait receptacle arranged on the support between the pins, and a receptacle arranged on the support below said pins for catching insects electrocuted on said wires.

1,567,906. BEE GUM. RILLIE O. G. BOWMAN, Pelahatchie, Miss. Filed May 13, 1924. Serial No. 713,097. 2 Claims. (Cl. 6—2.)



1. In a bee gum, a base, a front and a rear wire frame consisting of an upper and lower section secured to said base, tie rods connecting said front and rear frame, a cylindrical chamber adapted to fit within the upper section and a similar cylindrical chamber adapted to fit within said lower section, and means of communication between said cylindrical chambers comprising a passage chamber rigidly attached to the chamber of the upper section and adapted to extend into an opening provided in the chamber of the lower section.

1,567,907. DIRIGIBLE HEADLIGHT. WILLIAM WILEY BRATTON, Slab Fork, W. Va. Filed May 20, 1925. Serial No. 31,674. 1 Claim. (Cl. 240—61.)



The combination with an automobile including a transversely shiftable steering gear rod, and a pair of rotatable lamp supports, of a transversely shiftable actuating rod operatively connected with a lamp support, an upstanding arm on the transversely shiftable steering gear rod, an angularly disposed link pivotally connected with the upper end of the arm, a boss on the actuating rod, a normally vertically disposed lever pivoted to the boss, and the lower end of the link, such link and lever affording operative connections between the transversely shiftable steering gear rod and transversely movable actuating rod and permitting movement with respect to the movement of the body of the vehicle with respect to the frame without breakage.

1,567,908. TRANSPLANTING TROWEL. WALTER I. BRIGHAM, Framingham, Mass. Filed Feb. 16, 1923. Serial No. 619,508. 14 Claims. (Cl. 55—67.)

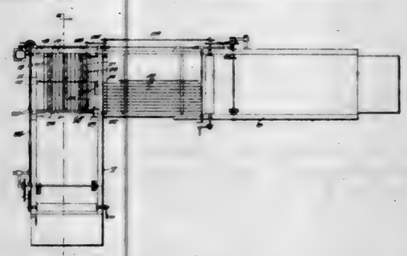
2. A dibble comprising a work member and handle formed from a single piece of sheet material and means for suspending said implement from the wrist of the operator when not in use, in juxtarelation to the hand of said operator.

5. In a garden tool a transplanting member having a pointed earth penetrator provided with outer cutting edges, the sides of said member having rearwardly disposed root cutting edges adapted to function during backward movements of said tool.

9. In a hand tool a work member and a loop attached thereto for suspending said tool in juxtarelation to the hand.

10. In a trowel a work member and a handle formed integral with said work member and bent laterally to fit the palm of the hand.

1,567,909. SHEET RECEIVING AND FEEDING MECHANISM. ALBERT BROADMEYER, Harrisburg, Pa., assignor to W. O. Hickock Manufacturing Company, Harrisburg, Pa., a Corporation of Pennsylvania. Filed Jan. 12, 1923. Serial No. 612,321. 15 Claims. (Cl. 271—48.)

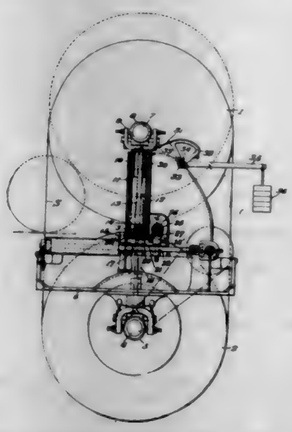


1. In a sheet moving apparatus, the combination with a moving member, of a rotatable gripping member that coacts therewith, and is rotatable in coaction with the moving member, a stop for holding the gripping member against rotation, and means for intermittently operating the stop to release and permit the rotation of the gripping member in coaction with the moving member.

1,567,910. MAGAZINE PENCIL. WENZEL FRANZ BRYNDA, Vienna, Austria, and ROBERT POLLAK, London, England, assignors to Alladin Industries Limited, London, England. Filed Mar. 3, 1925. Serial No. 12,948. 12 Claims. (Cl. 120—14.)

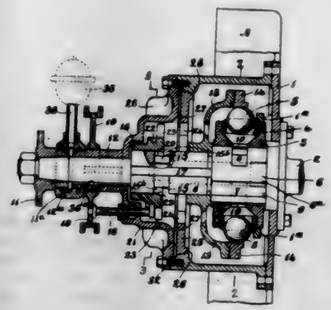
1. In a magazine pencil the combination of an outer sleeve and an inner sleeve coaxial thereto and adapted to move longitudinally relatively to the outer sleeve and to rotate in one of the extreme longitudinal positions in the outer sleeve round the axis of both sleeves, a plurality of lead carriers substantially parallel to the axis of the sleeves, means for moving all the lead carriers along with the outer sleeve in one direction, means for moving any one of the said lead carriers selectively with the outer sleeve in the opposite direction such means comprising projections on the lead carriers and a projection connected to the outer sleeve adapted to be brought into engaging position relatively to the projections on the lead carriers by rotating the outer sleeve relatively to the inner one round their common axis.

1,567,911. TENSION FOR BAND MILLS. GEORGE E. CAMPBELL, Chattanooga, Tenn., assignor to The Wheland Company, Chattanooga, Tenn., a Corporation of Tennessee. Filed Mar. 31, 1922. Serial No. 548,352. 11 Claims. (Cl. 143—27.)



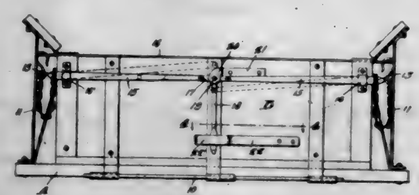
1. The combination with a band saw wheel, of a bearing support therefor, a column extending toward said bearing, a rock-shaft for adjustably supporting the bearing, a substantially vertically disposed arm, secured to the rock-shaft and extending substantially parallel to said column to a point adjacent said bearing, and means connected with the outer end of the arm for applying tension thereto to rock said arm and the rock-shaft.

1,567,912. HYDRAULIC CLUTCH. ROBERT FALKLAND CAREY, Leigh-on-Sea, England. Filed Jan. 16, 1923. Serial No. 612,952. 4 Claims. (Cl. 192—60.)



1. A hydraulic clutch comprising a fluid-containing casing, a pressure chamber associated with said casing and normally in communication with the latter, a driving member, a driven member, a cam track within said casing and connected to said driven member, a rotor within said casing connected to said driving member, said rotor having a plurality of radially arranged open-ended cylinders and a plurality of passageways each leading to the inner end of one of said cylinders, a piston working in each of said cylinders and adapted to project from the outer end of the latter into engagement with said cam track, means for bringing each of the passageways of said cylinders alternately into communication with said fluid-containing casing and with said pressure chamber, and means for throttling the flow of fluid from said pressure chamber to said fluid-containing casing and maintaining pressure behind said pistons to cause the latter to clutch said cam track.

1,567,913. END GATE. FRANK M. CHANDLER, Ottawa, W. Va., assignor of one-fourth to J. Floyd Meadows and one-fourth to Kie Anderson, both of Ottawa, W. Va. Filed June 10, 1925. Serial No. 36,284. 1 Claim. (Cl. 296—57.)

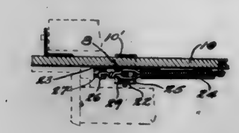


The combination with a wagon body having a pivoted end gate, of a bracket arm secured to said gate and having an angular shaped extremity, a vertically disposed lever pivoted on said extremity, said lever including a cross head, apertured keepers projecting from the sides of the wagon body beyond the gate, locking bars having their adjacent ends pivotally connected with said cross head and adapted to be simultaneously moved into and out of engagement with their respective keepers, said cross head cooperating with said bracket to limit the

swinging movement of said lever, and a resilient element arranged transversely of the gate and adapted to engage said lever to hold the latter immovable when the gate is closed.

---

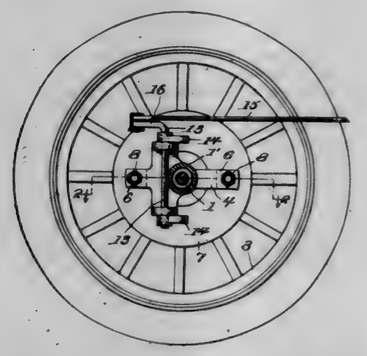
1,567,914. SHADE HANGING AND OPERATING MEANS. ARTHUR J. CLINTON, Paola, Kans., assignor of one-half to Charles W. Neisrvender, Paola, Kans. Filed Feb. 13, 1925. Serial No. 8,995. 2 Claims. (Cl. 156—27.)



2. In a device of the character described, a vertical guide rod, a supporting bar slidably associated with said guide rod, a helical tension spring having one end attached to said supporting bar, a hand lever pivoted to said supporting bar and having the other end of said spring attached thereto, and a loop formed on said other end of the spring inwardly of the lever and embracing and frictionally engaging the guide rod to releasably retain the supporting bar against movement on the guide rod.

---

1,567,915. BRAKE. HARRY GORDON COLE, Westernport, Md. Filed Feb. 8, 1924. Serial No. 691,529. 1 Claim. (Cl. 188—71.)

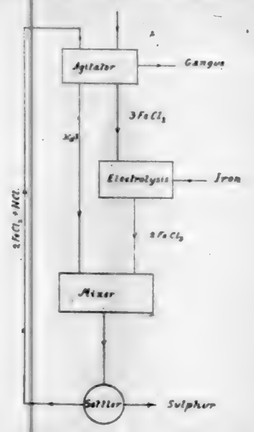


A vehicle brake comprising a ring-shaped braking member surrounding the hub of a wheel, a cross piece supported by the axle housing of the wheel, a second member of ring shape, pins carried thereby and passing through the cross piece, springs on the pins for holding the second member out of engagement with the first member, parts of the cross piece engaging parts of the second member for preventing rotation of the second member and means for forcing the second member against the first member.

---

1,567,916. PROCESS FOR RECOVERING IRON AND SULPHUR FROM SULPHIDE ORES. HARTWELL CONDER, Strahan, Tasmania, Australia. Filed Mar. 20, 1923. Serial No. 626,367. 2 Claims. (Cl. 204—15.)

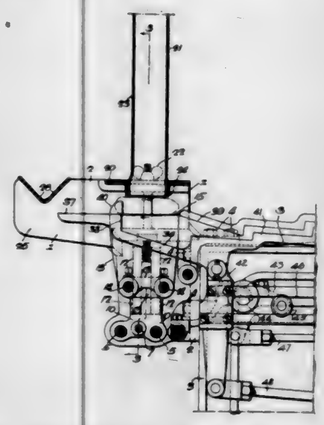
1. In a process for recovering iron and sulphur from sulphide ores, crushing the ore, subjecting same to heat, while in a closed retort, passing hydrogen gas in contact with the ore in said retort to convert the sulphide



ore to ferrous sulphide, recovering the sulphur from the sulphuretted hydrogen gas produced.

---

1,567,917. FEEDING MECHANISM FOR CAKE-COATING MACHINES. WILLIAM COSTELLO, Jr., Philadelphia, Pa. Filed May 15, 1923. Serial No. 639,148. 16 Claims. (Cl. 198—219.)

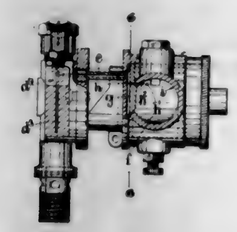


1. The combination with a magazine having a discharge opening, of a support spaced below said opening to which articles are adapted to pass in succession from the magazine, and a movable member adapted both to dislodge the articles from the support and to receive and lower to the support each succeeding article from the magazine.

---

1,567,918. CARBURETOR. ARTHUR COX, Olton, near Birmingham, England. Filed Mar. 5, 1925. Serial No. 13,231. 2 Claims. (Cl. 261—41.)

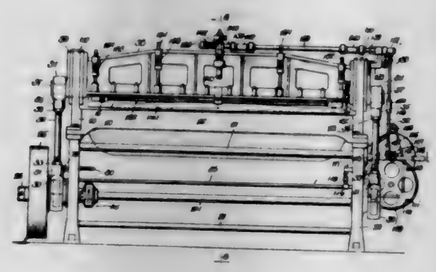
1. A carburetor having a main body provided with a throttle chamber, a barrel type throttle rotatably fitted in said chamber, a primary air tube discharging into said throttle, a housing fixed on said tube, a main nozzle in said housing discharging into said tube, means for controlling the operation of the main nozzle including a rotary valve carried by the throttle, an idling nozzle in the housing, said throttle having an idling mixture discharge port and also having a passage leading to said port, an idling mixture reception chamber concentric with



the axis of the throttle and located between the end of the throttle and the throttle housing, said reception chamber communicating with said passage in the throttle, and a separate conduit having a small bore and extending between the idling nozzle and the reception chamber.

---

1,567,919. SHEET-CUTTING MACHINE. HARRY A. CUMFER, Chicago, Ill., assignor to Guyton & Cumfer Mfg. Co., a Corporation of Illinois. Filed May 15, 1922. Serial No. 561,234. 11 Claims. (Cl. 164—49.)



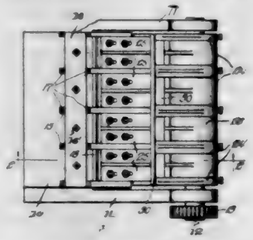
1. A machine of the character described comprising a machine frame; a power drive shaft journaled therein; a knife frame vertically reciprocable thereon; a shearing knife carried by the knife frame; a cooperating fixed knife carried by the machine frame; an eccentric on each end of the drive shaft connected to the respective ends of the knife frame; a presser foot supported upon the knife frame; a spring, when released, to move the presser foot towards the fixed knife; means to potentiate the spring and to latch the presser foot to the knife frame; means to drive the power shaft; a clutch to connect said shaft thereto and means to initiate operation of the clutch and to unlatch the presser foot to cause the latter to move ahead of the knife.

---

1,567,920. SHINGLE-CUTTING MACHINE. HARRY A. CUMFER, Chicago, Ill., assignor to Guyton & Cumfer Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed Aug. 7, 1924. Serial No. 730,634. 8 Claims. (Cl. 164—68.)

1. A sheet cutting machine having a series of fixed, separable, independently removable, spaced apart cutters and parallel intermediate cutters extending therebeyond to provide cutting edges on three sides of a rectangle, over which a sheet is to be fed, in combination with a

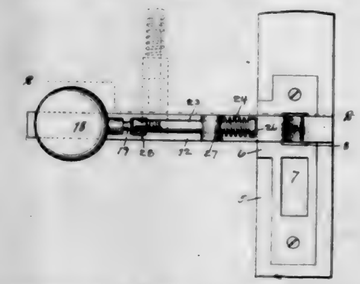
plurality of spaced apart, complementary, independently removable rotatable cutters having cutting edges on three sides of a rectangle and another rotatable cutter equal



in length to the combined width of the series of rotatable cutters aforesaid and means to rotate the rotatable cutters.

---

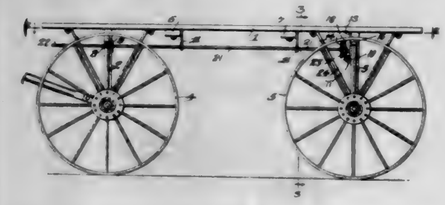
1,567,921. DOOR-FASTENING DEVICE. PIERRE TRUCOT D'ALMAFORTE, Sierre Madre, Calif. Filed June 19, 1925. Serial No. 38,314. 1 Claim. (Cl. 116—12.)



In a device of the character described, a rod adapted to have one end bent so as to engage the keeper plate of a door jamb, a pivoted member secured to said rod, a sliding member positioned in said pivoted member, an audible signal secured to said rod, a push button controlling said audible signal, said rod being capable of operating said push button, and a spring normally adapted to retain said sliding member out of contact with said push button.

---

1,567,922. LOCKING ATTACHMENT OR BRAKE FOR TRUCKS. THOMAS L. DE SPAIN, Morgan, Tex., assignor of one-third to Sidney R. McMullen and one-third to Grover Y. Reed, both of Fort Worth, Tex. Filed Dec. 4, 1924. Serial No. 753,914. 1 Claim. (Cl. 188—21.)

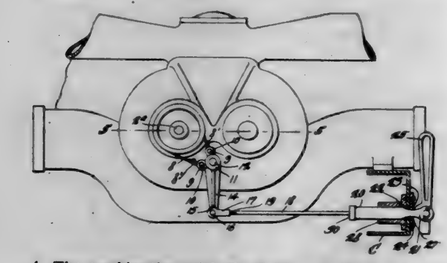


A locking attachment for the purpose set forth comprising a hanger having the lower portion thereof offset to project forwardly, a depending hook-shaped support arranged at one side of and spaced from said hanger, a depending retaining member arranged at the other side of and spaced from said support and having its lower por-

tion formed of a closed loop of less height than the hooked portion of said support, a transversely disposed lengthwise shifting locking bar having one end mounted and vertically movable in the hooked portion of the support and its other end permanently extending through the loop of the retaining member, said bar arranged rearwardly of said hanger, an operating rod extending through said hanger and having an angle-shaped rear terminal portion engaging said bar for shifting the latter transversely to and from locking position within the support and loop when the rod is operated, and a plurality of spaced hangers arranged forwardly of the offset hanger for supporting said rod.

---

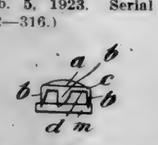
1,567,923. ROTARY GEAR PUMP. JOSEPH L. DEVON, Atlanta, Ga. Filed Feb. 14, 1925. Serial No. 9,269. 4 Claims. (Cl. 103—126.)



4. The combination with the driving and driven meshed gears of a rotary gear pump, of a braking attachment for cooperation with the driven gear.

---

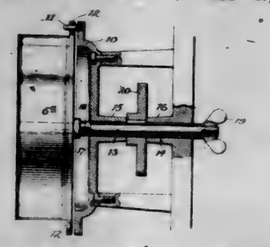
1,567,924. MEANS FOR JOINING OR PERMANENTLY FASTENING ARTICLES TOGETHER OR CLOSING THEM. THOMAS EDMUND DINGWALL, Hutton, England. Filed Feb. 5, 1923. Serial No. 617,109. 1 Claim. (Cl. 292—316.)



A seal comprising a cap having a plurality of prongs extending substantially at right angles thereto for penetration through material to which the seal may be attached, and a penetrable disc, said prong being embedded and overturned in said disc and lying intermediate the opposite faces of the disc to support the disc against said layer of material and prevent detachment of the pronged disc without mutilation of the penetratable disc.

---

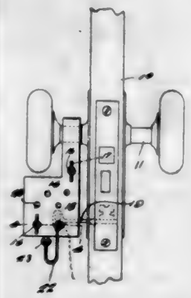
1,567,925. CLOCK MOUNTING. ROBERT P. DODDS, Troy, N. Y., assignor to W. & L. E. Gurley, Troy, N. Y., a Corporation of New York. Filed July 30, 1924. Serial No. 729,141. 10 Claims. (Cl. 234—1.)



3. In combination with a casing; a shaft extending outwardly therefrom; a clock; a tubular driving shaft forming a part of the clock mechanism, said shaft having a notch formed at its inner end; a pin extending outwardly from the first named shaft and passing into the notch; a nut mounted on the outer end of the first named shaft and bearing against the outer end of the tubular shaft; and a pin extending rearwardly from the clock and passing freely into an opening formed in the casing.

---

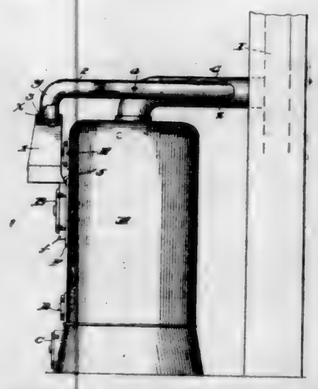
1,567,926. KEY HOLDER. ROBERT DREBLOW, Lebanon, S. Dak. Filed Mar. 14, 1925. Serial No. 15,604. 2 Claims. (Cl. 70—7.)



1. A device for holding the key in the lock of a door, said device comprising a pair of companion members of identical construction, each member being substantially of L-shaped formation, and having corresponding vertical branches designed to partly embrace the shank of the knob, from which companion members are suspended for use, means for holding the members together in operative relation, with the head of the key positioned between the members, said members having a plurality of aligned openings, one pair of which is adapted to register with the opening in the head of the key, and a locking element adapted to be passed through said openings and through said head of the key for the purpose specified.

---

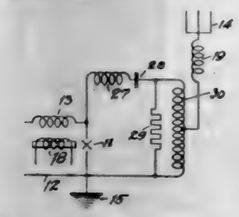
1,567,927. SMOKE AND GAS COLLECTOR FOR FURNACE DOORS. JOHN WILLIAM EBERT, Frederick, Md. Filed Feb. 4, 1925. Serial No. 6,748. 1 Claim. (Cl. 126—242.)



The combination with a furnace having a stoker door and an abutment thereon above said door, of a hood positioned in front of the furnace and above said door and having the lower rear edge thereof provided with an outwardly extending projection engaging and resting upon said abutment, said hood having an opening in the upper portion thereof, a flue being detachably inserted into said opening whereby the hood may be readily detached by lifting it from engagement with the abutment, moving the hood relative to the flue to withdraw the latter from the opening.

---

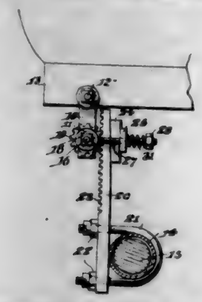
1,567,928. RADIOFREQUENCY SYSTEM. HAROLD F. ELLIOTT and JAMES ARTHUR MILLER, Palo Alto, Calif., assignors, by mesne assignments, to Federal Telegraph Company, San Francisco, Calif., a Corporation of California. Filed Jan. 9, 1922. Serial No. 527,886. 7 Claims. (Cl. 250—36.)



1. In a radio frequency electrical system, a source of high frequency oscillations, a load circuit supplied from said source, a circuit offering a path for the load current free of the source, said path serving to increase the efficiency of the source and consisting solely of impedance, and means cooperating with said impedance for preventing the flow of any local currents between the source and the path.

---

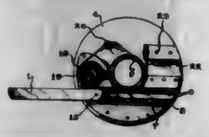
1,567,929. SHOCK ABSORBER. HORACE RAYMOND ELLIS, Meadville, Pa. Filed Nov. 19, 1924. Serial No. 750,871. 4 Claims. (Cl. 188—129.)



1. A shock absorber comprising a gear and a rack bar adapted to be attached respectively to the body and axle of a vehicle, a bearing member with which the rack bar is slidably engaged, and a spring controlled means for holding said bearing member in yieldable engagement with the rack bar.

---

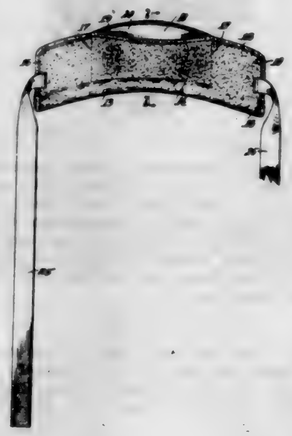
1,567,930. INTERNAL-COMBUSTION-ENGINE TIMER. FRANKLIN E. EMERT, Youngdale, Pa. Filed Aug. 1, 1924. Serial No. 729,641. 2 Claims. (Cl. 200—26.)



1. A timer comprising a rotary head, a slide bearing mounted thereon, a brush mounted in the slide bearing and longitudinally movable therein, a reel comprising a grooved pulley and connected hub, a coil spring terminally connected with the hub and a point on the head to impart rotary movement to the hub, and a strap reeled on the pulley and terminally connected with the brush, the brush at its rear end being provided with a lateral pin with which one extremity of the strap engages and the bearing being provided with a longitudinal slide slot which said pin traverses.

---

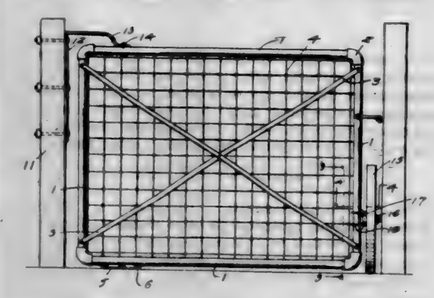
1,567,931. COMPRESS. PERCY H. EPLER, Worcester, Mass. Filed Oct. 23, 1924. Serial No. 745,514. 6 Claims. (Cl. 128—258.)



1. As an article of manufacture, a compress of the character described comprising a plurality of layers of absorbent material on one side and a rubber lining on the other side and having a longitudinal seam along the bottom and two seams extending upwardly from the ends thereof to unite the several layers of materials along said seams and form a pocket, said pocket being open at the top so as to be capable of receiving ice or water therein.

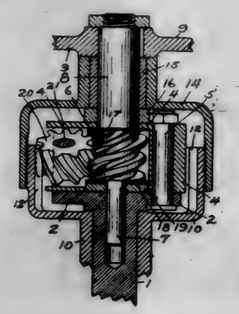
---

1,567,932. SAGELESS GATE. EDWARD ESCHENBACHER, Brainerd, Minn. Filed July 7, 1925. Serial No. 42,050. 3 Claims. (Cl. 39—96.)



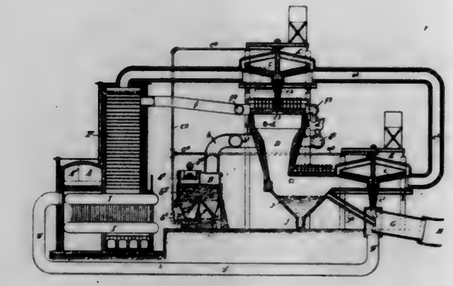
2. In a gate having top and bottom rails, an L-shaped hanger adapted to be secured to a gate post and having a downwardly bent portion pivotally engaging the top rail, and means engaging the bottom rail to support the gate.

1,567,933. STEERING-ATTACHMENT MECHANISM. CHARLES M. FAHNESTOCK, Cincinnati, Ohio. Filed Nov. 27, 1922. Serial No. 603,643. 4 Claims. (Cl. 74—34.)



1. In a combination with a motor driven vehicle, a steering wheel, a driving shaft actuated by said steering wheel, a helical driving gear on said shaft, a frame for said gear, a driven shaft in line with said driving shaft and fixed to said frame, an internal gear surrounding said frame and fixed against rotation, and helical gears mounted in said frame and meshing with said driving gear and internal gear.

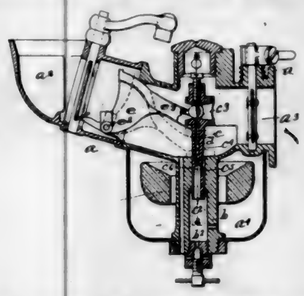
1,567,934. PROCESS AND APPARATUS FOR REDUCING ORES AND PRODUCING CEMENT. ALEXANDER FERGUSON, London, England. Filed Mar. 13, 1925. Serial No. 15,370. 8 Claims. (Cl. 75—17.)



2. A metallurgical method which comprises forming a vortex of reducing gases above melting temperature, feeding finely divided ore in a cloud to the vortex zone, depositing the reduced metal by centrifugal force upon a surrounding wall, and collecting the molten metal by gravity in a receptacle below the vortex zone.

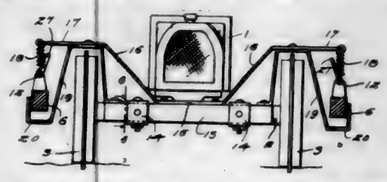
1,567,935. CARBURETOR. CHARLES A. FLEMING, Jackson, Mich., assignor, by direct and mesne assignments, of one-half to Briscoe Devices Corporation, Pontiac, Mich., a Corporation of Michigan, and one-half to Thomas D. Buick, Detroit, Mich. Filed Oct. 1, 1917. Serial No. 194,152. 1 Claim. (Cl. 261—41.)

A carburetor casing having a carbureting chamber therein and adapted to communicate with the atmosphere, a float chamber constantly in communication with the carbureting chamber and adapted to provide a constant supply of volatile fluid for engine idling purposes, a metering pin establishing communication between the float chamber and the carbureting chamber and having a groove in the wall thereof establishing an additional communication between said float chamber and said



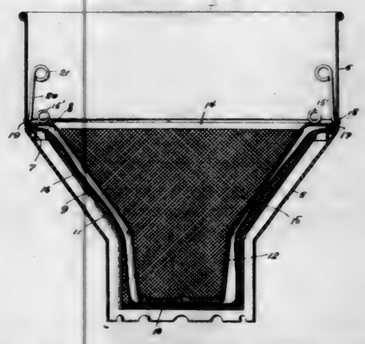
carburetor chamber for variable speeds of an engine, and means carried by said metering pin causing air to travel transversely of the direction of the flow of fuel to lift the fuel from said metering pin.

1,567,936. TRACTOR SWEEP RAKE. CLIFFORD A. FLEMING, Huntsville, Mo. Filed Mar. 13, 1924. Serial No. 699,021. 5 Claims. (Cl. 56—27.)



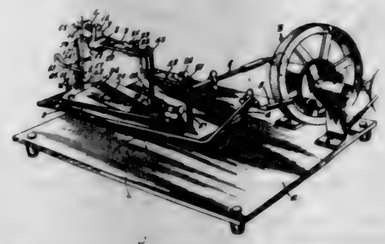
1. In a tractor sweep rake, a main frame enclosing the tractor and having longitudinal bars, a cross brace connected to the front axle of the tractor, inverted U-shaped standards also connected to the front axle and having stirrups partially enclosing said longitudinal bars, said longitudinal bars being yieldably supported from said cross brace, and a rake pivotally mounted on said longitudinal bars.

1,567,937. MILK STRAINER. WILLIAM J. GALARNEAU, Mount Vernon, Wash. Filed Oct. 13, 1924. Serial No. 743,447. 1 Claim. (Cl. 210—155.)



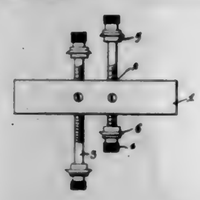
A funnel comprising an open ended casing, an annular flange surrounding the inner face thereof, a substantially frusto-conical wire frame removably arranged in the casing, an annular flange carried by the upper end of the frame and resting upon the flange first mentioned, a disk carried by the lower end of the frame, a foraminated element supported within the sides of the frame, a second frusto-conical frame received in the frame first mentioned and supported in spaced relation thereto, a foraminated element supported within the frame last mentioned, a resilient ring engaging the casing and adapted to clamp the frames therein, and extensions carried by the ring and terminating in finger engaging elements.

1,567,938. DENTAL ARTICULATOR. WILLIAM M. GAMBILL, Merkel, Tex. Filed Feb. 25, 1925. Serial No. 11,516. 15 Claims. (Cl. 32—1.)



1. An articulator comprising an upper articulator member provided with a socket at its outer end, a lower articulator member, a tension coupling device extending through the outer end of said lower member and slidably engaging in said socket, and an adjustable tensioning device connected with said upper member and slidably connected to said coupling device.

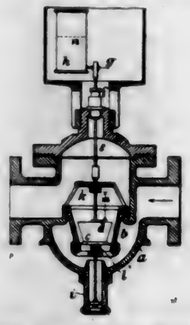
1,567,939. MARKING GAUGE. JULIUS H. GILBERT, Flint, Mich. Filed Mar. 29, 1924. Serial No. 702,948. 1 Claim. (Cl. 33—42.)



A device of the class described comprising a rectangular shaped block, the sides of which form straight edges, said block having threaded holes therein, rods having threaded portions engaging the holes so that the rods can be adjusted in the block, screws embedded in the block for holding the rods in adjusted position, a collar on the outer end of each rod, a marker disk resting against said collar and a nut on the threaded end of each rod for holding the disk in position.

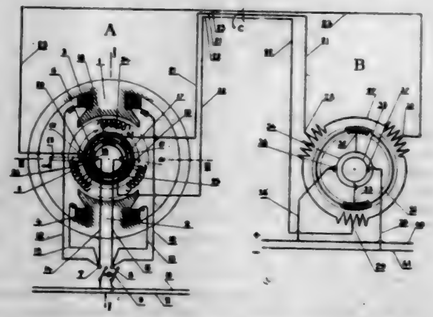
1,567,940. APPARATUS FOR MEASURING STREAMS. ANTON GRAMBERG, Frankfort-on-the-Main, Germany, assignor to Farbwerke Vorm. Meister Lucius & Brüning, Hochst-on-the-Main, Germany, a Corporation of Germany. Filed Aug. 10, 1921. Serial No. 491,203. 4 Claims. (Cl. 73—167.)

1. Apparatus for measuring fluids comprising means defining a conduit, a piston valve mechanism constructed and arranged in the conduit to vary the effective cross-sectional area thereof in proportion to the volume of fluid passing per unit of time, a scale indicating mechanism associated with said scale and controlled by the movement of said piston valve, abutments at opposite sides of said piston valve making the range of movement thereof exactly equal to that required to move said indicating mechanism from the zero line to the end line of



said scale, and means operable from without the conduit to move said piston valve against the abutment which limits the opening movement thereof.

1,567,941. COMPLETE ELECTRIC DISTANT-CONTROL APPARATUS. ELIE GRANAT, Paris, France. Filed Jan. 4, 1922. Serial No. 526,903. 2 Claims. (Cl. 172—239.)

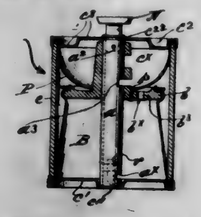


1. In a complete distant control apparatus the combination of: direct current line wires, a transmitting machine comprising a stationary field member fed by the direct current line wires and an armature, a commutator provided on said armature, fixed brushes rubbing on said commutator and fed by the direct current line wires, movable brushes rubbing on the commutator, a rotating support whereon are fixed said movable brushes, means for actuating said rotating suport, self induction coils each connected to one of the rotating brushes, transmitting line wires connected respectively to the said self induction coils, a receiving motor comprising a stator fed by the said transmitting line wires and a rotor, and a closed winding provided on the rotor and fed at two opposite points by the direct current line wires.

1,567,942. ARTICULATIVE SOUND-PRODUCING DEVICE FOR DOLLS, ETC. LEO J. GRUBMAN, New York, N. Y., assignor, by mesne assignments, to Voices, Incorporated, Newark, N. J., a Corporation of Delaware. Filed Dec. 20, 1922. Serial No. 607,931. 18 Claims. (Cl. 46—46.)

1. In an articulating device, an air chamber, a gravity movable air expelling member in said chamber, a sound producing reed through which the air is expelled, relatively fixed means with which said member coacts to control the emission of sound simulating the pronuncia-

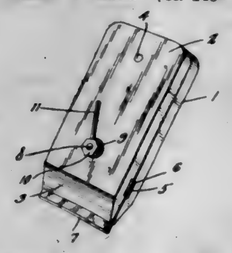
tion of vowel letters and additional means adapted to cooperate with said fixed means for independently controlling the emission of sound in relatively different volume



from that normally emitted through said first-named means for simulating the pronunciation of consonant letters.

---

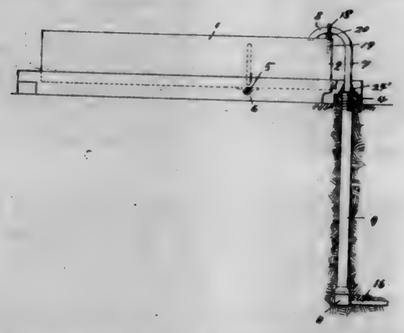
1,567,943. SCRAPING TOOL. MARTIN VAN BUREN GRUSH, Fort Wayne, Ind. Filed June 13, 1924. Serial No. 719,862. 1 Claim. (Cl. 145—47.)



The combination in a scraper, of side by side body sections having their forward ends exteriorly beveled and also having flat opposed sides to directly engage a safety razor blade and coincident cross sectional elongated recesses in said sides and spaced from said forward ends and extending throughout the width of the body sections, and forming a chamber to receive the head of a safety razor blade, a transverse pivotal connection between the sections adjacent to the rear ends thereof, a transverse headed and threaded screw extending through the sections at a point between said pivotal connections and said recesses, and a nut mounted on said screw and opposed to the outer side of one section.

---

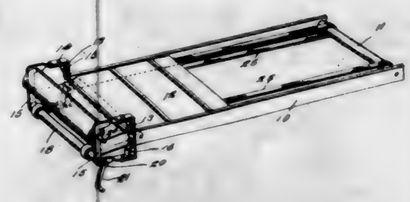
1,567,944. TROUGH. FRANKLIN NOAH GUYMON, Huntington, Utah. Filed July 10, 1925. Serial No. 42,812. 4 Claims. (Cl. 119—81.)



1. A watering trough of the character described comprising a base, a trough pivotally secured thereto adjacent one end, a vertically disposed pipe having its upper end secured to said end of the trough, means associated with the lower end of said pipe to introduce water therein for said trough upon movement of the trough in one direction.

---

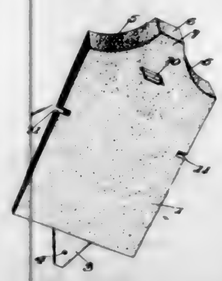
1,567,945. AGRICULTURAL MACHINE. JOHN M. HAYS, Ringwood, Okla. Filed Feb. 27, 1925. Serial No. 12,078. 4 Claims. (Cl. 198—129.)



1. In a machine of the class specified, the combination with a frame having a separable endless canvas operating around rollers mounted in said frame, of bearing brackets supporting one end of the frame, spaced rollers removably mounted in said brackets, means for pivotally mounting one of the brackets to permit of lateral swinging movement and facilitate removal and replacement of the rollers, means carried by one of the rollers for engagement with one end of the canvas, whereby the canvas may be wound upon said roller, spaced straps having one of their ends detachably engaged with and adapted to be wound upon the other bracket roller, means providing a detachable connection between the other ends of the straps and one end of the canvas to guide the latter around the table rollers when the strap wound roller is rotated and means to rotate the rollers.

---

1,567,946. CONCRETE SHINGLE. CHARLES F. HELFLINGER, Hobart, Wash. Filed Aug. 17, 1925. Serial No. 50,777. 7 Claims. (Cl. 108—8.)

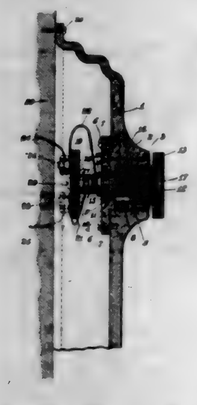


2. A shingle having transversely alined notches in the side edges thereof and an attaching member secured to the under face of the shingle midway between the side edges of the shingle and depending substantially at right angles to the lower face of the shingle, as and for the purposes described.

---

1,567,947. ELECTRIC PUSH BUTTON. STEWART H. HEMPHILL, New York, N. Y. Filed May 2, 1922. Serial No. 558,007. 5 Claims. (Cl. 200—159.)

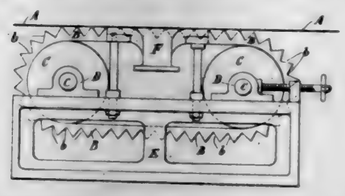
1. An electric push button comprising, in combination, a supporting casing having an opening therein and a push button positioned within said opening and secured to the under side of said casing, said push button including a holder having a plural diameter bore, a base plate mounted on said holder in spaced relation thereto, contact members on said base plate, and a body having



inner and outer enlarged portions reciprocable in said plural diameter bore to make and break contact between said contact members.

---

1,567,948. PAPER-MAKING AND OTHER MACHINE WHEREIN SUCTION IS TO BE USED. ROLAND BLYTH HEYS, Bristol, England, assignor to St. Anne's Board Mill Company Limited, Bristol, England. Filed Feb. 28, 1925. Serial No. 12,330. 4 Claims. (Cl. 92—52.)

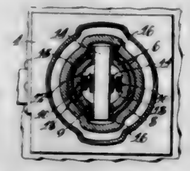


4. Apparatus for withdrawing by suction moisture from wet material carried on a traveling wire, said apparatus comprising a rotatable roller carried upon its periphery a band having grooves transversely to the line of travel, the open ends of which come successively opposite to the mouth of a passage, leading to a suction device, so that, at that portion of the travel, air and moisture is drawn through said material and wire into said grooves, or channels, as they successively come into communication with the passage, leading to said suction device, substantially as hereinbefore described.

---

1,567,949. INTERNAL-COMBUSTION ENGINE. LEONARD V. HOSFORD and DAVID DAVISON, Portland, Oreg., assignors, by mesne assignments, to Hosford Motor Construction Co., a Corporation of Oregon. Filed Dec. 22, 1924. Serial No. 757,444. 3 Claims. (Cl. 123—74.)

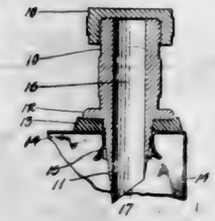
2. An internal combustion engine wherein is provided a crank case, a crank shaft, a cylinder secured to the crank case; a stationary piston secured at its lower end to the cylinder base; a reciprocating piston fitted over the stationary piston and within the cylinder, said stationary piston having a pair of diametrically opposite slots and a pair of diametrically opposite inward projections constituting vertical slideways, the slideways being positioned at approximately right angles to the slots, a cross head having slippers mounted in said stationary piston in cooperation with said slideways, a connecting rod and wrist pin joining the cross head with the crank shaft, a



pin carried by the cross head and projecting through said slots with its ends mounted in bosses on the reciprocating piston, said slippers having faces of friction reducing bearing metal.

---

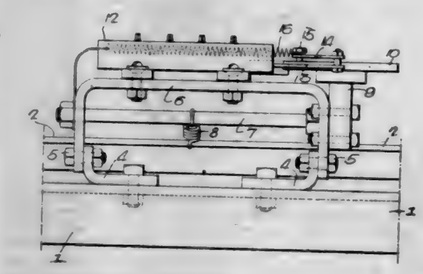
1,567,950. COMBINATION CAN OPENER AND SEALER. CLIFFORD G. HUGHES, Elwood, Ind., assignor of one-half to Oliver B. Frazier, Elwood, Ind. Filed Aug. 14, 1925. Serial No. 50,326. 2 Claims. (Cl. 221—23.)



2. A combined can opening and sealing device comprising a hollow body having a sharp end with a tapered threaded portion adjacent said end the threads on said tapered portion increasing in pitch with the diameter of the tapered portion, substantially as set forth.

---

1,567,951. COUNTING MACHINE. HENRY IEPSON, Philadelphia, Pa., assignor to Abbotts Alderney Dairies Incorporated, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Dec. 5, 1922. Serial No. 605,117. 3 Claims. (Cl. 235—91.)

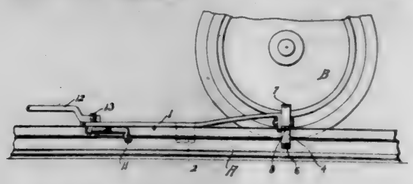


1. The combination in a conveying device, of means for registering the number of articles carried thereby, the said means comprising a counting wheel adapted to engage the said articles and to be moved by each of them through approximately one revolution, a device for registering each complete revolution of the wheel, and means for additionally moving the wheel after each engagement with an article to cause it to assume a position exactly corresponding to one complete revolution.

1,567,952. PISTON RING. VICTOR A. JAMES, Tampa, Fla. Filed Nov. 16, 1920, Serial No. 424,402. Renewed June 6, 1922. Serial No. 566,265. 3 Claims. (Cl. 74—109.)

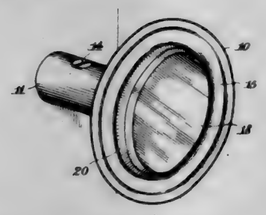
1. A piston ring formed of a plurality of superimposed split rings having their opposed edges formed with a number of inclined surfaces, the inclined surface of one ring being disposed opposite to that of the other ring, whereby relative rotary movement of the rings will increase their combined width and a spring located between the rings for forcing the latter to move in opposite rotary directions.

1,567,953. WHEEL HOLDER. RALPH E. JONES, Troy, Mont. Filed Oct. 18, 1924. Serial No. 744,451. 1 Claim. (Cl. 188—45.)



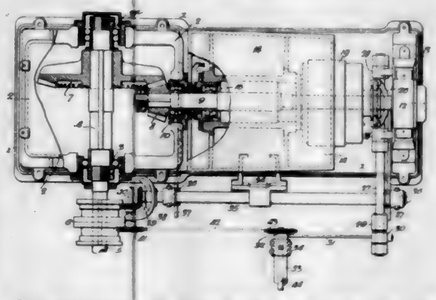
A wheel clamp comprising a supporting member having a hook thereon for engaging a rail, a dog pivoted to the supporting member and having a hooked part for engaging a part of the rail and a toothed part for engaging a part of the wheel, a lever pivoted to a part of the plate and having a curved part for engaging a part of the rail and having a hooked part for engaging one edge of the tread of the rail.

1,567,954. DOORKNOB. SAMUEL KALM, Brooklyn, N. Y., assignor to J. Chesler Sons Co., a Copartnership, Brooklyn, N. Y., composed of Nathan Chesler, Samuel Kalm, Reuben Chesler, and Abraham Chesler. Filed Aug. 9, 1924. Serial No. 731,144. 1 Claim. (Cl. 292—347.)



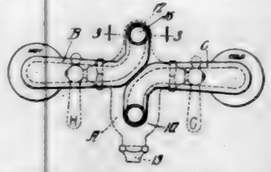
As an article of manufacture, a door knob comprising a shell having an opening at the front thereof and having an inwardly directed annular flange at said front, said flange presenting a radial seat, and a neck directed radially inward from said seat; together with an ornamental central assemblage comprising an ornament and a frame therefor, said frame presenting a radial zone contacting with said seat, as well as means at the outer edge of said radial zone for clamping said ornament in position, the frame including an inwardly directed tubular neck at the inner side of the frame, said neck on the frame fitting within the neck of the flange on the shell, and coacting means on the respective necks of said frame and said flange to effect snapped engagement between said necks.

1,567,955. DRIVE STAND. CONRAD J. KERN, Philadelphia, Pa., assignor to The Moore & White Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Aug. 9, 1924. Serial No. 731,195. 1 Claim. (Cl. 74—7.)



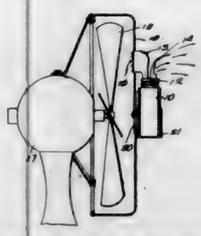
The combination in a drive stand for paper and like machinery of a base; a housing; a transverse shaft mounted in bearings in the housing; a longitudinal shaft having one bearing in the housing; a pedestal supported in the opposite end of the shaft; a long cone pulley loosely mounted on the shaft; ball bearings between the pulley and the shaft; clutch mechanism arranged to couple the shaft and the cone pulley; means for actuating the clutch; a belt shifter arranged to shift a belt on the cone pulley; a hollow shaft for operating the clutch; and a shaft extending through the hollow shaft for operating the belt shifter.

1,567,956. COMBINATION-FAUCET CONNECTION. SAMUEL KERSTEN, Chicago, Ill. Filed Nov. 12, 1923. Serial No. 674,269. 6 Claims. (Cl. 137—75.)



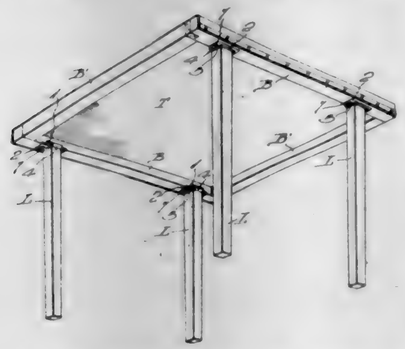
1. In a combination faucet connection of the character described, a combination faucet having two rearwardly extending inlets for connecting with corresponding outlets of supply pipes, and interchangeable right and left reversible connections for interconnecting either inlet and either supply pipe whether the supply pipes correspond with or are in positions reversed relative to the inlets.

1,567,957. LIQUID VAPORIZER AND DISTRIBUTOR. MICHAEL B. KESSELMAN, New York, N. Y. Filed Jan. 18, 1924. Serial No. 687,146. 3 Claims. (Cl. 261—30.)



1. A liquid vaporizer and distributor adapted to be connected to an electric fan, comprising a receptacle having an open top, a cover removably connected to the top, said cover having an air inlet adapted to receive air blown from the fan discharging downwardly into the receptacle, and an air outlet discharging upwardly from the receptacle, and a wind wheel in said inlet.

1,567,958. FOLDABLE TABLE. CARL REINHOLDT KOSITZKY, Bismarck, N. Dak. Filed Apr. 13, 1925 Serial No. 22,816. 2 Claims. (Cl. 45—48.)



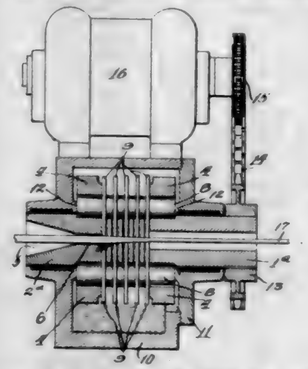
1. A table comprising a top having a horizontal bar at its lower side, said bar having a recess which opens through its lower side and through one of its vertical edges, a horizontal plate secured to said lower side of the bar and spanning said recess, a second plate bent substantially upon itself to provide an attaching base and an overhanging tongue adapted to frictionally engage the lower and upper sides of the first named plate respectively, and a leg to which said attaching base is secured.

1,567,959. FIRE EXTINGUISHER. FRIEDRICH EMIL KRAUSS, Schwarzenberg, Germany. Filed May 4, 1923. Serial No. 636,749. 1 Claim. (Cl. 169—31.)

A reserve charge receptacle for fire extinguishers, comprising a closed container having a screw-threaded filling opening for the extinction liquid, a pressure cartridge insertable in said opening and having a screw-threaded head for cooperating therewith and forming the closure therefor, and a safety blow-off in a wall of the container positioned to drain the container on the occurrence of a predetermined pressure therein, as described.

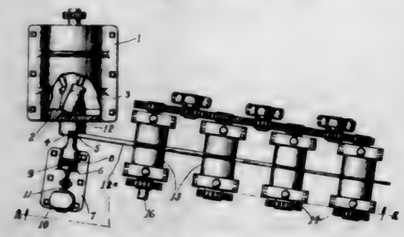
1,567,960. WIRE POINTER. JOHN W. LAUREN, Sterling, Ill. Filed July 10, 1922. Serial No. 573,851. 3 Claims. (Cl. 80—22.)

1. In a wire pointing machine, a housing having end journal bearings and a lubricant chamber, a rotor having hollow end journals mounted in said bearings, said rotor having radially extending arms, shafts journalled



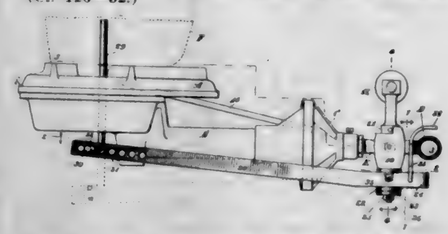
in said arms, disk rollers secured upon said shafts and adapted for passing through the lubricant in said chamber and means for rotating said rotor.

1,567,961. APPARATUS FOR PRODUCING ELONGATED METAL FORMS. JOHN W. LAUREN, Sterling, Ill. Filed July 15, 1922. Serial No. 575,268. 8 Claims. (Cl. 80—8.)



6. In a wire making machine, mechanism for axially piercing a billet, rotary cutters arranged obliquely to the axis of said mechanism for spirally cutting the billet and mechanism for reducing and finishing the cut spirals.

1,567,962. GAS LIGHTER. CLAIRE MELVIN LEE, Elyria, Ohio. Filed Jan. 2, 1925. Serial No. 251. 1 Claim. (Cl. 126—52.)

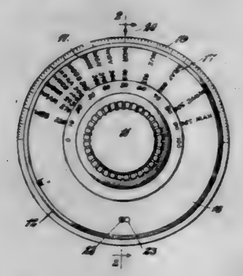


A gas lighting attachment for gas stoves, said attachment comprising a lever, a member on said lever adapted to be projected through a gas burner to be depressed by a vessel when the latter is placed on the burner, a gas supply pipe to direct gas to the burner, a gas cock in said supply pipe, means to fulcrum said lever adjacent said cock, said cock having a turnable plug formed with a transverse bore adapted to be brought into or out of register with a supply pipe by turning the plug and having also a slot communicating with

the transverse bore, a pilot light tube extending longitudinally at a side of said lever, said plug having an axial bore communicating with said transverse bore and the body of the cock, having a main gas outlet brought into or out of communication with the transverse bore by the turning of the cock plug, as well as an outlet to said pilot light tube, the turning of the plug serving also to bring the slot thereof into or out of register with the outlet to the pilot light tube, a valve longitudinally movable in said axial bore to close the transverse bore against the flow of gas therethrough, and a connection between said lever and said valve to move the valve to open position and permit flow of gas through the transverse bore when the lever is depressed.

---

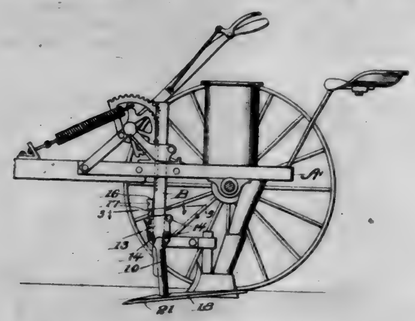
1,567,963. RADIODIAL. JOSEPH LUPO, Jr., New York, N. Y. Filed Apr. 15, 1925. Serial No. 23,295. 1 Claim. (Cl. 116—133.)



As a new article of manufacture a radio dial including a knob and an integral flange having an annular groove in the outer face thereof of dove-tail shape in cross section for the reception of an annular disk constituting an indicia bearing element.

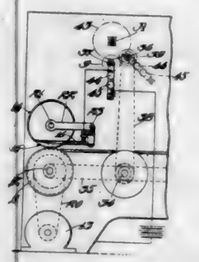
---

1,567,964. PLOW. JAMES J. MCCASLAND, Haskell, Tex. Filed Jan. 8, 1923. Serial No. 611,351. 3 Claims. (Cl. 97—207.)



3. A plow attachment for a riding planter comprising a pair of curved foot pieces formed at their lower ends with lateral outwardly extending ears and formed at their upper ends with plate portions disposable against opposite sides of the shank of the riding planter, rearwardly diverging plow blades adjustably bolted onto said ears, and bolts passing through said plate portions at the front and rear sides of the shank, and a wedge disposed against the front of the shank and provided with transverse notches within a selected one of which may be engaged the uppermost one of said bolts whereby to tilt the foot pieces and consequently the blades.

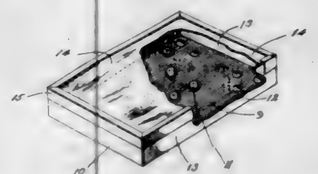
1,567,965. LEATHER-MEASURING MACHINE. ROBERT J. MCFALL, Amherst, Mass. Filed Dec. 2, 1921, Serial No. 519,501. Renewed June 1, 1925. 22 Claims. (Cl. 33—123.)



1. In a leather measuring machine, a bed member, a feed wheel co-operating therewith, said feed wheel having an annular projecting member, a contact mechanism actuated upon the passage of leather through the machine, and a contact carrier therefor, said carrier contacting with said annular member so that bodily movement of the feed wheel will move the contact carrier relatively to the bed member.

---

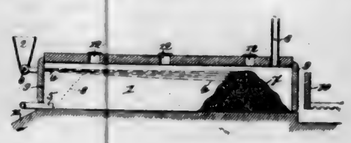
1,567,966. PUZZLE GAME. ANDREW MCKENZIE, South Warren, R. I. Filed Jan. 14, 1925. Serial No. 2,426. 1 Claim. (Cl. 273—115.)



A game device comprising a rectangular tray having a group of depressions in the bottom and adjacent its corners, each group of depressions having a destinctive insignia in contradistinction to all of the other of the groups, spherical bodies of a number equal to the sum total of all of the depressions, each spherical body having thereon an insignia corresponding to the insignia of one of the groups of depressions.

---

1,567,967. PROCESS OF GASIFYING AND CARBONIZING COAL AND LIKE FUEL SUBSTANCES. HENRI MACAUX, Paris, France, assignor to Societe Lyonnaise des Eaux et de l'Eclairage, Paris, France. Filed Oct. 3, 1922. Serial No. 592,076. 1 Claim. (Cl. 202—8.)



A process for the gasifying of coal and like fuel, which consists in the continuous insufflation of finely divided coal into chambers heated to redness, in the simultaneous injection into these chambers during the whole time the process is carried out, of a supplementary gas containing hydrogen and in such a proportion that the partial tension of the hydrogen shall be constantly maintained at a higher degree than the tension which would result from the disassociation of the hydrocarbons contained in the coal and disengaged by the pyrolytic decomposition of the coal, and in evacuating the gases produced without allowing the same to traverse a layer of red hot coke, for the purposes set forth.

---

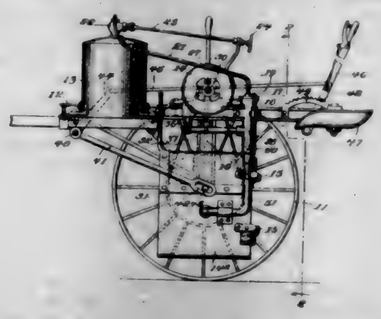
1,567,968. METAL FLOAT. CLYDE C. MANCHESTER, Toledo, Ohio, assignor to The Ayling & Reichert Company, Toledo, Ohio, a Corporation of Ohio. Filed Mar. 23, 1925. Serial No. 17,468. 4 Claims. (Cl. 137—104.)

1. The method of securing a spud to a thin metal float, which consists in forming the float with an inwardly flanged aperture of a dimension to closely fit the spud, placing a heavy washer around said flanged aperture, inserting the spud into said aperture, centering a circular riveting tool upon the inner face of the spud, the cutting edge of said tool being of a diameter slightly less than the diameter of the inner surface of the spud, and applying force to the tool to form the outer wall of the spud into an annular flange and to press said wall outwardly against the said washer with the flanged metal of the float compressed therebetween.

4. In a metal float, an attachment plug located in a hole in the float shell, means forming a stop against inward motion of the plug and a peripheral flange on the plug gripping the float wall around said hole, said plug having an axial socket extending from the outer surface inwardly to a point short of the inner end of the plug but beyond the base of said peripheral flange.

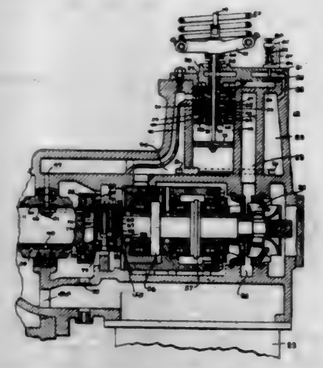
---

1,567,969. INSECT EXTERMINATOR. AUGUST MAREK, Yoakum, Tex. Filed Apr. 15, 1925. Serial No. 23,387. 7 Claims. (Cl. 43—132.)



3. A machine of the character described comprising a wheeled frame adapted to pass over a row of plants, a plant receiving frame depending therefrom, air tubes supported by the second mentioned frame and having their lower extremities extended inwardly to direct the air within the frame, an injector tube associated with each air tube, and means for heating the air within each tube for the purpose specified.

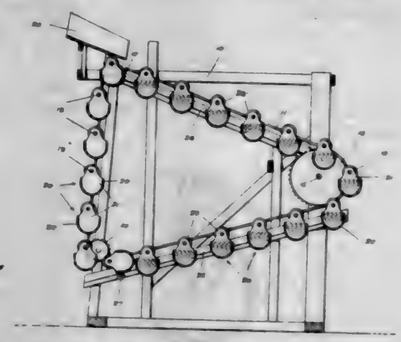
1,567,970. GOVERNOR. ROLAND MARSLAND, Essington, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 20, 1924. Serial No. 694,141. 1 Claim. (Cl. 264—14.)



The combination with a turbine having an admission valve and a rotor shaft, a lever connected to the admission valve, a spring tending to move the lever in one direction to close the admission valve, a stem carried by the lever, a piston carried by the lower end of the stem, a cylinder for the piston, means driven by the shaft for developing fluid under pressure, a valve for controlling the admission and exhaust under pressure to one side of said piston, a piston carried by said valve and having its upper end bearing against said spring, means for normally applying pressure of fluid developed by said pressure-developing means to the face of said piston connected to the valve and which is opposite to the spring, and centrifugal means carried by the shaft for relieving pressure of fluid applied to said piston.

---

1,567,971. WATER MOTOR. CELLIE MARCEL MARTIN, Hoges Store, and McKenzie Arnn, Roanoke, Va. Filed June 21, 1924. Serial No. 721,595. 1 Claim. (Cl. 253—21.)

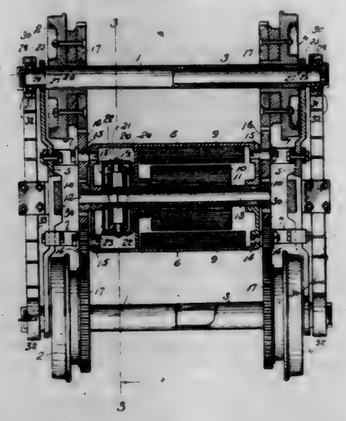


A water motor comprising a frame, sprocket wheels mounted in the frame, sprocket chains trained around said sprocket wheels, transverse shafts carried by said chains, buckets suspended from said shafts between the chains, said sprocket wheels and chains being arranged to form a triangle so that the chains have upper and lower reversely inclined runs movable downwardly and a substantially vertical run movable upwardly, means for delivering water into the buckets after they reach the upper end of the vertical run so that the filled buckets move downwardly along said reversely inclined runs.

rollers on said shafts, upper and lower reversely inclined rail at the upper and lower runs of the chains on which said rollers travel along said upper and lower runs, and a tripping roller at the lower ends of the lower rails over which the buckets are tilted and emptied before moving upwardly along the vertical run.

---

1,567,972. VEHICLE DRIVING MECHANISM. EDWARD S. MEEHAN, Kansas City, Mo. Filed Feb. 4, 1924. Serial No. 690,461. 9 Claims. (Cl. 105—97.)



1. In a vehicle driving mechanism, two pairs of carrying wheels, the wheels of each pair being disposed one ahead of the other, two axles respectively secured to and rotatable with the wheels of one pair, two sleeves respectively rotatable on said axles and respectively secured to and rotatable with the wheels of the other pair, a frame carried by said axles, a motor carried by said frame having a driving shaft, and means including differential gearing for effecting driving relationship between the driving shaft and said carrying wheels, and by which the wheels of one pair are differentially driven relatively to the wheels of the other pair.

---

1,567,973. PNEUMATIC FIGURE TOY. ABRAHAM A. MENDELSON, Philadelphia, Pa. Filed June 15, 1925. Serial No. 37,134. 2 Claims. (Cl. 46—40.)

1. A toy of the class described comprising a hollow compressible body having an opening in the wall thereof, a sleeve inserted within the body through the opening and securely held to the body, a pliable tube having an open end portion disposed over the sleeve and frictionally engaged therewith, the opposite end of the tube being closed, and an object carried by said closed end portion of the tube, said tube and object being projected or withdrawn upon contraction or expansion of the hollow body.

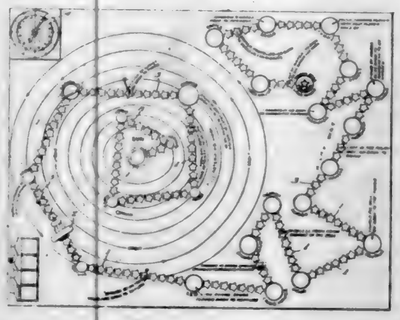
1,567,974. TREATMENT OF PYORRHEA. CHARLES WESLEY MONROE, Parkersburg, W. Va. Filed June 1, 1923, Serial No. 642,861. Renewed May 12, 1925. 3 Claims. (Cl. 167—9.)

2. A method of treating Riggs' disease which comprises applying to the gums and affected parts, non-poisonous solution containing sodium iodide.

3. A medicinal preparation, adapted for the treatment of pyorrhea, containing a solution of a non-poisonous iodide of an alkali-forming metal, and a digestive enzyme.

---

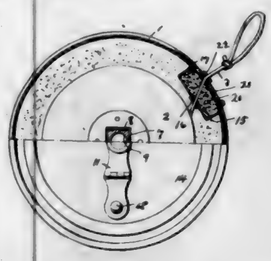
1,567,975. GAME. CHARLES S. MUIR, Chevy Chase, Md. Filed Mar. 28, 1924. Serial No. 702,594. 3 Claims. (Cl. 273—134.)



2. An astronomical game including a diagram of celestial bodies and orbits around the sun with planets in their respective orbits with definite relation to their distances from the sun, a movable object adapted to move from one planet to another, means for indicating the move of said object with respect to the various celestial bodies indicated on the diagram, and indications at definite points among the celestial bodies of the move to make, whether forward, or backward, or a standstill when a certain predetermined celestial body shall have been reached by the move indicated.

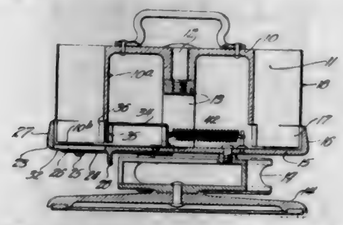
---

1,567,976. CHALK-LINE HOLDER. JESSE C. MYERS, York, Pa. Filed Feb. 27, 1925. Serial No. 12,143. 2 Claims. (Cl. 33—87.)



1. A chalk line holder comprising a casing for containing loose chalk, a reel rotatably mounted in the casing, said casing having an opening in its edge, a holder within the casing and connected with a portion of the inner wall thereof and with the interior of which the opening communicates, a flap hinged to the exterior of the casing for covering the opening, said flap and the holder having holes therein through which a chalk line carried by the reel passes and packing material placed in the holder for serving to place the line under tension and to prevent the chalk from escaping through the opening.

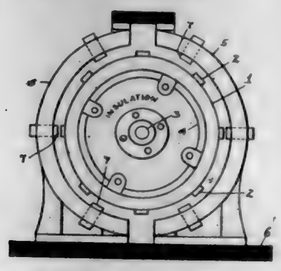
1,567,977. DISPENSING DEVICE. EDWIN V. NESSLING, Chicago, Ill., and ROGERS M. WARWICK, Eastlake, Fla.; said Nessling assignor to said Warwick. Filed July 14, 1921. Serial No. 484,601. 10 Claims. (Cl. 133—5.)



6. A dispensing device comprising a container for the articles to be dispensed, and means for discharging a definite number of the articles from the container, the means comprising a slide, a pair of plates pivotally secured to the slide, and means for displacing the pair of plates.

---

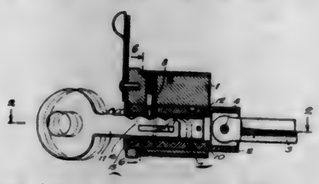
1,567,978. ROTARY SPARK GAP. FRED G. NIECE, Cleveland, Ohio. Filed Mar. 24, 1920. Serial No. 368,393. 2 Claims. (Cl. 250—38.)



1. In a device of the character described, the combination of a plurality of pairs of stationarily supported electrodes disposed in equidistantly spaced circular relation; and a plurality of pairs of rotatably supported electrodes disposed in equidistantly spaced circular relation, said stationary set comprising an odd number of pairs of electrodes, oppositely lying electrodes being of opposite sign, and said rotatable set comprising an even number of pairs of electrodes all electrically connected together.

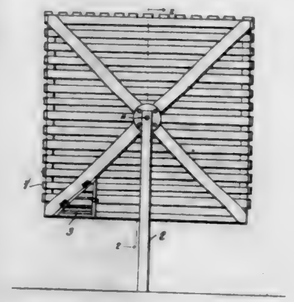
---

1,567,979. LOCK. CHARLES EDGAR NORTHROP, deceased, late of Orion, Mich., by Clara L. Northrop administratrix, Orion, Mich. Filed Jan. 26, 1924. Serial No. 688,820. 7 Claims. (Cl. 70—46.)



1. A lock and key comprising a barrel, a rotatable cylinder arranged in said barrel, a plurality of tumblers projecting from the barrel into the cylinder, a pin carried by the cylinder and projecting into the barrel, and a key formed with means for simultaneously moving said pin and tumblers to an inoperative position whereby the cylinder may be rotated.

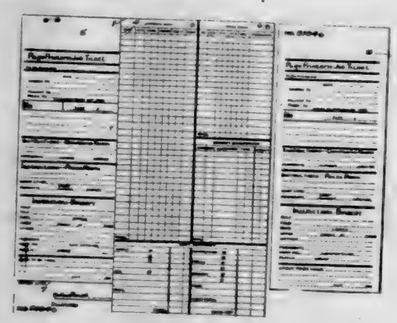
1,567,980. MEANS FOR DISCOURAGING A HEN FROM BROODING. CLAUDE E. OYLEAR, Epworth, Mo. Filed Mar. 21, 1924. Serial No. 700,844. 2 Claims. (Cl. 119—97.)



1. Means for breaking up the inclination of a hen to brood, the same consisting of a coop pivoted to rotate about a horizontal axis and normally balanced so as to rest with its bottom parallel with the ground.

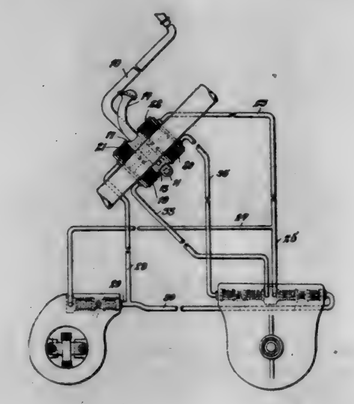
---

1,567,981. RECORDING SYSTEM. CYRIL D. PAGE and FRANK A. BEHOUNEK, Grand Forks, N. Dak. Filed May 9, 1924. Serial No. 712,084. 1 Claim. (Cl. 283—66.)



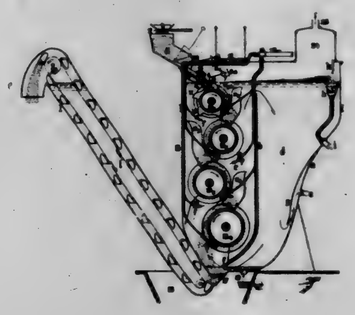
In a recording system, a main sheet, a secondary sheet of less width and length than the main sheet, said main sheet having a vertical line produced on a face thereof at a distance from the lateral edge of the main sheet equal to the width of the secondary sheet, said vertical line extending the full length of the main sheet, said main sheet having a transverse line extending from said one lateral edge to said vertical line and located at a distance from the upper edge of the sheet equal to the length of said secondary sheet, whereby a space will be defined on said main sheet coextensive in area with said secondary sheet, said secondary sheet and said space having identical lines and indicia produced thereon to adapt said space for use as an order blank and said secondary sheet for use as a job sheet, said main sheet having other lines, columns and indicia produced on the face thereof between said vertical line and the second lateral edge of the main sheet to adapt said main sheet for use as a summary sheet, said main sheet also having a space below said transverse line and having produced in said last named space indicia identical with indicia on the job sheet at the upper end of the latter.

1,567,982. BRAKE MECHANISM FOR AUTOMOBILES. ISADORE FRANCIS PFEIFFER, Altoona, Pa. Filed Dec. 24, 1924. Serial No. 757,804. 2 Claims. (Cl. 188—152.)



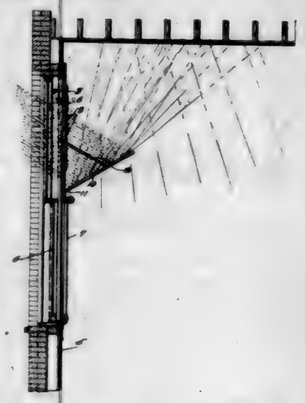
1. A brake mechanism for automobiles having brake devices on all four wheels, which comprises fluid means for operating service brakes on each of the wheels, fluid means for operating emergency brakes on each of the rear wheels, a brake pedal for operating the service brakes through one of said fluid means, an emergency lever for operating the emergency brakes through the other fluid means, said fluid means being independent of each other, and means associated with the pedal and the lever permitting the independent operation of the pedal but causing the operation of the pedal whenever the lever is operated.

1,567,983. APPARATUS FOR SEPARATING AND EXTRACTING MINERAL OILS FROM OILY SAND, BITUMEN FROM OILY CHALK, OILY SLATE, COAL, ETC. HEINRICH PRELLER, Berlin-Friedenau, Germany. Filed Dec. 9, 1922. Serial No. 605,997. 7 Claims. (Cl. 196—14.)



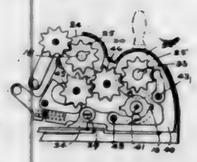
1. In a device for recovering mineral oils and bitumens from substances containing the same, a reservoir adapted to contain a treating liquid, a set of drums in said reservoir, the alternate drums of said set being rotatable in opposite directions whereby the material undergoing treatment advances in a zigzag path.

1,567,984. LIGHT DEFLECTOR. FRANK K. REID, Alva, Okla. Filed Feb. 19, 1925. Serial No. 10,355. 1 Claim. (Cl. 88—57.5.)



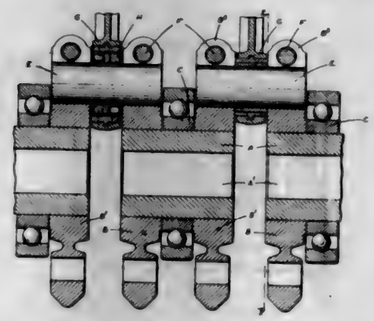
The combination with a structure having a window, of a reflecting glass arranged at one side of the window and capable of being arranged at any desired angle to reflect sun rays onto the ceiling of a room, means for supporting the reflecting mirror at various angles, such means including a vertically arranged casing having a longitudinal slot and a series of transverse seats, a link connected with the mirror and having one end passed into the slot and a pin carried by the link and engageable with any one of the seats.

1,567,985. CALCULATING MACHINE. ALEXANDER REISSER, Modling, Austria, assignor, by mesne assignments, to Aktiebolaget Calculus, Stockholm, Sweden. Filed June 29, 1920. Serial No. 392,887. 2 Claims. (Cl. 235—140.)



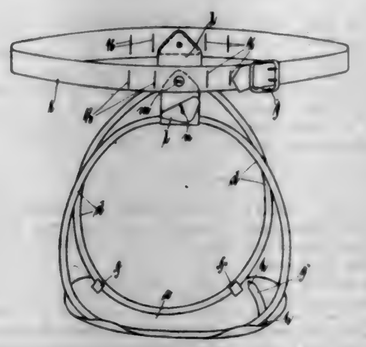
1. A calculating machine of the character described comprising in combination, main driving mechanism, a totalizing counter including a shaft and numeral wheels on the shaft and a transfer mechanism comprising toothed wheels secured to the numeral wheels, another shaft parallel with the shaft of the numeral wheels and continuously operated from the driving mechanism, a plurality of toothed discs slidably arranged on the last mentioned shaft and adapted to engage the toothed wheels for transferring the tens of each wheel of the totalizing counter to the wheel of the next order, and each of said discs being adapted to be operated by the coresponding numeral wheel so as to be moved to the operative position upon the numeral wheel passing to zero position, each of said toothed discs being provided in its hub with a groove and a locking device being provided for each toothed disc consisting of a spring pawl adapted to engage in the groove of the disc upon the lateral displacement of the latter in such a manner as to hold the disc in the corresponding position until the tens-transfer operation is completed, when it is released and returned laterally to normal position by the action of the spring, substantially as described.

1,567,986. CRANK SHAFT. HARRY RALPH RICARDO, London, England. Filed Dec. 8, 1922. Serial No. 605,675. 1 Claim. (Cl. 74—38.)



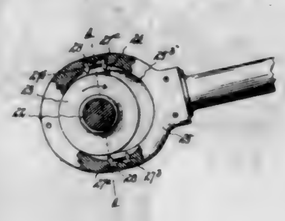
A built-up crank shaft comprising a plurality of aligned shaft sections having smooth cylindrical bearing surfaces at their ends respectively, a flat metallic web member at each end of each shaft section provided with two cylindrical apertures extending therethrough, the axes of said apertures being parallel, one aperture of each web having a continuous cylindrical wall shrunk on to the cylindrical end bearing surface of the corresponding shaft section, and the other aperture of each web constituting a crank pin aperture having a relatively thin wall slotted in such manner that the diameter of the aperture may be reduced by bolts or clamps, crank pins extending parallel to the shaft axis and having smooth cylindrical outer surfaces, the ends of said crank pins lying within the aligned crank pin apertures of two adjacent web members, and a clamping bolt associated with each web by means of which each crank pin aperture is reduced in diameter to tightly clamp the corresponding crank pin end, the clamping bolt being adapted to be readily loosened to permit individual removal of the crank pins.

1,567,987. CATAMENIAL BANDAGE. HARRY EWART WRIGHT, Penarth, Wales. Filed Dec. 13, 1923. Serial No. 680,321. 1 Claim. (Cl. 128—289.)



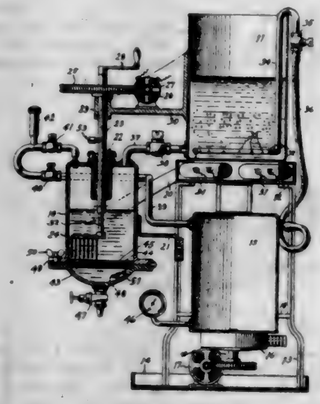
A catamenial bandage comprising two endless tubular supporting bands of elastic and non-absorbent material of substantially circular cross section and comparatively large diameter adapted to be connected to a waist belt and an elongated container of elastic waterproof and non-absorbent material having a pair of side walls of undulatory formation at their upper edges whereby the container is of reduced width at the middle of its length and wide at its end portions, the wide end portions forming flaps which are folded over and secured to the supporting bands and the intermediate portions of the upper edges between the flaps conforming to the curvature of the supporting bands.

1,567,988. OPERATING MECHANISM FOR SLIDE VALVES. URBAN S. ALSBURR, Towson, Md. Filed Jan 22, 1925. Serial No. 4,124. 5 Claims. (Cl. 74—14.)



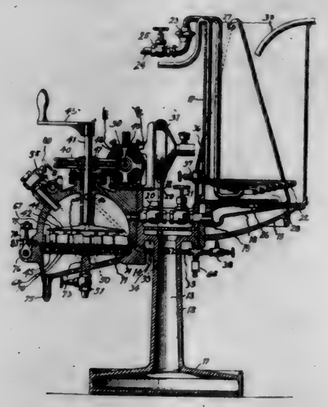
3. A cam device for imparting an intermittent reciprocating motion from a revolving shaft comprising a wheel having a tappet projecting therefrom, a yoke member having an elliptical-shaped recess therein to receive the wheel upon which said yoke-member is mounted to have a reciprocating motion, and spring-actuated dogs in opposite walls of the recess at opposite sides of the transverse diameter of said recess for engagement of the tappet to move the yoke member in opposite directions.

1,567,989. FILTER FOR RECLAIMING CRANK-CASE OIL AND OTHER MINERAL OILS AND ANIMAL FATS. JOHN V. APABLASA, Los Angeles, Calif., assignor to Charles C. Apablasa, Los Angeles, Calif. Filed Oct. 18, 1924. Serial No. 744,430. 6 Claims. (Cl. 210—150.)



1. In a filtering device, a container, a cover at the bottom of the container, a perforated plate supported by the cover, a wire screen supported by the perforated plate, a thick pad of felt fabric upon the wire screen, means for introducing the material into the top of the container, means for preheating the material before it enters the container, a rotary agitator within the container, and above the felt fabric, means for operating the agitator with a rotary movement, and means for adjusting the agitator relatively to and from the filtering elements.

1,567,990. FILTERING DEVICE. JOHN V. APABLASA, San Diego, Calif. Filed Mar. 11, 1925. Serial No. 14,839. 11 Claims. (Cl. 210—150.)



1. In a filtering device, the combination with a filter container, of a cover detachably secured to the bottom of the container, rigid and perforated top and bottom filter plates supported by the cover, other filtering elements interposed between the top and bottom plates, means for maintaining the alignment of the plates whereby the perforations of the top plate will register with the perforations of the bottom plate, a filtering sand disposed in the perforations of the top plate, an agitator within the container serving to clean the top plate, and means for rotatively operating the agitator.

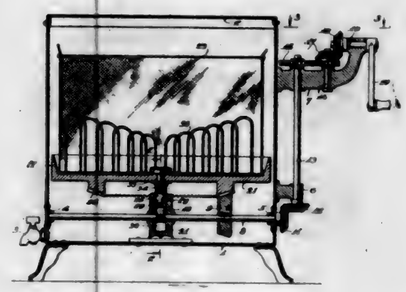
---

1,567,991. BLASTING TUBE AND BLASTING-TUBE PACKAGE. GEORGE SHERMAN CLARK, Huntington, W. Va., assignor, by mesne assignments, to Clark Patent Tubing Co., Wheeling, W. Va., a Corporation of West Virginia. Filed Feb. 10, 1922. Serial No. 535,643. 4 Claims. (Cl. 102—6.)

1. The method of forming a blasting tube package, which includes forming a flat tube by folding the edges of a flat strip towards one another, applying a damp sealing strip to the tube to secure the edge portions thereof and wrapping the flat tube upon itself to form a package with the sealing strip outside, whereby the subsequent drying and contracting of the strip insures the formation of a tight package.

3. A blasting tube package formed from a flat tube having a sealing strip applied to the tube and lying on the outside of the wrappings, the strip being applied to the tube while still damp and the package thereupon wrapped to form a tight package, the tube being adapted to be drawn laterally from the center when required for use without releasing the outer end of the tube.

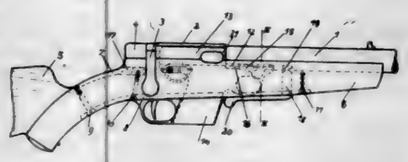
1,567,992. DISHWASHING MACHINE. STANISLAS DYKTOR and HERBERT G. DYKTOR, New York, N. Y. Filed Jan. 26, 1925. Serial No. 4,773. 4 Claims. (Cl. 141—9.)



1. A dishwashing machine, comprising a receptacle adapted to receive a washing liquid, a platform arranged in said receptacle, a constant speed driving member and means actuated by said driving member for causing said platform to be rotated and reciprocated, said last mentioned means also causing the platform to be rotated and moved up and down at varying speeds, said means including a pair of meshing elliptical gears.

---

1,567,993. RIFLE WITH PISTOL BREECH MECHANISM. ALBIN GERSTENBERGER, Chemnitz, Germany. Filed Dec. 30, 1924. Serial No. 758,928. 6 Claims. (Cl. 42—16.)



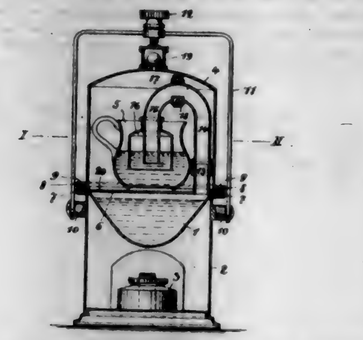
1. A rifle with pistol breech mechanism, comprising in combination a rifle barrel, a T-shaped bar on the lower surface of the rear end of said rifle barrel, a guide sleeve at the rear end of the rifle barrel, a breech case open at the lower side inserted into said sleeve, a pistol handle having a T-shaped groove in its front part and a spring-controlled barrel holder designed to securely connect the pistol handle with the barrel of the rifle.

---

1,567,994. STEAM STERILIZING APPARATUS FOR DOMESTIC USE. FRITZ KESER, Schomberg, Germany. Filed May 14, 1924. Serial No. 713,280. 1 Claim. (Cl. 167—3.)

A sterilizing hot steam apparatus for household use especially designed for disinfecting the sputum of tubercular persons said sputum being contained in a separate vessel, comprising in combination a steam generator on the centre of the top of which said sputum-containing vessel is to be placed, a tubular outflow socket eccentrically mounted in the top plate of said steam generator, a ∩-shaped steam tube pivotally mounted on said tubular outflow socket so that its free end may be made to engage with said sputum-containing vessel to dip into the sputum, a bell-shaped sleeve adjustably mounted on the free end of said steam tube so that it can be made to dip into the sputum for a greater depth than

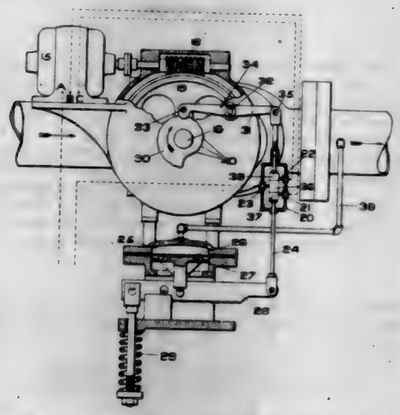
the end of said steam tube to ensure an intimate admixing of steam and liquid, and a check valve in said steam tube designed to ensure an equalization of pres-



sure in the steam tube when the apparatus is getting cool and to prevent thus the rising of the liquid in said steam tube.

---

1,567,995. PRESSURE REGULATOR. JAMES LEWIS KIMBALL, Salem, Mass., assignor to Ruggles-Klingemann Mfg. Co., Salem, Mass., a Corporation of Massachusetts. Filed Jan. 31, 1925. Serial No. 6,009. 15 Claims. (Cl. 50—10.)

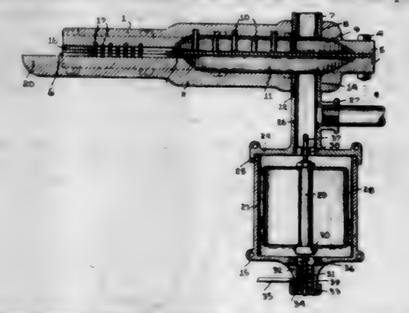


13. In a fluid system, a valve for controlling the condition of the fluid in the system, a motor for controlling the valve, a switch for controlling the motor, means for selectively controlling said switch in accordance with the condition of the fluid in the system and by said motor to effect an incremental control of the valve, and means to adjust the valve to a degree corresponding to the degree of fluctuation of the condition of the fluid in the system without limiting the degree of operation of the motor.

---

1,567,996. OIL BURNER. LUCIUS L. ROGERS, Texarkana, Tex. Filed Dec. 22, 1924. Serial No. 757,512. 4 Claims. (Cl. 158—77.)

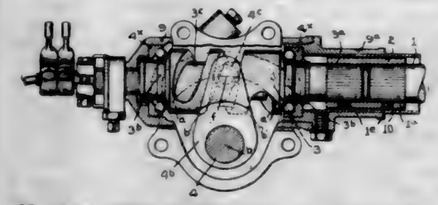
4. An oil burner comprising complemental flanged castings and an interposed combination gasket and division plate, bolts passing through the flanges and through the division plate for securing the three together, one of said castings being dished on the under face to provide a fuel chamber and the other being dished on the upper face to provide a steam chamber which terminates at its forward end short of the fuel chamber, the division plate terminating at the forward end of the fuel chamber, said castings being recessed on their facing sides to define a mixing chamber and the division plate



being formed with extensions constituting a gasket between the castings where they define the mixing chamber, the mixing chamber communicating with a fuel nozzle and the lower casting being formed with a lip or extension disposed at the lower plane of said fuel nozzle.

---

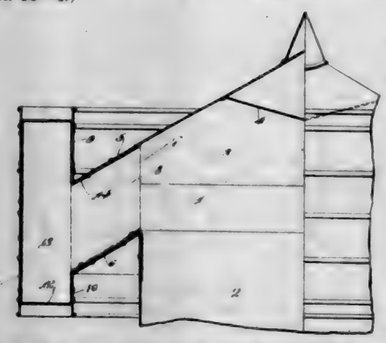
1,567,997. STEERING GEAR. DAVID E. ROSS, La Fayette, Ind., assignor to Ross Gear & Tool Company, La Fayette, Ind., a Corporation of Indiana. Filed Apr. 30, 1924. Serial No. 710,179. 26 Claims. (Cl. 74—79.)



25. As an article of manufacture an actuating member for a steering gear consisting of a cylinder of substantially uniform diameter having an approximately helical cam groove in its periphery gradually decreasing in helical angularity from the central point of the groove towards each end thereof; substantially as described.

---

1,567,998. VENTILATOR. LOUIS S. RYSDON, Chicago, Ill. Filed Oct. 17, 1923. Serial No. 669,145. 1 Claim. (Cl. 98—4.)

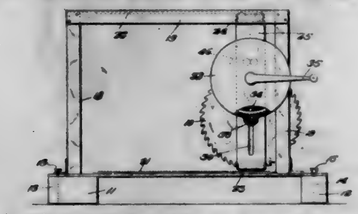


A ventilator comprising a casing forming a throat, and a chamber above the throat, a deflector in the chamber, an annular upper flange extending from the casing

downwardly, a lower annular flange extending from the casing downwardly and parallel to the other flange to form a downwardly extending passage, partitions supported by the said flanges to sub-divide said passage, an inner vertical flange extending upwardly from said upper flange, a lower inner flange extending from said first mentioned lower flange, and an outer band supported by said upper and lower flange and forming a vertically extending annular passage in communication with said first passage.

---

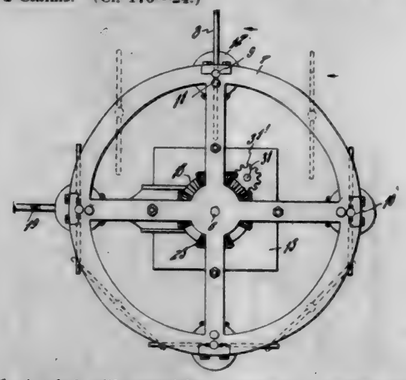
1,567,999. ROTARY SAW. THOMAS D. SADLER and DUDLEY K. SADLER, New Orleans, La. Filed Nov. 14, 1923. Serial No. 674,716. 2 Claims. (Cl. 143—47.)



1. A rotary saw comprising, a support including a horizontal plate extending lengthwise of the support and having a central longitudinal slot therein, a pair of spaced apart frame members rising from opposite sides of the plate, a pair of top and bottom rack bars arranged in the top of each frame member and on the adjacent side portion of the plate with the racks of each pair facing each other and all of the racks arranged in register, a vertically disposed carriage above the plate having spaced side bars one within each frame member, spaced toothed rollers in the tops and bottoms of the side bars meshing with the racks to support the side bars, a bearing member mounted for vertical sliding movement in each side bar, a saw shaft journalled in said bearing members, operating gearing carried on one end of the shaft and movable therewith and with the bearing members a rotary saw on said shaft between the bearing members and in register with said slot in the plate, opposed racks in each bearing member, intermeshing pinions in each side bar engaging the opposed racks of the bearing members, a transverse shaft connecting a corresponding pinion of each side bar, and means for locking the shaft when adjusted.

---

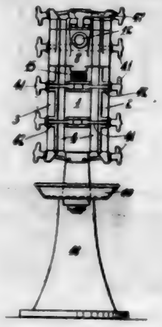
1,568,000. WINDMILL. ROBERT D. SCHMIDT, Davenport, Iowa. Filed June 14, 1924. Serial No. 720,047. 2 Claims. (Cl. 170—24.)



1. A wind mill comprising a support, a vertical shaft carried thereby, a rotatable frame carried by the shaft, feathering blades journaled in the frame, a base plate arranged on the shaft, a sleeve rotatable on the shaft, a gear formed therewith and resting on the base plate, a rudder carried by the sleeve, a manually operable rotatable shaft journaled in the support, a pinion carried thereby, and adapted to be brought into or out of engagement with the first mentioned gear, and means for shifting the manually operable shaft vertically for the purpose specified.

---

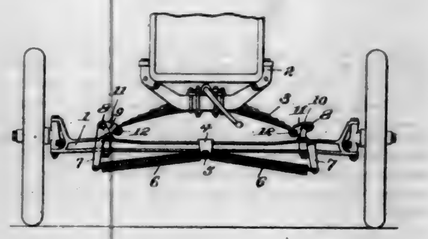
1,568,001. FILTER OR STRAINER ESPECIALLY APPLICABLE TO MILK AND OTHER POTABLE LIQUIDS. RICHARD SELIGMAN, London, England. Filed May 13, 1925. Serial No. 30,055. 6 Claims. (Cl. 210—168.)



1. In a filter of the character described, in combination, a fixed medial plate-like body, cover plates one on each side of said plate-like body forming filter chambers therebetween, filtering media contained between the body and the cover plate and dividing the space between the body and each said cover plate into a filtered liquid-space and an unfiltered liquid-space, and a multi-way valve on the body, said valve connecting with the filter chambers through the body and through projections from the cover plates for controlling the supply and discharge of the liquid through one or other of the said filters.

---

1,568,002. SHOCK ABSORBER FOR MOTOR VEHICLES. CHARLES E. SHEARER, Amarillo, Tex. Filed Nov. 7, 1923. Serial No. 673,376. 1 Claim. (Cl. 267—17.)

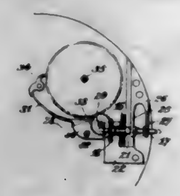


In a shock absorber, the combination of a vehicle body, an axle, reversely arranged angular levers having normally inclined pendent portions and also having upper normally inclined portions spaced apart in parallelism, and angularly disposed portions fixedly connecting said vertical portions together, bolts extending through said parallel portions adjacent the juncture thereof with the pendent portions and effecting pivotal connection of the levers to the axle, a transverse spring

connected to and carried by the body of the vehicle and having its end portion disposed between said normally inclined portions of the lever, bolts extending between said parallel portions adjacent their free ends and pivotally connecting the ends of said spring thereto, a connector secured midway between the ends of the axle and retractile springs connected at their inner ends to said connector and at their outer ends to the pendent portion of said levers.

---

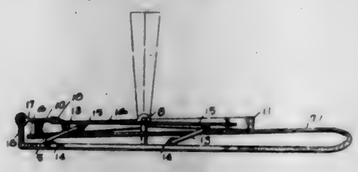
1,568,003. WATCH. ALFRED C. SMITH, New York, N. Y. Filed Apr. 16, 1924. Serial No. 706,935. 4 Claims. (Cl. 58—67.)



1. A watch including in its construction a winding and setting mechanism formed with a pair of pinions, one acting as a setting pinion and the other as a winding pinion, said pinions being formed with polygonal-shaped openings in the center, and a winding shaft formed with a polygonal-shaped section adapted to be moved into the openings in their of said pinions for causing an actuation thereof when the shaft is actuated.

---

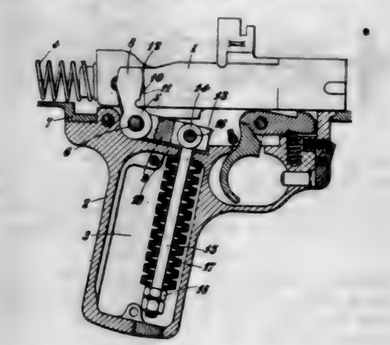
1,568,004. JAW TRAP. MILAN STILL, Kodiak, Territory of Alaska. Filed June 16, 1925. Serial No. 37,530. 5 Claims. (Cl. 43—92.)



1. In a jaw trap, a base member, a ring-shaped member disposed above the base member, a U-shaped spring member having its ends rigid with adjacent ends of said ring-shaped member and the base member at one end of the trap and tensioned to cause ease movement of the ring-shaped member upwardly away from the base member, said ring shaped member having vertical openings in the side portions thereof, pivot members rigid with and projecting upwardly from the side portions of the base member so as to pass through said vertical openings of the ring shaped member when the latter is lowered and the spring member placed under tension, a pair of U-shaped jaws disposed transversely of the spring member and having adjacent ends hinged to the upper portions of said pivot members so that the jaws may swing vertically, and trip-controlled means for retaining the jaws in separated downwardly swung position in engagement with the upper ring-shaped member and for retaining the latter lowered with the spring member under tension.

---

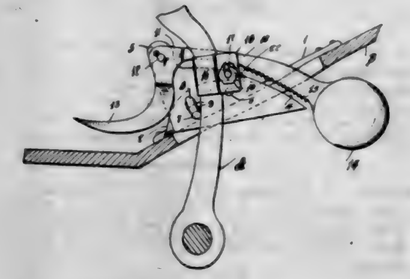
1,568,005. ACCELERATING DEVICE FOR AUTOMATIC FIREARMS. CHARLES SUTTER, Suresnes, France, assignor to Société Anonyme des Anciens Etablissements Hotchkiss & Compagnie, Seine, France. Filed June 22, 1925. Serial No. 38,806. 6 Claims. (Cl. 42—3.)



5. In an automatic fire-arm, the combination of a reciprocating piston, and a return spring therefor, a two-armed lever aadpted to be rocked by said piston, and a spring mounted in the trigger-guard and connected to one arm of said lever, so as to be tensioned by the rocking motion of said lever.

---

1,568,006. AUTOMATIC PEDAL LATCH. GEORGE D. TALLEY, Mexico, Mo. Filed June 4, 1925. Serial No. 34,914. 3 Claims. (Cl. 24—81.)



1. In combination with a pedal for controlling the clutch of an automobile transmission system, an angular support suitably secured adjacent to the pedal, a plate adjustably secured to said support, a lever fulcrumed on said plate, ratchet teeth on said lever, and means associated with the pedal to engage said teeth to hold the pedal in adjusted positions.

---

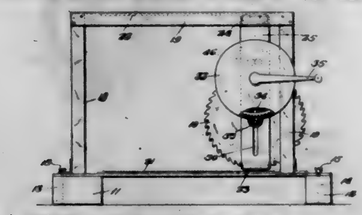
1,568,007. OIL BURNER. FRANK J. TARR, Tulsa, Okla. Filed Feb. 26, 1924, Serial No. 695,322. Renewed Sept. 30, 1925. 2 Claims. (Cl. 158—78.)

2. An oil burner of the character described comprising a plan view substantially flat rectangular casing, a cover plate removably secured to the upper side of the casing, said cover plate having an integrally formed air or steam inlet upon the upper side thereof, a longitudinally movable section received in the forward end portion of the casing which includes substantially V-shaped side walls and defining an outwardly flared discharge portion upon the upper sides thereof, an oil pipe connected to the rear portion of the casing and having com-

downwardly, a lower annular flange extending from the casing downwardly and parallel to the other flange to form a downwardly extending passage, partitions supported by the said flanges to sub-divide said passage, an inner vertical flange extending upwardly from said upper flange, a lower inner flange extending from said first mentioned lower flange, and an outer band supported by said upper and lower flange and forming a vertically extending annular passage in communication with said first passage.

---

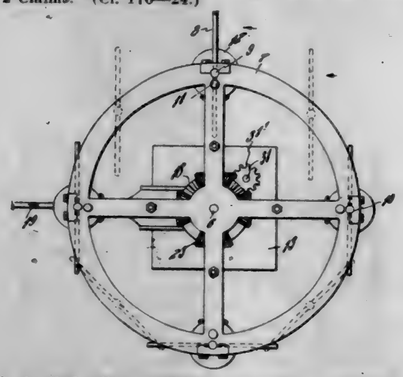
1,567,999. ROTARY SAW. THOMAS D. SADLER and DUDLEY K. SADLER, New Orleans, La. Filed Nov. 14, 1923. Serial No. 674,716. 2 Claims. (Cl. 143—47.)



1. A rotary saw comprising, a support including a horizontal plate extending lengthwise of the support and having a central longitudinal slot therein, a pair of spaced apart frame members rising from opposite sides of the plate, a pair of top and bottom rack bars arranged in the top of each frame member and on the adjacent side portion of the plate with the racks of each pair facing each other and all of the racks arranged in register, a vertically disposed carriage above the plate having spaced side bars one within each frame member, spaced toothed rollers in the tops and bottoms of the side bars meshing with the racks to support the side bars, a bearing member mounted for vertical sliding movement in each side bar, a saw shaft journalled in said bearing members, operating gearing carried on one end of the shaft and movable therewith and with the bearing members a rotary saw on said shaft between the bearing members and in register with said slot in the plate, opposed racks in each bearing member, intermeshing pinions in each side bar engaging the opposed racks of the bearing members, a transverse shaft connecting a corresponding pinion of each side bar, and means for locking the shaft when adjusted.

---

1,568,000. WINDMILL. ROBERT D. SCHMIDT, Davenport, Iowa. Filed June 14, 1924. Serial No. 720,047. 2 Claims. (Cl. 170—24.)



1. A wind mill comprising a support, a vertical shaft carried thereby, a rotatable frame carried by the shaft, feathering blades journaled in the frame, a base plate arranged on the shaft, a sleeve rotatable on the shaft, a gear formed therewith and resting on the base plate, a rudder carried by the sleeve, a manually operable rotatable shaft journaled in the support, a pinion carried thereby, and adapted to be brought into or out of engagement with the first mentioned gear, and means for shifting the manually operable shaft vertically for the purpose specified.

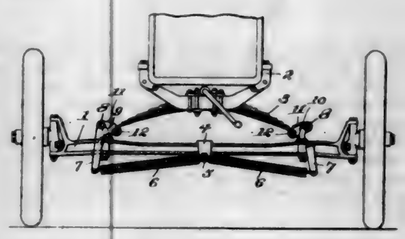
---

1,568,001. FILTER OR STRAINER ESPECIALLY APPLICABLE TO MILK AND OTHER POTABLE LIQUIDS. RICHARD SELIGMAN, London, England. Filed May 13, 1925. Serial No. 30,055. 6 Claims. (Cl. 210—168.)

1. In a filter of the character described, in combination, a fixed medial plate-like body, cover plates one on each side of said plate-like body forming filter chambers therebetween, filtering media contained between the body and the cover plate and dividing the space between the body and each said cover plate into a filtered liquid-space and an unfiltered liquid-space, and a multi-way valve on the body, said valve connecting with the filter chambers through the body and through projections from the cover plates for controlling the supply and discharge of the liquid through one or other of the said filters.

---

1,568,002. SHOCK ABSORBER FOR MOTOR VEHICLES. CHARLES E. SHEARER, Amarillo, Tex. Filed Nov. 7, 1923. Serial No. 673,376. 1 Claim. (Cl. 267—17.)



In a shock absorber, the combination of a vehicle body, an axle, reversely arranged angular levers having normally inclined pendent portions and also having upper normally inclined portions spaced apart in parallelism, and angularly disposed portions fixedly connecting said vertical portions together, bolts extending through said parallel portions adjacent the juncture thereof with the pendent portions and effecting pivotal connection of the levers to the axle, a transverse spring

connected to and carried by the body of the vehicle and having its end portion disposed between said normally inclined portions of the lever, bolts extending between said parallel portions adjacent their free ends and pivotally connecting the ends of said spring thereto, a connector secured midway between the ends of the axle and retractile springs connected at their inner ends to said connector and at their outer ends to the pendent portion of said levers.

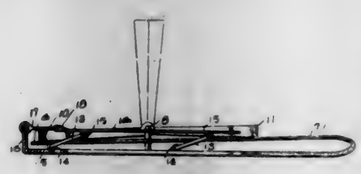
---

1,568,003. WATCH. ALFRED C. SMITH, New York, N. Y. Filed Apr. 16, 1924. Serial No. 706,935. 4 Claims. (Cl. 58—67.)

1. A watch including in its construction a winding and setting mechanism formed with a pair of pinions, one acting as a setting pinion and the other as a winding pinion, said pinions being formed with polygonal-shaped openings in the center, and a winding shaft formed with a polygonal-shaped section adapted to be moved into the openings in their of said pinions for causing an actuation thereof when the shaft is actuated.

---

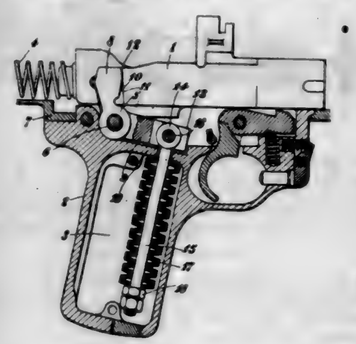
1,568,004. JAW TRAP. MILAN STILL, Kodiak, Territory of Alaska. Filed June 16, 1925. Serial No. 37,530. 5 Claims. (Cl. 43—92.)



1. In a jaw trap, a base member, a ring-shaped member disposed above the base member, a U-shaped spring member having its ends rigid with adjacent ends of said ring-shaped member and the base member at one end of the trap and tensioned to cause case movement of the ring-shaped member upwardly away from the base member, said ring shaped member having vertical openings in the side portions thereof, pivot members rigid with and projecting upwardly from the side portions of the base member so as to pass through said vertical openings of the ring shaped member when the latter is lowered and the spring member placed under tension, a pair of U-shaped jaws disposed transversely of the spring member and having adjacent ends hinged to the upper portions of said pivot members so that the jaws may swing vertically, and trip-controlled means for retaining the jaws in separated downwardly swung position in engagement with the upper ring-shaped member and for retaining the latter lowered with the spring member under tension.

---

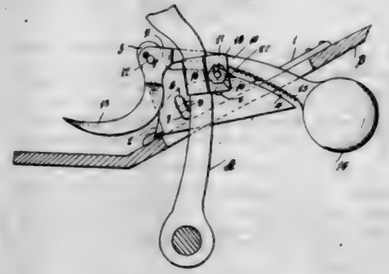
1,568,005. ACCELERATING DEVICE FOR AUTOMATIC FIREARMS. CHARLES SUTTER, Suresnes, France, assignor to Société Anonyme des Anciens Etablissements Hotchkiss & Compagnie, Seine, France. Filed June 22, 1925. Serial No. 38,806. 6 Claims. (Cl. 42—3.)



5. In an automatic fire-arm, the combination of a reciprocating piston, and a return spring therefor, a two-armed lever aadpted to be rocked by said piston, and a spring mounted in the trigger-guard and connected to one arm of said lever, so as to be tensioned by the rocking motion of said lever.

---

1,568,006. AUTOMATIC PEDAL LATCH. GEORGE D. TALLEY, Mexico, Mo. Filed June 4, 1925. Serial No. 34,914. 3 Claims. (Cl. 24—81.)



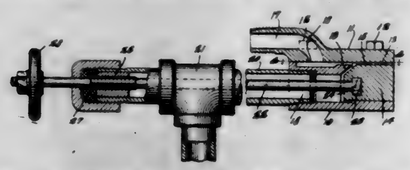
1. In combination with a pedal for controlling the clutch of an automobile transmission system, an angular support suitably secured adjacent to the pedal, a plate adjustably secured to said support, a lever fulcrumed on said plate, ratchet teeth on said lever, and means associated with the pedal to engage said teeth to hold the pedal in adjusted positions.

---

1,568,007. OIL BURNER. FRANK J. TARR, Tulsa, Okla. Filed Feb. 26, 1924. Serial No. 695,322. Renewed Sept. 30, 1925. 2 Claims. (Cl. 158—78.)

2. An oil burner of the character described comprising a plan view substantially flat rectangular casing, a cover plate removably secured to the upper side of the casing, said cover plate having an integrally formed air or steam inlet upon the upper side thereof, a longitudinally movable section received in the forward end portion of the casing which includes substantially V-shaped side walls and defining an outwardly flared discharge portion upon the upper sides thereof, an oil pipe connected to the rear portion of the casing and having com-

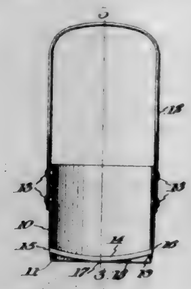
nunication with the longitudinally movable section, and a longitudinally extending rod member having one end threaded within the oil inlet pipe and its opposite end swiveled within the longitudinally movable section where-



by the mixture and entrance of oil with the air or steam within the mixing chamber defined in the upper portion of the longitudinally movable section may be determined or regulated by moving the longitudinally movable section inwardly and outwardly within the casing.

---

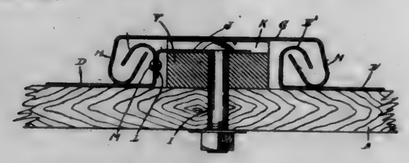
1,568,008. IMPLEMENT FOR REMOVING CORES FROM CITROUS FRUITS. CECIL C. THOMAS, Takoma Park, Md. Filed May 9, 1925. Serial No. 29,116. 5 Claims. (Cl. 146—3.)



1. An implement for removing cores from citrous fruit comprising means for effecting a cut around the core and a cross member lying in a plane of the axis of the core and extending across the axis, said cross member being formed to sever the core adjacent the end of the latter upon relative rotation of the implement and fruit.

---

1,568,009. CAR ROOF. WILLIAM D. THOMPSON, Detroit, Mich., assignor to Hutchins Car Roofing Company, Detroit, Mich., a Corporation of Michigan. Filed May 9, 1921. Serial No. 467,893. 7 Claims. (Cl. 108—5.)

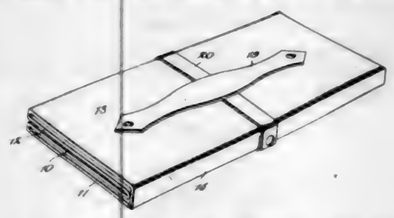


1. In an outside car roof, the combination with a load-sustaining roof, of a series of metallic roofing sheets overlying said roof, weather-proofing means between the sheets permitting relative movement thereof, and means for holding each sheet at one only of the side edges thereof from shifting longitudinally of the car.

---

1,568,010. FOLDING CASE. JOSEPH TIGERSTROM, New York, N. Y. Filed June 14, 1921. Serial No. 477,579. 1 Claim. (Cl. 229—41.)

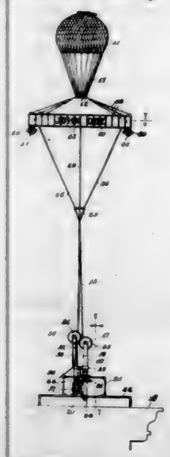
A folding case comprising a bottom wall, a front wall secured to the bottom wall at the longitudinal front edge thereof and adapted to be folded below the bottom wall, a rear wall secured to the bottom wall at the longitudinal rear edge thereof and adapted to be folded upon the bottom wall, end walls having their rear edges secured to the rear wall, a slight distance from the ends of the latter and adapted to be folded toward each other to lie in a plane above the rear wall, a top wall secured to the longitudinal edge of the rear wall opposite the juncture of the bottom wall therewith and being foldable upon said end walls, a front flap secured to the free longitudinal



edge of the top wall and being foldable to cover one of the edges of the front and end walls respectively and the point of juncture of the bottom and rear walls when said walls are arranged in folded position, flaps secured to the front wall adjacent each edge thereof, fastening means between the front flap and the front wall and the flaps second mentioned and the end walls, and said fastening means being adapted to hold said walls in assembled position.

---

1,568,011. ELECTRICAL AERIAL ADVERTISING MEANS. CHARLES S. TRIPPEDA and ANTHONY J. DICHIARO, New York, N. Y. Filed Jan. 16, 1925. Serial No. 2,929. 6 Claims. (Cl. 40—29.)



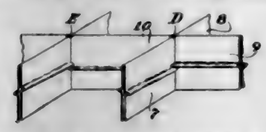
1. In an aerial advertising means, a balloon, a sign connected with the balloon to rise and fall therewith, a ground support, turnable means on said support, a connection between said balloon and sign and said turnable means, and means associated with said support to give turning movement to said turnable means and the said connection to impart turning movement to said balloon and sign.

---

1,568,012. TERRAZZO FLOORING STRIP. ERNEST V. WALSH, St. Paul, Minn. Filed July 14, 1924. Serial No. 725,809. 7 Claims. (Cl. 94—17.)

1. A floor structure comprising a base, a top layer, a strip vertically dividing said structure into sections and extending above the finished surface thereof, said strip

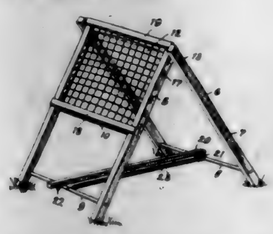
being folded upon itself to form a pair of substantiallly parallel portions, a bead on the exterior face of each parallel portion to form an anchoring means therefor,



said strip being divided at the fold thereof by a finishing operation on the floor to form a pair of oppositely disposed edging strips thereof.

---

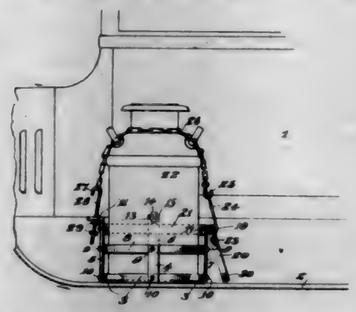
1,568,013. GAME. HOWARD CHAPIN WARFIELD, Merrick, N. Y. Filed Oct. 3, 1924. Serial No. 741,490. 1 Claim. (Cl. 273—88.)



A target for use in playing games, and comprising two frame-like members pivotally connected together, means for maintaining said pivoted frame-like members in predetermined angular relation, said means comprising a spacer and a contractor both of which are engageable with portions of said frame-like members; and a rebounding surface forming a part of one of said frames, said rebounding surface comprising a plurality of right-angularly disposed strands of a resilient nature.

---

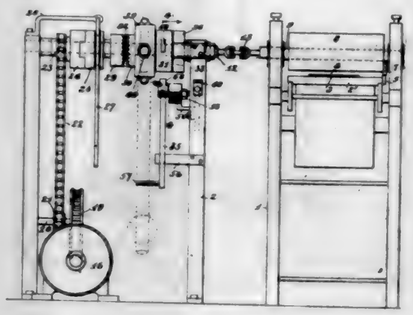
1,568,014. AUTOMOBILE CARRIER. BERT E. WATSON, Grand Island, Nebr. Filed Apr. 18, 1925. Serial No. 24,194. 6 Claims. (Cl. 224—29.)



1. A can carrier of the character described comprising, a circular receptacle including a series of spaced upright standards, certain of said standards having their upper ends outturned and one thereof having its outturned end bifurcated, a flexible securing element designed to pass over a can positioned in said receptacle, a connecting element on each end of said flexible element, one of said elements being adapted to engage said bifurcated end, a swinging arm pivotally attached to one of said standards, and a link carried by said arm and adapted to be engaged by the other of said elements, to draw said flexible element tight across said can when the swinging arm is moved downwardly.

---

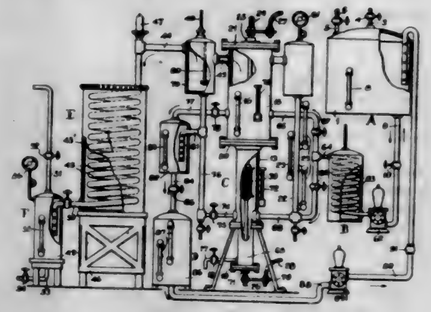
1,568,015. OPERATING MEANS FOR PRINTING PRESSES. JOSEPH A. WILLIAMS and JOHN WILLIAMS, Jr., Belleville, N. J. Filed Mar. 18, 1925. Serial No. 15,923. 7 Claims. (Cl. 185—2.)



1. An operating means for roller printing presses, comprising a member movable by gravity when permitted, means for holding said member against movement, a continuously moving drive shaft, and means operated by the movement of said member in one direction to couple the drive shaft to the operating means of the press after the member has moved for a predetermined distance.

---

1,568,016. PROCESS OF CONVERTING HYDROCARBON OILS. JOSEPH H. ADAMS, Brooklyn, N. Y. Original application filed Dec. 5, 1917, Serial No. 205,527. Divided and this application filed Oct. 12, 1922. Serial No. 593,953. 9 Claims. (Cl. 196—57.)



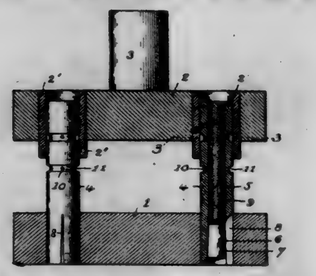
1. The process of converting hydrocarbon oils that comprises subjecting oil to direct contact with an electric resistor, immersed therein and heated electrically to a cracking temperature, and maintaining a super-atmospheric pressure upon the oil under treatment.

---

1,568,017. LEADER PIN FOR DIE SETS. ROBERT C. DANLY, Chicago, Ill., assignor to Danly Machine Specialties, Inc., Chicago, Ill., a Corporation of Illinois. Filed May 2, 1924. Serial No. 710,571. 4 Claims. (Cl. 164—118.)

1. In a die set for punching and forming presses, the combination of a set member formed with a cylindrical orifice, a leader pin cylindrical throughout to accurately fit said orifice and formed with a central channel and a

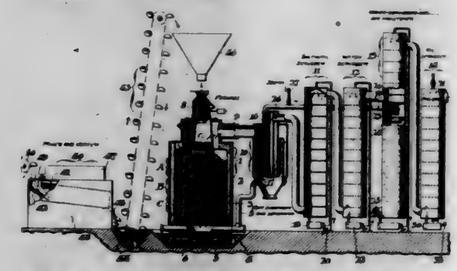
radial slit at its attaching end, a plug formed with a minute taper fitting the central channel aforesaid, so that when driven into place the plug will expand the attach-



ing end of the leader pin into fixed engagement in said cylindrical orifice, and a companion set member having sliding engagement with said leader pin.

---

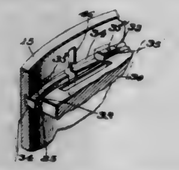
1,568,018. TREATMENT OF HYDROCARBONS. CHARLES N. FORREST, Rahway, and HAROLD P. HAYDEN, Perth Amboy, N. J., assignors to The Barber Asphalt Company, Philadelphia, Pa., a Corporation of West Virginia. Filed June 15, 1920. Serial No. 389,086. 4 Claims. (Cl. 196—55.)



2. The process of destructively distilling and gasifying hydrocarbon materials which consists in charging therewith pieces of divided inert refractory material as a carrier; passing the resultant porous charged aggregate progressively through the sphere of reaction; and subjecting the aggregate, towards its exit therefrom, to a limited counterflow of combustion agent, so as to create in the sphere of reaction a region of combustion and a preceding region of cracking, thus eventually consuming the coke formed from the cracking and restoring the carrier material to clean, uncharged condition.

---

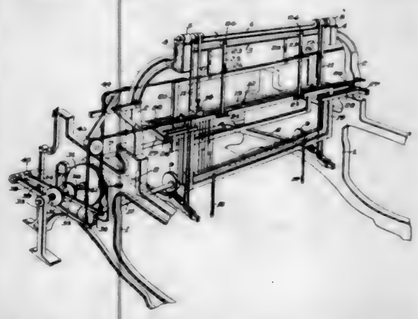
1,568,019. BRAIDING MACHINE. OTTO A. FREDERICKSON, Wethersfield, Conn., assignor to The American Wiremold Company, Hartford, Conn., a Corporation of Connecticut. Filed Feb. 11, 1925. Serial No. 8,411. 9 Claims. (Cl. 26—7.)



1. In a braiding machine, the combination of a revolving drum having an annular groove formed in its inner face to open inwardly and having vertical slots formed through its wall in intersecting relation with the groove to provide passages for the outer yarns, inner yarn carriers that travel in a horizontal plane and each constructed to support a yarn mass with its axis transverse to the drum radius, a race-way for supporting the inner end of the carriers, a pair of shoes for supporting the outer end of each carrier and secured to the carrier in horizontal spaced relation to slide in said groove across said slots, each shoe having a bearing face that is sufficiently long to slide smoothly over said slots, and means for traveling the carriers in the horizontal plane.

---

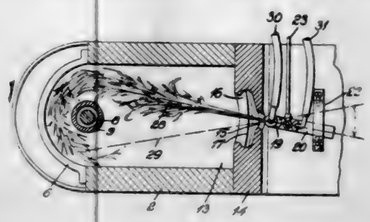
1,568,020. MARQUISETTE OR CROSS WEAVING LOOM. JOHN N. GRIFFITH, Scottdale, Ga., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Oct. 6, 1924. Serial No. 741,864. 7 Claims. (Cl. 139—53.)



5. In a cross-weaving loom for weaving tubular fabrics, the combination of two rigidly connected heddle frames having a rising and lowering movement only and provided with oppositely directed needle eyes, two independent needle frames having alternate lateral movements only, guides at the opposite sides of the loom for guiding the lateral movement of each needle frame, flexible hangers for supporting the needle frames, springs for moving the needle frames laterally in one direction, cam actuated levers, and flexible connections between the levers and needle frames for moving the needle frames laterally in the opposite direction for crossing the warp threads.

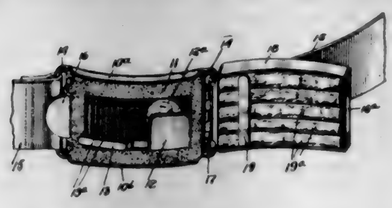
---

1,568,021. METHOD AND APPARATUS FOR HEATING GLASS FEEDERS. EVERETT O. HILLER, Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn., a Corporation of Delaware. Filed Mar. 14, 1925. Serial No. 15,511. 17 Claims. (Cl. 49—55.)



15. Apparatus for feeding molten glass, comprising a discharge chamber for the glass having a downwardly opening outlet orifice, a vertical rigid member in said chamber for controlling the discharge of glass through said orifice, and a burner mounted to oscillate upon a pivot aligned with said orifice and with the said member, the said burner being arranged to project a laterally oscillating heating flame into said chamber, and to sweep said flame across said member during the oscillations of said burner.

1,568,022. CONNECTER. REGINALD F. LANDRUM, Brooklyn, N. Y. Filed Jan. 29, 1925. Serial No. 5,486. 2 Claims. (Cl. 224—26.)



2. In a belt buckle, a face plate of substantially rectangular contour and having a flange at right angles thereto and rearwardly thereof so that said face plate forms a receptacle, a hinge at one edge of said face plate, a rear plate attached to said hinge, a rectangular gasket attached to the edges of said rear plate, spring means compressing the face plate against the rear plate and loops attached to said rear plate to which the ends of the belt are fastened.

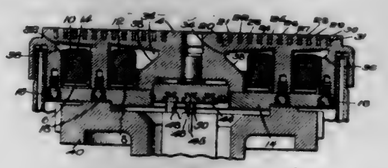
---

1,568,023. PICTURE SCREEN. HENRY MCMANUS, Hartford, and CORTLANDT F. LUCE, West Hartford, Conn., assignors to The Eureka-Cinema Corporation, Hartford, Conn., a Corporation of Delaware. Filed Apr. 18, 1922. Serial No. 555,022. 8 Claims. (Cl. 88—24.)

1. A picture screen having a flat surface and sloping surfaces of proportional areas to each absorb substantially the same number of rays of light projected upon the screen perpendicularly to the flat surface thereof.

---

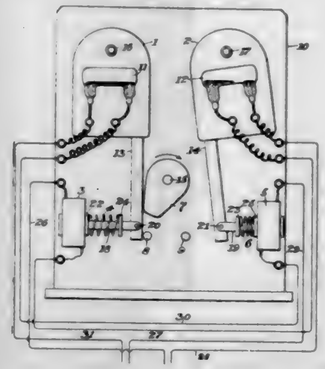
1,568,024. MAGNETIC HOLDING DEVICE. HENRY A. SPENCER, Watertown, Mass., assignor to The Blanchard Machine Company, Cambridge, Mass., a Corporation of Massachusetts. Filed Jan. 29, 1921. Serial No. 440,945. 8 Claims. (Cl. 175—367.)



1. A magnetic holding device comprising, in combination, a magnetic body having a work-holding face, means associated with the body for producing a magnetic flux to hold magnetic material on said work-holding face, said body providing within itself a complete circuit for the magnetic flux, a portion of the body adjacent to the work-holding face, and within the circuit, constituting a magnetic shunt, said portion having a varying thickness, said body presenting at intervals recesses separated by magnetic connections leading from said shunt portion to said face, thereby to divert a part of the magnetic flux from the magnetic circuit and to compel the same to flow through the magnetic pieces to be held while the remaining flux flows through said shunt portion.

---

1,568,025. SWITCHING APPARATUS. WARREN R. WALKER, New Dorp, N. Y. Filed Nov. 15, 1923. Serial No. 674,814. 8 Claims. (Cl. 175—375.)



1. In a switching apparatus which automatically closes one circuit immediately on the opening of another and the converse alternately, in combination, a switching means, a second switching means, means controlled by first of said switching means for holding the second said switching means in the open position and means controlled by second said switching means for holding the first switching means in the open position.

---

1,568,026. ELECTRON-DISCHARGE DEVICE. JOSEPH B. ZETKA, Nutley, N. J., assignor to Brightson Laboratories, Inc., New York, N. Y., a Corporation of New York. Filed June 24, 1924. Serial No. 722,076. 5 Claims. (Cl. 250—27.)

1. In a device of the character described, in combination, a support, a filament carrying member secured thereto and extending angularly therefrom, said member having its free end curved into an ogee whereby a filament carried from such free end may be maintained under the desired spring tension.

---

1,568,027. METHOD OF AND MEANS FOR RELEASING AND RECOVERING FAST CASING FROM WELLS. JOHN C. SWAN, Marietta, Ohio. Filed Nov. 27, 1923. Serial No. 677,351. 6 Claims. (Cl. 166—1.)

2. The method of releasing well casings which comprises introducing a piston-like element into the casing,

anchoring it substantially immovably to the inner wall of the casing, and passing a fluid under pressure through

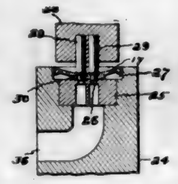
the piston-like element to exert pressure upon the lower surfaces thereof.

---

1,568,028. METHOD OF SEPARATING CONDENSABLE VAPORS FROM GASES. JOHN C. SWAN, Marietta, Ohio. Filed Dec. 15, 1924. Serial No. 756,130. 8 Claims. (Cl. 183—114.6.)

1. The method of separating condensable hydrocarbon vapors from gases which comprises passing the gas through a column of liquid and maintaining the temperature of the liquid below the condensing temperature of the component to be separated by circulating a refrigerating liquid through a refrigerating plant and in heat-exchange relation to both the interior and exterior of the column.

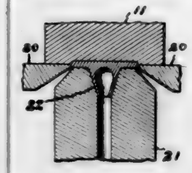
1,568,029. METHOD OF FORMING BUTTONS AND THE LIKE. RICHARD LESTER WILCOX, Waterbury, Conn., assignor to The Waterbury Farrel Foundry and Machine Company, a Corporation of Connecticut. Filed Mar. 19, 1923. Serial No. 626,125. 1 Claim. (Cl. 79—2.)



The hereindescribed method of making buttons, which resides in subjecting a blank to endwise pressure and in limiting the outward flow of the metal to form a solid head concave on one side and a solid central integral thickened shank or hub forming area on the other side, of sufficient cross-section to accommodate a group of thread holes then in supporting a side face of the shank forming area, and then in piercing such area to form thread holes while so supported.

---

1,568,030. METHOD OF FORMING BUTTONS AND THE LIKE. RICHARD LESTER WILCOX, Waterbury, Conn., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn., a Corporation of Connecticut. Filed Mar. 19, 1923. Serial No. 626,126. 2 Claims. (Cl. 29—148.)



1. The hereindescribed method of making buttons, which resides in subjecting a blank to endwise pressure to form a head, and a hollow shank, then in subjecting the blank to lateral pressure thereby to taper the free end portion of the shank so as to cause the interior thereof to be of substantially pear-shape, and finally in subjecting the shank to endwise pressure to reduce the length of the shank and in arresting the inward flow of the metal to reduce the diameter of the outer portion of the shank interior.

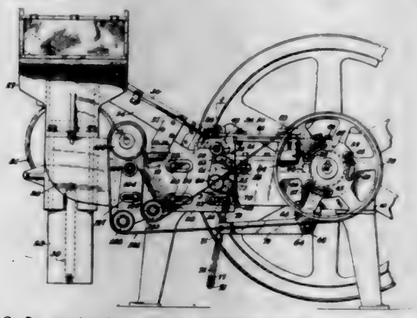
---

1,568,031. METHOD OF FORMING BUTTONS AND THE LIKE. RICHARD LESTER WILCOX, Waterbury Conn., assignor to The Waterbury Farrel Foundry and and Machine Company, Waterbury, Conn., a Corporation of Connecticut. Filed Mar. 19, 1923. Serial No. 626,127. 3 Claims. (Cl. 29—148.)

1. The hereindescribed method of making buttons, which resides in first subjecting a blank to endwise pressure to form a head with a central conical depression in its outer face and a shank having a conical depression in its outer end axially alined with the first named depression, then in subjecting the shank to axial pressure in the direction of the depression in the head to enlarge the depression of the shank and to remove the depression in the head, then in subjecting the shank to lateral pressure to reduce the length thereof and form an opening of pear-shape in the shank and in reducing the diameter of the outer end portion of the opening of the shank.

---

1,568,032. TRIMMING MECHANISM. RICHARD LESTER WILCOX, Waterbury, Conn., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn., a Corporation of Connecticut. Filed Aug. 9, 1924. Serial No. 731,153. 28 Claims. (Cl. 10—166.)

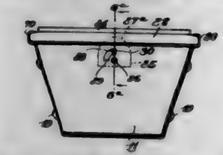


2. In mechanism of the character described; a frame; a member movably mounted thereon; operating tools; chute mechanism for conveying work pieces to a delivery station where they are arranged at an angle to the operating tools; and means for transferring work pieces from the delivery station to the operating tools, the said chute mechanism and transfer means being mounted on said member.

17. In a mechanism of the character described; a frame; a power shaft therein; operating tools mounted in the frame; companion levers pivotally connected with the frame and actuated from the power shaft; a separable connection between the levers, whereby one lever may move independently of the other, comprising a member fixed to one of the levers and having a spring engagement with the other lever; a member independent of the operating tools having a work piece delivery station thereon adjustably connected with the frame; means for delivering a work piece to the operating tools from the delivery station, comprising in part a slide movable in the member; an operative connection between one of the companion levers and the slide which will adjust itself to the varying relative positions of the slide due to the adjustment of the member, comprising an element pivotally connected with the slide and one of the companion levers, and a spring between the latter lever and a part on the slide, whereby the slide will be actuated positively in one direction by the lever and in the opposite direction by yielding means through the same lever.

---

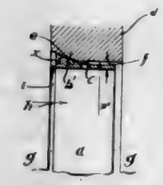
1,568,033. SHIPPING RECEPTACLE. HERBERT P. BEECHER, Rochester, N. Y. Filed Nov. 13, 1920. Serial No. 423,900. 3 Claims. (Cl. 220—1.)



1. A shipping receptacle comprising a blank of sheet metal cut and folded to form the sides and bottom of the receptacle with laterally extended closure retaining portions at the top edges of the sides and overlapping portions on opposite ones of said sides arranged to support said laterally extended portions, a closure plate of cushioning material removably carried by said retaining means and arranged to project beyond the top and adjacent corners of the receptacle, and article securing means within the receptacle.

---

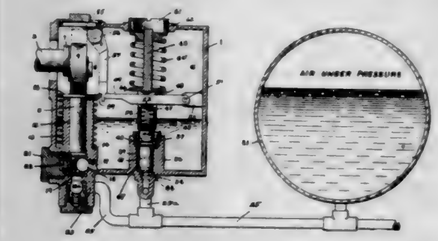
1,568,034. STEAM-TURBINE CONSTRUCTION. FRANZ LÖSEL, Brunn, Czechoslovakia. Filed Aug. 26, 1924. Serial No. 734,354. 14 Claims. (Cl. 253—77.)



1. A steam turbine construction comprising a rotating blade element with a cover or shrouding ring around the periphery thereof which is anchored thereto by means of securing devices projecting above the outer surface of the ring and an enclosing casing or part forming with said ring radial clearances of unequal depth on opposite sides of the protruding securing devices, the clearance of the lesser depth being relatively shallow but of considerable length between the leading or entering edge and said protruding securing devices and the other clearance being of sufficient depth to clear said protruding securing devices and extending to the other edge of said ring.

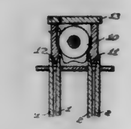
---

1,568,035. AUTOMATIC CUT-OUT. JOY S. REYNOLDS, San Francisco, Calif., assignor, by direct and mesne assignments, to Reynolds Brake Corporation, Detroit, Mich., a Corporation of Michigan. Filed June 7, 1924. Serial No. 718,629. 3 Claims. (Cl. 103—23.)



1. An automatic cut-out, comprising, a continuously rotating shaft, a pump having a piston adapted to be operated thereby in one direction, a spring adapted to operate said piston in the reverse direction, a pressure tank, said pump connected to said tank and adapted to force fluid thereinto and create pressure therein, a finger adapted to engage said piston and retain it at approximately the limit of its inner stroke, pressure operated means connected to said tank and adapted to operate said finger in the direction of engagement, and means, associated with said finger and operated by said pressure for depressing said piston to a level where it will clear its drive means.

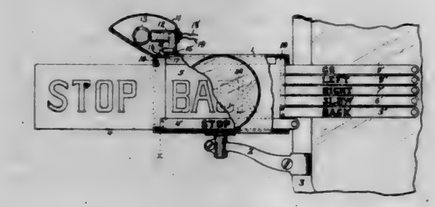
**1,568,036. SHUTTLE-DRIVE ARRANGEMENT.** FERDINAND SOUCZEK, Nachod, Czechoslovakia, assignor to Vereenigde Textielmaatschappijen Mautner, Rotterdam, Netherlands. Filed June 25, 1924. Serial No. 722,420. 6 Claims. (Cl. 139—142.)



1. A loom picking mechanism having means for throwing a shuttle comprising friction rollers composed of wedge discs and means for resiliently holding said discs together whereby a compacting pressure between the rollers and shuttle is obtained.

---

**1,568,037. SIGNAL FOR AUTOMOBILES.** JAMES B. WHITE, Fort Wayne, Ind. Filed June 6, 1921. Serial No. 475,213. 1 Claim. (Cl. 177—327.)

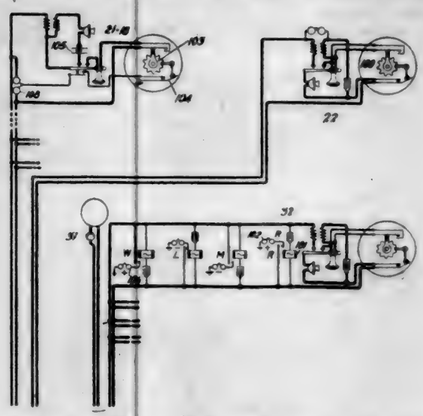


In a signaling apparatus including a series of sliding signal plates, each of which is provided with an offset and means for manipulating the plate; an electric illuminating member for said plates when in extended position; a pair of switch springs spaced apart and included in the electrical circuit for the illuminating member; and a pivotally supported switch blade engageable between said springs and having a pendant foot blade operable selectively by the offset on each signal plate when the latter is in extended position so as to close the electric circuit of the illuminating member.

---

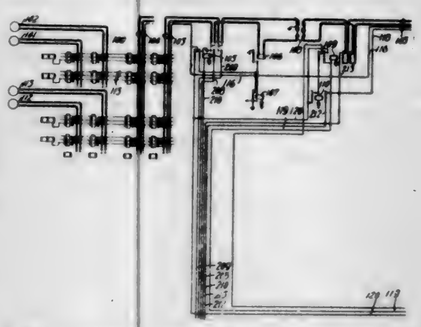
**1,568,038. AUTOMATIC TELEPHONE SYSTEM.** SAMUEL B. WILLIAMS, Jr., Brooklyn, N. Y. and EARL S. GIBSON, Ridgewood, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Sept. 7, 1922. Serial No. 586,623. 31 Claims. (Cl. 179—17.)

1. In a telephone system, telephone lines, automatic switching means including metallic members forming link circuits common to said lines and contacts adapted to be moved into engagement with said members, means for controlling said switching means to interconnect said lines by causing said contacts to engage said members, means for supplying current for talking purposes to said lines through said contacts and members, means for disengaging said contacts from said members, and means for disconnecting said current supply means from said members and contacts before they are disengaged.



---

**1,568,039. TELEPHONE-EXCHANGE SYSTEM.** SAMUEL B. WILLIAMS, Jr., Brooklyn, and EDWARD E. HINRICHSEN, New York, N. Y., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Nov. 6, 1922. Serial No. 599,192. 22 Claims. (Cl. 179—18.)



1. In a telephone system, a group of circuits, a number of switches, each having access to said circuits, a common testing mechanism, means for connecting said mechanism to and disconnecting the same from the circuits of said group for testing the same, means for associating the mechanism with any of said switches, and means for operating the associated switch to select one of said circuits.

---

# ALPHABETICAL LIST OF REGISTRANTS OF TRADE-MARKS.

Acme Fruit Packing Co., Inc., New York, N. Y. Dried figs. 206,407; Dec. 1; Serial No. 215,887; published Sept. 22, 1925.

Acme Milling Company, assignor to Acme-Evans Company, Indianapolis, Ind. Wheat flour. 48,975; renewed Jan. 16, 1926.

Actinium Developments Limited, London, England. Mineral waters. 206,389; Dec. 1; Serial No. 218,588; published Sept. 22, 1925.

Addac Company, Grand Rapids, Mich. Computing machines. 206,429; Dec. 1; Serial No. 214,837; published Sept. 22, 1925.

Adler, Adam N., Evansville, Ind. Sandwich dressing. 206,405; Dec. 1; Serial No. 216,250; published Sept. 22, 1925.

Ainscoe, Charles B., Gulfport, Miss. Skin bleach. 206,518; Dec.

Alberti, Ditta G., Benevento, Italy. Beverage sold as a soft drink. 206,489; Dec. 1; Serial No. 213,955; published Sept. 22, 1925.

Alexander, William L., Emlenton, Pa. Stuffing for leather. 49,026; renewed Jan. 23, 1926.

Allied Fruit & Extract Co., Inc., New York, N. Y. Sirups and extracts used in the preparation of soft drinks. 206,465; Dec. 1; Serial No. 215,956; published Sept. 22, 1925.

American Brass & Copper Company, The. (See Ansonia Brass & Copper Company, assignor.)

American Broom & Brush Co., Amsterdam, N. Y. Brooms. 50,141–2; renewed Mar. 6, 1926.

American Broom & Brush Co., Amsterdam, N. Y. Brooms. 50,206–2; renewed Mar. 6, 1926.

American District Steam Company, North Tonawanda, N. Y. Casings for underground steam mains. 206,445; Dec. 1; Serial No. 216,864; published Sept. 22, 1925.

American Smelting and Refining Company. (See Selby Smelting & Lead Company.)

American Soda Water Company, St. Louis, Mo. Maltless beverage. 206,512; Dec. 1.

American Stores Company, Philadelphia, Pa. Dried beef and sliced bacon. 206,549; Dec. 1.

American Tourists Service, Inc., Racine, Wis. Sandwiches. 206,434; Dec. 1; Serial No. 216,446; published Sept. 22, 1925.

Amsterdam Broom Company, Amsterdam, N. Y. Brooms. 206,534; Dec. 1.

Anakin Specialty Mfg. Co., Inc., Long Beach, Calif. Safe locks, vault locks, door bolts, and door plugs. 206,481; Dec. 1; Serial No. 215,616; published Sept. 22, 1925.

Ansco Photoproducts, Inc., Binghamton, N. Y. Sensitized photographic material, particularly paper. 206,397–9; Dec. 1; Serial Nos. 218,235–7; published Sept. 15, 1925.

Ansonia Brass & Copper Company, The, Ansonia, assignor to The American Brass Company, Waterbury, Conn. Rods, sheets, wire, plates, tubes, ingots, and castings formed of metal alloys. 46,251; renewed Sept. 12, 1925.

Armour and Company, Chicago, Ill. Gut strings for tennis rackets. 206,378; Dec. 1; Serial No. 198,220; published Sept. 22, 1925.

Associated Flour Mills Company, (See Gittlesohn, Nathan.)

Atlas Dye Works, Frankford, Philadelphia, Pa. Raw artificial-silk fiber. 206,368; Dec. 1; Serial No. 211,317; published Sept. 15, 1925.

Atlas Plywood Corporation, Boston, Mass. Packing and shipping cases, shooks, knockdown boxes, etc. 206,550; Dec. 1.

Baldwin, A., & Co., Limited, New Orleans, La. Plows. 50,580; renewed Mar. 27, 1926.

Banner Productions, Inc., New York, N. Y. Motion pictures. 206,367; Dec. 1; Serial No. 211,655; published Sept. 15, 1925.

Barrett-Cravens Company, Chicago, Ill. Lift trucks and portable elevators. 206,524; Dec. 1.

Barrett Potato Chip Company, Atlanta, Ga. Potato chips, salted peanuts, and peanut-butter sandwiches. 206,505; Dec. 1.

Bay City Beverage Co., Bay City, Mich. Birch beer, ginger ale. 206,414; Dec. 1; Serial No. 213,684; published Sept. 29, 1925.

Better Brushes, Inc., Palmer, Mass. Dusters, stove dauber, dry mop, etc. 206,542; Dec. 1.

Big Four Canning Company, Stanley, Wis. Canned peas. 206,428; Dec. 1; Serial No. 214,120; published Sept. 22, 1925.

Birdsey Flour Mills, doing business as Sandford Flour Mills, Macon, Ga. Self-rising wheat flour. 206,451; Dec. 1; Serial No. 217,603; published Sept. 22, 1925

Black, H. L., and Son, Inc., Washington, D. C. Fresh milk and cream. 206,459; Dec. 1; Serial No. 218,101; published Sept. 22, 1925.

Black, H. L., and Son, Inc., Washington, D. C. Fresh milk and cream. 206,464; Dec. 1; Serial No. 218,102; published Sept. 22, 1925.

Blanton, David A., doing business as The Blanton Company, St. Louis, Mo. Prepared shortening, oleomargarine, and salad oil. 206,360; Dec. 1; Serial No. 215,731; published Sept. 22, 1925.

Blue Door Flower Shoppe, Inc., The, Woonsocket, R. I. Flowers, floral pieces, plants, shells, etc. 206,356; Dec. 1; Serial No. 215,197; published Sept. 15, 1925.

Blue Ribbon Products Co., Baltimore, Md. Hop and malt extract. 206,440; Dec. 1; Serial No. 217,891; published Sept. 22, 1925.

Boonville Mineral Spring Company, Boonville, N. Y. Nonalcoholic, maltless carbonated beverages. 206,502; Dec. 1.

Boucher, William, assignor to William Boucher & Sons, Baltimore, Md. Cigars. 50,088; renewed Mar. 6, 1926.

Boutillier, Ernest G., Canton, Mass. Healing salves. 206,541; Dec. 1.

Bray Pictures Corporation, The, New York, N. Y. Moving-picture films. 206,391; Dec. 1; Serial No. 218,535; published Sept. 15, 1925.

Brilliant Silk Mfg. Co., Inc., The. (See Whitney, J. B., assignor.)

Brocton Jelly Products Co., Brocton, N. Y. Fruit concentrate for making jelly. 206,487; Dec. 1; Serial No. 195,860; published Sept. 22, 1925.

Buffalo Dental Manufacturing Co., Buffalo, N. Y. Dental cutters. 46,975; renewed Oct. 17, 1925.

Buffalo Dental Manufacturing Co., Buffalo, N. Y. Thermometer tubes. 47,788; renewed Nov. 21, 1925.

Bunte Brothers, Chicago, Ill. Candy. 206,490; Dec. 1; Serial No. 214,124; published Sept. 22, 1925.

Burke, Frank G.; Manhattan Soap Company, Inc., successor. Laundry and toilet soap. 48,471; renewed Jan. 2, 1926.

Busch, H., & Co. Inc., New York, N. Y. Coffee, tea, rice, and food-flavoring extracts. 206,417; Dec. 1; Serial No. 208,277; published Sept. 22, 1925.

Cabanes, Ricardo, San Antonio, Tex. Medicine for gonorrhea and urinary canals. 206,460; Dec. 1; Serial No. 200,544; published Sept. 8, 1925.

Cabanes, Ricardo, doing business as The Chemical Laboratory, San Antonio, Tex. Medicine for indigestion, chronic constipation, etc. 206,461; Dec. 1; Serial No. 206,655; published Sept. 8, 1925.

Campbell Holton & Co., Bloomington, Ill. Canned fruits. 206,485; Dec. 1; Serial No. 203,509; published Sept. 22, 1925.

Carr, Wm. Cochran, Limited, Newcastle-on-Tyne, England. Fire bricks. 206,379; Dec. 1; Serial No. 202,437; published Sept. 15, 1925.

Carson Pirie Scott & Co., Chicago, Ill. Sanitary napkins. 206,372; Dec. 1; Serial No. 208,639; published Sept. 15, 1925.

Carter's Ink Company, The, Boston, Mass., and New York, N. Y.; The Carter's Ink Company, Cambridge, Mass. Writing inks and writing fluids of all kinds. 48,946; renewed Jan. 16, 1926.

Carter's Ink Company, The, Boston, Mass., and New York, N. Y.; The Carter's Ink Company, Cambridge, Mass. Mucilage, paste, and adhesive cements. 50,451; renewed Mar. 20, 1926.

Centerville Gypsum Company, Centerville, Iowa. Mineral insulating material. 206,345; Dec. 1; Serial No. 212,120; published Aug. 11, 1925.

Chapin-Sacks Corporation, Washington, D. C. Ice cream. 206,499; Dec. 1; Serial No. 217,696; published Sept. 22, 1925.

Chemical Laboratory, The. (See Cabanes, Ricardo.)

Chero-Cola Company, Columbus, Ohio. Beverages and sirups and concentrates for making the same. 206,387; Dec. 1; Serial No. 218,734; published Sept. 22, 1925.

Chicago White Lead & Oil Co., The, Chicago, Ill. Calcimine. 206,478; Dec. 1; Serial No. 217,986; published Sept. 22, 1925.

Chicago White Lead & Oil Co., The, Chicago, Ill. Paint for galvanized iron and other metals. 206,479; Dec. 1; Serial No. 217,989; published Sept. 22, 1925.

Chicago White Lead & Oil Co., The, Chicago, Ill. Paint and varnish removers. 206,480; Dec. 1; Serial No. 217,992; published Sept. 22, 1925.

Chicago White Lead & Oil Co., The, Chicago, Ill. Paints, paint enamels, wood stains, etc. 206,481; Dec. 1; Serial No. 217,993; published Sept. 22, 1925.

Citizens' Wholesale Supply Co., The, Columbus, Ohio. Desiccated cocoanut. 50,251; renewed Mar. 6, 1926.

Reels, Self-winding hose. W. A. Springowski. 206,382; Dec. 1; Serial No. 183,322; published Sept. 22, 1925.

## CLASS 3.

Bags, suitcases, portfolios, brief cases, etc., Traveling. Travelware Company. 206,410; Dec. 1; Serial No. 214,832; published Sept. 29, 1925.
Bits, trace buckles, steel rings, etc. O. B. North & Co. 206,438; Dec. 1; Serial No. 217,178; published Sept. 15, 1925.
Leather goods. C. F. Rumpp & Sons, Inc. 48,912; renewed Jan. 16, 1926.

## CLASS 4.

Liquid dressing for leather boots and shoes. C. L. Hauthaway & Sons, Incorporated. 50,067; renewed Mar. 6, 1926.
Polishes for wood, metal, etc. C. H. Smith & Co. 49,242; renewed Jan. 30, 1926.
Soap. F. G. Burke. 48,471; renewed Jan. 2, 1926.
Soaps. E. A. Olds. 50,334; renewed Mar. 13, 1926.
Stuffing for leather. W. L. Alexander. 49,026; renewed Jan. 23, 1926.

## CLASS 5.

Mucilage, paste, and adhesive cements. Carter's Ink Company. 50,451; renewed Mar. 20, 1926.

## CLASS 6.

Baking and yeast powders. M. C. Young. 45,522; renewed Aug. 22, 1925.
Baking powder. J. C. Grant Chemical Company. 49,861; renewed Feb. 20, 1926.
Dye colors. W. Cushing & Co. 49,184; renewed Jan. 30, 1926.
Earths, Rare. C. F. W. Cook. 206,468; Dec. 1; Serial No. 217,862; published Sept. 8, 1925.
Flavoring extracts, Solvents for. H. H. Fries. 206,539; Dec. 1.
Hair coloring. Imperial Chemical Mfg. Co. 46,329; renewed Sept. 12, 1925.
Liniments and embrocations. W. F. Young. 49,322; renewed Jan. 30, 1926.
Medicated chewing gum. Dental Chemical Company. 206,462; Dec. 1; Serial No. 216,887; published Sept. 15, 1925.
Medicinal and chemical preparations. Dr. D. Jayne & Son. 48,855–7; renewed Jan. 16, 1926.
Medicine for gonorrhea and urinary canals. R. Cabanes. 206,460; Dec. 1; Serial No. 200,544; published Sept. 8, 1925.
Medicine for indigestion, chronic constipation, etc. R. Cabanes. 206,461; Dec. 1; Serial No. 206,655; published Sept. 8, 1925.
Medicine for the treatment of colds, la grippe, and neuralgia. H. E. Roberts. 206,517; Dec. 1.
Powder, Face. J. Tetlow. 50,393; renewed Mar. 13, 1926.
Preparation for the treatment of rheumatism and of kindred diseases. Norwood Pharmaceutical Company. 206,535; Dec. 1.
Preparation used for the treatment of colds and respiratory infections. Klorine Chemical Co. 206,528; Dec. 1.
Remedy, External. T. Mackenzie. 49,571; renewed Feb. 13, 1926.
Salves, Healing. E. G. Boutillier. 206,541; Dec. 1.
Serum for the treatment of pulmonary and surgical tuberculosis. C. Leventis. 206,526; Dec. 1.
Skin bleach. C. B. Ainscoe. 206,518; Dec. 1.
Starch. E. R. Durkee & Co. 47,743–4; renewed Nov. 21, 1925.
Tablets, Laxative. G. D. Searle & Co., Inc. 206,377; Dec. 1; Serial No. 200,014; published July 28, 1925.
Throat and mouth wash. Dr. W. M. Clawson. 206,360; Dec. 1; Serial No. 211,903; published July 28, 1925.
Tonic, Health-building. Delacroix Laboratories Inc. 206,551; Dec. 1.
Vermifuge. B. A. Fahnestock Co. 49,149; renewed Jan. 23, 1926.

## CLASS 9.

Cartridges. Selby Smelting & Lead Company. 46,247–9; renewed Sept. 12, 1925.
Cartridges. Selby Smelting and Lead Company. 48,217; renewed Dec. 19, 1925.
Cartridges. Selby Smelting and Lead Company. 48,379; renewed, Dec. 26, 1925.

## CLASS 10.

Fertilizers. Federal Chemical Co. 48,476; renewed Jan. 2, 1926.
Fertilizers. Summers Fertilizer Company. 206,424; Dec. 1; Serial No. 210,586; published Sept. 22, 1925.

## CLASS 11.

Inks and writing fluids of all kinds, Writing. Carter's Ink Company. 48,946; renewed Jan. 16, 1926.

## CLASS 12.

Brick and tile. Western Brick Company. 206,443; Dec. 1; Serial No. 217,744; published Sept. 22, 1925.
Bricks, Fire. Wm. Cochran Carr, Limited. 206,379; Dec. 1; Serial No. 202,437; published Sept. 15, 1925.
Cedar wood. D. C. Kinnell. 206,425; Dec. 1; Serial No. 211,790; published Sept. 22, 1925.
Cement, High-temperature. King Refractories Company. 206,411; Dec. 1; Serial No. 214,482; published Sept. 22, 1925.
Cement, Hydraulic. Western States Chemical Products Company. 206,371; Dec. 1; Serial No. 207,319; published Sept. 15, 1925.
Composition for patching cement and concrete surfaces. Sullivan Company. 206,531; Dec. 1.
Compounds for waterproofing and dampproofing and for technical paints. Eternite Chemical Products Corporation. 206,349; Dec. 1; Serial No. 213,960; published Sept. 15, 1925.

Insulating material. Centerville Gypsum Company. 206,345; Dec. 1; Serial No. 212,120; published Aug. 11, 1925.
Partition blocks, Composition. United States Gypsum Company. 206,419; Dec. 1; Serial No. 200,465; published Sept. 22, 1925.
Slate products. Structural Slate Co. 206,468; Dec. 1; Serial No. 216,232; published Sept. 15, 1925.
Steam mains, Casings for underground. American District Steam Company. 206,445; Dec. 1; Serial No. 216,864; published Sept. 22, 1925.
Stucco material, Magnesia-base. Made-Rite Products Co. 206,455; Dec. 1; Serial No. 217,794; published Sept. 22, 1925.
Stucco material, Portland-cement-base. Made-Rite Products. 206,444; Dec. 1; Serial No. 217,792; published Sept. 22, 1925.

CLASS 13.

Alloys, rods, sheets, wire, plates, etc., formed of metal. Ansonia Brass & Copper Company. 46,251; renewed Sept. 12, 1925.
Door holders, Garage. Gesing Brothers Company. 206,471; Dec. 1; Serial No. 216,829; published Sept. 15, 1925.
Dustpans. Mrs. V. A. Wheeler. 206,476; Dec. 1; Serial No. 217,379; published Sept. 15, 1925.
Fencing Wire. Pittsburgh Steel Company. 206,376; Dec. 1; Serial No. 201,375; published Sept. 15, 1925.
Heel protectors. F. W. Whitcher, 50,599; renewed Mar. 27, 1926.
Ladders and trestles, Rubber shoes for. W. A. Lohiker. 206,544; Dec. 1.
Metal ornaments. C. F. Rumpp & Sons, Inc. 48,913; renewed Jan. 16, 1926.
Pipe fittings and valves. Walworth Manufacturing Company. 206,473; Dec. 1; Serial No. 217,123; published Sept. 15, 1925.
Sash adjusters. W. E. Putnam Co. 206,477; Dec. 1; Serial No. 217,956; published Sept. 15, 1925.
Weights, Cattle-horn. A. A. Courtney. 206,396; Dec. 1; Serial No. 218,294; published Sept. 15, 1925.

CLASS 14.

Alloys, Metal. N. V. Hybinette. 206,484; Dec. 1; Serial No. 218,183; published Sept. 15, 1925.
Alloys, Metallic. Gotthardwerke Aktiengesellschaft für Elektrochemische Industrie. 206,412–13; Dec. 1; Serial Nos. 213,782–3; published Sept. 22, 1925.
Castings, Steel. Nugent Steel Castings Company. 206,475; Dec. 1; Serial No. 217,288; published Sept. 15, 1925.
Copper and ingots and castings thereof and wire drawn from the said metal, Hardened. S. R. Dawson. 206,365; Dec. 1; Serial No. 168,874; published Sept. 15, 1925.
Ferrous sheets. Inland Steel Company. 206,350; Dec. 1; Serial No. 214,161; published Sept. 15, 1925.
Gaggers. Franklin Core Rod & Gagger Company. 206,540; Dec. 1.
Iron and steel sheets and plates. Wheeling Steel Corporation. 206,472; Dec. 1; Serial No. 217,001; published Sept. 15, 1925.
Solder. Waterbury Brass Goods Corporation. 206,474; Dec. 1; Serial No. 217,194; published Sept. 15, 1925.
Steel in bars. Poldi Steel Corporation of America. 206,442; Dec. 1; Serial No. 217,736; published Sept. 22, 1925.

CLASS 15.

Gasoline, kerosene, fuel oil, etc. Gilmore Oil Company. 206,525; Dec. 1.
Oil, Lubricating. J. Wing. 51,258; renewed Apr. 10, 1926.

CLASS 16.

Calcimine. Chicago White Lead & Oil Co. 206,478; Dec. 1; Serial No. 217,986; published Sept. 22, 1925.
Oil, Linseed. Portland Linseed Oil Works, Inc. 206,482; Dec. 1; Serial No. 218,142; published Sept. 22, 1925.
Paint and varnish removers. Chicago White Lead & Oil Co. 206,480; Dec. 1; Serial No. 217,992; published Sept. 22, 1925.
Paint for galvanized iron, etc. Chicago White Lead & Oil Co. 206,479; Dec. 1; Serial No. 217,989; published Sept. 22, 1925.
Paint pigments. Lowe Brothers Company. 47,016; renewed Oct. 17, 1925.
Paints, paint enamels, wood stains, etc. Chicago White Lead & Oil Co. 206,481; Dec. 1; Serial No. 217,993; published Sept. 22, 1925.
Paints, primers, varnishes, enamels, etc. Glidden Company. 206,852; Dec. 1; Serial No. 214,956; published Sept. 22, 1925.
Polishes. Instant Products Co. 206,394; Dec. 1; Serial No. 218,414; published Sept. 22, 1925.
Varnish and japan. Mayer & Loewenstein. 48,179; renewed Dec. 12, 1925.
Varnishes and japans. Valentine & Company. 50,705; renewed Mar. 27, 1926.

CLASS 17.

Cigars. W. Boucher. 50,088; renewed Mar. 6, 1926.
Cigars. Y. Pendas & Alvarez. 46,581; renewed Sept. 26, 1925.
Cigars. Schwabacher Bros & Co. 206,393; Dec. 1; Serial No. 218,432; published Sept. 22, 1925.
Cigars, Havana. Havana Commercial Company. 51,237; renewed Apr. 10, 1926.
Cigars, Havana. Havana Commercial Company. 51,291; renewed Apr. 10, 1926.
Tobacco, Plug cut plug, and smoking. Joseph G. Dill, Inc. 45,241; renewed Aug. 8, 1925.

CLASS 19.

Automobile bumpers. C. Offenhauser. 206,357; Dec. 1; Serial No. 215,588; published Sept. 15, 1925.

CLASS 22.

Baseballs, baseball bats, volley balls, etc. Shulman & Sons. 206,511; Dec. 1.
Bow staves, arrows, bats, etc. International Agencies of Schaefer & Hamilton. 206,446; Dec. 1; Serial No. 216,912; published Sept. 29, 1925.
Footballs, handballs, tennis rackets, golf sticks, etc. John Wanamaker, Philadelphia. 206,545; Dec. 1.
Footballs, tennis balls, dumb-bells, etc. John Wanamaker, Philadelphia. 206,507–10; Dec. 1.
Game box with a squeaker inclosed. Daly-Fetherston Corp. 206,362; Dec. 1; Serial No. 215,738; published Sept. 22, 1925.
Game, Fortune-telling. W. W. Long. 206,420; Dec. 1; Serial No. 187,111; published Sept. 29, 1925.
Game, Table board. Daly-Fetherston Corp. 206,361; Dec. 1; Serial No. 215,737; published Sept. 22, 1925.
Gut strings. Armour and Company. 206,378; Dec. 1; Serial No. 198,220; published Sept. 22, 1925.
Sleds and coaster wagons. Marshall-Wells Company. 206,390; Dec. 1; Serial No. 218,562; published Sept. 22, 1925.

CLASS 23.

Letter-embossing machines, addressing machines, etc. Pollard-Alling Manufacturing Company. 206,519; Dec. 1.
Metal specialties and mill supplies, Flat. Franklin Needle Company. 206,532; Dec. 1.
Plows. A. Baldwin & Co. Limited. 50,580; renewed Mar. 27, 1926.
Saw swages. Henry Disston & Sons, Incorporated. 49,711; renewed Feb. 13, 1926.
Saws. Henry Disston & Sons, Incorporated. 49,399–403; renewed Feb. 6, 1926.
Trucks and portable elevators, Lift. Barrett-Cravens Company. 206,524; Dec. 1.

CLASS 25.

Locks and keys. H. Engelbrecht. 206,430; Dec. 1; Serial No. 215,239; published Sept. 22, 1925.
Locks, door bolts, and door plugs, Safe and vault. Anakin Specialty Mfg. Co. 206,431; Dec. 1; Serial No. 215,616; published Sept. 22, 1925.

CLASS 26.

Battery testers. Heyer Products Company. 206,500; Dec. 1; Serial No. 217,876; published Sept. 22, 1925.
Computing machines. Addac Company. 206,429; Dec. 1; Serial No. 214,837; published Sept. 22, 1925.
Drawing instruments. F. Weber Co. 206,406; Dec. 1; Serial No. 215,953; published Sept. 22, 1925.
Photographic material, Sensitized. Ansco Photoproducts, Inc. 206,397–9; Dec. 1; Serial Nos. 218,235–7; published Sept. 15, 1925.
Picture films, Motion-. Metro-Goldwyn Distributing Corporation. 206,370; Dec. 1; Serial No. 209,803; published Sept. 15, 1925.
Picture films, Moving-. Bray Pictures Corporation. 206,391; Dec. 1; Serial No. 218,535; published Sept. 15, 1925.
Pictures, Motion. Banner Productions, Inc. 206,367; Dec. 1; Serial No. 211,655; published Sept. 15, 1925.
Projection apparatus, photographic films, and motion-picture screens. Wyko Projector Corporation. 206,497; Dec. 1; Serial No. 217,438; published Sept. 22, 1925.
Thermometer tubes. Buffalo Dental Manufacturing Co. 47,788; renewed Nov. 21, 1925.

CLASS 29.

Brooms. American Broom & Brush Co. 50,141–2; renewed Mar. 6, 1926.
Brooms. American Broom & Brush Co. 50,200–2; renewed Mar. 6, 1926.
Brooms. Amsterdam Broom Company. 206,534; Dec. 1.
Brooms, brushes, and mops. Service Grocer Company. 206,404; Dec. 1; Serial No. 216,482; published Sept. 29, 1925.
Brushes. J. Sakabe. 50,342; renewed Mar. 13, 1926.
Dust cloths, dust and water mops, wax spreaders, etc. Rubon Woodfinishing & Products Co. 206,454; Dec. 1; Serial No. 217,685; published Sept. 29, 1925.
Dusters, stove dauber, dry mop, etc. Better Brushes, Inc. 206,542; Dec. 1.

CLASS 31.

Refrigerating machines. Iron Mountain Co. 206,441; Dec. 1; Serial No. 217,463; published Sept. 22, 1925.

Refrigerators. Lacross Refrigerator Corporation. 206,418; Dec. 1; Serial No. 202,125; published Sept. 22, 1925.

CLASS 33.

Glass chimneys, lantern globes, and reflectors. Gill Brothers Company. 47,934; renewed Nov. 28, 1925.

CLASS 34.

Burners, Oil. S-K Oil Burner Corporation. 206,358; Dec. 1; Serial No. 215,656; published Aug. 11, 1925.
Heating apparatus. Gorton & Lidgerwood Co. 206,466; Dec. 1; Serial No. 216,039; published Sept. 15, 1925.
Stoves, furnaces, and ranges, and all parts. Detroit Stove Works. 47,100; renewed Oct. 24, 1925.

CLASS 35.

Cold patches, blow-out patches, and boots. J. R. Lawson. 206,522; Dec. 1.
Hose, Fabric. Eureka Fire Hose Company. 47,006; renewed Oct. 17, 1925.
Hose, Hydraulic. Eureka Fire Hose Co. 46,677; renewed Oct. 3, 1925.
Tire-repair kits. Western States Mfg. Co. 206,346; Dec. 1; Serial No. 212,310; published Sept. 15, 1925.

CLASS 37.

Paper, Toilet. Hochschild, Kohn & Company. 206,369; Dec. 1; Serial No. 210,554; published Aug. 18, 1925.

CLASS 38.

Dictionaries. G. & C. Merriam Company. 50,645–6; renewed Mar. 27, 1926.
Publication, Periodical. G. Djamgaroff. 206,359; Dec. 1; Serial No. 215,683; published July 28, 1925.

CLASS 39.

Bathing suits, knitted dresses, etc., Knitted. Mission Knitting Works. 206,348; Dec. 1; Serial No. 213,851; published Sept. 1, 1925.
Boots, shoes, and slippers, Leather. Preston B. Keith Shoe Co. 50,659; renewed Mar. 27, 1926.
Corsets. Chas. A. Stevens & Bros. 46,590; renewed Sept. 26, 1925.
Hosiery. Mascot Knitting Mills. 45,530; renewed Aug. 22, 1925.
Shirts. Cluett, Peabody & Co. Inc. 206,530; Dec. 1.

CLASS 42.

Cotton piece goods. Marshall Field & Company. 206,538; Dec. 1.
Cotton piece goods. Massachusetts Cotton Mills. 46,905; renewed Oct. 17, 1925.
Cotton piece goods. Massachusetts Cotton Mills. 46,907–8; renewed Oct. 17, 1925.
Cotton piece goods. Massachusetts Cotton Mills. 47,008; renewed Oct. 17, 1925.
Cotton piece goods. Tremont & Suffolk Mills. 49,319; renewed Jan. 30, 1926.
Cotton piece goods. Tremont & Suffolk Mills. 49,750; renewed Feb. 13, 1926.
Crêpe in the piece, All-cotton. Ludlum & Carland. 206,546; Dec. 1.
Shirtings and sheetings, cambrics, and long cloth. Grinnell Willis & Co. 50,432–5; renewed Mar. 13, 1926.
Silk piece goods and silk and cotton piece goods. Susquehanna Silk Mills. 206,504; Dec. 1.
Silks. J. B. Whitney. 46,734; renewed Oct. 3, 1925.

CLASS 43.

Thread. Nonotuck Silk Company. 50,194; renewed Mar. 6, 1926.
Yarns, Worsted. S. B. & B. W. Fleisher, Incorporated. 50,388; renewed Mar. 13, 1926.

CLASS 44.

Appliance for holding the mouth closed while sleeping and also for holding back the ears. S. M. Montgomery. 206,501; Dec. 1; Serial No. 217,891; published Sept. 22, 1925.
Arch supports, heel rests, etc. Wizard Lightfoot Appliance Company. 206,483; Dec. 1; Serial No. 218,149; published Sept. 15, 1925.
Cotton, Absorbent. Lewis Manufacturing Company. 206,513–15; Dec. 1.
Dental cutters. Buffalo Dental Manufacturing Co. 46,975; renewed Oct. 17, 1925.
Lamps and bulbs therefor used for medicinal purposes. S. W. Farber, Inc. 206,496; Dec. 1; Serial No 217,397; published Sept. 22, 1925.
Life belt and heat pad. G. Wilshire. 206,401; Dec. 1; Serial No. 218,348; published Sept. 15, 1925.
Massage devices. Frances Jordan, Incorporated. 206,495; Dec. 1; Serial No. 217,278; published Sept. 22, 1925.
Resorbent tamponade. Pearson & Co. Aktiengesellschaft. 206,498; Dec. 1; Serial No. 217,526; published Sept. 22, 1925.
Sanitary napkins. Carson Pirie Scott & Co. 206,372; Dec. 1; Serial No. 208,639; published Sept. 15, 1925.
Serviettes. E. B. Thomas. 206,347; Dec. 1; Serial No. 213,540; published Sept. 15, 1925.
Surgical supplies and hospital equipment, Hospital. Jamison-Semple Co. 206,380; Dec. 1; Serial No. 203,573; published Sept. 15, 1925.
Teething rings. Julius Schmid, Inc. 206,458; Dec. 1; Serial No. 217,900; published Sept. 22, 1925.
Violet-ray tubes and lamps, Ultra-. L. Slominski. 206,469; Dec. 1; Serial No. 216,747; published Sept. 15, 1925.

CLASS 45.

Beverage. American Soda Water Company. 206,512; Dec. 1.
Beverage. Ditta Giuseppe Alberti. 206,489; Dec. 1; Serial No. 213,955; published Sept. 22, 1925.
Beverage sold as a soft drink. G. E. Hinson. 206,351; Dec. 1; Serial No. 214,866; published Sept. 22, 1925.
Beverages. Boonville Mineral Spring Company. 206,502; Dec. 1.
Beverages. Cresta Blanca Liquid Sunshine, Inc. 206,503; Dec. 1.
Beverages. Dixie Coca Cola Bottling Works. 206,470; Dec. 1; Serial No. 216,824; published Sept. 15, 1925.
Beverages. J. Murray. 206,386; Dec. 1; Serial No. 218,866; published Sept. 22, 1925.
Beverages and sirups and concentrates for making the same. Chero-Cola Company. 206,387; Dec. 1; Serial No. 218,734; published Sept. 22, 1925.
Beverages sold as soft drinks. S. D. Lefas. 206,395; Dec. 1; Serial No. 218,315; published Sept. 22, 1925.
Beverages sold as soft drinks and sirups for making the same. Southern Beverage Company. 206,400; Dec. 1; Serial No. 218,219; published Sept. 22, 1925.
Birch beer, and ginger ale. Bay City Beverage Co. 206,414; Dec. 1; Serial No. 213,684; published Sept. 29, 1925.
Ginger ale. Rycroft Artic Soda Co., Limited. 206,506; Dec. 1.
Grape juice. Henry Soodsma & Company. 206,385; Dec. 1; Serial No. 218,878; published Sept. 22, 1925.
Grape juice and ginger ale. Schloss & Kahn Grocery Co. 206,388; Dec. 1; Serial No. 218,667; published Sept. 22, 1925.
Mineral water. Paulson Medicinal Well Company. 206,456; Dec. 1; Serial No. 217,797; published Sept. 29, 1925.
Mineral waters. Actinium Developments, Limited. 206,389; Dec. 1; Serial 218,588; published Sept. 22, 1925.
Sirups and extracts used in the preparation of soft drinks. Allied Fruit & Extract Co. 206,465; Dec. 1; Serial No. 215,956; published Sept. 22, 1925.

CLASS 46.

Baker, David, New Castle, New South Wales, Australia. Furnace charging. 1,563,949; Dec. 1.
Baker, Francis G., New York, N. Y. Galloping tricycle horse. 1,563,318; Dec. 1.
Baldesberger, August, Pittsburgh, Pa. Apparatus for pressing and creasing trousers. 1,563,825; Dec. 1.
Ballou, B. A., & Co. Inc. (See Morehouse, Eugene, assignor.)
Ballou, John M. (See Balzer, V. W., and Ballou.)
Balmer, J. H., Co. (See Balmer, John H., assignor.)
Balmer, John H., Maplewood, assignor to J. H. Balmer Co., Newark, N. J. Toothbrush rack. 1,564,119; Dec. 1.
Balzer, Vernon W., and J. M. Ballou, assignors to T. Coolidge, Los Angeles, Calif. Control means. 1,563,950; Dec. 1.
Bancel, Paul A., Nutley, assignor to Ingersoll-Rand Company, Jersey City, N. J. Surface condenser. 1,563,951; Dec. 1.
Barker, Gerald, London, England. Spring suspension for vehicles. 1,563,952; Dec. 1.
Barks, Walter B., assignor to The D. L. Auld Company, Columbus, Ohio. Escutcheon plate for radiopanel. Des. 68,887; Dec. 1.
Barnhill, Cleo E., San Francisco, Calif. Desiccating eggs. 1,563,953; Dec. 1.
Barnitt, Jesse B., Jamaica, assignor of one-half to R. H. McKee, New York, N. Y. Treatment of chocolate. 1,563,682; Dec. 1.
Bartlebaugh, Benjamin C., Wheeling, W. Va. Gas heater. 1,563,890; Dec. 1.
Barton, Joseph M., Tulsa, Okla. Thimble. 1,563,954; Dec. 1.
Barton, Samuel R., Prince Bay, N. Y., assignor to The S. S. White Dental Manufacturing Company. Impression tray. 1,563,955; Dec. 1.
Bassick Manufacturing Company. (See Zerk, Oscar, assignor.)
Bates, Bertram P., Chicago, Ill. Pump. 1,563,319; Dec. 1.
Bates, George T., assignor to Illinois Watch Case Company, Elgin, Ill. Vanity case. 1,563,956; Dec. 1.
Bates, Wells H., Los Angeles, Calif. Process and apparatus for precipitating gold from solutions. 1,563,957; Dec. 1.
Beattie, Kenneth P., Hopkins, Mich., assignor to The Taylor Smith & Taylor Company, East Liverpool, Ohio. Sugar bowl or similar article. Des. 68,888; Dec. 1.
Beattie, Kenneth P., Hopkins, Mich., assignor to The Taylor Smith & Taylor Company, East Liverpool, Ohio. Teapot or similar article. Des. 68,889; Dec. 1.
Beattie, Kenneth P., Hopkins, Mich., assignor to The Taylor Smith & Taylor Company, East Liverpool, Ohio. Creamer. Des. 68,890; Dec. 1.
Beattie, Kenneth P., Hopkins, Mich., assignor to The Taylor Smith & Taylor Company, East Liverpool, Ohio. Casserole or similar article. Des. 68,891; Dec. 1.
Beattie, Kenneth P., Hopkins, Mich., assignor to The Taylor Smith & Taylor Company, East Liverpool, Ohio. Teacup. Des. 68,892; Dec. 1.

Beattie, Kenneth P., Hopkins, Mich., assignor to The Taylor Smith & Taylor Company, East Liverpool, Ohio. Plate. Des. 68,893; Dec. 1.

Beck, Charles W., Toledo, Ohio, assignor to The Beck Frost Corporation, Detroit, Mich. Tire valve. 1,563,320; Dec. 1.

Beck Frost Corporation, The. (See Beck, Charles W., assignor.)

Beckwith, James E., Tampa, Fla. Vehicle jack. 1,564,120; Dec. 1.

Bedortha, George Q., Windsor, Conn. Spirit-level glass. 1,563,321; Dec. 1.

Bell, John E. (See Isom, E. W., and Bell.)

Beloit Iron Works. (See Berry, Earl E., assignor.)

Bélugou, Léon, Paris, France. Photographic apparatus for checking the aiming and firing operations on board aircraft. 1,563,463; Dec. 1.

Benolken, Frank A., Helena, Mont. Superheater construction for locomotives. 1,563,683; Dec. 1.

Berger, Kornel C., New York, N. Y. Lamp-shade frame. 1,564,170; Dec. 1.

Berger, Nathan I., assignor to Sandow Tool Co. U. S. A., New York, N. Y. Arm for lighting fixture. Des. 68,894; Dec. 1.

Berger, Nathan I., assignor to Sandow Tool Co. U. S. A., New York, N. Y. Plate for lighting fixture. Des. 68,895; Dec. 1.

Bergstein, Samuel, assignor to The Interstate Folding Box Company, Middletown, Ohio. Paper folding box. 1,563,322; Dec. 1.

Bergstein, Samuel, Assignor to The Interstate Folding Box Company, Middletown, Ohio. Paper-box-making machine and the like. 1,563,323; Dec. 1.

Berk, William, assignor to American Auto Lamp Company, Inc., New York, N. Y. Automobile signal-lamp casing. Des. 68,896; Dec. 1.

Bernert, George, Milwaukee, Wis. Conveyer apparatus for grain and like material. 1,563,826; Dec. 1.

Berry, Earl E., assignor to Beloit Iron Works, Beloit, Wis. Chain drive for drying cylinders. 1,563,324; Dec. 1.

Berry, Henry R., et al. (See Primm, Joseph P., assignor.)

Berry, John M., et al. (See Primm, Joseph P., assignor.)

Bethlehem Steel Company. (See Froelich, Clarence H., assignor.)

Beugler, Edwin F., assignor to E. & B. Holmes Machinery Company, Buffalo, N. Y. Heading holder for barrel-making machines. 1,564,043; Dec. 1.

Bielaski, Frank, Detroit, Mich. Saw-table guide. 1,563,325; Dec. 1.

Bisland, Chester W., Fremont, Nebr. Gasket for jar covers. 1,563,464; Dec. 1.

Black, John E., Mendota, Ill. Veneer press and the like. 1,563,684; Dec. 1.

Blakeslee, Orrin C., Compton, Calif. Adjustable automatic pressure-relief valve. 1,563,545; Dec. 1.

Blevins, Ira V., assignor of one-half to J. W. Whitlow, Trammel, Va. Automatic shutter. 1,564,121; Dec. 1.

Blue, Louis V., Elkton, Md. Handle-polishing machine. 1,563,714; Dec. 1.

Bodman, Walter L. (See Gettings, S. S., and Bodman.)

Boggio, Giusto, Royalton, Ill. Automatic mine door. 1,563,827; Dec. 1.

Bosca, Colombo, Webb City, Mo. Leather. Des. 68,897; Dec. 1.

Boston Wire Stitcher Company. (See Maynard, Arthur H., assignor.)

Bosworth, Alfred W., and L. H. Chrysler, Columbus, Ohio. Treating milk. 1,563,891; Dec. 1.

Bouillon, Constant, assignor to The Hendey Machine Company, Torrington, Conn. Electric-motor-driven change-speed device. 1,563,546; Dec. 1.

Boulanger, Charles, assignor to Societe Anonyme Anciens Etablissements Georges Pellerin, Malaunay, France. Packing machine. 1,563,715; Dec. 1.

Bourne, Stephen, New York, N. Y., assignor to Brandes Laboratories Inc., Newark, N. J. Base for a loud speaker for radioreproducers. Des. 68,898; Dec. 1.

Bovee, Ransom Y., Maywood, assignor to Bovee Transmission Corporation, Chicago, Ill. Spring suspension for vehicles. 1,563,547; Dec. 1.

Bovee Transmission Corporation. (See Bovee, Ransom Y., assignor.)

Bown, Ralph, East Orange, N. J., assignor to American Telephone and Telegraph Company. Secret-communication system. 1,563,326; Dec. 1.

Boxer, Maurice, and W. C. Nicholson, San Francisco, Calif. Display casing. Des. 68,899; Dec. 1.

Boye, James H., assignor to James H. Boye Manufacturing Company, Chicago, Ill. Combined shade-roller and curtain-rod support. 1,563,828; Dec. 1.

Boye, James H., Manufacturing Company. (See Boye, James H., assignor.)

Boys, Sidney J., Walsall, England. Self-loading and tipping wagon. 1,563,685; Dec. 1.

Brackett, Quincy A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Relay system. 1,563,327; Dec. 1.

Bradbury, Clifford C., assignor, by mesne assignments, to C. B. Camp, trustee, Oak Park, Ill. Combined oil and vacuum pump. 1,563,328; Dec. 1.

Bradshaw, Claude, assignor of one-third to A. E. Harmon and one-third to S. T. Gunn, Portsmouth, Va. Railway crossing gate. 1,563,329; Dec. 1.

Brady, John B., Somerset, Md., assignor to Morkrum Company, Chicago, Ill. Radio receiving system. 1,563,958; Dec. 1.

Brandes Laboratories, Inc. (See Bourne, Stephen, assignor.)

Bras, John H., et al. (See Johnson, Otto W., assignor.)

Brashear, Walter, jr., assignor to Fort Orange Paper Company, Castleton-on-Hudson, N. Y. Animated toy. 1,563,548; Dec. 1.

Breier, Benjamin, Brooklyn, N. Y. Shirt. Des. 68,900; Dec. 1.

Breisch, Edgar W., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Mercury-rectifier starting device. 1,563,330; Dec. 1.

Breitenstein, Arthur L., Akron, Ohio. Attachment for mold-engraving machine. 1,563,465; Dec. 1.

Brewster, Percy D., East Orange, N. J., Printing color cinematographic films. 1,563,959; Dec. 1.

Briggs, Frank S., Niagara-on-the-Lake, Ontario, Canada. Paper-hanger's tool. 1,563,716; Dec. 1.

Bricht, George B., assignor to Detroit Ice Machine Co., Detroit, Mich. Air system for ice-freezing plants. 1,563,331; Dec. 1.

Brinkerhoff, Josiah, et al. (See Walter, Ira D., assignor.)

Bristow, Francis G., Sydney, Australia. Adapter for sheep shears. 1,563,332; Dec. 1.

Bristow, Francis G. W., Sydney, Australia, assignor to Chicago Flexible Shaft Company, Chicago, Ill. Sheep shear. 1,563,549; Dec. 1.

Brockhurst, James B., Red Bank, N. J. Nonskid demountable tread for vehicle wheels. 1,563,960; Dec. 1.

Bronander, Wilhelm B., Montclair, N. J., assignor to International Cigar Machinery Company. Cigar-bunch-charge former. 1,563,333; Dec. 1.

Bronander, Wilhelm B., Montclair, N. J., assignor to American Machine & Foundry Company. Cigarette-machine automatic feed. 1,563,334; Dec. 1.

Brown, Alexander T., Syracuse, N. Y. Apparatus for casting engine cylinders. 1,563,717; Dec. 1.

Brown, Barney R., Heber Springs, Ark. Radiator-cap ornament or similar article. Des. 68,901; Dec. 1.

Brown, Carl D., assignor to Draper Corporation, Hopedale, Mass. Shedding machine for looms. 1,563,681; Dec. 1.

Brown, Earl D., Riverbank, Calif. Automatic train-stopping apparatus. 1,563,550; Dec. 1.

Brown, F. G., Manufacturing Co. (See Brown, Frederick G., assignor.)

Brown, Fay J., Shreveport, La. Spiral reflex condenser. 1,563,718; Dec. 1.

Brown, Frederick G., Coogee, New South Wales, Australia, assignor to F. G. Brown Manufacturing Co., Batavia, Ill. Floor polisher. 1,563,829; Dec. 1.

Brown, Lott D. (See French, C. D., and Brown.)

Brown, Roy W., assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Mill-roll-cooling device. 1,564,171; Dec. 1.

Brown, Sandford, Newark, N. J., assignor, by mesne assignments, to Halowax Corporation, New York, N. Y. Chlorination apparatus. 1,564,044; Dec. 1.

Brown, William M., Johnstown, Pa. Dump car. 1,563,830; Dec. 1.

Buckler, Charles B., Camden, N. J. Spring suspension for motor vehicles. 1,563,335; Dec. 1.

Buckley, Joseph L., Trenton, N. J., assignor, by mesne assignments, to Proctor & Schwartz, Incorporated, Philadelphia, Pa. Drying apparatus. 1,563,961; Dec. 1.

Bucyrus Company. (See Hoar, Roger S., assignor.)

Buford, William J., San Antonio, Tex. Float-operated valve. 1,563,719; Dec. 1.

Bugar, Michael, Cincinnati, Ohio, Helicopter attachment for aeroplanes. 1,563,720; Dec. 1.

Bujol, Orrin J., Estherwood, La. Gauge plate for rails. 1,563,466; Dec. 1.

Bulask, Francis J., assignor to The Pictures Development Co., Toledo, Ohio. Disk-record apparatus. 1,563,551; Dec. 1.

Bultman, Melbrooks B., Sumter, S. C. Stamp holder. 1,563,686; Dec. 1.

Burnham, George A., Saugus, assignor, by mesne assignments, to Condit Electrical Manufacturing Corporation, Boston, Mass. Attachment for electric switches. 1,563,831; Dec. 1.

Burnham, Leland F., Pittsburgh, Pa., assignor to R. D. Nuttall Company. Trolley. 1,563,336; Dec. 1.

Burrell, Robert, New Haven, Conn. Sled. 1,563,832; Dec. 1.

Busch, Edward H., Kendallville, Ind. Cement trowel. 1,564,172; Dec. 1.

Buss, Gilmore, Sandpoint, Idaho. Rowing machine. 1,563,962; Dec. 1.

Butzbach, Otto, Chicago, Ill., assignor to The Invincible Blow Pipe Company. Washing machine. 1,563,552; Dec. 1.

Byrd, Hugh L., Stockport, England. Drying and heating apparatus. 1,563,963; Dec. 1.

Cadieux, Joseph O., Meriden, Conn., assignor to The Connecticut Telephone & Electric Company, Incorporated. Electric signal switch. 1,563,721; Dec. 1.

California By-Products Company. (See Ovenshire, Clyde A., assignor.)

Camp, Curtis B., trustee. (See Bradbury, Clifford C., assignor.)

Camp, Curtis B., trustee. (See Chandler, Milford G., assignor.)

Campbell, Argyle, assignor to Enterprise Railway Equipment Company, Chicago, Ill. Hopper car and the like. 1,563,553; Dec. 1.

Campbell, Argyle, assignor to Enterprise Railway Equipment Company, Chicago, Ill. Tank-valve mechanism. 1,563,554; Dec. 1.

Campbell, Robert O. H., Jamaica, N. Y. Flush valve. 1,564,122; Dec. 1.

Canias, George K., Philadelphia, Pa. Billiard cue. 1,563,467; Dec. 1.

Caputo, James, Girard, Ohio, assignor to Westinghouse Electric & Manufacturing Company. System of control. 1,563,337; Dec. 1.

Carleton, Mary B. (See Carlson, B. A., and Snow, assignors.)

Carlson, Axel F., Cambridge, assignor to Reece Shoe Machinery Company, Boston, Mass. Lasting machine. 1,563,964; Dec. 1.

Carlson, Bessie A., and O. R. Snow, assignors of three-fourths to said B. A. Carlson and one-fourth to M. B. Carleton, Newcastle, Wyo. Sifter. 1,563,722; Dec. 1.

Carr, M. W., & Company. (See Whitcomb, Herbert H., assignor.)

Carranza, Marcelino, Buenos Aires, Argentina. Carpet-manufacturing machine. 1,563,338; Dec. 1.

Carreau, Napoléon, jr., Wichita, Kans. Spherometer. 1,563,468; Dec. 1.

Caton, Charles H., Armley, near Leeds, England. Change-speed gearing. 1,563,723; Dec. 1.

Chamberlin, Edwin S., Dayton, Ohio. Display rack. 1,563,469; Dec. 1.

Chandler, Milford G., Chicago, assignor, by mesne assignments, to C. B. Camp, trustee, Oak Park, Ill. Carburetor. 1,563,339; Dec. 1.

Chaney, John H., Baltimore, Md. Display stand. 1,563,687; Dec. 1.

Charpentier, Paul, assignor to Forges & Ateliers de Constructions Electriques de Jeumont, Societe Anonyme, Paris, France. Electric-circuit breaker. 1,563,688; Dec. 1.

Chateaugay Ore & Iron Co. (See Linney, Joseph R., assignor.)

Cheatham Electric Switching Device Co. (See Robinson, Robert M., assignor.)

Chemische Fabrik Griesheim-Elektron. (See Speketer, Heinrich, assignor.)

Chicago Flexible Shaft Company. (See Bristow, Francis G. W., assignor.)

Chicago Railway Signal and Supply Company. (See McCarthy, Daniel J., assignor.)

Chisam, Ray C., The Dalles, Oreg. Convertible stock car. 1,563,470; Dec. 1.

Christensen, Christen, assignor to Electrical Engineer's Equipment Co., Chicago, Ill. High-tension air-break switch. 1,563,833; Dec. 1.

Christenson, Carl, Iola, Wis. Stone picker. 1,563,340; Dec. 1.

Christianson, Andrew, Butler, Pa. Method of and apparatus for making nutless bolts and rivets. 1,563,956; Dec. 1.

Christy Company. (See Christy, Russ J., assignor.)

Christy, Russ J., assignor to Christy Company, Fremont, Ohio. Safety razor. 1,563,724; Dec. 1.

Chrysler, Lewis H. (See Bosworth, A. W., and Chrysler.)

Clark, Edgar H., Richmond Hill, assignor to Western Electric Company, Incorporated, New York, N. Y. Electrical switching mechanism. 1,563,555; Dec. 1.

Clark, Edgar H., Richmond Hill, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. 1,563,566; Dec. 1.

Clark, John, Buffalo, N. Y. Hoisting hook. 1,563,341; Dec. 1.

Clarke, Ira M., New Martinsville, W. Va. Ash tray. Des. 68,902; Dec. 1.

Clarke, Walter E. (See Smith, V. S., and Clarke.)

Clayton, Earl R., and A. H. Kirksey, Los Angeles, Calif. Disk clutch structure. 1,563,892; Dec. 1.

Cleveland, Fred M., Wakefield, Mass., assignor to F. W. Green, Ionia, Mich. Strand-feeding machine. 1,563,725; Dec. 1.

Clement, Hans, New York, N. Y., assignor to General Optical Company, Inc. Diagnostic instrument. 1,563,471; Dec. 1.

Clipper Belt Lacer Co. (See Diamond, James K., assignor.)

Clough, Mooers P., and N. H. Noyes, North Haverhill, N. H. Automobile signal. 1,564,123; Dec. 1.

Coblents, William W., Washington, D. C. Optical means for rectifying alternating currents. 1,563,557; Dec. 1.

Coburn, William, Seattle, Wash. Oiling system. 1,563,558; Dec. 1.

Cohen, Max, Denver, Colo. Eyeshade. 1,563,611; Dec. 1.

Cohen, Samuel, Brooklyn, assignor to General Instrument Corporation, New York, N. Y. Multiple variable condenser. 1,563,893; Dec. 1.

Cohn, Jacob, assignor, by mesne assignments, to Non-Explosive Corporation of America, New York, N. Y. Safety venting attachment for large receptacles containing volatile explosives. 1,563,472; Dec. 1.

Coleman, James W., Montreal, Quebec, Canada. End stiffener for cars. 1,563,834; Dec. 1.

Coleman, James W., Montreal, Quebec, Canada. End construction for cars. 1,563,835; Dec. 1.

Coleman Lamp Company. (See Coleman, William C., assignor.)

Coleman, William C., Wichita, Kans. Centrifugal machine. 1,563,894; Dec. 1.

Coleman, William C., assignor to Coleman Lamp Company, Wichita, Kans. Oven. 1,563,895; Dec. 1.

Coleman, William C., Wichita, Kans. Vibratory separator. 1,563,896; Dec. 1.

Colladay Manufacturing Company. (See Colladay, Thad H., assignor.)

Colladay, Thad H., assignor to Colladay Manufacturing Company, Decatur, Ill. Folding table. 1,563,473; Dec. 1.

Coller, Robert. (See Washington, G., jr., and Coller.)

Colt's Patent Fire Arms Manufacturing Company. (See Tansley, George H., assignor.)

Combustion Engineering Corporation. (See Lundgren, Edwin, assignor.)

Compagnie des Métaux Overpelt-Lommel, Société Anonyme. (See Fassotte, Adolphe D. H. L., assignor.)

Condit Electrical Manufacturing Corporation. (See Burnham, George A., assignor.)

Conley, James S. (See Moore, J. A., and Conley.)

Conlon Corporation. (See Anderson, Carl F., assignor.)

Conlon, Walter J. (See Moran, William F., assignor.)

Connecticut Telephone & Electric Company. (See Cadieux, Joseph O., assignor.)

Conrad, Frank, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Signaling system. 1,563,342; Dec. 1.

Continental Motors Corporation. (See Frederick, Walter A., assignor.)

Cooch, Herbert, South Farnborough, assignor to Vickers Limited, London, England. Measuring electricity. 1,564,045; Dec. 1.

Cooch, Herbert, South Farnborough, assignor to Vickers Limited, Westminster, England. Apparatus for measuring electricity. 1,564,046; Dec. 1.

Cooch, Herbert, South Farnborough, assignor to Vickers Limited, Westminster, England. Apparatus for measuring electricity. 1,564,047; Dec. 1.

Cook, Harvey S., Valparaiso, Ind., assignor to Cook Laboratories, Inc., Chicago, Ill. Medicament-dispensing cartridge. 1,564,048; Dec. 1.

Cook Laboratories, Inc. (See Cook, Harvey S., assignor.)

Cooley, Hiram W., assignor to W. R. Moss, Chicago, Ill. Windshield hinge. 1,563,343; Dec. 1.

Coolidge, Thomas. (See Balzer, V. W., and Ballou, assignors.)

Cooper, George H., Hartford, assignor, by mesne assignments, to N. D. Holbrook, Thomaston, Conn. Operating mechanism for time pieces. 1,564,124; Dec. 1.

Copp, Ralph. (See Kerckhoff, D. C., and Copp.)

Copp, Ralph, assignor to Pevely Dairy Company, St Louis, Mo. Fluid-tight joint. 1,563,836; Dec. 1.

Corbett, Edward L., New York, N. Y. Combined hot and cold water faucet. 1,563,344; Dec. 1.

Corbett, Matt Q. (See Huffman, W. E., Adams, and Corbett.)

Cordwell, George F., London, England. Hockey stick, cricket bat, and like sporting article. 1,564,125; Dec. 1.

Corey, William H., Newport, Me. Nonskid device. 1,563,689; Dec. 1.

Costello, William J., jr., Oakmont, assignor to Verona Tool Works, Pittsburgh, Pa. Rail spring and making same. 1,563,966; Dec. 1.

Courtney, William H., Threerivers, Calif. Scraper. 1,564,126; Dec. 1.

Craig Damper Regulator Company. (See Howse, Curtis L., assignor.)

Craig, Royal V., Annadale, Prince Bay, N. Y. Protective device. 1,564,127; Dec. 1.

Creedy, Frederick, Ilkley, England. Cascade machine. 1,563,474; Dec. 1.

Christiani, Severino, Milan, Italy. System for transmitting energy by means of steam working in a closed cycle. 1,563,690; Dec. 1.

Crittall Casement Window Company. (See Walker, Thomas E., assignor.)

Crittall Manufacturing Company, The. (See Prior, Rufus W., assignor.)

Crompton & Knowles Loom Works. (See Holmes, Elbridge R., assignor.)

Crompton & Knowles Loom Works. (See Paine, Arthur P., assignor.)

Crompton & Knowles Loom Works. (See Ryon, Eppa H., assignor.)

Crum, Roland R., Whittier, Calif. Core drill. 1,563,837; Dec. 1.

Cullen, Russell W., Hyattsville, Md., assignor to American Automobile Association, Washington, D. C. Route sheet. 1,563,967; Dec. 1.

Cunningham, Jesse, Gas City, Ind. Folding ironing board. 1,563,726; Dec. 1.

Curtis, Austen M., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Isochronizing and synchronizing system. 1,563,727; Dec. 1.

Curtis, Robert, sr., assignor of one-half to W. A. Hager, Jersey City, N. J. Sash lock. 1,564,128; Dec. 1.

Curtiss, Nathan A. (See Pierman A. N., and Curtiss.)

Cutler, Arthur E., and P. A. Marsden, Newcastle, New South Wales, Australia. Electric welding apparatus. 1,563,612; Dec. 1.

Daley, James C., assignor to Jefferson Electric Mfg. Co., Chicago, Ill. Mounting for frangible containers and the like. 1,563,838; Dec. 1.

Dallmann Machine & Manufacturing Co. (See Schmidt, W. H., Dallmann, and Mueller, assignors.)

Dallmann, Paul O. (See Schmidt, W. H., Dallmann, and Mueller.)

Daniels, Samuel. (See Johnson, J. B., and Daniels.)

Darby, James K., Dayton, Ohio, assignor to The Bagley and Sewall Company, Watertown, N. Y. Paper-making machine. Re16,218; Dec. 1.

Davies, Caleb, jr., Poland, Ohio. Open-hearth furnace. 1,564,049; Dec. 1.

Davis & Geck. (See Ovington, Edward J., assignor.)

Davis, James M., and C. V. Thomas, Newberry, S. C. Thin-place detector for looms. 1,564,129; Dec. 1.

Davis, Ray P. M. (See McClelland, William H., assignor.)

De Coin, Salvatore, San Jose, Calif. Water-closet. 1,563,691; Dec. 1.

De France, Murrell R., Bellevue, Pa. Shell for composition brake shoes. 1,563,728; Dec. 1.

Delano, Curtis. (See Price, David R., assignor.)

Denham, Richard, Walthamstow, England. Spring seat and the like. 1,563,692; Dec. 1.

Dennis, Thomas H., Salisbury, Rhodesia. Starting device for internal-combustion engines. 1,563,839; Dec. 1.

Dennison Manufacturing Company. (See Flood, Carl A., assignor.)

Derdoski, John. (See Kuzaroff, Constantine, assignor.)

Detroit Ice Machine Co. (See Bright, George B., assignor.)

Dexter Company, The. (See George, William H., assignor.)

Diamond, James K., assignor to Clipper Belt Lacer Company, Grand Rapids, Mich. Machine for setting or applying belt fasteners and the like. 1,563,345; Dec. 1.

Diamond Match Company, The. (See Linebaugh, Edward R., assignor.)

Diamond Match Company, The. (See Wright, Jacob P., assignor.)

Dickson, George H., Chicago, Ill., assignor to The Babcock & Wilcox Company, Bayonne, N. J. Making boiler baffles. 1,563,968; Dec. 1.

Dickson, George H., Chicago, Ill., assignor to The Babcock & Wilcox Company, Bayonne, N. J. Baffle construction. 1,563,969; Dec. 1.

Dickson, John B., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Treating rubber composition. 1,564,050; Dec. 1.

Dictograph Products Corporation. (See Koch, Henry, assignor.)

Dictograph Products Corporation. (See Koch, H., and Wohlers, assignors.)

Dirks, Henry D., Marion, Iowa. Cotter-pin puller. 1,563,840; Dec. 1.

Dolbear, Clinton E., San Francisco, Calif. Separating soluble salts. 1,563,613; Dec. 1.

Dominion Messenger and Signal Company Limited. (See Hamilton, William R., assignor.)

Dominquez, Alfonso, Berkeley, Calif. Toilet-flushing handle. 1,563,729; Dec. 1.

Downs, Charles R., New Haven, Conn. Composition of Styptics. 1,563,346; Dec. 1.

Draper Corporation. (See Brown, Carl D., assignor.)

Dreher, Charles H., Buffalo, N. Y. Basket. 1,563,730; Dec. 1.

Drennan, James B., Portland, Oreg. Automobile bumper. 1,563,475; Dec. 1.

Drohen, James L., Dunkirk, N. Y. Signal. 1,564,130; Dec. 1.

Drucks, Carl, Berkeley, Calif. Hair protector. 1,563,693; Dec. 1.

Ducas, Charles, New York, N. Y. Electrical apparatus and manufacturing the same. 1,563,731; Dec. 1.

Dunlap, Isaac A., Wichita, Kans. Portable frame structure for automobile engines and power-delivering devices. 1,564,131; Dec. 1.

Dura Company, The. (See Nicholson, Stanley W., assignor.)

Durand Steel Locker Company. (See Vance, Walter N., assignor.)

Durbin, Pius J. (See Major, R., Durbin, and Orr.)

Dyson, Alfred H., Montclair, N. J., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Automatic telephone system. 1,563,347; Dec. 1.

Earl, Leota N., Fort Worth, Tex. Dough and making the same. 1,563,694; Dec. 1.

Economy Engineering Company, The. (See Trenn, Frank W., assignor.)

Ehrgott, Karl, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrically-heated device. 1,563,348; Dec. 1.

Ehrhart, Raymond N., assignor to Elliott Company, Pittsburgh, Pa. Heater for liquids. 1,564,051; Dec. 1.

Ehrhart, Raymond N., Edgewood, assignor to Elliott Company, Pittsburgh, Pa. Condenser. 1,564,052; Dec. 1.

Eichorn, Arthur M., assignor to Evernu Rubber Heel Corporation, New York, N. Y. Rubber-heel tip. 1,563,970; Dec. 1.

Ekman, Andrew, Grand Rapids, Mich. Signal device. 1,563,614; Dec. 1.

Egelson, James E., Ridley Park, Pa., assignor to General Chemical Company, New York, N. Y. Absorbing hydrochloric-acid gas. 1,563,732; Dec. 1.

Electric Water Sterilizer and Ozone Company. (See Hartman, Frank E., assignor.)

Electrical Engineer's Equipment Co. (See Christensen, Christen, assignor.)

Electrical Engineer's Equipment Company. (See Jacobs, Ernest H., assignor.)

Elgin American Manufacturing Co. (See Lester, William H., assignor.)

Elliott Company. (See Ehrhart, Raymond N., assignor.)

Ellis, Carleton. (See Kuhn, Joseph R., assignor.)

Ellis, Dee R., Eminence, Ky. Crupper. 1,563,841; Dec. 1.

Ellis, Russell S., Philadelphia, Pa. Concrete-molding apparatus. 1,563,615; Dec. 1.

Elms and Sellon, Inc. (See Grogan, William H., assignor.)

Emsco Tool Company. (See Goeser, Edwin W., assignor.)

Enterprise Foundry Co., The. (See Hoehn, Charles J. P., assignor.)

Enterprise Railway Equipment Company. (See Campbell, Argyle, assignor.)

Evensen, William, Chicago, Ill., assignor to Goss Printing Press Company. Stereotype-plate-casting machine. 1,563,349; Dec. 1.

Evernu Rubber Heel Corporation. (See Eichorn, Arthur M., assignor.)

Ewart, William R., Raymond, Wash. Two-cycle gas engine. 1,563,733; Dec. 1.

Fanner Manufacturing Company, The. (See Gibson, Samuel H., assignor.)

Farb, Pincus, Saginaw, Mich., assignor, by mesne assignments, to Sonora Phonograph Company, Inc. Registering device for talking machines. 1,563,734; Dec. 1.

Faris, John N., Portland, Oreg. Ironing board. 1,563,476; Dec. 1.

Farmer, John F., Indianapolis, Ind. Combination motor-vehicle lamp. 1,564,053; Dec. 1.

Fassotte, Adolphe D. H. L., Lommel Usines, assignor to Compagnie des Métaux Overpelt-Lommel, Société Anonyme, Overpelt-near-Neerpelt, Belgium. Process and apparatus for roasting ores. 1,563,616; Dec. 1.

Faultless Rubber Company, The. (See Miller, Vernon L., assignor.)

Femal, William J., Green Bay, Wis. Combined catch basin and trap. 1,563,695; Dec. 1.

Fenn, Margaret F. (See Fenn, William B., assignor.)

Fenn, William B., assignor to M. F. Fenn, Port Washington, N. Y. Sterilizing canned foods. 1,563,971; Dec. 1.

Fenn, William B., assignor to M. F. Fenn, Port Washington, N. Y. Coring and trimming mechanism. 1,563,972; Dec. 1.

Ferry, Cora. (See Ferry, Elmer and C.)

Ferry, Elmer and C., Buffalo, N. Y. Combination brake and jack mechanism for automobiles. 1,563,842; Dec. 1.

Fest, Otto, Newark, N. J. Sausage broiler. 1,563,973; Dec. 1.

Fetters, Charles A., Washington, D. C. Coat-hanger attachment. 1,563,735; Dec. 1.

Fiala, Earl W., Cedar Rapids, Iowa. Map-folding machine. 1,563,696; Dec. 1.

Field, Walter E., and F. C. Stowe, assignors to H. D. Hedison, doing business as Hedison Mfg. Co., Providence, R. I. Separable cuff button. 1,563,350; Dec. 1.

Field, Walter E., and F. C. Stowe, assignors to H. D. Hedison, doing business as Hedison Mfg. Co., Providence, R. I. Separable cuff button. 1,563,351; Dec. 1.

Fink, Christian B., San Francisco, Calif. Combination medical apparatus. 1,563,736; Dec. 1.

Finkernagel, Arthur, Baltimore, Md. Switch cover. 1,563,697; Dec. 1.

Finne, Jacob von S., Ass, assignor to A/S Sonoas, Christiania, Norway. Spreading apparatus for artificial manures. 1,563,698; Dec. 1.

Firestone Tire and Rubber Company, The. (See Brown, Roy W., assignor.)

Fisher, Charles O., Wellsville, Kans. Powder receptacle for handles. 1,563,352; Dec. 1.

Fisher, Daniel, assignor to The Aldan Co., Milwaukee, Wis. Game. 1,564,054; Dec. 1.

Flagstad, Cornell and O. A., Minneapolis, Minn. Collapsible carrier. 1,563,897; Dec. 1.

Flagstad, Oscar A. (See Flagstad, Cornell and O. A.)

Fleming, Robert G., Bloomfield, N. J., assignor to Smokador Manufacturing Co., Inc., New York, N. Y. Smoker's ash stand. Des. 68,903; Dec. 1.

Flintkote Company, The. (See Morse, Thomas W., assignor.)

Flood, Carl A., assignor to Dennison Manufacturing Company, Framingham, Mass. Tag strip. 1,563,843; Dec. 1.

Fones, Edward F., Geneseo, Ill. Cultivator fender. 1,563,617; Dec. 1.

Ford, Sidney C., and W. A. Shuler, New Orleans, La. Storage-battery compartment. 1,564,173; Dec. 1.

Forges & Atelier de Constructions Electriques de Jeumont, Societe Anonyme. (See Charpentier, Paul, assignor.)

Forsell, Frans E., assignor to Parks Bros. & Rogers, Inc., Providence, R. I. Separable button. 1,563,974; Dec. 1.

Forshee, Frank F., Flint, Mich., assignor to Westinghouse Electric Products Company. Electric cooky baker. 1,563,353; Dec. 1.

Forsyth, Valoris L., Forth Worth, Tex. Self-aligning pitman-bearing box. Re16,219; Dec. 1.

Fort Orange Paper Company. (See Brashear, Walter, jr., assignor.)

Fortescue, Charles L., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Transformer-cooling system. 1,563,354; Dec. 1.

Fox, Ansley H., assignor, by mesne assignments, to Fox Holding Company, Philadelphia, Pa. Internal-combustion engine. 1,563,477; Dec. 1.

Fox, Ansley H., assignor to Fox Holding Company, Philadelphia, Pa. Air cooling engine. 1,563,478; Dec. 1.

Fox, Holding Company. (See Fox, Ansley H., assignor.)

Fox, John C., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Reflector-polishing machine. 1,563,355; Dec. 1.

France, Edward E., Racine, Wis. Toy. 1,564,132; Dec. 1.

Franke, Paul, Berlin, Germany. Foot boring machine for dentists with driving motor. 1,563,699; Dec. 1.

Frankel, Irving I., Cincinnati, Ohio. Coat collar and producing and applying same. 1,564,055; Dec. 1.

Frankenstein, William B., Rochester, N. Y. Adjustable ladder shoe. 1,563,700; Dec. 1.

Franklin, Charley M., Griswold, Iowa. Collapsible crate. 1,563,356; Dec. 1.

Fraser, Leving, Osceola, Ark. Hoisting machine. 1,564,133; Dec. 1.

Frederick, Walter A., assignor to Continental Motors Corporation, Detroit, Mich. Intake-manifold heater. 1,563,559; Dec. 1.

Frederickson, Ralph C., Kensal, N. Dak. Condensation-preventing device. 1,563,701; Dec. 1.

French, Charles R., et al. (See Walter, Ira D., assignor.)

French, Chauncey D., and L. D. Brown, Dallas, Oreg. Automatic carriage-reversing mechanism for type-writers. 1,563,702; Dec. 1.

French, James C., Chicago, Ill., assignor, by mesne assignments, to F. C. Austin Machinery Company. Tractor driving and steering mechanism. 1,563,479; Dec. 1.

Freyn, Brassert & Company. (See Willcox, F. H., and Hayes, assignors.)

Fried. Krupp Aktiengesellschaft Germaniawerft. (See Alt, O., and Heisig, assignors.)

Friedhoff, William, Chicago, Ill. Filling gasoline tanks. 1,563,560; Dec. 1.

Friedman, Meyer. (See Friedman, Morris and M.)

Friedman, Morris and M., New York, N. Y. Legging. 1,564,056; Dec. 1.

Froelich, Clarence H., Bethlehem, Pa., assignor to Bethlehem Steel Company. Locking device for gun tubes. 1,563,737; Dec. 1.

From, Owen C., assignor to Western Electric Company, Incorporated, New York, N. Y. Registering device. 1,563,738; Dec. 1.

Fryer, Frederick G., York, England. Conch for the manufacture of chocolate. 1,563,898; Dec. 1.

Fryer, Frederick G., York, England. Conch for the manufacture of chocolate. 1,563,899; Dec. 1.

Gardner, Edward B. and R. D., and J. Nielsen, Beloit, Wis. Grinding machine. 1,563,900; Dec. 1.

Gardner, Edward B., et al. (See Gardner, Ralph D., assignor.)

Gardner, Ralph D. (See Gardner, E. B. and R. D., and Nielsen.)

Gardner, Ralph D., Beloit, Wis., assignor of one-third to E. B. Gardner and one-third to J. Nielsen. Grinding machine. 1,563,901; Dec. 1.

Garin, George P., Baltimore, Md. Game card. Des. 68,904; Dec. 1

Gasser, Joseph, deceased; T. Gasser, administratrix, assignor to New Jersey Twin Hoist Company, Trenton, N. J. Fluid brake. 1,563,561; Dec. 1.

Gasser, Joseph, deceased; T. Gasser, administratrix, assignor to New Jersey Twin Hoist Company, Trenton, N. J. Electric heater. 1,563,562; Dec. 1.

Gasser, Theresa, administratrix. (See Gasser, Joseph.)

Gaygen, Rose, Detroit, Mich. Peanut bird. Des. 68,905; Dec. 1.

Gaynor, Arthur C., Stratford, Conn. Press button. 1,563,357; Dec. 1.

General Chemical Company. (See Egleson, James E., assignor.)

General Instrument Corporation. (See Cohen, Samuel, assignor.)

General Machine and Mfg. Co., The. (See Anderson, John M. S., assignor.)

General Optical Company. (See Clement, Hans, assignor.)

George, William H., assignor to The Dexter Company, Fairfield, Iowa. Gearing. 1,564,057; Dec. 1.

Gerdes, Herman H., and T. L. Hensley, Alvarado, Tex. Jointed switch-throwing bar. 1,563,563; Dec. 1.

Gerhardt, William F., and I. M. Laddon, Dayton, Ohio. Multiplane. 1,563,419; Dec. 1.

Geriach, William E., Huntington, W. Va. Sawing machine. 1,563,844; Dec. 1.

Gettings, Sydney S., and W. L. Bodman, Dorking, assignors to J. M. T. Johnston, London, England. Rotary drying apparatus. 1,564,058; Dec. 1.

Giannone, Pasquale, Norristown, Pa. Top-torpedo-filling machine. 1,564,134; Dec. 1.

Gibson, Earl S., Ridgewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,563,618; Dec. 1.

Gibson, Joseph, Diamond City, Alberta, Canada. Cattle guard. 1,563,358; Dec. 1.

Gibson, Samuel H., assignor to The Fanner Manufacturing Company, Cleveland, Ohio. Chaplet. 1,563,480; Dec. 1.

Gilchrist, Hugh W., and J. J. Reid, Anaconda, Mont. Corner construction for flumes, troughs, launders, and the like. 1,563,481; Dec. 1.

Gilden, Abraham J., assignor to Safety Gas Jet Co., Inc., New York, N. Y. Automatic gas cut-off for gas water heaters. 1,564,135; Dec. 1.

Godard, Luis. (See Larrey, T., and Godard.)

Goeringer, Conrad F., Wilkes-Barre, Pa. Device for backfilling trenches. 1,563,975; Dec. 1.

Goeser, Edwin W., Los Angeles, Calif., assignor to Emsco Tool Company. Crown block. 1,563,739; Dec. 1.

Goff, Harold W., assignor to Western Electric Company, Incorporated, New York, N. Y. Automatic telephone switch. 1,563,740; Dec. 1.

Goldberg, Meyer J., Muskegon, assignor, by mesne assignments, to The Maximotor Company, Muskegon Heights, Mich. Gasoline engine. 1,564,059; Dec. 1.

Goldsmith, Wolf T., Newark, N. J. Hand-bag frame. Des. 68,906; Dec. 1.

Goldsmith, Wolf T., Newark, N. J. Hand-bag frame. Des. 68,907; Dec. 1.

Good, Harper A., Waynesboro, Pa. Clutch speed changing and reversing mechanism. 1,563,741; Dec. 1.

Good Inventions Co. (See Good, John, assignor.)

Good, John, Garden City, assignor to Good Inventions Co., Brooklyn, N. Y. Carburetor. 1,563,482; Dec. 1.

Goodrich, B. F., Company, The. (See Dickson, John B., assignor.)

Goodrow, William, Chicago, Ill. Window cornice and the like. 1,563,619; Dec. 1.

Goodspeed, George D., assignor to Heywood-Wakefield Company, Gardner, Mass. Forming braid. 1,563,564; Dec. 1.

Gorton, William S., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Oscillation generator. 1,563,620; Dec. 1.

Goss Printing Press Company. (See Evensen, William, assignor.)

Gossell, Henry W., Verndale, Minn. Timer. 1,563,703; Dec. 1.

Graham, Harold W. (See Volland, Homer W., assignor.)

Grasselli Dyestuff Corporation. (See Mieg, W., and Raeder, assignors.)

Green, Doron, Bristol, Pa. Toy radio. 1,563,359; Dec. 1.

Green, Fred W. (See Cleaveland, Fred M., assignor.)

Green, George W., Beaumont, Calif. Combination lock for pen and pencil safes. 1,563,621; Dec. 1.

Green, Louis A., Pittsburgh, Pa. Parallel-throw switch stand. 1,563,976; Dec. 1.

Greis, Theodor, Crefeld, Germany, assignor to Maschinenfabrik Benninger A. G., Uzwil, Switzerland. Cloth-expanding roller. 1,563,704; Dec. 1.

Grieshaber, Henry J., Chicago, Ill. Cigar lighter and stand. 1,563,845; Dec. 1.

Griffin, Wilson T., North East, Pa. Ditch-digging machine. 1,563,565; Dec. 1.

Groden, John J., Philadelphia, Pa. Washing machine. 1,564,136; Dec. 1.

Grodnick, Molly G., Minneapolis, Minn. Collapsible receptacle. 1,563,902; Dec. 1.

Grogan, William H., assignor to Elms and Sellon, Inc., New York, N. Y. Textile fabric used for draperies. Des. 68,908; Dec. 1.

Grogan, William H., assignor to Elms and Sellon, Inc., New York, N. Y. Textile fabric used for draperies. Des. 68,909; Dec. 1.

Grogan, William H., assignor to Elms and Sellon, Inc., New York, N. Y. Textile fabric used for draperies. Des. 68,910; Dec. 1.

Grogan, William H., assignor to Elms and Sellon, Inc., New York, N. Y. Textile fabric used for draperies. Des. 68,911; Dec. 1.

Grogan, William H., assignor to Elms and Sellon, Inc., New York, N. Y. Textile fabric used for draperies. Des. 68,912; Dec. 1.

Grosjean, James E., Lima, Ohio. Sole for boots and shoes. 1,564,060; Dec. 1.

Grossmann, Albert A., St. Paul, Minn. Telescopic hand level. 1,563,483; Dec. 1.

Grover, Ray, Milwaukee, Wis. Making piston rings. 1,563,566; Dec. 1.

Gruber, Henry. (See Miller J., and Gruber.)

Grundy, William H., Company. (See Petersen, George E., assignor.)
Guastavino, R., Co. (See Guastavino, Rafael, assignor.)
Guastavino, Rafael, Bay Shore, assignor to R. Guastavino Co., New York, N. Y. Sound-absorbing plaster and applying same. 1,563,846; Dec. 1.
Gulbransen, Axel G., River Forest, assignor to Gulbransen Company, Chicago, Ill. Player piano. 1,563,977; Dec. 1.
Gulbransen Company. (See Gulbransen, Axel G., assignor.)
Gunn, John M., Lagune, N. Mex. Solar attachment for transits. 1,563,484; Dec. 1.
Gunn, Sands T., et al. (See Bradshaw, Claude, assignor.)
Haag, Albert R., Peoria, Ill. Wringer. 1,563,623; Dec. 1.
Haag, Albert R., Peoria, Ill. Washing machine. 1,563,624; Dec. 1.
Haag, George, Peoria, Ill. Combined clutch and latch mechanism. 1,563,622; Dec. 1.
Hager, William A. (See Curtis, Robert, sr., assignor.)
Hahnemann, Walter. (See Hecht, H., Rudolph, Lichte, and Hahnemann.)
Haigh, Alfred, and H. R. Hart, Staffordshire, England. Making carbon and other coated papers. 1,563,978; Dec. 1.
Hale, George S., Tekoa, Wash. Attachment for motor vehicles. 1,564,061; Dec. 1.
Hales, Landy R., New York, N. Y. Display device. 1,563,485; Dec. 1.
Hall, Franklin C., Albertville, Ala. Well windlass. 1,564,062; Dec. 1.
Hall, George H., deceased, Hannibal, Mo.; E. A. Wilson, executrix. Gauge. 1,563,847; Dec. 1.
Hall, Randolph F., Ithaca, N. Y., assignor of one-fourth to T. P. Hall, Wallingford, Conn., and one-fourth to P. Wilson, Ithaca, N. Y. Airplane. 1,563,979; Dec. 1.
Hall, Theodore P., et al. (See Hall, Randolph F., assignor.)
Halowax Corporation. (See Brown, Sandford, assignor.)
Hamilton, William R., Montreal, Quebec, assignor to Dominion Messenger and Signal Company Limited, Toronto, Ontario, Canada. Mechanical rectifier. 1,564,063; Dec. 1.
Hammond, William J., Chicago, Ill. Antishifting means for piled metal sheets. 1,563,848; Dec. 1.
Hanford, Arthur S., jr. (See Jung, John M., assignor.)
Hanley, Joseph P. (See Riordan, R. J., and Hanley.)
Hannah, Robert L., assignor of fifty-five per cent to L. M. Migel, Waco, Tex. Burner. 1,564,064; Dec. 1.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Clutch mechanism for double-drum hoists. 1,563,742; Dec. 1.
Hansen-Ellehammer, Jacob C., Copenhagen, Denmark. Carburetor. 1,563,705; Dec. 1.
Hardenbergh, Clarence M., et al. (See Sholtz, Richard J., assignor.)
Harmon, Alvie E., et al. (See Bradshaw, Claude, assignor.)
Harry, Lando C., Casco Township, Allegan County, Mich. Transplanter. 1,563,625; Dec. 1.
Hart, Harold R. (See Haigh, A., and Hart.)
Hart & Hegeman Manufacturing Company. (See Williams, Samuel P., assignor.)
Harter, Isaac, Dongan Hills, N. Y., assignor to The Babcock & Wilcox Company, Bayonne, N. J. Baffle and constructing same. 1,563,567; Dec. 1.
Hartford Rubber Works Company. (See Lough, Hector V., assignor.)
Harth, Friedrich, Bamberg, Germany, assignor to L. Harth, Chicago, Ill. Flying machine. 1,564,065; Dec. 1.
Harth, Louis. (See Harth, Friedrich, assignor.)
Harty, William A., Blasdell, N. Y. Refractory material and producing the same. 1,563,853; Dec. 1.
Hartman, Frank E., assignor to Electric Water Sterilizer & Ozone Company, Scottdale, Pa. Purifying and circulating water in swimming pools. 1,563,849; Dec. 1.
Hartman, Frank E., assignor to Electric Water Sterilizer and Ozone Company, Scottdale, Pa. Swimming pool. 1,563,850; Dec. 1.
Hartman, Frank E., assignor to Electric Water Sterilizer and Ozone Company, Scottdale, Pa. Swimming pool. 1,563,851; Dec. 1.
Hartman, Harry B., Scottdale, Pa. Safety-razor strop. 1,563,852; Dec. 1.
Haspel, Harry S. W., and J., New Orleans, La. Coat construction. 1,564,066; Dec. 1.
Haspel, Joseph. (See Haspel, Harry S., W., and J.)
Haspel, William. (See Haspel, Harry S., W., and J.)
Hatheway, William E., Bridgeport, Conn. Buckle. 1,563,360; Dec. 1.
Haugh, Raymond R., Chicago, Ill. Electric switch. 1,563,854; Dec. 1.
Hayden, Benjamin F., Springfield, Mo., assignor to Haydenite Brick and Machinery Company. Brickmaking machine. 1,564,067; Dec. 1.
Haydenite Brick and Machinery Company. (See Hayden, Benjamin F., assignor.)
Hayes, John C., jr. (See Wilcox, F. H., and Hayes.)
Hayes, Thomas J., East St. Louis, Ill., assignor, by mesne assignments, to Lewis Invisible Stitch Machine Co. Spring structure for sewing machines and the like. 1,564,174; Dec. 1.
Hazel-Atlas Glass Co. (See Stenhouse, Thomas, assignor.)
Hazlewood, John H., Vancouver, British Columbia, Canada. Aperture stopper. 1,563,743; Dec. 1.
Hecht, Heinrich, W. Rudolph, H. Lichte, Kiel, and W. Hahnemann, Kitzberg, near Kiel, assignors to the Firm Signal Gesellschaft m. b. H., Kiel, Germany. Sound-signaling device. 1,563,626; Dec. 1.
Hedison, Harry D. (See Field, W. E., and Stowe, assignors.)
Hedison Mfg. Co. (See Field, W. E., and Stowe, assignors.)
Hein, George N., San Francisco, Calif. Syringe ampul, piston, and piston-packing construction. 1,563,627; Dec. 1.
Heise, George W., Bayside, N. Y., assignor to National Carbon Company, Inc. Galvanic cell of the copper-oxide type. 1,563,980; Dec. 1.
Helander, Ernest G., Philadelphia, Pa. Condenser. 1,563,981; Dec. 1.
Held, Paul, St. Cloud, Minn. Water coaster or toboggan. 1,563,855; Dec. 1.
Helm, Henry C. (See Helm, John and H. C.)
Helm, John and H. C., St. Louis, Mo. Faceplate for mail receptacles. 68,913; Dec. 1.
Helm, John and H. C., St. Louis, Mo. Faceplate for mail receptacles. 68,914; Dec. 1.
Helsig, Curt. (See Alt, O., and Helsig.)
Hely, Norman L., Cape Girardeau, Mo. Dumping hoist. 1,563,486; Dec. 1.
Henderson, James P., Topeka, Kans. Door-jamb protector. 1,563,982; Dec. 1.
Hendey Machine Company, The. (See Bouillon, Constant, assignor.)
Hendry, William F., Ossining, assignor to The Manhattan Electrical Supply Company, New York, N. Y. Dry cell. 1,563,628; Dec. 1.
Henning, Millard F., Oakland, Calif. Window screen. 1,563,361; Dec. 1.
Hensley, Thomas L. (See Gerdes, H. H., and Hensley.)
Hensley, William T., Indianapolis, Ind. Universal joint. 1,563,629; Dec. 1.
Henter, Leo A., et al. (See Johnson, Otto W., assignor.)
Herb, Frederick, Brooklyn, assignor, by mesne assignments, to R. Hoe and Co., Inc., New York, N. Y. Bearing for rotary printing couples. 1,563,487; Dec. 1.
Herradora, Juan R., Holtsville, N. Y. Developing holder for X-ray films. 1,563,362; Dec. 1.
Hesselman, Knut J. E., Saltsjo-Storangen, Sweden. Valve-controlling means. 1,563,744; Dec. 1.
Heywood-Wakefield Company. (See Goodspeed, George D., assignor.)
Hibbard, Lloyd J., Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company. Resistor. 1,563,363; Dec. 1.
Higgason, William H., El Cajon, Calif. Direction indicator for motor vehicles. 1,564,068; Dec. 1.
Higuchi, Monnosuke, College Point, N. Y. Moving-pocket game apparatus. 1,563,983; Dec. 1.
Hillyard, Newton S., St. Joseph, Mo. Mop. 1,563,745; Dec. 1.
Hinrichsen, Edward E., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. 1,563,630; Dec. 1.
Hinrichsen, Edward E., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. 1,563,631; Dec. 1.
Hirsch, Herbert S. and M., Newark, N. J. Shirt retainer. 1,563,746; Dec. 1.
Hirsch, Isaac S., New York, N. Y. Fluoroscopic screen. 1,563,856; Dec. 1.
Hirsch, Morris. (See Hirsch, Herbert S. and M.)
Hoar, Roger S., assignor to Bucyrus Company, South Milwaukee, Wis. Winch-control mechanism. 1,563,568; Dec. 1.
Hobart Manufacturing Company. (See Miller, Frank R., assignor.)
Hobert, Clayton, Philadelphia, Pa. Detachable shoe heel. 1,563,984; Dec. 1.
Hoddersen-Balling, Frederick E., Brooklyn, N. Y. Ham boiler. 1,563,985; Dec. 1.
Hoddersen-Balling, Frederick E., Brooklyn, N. Y. Ham boiler. 1,563,986; Dec. 1.
Hoe, R., and Co. (See Herb, Frederick, assignor.)
Hoehn, Charles J. P., assignor to The Enterprise Foundry Co., San Francisco, Calif. Flexible pipe joint. 1,564,175; Dec. 1.
Hoey, Samuel C., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Apparatus for die casting. 1,563,364; Dec. 1.
Hofland, Seaver A., assignor to International Chimney and Fire Protectors Company, Fennimore, Wis.; D. J. Flintjer, F. H. Flintjer, S. A. Hofland, and D. B. Hofland, trustees. Chimney protector. 1,563,706; Dec. 1.
Hogan, Philip, St. Louis, Mo. Seam anchor. 1,563,569; Dec. 1.
Hoge, Joseph F. D., assignor to Western Electric Company, Incorporated, New York, N. Y. Circuit interrupter. 1,563,488; Dec. 1.
Hohl, John T., Indianapolis, Ind. Hand-tool construction. 1,563,707; Dec. 1.
Holbrook, Newton D. (See Cooper, George H., assignor.)

Holliday Radio & Manufacturing Company. (See Pihl, Albert, assignor.)
Hollup, C. H., Corporation. (See Hollup, Charles H., assignor.)
Hollup, Charles H., Milwaukee, Wis., assignor to C. H. Hollup Corporation. Machine for coating arc-welding electrodes. 1,563,365; Dec. 1.
Holmes, E. & B., Machinery Company. (See Beugler, Edwin F., assignor.)
Holmes, Elbridge R., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Lay for narrow-ware looms. 1,563,570; Dec. 1.
Holmes, Frank G., assignor to Lenox Incorporated, Trenton, N. J. Plate or similar article. Des. 68,915; Dec. 1.
Holmes, Frank G., assignor to Lenox Incorporated, Trenton, N. J. Plate or similar article. Des. 68,916; Dec. 1.
Holthaus, Rainsford B., and G. D. Smith, Fremont, Nebr. Mechanical stoker. 1,563,708; Dec. 1.
Homan, William C., Meriden, Conn., assignor to L. T. Wilcox, Peekskill, N. Y. Oil-stove burner. 1,563,987; Dec. 1.
Honegger, Irving C., San Antonio, Tex. Vending machine. 1,563,366; Dec. 1.
Hooppaw Manufacturing Company. (See Hooppaw, O. W., and Rinehart, assignors.)
Hooppaw, Oscar W., and C. A. Rinehart assignors to Hooppaw Manufacturing Company, St. Louis, Mo. Doorlock. 1,563,489; Dec. 1.
Hoovens, Amasa G., Goshen, Ind. Lightning-rod anchor. 1,564,069; Dec. 1.
Hornung, Anton N., Los Angeles, Calif. Refrigerator. Des. 68,917; Dec. 1.
Horton, Spencer, Birmingham, England. Sprinkler installation. 1,563,490; Dec. 1.
Hosmer, Guy F., assignor to Oxford Paper Company, Rumford, Me. Method and apparatus for use in sorting paper. 1,563,747; Dec. 1.
Houghton, Lewis T., Worcester, Mass. Tension device for winding machines. 1,563,857; Dec. 1.
Howse, Curtis L., Detroit, Mich., assignor to Craig Damper Regulator Company. Pressure-controlled regulating means for furnaces. 1,563,988; Dec. 1.
Hoyle, Henry P., Durham, England. Centrifugal separator. 1,563,491; Dec. 1.
Huffman, William E., C. F. Adams, and M. Q. Corbett, Dayton, Ohio. Jumping balloon. 1,563,571; Dec. 1.
Hughes, Roland T., Oak Park, Ill. Electric attachment plug. 1,563,989; Dec. 1.
Hulme, Frederic G., Tacony, Philadelphia, Pa. Loom. 1,563,990; Dec. 1.
Hultquist, Charles A., Los Angeles, Calif. Pneumatic drill. 1,563,632; Dec. 1.
Hultquist, Charles A., Los Angeles, Calif. Pneumatic drill. 1,563,633; Dec. 1.
Hultqvist, Johan A., Norrkoping, Sweden. Manufacturing articles of brushlike nature. 1,563,367; Dec. 1.
Humphries, Chad H., assignor to Metals Protection Corp., Kokomo, Ind. Welding. 1,563,748; Dec. 1.
Hunt, John O., assignor to Independent Paper Mills Inc., Brooklyn, N. Y. Dispenser for paper napkins, towels, and the like. 1,563,991; Dec. 1.
Huntley, Ernest R., Los Angeles, Calif., assignor to Industrial Research Corporation, Toledo, Ohio. Engine-starting mechanism. 1,563,992; Dec. 1.
Huppert, Henry K., San Francisco, Calif. Radio vacuum tube. 1,564,070; Dec. 1.
Hutchinson, Miller R. (See Pierman, A. N., and Curtiss, assignors.)
Hutchinson, Miller R., West Orange, N. J. Sound controller for telephone receivers. 1,563,572; Dec. 1.
Hutchinson, Robert H., Dallas, Tex. Brake band for motor vehicles. 1,563,368; Dec. 1.
Huyett, Amos W., Reading, Pa. Box insert. 1,563,369; Dec. 1.
Hybinette, Noak V., Wilmington, Del. Heat-resisting alloy and structure, etc. 1,563,573; Dec. 1.
Illinois Watch Case Company. (See Bates, George T., assignor.)
Independent Paper Mills Inc. (See Hunt, John O., assignor.)
Industrial Research Corporation. (See Huntley, Ernest R., assignor.)
Ingersoll-Rand Company. (See Bancel, Paul A., assignor.)
Ingersoll-Rand Company. (See Hansen, Charles C., assignor.)
Ingersoll-Rand Company. (See Smith, William A., assignor.)
Ingve, Daniel, Chelsea, Mass. Holder for photographic films. 1,563,858; Dec. 1.
International Chimney and Fire Protectors Company. (See Hofland, Seaver A., assignor.)
International Cigar Machinery Company. (See Bronander, Wilhelm B., assignor.)
International Postal Supply Company, The. (See Zahn, Lawrence, J., assignor.)
Interstate Folding Box Company, The. (See Bergstein, Samuel, assignor.)
Invincible Blow Pipe Company, The. (See Butzbach, Otto, assignor.)
Isom, Edward W., Winnetka, Ill., and J. E. Bell, Brooklyn, N. Y., assignors to Sinclair Refining Company, Chicago, Ill. Condenser. 1,563,492; Dec. 1.
Jackson, Charles E., Minneapolis, Kans. Ventilating closet. 1,564,071; Dec. 1.
Jackson, James M., Parkersburg, W. Va. Cigar lighter. 1,564,072; Dec. 1.
Jacob, Stephen J., Appleton, Wis. Paper perforator. 1,563,634; Dec. 1.
Jacobs, Ernest H., assignor to Electrical Engineers Equipment Company, Chicago, Ill. Polyphase bus bar. 1,563,859; Dec. 1.
Jacobsen, Emil, New York, N. Y., assignor to American Telephone and Telegraph Company. Testing set for telephone systems. 1,563,370; Dec. 1.
Jacobson, John, Columbia Falls, Mont. Tow rod. 1,563,860; Dec. 1.
Jacobson, Peter G., Chicago, Ill. Electrostatic condenser. 1,563,709; Dec. 1.
Jannes, Spear N., Rock Island, Ill. Valve lubricator. 1,563,493; Dec. 1.
Jefferson Electric Mfg. Co. (See Daley, James C., assignor.)
Jembrzycki, Stanley J., Chicago, Ill. Hair clipper. 1,563,861; Dec. 1.
Jensen, Elias A., Santa Barbara, Calif. Direction signal for motor vehicles. 1,563,494; Dec. 1.
Jensen, Gunnar, assignor to Walker Manufacturing Company, Racine, Wis. Lifting jack. 1,563,862; Dec. 1.
Jensen, John, assignor to Whitney Metal Tool Company, Rockford, Ill. Hollow punch. 1,563,574; Dec. 1.
Johnson, Charles S., Champaign, Ill., Measuring hopper. 1,563,710; Dec. 1.
Johnson, John B., and S. Daniels, Dayton, Ohio. Manufacture of armor plate. 1,563,420; Dec. 1.
Johnson, Osval G., Irene, S. Dak. Mail box. 1,564,073; Dec. 1.
Johnson, Otto W., assignor of one-third to J. H. Bras and one-third to L. A. Henter, Hot Springs, Mont. Comb. 1,563,711; Dec. 1.
Johnson, Ralph, Ripley Township, Chautauqua, County, N. Y. Bearing-grinding machine. 1,563,712; Dec. 1.
Johnston, Andrew L., jr., assignor, by mesne assignments, to Off'N'On Chain Corporation, New York, N. Y. Automatic machine for making chains. 1,563,993; Dec. 1.
Johnston, James M. T. (See Gettings, S. S., and Bodman, assignors.)
Johnston, John A., and R. E. Molt, Worcester, Mass. Clamp. 1,563,903; Dec. 1.
Jones, Howard B., Evanston, Ill. Identifying tag. 1,563,371; Dec. 1.
Jones, Leonard M., Dulwich, England. Syringe. 1,564,074; Dec. 1.
Jones, Lester N., Livingston, Calif. Carpenter's tool. 1,563,495; Dec. 1.
Josef, Edward E., Buffalo, N. Y. Anchor for radiator caps, etc. 1,563,749; Dec. 1.
Joyner, Daniel W., Kansas City, Mo. Warehouse truck. 1,563,863; Dec. 1.
Jung, John M., assignor of one-half to A. S. Hanford, jr., Sioux City, Iowa. Lifter. 1,563,575; Dec. 1.
Juvet, Obel, Ferndale, Wash. Operating and maintenance record for vehicles. 1,563,864; Dec. 1.
K. P. Products Company. (See Knauss Edward, assignor.)
Kaminski, Paul, Berlin-Pankow, assignor to Siemens & Halske Aktiengesellschaft, Siemensstadt, near Berlin, Germany. System for adjusting devices at a distance. 1,563,994; Dec. 1.
Kantor, James, Chicago, Ill. Draft arm for soda fountains. 1,563,372; Dec. 1.
Karr, Arthur, Yakima, Wash. Lighting torch. 1,563,995; Dec. 1.
Kasch, Henry J., Dayton, assignor to The Krus-Kash Company, South Broadway, near Dayton, Ohio. Securing knobs and dials to instrument shafts. 1,563,635; Dec. 1.
Kauch, Robert. (See Paulus, C. L., and Kauch.)
Kauch, Robert, Dayton, Ohio. Range finder. 1,563,373; Dec. 1.
Kaufman, Frank M., Philadelphia, Pa. Textile fabric. Des. 68,918; Dec. 1.
Kaufman, Frank M., Philadelphia, Pa. Textile fabric. Des. 68,919; Dec. 1.
Kaynor, Warren F., assignor to The Waterbury Button Company, Waterbury, Conn. Button. Des. 68,920; Dec. 1.
Keall, Frank B., and W. T. Minett, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Leveling machine. 1,563,576; Dec. 1.
Kearney, Norman L., Dayton, Ohio. Proctection screen for airplane cockpits. 1,563,374; Dec. 1.
Kehr, Frederick C., Milwaukee, Wis. Curve oiler. 1,563,996; Dec. 1.
Keir, Duncan, Atlantic City, N. J. Combined mop and wringer. 1,563,496; Dec. 1.
Keller, Albert E. (See Reinhold, Frederick E., assignor.)
Kellogg Company. (See Kellogg, John L., assignor.)
Kellogg, John L., assignor to Kellogg Company, Battle Creek, Mich. Manufacture of bran food. 1,564,181; Dec. 1.
Kellogg Switchboard and Supply Company. (See Dyson, Alfred H., assignor.)
Kellogg Switchboard and Supply Company. (See Weiss, Alfred H., assignor.)

**Kelly, Maston V., Beaumont, Tex.** Closure-plate-securing means. 1,563,865; Dec. 1.

**Kennedy, Andrew J., Chicago, Ill., assignor to Parks** Bros. & Rogers, Inc., Providence, R. I. Cuff link. 1,563,997; Dec. 1.

**Kennedy, Andrew J., Chicago, Ill., assignor to Parks** Bros. & Rogers, Inc., Providence, R. I. Cuff link. 1,563,998; Dec. 1.

**Kennedy, David S., Brooklyn, N. Y., assignor to Mer**genthaler Linotype Company. Typographical distributing machine. 1,563,750; Dec. 1.

**Kerckhoff, Daniel C., and R. Copp, assignors to Peveley** Dairy Company, St. Louis, Mo. Filter. 1,563,904; Dec. 1.

**Kerckhoff, Daniel C., and R. Copp, assignors to Pevely** Dairy Company, St. Louis, Mo. Pasteurizing process and apparatus. 1,563,905; Dec. 1.

**Kewish, John T., New York, N. Y.** Automatic firearm. 1,563,751; Dec. 1.

**Kindermann, Louis F., Pittsburgh, Pa., assignor to West**inghouse Electric & Manufacturing Company. Glow-discharge transmitter casing. 1,563,375; Dec. 1.

**King, Anna G., administratrix.** (See King, Roy D.)

**King, Roy D., deceased, Chicago, Ill.: A. G. King, ad**ministratrix. Doughnut former. 1,563,376; Dec. 1.

**Kiriak, Eremy, Ford, Ontario, Canada.** Incandescent lamp. 1,563,999; Dec. 1.

**Kirksey, Amos H.** (See Clayton, E. R., and Kirksey.)

**Klein, Charles H., Jersey City, N. J., assignor to Ameri**can Telephone and Telegraph Company. Pulling and transposing mechanism for line wires. 1,563,377; Dec. 1.

**Kleinschmidt, Edward E., Long Island City, N. Y., as**signor, by mesne assignments, to Morkrum-Kleinschmidt Corporation, Chicago, Ill. Ball storage transmitter. 1,563,906; Dec. 1.

**Klow, Louis, Chicago, Ill.** Feed trough. 1,563,497; Dec. 1.

**Knauss, Edward, Florin, Calif., assignor to K. P. Prod**ucts Company, Inc., New York, N. Y. Governor for internal-combustion motors. 1,563,378; Dec. 1.

**Knoll, Phillip G., Port Colborne, Ontario, Canada.** Boot and shoe. 1,563,498; Dec. 1.

**Knudsen, Hugo C., Brooklyn, assignor to American Lith**ographic Company, New York, N. Y. Producing true gradation prints for making half-tone printing plates. 1,563,499; Dec. 1.

**Koch, Henry, Jamaica, N. Y., assignor to Dictograph** Products Corporation. Loud-speaking receiver unit. 1,563,500; Dec. 1.

**Koch, Henry, Jamaica, and F. H. N. Wohlers, Hemp**stead, N. Y., assignors to Dictograph Products Corporation. Telephone receiver. 1,563,501; Dec. 1.

**Koff, Samuel, Brooklyn, N. Y.** Folding box. 1,563,907; Dec. 1.

**Kohn, Koby, New York, N. Y.** Safety firecracker. 1,563,379; Dec. 1.

**Koken, Walter F., St. Louis, Mo.** Hairdresser's and barber's chair. 1,564,000; Dec. 1.

**Koppers Company, The.** (See Sperr, Frederick W., jr., assignor.)

**Korb, William, Cheviot, Ohio.** Manufacturing automobile radiators. 1,563,502; Dec. 1.

**Kortejarvi, Aaro, Fitchburg, Mass.** Pipe. 1,563,866; Dec. 1.

**Kothny, Gottdank L., Strafford, assignor to C. H. Wheeler** Manufacturing Company, Philadelphia, Pa. Ejector. 1,563,752; Dec. 1.

**Krause, David H., Anacortes, Wash.** Game. 1,563,908; Dec. 1.

**Krell, George, Sapulpa, Okla.** Pipe clamp. 1,564,001; Dec. 1.

**Krone, Carl R., Oakland, Calif.** Electrical switch. 1,563,753; Dec. 1.

**Kronman, Edward, New York, N. Y.** Sterilizer. Des. 68,921; Dec. 1.

**Krueger, Albert G., assignor to Northern Corrugating** Co., Green Bay, Wis. Dispensing cabinet. 1,563,867; Dec. 1.

**Kuhn, Joseph R., assignor, by mesne assignments, to C.** Ellis, Montclair, N. J. Acid-resistant shellac substitute. 1,564,002; Dec. 1.

**Kunkle, George R., Elyria, Ohio.** Electric-motor mechanism. 1,563,380; Dec. 1.

**Kurz-Kasch Company, The.** (See Kasch, Henry J., assignor.)

**Kuzaroff, Constantine, assignor of one-half to J. Der**doski, St. Paul, Minn. Smoker's tray. Des. 68,922; Dec. 1.

**Kuzaroff, Constantine, assignor of one-half to J. Der**doski, St. Paul, Minn. Smoker's tray. Des. 68,923; Dec. 1.

**Laddon, Isaac M.** (See Gerhardt, W. F., and Laddon.)

**Lakewood Engineering Company.** (See Pleines, Henry T., assignor.)

**Lakin, J Harry, assignor to The Lakin Manufacturing** Company, Pittsburgh, Pa. Water recooler. 1,564,075; Dec. 1.

**Lakin Manufacturing Company, The.** (See Lakin, J Harry, assignor.)

**Langer, Harry C., Milwaukee, Wis.** Stocking and method of making. 1,563,868; Dec. 1.

**Lare, Benjamin F., deceased, Philadelphia, Pa.; M. A.** Lare, executrix. Combined vacuum-tube attachment and air-inlet device for gas engines. 1,564,076; Dec. 1.

**Lare, Matilda A., executrix.** (See Lare, Benjamin F.)

**Larmore, Clinton O., Baltimore, Md.** Lunch-counter partition. 1,563,381; Dec. 1.

**Larrey, Teodoro, and L. Godard, Mexico, Mexico.** Steam-boiler installation. 1,563,503; Dec. 1.

**Larson, Anders G., Christiania, Norway.** Hinge. 1,563,869; Dec. 1.

**La Rue, John B.** (See Scofield, S. W., and La Rue.)

**Latour Corporation.** (See Latour, Marius, assignor.)

**Latour, Marius, Paris, France, assignor to Latour Cor**poration, Jersey City, N. J. Electrical condenser. 1,563,754; Dec. 1.

**Laubman, Charles W.** (See Pank, H. G., and Laubman.)

**Lavallee, Charles F., Newmarket, N. H.** Vehicle spring check shock absorber. 1,564,003; Dec. 1.

**Leathers, Ward, Haworth, N. J.** Steam-power plant for airplanes. 1,563,504; Dec. 1.

**Legat, Robert C., New Britain, Conn., assignor to The** G. E. Prentice Manufacturing Company. Hanger support. 1,564,004; Dec. 1.

**Legg, Joseph W., Wilkinsburg, Pa., assignor to Westing**house Electric & Manufacturing Company. Graphic recording device. 1,563,382; Dec. 1.

**Lenox Incorporated.** (See Holmes, Frank G., assignor.)

**Leonardt, Carl, Los Angeles, Calif.** Manufacturing cement. 1,563,755; Dec. 1.

**Leslie, Bradford, London, England.** Joint for railway-rail ends. 1,564,005; Dec. 1.

**Lester, William H., assignor to Elgin American Manu**facturing Co., Elgin, Ill. Article holder. Des. 68,924; Dec. 1.

**Levin, Manuel, Boston, Mass.** Stove polish. 1,563,421; Dec. 1.

**Lewis Invisible Stitch Machine Co.** (See Hayes, Thomas J., assignor.)

**Lewis Invisible Stitch Machine Co.** (See Mueller, Charles W., assignor.)

**Lewis, William H., Bandon, Oreg.** Friction brake. 1,563,636; Dec. 1.

**Liberman, Bernard, Philadelphia, Pa.** Cigar bunching. 1,563,756; Dec. 1.

**Lichte, Hugo.** (See Hecht, H., Rudolph, Lichte, and Hahnemann.)

**Lieberherr, Jakob, Islikon, Switzerland.** Roasting machine. 1,563,757; Dec. 1.

**Liess, Frederick H., Watson, Mo.** Plowing or cultivating machine. 1,564,077; Dec. 1.

**Lindahl, Anders.** (See Luttropp, Conrad, assignor.)

**Lindberg, John F., assignor to Reliance Die and Stamp**ing Company, Chicago, Ill. Condenser. 1,563,758; Dec. 1.

**Lindblad, Allan P., Everett, Mass.** Napkin holder. Des. 68,925; Dec. 1.

**Linebaugh, Edward R., Barberton, Ohio, assignor to The** Diamond Match Company, Chicago, Ill. Printing press. 1,563,383; Dec. 1.

**Linney, Joseph E., assignor to Chateaugay Ore & Iron Co.,** Lyon Mountain, N. Y. Sintering machine. 1,563,759; Dec. 1.

**Livingston, John H., Holly Ridge, La.** Steam engine. 1,564,137; Dec. 1.

**Loblaw Groceterias Co. Limited.** (See Loblaw, Theodore P., assignor.)

**Loblaw, Theodore P., assignor to Loblaw Groceterias Co.** Limited, Toronto, Ontario, Canada. Refrigerator counter. 1,563,577; Dec. 1.

**Lock, Charles C., Hannibal, Mo.** Violin. 1,564,078; Dec. 1.

**Loening, Grover C., New York, N. Y.** Retractible landing gear. 1,563,384; Dec. 1.

**Loetscher, Martin B., Hollywood, Calif.** Tire cover. 1,563,760; Dec. 1.

**Lollis, Benjamin F., Berwyn, Ill.** Adjustable contact means. 1,563,578; Dec. 1.

**Lorbiecki, Johanna, Hatley, Wis.** Hair net. 1,564,079; Dec. 1.

**Lough, Hector V., assignor to The Hartford Rubber** Works Company, Hartford, Conn. Grappling device. 1,563,505; Dec. 1.

**Lowden, Hugh B., Denver, Colo.** Means for converting motion. 1,563,761; Dec. 1.

**Lundblad, Paul A., Linden, Calif.** Railway-crossing guard. 1,563,637; Dec. 1.

**Lundgren, Arthur W.** (See Reinhardt, W. C., and Lundgren.)

**Lundgren, Edwin Frederick, Md., assignor to Combustion** Engineering Corporation, New York, N. Y. Stoker. 1,563,762; Dec. 1.

**Lundman, Arvid, Winnipeg, Manitoba, Canada.** Safety attachment to grain elevators. 1,564,080; Dec. 1.

**Lupton, Samuel J., Winnipeg, Manitoba, Canada.** Cleaning system for boilers. 1,563,906; Dec. 1.

**Luthy, Joseph O., San Antonio, Tex., assignor to Luthy** Research Laboratory. Recovery and utilization of materials of old secondary-battery plates. 1,563,506; Dec. 1.

**Luthy Research Laboratory.** (See Luthy, Joseph O., assignor.)

**Luttropp, Conrad, assignor of one-half to A. Lindahl,** Stockholm, Sweden. Calculating machine. 1,563,763; Dec. 1.

**Lyebou, Robert A., Chester, Pa.** Golf practicing device. 1,564,081; Dec. 1.

**Lyon, Howard, assignor to Welsbach Company, Glouces**ter, N. J. Oven. 1,564,082; Dec. 1.

**Lyons, William, Rosebery East, Victoria, Australia.** Grain-drill share. 1,564,083; Dec. 1.

**MacDonald, Sadie, New York, N. Y.** Facial device. 1,563,767; Dec. 1.

**MacEachen, Roderick, Washington, D. C.** Coal elevating and conveying apparatus. 1,563,387; Dec. 1.

**MacInnes, Robert H., Hamilton, Ontario, Canada.** Electric stove oven. 1,564,086; Dec. 1.

**Mackay, Robert G., Chicago, Ill.** Fireplace. Des. 68,926; Dec. 1.

**Mackay, Robert G., Chicago, Ill.** Fireplace. Des. 68,927; Dec. 1.

**Mackay, Robert G., Chicago, Ill.** Fireplace. Des. 68,928; Dec. 1.

**Major, Robert, P. J. Durbin, and F. C. Orr, Los Angeles,** Calif.; said Orr assignor to said Major and Durbin. Street or station indicator. 1,563,579; Dec. 1.

**Mallinckrodt, Philip H., Salt Lake City, Utah.** Automatically-extensible hoisting mast. 1,563,768; Dec. 1.

**Malocsay, Frank, New York, N. Y., assignor, by mesne** assignments, to Sonora Phonograph Company, Inc. Talking machine. 1,564,008; Dec. 1.

**Manhattan Electrical Supply Company, The.** (See Hendry, William F., assignor.)

**Mantle, David L., Stillwater, Okla.** Combination cap. 1,563,507; Dec. 1.

**Marbury, Ralph E., Edgewood Park, Pa., assignor to** Westinghouse Electric & Manufacturing Company. Wireless receiving system. 1,563,425; Dec. 1.

**Marbury, Ralph E., Wilkinsburg, Pa., assignor to West**inghouse Electric & Manufacturing Company. Condenser for power-factor correction. 1,563,426; Dec. 1.

**Marden, William L., assignor to Neptune Meter Com**pany, New York, N. Y. Register for liquid-dispensing apparatus. 1,563,769; Dec. 1.

**Marden, William L., assignor to Neptune Meter Com**pany, New York, N. Y. Register for liquid-dispensing apparatus. 1,563,770; Dec. 1.

**Marlor, Alfred Hyde, England, assignor of one-third to** E. Axon, South Norwalk, Conn. Decorated hat leather or sweatband. 1,563,910; Dec. 1.

**Marsden, Philip A.** (See Cutler, A. E., and Marsden.)

**Martin, Bruno, Saginaw, Mich.** Hood or protector for gasoline torches, etc. 1,563,427; Dec. 1.

**Maschinenfabrik Benninger A. G.** (See Greis, Theodor, assignor.)

**Mason, John J., Brooklyn, N. Y., assignor, by mesne as**signments, to Underwood Typewriter Company. Stencil attachment for typewriters. 1,563,771; Dec. 1.

**Mason, Walter L., Red Bank, N. J.** Replaceable tooth. 1,564,087; Dec. 1.

**Matthews, Edward, assignor of one-half to W. P.** Tichenor, Denver, Colo. Shock absorber. 1,564,088; Dec. 1.

**Mattison, Carl L., and W. O. Vivarttas, assignors to** Mattison Machine Works, Rockford, Ill. Work-guiding means for molding machines and the like. 1,563,388; Dec. 1.

**Mattison Machine Works.** (See Mattison, C. L., and Vivarttas, assignors.)

**Maximotor Company, The.** (See Goldberg, Meyer J., assignor.)

**Maxwell, Edwin F., Berkeley, Calif.** Archery device. 1,564,089; Dec. 1.

**May, Edward E., Parker, S. Dak.** Animal trap. 1,563,772; Dec. 1.

**May, Martin D., Monroe, Mich.** Collapsible core. 1,563,580; Dec. 1.

**May, Martin D., Monroe, Mich.** Concrete form. 1,563,581; Dec. 1.

**Maynard Arthur H., Warwick, R. I., assignor to Boston** Wire Stitcher Company, Portland, Me. Paper clip and book holder. 1,563,508; Dec. 1.

**McCarthy, Daniel J., Elgin, Ill., assignor to Chicago** Railway Signal and Supply Company. Locating lamp. 1,563,509; Dec. 1.

**McCarthy, Daniel J., Elgin, Ill., assignor to Chicago, Rail**way Signal and Supply Company. Lamp-locating device. 1,563,510; Dec. 1.

**McClelland, Walter J., East Orange, N. J.** Stocking. 1,563,764; Dec. 1.

**McClelland, William H., Huntingdon, assignor, by mesne** assignments, to R. P. M. Davis, Mount Union, Pa. Safety device. 1,563,422; Dec. 1.

**McClelland, William H., assignor, by mesne assignments,** to R. P. M. Davis, Mount Union, Pa. Stripper. 1,563,423; Dec. 1.

**McClymont, Bryce W., Walkerville, Ontario, Canada, and** S. J. North, Detroit, Mich. Valve. 1,563,385; Dec. 1.

**McCormick, Wallace H., Streator, Ill.** Universal mounting and hoist for dumping-truck bodies. 1,563,638; Dec. 1.

**McCormick, Wallace H., Streator, Ill.** Dumping mechanism for truck bodies. 1,563,639; Dec. 1.

**McCormick, Wallace H., Streator, Ill.** Hoist for dumping truck. 1,563,640; Dec. 1.

**McCready, Charles T., Onley, Va.** Vine turner. 1,563,765; Dec. 1.

**McDade, James E., Chicago, Ill.** Silent-reading story-illustrating arrangement. 1,563,582; Dec. 1.

**McDonald, Hugh F., San Francisco, Calif.** Collapsible hat holder. 1,563,511; Dec. 1.

**McDonald, Leslie R., Westmount, Quebec, Canada.** Telephone diaphragm. 1,563,512; Dec. 1.

**McFeil, Judson, Chicago, Ill.** Automatic controlling means for oil burners and the like. 1,564,084; Dec. 1.

**McGee, Patrick A., Wilkinsburg, Pa., assignor to West**inghouse Electric & Manufacturing Company. Catenary system. 1,563,386; Dec. 1.

**McKee, Arthur G., assignor to Arthur G. McKee & Com**pany, Cleveland, Ohio. Distributor drive for blast-furnace stacks. 1,563,424; Dec. 1.

**McKee, Arthur G., & Company.** (See McKee, Arthur G., assignor.)

**McKee, Ralph H.** (See Barnitt, Jesse B., assignor.)

**McLaren, William E., Los Angeles, Calif.** Vehicle. 1,563,766; Dec. 1.

**McLaughlin, William I., Oakland, assignor to Standard** Oil Company, San Francisco, Calif. Fishing tool for underreamer bits. 1,563,641; Dec. 1.

**McLauthlin, Martin B., Malden, Mass.** Machine for cutting sheet material. 1,564,006; Dec. 1.

**McMillan Allie, Embarrass, Wis.** Ensilage protector. 1,564,085; Dec. 1.

**McNeill, George K., assignor to Morgan & Wright, Detroit,** Mich. Apparatus for removing vulcanizing bags. 1,563,513; Dec. 1.

**McNeill, Ralph W., Wilkinsburg, Pa., assignor to West**inghouse Electric & Manufacturing Company. Motor-control system. 1,564,007; Dec. 1.

**McVeety, James H.** (See Morton, James E., assignor.)

**Meikiejohn, Thomas W., Fond du Lac, Wis.** Automotive vehicle. 1,564,090; Dec. 1.

**Melton, Ethel, Atlanta, Ga.** Child's bed. 1,563,428; Dec. 1.

**Mergenthaler Linotype Company.** (See Kennedy, David S., assignor.)

**Mergenthaler Linotype Company.** (See Rogers, John R., assignor.)

**Metals Protection Corp.** (See Humphries Chad H., assignor.)

**Mewborn, Sidney G., Wilson, N. C.** Automobile dirigible headlight. 1,563,911; Dec. 1.

**Meyer, Otto A., Winchester, Ind.** Headlight-operating device. 1,563,774; Dec. 1.

**Meyers, George W., Rahway, N. J., assignor to National** Pneumatic Company, New York, N. Y. Centrifugally-operated circuit breaker. 1,563,773; Dec. 1.

**Mieg, Walter, Vohwinkel, and H. Raeder, Leverkusen,** near Cologne, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Sulfonated oxy-dianthraquinonylamine dyestuffs and making the same. 1,564,091; Dec. 1.

**Migel, Louey.** (See Hannah, Robert L., assignor.)

**Miles, Thomas J., Louisville, Ky.** Display rack. 1,563,429; Dec. 1.

**Miller, Frank R., assignor to The Hobart Manufacturing** Company, Troy, Ohio. Food-treating apparatus. 1,563,389; Dec. 1.

**Miller, Frank S., St. Louis, Mo.** Fuel-saving device. 1,564,176; Dec. 1.

**Miller, James, and H. Gruber, Nehawka, Nebr.** Automatic hog waterer. 1,563,775; Dec. 1.

**Miller, John W., Pasadena, Calif.** Power-transmission mechanism. 1,563,514; Dec. 1.

**Miller, Matthias, Gainesville, Fla.** Tire changer. 1,564,092; Dec. 1.

**Miller Saw-Trimmer Company.** (See Smith, Walter H., assignor.)

**Miller, Vernon L., assignor to The Faultless Rubber Com**pany, Ashland, Ohio. Return ball. 1,563,912; Dec. 1.

**Millspaugh, William H., assignor to The Paper & Textile** Machinery Company, Sandusky, Ohio. Vacuum pump. 1,563,583; Dec. 1.

**Mine & Smelter Supply Company, The.** (See Thompson, Charles E., assignor.)

**Minett, Wilfrid T.** (See Keall, F. B., and Minett.)

**Mirfield, George E., Youngstown, Ohio.** Method and apparatus for rounding articles. Re16,220; Dec. 1.

**Mitchell, Frederick G., Ridgefield Park, N. J.** Automatic cut-off switch for radio receiving sets. 1,563,776; Dec. 1.

**Mitchell, Thomas A., Ridgewood, N. J., and K. Taube,** New York, N. Y. Making arsenates. 1,564,093; Dec. 1.

**Monroe, William A., Jasper, Fla.** Vine clipper or cutter. 1,564,094; Dec. 1.

**Moberley, Edward S., Detroit, Mich.** Piston ring. 1,564,095; Dec. 1.

**Molt, Robert E.** (See Johnston, J. A., and Molt.)

**Monti, Endo, Turin, Italy.** Preparation of concentrated unalterable foods. 1,563,515; Dec. 1.

**Moore, Calvin C., Steubenville, Ohio.** Headlamp-control device. 1,563,430; Dec. 1.

**Moore, James A., Rochester, and J. S. Conley, Beaver, Pa.** Spacing mechanism. 1,564,096; Dec. 1.

**Moran, William F., Chicago, assignor of one-half to W. J.** Conlon, Oak Park, Ill. Automatic reversing mechanism for washing machines. 1,563,913; Dec. 1.

**Morehouse, Eugene, assignor to B. A. Ballou & Co., Inc.,** Providence, R. I. Safety catch. 1,563,777; Dec. 1.

**Morgan & Wright.** (See McNeill, George K., assignor.)

**Morgan & Wright.** (See Otto, Albert, assignor.)

**Morkrum Company.** (See Brady, John B., assignor.)

**Morkrum Kleinschmidt Corporation.** (See Kleinschmidt, Edward E., assignor.)

**Morkrum Kleinschmidt Corporation.** (See Nelson, Carl E., assignor.)

**Morris, Connie W., Fremont, N. C.** Curtain fastener. 1,564,097; Dec. 1.

Morse, Albert A., Chicago, Ill., assignor to Athey Company. Weather strip. 1,564,182; Dec. 1.
Morse, Thomas W., Ridgefield Park, N. J., assignor to The Flintkote Company, Boston, Mass. Process and apparatus for producing waterproofing material and product produced thereby. 1,563,642; Dec. 1.
Mortensen, Jacob, Moorhead, Iowa. Pump jack. 1,564,098; Dec. 1.
Morton, Charles M., Buffalo, N. Y. Closure for containers. 1,564,099; Dec. 1.
Morton, James E., West Lafayette, Ind., assignor of one-half to J. H. McVeety, Memphis, Tenn. Automobile parking machine. 1,564,100; Dec. 1.
Moss, William R. (See Cooley, Hiram W., assignor.)
Mudd, Rolla E., Chicago Ill. Neutral latch for planetary transmissions. 1,563,778; Dec. 1.
Mueller, Charles W., St. Louis, Mo., assignor, by mesne assignments, to Lewis Invisible Stitch Machine Co. Work-handling mechanism for sewing machines. 1,564,177; Dec. 1.
Mueller, Theodore G. (See Schmidt, W. H., Dallmann, and Mueller.)
Müller, Enrique, Chihuahua, Mexico. Vacuum tank. 1,563,516; Dec. 1.
Murphy, Paul B., Nyack, assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. 1,563,517; Dec. 1.
Muzzio, James A., Cleveland, Ohio. Locking mechanism. 1,563,914; Dec. 1.
Myers, Eugene V., East Orange, N. J. Gas engine. 1,564,009; Dec. 1.
Nakamura, Tadao, Los Angeles, Calif. Bag holder. 1,564,101; Dec. 1.
National Carbon Company. (See Heise, George W., assignor.)
National Pneumatic Company. (See Meyers, George W., assignor.)
Nelson, Carl E., Brooklyn, N. Y., assignor, by mesne assignments, to Morkrum-Kleinschmidt Corporation, Chicago, Ill. Tabulating mechanism for printing telegraphs. 1,563,915; Dec. 1.
Neptune Meter Company. (See Marden, William L., assignor.)
Neureuther, Andrew H., Peru, Ill., assignor, by mesne assignments, to Western Clock Company. Machine for manufacturing and mounting pinions and wheels. 1,563,431; Dec. 1.
New Idea Spreader Co. (See Oppenheim, T. H., and Selhorst, assignors.)
New Jersey Twin Hoist Company. (See Gasser, Joseph, assignor.)
Newport News Shipbuilding and Dry Dock Company. (See Smith, Godfrey L., assignor.)
Newsom, James B., Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. 1,563,643; Dec. 1.
Nichols, Harold W., Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Wave-receiving system. 1,563,644; Dec. 1.
Nicholson, Stanley W., assignor to The Dura Company, Toledo, Ohio. Window-controlling device. 1,563,390; Dec. 1.
Nicholson, Stanley W., assignor to The Dura Company, Toledo, Ohio. Window-controlling device. 1,563,391; Dec. 1.
Nicholson, William C. (See Boxer, M., and Nicholson.)
Nieberding, Frank A., Cleveland, Ohio. Valve. 1,563,916; Dec. 1.
Nielsen, John. (See Gardner, E. B., Gardner, and Nielsen.)
Nielsen, John, et al. (See Gardner, Ralph D., assignor.)
Non-Explosive Corporation of America. (See Cohn, Jacob assignor.)
Nordin, Josef A., assignor to Aktiebolaget Stille-Werner Stockholm, Sweden. Apparatus for manufacturing ligatures and the like. 1,563,779; Dec. 1.
North American Company, The. (See Rowland, Arthur J., assignor.)
North, Seth J. (See McClymont, B. W., and North.)
Northern Corrugating Co. (See Grueger, Albert G., assignor.)
Northey, John P., trustee. (See Northey, Rodney V., assignor.)
Northey, Rodney V., assignor to J. P. Northey, trustee, Toronto, Ontario, Canada. Glb. 1,563,518; Dec. 1.
Nourney, Carl, Berlin-Wilmersdorf, Germany. Translucent luminous advertising mirror. 1,564,010; Dec. 1.
Nowosielski, Edward B., Bloomfield, assignor to Splitdorf Electrical Company, Newark, N. J. Two-spark magneto. 1,564,102; Dec. 1.
Noyes, Ned H. (See Clough, M. P., and Noyes.)
Nuttall, R. D., Company. (See Burnham, Leland F., assignor.)
Nyquist, Harry, Elmhurst, N. Y., assignor to American Telephone and Telegraph Company. Composite ringer for transmission systems. 1,563,432; Dec. 1.
Obergfell, Herbert F., River Forest, assignor to Automatic Electric Company, Chicago, Ill. Combined ringer box and telephone desk stand. Des. 68,929; Dec. 1.
O'Brien, Florrence S., St. Paul, Minn. Combined salt and pepper shaker. 1,563,917; Dec. 1.
O'Connor, Arthur F., assignor to Union Railway Equipment Company, Chicago, Ill. Valve for brine tanks 1,563,645; Dec. 1.
Off 'N' On Chain Corporation. (See Johnston, Andrew L., jr., assignor.)
Ogden, John E. (See Tomkinson, Charles C., assignor.)
Oliver, John R., Medfield, assignor to Reece Shoe Machinery Company, Boston, Mass. Stopping and starting mechanism for shoe-stitching or other machines. 1,564,103; Dec. 1.
Olson, Emil, South Haven, Minn. Door-holding device. 1,564,104; Dec. 1.
Opalka, William G. (See Zwirner, Oscar, assignor.)
Oppenheim, Theodore H., and H. Selhorst, assignors to New Idea Spreader Co., Coldwater, Ohio. Alignment jig for use in casting rolls. 1,564,011; Dec. 1.
Orem, Frederick S., Baltimore, Md. Air cleaner for automobile engines and the like. 1,564,178; Dec. 1.
Orr, Fingal C. (See Major, R., Durbin, and Orr.)
Osborn, Alden H., New York, N. Y. Internal-combustion engine. 1,563,392; Dec. 1.
O'Shaughnessy, Thomas A., Chicago, Ill. Refractory glass plate or articles and producing the same. 1,563,584; Dec. 1.
Osterman, Lawrence, Chicago, Ill. Music-leaf turner. 1,563,393; Dec. 1.
Otto, Albert, assignor to Morgan & Wright, Detroit, Mich. Apparatus for manufacturing tire casings. 1,563,519; Dec. 1.
Ouellet, Albert F., New York, N. Y. Saw. 1,564,105; Dec. 1.
Ovenshire, Clyde A., Berkeley, assignor to California By-Products Company, San Francisco, Calif. Handle structure for tennis rackets. 1,563,780; Dec. 1.
Ovington, Edward J., Auburndale, Mass., assignor to Davis & Geck, Inc., Brooklyn, N. Y. Suture. 1,564,012; Dec. 1.
Owen, Jack M., Long Beach, Calif. Oil-well cementing. 1,563,520; Dec. 1.
Owens Bottle Company. (See Soubier, Leonard D., assignor.)
Owens, Freeman H., New York, N. Y. Motion-picture apparatus. 1,563,394; Dec. 1.
Oxford Paper Company. (See Hosmer, Guy F., assignor.)
Page, Charles E., Baldwinsville, N. Y. Weighing scale. 1,563,781; Dec. 1.
Paine, Arthur P., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Needle-positioning means for Axminster looms. 1,563,585; Dec. 1.
Pallesen, Nels P. (See Peters, J. D., and Pallesen.)
Pank, Harold G., and C. W. Laubman, Adelaide, South Australia, Australia. Sight-testing apparatus. 1,564,013; Dec. 1.
Paper & Textile Machinery Company, The. (See Millspaugh, William H., assignor.)
Parks Bros. & Rogers, Inc. (See Forsell, Frans E., assignor.)
Parks Bros. & Rogers, Inc. (See Kennedy, Andrew J., assignor.)
Parsons, Harold K., assignor to American Optical Company, Southbridge, Mass. Grinding lenses. 1,563,918; Dec. 1.
Parsons, Louis R., Raritan, Ill. Rail and tie plate therefor. 1,563,919; Dec. 1.
Partington, Jack A., San Francisco, Calif. Theatrical novelty. 1,563,782; Dec. 1.
Patzschke, Otto, Sondershausen, Germany. Stretching apparatus for treating arm and leg fractures. 1,564,106; Dec. 1.
Paul, Leon R., Chicago, Ill. Self-cleaning bathtub. 1,563,733; Dec. 1.
Paulus, Charles L. (See Russell, H. O., and Paulus.)
Paulus, Charles L., and R. Kauch, Dayton, Ohio. Rudder bar for aircraft. 1,563,433; Dec. 1.
Pearson, Absalom F., Mountain View, assignor of one-half to R. D. Pearson, Los Angeles, Calif. Incubator. 1,563,646; Dec. 1.
Pearson, Edward, Dalbo, Minn. Weighing stand. 1,563,521; Dec. 1.
Pearson, Robert D. (See Pearson, Absalom F., assignor.)
Pedersen, John D., Jackson, Wyo. Firearm. 1,564,014; Dec. 1.
Pemberton, Elmer, Hyde Park, Calif. Incubator. 1,563,647; Dec. 1.
Penn, Oscar S., London, assignor to Roadless Traction Limited, Hounslow, England. Endless track for vehicles. 1,563,522; Dec. 1.
Peppard, Mayme J., Minneapolis, Minn. Trunk. 1,563,784; Dec. 1.
Perkins, Benjamin C., assignor to The Arrow Electric Company, Hartford, Conn. Luminous attachment for electric-switch-operating members. 1,564,015; Dec. 1.
Perkins, Benjamin C., assignor to The Arrow Electric Company, Hartford, Conn. Electric switch. 1,564,016; Dec. 1.
Perkins, Thomas S., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Trolley pole. 1,563,395; Dec. 1.
Peters, Jay D., and N. P. Pallesen, Marcus, Iowa. Snowplow. 1,563,920; Dec. 1.
Petersen, George E., assignor to William H. Grundy Company, Inc., Bristol, Pa. Liquid-feed receptacle. 1,563,396; Dec. 1.
Peterson, Isaac, Berkeley, Calif. Spacing fastener for wire screens. 1,563,785; Dec. 1.
Petersson, Ernst, Orebro, Sweden. Device for casting iron and other difficultly-fusible metals under pressure. 1,563,523; Dec. 1.

Pevely Dairy Company. (See Copp, Ralph, assignor.)
Pevely Dairy Company. (See Kerckhoff, D. C., and Copp, assignors.)
Pewther, Judson C., Denver, Colo. Valve grinder. 1,564,017; Dec. 1.
Pewther, Judson C., Wichita, Kans. Steering stabilizer. 1,564,018; Dec. 1.
Phelps, Roswell F., East Dedham, Mass. Adjustable chart. 1,563,786; Dec. 1.
Pictures Development Co. (See Bulask, Francis J., assignor.)
Pierce, Clarence A., Lowell, Mass. Bunch-building spinning-frame cam. 1,563,648; Dec. 1.
Pierce, Henry M., Chippewa Falls, Wis. Milk-bottle cover. 1,564,019; Dec. 1.
Pierman, Alexander N., Newark, and N. A. Curtiss, Ramsey, N. J., assignors to M. R. Hutchison, New York, N. Y. Silencer for telephones and the like. 1,563,586; Dec. 1.
Pigman, Marlo D., Middletown, Ohio. Suction box. 1,563,649; Dec. 1.
Pihl, Albert, Murray, Utah, assignor to Holliday & Manufacturing Company. Telephone receiver. 1,563,787; Dec. 1.
Pleines, Henry T., Cleveland, assignor to The Lakewood Engineering Company, Lakewood, Ohio. Industrial truck. 1,563,650; Dec. 1.
Plooster, Neal W., Prescott, Ariz. Brush. 1,564,107; Dec. 1.
Plummer, John S., Dayton, Ohio. Safeguard for banks. 1,563,921; Dec. 1.
Pluto, Joseph, Pontiac, Mich. Tire valve. 1,564,108; Dec. 1.
Pohler, Herman M., Milwaukee, Wis. Propelling mechanism for boats. 1,563,922; Dec. 1.
Pollak, Fritz. (See Ripper, Kurt, assignor.)
Pomerant, Isadore, assignor to W. F. Sheehan, St. Louis, Mo. Interlocking sheet-steel frame for anchorage of plaster boards. 1,563,651; Dec. 1.
Pondelick, John, Riverside, Ill. Piston for internal-combustion engines. 1,563,932; Dec. 1.
Ponolle, Léon, Angers, France. Post base. 1,564,109; Dec. 1.
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Automatic telephone system. 1,563,652; Dec. 1.
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Automatic telephone system. 1,564,020; Dec. 1.
Prater, John, Stanfield, Oreg. Weeder. 1,563,434; Dec. 1.
Pratt, Carl D., Tamaqua, Pa., assignor to Atlas Powder Company, Wilmington, Del. Blasting-powder composition. 1,563,924; Dec. 1.
Pratt, Carl D., Tamaqua, Pa., assignor to Atlas Powder Company, Wilmington, Del. Blasting-powder composition. 1,563,925; Dec. 1.
Pratt, Carl D., Tamaqua, Pa., assignor to Atlas Powder Company, Wilmington, Del. Blasting-powder composition. 1,563,926; Dec. 1.
Prendergast, Edward, St. Louis, Mo. Mop and handle therefor. 1,563,653; Dec. 1.
Prentice, G. E., Manufacturing Company. (See Legas, Robert C., assignor.)
Prentice, G. E., Manufacturing Company. (See Prentice, George E., assignor.)
Prentice, George E., Berlin, assignor to G. E. Prentice Manufacturing Company, New Britain, Conn. Key case. 1,564,021; Dec. 1.
Prenzel, Adam H., Halifax, Pa. Stapling machine. 1,563,435; Dec. 1.
Prescott, William E., Harrow, England. Machine for mixing. 1,563,524; Dec. 1.
Price, David R., assignor of one-half to C. Delano, Newtonville, Mass. Electrical system for motor vehicles. 1,563,525; Dec. 1.
Priebe, Herman C., Blue Island, Ill. Truck bolster. 1,563,654; Dec. 1.
Primm, Joseph P., assignor of one-fourth to H. R. Berry and one-fourth to J. M. Berry, Rome, Ga. Cam box for knitting machines. 1,563,788; Dec. 1.
Prinzler, Carl J., assignor to Vonnegut Hardware Company, Indianapolis, Ind. Door holder. 1,564,183; Dec. 1.
Prinzler, Carl J., assignor to Vonnegut Hardware Company, Indianapolis, Ind. Strike for doorlocks. 1,564,184; Dec. 1.
Prior, Rufus W., assignor to The Crittall Manufacturing Company, Limited, Braintree, England. Mechanism for opening and closing casement windows. 1,563,655; Dec. 1.
Probert, George S., Dayton, Ohio. Device for buffing matrices for type-casting machines. 1,564,110; Dec. 1.
Proctor & Schwartz, Incorporated. (See Buckley, Joseph L., assignor.)
Pürrer, Anton, Klosterneuburg, Austria. Piano action or movement. 1,563,526; Dec. 1.
Putnam, Russell M., Oconto Falls, Wis. Ripple and bubble eliminator. 1,563,436; Dec. 1.
Racine Tool & Machine Company. (See Reinhardt, W. C., and Lundgren, assignors.)
Racine Tool & Machine Company. (See Reinhart, William C., assignor.)
Raes, Emanuel M., et al. (See Sholts, Richard J., assignor.)
Radiotive Corporation. (See Schmidt, Lambert, assignor.)
Radioff, Max P. E., Hustisford, Wis. Automobile headlight. 1,563,656; Dec. 1.
Raeder, Heinrich. (See Mieg, W., and Raeder.)
Rahn, Joseph C. W., Utica, N. Y. Sweater coat. 1,563,927; Dec. 1.
Ramage, Lockheart W., Ilfracombe, Queensland, Australia. Car coupler. 1,564,111; Dec. 1.
Rambo, Rawdon E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Pneumatic brush holder. 1,563,397; Dec. 1.
Raney, Murray, Chattanooga, Tenn. Preparing catalytic material. 1,563,587; Dec. 1.
Rasmussen, Alfred, St. Paul, Minn. Wringer. 1,564,112; Dec. 1.
Ratigan, James P., Walnut Park, Calif. Ball construction for grips and the like. 1,563,657; Dec. 1.
Rauhofer, John, Bethlehem, Pa. Book clamp. 1,564,113; Dec. 1.
Reagan, Maurice E., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Automatic reclosing circuit interrupter. 1,563,398; Dec. 1.
Redrup, Charles B., Leeds, England. Valve mechanism of internal-combustion engines. 1,563,789; Dec. 1.
Reece Shoe Machinery Company. (See Carlson, Axel F., assignor.)
Reece Shoe Machinery Company. (See Oliver, John R., assignor.)
Reece Shoe Machinery Company. (See Zaleski, Frank W., assignor.)
Reed, James H., Swampscott, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Shoe-sewing machine. 1,563,437; Dec. 1.
Reeves, Orwell C., assignor to Toledo Scale Company, Toledo, Ohio. Scale base. Des. 68,930; Dec. 1.
Reid, Jesse M., Pullman, Wash. Signaling device. 1,563,790; Dec. 1.
Reid, John J. (See Gilchrist, H. W., and Reid.)
Reid, William, Philadelphia, Pa. Garment hanger. 1,563,928; Dec. 1.
Reinhardt, William C., assignor to Racine Tool & Machine Company, Racine, Wis. Portable rail-sawing machine. 1,564,114; Dec. 1.
Reinhardt, William C., and A. W. Lundgren, assignors to Racine Tool & Machine Company, Racine, Wis. Hack saw. 1,563,870; Dec. 1.
Reinhold, Frederick E., assignor of one-half to A. E. Keller, Los Angeles, Calif. Arrangement for parking vehicles. 1,563,929; Dec. 1.
Reliance Die and Stamping Company. (See Lindberg, John F., assignor.)
Richard, Charles D., West New Brighton, assignor to Western Electric Company, Incorporated, New York, N. Y. Line switch. 1,563,658; Dec. 1.
Richard, John H., assignor to Richards Airbrake Co. Inc., Buffalo, N. Y. Brake mechanism for automobiles. 1,563,588; Dec. 1.
Richards Airbrake Co. (See Richard, John H., assignor.)
Richardson, William B., Dockers Plains, Via Wangaratta, Victoria, Australia. Distance control attachment for tractors. 1,563,791; Dec. 1.
Rickard, John H., Lexington, N. C., Cableless elevator. 1,563,792; Dec. 1.
Ricketts, Forrest E., Catonsville, Md. Electrical protective device. 1,563,399; Dec. 1.
Ridenour, Herbert L., Hicksville, Ohio. Control for pipes of tanks. 1,564,179; Dec. 1.
Riley, Robert S., assignor to Sanford Riley Stoker Company, Worcester, Mass. Ash support for mechanical stokers. 1,563,930; Dec. 1.
Rinehart, Charles A. (See Hooppaw, O. W., and Rinehart.)
Riordan, Robert J., and J. P. Hanley, Chicago, Ill.; said Riordan assignor to said Hanley. Garment-display rack. 1,563,659; Dec. 1.
Ripper, Kurt, assignor to F. Pollak, Vienna, Austria. Applying metallic coatings to porous bases. 1,563,793; Dec. 1.
Roadless Traction Limited. (See Penn, Oscar S., assignor.)
Robb, Mortimer M., Duluth, Minn. Elevator safety device. 1,563,400; Dec. 1.
Robbins, Meyer L., assignor to Untermeyer Robbins & Co., New York, N. Y. Ring. Des. 68,931; Dec. 1.
Robbins, Meyer L., assignor to Untermeyer Robbins & Co., New York, N. Y. Ring. Des. 68,932; Dec. 1.
Robbins, Meyer L., assignor to Untermeyer Robbins & Co., New York, N. Y. Ring. Des. 68,933; Dec. 1.
Robbins, Meyer L., assignor to Untermeyer Robbins & Co., New York, N. Y. Gem-set ring. Des. 68,934; Dec. 1.
Robbins, Meyer L., assignor to Untermeyer Robbins & Co., New York, N. Y. Ring. Des. 68,935; Dec. 1.
Robbins, Meyer L., assignor to Untermeyer Robbins & Co., New York, N. Y. Gem-set ring. Des. 68,936; Dec. 1.
Robbins, Meyer L., assignor to Untermeyer Robbins & Co., New York, N. Y. Ring. Des. 68,937; Dec. 1.
Robbins, Meyer L., assignor to Untermeyer Robbins & Co., New York, N. Y. Ring. Des. 68,938; Dec. 1.
Robbins, Meyer L., assignor to Untermeyer Robbins & Co., New York, N. Y. Gem-set ring. Des. 68,939; Dec. 1.

Roberts, William, Springfield, Ohio. Drinking fountain. 1,563,794; Dec. 1.

Roberts, William, Springfield, Ohio. Door holder. 1,563,795; Dec. 1.

Robertshaw, George A., Greensburg, Pa., Safety device for hot-water systems. 1,564,115; Dec. 1.

Robinson, Robert M., assignor to Cheatham Electric Switching Device Co., Inc., Louisville, Ky. Locking device for electric switches. 1,564,022; Dec. 1.

Rogers, John R., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical distributing machine. 1,563,796; Dec. 1.

Roller Harry F., San Diego, Calif. Valve and cap apparatus. 1,563,871; Dec. 1.

Rontani, Agostino, Cloverdale, Calif. Automobile fender. 1,564,116; Dec. 1.

Ross, James C., Seattle, Wash. Faucet. 1,563,589; Dec. 1.

Ross, Robert E., El Paso, Tex. Automatic safety device for motor-vehicle starters. 1,563,527; Dec. 1.

Rossignol, Aaron T. (See Stickley, J. W., and Rossignol.)

Rote, Bela W., Cleveland, Ohio. Manufacturing plastic compositions. 1,563,872; Dec. 1.

Rottel, Herman W., Milwaukee, Wis. Valve. 1,563,590; Dec. 1.

Rousseau, Ernest N., Detroit, Mich. Wagon. 1,563,401; Dec. 1.

Rowland, Arthur J., Milwaukee, Wis., assignor to The North American Company, New York, N. Y. Testing apparatus. 1,564,138; Dec. 1.

Rubin, Benjamin A., Chicago, Ill. Garment hanger. 1,563,660; Dec. 1.

Rubio, Salvador, Los Angeles, Calif. Knee or foot rest for shovels and the like. 1,563,528; Dec. 1.

Rudolph, Wilhelm. (See Hecht, H., Rudolph, Lichte, and Hahnemann.)

Rueliand, Albertine, New York, N. Y. Electric iron. 1,563,591; Dec. 1.

Russell, Arthur, assignor to The Russell Radio Corporation, Baltimore, Md. Variable condenser. 1,563,440; Dec. 1.

Russell, Herbert O., Detroit, Mich., and C. L. Paulus, Dayton, Ohio. Operating trigger for double-gun mounts. 1,563,438; Dec. 1.

Russell, Herbert O., Detroit, Mich., and C. L. Paulus, Dayton, Ohio. Flare bracket. 1,563,439; Dec. 1.

Russell Radio Corp, The. (See Russell, Arthur, assignor.)

Ryan, Benjamin J., Dallas, Tex. Machine for forming garment hangers. 1,563,797; Dec. 1.

Ryder, Elmer, Berwyn, Ill. Motor-car heater. 1,563,402; Dec. 1.

Ryder, Elmer, Berwyn, Ill., Water circulator for motor vehicles. 1,563,403; Dec. 1.

Ryon, Eppa H., Pasadena, Calif., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Weft-carrier magazine. 1,563,592; Dec. 1.

Safety Gas Jet Co. (See Gilden, Abraham J., assignor.)

Saklatwalla, Byramji D., Crafton, Pa. Manufacture of alloy steels and irons. 1,564,139; Dec. 1.

Sandow Tool Co. U. S. A. (See Berger, Nathan L., assignor.)

Sanford Riley Stoker Company. (See Riley, Robert S., assignor.)

Sargeant, John M., Elmira, N. Y. Apparatus for constructing thin concrete walls and erecting the same. 1,563,798; Dec. 1.

Sargent & Company. (See Sargent, Edward R., assignor.)

Sargent, Edward R., assignor to Sargent & Company, New Haven, Conn. Casket handle. 1,563,873; Dec. 1.

Sato, Ryuji, New York, N. Y. Amusement device. 1,564,140; Dec. 1.

Satterlee, Henry S., New York, N. Y. Flexible core for molding. 1,563,529; Dec. 1.

Saunders, John H., Klikenny, South Australia, Australia. Device for overcoming the break-of-gauge difficulty in railways. 1,563,530; Dec. 1.

Sawkins, Huntington D., Baltimore, Md. Peanut drying and roasting apparatus. 1,563,861, Dec. 1.

Scanlan, Daniel J., St. Louis, Mo. Draft regulator. 1,564,023; Dec. 1.

Schaal, Emil V., Harrisburg, Pa. Electric-furnace control. 1,563,441; Dec. 1.

Schall, Clinton W., Columbus, Ohio. Building slab. 1,563,593; Dec. 1.

Scheben, Laurence J., Dayton, Ohio. Shaft thrust lock. 1,563,442; Dec. 1.

Scherer, Adolph, Philadelphia, Pa. Combination lamp and lamp shade. 1,564,024; Dec. 1.

Scherer, Franz J., Gregory, S. Dak. Adjustable knock-down bookstand and shelving. 1,563,799; Dec. 1.

Schers, Louis, Wilkes-Barre, Pa. Lamp holder for miners' caps. 1,563,931; Dec. 1.

Scheuner, Johann, Konolfingen, Switzerland. Addressing machine. 1,564,025; Dec. 1.

Schieferstein, Georg H., Berlin-Charlottenburg, Germany. Balancing and coupling freely-oscillating units and units with restrained oscillations. 1,563,531; Dec. 1.

Schlumberger, Jacob, Milwaukee, Wis. Power plant. 1,563,405; Dec. 1.

Schmidt, Lambert, assignor to Radiotive Corporation, Brooklyn, N. Y. Telephone apparatus. 1,564,026; Dec. 1.

Schmidt, William H., P. O. Dallmann, and T. G. Mueller, assignors to Dallmann Machine & Manufacturing Co., Milwaukee, Wis. Hoist for tractors. 1,563,874; Dec. 1.

Schmittuts, Carl, Bad Kissingen, Germany. Impregnating living trees. 1,564,141; Dec. 1.

Schnorr, Fred J., Two Rivers, Wis. Cone holder. 1,563,443; Dec. 1.

Schock, Clarence, Mount Joy, Pa. System for dispensing gasoline. 1,563,444; Dec. 1.

Scholes, George E., Birkenhead, England. Calorimeter. 1,563,662; Dec. 1.

Scholles, Albert J., Mobile, Ala. Ribbon fabric. Des. 68,940; Dec. 1.

Schrader's A., Son, Incorporated. (See Wichmann, Carl F., assignor.)

Schultz, Henry F., Grand Rapids, Mich. Pivot pin. 1,563,404; Dec. 1.

Schwalbe, Carl G., Eberswalde, Germany. Utilizing sulphite cellulose lye. 1,564,142; Dec. 1.

Schwartz, Sam, Memphis, Tenn. Stand. Des. 68,941; Dec. 1.

Scobell, George W., Rochester, N. Y. Carboy top guard. 1,563,445; Dec. 1.

Scofield, Sherman W., and J. B. La Rue, Cleveland, Ohio; said La Rue assignor to said Scofield. Separating the constituents of mineral silicates. 1,563,875; Dec. 1.

Seabury, Ralph L., Toledo, Ohio. Bearing. 1,563,663; Dec. 1.

Seem, Charles B., Williamsport, Pa. Casting radiator sections and the like. 1,564,185; Dec. 1.

Sekulitch, Dushan S., Washington, D. C. Hair clipper. 1,564,143; Dec. 1.

Selhorst, Bernard. (See Oppenheim, T. H., and Selhorst.)

Senett, John H., Woodlawn, Pa. Making pipe couplings. 1,563,664; Dec. 1.

Shadrick, Richard H., Minneapolis, Minn. Heater control. 1,563,532; Dec. 1.

Sheehan, Walter F. (See Pomerants, Isadore, assignor.)

Sholtz, Richard J., assignor of one-third to E. M. Race and one-third to C. M. Hardenbergh, Kansas City, Mo. Package sorter. 1,563,446; Dec. 1.

Short, David L., Philadelphia, Pa. Hair curler. 1,564,027; Dec. 1.

Short, Thomas M., Camden on Gauley, W. Va. Stump puller. 1,563,665; Dec. 1.

Shuler, William A. (See Ford, S. C., and Shuler.)

Siemens & Halske Aktiengesellschaft. (See Kaminski, Paul, assignor.)

Sievern, Fredrick, McKeesport, Pa. Antiskid device. 1,563,666; Dec. 1.

Signal Gesellschaft m. b. H. (See Hecht, H., Lichte, Rudolph, and Hahnemann, assignors.)

Simmen, Paul J., Eden, N. Y. Train-control system. 1,564,144; Dec. 1.

Simmons, R. F., Company. (See Vetter, Louis J., assignor.)

Simonton, Hugh E., Memphis, Tenn. Antislipping device for motor vehicles. 1,563,447; Dec. 1.

Sinclair Refining Company. (See Isom, E. W., and Bell, assignors.)

Sinks, Frank F., Seattle, Wash. Shore. 1,563,533; Dec. 1.

Skinner, Mortimer B., Wilmette, Ill. Branch-pipe connection device. 1,563,406; Dec. 1.

Sleeper, Frank H., assignor to Sleeper & Hartley, Inc., Worcester, Mass. Speed-change gearing. 1,563,594; Dec. 1.

Sleeper & Hartley, Inc. (See Sleeper, Frank H., assignor.)

Slepian, Joseph, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Mechanical rectifying system. 1,563,407; Dec. 1.

Smith, Baius F., Kansas City, Mo. Shock-absorbing device for doors. 1,563,876; Dec. 1.

Smith, Charles F., Chicago, Ill. Dishwashing machine. 1,564,028; Dec. 1.

Smith, Charles W., Keyser, W. Va. Superheated-steam locomotive. 1,563,932; Dec. 1.

Smith, De Walt W., assignor of one-half to N. V. Trautman, Louisville, Ky. Indicator. 1,563,534; Dec. 1.

Smith, George D. (See Holthaus, R. B., and Smith.)

Smith, Godfrey L., assignor to Newport News Shipbuilding and Dry Dock Company, Newport News, Va. Suspension device. 1,564,029; Dec. 1.

Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,563,800; Dec. 1.

Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,564,448; Dec. 1.

Smith, John E., Fremont, N. C. Backstrap for draft animals. 1,563,801; Dec. 1.

Smith, Robert, near San Jose, Calif. Striker plate. 1,563,667; Dec. 1.

Smith, Virgil S., and W. E. Clarke, Yale, Okla. Grasshopper exterminator. 1,563,668; Dec. 1.

Smith, Walter H., assignor to Miller Saw-Trimmer Company, Pittsburgh, Pa. Printing press. 1,563,449; Dec. 1.

Smith, William A., Athens, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Water-tube connection. 1,563,802; Dec. 1.

Smith-Vaile Manufacturing Co. (See Fleming, Robert G., assignor.)

Snow, Lorenzo L., Washington, D. C. Airplane-radiator shutter. 1,563,450; Dec. 1.

Snow, Oliver R. (See Carlson, B. A., and Snow.)

Snyder, Simon, assignor to Sprout, Waldron & Co., Muncy, Pa. Extensible crank element. 1,563,669; Dec. 1.

Societe Anonyme Anciens Etablissements Georges Pellerin. (See Boulanger, Charles, assignor.)

Société Anonyme Le Carbone. (See Street, Ernest A. G., assignor.)

Soemer, John O., Newark, N. J. Doorlock. 1,564,030; Dec. 1.

Sondack, Abraham, Bronx, N. Y. Ironing board. 1,563,535; Dec. 1.

Sondrup, Hans L., St. Paul, Nebr. Attachment for stacker teeth. 1,564,145; Dec. 1.

Sonn, Israel, Schuylerville, N. Y. Hosiery and supporter therefor. 1,563,877; Dec. 1.

Sonnenberg, Joseph, Irvington, N. J. Combined door knob and lock. 1,564,031; Dec. 1.

Sonora Phonograph Company. (See Farb, Pincus, assignor.)

Sonora Phonograph Company. (See Malocsay, Frank, assignor.)

Soresi, Angelo L., New York, N. Y. Apparatus for surgical uses. 1,564,146; Dec. 1.

Soubier, Leonard D., assignor to The Owens Bottle Company, Toledo, Ohio. Glass-forming machine. 1,563,933; Dec. 1.

Southern, Robert L., Berkeley, Calif. Vehicle body. 1,563,803; Dec. 1.

Speckerter, Heinrich, Griesheim-on-the-Main, assignor to Shemische Fabrik Griesheim-Elektron, Frankfort-on-the-Main, Germany. Producing artificial cryolite free from iron, from aluminum-salt solutions containing iron. 1,563,536; Dec. 1.

Spellman, Edward R., Walla Walla, Wash. Draft equalizer. 1,563,804; Dec. 1.

Spencer, Leon C., Ogden, Utah. Electro-magnetically-operated starter switch. 1,563,670; Dec. 1.

Spengler, George H., assignor to F. V. Bogart, Rockford, Ill. Punch. 1,563,671; Dec. 1.

Sperr, Frederick W., jr., assignor to The Koppers Company, Pittsburgh, Pa. Coking process. 1,563,595; Dec. 1.

Sperry, Elmer A., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Gyroscopic inclinometer for aeroplanes. 1,563,934; Dec. 1.

Sperry Gyroscope Company, The. (See Sperry, Elmer A., assignor.)

Spicer, Clarence W., and G. L. Tarbox, Plainfield, N. J., assignors to Spicer Manufacturing Corporation. Flexible coupling. 1,564,186; Dec. 1.

Spicer Manufacturing Corporation. (See Spicer, C. W., and Tarbox, assignors.)

Spiltdorf Electrical Company. (See Nowosielski, Edward B., assignor.)

Sprout, Waldron & Co. (See Snyder, Simon, assignor.)

Standard Chemical Company. (See Vogt, Louis F., assignor.)

Standard Oil Company. (See McLaughlin, William I., assignor.)

Standard Underground Cable Company. (See Atkinson, Ralph W., assignor.)

Stanek, Charles, Orient, Iowa. Drawbar for harrows. 1,563,878; Dec. 1.

Steise, John G., Kitchener, Ontario, Canada. Time switch. 1,563,587; Dec. 1.

Stenhouse, Thomas, Washington, Pa., assignor to Hazel-Atlas Glass Co., Wheeling, W. Va. Glass-feeding apparatus. 1,563,935; Dec. 1.

Stenzler, Max, Philadelphia, Pa. Cigar and cigarette extinguisher. 1,563,805; Dec. 1.

Stewart, Benjamin F., Birmingham, Ala. Hair curler. 1,563,936; Dec. 1.

Stickley, John W., and A. T. Rossignol, Washington, D. C. Sinker. 1,564,147; Dec. 1.

Stitcher, Charles E., Bay City, Mich. Anchor. 1,563,451; Dec. 1.

Stoltz, Glenn E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Motor-control system. 1,563,452; Dec. 1.

Stover Rubber Co. (See Stover, Thomas B., assignor.)

Stover, Thomas B., Winona, Minn., assignor to Stover Rubber Co. Duo-cord tire construction. 1,563,672; Dec. 1.

Stowe, Fred C. (See Field, W. E., and Stowe.)

Stowe & Woodward Company. (See Adams, H. B., and Woodward, assignors.)

Street, Ernest A. G., assignor to Société Anonyme le Carbone, Levallois-Perret, France. Impermeabilizing substances for absorbing gas. 1,563,673; Dec. 1.

Strehlein, Mary A., Chicago, Ill. Hook and eye. 1,563,538; Dec. 1.

Streun, John A., Sherman, Tex. Cotton cleaner. 1,563,596; Dec. 1.

Stroefer, Theodore J., New Bremen, Ohio. Broomcorn-hurl-shaking machine. 1,563,937; Dec. 1.

Stromberg-Carlson Telephone Manufacturing Company, The. (See Powell, Winfred T., assignor.)

Stromberg Motor Devices Company. (See Whitehorn Homer A., assignor.)

Stuart, Alexander A. S., Bethlehem, Pa. Surgical knife. 1,563,674; Dec. 1.

Stuckert, John F., Philadelphia, Pa. Roofing construction. 1,564,032; Dec. 1.

Sublette, William M., Los Angeles, Calif. Hydraulic power transmission and brake. 1,564,033; Dec. 1.

Sullivan, John M., Culver, Ind. Water-tube boiler. 1,563,938; Dec. 1.

Sumter, Jacob, New York, N. Y. Photographic-developing apparatus. 1,564,148; Dec. 1.

Sutherland, Ernest E., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Electric heater. 1,563,453; Dec. 1.

Sutherland, Ernest E., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Electric resistor support. 1,563,454; Dec. 1.

Sutherland, Thomas G., Chicago, Ill. Fountain marking pencil or pen. 1,563,408; Dec. 1.

Swars, Paul G., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Trolley-conductor device. 1,563,455; Dec. 1.

Tansley, George H., assignor to Colt's Patent Fire Arms Manufacturing Company, Hartford, Conn. Automatic pistol. 1,563,675; Dec. 1.

Tarbox, Gurdon L. (See Spicer, C. W., and Tarbox.)

Taylor, John C., Hermansville, Mich. Testing and truing device. 1,563,939; Dec. 1.

Taylor Smith & Taylor Company, The. (See Beattie, Kenneth P., assignor.)

Taylor, William L., Black Oak, Ark. Saw set. 1,563,539; Dec. 1.

Texas Company. (See Woodbridge, Charles E., assignor.)

Thomas, Cecil V. (See Davis, J. M., and Thomas.)

Thomas, Thomas, Scranton, Pa. Safety device for tanks. 1,564,149; Dec. 1.

Thompson, Albert E., assignor to Anderson-Barngrover Mfg. Co., San Jose, Calif. Pressure cooker. 1,564,150; Dec. 1.

Thompson, Charles E., assignor to The Mine & Smelter Supply Company, Denver, Colo. Self-oiling head motion. 1,564,151; Dec. 1.

Thompson, David W., San Gabriel, Calif. Garage-door catch. 1,563,879; Dec. 1.

Thomson, John M., Nutley, N. J. Sample-display folder. 1,564,152; Dec. 1.

Tichenor, William P. (See Matthews, Edward, assignor.)

Tillyer, Edgar D., assignor to American Optical Company, Southbridge, Mass. Ophthalmic lens. 1,563,806; Dec. 1.

Tinnerman, Albert H., Cleveland, Ohio. Stove-oven front frame. 1,564,034; Dec. 1.

Toabe, Kebe. (See Mitchell, T. A., and Toabe.)

Toledo Scale Company. (See Reeves, Orwell C., assignor.)

Tomkinson, Charles C., Plainfield, N. J., assignor to J. E. Ogden, Mountainville, N. Y. Power-operated door-closure mechanism. 1,563,456; Dec. 1.

Trabold, Frank W., Marion, Ind. Wrench. 1,564,035; Dec. 1.

Trautman, Neal V. (See Smith, De Walt W., assignor.)

Trenn, Frank W., Willoughby, Ohio, assignor to The Economy Engineering Company. Bolt machine. 1,563,940; Dec. 1.

Tuerck, Johan K., Portland, Oreg. Gear-shifting and car-locking mechanism for motor vehicles. 1,563,807; Dec. 1.

Turner, Claude A. P., Minneapolis, Minn. Reenforced-concrete foundation and pier and sinking the same. 1,563,676; Dec. 1.

Tuttle, Ralph P., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,564,153; Dec. 1.

Uhlig, Richard W., Newark, N. J., assignor to Allen Typewriter Manufacturing Company, Allentown, Pa. Typewriting machine. 1,563,597; Dec. 7.

Uhlrich, Alfred C., Horicon, Wis. Measuring instrument. 1,564,154; Dec. 1.

Underwood Typewriter Company. (See Mason, John J., assignor.)

Underwood Typewriter Company. (See Smith, Jesse A. B., assignor.)

Union Railway Equipment Company. (See O'Connor, Arthur F., assignor.)

Union Switch & Signal Company. (See Tuttle, Ralph P., assignor.)

Union Switch & Signal Company, The. (See Young, Henry S., assignor.)

United Shoe Machinery Corporation. (See Kenll, F. B., and Minett, assignors.)

United Shoe Machinery Corporation. (See Reed, James H., assignor.)

United Shoe Machinery Corporation. (See Warren, George E., assignor.)

Untermeyer, Robbins & Co. (See Robbins, Meyer L., assignor.)

Vance, Walter N., Chicago Heights, assignor to Durand Steel Locker Company, Chicago, Ill. Locker. 1,563,880; Dec. 1.

Vander Bogart, Frank. (See Spengler, George H., assignor.)

Van [illegible] John, Kalamazoo, Mich. Tank or ball valve. 1,563,457; Dec. 1.

Vargo, Mike, Yukon, Pa. Ball rack. 1,564,155; Dec. 1.

Vaughan, Victor G., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Percolator heater unit. 1,563,458; Dec. 1.

Verona Tool Works. (See Costello, William J., jr., assignor.)

Vetter, Louis J., assignor to R. F. Simmons Company, Attleboro, Mass. Catch. 1,563,881; Dec. 1.
Vickers Limited. (See Cooch, Herbert, assignor.)
Vivarttas, William O. (See Mattison, C. L., and Vivarttas.)
Vogt, Louis F., Washington, assignor to Standard Chemical Company, Pittsburgh, Pa. Making ferrovanadium. 1,564,156; Dec. 1.
Volech, František, Vrchlabi, Czechoslovakia. Card-saving device for dobby looms. 1,563,540; Dec. 1.
Volland, Homer W., assignor to H. W. Graham, Omaha, Nebr. Dispensing device. 1,563,459; Dec. 1.
Vonnegut Hardware Company. (See Prinzler, Carl J., assignor.)
Wagenhorst, James H., Jackson, Mich. Mandrel for battery jars. 1,563,808; Dec. 1.
Wagenhorst, James H., Jackson, Mich. Battery-jar-forming machine. 1,563,809; Dec. 1.
Wagenhorst, James H., Jackson, Mich. Demountable rim with attached clamping lug. 1,563,810; Dec. 1.
Wagenhorst, James H., Jackson, Mich. Rim for tires and making same. 1,563,811; Dec. 1.
Wagner, William F., Ambridge, Pa. Ignition breaker. 1,563,677; Dec. 1.
Wainwright, Lawrence, Chicago, Ill. Variable grid leak. 1,564,157; Dec. 1.
Waite Grass Carpet Company. (See Waite, Ossian T., assignor.)
Waite, Ossian T., assignor to Waite Grass Carpet Company, Oskosh, Wis. Rug strand. 1,564,036; Dec. 1.
Wakeman, Delbert G., Mooresville, Ind. Building construction. 1,563,598; Dec. 1.
Walker Manufacturing Company. (See Jensen, Gunnar, assignor.)
Walker, Thomas E., assignor to Crittall Casement Window Company, Detroit, Mich. Doorsill and weather strip. 1,563,409; Dec. 1.
Walker, William, Sawtelle, Calif. Smoking pipe. 1,563,460; Dec. 1.
Waller, Alfred E., Bronxville, N. Y., assignor to Ward Leonard Electric Company. Resistance device and welding wire. 1,563,812; Dec. 1.
Walter, Charles E., Cleveland, Ohio. Car roof. 1,564,037; Dec. 1.
Walter, Ira D., assignor of one-fourth to J. Brinkerhoff and one-fourth to C. R. French, Harrisburg, Ark. Metal-felly wheel. 1,563,882; Dec. 1.
Walters, James N., East Orange, N. J., assignor to American Telephone and Telegraph Company. Telephone-exchange system. 1,563,599; Dec. 1.
Walton, John R., Harvey, Ill. Well drill and tool. 1,563,600; Dec. 1.
Ward Leonard Electric Company. (See Waller, Alfred E., assignor.)
Warren, George E., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Cushion heel. 1,564,158; Dec. 1.
Washington, George, jr., and R. Coller, Brooklyn, N. Y. Closure for fluid containers. 1,563,813; Dec. 1.
Waterbury Button Company, The. (See Kaynor, Warren F., assignor.)
Waters, Frederick, Lyons Falls, N. Y. Ratchet wrench. 1,563,883; Dec. 1.
Watson, Harry G., Fairbanks, Alaska. Flash light. 1,563,601; Dec. 1.
Watson, Henry and J. H., Vernon, British Columbia, Canada. Motor-car starting-switch protector. 1,564,159; Dec. 1.
Watson, John H. (See Watson, Henry and J. H.)
Webster, William A., Galesburg, Ill. Farm gate. 1,563,602; Dec. 1.
Wegert, William H., Racine, Wis. Gear. 1,564,160; Dec. 1.
Weingarten, Alfred, Berlin, Germany. Procedure for sensitizing kinofilms for positive copies by means of solutions of bichromate. 1,564,161; Dec. 1.
Welshan, Louis, Milwaukee, Wis. Antiglare device. 1,563,884; Dec. 1.
Weiss, Abraham, New York, N. Y. Attachment for taximeter vehicles. 1,564,038; Dec. 1.
Weiss, Alfred H., Wilmette, assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Ignition and lighting switch. 1,563,411; Dec. 1.
Weiss, John M., New York, N. Y. Incorporation of Rubber in nonaqueous materials. 1,563,410; Dec. 1.
Welker-Hoops Manufacturing Company, The. (See Welker, Oscar B., assignor.)
Welker, Oscar B., assignor to The Welker-Hoops Manufacturing Company, Middletown, Conn. Cap for containers. 1,563,885; Dec. 1.
Welker, Oscar B., assignor to The Welker-Hoops Manufacturing Company, Middletown, Conn. Cap for containers. 1,563,886; Dec. 1.
Welsbach Company. (See Lyon, Howard, assignor.)
Wertzberger, Dallas D., Tulsa, Okla. Well-drilling derrick. 1,563,412; Dec. 1.
West, Maxwell A., Portland, Oreg. Guy-line grip. 1,563,603; Dec. 1.
Western Electric Company. (See Clark, Edgar H., assignor.)
Western Electirc Company. (See Curtis, Austen M., assignor.)
Western Electric Company. (See From, Owen C., assignor.)
Western Electric Company. (See Gibson, Earl S., assignor.)
Western Electric Company. (See Goff, Harold W., assignor.)
Western Electric Company. (See Gorton, William S., assignor.)
Western Electric Company. (See Hinrichsen, Edward E., assignor.)
Western Electric Company. (See Hoge, Joseph F. D., assignor.)
Western Electric Company. (See Murphy, Paul B., assignor.)
Western Clock Company. (See Neureuther, Andrew H., assignor.)
Western Electric Company. (See Newsom, James B., assignor.)
Western Electric Company. (See Nichols, Harold W., assignor.)
Western Electric Company. (See Richard, Charles D., assignor.)
Westinghouse Electric & Manufacturing Company. (See Auel, Carl B., assignor.)
Westinghouse Electric & Manufacturing Company. (See Brackett, Quincy A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Breisch, Edgar W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Caputo, James, assignor.)
Westinghouse Electric & Manufacturing Company. (See Conrad, Frank, assignor.)
Westinghouse Electric & Manufacturing Company. (See Ehrgott, Karl, assignor.)
Westinghouse Electric & Manufacturing Company. (See Fortescue, Charles L., assignor.)
Westinghouse Electric & Manufacturing Company. (See Fox, John C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hibbard, Lloyd J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hoxy, Samuel C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Kindermann, Louis F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Legg, Joseph W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Marbury, Ralph E., assignor.)
Westinghouse Electric & Manufacturing Company. (See McGee, Patrick A., assignor.)
Westinghouse Electric & Manufacturing Company. (See McNeill, Ralph W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Perkins, Thomas S., assignor.)
Westinghouse Electric & Manufacturing Company. (See Rambo, Rawdon E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Reagan, Maurice E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Slepian, Joseph, assignor.)
Westinghouse Electric & Manufacturing Company. (See Stoltz, Glenn E., assignor.)
Westinghouse Electric & Manufacturing Co. (See Sutherland, Ernest E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Swars, Paul G., assignor.)
Westinghouse Electric & Manufacturing Company. (See Vaughan, Victor G., assignor.)
Westinghouse Electric Products Company. (See Forshee, Frank F., assignor.)
Wheeler, C. H., Manufacturing Company. (See Kothny, Gottdank L., assignor.)
Whitcomb, Herbert H., Arlington, Mass., assignor to M. W. Carr & Company, Inc. Beverage mixer. 1,563,413; Dec. 1.
White, S. S., Dental Manufacturing Company, The (See Barton, Samuel R., assignor.)
Whitehorn, Homer A., Port Washington, N. Y., assignor to Stromberg Motor Devices Company, Chicago, Ill. Carburetor. 1,564,039; Dec. 1.
Whitlock, Lawrence E., Le Roy, N. Y. Cleaning powder and disinfectant. 1,563,604; Dec. 1.
Whitlow, John W. (See Blevins, Ira V., assignor.)
Whitney Metal Tool Company. (See Jensen, John, assignor.)
Wichmann, Carl F., assignor to A. Schrader's Son, Incorporated, Brooklyn, N. Y. Ferrule-contracting machine. 1,563,941; Dec. 1.
Wierdsma, Paul, Petaluma, Calif. Poultry drinking fountain. 1,563,414; Dec. 1.
Wiese, Otto C., Brooklyn, N. Y. Beam tension device for knitting machines. 1,564,162; Dec. 1.
Wiespetat, Julius, Racine, Wis. Drill press guard. 1,563,887; Dec. 1.
Wilcox, Lewis T. (See Homan, William C., assignor.)
Willard, Carl L., Lynwood, Calif. Concrete-handling machine. 1,564,180; Dec. 1.
Willcox, Frederick H., and J. C. Hayes, Jr., assignors to Freyn, Brassert & Company, Chicago, Ill. Valve for hot-blast stoves. 1,563,605; Dec. 1.
Williams, Charles E., Chicago, Ill. Telephone earpiece or receiver. 1,563,888; Dec. 1.
Williams, Elmer H., Monessen, Pa. Storage battery. 1,564,163; Dec. 1.
Williams, Gordon, Mount Carmel, Conn. Windshield. 1,563,606; Dec. 1.

Williams, Reginald V., Buffalo, N. Y. Dental clasp. 1,564,164; Dec. 1.
Williams, Samuel P., assignor to The Hart & Hegeman Manufacturing Company, Hartford, Conn. Cap for an electrical device. Des. 68,942; Dec. 1.
Williams, Zenas H., San Antonio, Tex. Level device. 1,563,678; Dec. 1.
Willson, Thomas H., Seattle, Wash. Auxiliary electric water heater. 1,564,040; Dec. 1.
Wilmont, John F., Detroit, Mich. Vehicle wheel. 1,563,679; Dec. 1.
Wilson, Emma A., executrix. (See Hall, George H.)
Wilson, James F., Shepparton, Victoria, Australia. Carbendlight anti-dazzle device. 1,563,415; Dec. 1.
Wilson, Paul, et al. (See Hall, Randolph F., assignor.)
Wilson, Stephen G., Philadelphia, Pa. Whisk. 1,563,814; Dec. 1.
Windecker, Clifton N., Painesville, Ohio. Grab bucket. 1,564,041; Dec. 1.
Wine, William E., Toledo, Ohio. Railway car. 1,564,165; Dec. 1.
Winn, Charles B., Buffalo, N. Y. Ankle joint for artificial limbs. 1,564,166; Dec. 1.
Wisneske, Anthony F., Detroit, Mich. Combination Tool. 1,563,815; Dec. 1.
Witherow Steel Company. (See Witherow, William P., assignor.)
Witherow, William P., Pittsburgh, assignor to Witherow Steel Company, Neville Island, Pittsburgh, Pa. Wrench blank and making same. 1,564,167; Dec. 1.
Wohlers, Friedrich H. N. (See Koch, H., and Wohlers.)
Wolff, Aaron H., New York, N. Y. Diaphragm pressure regulator for gas heaters. 1,563,607; Dec. 1.
Wolfson, Henry M., New York, N. Y. Variable condenser 1,563,416; Dec. 1.
Wood, Jesse N., Venice, Ill. Air and fuel heater for internal-combustion engines. 1,563,608; Dec. 1.
Woodbridge, Charles E., Brooklyn, assignor to The Texas Company, New York, N. Y. Gasoline-pump casing. Des. 68,943; Dec. 1.
Woodward, Frederick R. (See Adams, R. B., and Woodward.)
Worthington, Charles C., Dunfield, N. J. Golf bag. 1,563,816; Dec. 1.
Wright, Jacob P., Barberton, Ohio, assignor to The Diamond Match Company, Chicago, Ill. Sheet feeding mechanism. 1,563,417; Dec. 1.
Wright, Richard G., Waterford, Conn. Broom holder 1,563,817; Dec. 1.
Wyant, Lynton D., Tulsa, Okla. Oil-cracking and carbon removing method and apparatus. 1,563,818; Dec. 1
Young, Henry S., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway traffic-controlling apparatus. 1,563,819; Dec. 1.
Young, Henry S., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,563,820; Dec. 1.
Young, Roy W., Elmore, Minn. Protective device for fences. 1,564,168; Dec. 1.
Zahn, Lawrence J., Astoria, N. Y., assignor to The International Postal Supply Company. Printing mechanism. 1,564,042; Dec. 1.
Zaleski, Frank W., assignor to Reece Shoe Machinery Company, Boston, Mass. Sewing machine. 1,564,169; Dec. 1.
Zastrow, Frederic W., Wilwaukee, Wis., Mopboard protector. 1,563,889; Dec. 1.
Zaun, Henry C., Oakland, Calif. Signal. 1,563,821; Dec. 1.
Zerk, Oscar, now by judicial change of name O. U. Zerk, Cleveland, Ohio, assignor, by mesne assignments, to The Bassick Manufacturing Company. Lubricating apparatus. 1,563,609; Dec. 1.
Ziegler, Milton H., Akron, Ohio. Weather strip. 1,563,610; Dec. 1.
Zwirner, Oscar, Hamtramck, assignor of one-half to W. G. Opalka, Detroit, Mich. Football game. 1,563,680; Dec. 1.

# ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

## PATENTS WERE ISSUED ON THE 1ST DAY OF DECEMBER, 1925.

**NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.**

Addressing machine. J. Scheuner. 1,564,025; Dec. 1.
Adjusting devices at a distance, System for. P. Kaminski. 1,563,994; Dec. 1.
Aeroplanes, Gyroscopic inclinometer for. E. A. Sperry. 1,563,934; Dec. 1.
Aeroplanes, Helicopter attachment for. M. Bugar. 1,563,720; Dec. 1.
Air-break switch, High-tension. C. Christensen. 1,563,833; Dec. 1.
Aircraft, Rudder bar for. C. L. Paulus and R. Kauch. 1,563,433; Dec. 1.
Airplane. R. F. Hall. 1,563,979; Dec. 1.
Airplane cockpits, Protection screen for. N. L. Kearney. 1,563,374; Dec. 1.
Airplane-radiator shutter. L. L. Snow. 1,563,450; Dec. 1.
Airplanes, Steam-power plant for. W. Leathers. 1,563,504; Dec. 1.
Alloy and structure, etc., Heat-resisting. N. V. Hybinette. 1,563,575; Dec. 1.
Alloy steels and irons, Manufacture of. B. D. Saklatwalla. 1,564,139; Dec. 1.
Amusement device. R. Sato. 1,564,140; Dec. 1.
Anchor. C. E. Stitcher. 1,563,451; Dec. 1.
Animal trap. E. E. May. 1,563,772; Dec. 1.
Antiglare device. L. Welshan. 1,563,884; Dec. 1.
Antiskid device. F. Sievern. 1,563,666; Dec. 1.
Anvils of saw swages, Stop gauge for setting. E. P. Armstrong. 1,563,462; Dec. 1.
Aperture stopper. J. H. Hazlewood. 1,563,743; Dec. 1.
Archery device. E. F. Maxwell. 1,564,089; Dec. 1.
Armor plate, Manufacture of. J. B. Johnson and S. Daniels. 1,563,420; Dec. 1.
Arsenates, Making. T. A. Mitchell and K. Toabe. 1,564,093; Dec. 1.
Article holder. W. H. Lester. Des. 68,924; Dec. 1.
Ash stand, Smokeless. R. G. Fleming. Des. 68,903; Dec. 1.
Automobile bumper. J. B. Drennan. 1,563,475; Dec. 1.
Automobile engines and power-delivering device, Portable frame structure for. I. A. Dunlap. 1,564,131; Dec. 1.
Automobile engines and the like, Air cleaner for. F. S. Orem. 1,564,178; Dec. 1.
Automobile fender. A. Rontani. 1,564,116; Dec. 1.
Automobile parking machine. J. E. Morton. 1,564,100; Dec. 1.
Automobile radiators, Manufacturing. W. Korb. 1,563,502; Dec. 1.
Automobile signal. M. P. Clough and N. H. Noyes. 1,564,123; Dec. 1.
Automobiles, Brake mechanism for. J. H. Richard. 1,563,588; Dec. 1.
Automobiles, Combination brake and jack mechanism for. E. and C. Ferry. 1,563,842; Dec. 1.
Automotive vehicle. T. W. Meiklejohn. 1,564,090; Dec. 1.
Backstrap for draft animals. J. E. Smith. 1,563,801; Dec. 1.
Baffle and constructing the same. I. Harter. 1,563,567; Dec. 1.
Baffle construction. G. H. Dickson. 1,563,969; Dec. 1.
Bag: *See*—
  Golf bag.
Bag holder. T. Nakamura. 1,564,101; Dec. 1.
Ball: *See*—
  Return ball.
Ball rack. M. Vargo. 1,564,155; Dec. 1.
Balloon, Jumping. W. E. Huffman, C. F. Adams, and M. Q. Corbett. 1,563,571; Dec. 1.
Banks, Safeguard for. J. S. Plummer. 1,563,921; Dec. 1.
Bar: *See*—
  Bus bar. Switch-throwing bar.
Barrel-making machines, Heading holder for. E. F. Beugler. 1,564,043; Dec. 1.
Basket. C. H. Dreher. 1,563,730; Dec. 1.
Bathtub, Self-cleaning. L. R. Paul. 1,563,783; Dec. 1.
Battery: *See*—
  Storage battery.
Battery compartment, Storage-. S. C. Ford and W. A. Shuler. 1,564,173; Dec. 1.
Battery-jar-forming machine. J. H. Wagenhorst. 1,563,809; Dec. 1.
Battery jars, Mandrel for. J. H. Wagenhorst. 1,563,808; Dec. 1.
Battery plates, Recovery and utilization of materials of old secondary. J. O. Luthy. 1,563,506; Dec. 1.
Bearing. R. L. Seabury. 1,563,663; Dec. 1.
Bearing box, Self-aligning Pitman. V. L. Forsyth. Re16,219; Dec. 1.
Bearing for rotary printing couples. F. Herb. 1,563,487; Dec. 1.
Bearing-grinding machine. R. Johnson. 1,563,712; Dec. 1.
Bed, Child's. E. Melton. 1,563,428; Dec. 1.
Belt fasteners and the like, Machine for setting or applying. J. K. Diamond. 1,563,345; Dec 1.
Beverage mixer. H. H. Whitcomb. 1,563,413; Dec. 1.
Billiard cue G. K. Canias. 1,563,467; Dec. 1.
Blasting-powder composition. C. D. Pratt. 1,563,924–6; Dec. 1.
Block: *See*—
  Crown block.
Board: *See*—
  Ironing board.
Boats, Propelling mechanism for. H. M. Pohler. 1,563,922; Dec. 1.
Boiler: *See*—
  Ham boiler. Water-tube boiler.
Boiler baffles, Making. G. H. Dickson. 1,563,968; Dec. 1.
Boiler installation, Steam-. T. Larrey and L. Godard. 1,563,503; Dec. 1.
Boilers, Cleaning system for. S. J. Lupton. 1,563,909; Dec. 1.
Bolt machine. F. W. Trenn. 1,563,940; Dec. 1.
Bolts and rivets, Method of and apparatus for making nutless. A. Christianson. 1,563,965; Dec. 1.
Book clamp. J. Rauhofer. 1,564,113; Dec. 1.
Bookstand and shelving, Adjustable knockdown. F. J. Scherer. 1,563,799; Dec. 1.
Boot and shoe. P. G. Knoll. 1,563,498; Dec. 1.
Bottle cover, Milk-. H. M. Pierce. 1,564,019; Dec. 1.
Box: *See*—
  Folding box. Paper folding box.
  Mail box. Suction box.
Box insert. A. W. Huyett. 1,563,369; Dec. 1.
Bracket: *See*—
  Flare bracket.
Braid, Forming. G. D. Goodspeed. 1,563,564; Dec. 1.
Brake: *See*—
  Fluid brake. Friction brake.
Brake mechanism and magnet system therefor. W. S. Atkinson. 1,563,544; Dec. 1.
Brake shoes, Shell for composition. M. R. De France. 1,563,728; Dec. 1.
Bran food, Manufacture of. J. L. Kellogg. 1,564,181; Dec. 1.
Brickmaking machine. B. F. Hayden. 1,564,067; Dec. 1.
Broiler, Sausage. O. Fest. 1,563,973; Dec. 1.
Broom-corn-hurl-shaking machine. T. J. Stroefer. 1,563,937; Dec. 1.
Broom holder. R. G. Wright. 1,563,817; Dec. 1.
Brush. N. W. Flooster. 1,564,107; Dec. 1.
Brush holder, Pneumatic. R. E. Rambo. 1,563,397; Dec. 1.
Brushlike articles, Manufacturing. J. A. Hultqvist. 1,563,367; Dec. 1.
Bucket, Grab. C. N. Windecker. 1,564,041; Dec. 1.
Buckle. W. E. Hatheway. 1,563,360; Dec. 1.
Building construction. D. G. Wakeman. 1,563,598; Dec. 1.
Building slab. C. W. Schall. 1,563,593; Dec. 1.
Burner: *See*—
  Oil-stove burner.
Burner. R. L. Hannah. 1,564,064; Dec. 1.
Bus bar, Polyphase. E. H. Jacobs. 1,563,859; Dec. 1.
Button. W. F. Kaynor. Des. 68,920; Dec. 1.
Button, Separable. F. E. Forsell. 1,563,974; Dec. 1.
Button, Separable cuff. W. E. Field and F. C. Stowe. 1,563,350–1; Dec. 1.
Cabinet, Dispensing. A. G. Krueger. 1,563,867; Dec. 1.
Cableless elevator. J. H. Rickard. 1,563,792; Dec. 1.
Calculating machine. C. Luttropp. 1,563,763; Dec. 1.
Calorimeter. G. E. Scholes. 1,563,662; Dec. 1.
Canned foods, Sterilizing. W. B. Fenn. 1,563,971; Dec. 1.
Cap, Combination. D. L. Mantle. 1,563,507; Dec. 1.
Car and the like, Hopper. A. Campbell. 1,563,553; Dec. 1.

Car, Convertible stock. R. C. Chisam. 1,563,470; Dec. 1.
Car coupler. L. W. Ramage. 1,564,111; Dec. 1.
Car, Dump. W. M. Brown. 1,563,880; Dec. 1.
Car heater, Motor. E. Ryder. 1,563,402; Dec. 1.
Car, Railway. W. E. Wine. 1,564,165; Dec. 1.
Car roof. C. E. Walter. 1,564,037; Dec. 1.
Car starting-switch protector, Motor-. H. and J. H. Watson. 1,564,159; Dec. 1.
Cars, End construction for. J. W. Coleman. 1,563,835; Dec. 1.
Cars, End stiffener for. J. W. Coleman. 1,563,834; Dec. 1.
Carbon and other coated papers, Making. A. Haigh and H. R. Hart. 1,563,978; Dec. 1.
Carboy-top guard. G. W. Scobell. 1,563,445; Dec. 1.
Carburetor. M. G. Chandler. 1,563,339; Dec. 1.
Carburetor. J. Good. 1,563,482; Dec. 1.
Carburetor. J. C. Hansen-Ellehammer. 1,563,705; Dec. 1.
Carburetor. H. A. Whitehorn. 1,564,039; Dec. 1.
Carpet-manufacturing machine. M. Carranza. 1,563,338; Dec. 1.
Carrier: *See*—
  Collapsible carrier.
Cascade machine. F. Creedy. 1,563,474; Dec. 1.
Case: *See*—
  Key case. Vanity case.
Casket handle. E. R. Sargent. 1,563,873; Dec. 1.
Casserole or similar article. K. P. Beattie. Des. 68,891; Dec. 1.
Casting iron and other difficultly-fusible metals under pressure, Device for. E. Petersson. 1,563,523; Dec. 1.
Casting rolls, Alignment jig for use in. T. H. Oppenheim and B. Selhorst. 1,564,011; Dec. 1.
Catalytic material, Preparing. M. Raney. 1,563,587; Dec. 1.
Catch. L. J. Vetter. 1,563,881; Dec. 1.
Catch basin and trap, Combined. W. J. Femal. 1,563,695; Dec. 1.
Catenary system. P. A. McGee. 1,563,886; Dec. 1.
Cattle guard. J. Gibson. 1,563,858; Dec. 1.
Cement, Manufacturing. C. Leonardt. 1,563,755; Dec. 1.
Cementing, Oil-well. J. M. Owen. 1,563,520; Dec. 1.
Centrifugal machine. W. C. Coleman. 1,563,894; Dec. 1.
Centrifugal separator. H. P. Hoyle. 1,563,491; Dec. 1.
Chains, Automatic machine for making. A. L. Johnston, jr. 1,563,993; Dec. 1.
Chair: *See*—
  Hairdresser's and barber's chair.
Chaplet. S. H. Gibson. 1,563,480; Dec. 1.
Chart, Adjustable. R. F. Phelps. 1,563,786; Dec. 1.
Chimney protector. S. A. Holland. 1,563,706; Dec. 1.
Chlorination apparatus. S. Brown. 1,564,044; Dec. 1.
Chocolate, Treatment of. J. B. Barnitt. 1,563,682; Dec. 1.
Cigar and cigarette extinguisher. M. Stenzler. 1,563,805; Dec. 1.
Cigar-bunch-charge former. W. B. Bronander. 1,563,333; Dec. 1.
Cigar bunching. B. Liberman. 1,563,756; Dec. 1.
Cigar lighter. J. M. Jackson. 1,564,072; Dec. 1.
Cigar lighter and stand. H. J. Grieshaber. 1,563,845; Dec. 1.
Cigarette-machine automatic feed. W. B. Bronander. 1,563,334; Dec. 1.
Cinematographic films, Printing color. P. D. Brewster. 1,563,959; Dec. 1.
Circuit breaker, Centrifugally-operated. G. W. Meyers. 1,563,778; Dec. 1.
Circuit interrupter. J. F. D. Hoge. 1,563,488; Dec. 1.
Circuit interrupter, Automatic reclosing. M. E. Reagan. 1,563,398; Dec. 1.
Clamp: *See*—
  Book clamp.
Clamp. J. A. Johnston and R. E. Molt. 1,563,903; Dec. 1.
Clasp: *See*—
  Dental clasp.
Cleaner: *See*—
  Cotton cleaner.
Cleaning powder and disinfectant. L. E. Whitlock. 1,563,604; Dec. 1.
Closet: *See*—
  Ventilating closet. Water-closet.
Closure-plate-securing means. M. V. Kelly. 1,563,865; Dec. 1.
Cloth-expanding roller. T. Greis. 1,563,704; Dec. 1.
Clutch and latch mechanism, Combined. G. Haag. 1,563,622; Dec. 1.
Clutch mechanism for double-drum hoists. C. C. Hansen. 1,563,742; Dec. 1.
Clutch speed-changing and reversing mechanism. H. A. Good. 1,563,741; Dec. 1.
Clutch structure, Disk-. E. R. Clayton and A. H. Kirksey. 1,563,892; Dec. 1.
Coal elevating and conveying apparatus. R. MacEachen. 1,563,387; Dec. 1.
Coaster or toboggan, Water. P. Held. 1,563,855; Dec. 1.
Coat collar and producing and applying the same. I. I. Frankel. 1,564,055; Dec. 1.
Coat construction. H. S. W., and J. Haspel. 1,564,066; Dec. 1.
Coat-hanger attachment. C. A. Fetters. 1,563,735; Dec. 1.
Coat, Sweater. J. C. W. Rahn. 1,563,927; Dec. 1.
Coatings to porous bases, Applying metallic. K. Ripper. 1,563,793; Dec. 1.
Coking process. F. W. Sperr, jr. 1,563,595; Dec. 1.
Collapsible carrier. C. and O. A. Flagstad. 1,563,897; Dec. 1.
Comb. O. W. Johnson. 1,563,711; Dec. 1.
Conch for the manufacture of chocolate. F. G. Fryer. 1,563,898–9; Dec. 1.
Concrete form. M. D. May. 1,563,581; Dec. 1.
Concrete foundation and pier and sinking the same, Reenforced-. C. A. P. Turner. 1,563,676; Dec. 1.
Concrete-handling machine. C. L. Willard. 1,564,180; Dec. 1.
Concrete-molding apparatus. R. S. Ellis. 1,563,615; Dec. 1.
Concrete walls and erecting the same, Apparatus for constructing thin. J. M. Sargeant. 1,563,798; Dec. 1.
Condensation-preventing device. B. C. Frederickson. 1,563,701; Dec. 1.
Condenser. R. N. Ehrhart. 1,564,052; Dec. 1.
Condenser. E. G. Helander. 1,563,981; Dec. 1.
Condenser. E. W. Isom and J. E. Bell. 1,563,492; Dec. 1.
Condenser. J. F. Lindberg. 1,563,758; Dec. 1.
Condenser, Electrical. M. Latour. 1,563,754; Dec. 1.
Condenser, Electrostatic. P. G. Jacobson. 1,563,709; Dec. 1.
Condenser for power-factor correction. R. E. Marbury. 1,563,426; Dec. 1.
Condenser, Multiple variable. S. Cohen. 1,563,893; Dec. 1.
Condenser, Spiral reflux. F. J. Brown. 1,563,718; Dec. 1.
Condenser, Surface. P. A. Bancel. 1,563,951; Dec. 1.
Condenser, Variable. A. Russell. 1,563,440; Dec. 1.
Condenser, Variable. H. M. Wolfson. 1,563,416; Dec. 1.
Cone holder. F. J. Schnorr. 1,563,443; Dec. 1.
Contact means, Adjustable. B. F. Lollis. 1,563,578; Dec. 1.
Containers, Cap for. O. B. Welker. 1,563,885–6; Dec. 1.
Containers, Closure for. C. M. Morton. 1,564,099; Dec. 1.
Control means. V. M. Balzer and J. Ballou. 1,563,950; Dec. 1.
Control, System. J. Caputo. 1,563,837; Dec. 1.
Converting motion. H. B. Lowden. 1,563,761; Dec. 1.
Conveyer apparatus for grain and like material. G. Bernert. 1,563,826; Dec. 1.
Core, Collapsible. M. D. May. 1,563,580; Dec. 1.
Core drill. R. R. Crum. 1,563,837; Dec. 1.
Core for molding, Flexible. H. S. Satterlee. 1,563,529; Dec. 1.
Coring and trimming mechanism. W. B. Fenn. 1,563,972; Dec. 1.
Cornice and the like, Window. W. Goodrow. 1,563,619; Dec. 1.
Cotter-pin puller. H. D. Dirks. 1,563,840; Dec. 1.
Cotton cleaner. J. A. Streun. 1,563,596; Dec. 1.
Counter partition, Lunch-. C. O. Larmore. 1,563,881; Dec. 1.
Coupling: *See*—
  Flexible coupling.
Couplings, Making pipe. J. H. Sennett. 1,563,664; Dec. 1.
Crank element, Extensible. S. Snyder. 1,563,669; Dec. 1.
Crate, Collapsible. C. M. Franklin. 1,563,856; Dec. 1.
Creamer. K. P. Beattie. Des. 68,890; Dec. 1.
Crown block. E. W. Goeser. 1,563,739; Dec. 1.
Crupper. D. R. Ellis. 1,563,841; Dec. 1.
Cyrolite free from iron, from aluminum-salt solutions containing iron, Producing artificial. H. Specketer. 1,563,536; Dec. 1.
Cuff link. A. J. Kennedy. 1,563,997–8; Dec. 1.
Cultivator fender. E. F. Fones. 1,563,617; Dec. 1.
Currents, Optical means for rectifying alternating. W. W. Coblentz. 1,563,557; Dec. 1.
Curtain fastener. C. W. Morris. 1,564,097; Dec. 1.
Cylinders, Chain drive for drying. E. E. Berry. 1,563,824; Dec. 1.
Dental clasp. R. V. Williams. 1,564,164; Dec. 1.
Derrick, Well-drilling. D. D. Wertzberger. 1,563,412; Dec. 1.
Diagnostic instrument. H. Clement. 1,563,471; Dec. 1.
Die casting, Apparatus for. S. C. Hoey. 1,563,864; Dec. 1.
Direction indicator. F. Ayler. 1,564,118; Dec. 1.
Dishwashing machine. C. F. Smith. 1,564,028; Dec. 1.

Map-folding machine. E. W. Fiala. 1,563,696; Dec. 1.
Massage applicator. E. B. Allen. 1,563,944; Dec. 1.
Measuring hopper. C. S. Johnson. 1,563,718; Dec. 1.
Measuring instrument. A. C. Ulrich. 1,564,154; Dec. 1.
Medical apparatus, Combination. C. B. Fink. 1,563,736; Dec. 1.
Medicament-dispensing cartridge. H. S. Cook. 1,564,048; Dec. 1.
Mercury-rectifier starting device. E. W. Breisch 1,563,330; Dec. 1.
Metal sheets, Antishifting means for piled. W. J. Hammond. 1,563,848; Dec. 1.
Milk, Treating. A. W. Bosworth and L. H. Chrysler. 1,563,891; Dec. 1.
Mill-roll-cooling device. R. W. Brown. 1,564,171; Dec. 1.
Mine door, Automatic. G. Boggio. 1,563,827; Dec. 1.
Mirror, Translucent luminous advertising. C. Nourney. 1,564,010; Dec. 1.
Mixer: *See*—
Beverage mixer.
Mixing machine. W. E. Prescott. 1,563,524; Dec. 1.
Molding machines and the like, Work-guiding means for. C. L. Mattison and W. O. Vivarttas. 1,563,388; Dec. 1.
Mop. N. S. Hillyard. 1,563,745; Dec. 1.
Mop and handle therefor. E. Prendergast. 1,563,653; Dec. 1.
Mop and wringer, Combined. D. Keir. 1,563,496; Dec. 1.
Mopboard protector. F. W. Zastrow. 1,563,889; Dec. 1.
Motor: *See*—
Electric motor.
Motor-control system. R. W. McNeill. 1,564,007; Dec. 1.
Motor-control system. G. E. Stoltz. 1,563,452; Dec. 1.
Motor mechanism, Electric-. G. R. Kunkle. 1,563,380; Dec. 1.
Motors, Governor for internal-combustion. E. Knauss. 1,563,378; Dec. 1.
Multiplane. W. F. Gerhardt and I. M. Laddon. 1,563,419; Dec. 1.
Music-leaf turner. L. Osterman. 1,563,393; Dec. 1.
Napkin holder. A. P. Lindblad. Des. 68,925; Dec. 1.
Nonskid demountable tread for vehicle wheels. J. B. Brockhurst. 1,563,960; Dec. 1.
Nonskid device. W. H. Corey. 1,563,689; Dec. 1.
Oil burners and the like, Automatic controlling means for. J. McFell. 1,564,084; Dec. 1.
Oil-cracking and carbon-removing method and apparatus. L. D. Wyant. 1,563,818; Dec. 1.
Oil-stove burner. W. C. Homan. 1,563,987; Dec. 1.
Oiler, Curve. F. C. Kehr. 1,563,996; Dec. 1.
Oiling system. W. Coburn. 1,563,558; Dec. 1.
Open-hearth furnace. C. Davies, jr. 1,564,049; Dec. 1.
Ores, Process and apparatus for roasting. A. D. H. L. Fassotte. 1,563,616; Dec. 1.
Oscillating units and units with restrained oscillations, Method of and means for balancing and coupling freely-. G. H. Schleferstein. 1,563,531; Dec. 1.
Oscillation generator. W. S. Gorton. 1,563,620; Dec. 1.
Oven. H. Lyon. 1,564,082; Dec. 1.
Oven. W. C. Coleman. 1,563,895; Dec. 1.
Oven, Electric-stove. R. H. MacInnes. 1,564,086; Dec. 1.
Oven front frame, Stove-. A. H. Tinnerman. 1,564,034; Dec. 1.
Package sorter. R. J. Sholtz. 1,563,446; Dec. 1.
Packing machine. C. Boulanger. 1,563,715; Dec. 1.
Paper-box-making machine and the like. S. Bergstein. 1,563,323; Dec. 1.
Paper clip and book holder. A. H. Maynard. 1,563,508; Dec. 1.
Paper folding box. S. Bergstein. 1,563,322; Dec. 1.
Paper-hanger's tool. F. S. Briggs. 1,563,716; Dec. 1.
Paper-making machine. J. K. Darby. Re16,218; Dec. 1.
Paper-making machines, Top press roll for. R. B. Adams and F. R. Woodward. 1,563,943; Dec. 1.
Paper, Method and apparatus for use in sorting. G. F. Hosmer. 1,563,747; Dec. 1.
Paper napkins, towels, and the like, Dispenser for. J. O. Hunt. 1,563,991; Dec. 1.
Paper perforator. S. J. Jacob. 1,563,634; Dec. 1.
Pasteurizing process and apparatus. D. C. Kerckhoff and R. Copp. 1,563,905; Dec. 1.
Peanut bird. R. Gaygen. Des. 68,905; Dec. 1.
Peanut drying and roasting apparatus. H. D. Sawkins. 1,563,661; Dec. 1.
Pen and pencil safes, Combination lock for. G. W. Green. 1,563,621; Dec. 1.
Pencil or pen, Fountain marking. T. G. Sutherland. 1,563,408; Dec. 1.
Percolator heater unit. V. G. Vaughan. 1,563,458; Dec. 1.
Photographic apparatus for checking the aiming and firing operations on board aircraft. L. Belugou. 1,563,463; Dec. 1.
Photographic-developing apparatus. J. Sumter. 1,564,148; Dec. 1.
Piano action or movement. A. Pürrer. 1,563,526; Dec. 1.
Piano, Player-. A. G. Gulbransen. 1,563,977; Dec. 1.
Picker: *See*—
Stone picker.
Picture apparatus, Motion-. F. H. Owens. 1,563,394; Dec. 1.
Pin: *See*—
Pivot pin.
Pinions and wheels, Machine for manufacturing and mounting. A. H. Neureuther. 1,563,431; Dec. 1.
Pipe: *See*—
Smoking pipe.
Pipe. A. Kortejarvi. 1,563,866; Dec. 1.
Pipe clamp. G. Krell. 1,564,001; Dec. 1.
Pipe connection device, Branch-. M. B. Skinner. 1,563,406; Dec. 1.
Pipe joint, Flexible. C. J. P. Hoehn. 1,564,175; Dec. 1.
Pipes of tanks, Control for. H. L. Ridenour. 1,564,179; Dec. 1.
Pistol, Automatic. G. H. Tansley. 1,563,675; Dec. 1.
Piston ring. E. S. Moberley. 1,564,095; Dec. 1.
Piston rings, Making. R. Grover. 1,563,566; Dec. 1.
Pivot pin. H. F. Schulte. 1,563,404; Dec. 1.
Planetary transmissions, Neutral latch for. R. E. Mudd. 1,563,778; Dec. 1.
Plaster and applying same, Sound-absorbing. R. Guastavino. 1,563,848; Dec. 1.
Plaster boards, Interlocking sheet-steel frame for anchorage of. I. Pomerantz. 1,563,651; Dec. 1.
Plastic compositions, Manufacturing. B. W. Rote. 1,563,872; Dec. 1.
Plate. K. P. Beattie. Des. 68,898; Dec. 1.
Plate or similar article. F. G. Holmes. Des. 68,915–16; Dec. 1.
Plowing or cultivating machine. F. H. Liess. 1,564,077; Dec. 1.
Pneumatic drill. C. A. Hultquist. 1,563,632–3; Dec. 1.
Polish, Stove. M. Levin. 1,563,421; Dec. 1.
Polishing machine, Handle-. L. V. Blue. 1,563,714; Dec. 1.
Polishing machine, Reflector-. J. C. Fox. 1,563,355; Dec. 1.
Post base. L. Ponsolle. 1,564,109; Dec. 1.
Power plant. J. Schlumberger. 1,563,405; Dec. 1.
Power transmission and brake, Hydraulic. W. M. Sublette. 1,564,033; Dec. 1.
Power-transmission mechanism. J. W. Miller 1,563,514; Dec. 1.
Press: *See*—
Printing press.
Press button. A. C. Gaynor. 1,563,357; Dec. 1.
Pressing and creasing trousers, Apparatus for. A. Baldesberger. 1,563,825; Dec. 1.
Pressure cooker. A. R. Thompson. 1,564,150; Dec. 1.
Printing mechanism. L. J. Zahn. 1,564,042; Dec. 1.
Printing press. H. R. Linebaugh. 1,563,383; Dec. 1.
Printing press. W. H. Smith. 1,563,449; Dec. 1.
Prints for making halftone printing plates, Producing true gradation. H. C. Knudsen. 1,563,499; Dec. 1.
Protective device. R. V. Craig. 1,564,127; Dec. 1.
Puller: *See*—
Cotter-pin puller. Stump puller.
Pump. B. P. Bates. 1,563,319; Dec. 1.
Pump casing, Gasoline-. C. E. Woodbridge. Des. 68,943; Dec. 1.
Pump, Combined oil and vacuum. C. C. Bradbury. 1,563,328; Dec. 1.
Pump jack. J. Mortensen. 1,564,098; Dec. 1.
Pump, Vacuum. W. H. Millspaugh. 1,563,583; Dec. 1.
Punch. G. H. Spengler. 1,563,671; Dec. 1.
Punch, Hollow. J. Jensen. 1,563,574; Dec. 1.
Rack: *See*—
Ball rack. Toothbrush rack.
Display rack.
Radiant drying system, High-temperature. J. E. Alexander. 1,563,461; Dec. 1.
Radiator. E. F. Andrews. 1,563,543; Dec. 1.
Radiator-cap ornament or similar article. B. R. Brown. Des. 68,901; Dec. 1.
Radiator caps, etc., Anchor for. E. E. Josef. 1,563,749; Dec. 1.
Radiator sections and the like, Casting. C. B. Seem. 1,564,185; Dec. 1.
Radio receiving sets, Automatic cut-off switch for. F. G. Mitchell. 1,563,776; Dec. 1.
Radiopanel, Escutcheon plate for. W. B. Barks. Des. 68,887; Dec. 1.
Radio receiving system. J. B. Brady. 1,563,958; Dec. 1.
Radioreproducers, Base for a loud speaker for. S. Bourne. Des. 68,898; Dec. 1.
Radio vacuum tube. H. K. Huppert. 1,564,070; Dec. 1.
Rail and tie plate therefor. L. R. Parsons. 1,563,919; Dec. 1.
Rail spring and making same. W. J. Costello, jr. 1,563,966; Dec. 1.
Rails, Gauge plate for. O. J. Bujol. 1,563,466; Dec. 1.
Railway-crossing gate. C. Bradshaw. 1,563,329; Dec. 1.
Railway-crossing guard. P. A. Lundblad. 1,563,637; Dec. 1.
Railway-rail ends, Joint for. B. Leslie. 1,564,005; Dec. 1.
Railway-traffic-controlling apparatus. R. P. Tuttle. 1,564,153; Dec. 1.
Railway-traffic-controlling apparatus. H. S. Young. 1,563,819–20; Dec. 1.
Railways, Device for overcoming the break-of-gauge difficulty in. J. H. Saunders. 1,563,530; Dec. 1.
Range finder. R. Kauch. 1,563,373; Dec. 1.
Ratchet wrench. F. Waters. 1,563,863; Dec. 1.
Razor, Safety. R. J. Christy. 1,563,724; Dec. 1.
Razor strop, Safety-. H. B. Hartman. 1,563,852; Dec. 1.

Receiver unit, Loud-speaking. H. Koch. 1,563,500; Dec. 1.
Receptacle, Collapsible. M. G. Grodnick. 1,563,902; Dec. 1.
Record apparatus, Disk-. F. J. Bulask. 1,563,551; Dec. 1.
Recording device, Graphic. J. W. Legg. 1,563,382; Dec. 1.
Rectifier, Mechanical. W. R. Hamilton. 1,564,063; Dec. 1.
Rectifying system, Mechanical. J. Slepian. 1,563,407; Dec. 1.
Reflocculated product, Making a. G. W. Acheson. 1,563,713; Dec. 1.
Refractory material and producing the same, W. A. Harty. 1,563,853; Dec. 1.
Refrigerator. A. N. Hornung. Des. 68,917; Dec. 1.
Refrigerator courter. T. P. Loblaw. 1,563,577; Dec. 1.
Registering device. O. C. From. 1,563,738; Dec. 1.
Regulator: *See*—
Draft regulator.
Relay system. Q. A. Brackett. 1,563,327; Dec. 1.
Resistance device and welding wire. A. E. Waller. 1,563,812; Dec. 1.
Resistor. L. J. Hibbard. 1,563,363; Dec. 1.
Return ball. V. L. Miller. 1,563,912; Dec. 1.
Ribbon fabric. A. J. Scholtes. Des. 68,940; Dec. 1.
Rim with attached clamping lug, Demountable. J. H. Wagenhorst. 1,563,810; Dec. 1.
Ring: *See*—
Piston ring.
Ring. M. L. Robbins. Des. 68,931–3; Dec. 1.
Ring. M. L. Robbins. Des. 68,935; Dec. 1.
Ring. M. L. Robbins. Des. 68,937–8; Dec. 1.
Ringer box and telephone desk stand, Combined. H. F. Obergfell. Des. 68,929; Dec. 1.
Ripple and bubble eliminator. R. M. Putnam. 1,563,436; Dec. 1.
Roasting machine. J. Lieberherr. 1,563,757; Dec. 1.
Rod: *See*—
Tow rod.
Roller: *See*—
Cloth-expanding roller.
Roofing construction. J. F. Stuckert. 1,564,032; Dec. 1.
Rounding articles, Method and apparatus for. G. E. Mirfield. Re16,220; Dec. 1.
Route sheet. R. W. Cullen. 1,563,967; Dec. 1.
Rowing machine. G. Buss. 1,563,962; Dec. 1.
Rubber composition, Treating. J. B. Dickson. 1,564,050; Dec. 1.
Rubber in nonaqueous materials, Incorporation of. J. M. Weiss. 1,563,410; Dec. 1.
Rug strand. O. T. Waite. 1,564,036; Dec. 1.
Safety catch. E. Morehouse. 1,563,777; Dec. 1.
Safety device. W. H. McClelland. 1,563,422; Dec. 1.
Salt and pepper shaker, Combined. F. S. O'Brien. 1,563,917; Dec. 1.
Salts, Separating soluble. C. E. Dolbear. 1,563,613; Dec. 1.
Sash lock. R. Curtis, sr. 1,564,128; Dec. 1.
Saw. A. F. Ouellet. 1,564,105; Dec. 1.
Saw guard. C. B. Auel. 1,563,317; Dec. 1.
Saw, Hack. W. C. Reinhardt and A. W. Lundgren. 1,563,870; Dec. 1.
Saw set. W. L. Taylor. 1,563,539; Dec. 1.
Saw-table guide. F. Bielaski. 1,563,325; Dec. 1.

Tanks, Filling gasoline. W. Friedhoff. 1,563,560; Dec. 1.
Tanks, Safety device for. T. Thomas. 1,564,149; Dec. 1.
Teapot or similar article. K. P. Beattie. Des. 68,889; Dec. 1.
Teacup. K. P. Beattie. Des. 68,892; Dec. 1.
Telegraphs, Tabulating mechanism for printing. C. E. Nelson. 1,563,915; Dec. 1.
Telephone apparatus. L. Schmidt. 1,564,026; Dec. 1.
Telephone diaphragm. L. R. McDonald. 1,563,512; Dec. 1.
Telephone earpiece or receiver. C. E. Williams. 1,563,888; Dec. 1.
Telephone-exchange system. E. S. Gibson. 1,563,618; Dec. 1.
Telephone-exchange system. J. N. Walters. 1,563,599; Dec. 1.
Telephone receiver. H. Koch and F. H. N. Wohlers. 1,563,501; Dec. 1.
Telephone receiver. A. Pihl. 1,563,787; Dec. 1.
Telephone receivers, Sound controller for. M. R. Hutchison. 1,563,572; Dec. 1.
Telephone system. E. H. Clark. 1,563,556; Dec. 1.
Telephone system. E. E. Hinrichsen. 1,563,630–1; Dec. 1.
Telephone system. J. R. Newsom. 1,563,643; Dec. 1.
Telephone system, Automatic. A. H. Dyson. 1,563,347; Dec. 1.
Telephone system, Automatic. W. T. Powell. 1,563,652; Dec. 1.
Telephone system, Automatic. W. T. Powell. 1,564,020; Dec. 1.
Telephone systems, Testing set for. E. Jacobsen. 1,563,370; Dec. 1.
Telephone switch, Automatic. H. W. Goff. 1,563,740; Dec. 1.
Telephones and the like, Silencer for. A. N. Pierman and N. A. Curtiss. 1,563,586; Dec. 1.
Tennis rackets, Handle structure for. C. A. Ovenshire. 1,563,780; Dec. 1.
Terminal, High-tension. R. W. Atkinson. 1,563,946; Dec. 1.
Testing and truing device. J. C. Taylor. 1,563,939; Dec. 1.
Testing apparatus. A. J. Rowland. 1,564,138; Dec. 1.
Textile fabric. F. M. Kaufman. Des. 68,918–19; Dec. 1.
Textile fabric used for draperies. W. H. Grogan. Des. 68,908–12; Dec. 1.
Theatrical novelty. J. A. Partington. 1,563,782; Dec. 1.
Thimble. J. M. Barton. 1,563,954; Dec. 1.
Time switch. J. G. Steiss. 1,563,537; Dec. 1.
Timepieces, Operating mechanism for. G. H. Cooper. 1,564,124; Dec. 1.
Timer. H. W. Gossell. 1,563,703; Dec. 1.
Tire casings, Apparatus for manufacturing. A. Otto. 1,563,519; Dec. 1.
Tire changer. M. Miller. 1,564,092; Dec. 1.
Tire construction, Duo-cord. T. B. Stover. 1,563,672; Dec. 1.
Tire cover. M. B. Loetscher. 1,563,760; Dec. 1.
Tire valve. C. W. Beck. 1,563,320; Dec. 1.
Tire valve. J. Pluto. 1,564,108; Dec. 1.
Tires and making same, Rim for. J. H. Wagenhorst. 1,563,811; Dec. 1.
Toaster. J. M. S. Anderson. 1,563,823; Dec. 1.
Toilet-flushing handle. A. Dominquez. 1,563,729; Dec. 1.
Tongs, Pipe. J. W. A. Andrae. 1,563,542; Dec. 1.
Tool, Carpenter's. L. N. Jones. 1,563,495; Dec. 1.
Tool, Combination. A. F. Wieneske. 1,563,815; Dec. 1.
Tool construction, Hand-. J. T. Hohl. 1,563,707; Dec. 1.
Tooth, Replaceable. W. L. Mason. 1,564,087; Dec. 1.
Toothbrush rack. J. H. Balmer. 1,564,119; Dec. 1.
Torches, etc., Hood or protector for gasoline. B. Martin. 1,563,427; Dec. 1.
Torpedo-filling machine, Top-. P. Giannone. 1,564,134; Dec. 1.
Tortilla-forming machine. Y. M. Atanay. 1,563,314; Dec. 1.
Tow rod. J. Jacobson. 1,563,860; Dec. 1.
Toy. E. E. France. 1,564,132; Dec. 1.
Toy, Animated. W. Brashear, jr. 1,563,548; Dec. 1.
Toy radio. D. Green. 1,563,359; Dec. 1.
Track for vehicles, Endless. O. S. Penn. 1,563,522; Dec. 1.
Tractor driving and steering mechanism. J. C. French. 1,563,479; Dec. 1.
Tractor hoist. W. H. Schmidt, P. O. Dallmann, and T. G. Mueller. 1,563,874; Dec. 1.
Tractors, Distance control attachment for. W. B. Richardson. 1,563,791; Dec. 1.
Tractors, Seat support for. E. O. Bachman. 1,563,824; Dec. 1.
Traffic sign. C. Appe. Des. 68,886; Dec. 1.
Train-control system. P. J. Simmen. 1,563,144; Dec. 1.
Train-stopping apparatus, Automatic. E. D. Brown. 1,563,550; Dec. 1.
Transformer-cooling system. C. L. Fortescue. 1,563,354; Dec. 1.
Transits, Solar attachment for. J. M. Gunn. 1,563,484; Dec. 1.
Transmission systems, Composite ringer for. H. Nyquist. 1,563,432; Dec. 1.
Transmitter, Ball storage. E. E. Kleinschmidt. 1,563,906; Dec. 1.
Transmitter casing, Glow-discharge. L. F. Kindermann. 1,563,375; Dec. 1.
Transmitting energy by means of steam working in a closed cycle, System for. S. Cristiani. 1,563,690; Dec. 1.
Transplanter. L. C. Harry. 1,563,625; Dec. 1.
Trap: *See*—
Animal trap.
Tray, Ash. I. M. Clarke. Des. 68,902; Dec. 1.
Tray, Impression. S. R. Barton. 1,563,955; Dec. 1.
Tray, Smoker's. C. Kuzaroff. Des. 68,922–3; Dec. 1.
Tree, Impregnating living. C. Schmittutz. 1,564,141; Dec. 1.
Trenches, Device for back filling. C. F. Goeringer. 1,563,975; Dec. 1.
Tricycle horse, Galloping. F. G. Baker. 1,563,318; Dec. 1.
Trolley. L. F. Burnham. 1,563,336; Dec. 1.
Trolley-conductor device. P. G. Swars. 1,563,455; Dec. 1.
Trolley pole. T. S. Perkins. 1,563,395; Dec. 1.
Trough, Feed. L. Klow. 1,563,497; Dec. 1.
Trowel, Cement. E. H. Busch. 1,564,172; Dec. 1.
Truck bodies, Dumping mechanism for. W. H. McCormick. 1,563,639; Dec. 1.
Truck bodies, Universal mounting and hoist for dumping. W. H. McCormick. 1,563,638; Dec. 1.
Truck bolster. H. C. Priebe. 1,563,654; Dec. 1.
Truck, Industrial. H. T. Pleines. 1,563,650; Dec. 1.
Truck, Warehouse. D. W. Joyner. 1,563,863; Dec. 1.
Trucks, Hoist for dumping. W. H. McCormick. 1,563,640; Dec. 1.
Trunk. M. J. Peppard. 1,563,784; Dec. 1.
Tub: *See*—
Bathtub.
Tube: *See*—
Radio vacuum tube.
Tube connection, Water-. W. A. Smith. 1,563,802; Dec. 1.
Type-casting machines, Device for buffing matrices for. G. S. Probert. 1,564,110; Dec. 1.
Type-composing machine, Manually-operated. A. S. Adams. 1,563,313; Dec. 1.
Typewriters, Automatic carriage-reversing mechanism for. C. D. French and L. D. Brown. 1,563,702; Dec. 1.
Typewriters, Stencil attachment for. J. I. Mason. 1,563,771; Dec. 1.
Typewriting machine. J. A. B. Smith. 1,563,448; Dec. 1.
Typewriting machine. J. A. B. Smith. 1,563,800; Dec. 1.
Typewriting machine. R. W. Uhlig. 1,563,597; Dec. 1.
Typographical distributing machine. D. S. Kennedy. 1,563,750; Dec. 1.
Typographical distributing machine. J. R. Rogers. 1,563,796; Dec. 1.
Universal joint. W. T. Hensley. 1,563,629; Dec. 1.
Vacuum tank. E. Müller. 1,563,516; Dec. 1.
Valve. B. W. McClymont and S. J. North. 1,563,385; Dec. 1.
Valve. F. A. Nieberding. 1,563,916; Dec. 1.
Valve. H. W. Rottel. 1,563,590; Dec. 1.
Valve, Adjustable automatic pressure-relief. O. C. Blakeslee. 1,563,545; Dec. 1.
Valve and cap apparatus. H. F. Roller. 1,563,871; Dec. 1.
Valve-controlling means. K. J. E. Hesselman. 1,563,744; Dec. 1.
Valve, Float-operated. W. J. Buford. 1,563,719; Dec. 1.
Valve, Flush. R. O. H. Campbell. 1,564,122; Dec. 1.
Valve for brine tanks. A. F. O'Connor. 1,563,645; Dec. 1.
Valve for hot-blast stoves. F. H. Willcox and J. C. Hayes. 1,563,605; Dec. 1.
Valve grinder. J. C. Pewther. 1,564,017; Dec. 1.
Valve lubricator. S. N. Jannes. 1,563,493; Dec. 1.
Valve mechanism, Tank-. A. Campbell. 1,563,554; Dec. 1.
Valve, Tank or ball. J. Van Dyke. 1,563,457; Dec. 1.
Vanity case. G. T. Bates. 1,563,956; Dec. 1.
Vehicle. W. E. McLaren. 1,563,766; Dec. 1.
Vehicle body. R. L. Southern. 1,563,803; Dec. 1.
Vehicle jack. J. E. Beckwith. 1,564,120; Dec. 1.
Vehicle starters, Automatic safety device for motor-. R. E. Ross. 1,563,527; Dec. 1.
Vehicle wheel. J. F. Wilmot. 1,563,679; Dec. 1.

Vehicles, Antislipping device for motor. H. E. Simonton. 1,563,447; Dec. 1.
Vehicles, Arrangement for parking. F. E. Reinhold. 1,563,929; Dec. 1.
Vehicles, Attachment for motor. G. S. Hale. 1,564,061; Dec. 1.
Vehicles, Attachment for taximeter. A. Weiss. 1,564,038; Dec. 1.
Vehicles, Brake band for motor. R. H. Hutchinson. 1,563,368; Dec. 1.
Vehicles, Direction indicator for motor. W. H. Higgason. 1,564,068; Dec. 1.
Vehicles, Direction signal for motor. E. A. Jensen. 1,563,494; Dec. 1.
Vehicles, Electrical system for motor. D. R. Price. 1,563,525; Dec. 1.
Vehicles, Gear-shifting and car-locking mechanism for motor. I. K. Tuerck. 1,563,807; Dec. 1.
Vehicles, Operating and maintenance record for. O. Juvet. 1,563,864; Dec. 1.
Vehicles, Spring suspension for. G. Barker. 1,563,952; Dec. 1.
Vehicles, Spring suspension for. R. Y. Bovee. 1,563,547; Dec. 1.
Vehicles, Spring suspension for motor. C. H. Buckler. 1,563,335; Dec. 1.
Vehicles, Water circulator for. E. Ryder. 1,563,403; Dec. 1.
Vending machine. I. C. Honegger. 1,563,366; Dec. 1.
Veneer press and the like. J. E. Black. 1,563,684; Dec. 1.
Ventilating closet. C. E. Jackson. 1,564,071; Dec. 1.
Venting attachment for large receptacles containing volatile explosives, Safety. J. Cohn. 1,563,472; Dec. 1.
Vibratory separator. W. C. Coleman. 1,563,896; Dec. 1.
Vine clipper or cutter. W. A. Moates. 1,564,094; Dec. 1.
Vine turner. C. T. McCready. 1,563,765; Dec. 1.
Violin. C. C. Lock. 1,564,078; Dec. 1.
Vulvanizing bags, Apparatus for removing. G. K. McNeill. 1,563,513; Dec. 1.
Wagon. E. N. Rousseau. 1,563,401; Dec. 1.
Wagon, Self-loading and tipping. S. J. Boys. 1,563,685; Dec. 1.
Wall-decorating fabric or similar article. A. W. Ankeny. Des. 68,885; Dec. 1.
Washing machine. O. Butzbach. 1,563,552; Dec. 1.
Washing machine. J. J. Groden. 1,564,136; Dec. 1.
Washing machine. A. R. Haag. 1,563,624; Dec. 1.
Washing-machine cylinder. C. F. Anderson. 1,563,822; Dec. 1.
Washing machines, Automatic reversing mechanism for. W. F. Moran. 1,563,913; Dec. 1.
Water-closet. S. De Cola. 1,563,691; Dec. 1.
Water heater, Auxiliary electrical. T. H. Willson. 1,564,040; Dec. 1.
Water heaters, Automatic gas cut-off for gas. A. J. Gilden. 1,564,135; Dec. 1.
Water recooler. J. H. Lakin. 1,564,075; Dec. 1.
Water-tube boiler. J. M. Sullivan. 1,563,938; Dec. 1.
Waterer, Automatic hog. J. Miller and H. Gruber. 1,563,775; Dec. 1.
Waterproofing material and product produced thereby, Process and apparatus for producing. T. W. Morse. 1,563,642; Dec. 1.
Wave-receiving system. H. W. Nichols. 1,563,644; Dec. 1.
Weather strip. A. A. Morse. 1,564,182; Dec. 1.
Weather strip. M. H. Ziegler. 1,563,610; Dec. 1.
Weeder. J. Prater. 1,563,434; Dec. 1.
Weft-carrier magazine. E. H. Ryon. 1,563,592; Dec. 1.
Weighing stand. E. Pearson. 1,563,521; Dec. 1.
Welding. C. H. Humphries. 1,563,748; Dec. 1.
Welding apparatus, Electric. A. E. Cutler and P. A. Marsden. 1,563,612; Dec. 1.
Well drill and tool. J. R. Walton. 1,563,600; Dec. 1.
Wheel: *See*—
Felly wheel.
Vehicle wheel.
Whisk. S. G. Wilson. 1,563,814; Dec. 1.
Winch-control mechanism. R. S. Hoar. 1,563,568; Dec. 1.
Winding machines, Tension device for. L. T. Houghton. 1,563,857; Dec. 1.
Windlass, Well. F. C. Hall. 1,564,062; Dec. 1.
Window-controlling device. S. W. Nicholson. 1,563,390–1; Dec. 1.
Window screen. M. F. Henning. 1,563,361; Dec. 1.
Windows, Mechanism for opening and closing casement. R. W. Prior. 1,563,655; Dec. 1.
Windshield. G. Williams. 1,563,606; Dec. 1.
Wireless receiving system. R. E. Marbury. 1,563,425; Dec. 1.
Wrench: *See*—
Ratchet wrench.
Wrench. J. P. Acord. 1,563,942; Dec. 1.
Wrench. F. W. Trabold. 1,564,035; Dec. 1.
Wrench blank and making same. W. P. Witherow. 1,564,167; Dec. 1.
Wringer. A. R. Haag. 1,563,623; Dec. 1.
Wringer. A. Rasmussen. 1,564,112; Dec. 1.
X-ray films, Developing holder for. J. R. Herradora. 1,563,362; Dec. 1.

# CLASSIFICATION OF PATENTS

## ISSUED DECEMBER 1, 1925.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 50: 1,563,345
2— 12: 1,563,611
97: 1,564,066
98: 1,564,055
181: 1,563,910
195: 1,563,507
240: 1,563,764
1,566,877
3— 6: 1,564,166
4— 44: 1,563,948
64: 1,564,122
67: 1,563,729
72: 1,563,691
181: 1,563,793
213: 1,564,071
5— 96: 1,563,428
7— 8: 1,563,815
13: 1,563,495
10— 27: 1,563,965
107: 1,563,940
12— 2: 1,563,435
24: 1,563,964
33: 1,563,576
145: 1,563,498
15— 114: 1,563,829
119: 1,563,496
171: 1,563,814
227: 1,564,107
228: 1,563,653
229: 1,563,745
260: 1,564,112
16— 86: 1,563,876
112: 1,563,873
134: 1,563,869
18— 2: 1,563,513
1,564,171
19: 1,563,809
45: 1,563,529
1,563,808
53: 1,564,050
19— 36: 1,563,596
20— 0.5: 1,563,412
1.123: 1,563,782
40.5: 1,563,701
66: 1,563,409
67: 1,563,610
69: 1,564,182
22— 2: 1,563,349
13: 1,563,717
78: 1,563,523
125: 1,564,011
134: 1,563,304
184: 1,563,480
200: 1,564,185
23— 33: 1,563,875
40: 1,563,613
54: 1,564,093
88: 1,563,536
154: 1,563,732
236: 1,563,587
360: 1,564,044
24— 3: 1,563,711
102: 1,563,974
1,563,997
1,563,998
110: 1,563,350
1,563,351
136: 1,563,663
157: 1,563,777
191: 1,563,360
201: 1,563,881
225: 1,564,097
228: 1,563,538
241: 1,563,341
249: 1,563,817
1,564,001
25— 1: 1,563,798
2: 1,563,423
37: 1,563,615
41: 1,564,067
128: 1,563,580
131: 1,563,581
157: 1,563,968
26— 63: 1,563,704
28— 1: 1,563,338
29— 38: 1,563,431
73: 1,563,870
29— 73: 1,564,114
96.1: 1,563,840
156: 1,563,664
156.6: 1,563,565
30— 1: 1,563,332
1,563,549
1,563,861
1,564,143
9: 1,563,674
12: 1,563,724
32— 6: 1,563,955
9: 1,564,087
12: 1,564,164
22: 1,563,699
33— 61: 1,563,484
143: 1,564,154
172: 1,563,498
1,563,594
180: 1,563,939

Young & Griffin Coffee Co., Inc., New York, N. Y. Coffee. 219,509; Dec. 8.
Zylocase Company, The, Newark, N. J. Leather optical-frame cases, pocketbooks, cardcases, etc. 220,056; Dec. 8.

# CLASSIFIED LIST OF TRADE-MARKS REGISTERED.

### CLASS 1.

Coal. Coal Hill Mining Company. 206,760; Dec. 8; Serial No. 217,817; published Sept. 22, 1925.
Hops. Premier Malt Sales Corporation. 206,798; Dec. 8; Serial No. 218,021; published Sept. 22, 1925.
Kid, Glazed and dull or "mat." Keystone Leather Co. 50,008; renewed Feb. 27, 1926.
Leather for the uppers of shoes. Robert H. Foerderer, Incorporated. 48,829; renewed Jan. 16, 1926.
Sand. Dorwin Springs Sand & Stone Company. 206,866; Dec. 8.
Sponges, Soap. B. L. Henry. 206,749–51; Dec. 8; Serial Nos. 201,345–7; published Sept. 29, 1925.

### CLASS 2.

Boxes, Paper or pasteboard shipping. Garment Center Fibre Container Corp. 206,772; Dec. 8; Serial No. 215,978; published Sept. 29, 1925.
Caskets, coffins, and fixtures therefor, Burial. National Casket Co. 49,441; renewed Feb. 6, 1926.
Oxygen containers, Liquid-. Purox Company. 206,754; Dec. 8; Serial No. 207,149; published Sept. 29, 1925.
Tanks, Septic. Bennett-Barnes Company. 206,875; Dec. 8.

### CLASS 3.

Bits, spurs, stirrups, buckles, rings, terrets, and hames. F. Eglington. 48,211; renewed Dec. 19, 1925.

### CLASS 4.

Carborundum abrasive material. Carborundum Company. 50,104; renewed Mar. 6, 1926.
Cleaning velvet, silk, and satin, and kid shoes, etc., Preparation for. Whittemore Brothers Corporation. 206,862; Dec. 8.
Soap. Haskins Bros. & Co. 49,653; renewed Feb. 13, 1926.
Soap, perfumery, and cosmetics. C. R. Bailey. 27,134; renewed Oct. 8, 1925.
Soap, Pumice. Iowa Soap Company. 50,071; renewed Mar. 6, 1926.

### CLASS 6.

Abradant. Carborundum Company. 49,394; renewed Feb. 6, 1926.
Acid, Acetyl salicylic. Monsanto Chemical Works. 206,612; Dec. 8; Serial No. 217,724; published Sept. 8, 1925.
Alcohol rubbing preparation. Rector Pharmacal Co. 206,689; Dec. 8; Serial No. 216,696; published Aug. 18, 1925.
Alkaloids, analgesics, anæsthetics, anodynes, etc. Chemische Werke Grenzach Aktiengesellschaft 206,557; Dec. 8; Serial No. 202,927; published Sept. 8, 1925.
Ammonia. Safeway Stores, Incorporated. 206,662; Dec. 8; Serial No. 217,584; published Sept. 8, 1925.
Anodyne antiseptic. A. A. Hoopman. 206,629; Dec. 8; Serial No 216,909; published Sept. 15, 1925.
Ant poison. L. A. Mattes. 206,721; Dec. 8; Serial No. 200,054; published Oct. 28, 1924.
Antiseptic and soothing preparation. E. C. De Witt & Co 206,665; Dec. 8; Serial No. 217,762; published Sept. 8, 1925.
Antiseptic, germicide, fungicide, etc. W. M. Walsh, jr. 206,616; Dec. 8; Serial No. 217,743; published Sept. 8, 1925.
Antiseptic, Liquid. Balsamea Laboratories Incorporated. 206,563; Dec. 8; Serial No. 209,611; published Sept. 29, 1925.
Antiseptic substance. Chemische Fabrik Rhenania. 27,454; renewed Dec. 10, 1925.
Baking powder. Price Baking Powder Company. 49,006; renewed Jan. 16, 1926.
Baking powder. Price Baking Powder Company. 50,421; renewed Mar. 13, 1926.
Bay rum, shampoo, perfume, powders, etc. Morgenstern & Company. 206,822; Dec. 8; Serial No. 217,357; published Sept. 22, 1925.
Bleaching waters. Ideal Bleaching Water Co. 206,606; Dec. 8; Serial No. 217,559; published Sept. 29, 1925.
Bluing. Luther Ford & Company. 206,610–1; Dec. 8; Serial Nos. 217,717–8; published Sept. 8, 1925.
Breath deodorants. H. A. Hampton. 206,571; Dec. 8; Serial No. 215,370; published Sept. 8, 1925.
Cardiotonic. P. Beiersdorf & Co. 206,619; Dec. 8; Serial No. 217,753; published Sept. 8, 1925.
Cascara, almond cream, eye lotion, etc. Smith, Kline & French Company. 206,615; Dec. 8; Serial No. 217,739; published Sept. 8, 1925.
Chemical and pharmaceutical products. "L'Appula" Società Per L'Industria Chimica Italiana. 206,752; Dec. 8; Serial No. 201,406; published Sept. 22, 1925.
Chemical bath to prevent tarnish. Silv-O-Lac Corporation. 206,635; Dec. 8; Serial No. 217,116; published Sept. 15, 1925.
Chemical cleanser for cooling system of internal-combustion engines. C. L. Funnell. 206,590; Dec. 8; Serial No. 218,404; published Sept. 29, 1925.
Chemical compounds. Renaud et Cie. of America. 206,651; Dec. 8; Serial No. 214,821; published Sept. 8, 1925.
Chemical compounds. V. Tompkins. 28,022; renewed Mar. 24, 1926.
Chemical mixture of paint and powder for a cavity filler for trees and an insecticide and disinfectant. B. Fraiser. 206,716; Dec. 8; Serial No. 208,586; published Sept. 22, 1925.
Chemical preparation adapted to be applied to steel to clean same, etc. Chemical Products Corporation. 206,654; Dec. 8; Serial No. 216,017; published Sept. 8, 1925.
Chemical products and colors for use as disinfectants. Hartmann & Hauers. 27,391; renewed Dec. 3, 1925.
Chemicals for compounding rubber. Dovan Chemical Corporation. 206,594; Dec. 8; Serial No, 218,452; published Sept. 29, 1925.
Colloidal preparation of a silver protein. H. K. Mulford Company. 206,587; Dec. 8; Serial No. 218,368; published Sept. 29, 1925.
Compound for mending leaks. C. R. Meeker. 206,634; Dec. 8; Serial No. 217,106; published Sept. 15, 1925.
Cosmetics, pastes, powders, and toilet preparations, and perfumery. Parfumerie Roger & Gallet. 206,644; Dec. 8; Serial No. 212,198; published Sept. 15,1925.
Cough cure. Kickapoo Indian Medicine Co. 50,565; renewed Mar. 20, 1926.
Cough mixtures. M. Scheinberg. 206,735; Dec. 8; Serial No. 215,314; published Sept. 15, 1925.
Cream, Vanishing. H. J. Jeffres. 206,667; Dec. 8; Serial No. 217,934; published Sept. 15, 1925.
Creams, face lotions, rouges, etc., Face, cleansing, and vanishing. Lowell Company. 206,711; Dec. 8; Serial No. 200,364; published Sept. 22, 1925.
Creams, lemon cream, tissue builder, face lotions, and face powder, Cold. Clarks Products Inc. 206,834; Dec. 8; Serial No. 216,506; published Sept. 22, 1925.
Dandruff and scalp remedy. J. C. Falvey. 206,595; Dec. 8; Serial No. 218,455; published Sept. 29, 1925.
Deodorant, Foot. J. Koffa. 206,575; Dec. 8; Serial No. 218,187; published Sept. 29, 1925.
Depilatory. Nu-Art Laboratories Inc. 206,839; Dec. 8; Serial No. 215,942; published Sept. 22, 1925.
Disinfectants and insecticides, antiseptics, etc., Poultry. Purity Chemical Products Company. 206,830; Dec. 8; Serial No. 216,934; published Sept. 22, 1925.
Douche, Medicinal and antiseptic. Orion Pharmacal Co. 206,668; Dec. 8; Serial No. 217,954; published Sept. 15, 1925.
Dye, Fur. Meisel Galland Company. 206,714; Dec. 8; Serial No. 207,941; published Sept. 22, 1925.
Dye, Fur. Meisel Galland Company. 206,715; Dec. 8; Serial No. 207,943; published Sept. 22, 1925.
Effervescent sodium-phosphate compound. H. K. Mulford Company. 206,586; Dec. 8; Serial No. 218,366; published Sept. 29, 1925.
Eye drop. Optical Chemical Co. 206,626; Dec. 8; Serial No. 216,633; published Sept. 8, 1925.
Face powders, skin lotions, rouges, etc. A. Edelstein. 206,697–8; Dec. 8; Serial Nos. 217,702–3; published Sept. 8, 1925.
Fat-reducing preparation. A. Kremer. 206,661; Dec. 8; Serial No. 217,566; published Sept. 8, 1925.
Ferments of yeast and converting agents. J. Takamine. 27,401; renewed Dec. 3, 1925.
Fly-repelling preparation. D. F. Burns. 206,576; Dec. 8; Serial No. 218,162; published Sept. 29, 1925.
Fuel constituent, Motor-. G. Wishart. 206,627; Dec. 8; Serial No. 216,705; published Sept. 8, 1925.
Fuels, Antiknock and carbon-removing preparations for. Union Creosote & Oil Company. 206,700; Dec. 8; Serial No. 215,664; published Sept. 22, 1925.
Gargle, mouth wash, and throat spray. Orion Pharmacal Co. 206,759; Dec. 8; Serial No. 217,953; published Sept. 22, 1925.
Germicides, disinfectants, etc. Monsanto Chemical Works. 206,613; Dec. 8; Serial No. 217,725; published Sept. 8, 1925.
Glycerin product. Lever Brothers Company. 206,653; Dec. 8; Serial No. 215,934; published Sept. 8, 1925.
Gum, Chewing. F. E. Bridges. 206,696; Dec. 8; Serial No. 215,436; published Sept. 8, 1925.
Hair remover. De Miracle Chemical Co. 48,207; renewed Dec. 19, 1925.
Hair restorer. D. Frugoli. 206,824; Dec. 8; Serial No. 217,269; published Sept. 22, 1925.
Hair tonic. F. Federico. 206,623; Dec. 8; Serial No. 216,592; published Sept. 8, 1925.
Hair tonic. Yvette Co. 206,622; Dec. 8; Serial No. 216,373; published Sept. 8, 1925.
Insecticide, disinfectant, and deodorant. Hygienic Sanitation Company. 206,597; Dec. 8; Serial No. 218,459; published Sept. 29, 1925.
Insecticides. Duncan, Fox & Co. 206,732; Dec. 8; Serial No. 214,242; published Sept. 15, 1925.
Insecticides and fungicides. Herbert & Herbert, Inc. 206,722; Dec. 8; Serial No. 202,453; published Sept. 8, 1925.

Iodine peroxide of hydrogen. J. Bohlander. 206,564; Dec. 8; Serial No. 212,368; published Sept. 8, 1925.
Laxative candies, Fruit. Frutex Products Co. 206,670; Dec. 8; Serial No. 218,004; published Sept. 15, 1925.
Laxative drinking water. Bingo Springs Laboratories. 206,593; Dec. 8; Serial No. 218,447; published Sept. 29, 1925.
Laxative, Natural fruit. M. A. Crane. 206,762; Dec. 8; Serial No. 217,698; published Sept. 22, 1925.
Laxative preparation, Tonic. A. Kremer. 206,660; Dec. 8; Serial No. 217,565; published Sept. 8, 1925.
Laxatives. San-I-Sal Laboratories, Inc. 206,585; Dec. 8; Serial No. 213,321; published June 23, 1925.
Lice powder. I. B. Rogers Company. 206,620; Dec. 8; Serial No. 217,799; published Sept. 29, 1925.
Liniment. J. H. Pickett. 206,728; Dec. 8; Serial No. 203,090; published Sept. 15, 1925.
Lotion for removing wrinkles. Oberheim & Co. 206,614; Dec. 8; Serial No. 217,731; published Sept. 8, 1925.
Lotion for skin diseases, etc. Wheeler Chemical Company. 206,676; Dec. 8; Serial No. 218,226; published Sept. 15, 1925.
Lung and nerve preparation. Crawford Remedy Co. 206,636; Dec. 8; Serial No. 185,748; published Sept. 15, 1925.
Lung tea, stomach powders, etc. Golden Eagle Remedy Co. 206,652; Dec. 8; Serial No. 215,148; published Sept. 15, 1925.
Lye. Mathieson Alkali Works. 206,630; Dec. 8; Serial No. 216,920; published Sept. 15, 1925.
Lye and other pipe solvents. B. T. Babbitt. 206,765; Dec. 8; Serial No. 216,665; published Sept. 22, 1925.
Lye and potash. Brookman Manufacturing Company. 49,181; renewed Jan. 30, 1926.
Meat cure, Dry. Frank Tea & Spice Co. 206,734; Dec. 8; Serial No. 214,472; published Sept. 8, 1925.
Medical compounds. Owl Drug Co. 51,942; renewed Apr. 24, 1926.
Medical preparations and serums. Behringwerke A. G. 206,740; Dec. 8; Serial No. 195,209; published Sept. 22, 1925.
Medicinal preparation. Lauber & Lauber Co. 206,592; Dec. 8; Serial No. 218,420; published Sept. 29, 1925.
Medicinal preparation for treatment of sprains, bruises, etc. Ima Products Corporation. 206,591; Dec. 8; Serial No. 218,413; published Sept. 29, 1925.
Medicinal preparation of balsam. Red Sea Balsam Co. 206,656; Dec. 8; Serial No. 216,290; published Sept. 8, 1925.
Medicinal preparations. W. H. Wyszynski. 206,618; Dec. 8; Serial No. 217,748; published Sept. 8, 1925.
Medicinal preparations for poultry. The Haller Company. 206,596; Dec. 8; Serial No. 218,458; published Sept. 29, 1925.
Medicine for asthma. J. L. Stern. 206,560; Dec. 8; Serial No. 205,375; published Sept. 29, 1925.
Medicine for headaches and rheumatic affections. E. Bouquet. 206,826; Dec. 8; Serial No. 217,203; published Sept. 22, 1925.
Medicine for lung trouble, grippe, etc. Richardson and Richardson. 206,844; Dec. 8; Serial No. 217,635; published Sept. 22, 1925.
Medicine for pneumonia. J. Staskevitch. 206,645; Dec. 8; Serial No. 212,970; published Sept. 15, 1925.
Medicine for promoting genesis among animals. John N. Tsaoussis & Son. 206,637; Dec. 8; Serial No. 200,587; published Sept. 15, 1925.
Medicine for pyorrhea and catarrh. Simmons and Belcher. 206,657; Dec. 8; Serial No. 216,566; published Sept. 15, 1925.
Medicine for rheumatism. J. H. Brown. 206,580; Dec. 8; Serial No. 217,984; published Sept. 29, 1925.
Medicine for rheumatism, asthma, pleurisy, etc. E. Capecelatro. 206,671; Dec. 8; Serial No. 218,103; published Sept. 15, 1925.
Medicine for rheumatism, lumbago, and kindred ailments. H. Cohen. 206,825; Dec. 8; Serial No. 217,209; published Sept. 22, 1925.
Medicine for use in the treatment of cholera. C. J. Kiefer. 206,829; Dec. 8; Serial No. 217,099; published Sept. 22, 1925.
Medicine, Proprietary. Dr. Kilmer & Co. 49,156; renewed Jan. 23, 1926.
Medicines. H. O. Hurley. 50,548; renewed Mar. 20, 1926.
Medicines and toilet preparations, Certain named. Boehringer & Reuss. 27,318; renewed Nov. 26, 1925.
Mono-endocrine proteins, Solutions of. Harrower Laboratory, Inc. 206,831; Dec. 8; Serial No. 216,722; published Sept. 22, 1925.
Oil, Castor. Kellogg Toasted Corn Flake Co. 206,720; Dec. 8; Serial No. 172,886; published Mar. 31, 1925.
Oil for chickens, Cod-liver. Scott & Bowne. 206,683; Dec. 8; Serial No. 217,299; published Sept. 29, 1925.
Oil for dogs, Cod-liver. Scott & Bowne. 206,680; Dec. 8; Serial No. 217,302; published Sept. 29, 1925.
Oil for foxes, Cod-liver. Scott & Bowne. 206,681; Dec. 8; Serial No. 217,301; published Sept. 29, 1925.
Oil for hens, Cod-liver. Scott & Bowne. 206,682; Dec. 8; Serial No. 217,300; published Sept. 29, 1925.
Ointment. F. Elster. 206,655; Dec. 8; Serial No. 216,031; published Sept. 15, 1925.
Ointment. Koenig Medicine Co. 206,624; Dec. 8; Serial No. 216,608; published Sept. 8, 1925.
Ointment, Orion Pharmacal Co. 206,581; Dec. 8; Serial No. 217,952; published Sept. 29, 1925.
Ointment, Antiseptic. Manatawny Products Company. 206,666; Dec. 8; Serial No. 217,887; published Sept. 15, 1925.
Oxygen and oxygen manufactured by the liquefaction process, Liquid. Purox Company. 206,713; Dec. 8; Serial No. 207,148; published Sept. 22, 1925.
Perfume. Best & Co. 206,589; Dec. 8; Serial No. 218,387; published Sept. 29, 1925.
Perfume, toilet water, face powder, and talcum. Or-Blos Company. 206,648; Dec. 8; Serial No. 214,743; published Sept. 15, 1925.
Perfumery. Renaud et Cie. of America. 206,649; Dec. 8; Serial No. 214,817; published Sept. 8, 1925.
Perfumery, toilet and talcum powders, and rouge. Meier & Frank Co. 206,675; Dec. 8; Serial No. 218,194; published Sept. 15, 1925.
Perfumery, toilet preparations, powder, toilet water, and ingredients for the bath. H. Mack. 27,568; renewed Dec. 31, 1925.
Perfumes, rouge, face powders, shampoos, and face lotions. Millin Drug Company. 206,646; Dec. 8; Serial No. 213,450; published Sept. 8, 1925.
